No. 4. G. Valensin, Arno Station, Sacramento Co., names br m Ouida, by Black Hawk, dam by Fanny King. [Closed by agreement.]

THIRD DAY—WEDNESDAY, SEPT. 6.

No. 8. - RUNNING. - Free for all; 2-mile dash; \$100 entrance; \$25 forfeit; \$250 added; second horse to save stake.

No. 1. P. J. Shafter, San Francisco, names b c Night Hawk (5), by imp. Haddington, dam by Norfolk.

No. 2. Leland Stanford, Palo Alto, names b f Precious, by Lever, dam Frolic by Thunder.

No. 3. Wm. Boots, Milpitas, names b m Mollie H. (5), by Wildidle, dam Marie Hall by Norfolk.

No. 4. J. T. Gilmer, Salt Lake, names b Red Boy (aged), by War Dance, dam imp. Neilson.

No. 5. Stemler & Ayres, Portland, Or., name ch g Fred Collier, by Joe Hooker, dam Fuss by Norfolk.

No. 9. - SAME DAY. - TROTTING. - Free for all three-year-olds; purse, \$300; first horse, \$200; second, \$150; third, \$50.

No. 1. J. C. Simpson, Oakland, names b c Anteo, by Electioneer, dam Columbine, by A. W. Richmond, g d Columbine, by Bonnie Scotland.

No. 2. Jas. M. Learned, Stockton, names - Adrian, by R. Hance, dam by Kentucky Hunter.

No. 3. Irving Ayers names blk s Fred. Arnold, by Nephew, dam Fanny Fern, mother of Mollie Drew.

No. 4. Filly, by Admiral. [Closed by agreement.]

No. 10. - SAME DAY. - TROTTING. - 2-22 Class; purse, \$800; first horse, \$450; second, \$240; third, \$50.

No. 1. J. B. McDonald, Marysville, names b s Brigadier by Happy Medium, dam Lady Turner.

No. 2. John A. Goldsmith, Oakland, names gr s Romero, by H. W. Richmond, dam by Manbrino Pilot.

No. 3. L. H. Titus names b m Belle Echo, by Echo, dam by Belmont. [Closed by agreement.]

FOURTH DAY—THURSDAY, SEPT. 7.

No. 11. - TROTTING. - Free for all two-year-olds; one mile and repeat; purse, \$400; first horse, \$240; second, \$120; third, \$40.

No. 1. L. J. Rose, San Gabriel, names br f Zeluska, by Sultan, dam Gretchen by Manbrino Pilot.

No. 2. S. Rosener names b f Ruby, by Sultan, dam by Hambletonian; owner J. W. Mackey.

No. 12. - SAME DAY. - TROTTING. - For all four-year-olds; purse, \$600; first horse, \$360; second, \$180; third, \$60.

No. 1. James Garland, San Francisco, names gr g Rowdy Boy, by Rustic, dam by Belmont.

No. 2. A. Waldstein, San Francisco, names b s Albert W., by Electioneer, dam by John Nelson.

No. 13. - SAME DAY. - RUNNING. - SELLING RACE. - Purse, \$250; free for all; 1-mile dash; second horse to receive \$75; horses entered to be sold for \$1,000, to carry entitled weight; 2 pounds off for each \$100 under fixed valuation.

No. 1. P. J. Shafter, San Francisco, names blk h Haddington, by imp. Haddington, dam by Norfolk, valuation of horse \$300.

No. 2. John H. Cardinell, San Francisco, names ch b Jack Douglas, by Wildidle, dam Lady Clare.

No. 3. Wm. Boots, Milpitas, names ch c Inauguration, 3 years, by Wildidle, dam Miami by Belmont.

No. 4. Henry Schwartz, San Francisco, names Sister to Lottery (5 years), by Monday, dam Virginia.

No. 5. J. T. Gilmer, Salt Lake, names ch c Euchre, 5 years, by Leinster, dam Flush, price \$500.

No. 6. Stemler & Ayres, Portland, Or., names b g Joe Howell by imp. Bonnie Scotland, dam Eva Shepperd, by imp. Sovereign.

FIFTH DAY—FRIDAY, SEPT. 8.

No. 14. - RUNNING. - CONSOLATION PURSE. - \$250 for beaten horses; mile-and-a-quarter dash; second horse to receive \$75; 10 per cent. entrance.

No. 15. SAME DAY. - LADIES' RIDING TOURNA-MENT. There will be several very choice and elegant prizes to be competed for, contributed by the merchants and citizens of Oakland and San Francisco; the lady winning first prize to have first choice, the second, second choice, and so on until all the prizes are distributed. Ladies wishing to compete for premiums will send their names to the President or Secretary on or before the first day of September, 1882, endorsed by at least two gentlemen of the Society. Conditions will be published in the daily papers.

No. 16. - SAME DAY. - TROTTING. - 2-25 Class. - Purse, \$800; first horse, \$480; second, \$240; third, \$80.

No. 1. Charles W. Welby, San Francisco, names Starr King, by Geo. M. Patchen, Jr., dam Mary Wonder.

No. 2. Jackson Cochran, Chico, names Ashley, by Plumus, dam by George.

No. 3. L. J. Rose, San Gabriel, names blk s Del Sur, by The Moor, dam Gretchen, by Manbrino Pilot.

No. 4. John A. Goldsmith, Oakland, names blk s Director, by Dictator, dam by Manbrino Chief.

No. 5. J. H. Dodge, Stockton, names ch h Honesty, by Priam, dam by Chieftain.

No. 6. L. H. Titus names br m Echors, by Echo, dam by Jack Hawkins.

No. 7. G. Valensin, Arno Station, Sacramento County, names ch s Crown Point, by -.

No. 8. James W. Learned, Stockton, names b s Reliance, by Alexander, dam Maud, by Manbrino Kattler.

No. 9. John Hughes, San Francisco, names b h Cairo, by Chieftain, dam unknown.

No. 17. - SAME DAY. - SPECIAL TROT AGAINST TIME. - A purse of \$50 will be awarded to any yearling making the best time, a full mile to harness; no entrance fee.

No. 1. J. C. Simpson, Oakland, names br c Anteo, by Electioneer, dam Columbine, by A. W. Richmond, g d Columbine, by Bonnie Scotland.

No. 2. Geo. Hayes, Petaluma, names ch c Dawn, by Nutwood, dam Countess.

SIXTH DAY—SATURDAY, SEPT. 9.

No. 18. - COMPETITIVE CADET DRILL. - PRIZE, \$150 Gold Medal. Competition open to all educational institutions in the State.

No. 19. SAME DAY. - COMPETITIVE MILITARY DRILL. - A prize of the value of \$250 will be offered by the Association to the best drilled Military Company in the State of California. Rules and conditions to be published hereafter. It is the intent of the Directors to have the first competing companies determine what the prize or trophy shall be, and to have the same annually competed for, until it shall have been won three times by the same company, when it shall become the absolute property of the winning company.

No. 20. - SAME DAY. - A BICYCLE RACE OF ONE mile, free for all, for a purse of \$50, of which \$35 to the first and \$15 to the second; entrance, free; the nominations to be made at the latest, on the first day of the Fair, at 3 P. M., with the Secretary at the track.

No. 21. - SAME DAY. - TROTTING. - Free for all; purse, \$800; first horse, \$480; second, \$240; third, \$80.

No. 1. H. Goldsmith, Oakland, names b s Gibraltar, by Echo, dam by Belmont.

No. 2. John A. Goldsmith, San Francisco, names b m Sweetness, by Volunteer, dam by Edward Everett.

[The above not filling, the Managers have offered a purse of \$500, free for all trotters and pacers, with four moneyes, as will appear by an advertisement in to-day's Chronicle.]

No. 22. - SAME DAY. - A SET OF HARNESS, of the value of \$125, will be offered for gentlemen's roadsters; best two in three; owners to drive.

By a "gentleman's roadster," is meant any animal owned and driven on the road by any gentleman for his own private pleasure.

No. 1. W. E. Dargle, Oakland, names b s Phillip.

No. 2. Robert Noblett, Oakland, name b g Prophet.

No. 3. Jas. M. Learned, Stockton, name Ollie Ray.

No. 4. Sawyer, Oakland, names b s Emperors by Kalston, dam Katy Tricks.

CONDITIONS.

All the trotting and pacing races are the best three in five. When there are eight or more starters in a trotting race, 150 yards to be a distance.

National Association rules to govern trotting, but the Board reserves the right to trot heats with any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats.

Those who have nominations in stakes must name to the Secretary, in writing, the horses they will start on Monday, on the Saturday previous; and on Wednesday the Monday previous; and on Friday the Wednesday previous. No added money will be paid for a walk over.

Horses entered in purses can only be drawn by consent of the judges.

Rules of the Pacific Coast Blood Horse Association to govern running races, except as above specially provided.

Write "Entries to races" on outside of Envelope.

L. WALKER, Secretary. A. C. DIETZ, President.

NOTABLE HORSES OF CALIFORNIA.

ELMO.

We have waited, not too patiently, perhaps, for Overman to verify the predictions we so confidently published from the time he was first broken. The belief was never shaken, however, and from the time he trotted his first race until the present day, the favorable impression never grew faint. Elmo was already notable, and his capacity, breeding and form were sufficient to award him a place in our gallery. But from the time the entries in the Grand Circuit were announced, we felt positively certain that before the end came, he would "show a trotter" of his get which would entitle him to a more prominent place. Overman is in reality the only colt which had any chance granted him to make a trotter, and he has been unfortunate ever since he was a three-year-old. Mr. Seale has bred many which gave just as good promise as Overman did at the same age, but owing to other pressing business and the difficulty of obtaining men whom he could entrust with the entire management,

the education was neglected. Again, when a colt showed speed it would be sold for road uses, and thus Overman is the only Elmo colt that we know of being worked on a track, excepting one or two youngsters at Mr. Seale's place. The size, style and fine appearance, which is nearly a universal characteristic of the stock, give a value for the road and carriage which ensures a ready sale. This, manifestly, interferes with the proper development of track speed; and then Mr. Seale holds that road horses should not be subjected to track usages when their destiny is so different. There is a great deal of sound logic in the arguments he advances to support this view of the question. There is the danger of causing them to "pull," and other bad habits arising from the main desire of the trainer being to increase the speed irrespective of consequences. The curves of the track necessitate boots; their heads at times are thrown into an unnatural position, and the smooth surface tends to

careless habits which are found inimical. His plan is to take the colts on the road, and in lieu of every effort to increase the speed, let the teachings be to make them pleasant drivers, square-gaited, of proper style, and above all, of good behavior. As has been previously stated the Elmos are natural roadsters. The gait is a pure, square trot, generally long striders and moving with little "friction." Elmo himself was nearly perfect in his action, and at one time so fast that a former owner, Mr. Van Giesen, informed us that he had timed him quarters in thirty seconds. He belongs to a trotting family. His sire, Mohawk, was by Long Island Black Hawk, one of the famous old-time trotters, and he was by Andrew Jackson, the founder of the great tribe of the Clays. Andrew Jackson was by Young Bashaw, a son of the imported Barb Grand Bashaw, and the dam of Young Bashaw was a very highly bred mare, Pearl, by First Consul (Bond's), grandam Fancy, by imported Messen-

ger, and his third dam by imported Rockingham. From this horse come the Bashaws, so that two of the prominent trotting families spring from the union of Barb and thoroughbred. The dam of Elmo was by Sir Richard, a son of the thoroughbred of that name. The sire of Elmo has proved his capacity as the progenitor of trotters, as Clark's Mohawk, Jr., had a record of 2:25, made in Cleveland, Ohio, ten years ago; Hall's Mohawk, Jr., record of 2:26, and Elmo, 2:27. Fast trotting was not the only valuable characteristic, as both of the Mohawk, Jr.s, were large, fine-looking horses, of about the same size as Elmo, and with the same kind of action. Clark's Mohawk was thought to be the most promising stallion of the day. He was only six years old when he trotted in 2:25, and died when ten years old. The Mohawks—as is shown by the duplication of names—are very popular in Ohio, their size and symmetry giving them value outside of the possession of trotting speed. Elmo's trotting in California was limited to three matches. One against Ajax for \$5,000; one against Jerome for \$2,000, and one with May Howard for \$2,000. All of these he won with the greatest ease, as he never lost a heat in the series. That with Ajax was heats of a mile, best 3 in 5, and he won in 2:30½, 2:31½, 2:31½. With Jerome the distance was heats of two miles, the time, 4:58¼, 4:59, and the match against May Howard was won in 2:27, 2:27, 2:29. In the race with Jerome he showed his old-time flight of speed, making a half mile in one of the heats in 1:08. Elmo is one of the most commanding horses in appearance which we ever saw. The engraving gives a capital idea of his form, and the likeness is as nearly perfect as can be conceived. It is not only a faithful transcript of his configuration, but the artist has caught the spirit of the scene and transferred the horse exactly as he stood on the bright morning we accompanied Mr. Wytenbach to the Rancho San Francisquito. The color cannot be represented in an engraving, and the size requires words to express, but in every other respect the picture is a model of the horse. Elmo is sixteen and a quarter hands in height, and is a "long horse" as well as a high one. He is as sound as it is possible for a horse to be, not a swelling on any joint, not a tendon puffed or a blemish as large as a pea on any part. His color is a deep chestnut, nearly the shade that bronze assumes when long exposed to the atmosphere. It is one of the very handsomest shades of chestnut, and the light mane and tail, the white stripe in the face, the white markings on the near legs, and the brilliant light hazel eyes, are in fine contrast to the darker hue. The coat is as smooth and glossy as that of a thoroughbred, and the hairs in the mane and tail are soft and fine. Altogether he is a horse which will attract attention in any circumstance. A pair of the same appearance would command a large price for the carriage—a team of the same proportion bring the "top of the market" for general purposes. As a further proof of the high estimate we have always placed on Elmo, the following account, written in March, 1877, is given:

A deep bronze chestnut, with silver mane and tail, and of such size and symmetry of proportion, that a person is forced to exclaim, "A grand horse, truly." His color is rare, and when relieved by the light colored mane and tail, handsome in the extreme. He is remarkably well formed for so large a horse, and moves with the agility and sprightliness of an Arab. He was running in a loose box, of ample size, but in addition to this he had the freedom of a paddock adjoining, where he could inhale the perfume of the lilac, and hear the merry songs of the linnets and thrushes in the trees which shaded it. Although considerably over sixteen hands in height, there is nothing clumsy in his appearance, and he strikes out with a bold, free gait, although the limits of his paddock are somewhat circumscribed. Having a large share of the best blood, it would be singular if his looks did not comport with his pedigree. The change we noted since we first saw him was in the increased size of his body, being very much deeper through the chest, and longer from the point of the hip to the quarters.

He was only a colt when brought from Ohio to Chicago, and was somewhat leggy and light in the carcass then. A very handsome, striking looking colt withal, but as his owner did not claim much speed for him, he failed to find a purchaser in the "city on the lake," and took him to Wisconsin. He was owned there by a gentleman, Mr. Van Giesen, who still tells marvelous stories of the great speed he displayed in his exercise, and the writer has at several times awakened his ire by looking incredulous when he told of his beating a fair race mare through the stretch, she running and he trotting. That he exhibited wonderful speed is beyond question, and Messrs. Bently, Taylor and Hickok purchased him and "carried" him East. His overgrown, and at the same time rather large, frame was inimical to his showing his full capacity in races. Yet his performances were very creditable; we saw him in a race at Buffalo shut up a wonderful gap, contesting with very fast horses, and had the stretch been a little longer he would have won. He was brought to California with Goldsmith Maid and Lucy, and his races here with Ajax and Jerome stamped him as an animal of great merit. He belongs to a family which is greatly distinguished in equine history, on the sire's side tracing his genealogy to the imported Barb, from which has descended the family of Clays, the Long Island Black Hawks, the Jacksons, etc.

OVERMAN'S GREAT PERFORMANCE.

As a fitting accompaniment to the full description of Elmo, we give the following account of the trot won re-

cently at Buffalo by Overman, a worthy son of so great a sire, and merely add that he since has won in the 2:29 class at Rochester and Poughkeepsie. The description of the race was taken from the letter of the special commissioner of the New York Spirit of the Times.

"In the purse of \$1,500 for the 2:29 class, there were Overman, Abe Downing, St. Cloud, Rolla, Little Billy, Kate Taylor, London Rigolette, Yellow Dock and Big Ike. The pools sold steady at \$25 for London, \$13 for Overman or Yellow Dock, and \$25 for the field.

First Heat.—Vexatious scoring was indulged in, and at last the word was given, with Big Ike and Rolla "left at the post." St. Cloud trotted fast from an outside position, and took the pole around the turn, leading Abe Downing a length to the quarter, in 34 seconds, with Rigolette third, and the others bunched. St. Cloud, by aid of a few handy skips, managed to keep the lead to the half, in 1:10, with Downing at his throat-latch, Overman third, and Kate Taylor fourth. Shortly afterward Downing passed St. Cloud, and drew away from him to the three-quarter pole. Overman came very fast on third quarter, ranged alongside of Downing, and they had a close race down the home-stretch, Downing finally landing a neck in front, with St. Cloud two lengths behind and Kate Taylor on his wheel, the others as per summary. Big Ike and Rolla had a close race with the flag; time, 2:20¾.

Second Heat.—The result of the previous heat made Overman or Downing the choice. Pools, \$15 for the field and \$25 for Overman or Downing. There was considerable delay in scoring, and when the word was given, Downing and Overman were when steadied back, while the outside horses were under way; per consequence, Overman lost his place, and Downing had to make an extra brush to save himself from being cut off. Rolla had the best of the send-off, and lapped Downing at the quarter in 31½ seconds. He outfooted the latter to the half in 1:10½, but from this point Downing took the lead, St. Cloud spurred into second place, and Overman, having picked his way through the rack at the quarter pole, trotted very fast along the back-stretch. Closing with the leaders around the upper turn, he passed both St. Cloud and Rolla, and got within a length of Downing at the three-quarter pole. The pace here was very hot, and they began to draw away from the others. Overman slowly but surely drew up on Downing, and the brush down the home-stretch was so well contested that ready bets were exchanged on every hand. "I'll bet \$10 Overman wins it," "I'll take you," was frequently heard, while the spectators cheered their favorites. They were even within a few yards of the wire, but Downing broke at the critical moment and caught quickly, but Overman beat him by half a length, in 2:20¾. The others finished in the order named in summary, but were not close to the leaders. Johnson and Hickok both complained of the send-off, the former charging the loss of the heat to it, and Hickok asserting he could have won it easier had he not been interfered with as soon as the word was given.

Third Heat.—Overman's chances were now considered twice as good as the field's, and pools sold on him \$50 to \$25. Scoring was long and tedious, and, notwithstanding the drivers of Big Ike and Rolla were fined \$10 each, Brown continued to show in front with St. Cloud, and when the word was given he had a length the best of it, passing immediately in front of Overman and Downing, and taking the pole on first turn, and opening a gap of two lengths to the quarter-pole, in 35½ seconds, with Overman second, and Rolla, Downing, and Kate Taylor all together, the balance of the field out of the contest. Overman, having now found clear sailing, quickly overhauled St. Cloud to the half in 1:12, but he managed to keep the pole by the aid of an occasional "dip and dive," but, as they approached the three-quarter pole, Overman crowded all sail, and carried him to a break; he settled, but could not catch Overman, who passed under the wire with plenty to spare. St. Cloud was set back to third place for running, and Rolla, who had finished on his wheel, was given second position. The others did not cut any figure in the heat, and were placed as per summary; time, 2:23¾.

Fourth Heat.—A few scratch players at this stage of the race wagered \$10 against \$50 that Overman would not win, but pool-selling was virtually at an end. After a few vain attempts they turned close together, and Rigolette's sulky collided with that of Rolla's, throwing out Barney Stanford, his driver, who gamely held on to the reins until succor came. No serious damage or injury was done, and the horses scored up again, with McCarthy behind Yellow Dock. A good send-off was obtained, and St. Cloud had a trifle the best of it, but did not interfere with Overman on the first turn, and the latter kept the pole throughout the heat, going to the quarter in 35½ seconds, with St. Cloud second, on his wheel. Yellow Dock, for the first time in the race, appeared to dispute the lead. She drew up on the inside of Overman, but broke badly near the half, and that settled her chances. The leaders continued to draw away from the party, going to the half in 1:13. Overman left St. Cloud on third quarter, and, coming along with a big, raking stride, finished very strong in 2:24½. St. Cloud was second, under a vigorous application of the whip, and Little Billy a length behind him. The others never looked dangerous.

Buffalo, August 2, 1882.—Purse, \$1,500; 2:29 class.

O. A. Hickok's ch. g. Overman, by Elmo	2	1	1	1
P. V. Johnson's b. s. Abe Downing, by Joe Downing	1	2	5	9

Mr. Morse's ch. m. Yellow Dock	8	6	8	6
Roop & Sewbourne's b. g. Big Ike	10	10	9	10

Time—2:20½, 2:20¾, 2:23¾, 2:24½.

Overman fulfilled my last week's estimate of him sooner than I expected. He is a high-strung fellow in a large field of horses, and Orrin Hickok drove him to-day with rare skill. He felt elated that the horse is recovering his form again, as he was severely attacked by the pink-eye in the Western Circuit, and was not fit to stay up and win, but I can see he is as game as his sire, Elmo, who beat the best long-distance horses of California, and received forfeit from others. Ten years ago Orrin trotted Elmo over the Buffalo Park, and now returns with a son of his own breeding to keep the sire's name green. Overman is seven years old, a light chestnut, with strip in face, stands 16½ hands high, a long, easy-gaited horse, with a true, even stride, noble carriage, and no waste of action; with the day and track to suit him, I think he can trot in 2:17 or 2:18. His dam was by Billy McCracken, son of Hill's Black Hawk. Billy was at one time owned in Buffalo, and was a noted horse in his day. Overman is owned by Capt. Wm. Cole, of San Francisco, who is at present residing in Philadelphia."

HORSES IN TRAINING ON THE STOCKTON TRACK.

EDITOR BREEDER AND SPORTSMAN: There is quite an array of runners and trotters at work here; some of them have established reputations, some have yet to make their mark. There are seven stables. The trotters are in the hands of Fred Vail, John Williams, W. H. Parker and J. Donahue. The runners are under the management of Joe Stimpson, Sam See and J. Q. Anderson. Fred Vail has Johnuy Weigle, owned by Walter Mead of San Francisco; Blacksmith Boy, bay gelding, nine years old, by Chieftain, from the McCracken mare, record 2:38, owned by F. S. Hatch of Stockton; Dick Keut, bright bay colt, three years old, by Electioneer from Gilletta, owned by Perkins Brothers of Stockton; Josh Whitcomb, bay colt, two years old, by Mambrino Wilkes, dam by Kentucky Hunter, also the property of Perkins Brothers; bay filly, two years old, by Peerless, dam by Chieftain; Peerless by General Knox. These three are very promising youngsters. A fine chestnut filly, three years old, by Priam, dam by Hill's Black Hawk, owned by Lewey Gerlach of Stockton; Felix, bay horse, by McClellan, owned by N. Randall; Black Diamond, black stallion, by Black Boy from a Hambletonian mare; Black Boy, by Black Hawk, owned by Charles McMurtry; bay filly, one year old, by Abbottsford, dam by Winthrop, owned by S. M. Morse. This is a fine filly and very promising. Bay colt Gus, by Mambrino Wilkes from a Hambletonian mare, owned by Charles Yallaud; two very fine sorrel fillies by Priam, owned by Mr. Silas T. Adams, and a fine bay mare, seven years old, by McClellan, dam by Jim Crow. John Williams has Tom Stout, who is too well known to need a description; a fine Nutwood colt from mare by Chieftain; bay gelding, six years old, by McClellan, dam by Chieftain; gray horse, six years old, by Speculation, dam by Gray Eagle; bay gelding, six years old, by McClellan, owned by Mr. H. Harris of Stockton; a handsome chestnut colt by Nutwood, dam by a son of David Hill's Black Hawk, owned by H. C. Smith, and a bay colt, two years old, John O'Brien, by Mambrino Wilkes, dam by Chieftain, owned by S. M. Morse. In Parker's stable there are some good ones. At the head of the list is Honesty, a finely proportioned chestnut horse, five years old, owned by Mr. J. H. Dodge. Honesty is by Priam; his dam by Chieftain. As a four-year-old he took second money in a race with Romero and Sweetheart, in 2:25¾, Romero taking first money. Ha-Ha, brown colt, two years old, by Nephew, dam by McCracken's Black Hawk, owned by Fred Arnold. This is a fine colt, with good action, with mane and tail nearly as long and heavy as Abbottsford's. Mr. Parker has another by Nephew, a handsome bay, owned by Mr. Hall, near Modesto, and two beautiful fillies, owned by L. U. Shippee; a bay by Echo, dam by Don Victor, the other a chestnut, one year old, a full sister to Honesty. A handsome roan horse, Upright, five years old, owned by Walter Morris, by Whipple's Hambletonian, out of Gilroy Belle, by Lodi. Upright has a record of 2:25 as a two-year-old and is working up nicely, and promises to make some of them step lively this fall. Mr. Morris also has a fine gray filly, by Priam, two years old, from Gilroy Belle. The next stable of trotters is John Donahue's, his horses all being owned by Trahern & Dudley. The first one I saw was the black horse Revolution, five years old, by Prince of Orange, from Cricket, by Long Island Black Hawk. He has a record of 2:45½, and is entered in the 2:36 class. Nephew, a beautiful bay horse, eight years old, good size and fine action, with a record 2:36, and a brown filly, two years old, Baby Mine, by Nephew, dam by David Hill. This is all of the trotters. The runners are being worked by Joe Stimpson, Sam See and Anderson. Stimpson has the well-known runner George Bender, who has a record of 1:47; he is owned by Seth Peyton. Joe Daniels, Jr., owned by John Randall; Joe is by Joe Daniels, his dam by Nena Sahib; he is entered for races at Sacramento, here and at San José. Sam See has the black stallion, Frank W., two years old, by Monday, dam Babe, by Nena Sahib, owned by Thomas Williams. Reel Terry, bay colt, three years old, by California, from Laura Barnes, owned by Billy Ash; and Jack Douglass, chestnut horse, six years old, by Wildside, dam Lady Clare, by Norfolk, owned by Jack Douglass. J. D. Anderson's stable, which has gone to Sacramento, consists of five good ones. The first is a handsome chestnut colt, two years old, by Joe Daniels, dam by Woodburn, owned by Judge Terry; chestnut stallion, six years old, by Norfolk, dam by Belmont, owned by William Butterick; dapple gray colt, three years old, by Joe Daniels, dam by Norfolk, owned by Jas. A. Sheppard of Lathrop (this colt, as a two-year-old, made a record of 1:48); Kate Carson, chestnut filly, three years old, by Joe Daniels, dam by Norfolk, owned by Wash Trahern (ran as a two-year-old three-fourths of a mile in 1:19); sorrel colt, two years old, by Joe Daniels, dam by Norfolk, owned by Mr. Trahern.

AUGUST 19th, 1882.—Since my letter descriptive of the stables at the Stockton race track, there has been added the stable of J. A. McClellan; May Boy, bay colt, two years old, by McClellan's Chieftain, dam by Henry Clay, owned by J. Heller; Hattie B., bay filly, three years old, by McClellan's Chieftain, dam by Odd Fellow, owned by Noyes Bailey; chestnut colt, one year old, by Hawthorne, from the dam of May Boy, owned by Noyes Bailey. Mr. McClellan has one of the best Nutwood colts I have seen—dark bay with black points, and small star in forehead, one year old, dam Daisy, by Chieftain. He also has a very handsome two-year-old, out of the same mare, by Nephew, named Judge Patterson. Also, Billy Robinson, brown gelding, eight years old, by Black Reuben, by Black Hawk.

After you received the description of horses in training at Sacramento there was an addition of W. M. Murray's stable: Bird Catcher, a full brother to Modoc, owned by Caleb Dorsey, also the owner of Sam Stevenson, four years old, by Thad. Stevens, dam by Rifleman; J. Stewart's Harry Hill, sorrel colt, three years old, by George M. Patchen, Jr., dam by Belmont; William M., bay colt, two years old, by Whipple's Hambletonian, dam by Black Hawk, owned by Murray; bay colt Osceola, by Monday, owned by Flemming & Tellick of Fresno.

Mr. J. B. Haggin has suffered a great loss in the death of his promising two-year-old racer Nuhia, by Leinster from Addie. She was frolicking in the lot last Friday at the Agricultural Park, at Sacramento, when she strained herself badly, and died soon after. She was well worth \$1,200, and had several engagements in the coming falls.

TURF AND TRACK.

FIXED EVENTS.

Sonoma and Marin Agricultural Societies. Annual Fair at Petaluma, Aug. 29th and four following days.
Golden Gate Fair, to be held at Oakland, from September 4th to the 9th inclusive.
Butte District Fair at Chico, from September 5th to September 8th inclusive.
El Dorado District Fair at Placerville, from September 5th to September 8th inclusive.
California State Fair. Annual meeting at Sacramento, from Monday, September 11th to the 16th inclusive.
The San Joaquin Valley Association Fair at Stockton, from September 19th to the 23d inclusive.
Oregon State Fair at Salem, from September 18th and during the week.
The San Mateo and Santa Clara County Agricultural Association Fair at San Jose, September 25th to the 30th inclusive.
Humboldt and Mendocino District Fair at Rhonerville, September 19th to September 22d inclusive.
Modoc, Plumas and Lassen District Fair at Greenville, from October 2d to October 5th inclusive.
Monterey District Fair at Salinas City, from October 2d to October 6th inclusive.
Nevada State Fair, at Reno, from Monday, October 2d, to the 7th inclusive.
Mount Shasta Agricultural Association Fair at Yreka, October 4th, 5th, 6th and 7th.
Eastern Oregon Fine Stock Association at Union, from October 9th to the 14th inclusive.
Los Angeles Agricultural Association, at Los Angeles, from October 17th to 21st inclusive.

FAIRS AT THE EAST.

Kentucky State Fair at Lexington, August 9th to September 2d inclusive.
Minnesota State Fair at Farmington, August 31st to September 5th inclusive.
Iowa State Fair at Fairfield, September 1st to the 8th inclusive.
Minnesota Agricultural Association, at Minneapolis, September 4th to the 9th inclusive.
Nebraska State Fair, at Omaha, September 11th until the 16th inclusive.
Rhode Island State Fair, at Providence, September 12th to the 15th inclusive.
Pennsylvania State Fair, at Pittsburg, September 7th to the 21st inclusive.
Wisconsin State Fair, at Fond du lac, September 11th to the 16th inclusive.
Ontario Provincial Fair, at Toronto, September 18th to the 23d inclusive.
Connecticut State Fair, at Meriden, September 18th to the 22d inclusive.
New Jersey State Fair, at Monroe, September 18th to the 22d inclusive.
West Virginia Central Fair, at Clarksburg, September 19th to the 21st inclusive.
Indiana State Fair, at Indianapolis, September 25th to the 30th inclusive.
Western Michigan Fair, at Grand Rapids, September 25th to the 30th inclusive.
Texas State Fair, at Austin, October 17th to the 21st inclusive.

SANTA CRUZ RACES.

The attendance on Friday, the 18th inst., showed a large increase, and the races were generally well contested and afforded a great deal of amusement. The first on the card was a selling race, a purse of \$200, in which Haddington had the call at \$20 against Sister to Lottery and G. H. Trouble. This was an easy race for the favorite, who was not claimed at an advance over \$800, the sum at which he was entered to be sold. The next race was a running stake, half mile and repeat, which Night Hawk, as first choice, placed to his owner's credit. There was a pretty struggle in the first heat between the winner and Mollie H., the latter being beaten only by a neck, but in the final heat the favorite won in a handsome manner. The third race was a trot for a purse of \$20, in which Nutmeg, on account of his local reputation, was considered a certain winner, and he showed himself worthy of the confidence of his backers by winning in three straight heats.

SUMMARIES.

Santa Cruz, August 18th.—Running Race.—Selling purse, \$200; \$50 to second horse; five per cent to third horse. One mile and repeat. Horses entered to be sold for \$1,000; to carry their entitled weight—2 lbs. off for each \$100 under fixed valuation. Winner can be claimed by any one.
P. J. Shafter's b. h. Haddington, valued at \$800, 110 lbs. 1
H. Schwartz's b. h. Sister to Lottery, 1,000, 92 lbs. 2
A. Irvin's gr. h. G. H. Trouble, \$300, 91 lbs. 3
Time—1:50½, 1:50.

Same Day.—Running Stake.—Free for all; \$25 each, \$10 forfeit, with \$75 added; a half mile and repeat; the second to save his entrance.
P. J. Shafter's b. m. Night Hawk, 111 lbs. 1
C. H. Watts' b. h. Bay Charley, 111 lbs. 2
W. Boots' b. m. Mollie H., 111 lbs. 3
Time—51s, 52s.

Same Day.—Trotting.—Purse of \$20; entrance \$10, with \$10 added; best three in five; to harness.
J. W. Scott names r. g. Nutmeg. 1 1 1
D. W. Grover names b. g. Pajaro Chief. 4 2 2
W. E. Peck names b. g. Leland Stanford. 2 dis.
J. M. Ferguson names b. g. Soquel Jim. 3 dis.
Time—2:59½, 2:53, 2:56.

On Saturday, there was a still better attendance, with two races on the card; the first, a trotting purse of \$500, free for all, and the last, a novelty running race of one mile. In the former race Frank Moscow was the favorite, previous to the first heat, over Poscora Hayward and Blackmore, but the betting changed about after the first heat was decided. The second heat was very stubbornly contested, Moscow being all the time close up, and the time 2:28½ shows that it was trotted very fast for this class of horses, in the opinion of good judges, considering the heavy state of the track, it was equal to a 2:26 gait. In the final heat Channcey Kane drove Blackmore, but he could do no more for him than his predecessor and as Mr. McCord sold him to Mr. E. Barron, of San Francisco, to drive double on the road, it is presumed his short career on the turf is at an end.

The second was a Novelty Race, a dash of a mile, with purse of \$200, of which \$50 to the first horse at each quarter of a mile, in which Haddington was a great favorite at \$20 against \$10 for Millie H. and \$6 for the field, in which were Quen Sabe, Bay Charley and Stumbling Dick. The race was a very exciting one, as Quen Sabe, who is known as a very fleet half miler, went away with the lead and captured the \$50 at each of the first three-quarters, but then she began to tire, and Haddington, under whip and spur, managed at last to overhail him, and won the mile out by a short neck, but it was far too close a thing for those who had recklessly wagered at such extravagant odds on the success of the favorite. This brought the meeting to a conclusion. The visitors were much pleased at the sport offered to them, and the people of Santa Cruz were delighted to find that their first attempt at an annual race meeting had met with such appreciation.

SUMMARIES.

Santa Cruz, August 19th.—Trotting Race.—Purse of \$500; free for all; best three in five; to harness.
W. D. Hammond names g. h. Poscora Hayward. 1 1 1
P. Williams names s. g. Frank Moscow. 2 2 2
Henry McCann enters g. g. Blackmore. 3 3 3
Time—2:31, 2:29½, 2:29½.

Same Day.—Novelty Race.—One mile dash; purse, \$200; entrance, ten per cent; five to enter and three to start; \$50 to first horse at each quarter mile.
L. Shaner names b. s. Haddington. 1
S. Duncan names b. g. Quen Sabe. 2
Wm. Boots names b. m. Mollie H. 3
C. H. Waters names b. g. Chestnut Charley. 4
Alfred Imus names b. g. Stumbling Dick. 5
Time—1:48.

MONMOUTH PARK RACES.

The second Summer season has been quite successful in the way of attendance, but the racing was not up to an average merit, the interest being mainly centered in handicaps, in which figured some of the old-time favorite performers. The fact is, that in the great two-year-old stakes at Monmouth Park the stable of P. Lorillard is not to be approached, and in those for three-year-olds, Forester holds the same position. It is now generally conceded that the three-year-olds are all of moderate quality in the East, with the exception of Runnymede (broken down) and the above mentioned Forester. It must therefore be looked upon as a pity that the Duchess of Norfolk could not be brought into condition to test the relative merits of the Eastern and California horses. Another chance was lost at the same meeting, as in the great Omnibus Stake, of which we give the following description from the New York World, there was a California-bred horse entered, being the three-year-old colt Judge McKinstry, owned by Judge Mee of this city. Judge McKinstry was a late colt, and his owner thought it better to delay his active training until the Summer, so that the project—once entertained for a short time—of sending him East with the Baldwin-Winters stable was abandoned, and now it is probable that he will make his first appearance on the turf in the Breeders' Stake and in the Derby during the State Fair. Following is the account of this race, so popular with owners and breeders:

While the Omnibus Stakes was no doubt a disappointment in not bringing out a superior class of three-year-olds—something impossible considering that there are really none left to do battle for the cause—it was in no measure a failure. In other words, the secondary character of the starters proved the success of the association's plan—a plan that will, without doubt, bring about a series of stakes for which the death of the nominator will not disqualify, and for which the winner will not have fully half the reputed value of the stakes paid in so many pieces of paper which he must collect, either from the subscribers direct or through the secretaries of some other association, neither idea having ever worked with success. Under the conditions of the Omnibus, the original subscribers paid a small entry, which accrues to the race fund, the association adding an amount of money to the race; and that there is no wish to profit by having the money paid direct to the association is amply proved in the present instance, for while the association received \$2,500 it paid out just \$5,000. As to the success of the plan, Mr. Clifton Bell of Denver, Colorado, purchased Harry Gilmore from Captain Cottrill, Mobile, and as he won, Mr. Bell takes the stakes and the first money, \$2,500, the sum of \$1,000, under the conditions of the stake, going to Captain Cottrill. As to the second horse, Mr. Pierre Lorillard, the owner and nominator of Wyoming, receives \$1,500, namely, \$1,000 second money and \$500 as the nominator. But the strongest point in favor of the stake is shown in the case of Tom Plunkett. He was nominated by Mr. R. W. Cameron, who transferred the nomination to Mr. Noah Armstrong. The latter has drifted into turf bankruptcy, and is in the forfeit list, which stands as a penalty against the horses nominated by him. But under the conditions of the Omnibus Stakes, Mr. Cassidy had only to pay the starting entry to qualify his horse to start, and had Plunkett finished first or second, Mr. Cassidy would have been paid the amount due under the conditions of the stake, conditions which are so liberal and easy to breeders and owners that they must eventually become popular.

The third race on the card was the Omnibus Stake, the conditions of which are such that the actual owner of any of the horses nominated could start on payment of \$100, no written transfer being necessary, nor would the death of the nominator disqualify the horses, as in other States. The only conditional qualification was that the person starting the horses must himself be eligible under the rules. To cover the stake, the association made the entrance \$25 each, to go to the race fund, and to be paid when the nomination was made; under which conditions 100 subscriptions were made to the stake, which brought to the fund just half the added money. But as a further inducement for owners and breeders to enter for the stake, the \$5,000 was divided so as to give the owner of the winner \$2,500, the owner of the second \$1,000, the nominator of the winner \$1,000, and the nominator of the second \$500. Like most of the stakes run at Monmouth Park, winners of other stakes were penalized, of one of the value of \$2,000, 5 pounds; of two such stakes, 7 pounds; while horses that were maidens were allowed 5 pounds. Under these conditions a horse like Forester would have carried 125 pounds, but as Messrs. Appleby's "crack" had been lame since Saturday they could not start him, which left the issue to the following of the 100 subscriptions made to the stake: The Preakness Stable's Macbeth and W. L. Cassidy's Tom Plunkett, each at 118 pounds; D. D. Withers' Duplex, Clifton Bell's Harry Gilmore, and P. Lorillard's Wyoming, each at 115 pounds. The last named was the favorite both in the pools and books, with Harry Gilmore second. At the start, which was made after one breakaway, Macbeth was in front, followed by Tom Plunkett and Harry Gilmore, with the favorite last. Before they reached the five-furlong starting post Wyoming took the lead, and quickly opened a gap of two lengths, by which he led to the three-quarters, with Tom Plunkett second, Macbeth, Harry Gilmore and Duplex close up. The run up the stretch was slow and uninteresting, the only changes being that Macbeth and Harry Gilmore improved their places, they following Wyoming past the stand three lengths behind the favorite. As they made the turn by the old Club-house, Tom Plunkett, by hugging the inner rails, got to be second, and at the quarter held that position a length behind Wyoming, half a length in front of Macbeth, who was lapped by Harry Gilmore, with Duplex two lengths away. There was no change until reaching the stables, where Billy Donohue, on Harry Gilmore, moved up on the outside, and reaching Wyoming, the two ran half a length apart for nearly a furlong, with Tom Plunkett in close attendance. As they reached the railroad turn Gilmore headed Wyoming the two running a sharp race round the turn to the three-quarters, where Gilmore still held the advantage by a head, with Wyoming half a length in front of Plunkett, he closely followed by Duplex and Macbeth. They remained in that order nearly to the seven-furlong pole, reaching which, Duplex for a few strides looked dangerous, but the threat almost instantly vanished, as Gilmore gradually drew away from Wyoming, and with the greatest ease won by two lengths, followed by Wyoming a head in front of Tom Plunkett. A length away followed Duplex, two lengths in front of Macbeth; time, 2:44½, the slowest time made at the distance since the season began on the 1st of July. In fact, although the idea of the association was carried out to the letter in affording buyers of horses a chance to win a good

stake, and breeders to sell their horses and yet reap some reward by their subsequent success, it cannot be said that the race was a success, it failing to produce a grand race, which the amount of added money should have made it.

By telegraph, it is stated that on Thursday, the 17th inst., in the first race, a dash of three-quarters of a mile, Buckstone won; time, 1:21. The one-and-one-half-mile race Laura Glass won in 2:56½. The mile-and-three-eighths race Keno won in 2:19½. The mile race Bell Boy won in 1:57½, 1:51½. The mile hurdle race Guy won in 2:07½.

By telegraph, we learn that on last Saturday in the first race, three-quarters of a mile, Buckstone was first, Fairview second; time, 1:18½. In the second race, a mile and a furlong, Wyoming won, Gussie second, Infanta third; time, 2:00½. In the third race, one and a quarter miles, Gioffa won, Sweethome second, Della third; time, 2:16½. In the fourth race, three-quarter mile, Carmelite won, Breese second, Disdain third; time, 1:16½. In the fifth race, one and three-quarter miles, Monitor won, Priam second, Gleugore third; time, 3:07½. In the sixth race, one mile, Marathon won, Hospodar second, Queen third; time, 1:44½. In the steeplechase, full course, Ike Bonham won, Guy second, Joe Hunt third; time, 2:16½.

GRAND CIRCUIT WINNERS OF HEATS AND RACES
BUFFALO.

Winner.	Sire.	Class.	Amt. Won.	Best Time.

AN OLD-FASHIONED ENGLISH TROT.

The love of the trotting horse is to be traced to England, where these matches have been popular for centuries, but chiefly among the young farmers and dealers in stock, who all like to boast of possessing a fast nag. But these old-fashioned contests were generally made for a dinner and wine for selves and friends, and perhaps a £20 note. But in the absence of any trotting track the affair generally came off on the turnpike road, so many miles out and return. Of course the horses could not for a moment compare with the American trotting horse, even a quarter of a century since, and the fact is they were mostly ponies of a little more than fourteen hands high, but famous for their speed and gameness. An amusing anecdote is told respecting Goldsmith Maid and her trainer, when there was talk of sending that famous mare to England to give some exhibitions of her then unrivaled speed. A wealthy dealer in live stock from Smithfield Market, London, came to New York with a view to increase his shipments of fresh beef and cattle, and by chance was introduced to that famous driver who inquired as to the probable success he should meet with in this venture across the ocean. After receiving a description of Goldsmith Maid and of her performances, the dealer smiled incredulously, remarking that 2 minutes 14 seconds a mile meant ten miles in less than 23 minutes, and that no horse in the world could do it. When the explanation came that this was the time for one mile only, he laughed and proposed that they should bring the Maid over, and he would drive one of his ponies against her, ten miles out and return, on a turnpike road, to a butcher's cart, for \$1,000, or £1,000 a side, the horses to come to a stand-still and to turn round at every break. The idea of the Queen of the American turf submitting to such a peculiar ordeal was so funny that it was received with shouts of laughter, in which the Englishman heartily joined. That same dealer visited some of our tracks and has tried to introduce the American trotting plans into England, as he was one of the first to aid in building the Alexandra Park track, near London. But as yet these trials have met with but little success, as the English still prefer their old fashioned ways, a specimen of which was given recently at the above park when there was a large and enthusiastic attendance to witness a match in which Hall's black horse Jim was backed to trot 16 miles in an hour, in harness. All the parties connected with the match belong to the "lemonade and ginger-beer trade," and the horse was driven to a sulky by Malcolm McLachlan, who has gained a high reputation across the Atlantic as a trotting-driver. The first five miles were accomplished in 15m. 55s., eight in 25m. 7s., and the full distance in 49m. 57s., the horse thus winning with 10m. 3s. to spare. An extra mile was then covered, increasing the time to 59m. 21s. C. Bastien was starter and referee. It has been the opinion of many who have judged the bent of the English people in regard to this sport, that such a horse as Con-troller, who trotted twenty miles to wagon at the Bay District track in 58:57 (the match being against an hour's time), will prove in England to be a far greater attraction than would the performances of such horses as St. Julien, Trinket or Clingstone. It will take a long time to educate the English up to the American standpoint as regards trotting.

FLIES AND HORSES.—There is no feeling man but would like to do something to relieve his horse from the annoyance of flies. Horses are goaded almost to madness by the insects. In England flies are prevented from troubling the animals by the application to the latter, before harnessing, of a mixture of one part crude carbolic acid with six or more parts of olive oil. This should be rubbed lightly all over the animal with a rag and applied more thickly to the interior of the ears and other parts most likely to be attacked. This application may need to be repeated in the course of the day, but while any odor of the acid remains the flies decline to settle, and the horse is completely free from their annoyance.

BOOK-BETTING.

The following are the odds now offered by Killip & Co. against the nominations in the stakes and purses at the State Fair. While the odds are given now they are, of course, subject to change, and, in fact, there may be cases when "the book is full" and no more money will be laid against the horse in which the limit has been reached. As is well known to those who have a slight acquaintance with this system of betting, the wagers are "play or pay," which means that the money is lost if the animal "backed" does not start. There are many arguments in favor of this system of betting. It is the only kind that meets with favor in England, and in combination with auction and mutual pools, gives the best opportunity to support those the acceptor fancies.

No. 1. INTRODUCTION STAKE, ¼ OF A MILE.

Thirteen to one against Kate Carson.
Five to one against Forest King.
Ten to one against Bob.
Ten to one against Joe Daniels, Jr.
Fourteen to one against May B.
Nine to one against Atalanta.
Two to one against Jim Douglas.
Three to one against Duke of Monday.
Five to one against Premium.
Two to one against Jim Renwick.
Twelve to one against Ella Doane.

No. 2. BREEDERS' STAKE, 1½ MILES.

Ten to one against Capt. Kidd.
Seven to one against Lizzie P.
Eight to one against Cy Mulkey.
Nine to one against Hattie Ball.
Nine to one against Belle S.
Six to one against Maria F.
Two to one against Duke of Monday.
Six to one against Duchess of Norfolk.
Thirteen to one against Judge McKinstry.
Fourteen to one against Annie Lawrie.
Eight to one against Cornucopia.
Seven to one against Conquest.
Five to one against Precious.
Eight to one against Mattie A. Filly.
Fifteen to one against Idler.
Nine to one against Evangeline.

No. 3. SELLING RACE, MILE AND REPEAT.

Six to one against Patrol.
Eight to one against Shiner, weight 100 pounds.
Twelve to one against Sister to Lottery, weight 82 pounds.
Eight to one against Villa Randlett, weight 100 pounds.
Two to one against Joe Howell, weight 105 pounds.
Six to one against Inauguration.
Nine to one against Jack Douglass, weight 104 pounds.
Six to one against Haddington, weight 109 pounds.
Four to one against Euchre, weight 105 pounds.

No. 8. FILLY STAKE, TWO-YEAR-OLDS, ¼ OF A MILE.

Five to one against Flou Flou.
Three to one against Satinet.
Five to one against Rosa B.
Three to one against Satanela.
Five to one against Lou Spencer.
Two to one against Augusta E.
Seven to one against Irene.

No. 9. CALIFORNIA DERBY STAKE, 3-YEAR OLDS, 1½ MILES.

Three to one against Precious.
Four to one against Capt. Kidd.
Three to one against Maria F.
Six to one against Judge McKinstry.
Four to one against Hattie Ball.
One to one against Duke of Monday.

No. 10. JENNIE B STAKE, FREE FOR ALL, DASH OF A MILE.

Four to one against May D.
Eight to one against Bob.
Nine to one against Night Hawk.
Six to one against Atalanta.
Six to one against Frank Rhoades.
Two to one against Duke of Monday.
Four to one against Forest King.
Eight to one against Fortress.
Ten to one against Duke of Norfolk.
Seven to one against Lizzie P.
Three to one against Jim Douglass.
Three to one against Red Boy.

No. 11. SELLING RACE, 1½ MILES.

Six to one against Belshaw, weight 93 pounds.
Eight to one against Lady Partisan, weight 92 pounds.
Twelve to one against Sister to Lottery, weight 82 pounds.
Five to one against Cy Mulkey, weight 95 pounds.
One to one against Joe Howell, weight 107 pounds.
Six to one against Joe Daniels, Jr.
Nine to one against Jubilee.
Seven to one against Villa Randlett, weight 105 pounds.
Two to one against Euchre, weight 106 pounds.

No. 16. COLT AND FILLY STAKE, 2-YEAR OLDS.

Six to one against Panama.
Nine to one against Certiorari.
Five to one against May B.
Two to one against Augusta E.
Nine to one against Irene.
Six to one against Flou Flou.
Three to one against Satanela.
Six to one against Lou Spencer.
Eight to one against Young Flush.

No. 17. SELLING RACE, 1¼ MILES.

Nine to one against Ella Doane, weight 108 pounds.
Ten to one against Idler, weight 90 pounds.
Nine to one against Shiner, weight 101 pounds.
Fourteen to one against Sister to Lottery, weight 82 lbs.
Seven to one against Villa Randlett, weight 100 pounds.
Four to one against Euchre, weight 107 pounds.
Six to one against Belshaw, weight 95 pounds.
Twelve to one against Geo. Bender, weight 101 pounds.
Ten to one against Jubilee, weight 104 pounds.
Nine to one against Haddington, weight 109 pounds.
Five to one against Cy Mulkey, weight 90 pounds.
Two to one against Joe Howell, weight 101 pounds.

Books now open at Arion Halle, N. E. corner of Sutter and Kearny streets.
Address all communications as above to Killip & Co.

THE SARATOGA RACES.

There are loud complaints at Saratoga about the poor sport that is offered on the race track in comparison with that of previous years. This is all owing to the fact that the Saratoga Association insisted on having a continuous meeting during the season, which interfering with the second Summer meeting at Monmouth Park, the gentlemen interested in the latter organization have withdrawn their stables from Saratoga, and have thus sadly diminished the attractions of the pretty watering place, as the financial exhibit of the Saratoga Association will disclose when they make their annual declaration of dividends. During the past week there is nothing that calls for special mention, the attendance being generally not up to the average, considering that the village was crowded and that the season was at its height.

On Thursday, the 17th, the first race, one mile, was won by Baron Faurst, Colonel Sprague second; time, 1:47½.

In the second race, two miles, Eole was first, General Monroe second; time 3:42½.

On the 18th, in the first race, three-quarters of a mile, Stanton won, Stand Off second, and Patti third; time, 1:15½. In the second race, one mile and 500 yards, Blenheim won, Farragut second, Apollo third; time, 2:13½. In the third race, 1 mile, Disturbance won, Botherem second, Sir Hugh third; time, 1:47½. In the fourth race, three-quarters of a mile, Lytton won; time, 1:18.

On the 19th, in the first race, one mile, Jennie won, Gus Matthews second; time 1:42½. Second race, three-quarters-mile, Woodford won, Tarantella second; time, 1:16. Third race, one mile and five furlongs, Bend Or won, Creosote second; time, 2:49. In the fourth race, one and three-quarters miles, seven hurdles, Annette was first, Revenge second; time, 3:18½.

On the 21st, in the mile-and-a-quarter dash, Tom Plunket won, Force second, Helena Wallace third; time, 2:09. In the one-eighth mile dash, Baby won, George Hokes second, Startle third; time, 1:55½. In the steeple chase, one-and-a-half miles, Rose won, Turfman second, Woodlock third; time, 2:55.

On the 22d, in the first race, three-quarters of a mile, Monarch was first, Bootjack second. There was a dead heat between Fellowplay and Little Phil for the third place; time, 1:14. The second race, mile and five furlongs, Charley B. won, Boatman second, Kite third; time, 2:54. In the mile dash Buccaneer won, Amazon second, Malasan third; time, 1:42½.

On the 23d, in the first race, three-quarters of a mile, London won, Pride second, Patti third; time, 1:15½. In the second race, one mile and 500 yards, Lina Stanhope won, Kencsaw second, Bushwhacker third; time, 2:13½. In the third race, one mile, Force won, Jake White second, John Sullivan third; time, 1:43. In the fourth race, one mile and a half, over hurdles, Revenge won, Charlemagne second, Glasgow third; time, 2:48½.

SHEPHERD PONY RANCH.—Baron Von Raub, Leon Springs, Bexar County, Texas, has 8,000 acres all under fence properly sub-divided and stocked with beautiful Shetland and spotted ponies. His breeding stock consists of seven stallions and forty-five mares, all thoroughbred, and 200 small spotted pony mares. He is breeding a race of striped and spotted ponies to please the children. He sells the increase to persons all over the world, and the supply is not equal to the demand. These little ponies range over the prairies like sheep or goats, and present a novel appearance—very gentle, every one is as docile as a cat and can be caught anywhere on the range.

With the publication of the entries for the Cesarewitch and Cambridgeshire handicaps the 3d inst., the English Autumn season may be said to have begun. The Cesarewitch received 104 subscribers, including P. Lorillard's Iroquois, Aranza and Nereid, J. R. Keene's Foxhall, Don Fulano, Bushman, Bookmaker, Seminole, Golden Gate and Romeo, Lord Rossmore's Passaic, Lord Ellesmere's Wallenstein, C. Archer's Abbotsford (late Mistake)—all American bred. The Cambridgeshire has 137 subscribers, for which the Americans are Iroquois, Sachem, Nereid, Aranza, Wallenstein, Abbotsford, Foxhall, Don Fulano, Bookmaker, Bushman, Golden Gate and Romeo. The English entries include the very cream of the stables in training. The Americans are also represented in several of the Nursery Handicaps, Great Eastern Railway Handicap, the Newmarket October Handicap, and the Houghton Handicap.

The Louisville Fair Association has issued a liberal programme for a five-days meeting, commencing on September 17th, in which special inducements are offered for colts and fillies. This will be about the time the Palo Alto draft may be on their way East for their engagements, and if it suited the plans of Ex-Governor Stanford they might perhaps make their first appearance at the Louisville meeting. The "perhaps" means that it is as yet uncertain whether the youngsters will be sent East at all, as they have been suffering more or less from a mild form of pink-eye, which has greatly retarded their training at this important stage of the season.

From Chicago we learn that the challenge issued by Messrs. White and Budd Doble, the owners of Monroe Chief, has been accepted by Commodore W. N. Kitson, and that Monroe Chief and Von Arnim will trot in a match for \$2,500 a side at Minneapolis during the fair week in September. To this amount Colouel King adds \$2,500, showing that that gentleman has an implicit faith in this being a drawing card, and certainly the race promises to be a sensational one, on account of the noted character of the horses concerned and the prominence of their owners.

The nominations for the two great English events, the Epsom Derby and Oaks, comprise fifteen American entries. For the Derby Mr. P. Lorillard has six entries, Mr. J. R. Keene three, and Mr. Harry Keene one. For the Oaks Mr. Lorillard has nominated four and Mr. J. R. Keene one. For the Grand Prize of Paris Mr. J. R. Keene has four nominations and P. Lorillard six. Amongst Mr. Keene's entries is a sister to Foxhall, who may emulate her brother's exploits, and again place this trophy, with its attendant shekels, to the credit of the American turf.

The Allan steamship Buenos Ayrean has brought out 110 Clydesdale and Cleveland bay horses and Shetland ponies. They were selected from the studs of the principal breeders in Scotland by the Messrs. Bullocks & Harding, of Indiana, the Messrs. Powell Bros., of Pennsylvania, Galbraith Bros., of Janesville, Wis., and others. They are all intended for breeding purposes, and part are to be exhibited in Canada and the United States. Some of the batch are noted prize-winners, and all are of meritorious quality.

The premium list of the Chicago Horse Show, to take place Sept. 16 to 23, is now ready, and may be had by ap-

plying to D. L. Hall, Secretary, 116 Monroe street, Chicago, Ill. The premiums aggregate about \$30,000, which will be awarded to trotting and road horses, also thoroughbred draft, carriage and saddle stock. There will also be liberal purses for trotting and pacing races. It is the intention of the management to make this the greatest horse show ever held.

To show the immense difference there is in betting in the mutual pools and with the bookmakers, it may be mentioned that when on the 16th inst. Malasine won a selling purse, the highest odds procurable in the books were twenty-five to one against her chances, whereas in the mutual pools each \$5 ticket brought \$281.60, making a difference of much more than a hundred per cent.

Messrs. Dwyer Brothers, of Brooklyn, have sent the two-year old filly Red-and-Blue, by Alarm, dam Maggie B., the dam of Iroquois, to Tennessee, to be bred to Luke Blackburn. The result of this experiment will be watched with interest.

DRAFT HORSES.

The Clydesdales are improved Scotch draft-horses. They have been extensively imported into the United States, and form a competent part of our working force. They originated in Scotland. The Duke of Hamilton perfected the breed, and produced a more shapely animal than the old English cart-horse. He bred in all the bone and muscle that constituted the strength and power of the horses of the old style, and bred out the superfluous flesh that encumbered their action. Other breeders have modeled them over into that perfect form that commands their strength to the best advantage, and bred in that activity that gives them force of character to perform more than the old kind in the same length of time. Substance is the measure of power. A horse 16 hands high, with a powerful, close-coupled, compact form, will perform more labor, and can be kept on less food, than one 17½ hands high, whose ponderous weight tires out his legs to carry about an overgrown body. The Clydesdales are highly prized in Scotland, where they are extensively raised.

The English Shire-bred draft-horses somewhat resemble the Clydesdales. Dealers frequently sell them for Clydesdales, because the latter command a higher price in the market. The English Shire-horses are powerfully-built, strong-limbed, heavy-boned, compact, close-coupled, muscular-formed animals, weighing from 1000 to 2000 lbs. They are well adapted for large drays or lumber wagons, where great weight and power are required to steady and move large loads of merchandise or minerals at a moderate pace. The English Shires have been crossed with the Scotch Clydesdales, and this is claimed to have produced a family superior to either breed. The cross of the Scotch sire with the English mare is claimed to have bred an excellent draft-horse, superior to either sire or dam. Both breeds were originally founded upon the union of lines of powerful draft-horses. The reunion of lines long separated might be expected to culminate in a superior family. The good qualities that either possessed, single-handed, when combined together would give additional force of character to the issue, and improve the breed. It is the way that all breeds are founded, and their progeny raised up to a higher standard of excellence.

The Percheron-Norman draft-horse has been imported into the United States in great numbers. They are imported from La Perche, a district in the interior of France, where they are extensively raised. They are generally grey. The color must have been bred in for many generations, till it became a fixed inheritance, to be transmitted so uniformly to the offspring. The Percheron is claimed to have descended, at an early day, from a cross of Arab sires with Norman dams. The return to the Arab cross has restored the original type and character of the Percheron, whence they sprang. As late as 1820, Godolphin and Gallipoli, two grey Arabian stallions, were imported into France, and extensively need with Percheron mares.

The re-infusion of Oriental blood has kept up the beautiful form of the Arabian without diminishing the size the Percheron acquired from the Norman. Norman dams crossed with Arab sires will breed larger than the sire. It is found, when the Barbs of Arabs are taken from their native soil and crossed with foreign dams, they will breed a larger class than the Oriental steeds of the desert. The parched-up sands of the desert have stunted the race. When taken to a more congenial climate and fruitful soil, the young scions expand and grow larger than the diminutive Arab from which they sprang.

The Percherons are among the best-formed horses that can be found anywhere. Their shoulders exactly fit the collar. Their close-coupled, compact form gives them more strength, in proportion to weight, than any other form could possibly possess. They are not only powerful, but active; possessing a fine constitution, overflowing with robust health, which lays the foundation of physical endurance. Stout form, superior strength and activity, are the characteristics of the breed. They will work hard, keep fat on little food, and live to an advanced age.

We have several grades of horses formed from a cross of the draft with native breeds, and converted into distinct families, such as the French-Canadian. They have preserved the form and substance of their Norman ancestors for generations, except slightly diminished size, caused by scanty fare and cold climate. We have also the half-bred Clydesdale, Percheron, and Sampson, graded up with home-bred stock. These grades are the most useful stock for all work to be found in the catalogue of breeding. They are appropriately named horses-of-all-work. They are adapted for all kinds of farming, for marketing the productions of the soil, for lumbering, for use in express wagons, and various other occupations where great strength is required, combined with a good rate of speed. They supersede the heavy draft-horse for ordinary work, because they are well suited for the family carriage. They are hardy, easily acclimatized, accustomed to the food produced on their native soil, inured to hardships and privations, and possess a powerful constitution, that will stand the wear and tear of hard work through a long life. They will stand more labor on less food than the overgrown draft horse. There is no other breed that can fill their places in a rough, hilly country, for all kinds of work.—Observer, in National Live Stock Journal.

We are in receipt of a new paper, THE BREEDER AND SPORTSMAN, Joseph Cairn Simpson, editor and proprietor. Its typographical appearance is excellent, and it is devoted to the interest of stock-raising as well as to a variety of other matters interesting to sportsmen. It is edited with marked ability, published in San Francisco, and we commend it to breeders, sportsmen and others.—Lower Lake Bulletin.

THE SANTA ROSA RACES.

On Tuesday last, was the first day of the annual Santa Rosa meeting, and the attendance was fair, when it is considered that threshing time is the busiest of all the year for our farmers. The park on all sides showed evident signs of improvement and prosperity, and the track was both fast and safe.

The first race on the programme was a trot, mile and repeat, purse of \$200, free for all two-year-olds owned in the district. This closed with five entries, but Steve Crandall's bay filly, No Name, failed to appear, and Paine Shafter's gray colt, Greyson, after being speeded in front of the stand, was withdrawn with the consent of the judges, on account of lameness. This left three contestants—J. E. Foster's sorrel mare, Clara Patterson, J. C. Fountain's black filly, May Day, driven by Joseph Edge, and E. B. Conway's chestnut colt, Ideal, driven by George Bayliss. These were given positions for the first heat in the order named. In the pools on the previous night and just before the race, May Day was a large favorite, selling for \$20 against \$8 for Ideal, and \$2 for Clara Patterson. On the third score the word was given to a good start. Clara broke badly a few yards from the stand and repeated the performance during the entire heat. The contest between the other two was exciting until the $\frac{3}{4}$ mark was reached, when Ideal indulged in a few skips and fell behind. May Day was three lengths ahead at the $\frac{3}{4}$ pole, but left her feet while going easy, and was overtaken by the colt. From this point home they trotted neck and neck, until within fifty yards of home, when both broke and came under the wire running. The judges were unable to determine which was the victor, and decided it a dead heat, with Clara Patterson distanced; time, 3:01 $\frac{1}{2}$.

Between heats pool-selling was lively, at even figures, until just before the start, when May Day again became a favorite, selling for \$20 against \$8 for the colt. For the second heat a good start was given, but Ideal soon broke and fell behind. At the half the mare broke and was passed by the colt; before the $\frac{3}{4}$ pole was reached they both indulged in jumps, but here the colt steadied and came in an easy winner; time, 3:05. Ideal was now the favorite at \$20 to \$5. After tedious scoring they got an even start. May Day went to the front, but broke at the quarter-pole, and from here the colt had everything his own way, winning by five lengths in 3:04.

The second race was for the 2:35 class; purse \$400. Closed with four entries, but James Garland's Rowdy Boy being sick with the pinkeye was withdrawn. The starters were, Taboas Bros.' gray gelding Ralph, driven by S. Sperry; Wm. Bourke's bay gelding Johnny, driven by Fred Vail; and Mat Doyle's bay gelding Boss, driven by Steve Crandall. In the betting before the horses appeared on the track Johnny was favorite, bringing \$20 against \$14 for Boss and \$2 for Ralph. During the scoring Johnny showed an inclination to pace, and acted so rank that it frightened the betting sharps, and Boss sold up even. A good start was given, with Ralph at the pole, Johnny next, and Boss on the outside. Soon after the word was given Boss broke, and despite Steve's efforts he never struck a square trot during the heat. Ralph and Johnny went close together for the first three-eighths, when Ralph made a disastrous break, and before Sperry could bring him to a trot Johnny had opened a gap of 200 yards. Vail seeing his advantage sent the horse for all he was worth, and succeeded in leaving the gray outside the flag, Boss being nearly a quarter of a mile behind; time, 2:33 $\frac{1}{2}$.

SUMMARIES.

Santa Rosa Course.—Tuesday, August 22, 1882.—Purse, \$200; first horse, \$120; second, \$60; third, \$20; free for all two-year-olds owned in the district.

E. B. Conway names ch. c. Ideal.....	0 1 1
G. C. Fountain names blk. f. May Day.....	0 2 2
J. E. Foster names s. m. Clara Patterson.....	dis.
P. J. Shafter names g. h. Greyson.....	drawn.
Steve Crandall names b. f. No Name.....	drawn.

Time—3:01 $\frac{1}{2}$, 3:05, 3:04.

Same day.—2:35 class; purse, \$400; first horse, \$240; second, \$120; third, \$40.

Wm. Bourke names b. g. Johnny.....	1
Taboas Bros. names g. g. Ralph.....	dis.
Mat Doyle names b. g. Boss.....	dis.
Jas. Garland names g. g. Rowdy Boy.....	drawn.

Time—2:33 $\frac{1}{2}$.

On the second day, the first was a trotting race, 2:50 class or a purse of \$400. Huntress, St. Patrick, Placida, Lady Zane and Emma Taylor started. Huntress was the favorite. Placida took the first heat in 2:45; Huntress the second, third and fourth, in 2:41, 2:41 $\frac{1}{2}$, 2:41 $\frac{1}{2}$. Placida got the second money and St. Patrick third. In the third heat Lady Zane and Emma Taylor were distanced. The second race was a pacing match for \$250 a side, \$150 added by the association, mile heats, best three in five, between Johnny Wiegles and Washington. Wiegles sold favorite in the pools all the way through. Washington took the first heat in 2:31 $\frac{1}{2}$; Eagle the second, third and fourth, in 2:31, 2:25 $\frac{1}{2}$, 2:32 $\frac{1}{2}$.

On the Thursday there was a great increase in the attendance and the races were by far the best, and excited more enthusiasm than either of the preceding days. The first was a trotting race, free for all three-year-olds owned in the district, for a purse of \$300, best three in five, with Deba Mott, Starr, Buck, Foster, Ned, and Warwick entered. Ned was the favorite in the pools at five to one, and took three straight heats in 2:56, 2:50 $\frac{1}{2}$ and 2:54 $\frac{1}{2}$. Deba Mott getting second money and Warwick third. The event of the day was the trotting race, free for all that never beat 2:25, for a \$500 purse. Welby's Starr King, Titus' Echora, Rose's Del Sur, Hughes' Cairo, and Goldsmith's Director started. Del Sur got the first heat in 2:24 $\frac{1}{2}$, Echora getting the next three in 2:25, 2:25 $\frac{1}{2}$ and 2:29, and winning the first money, Del Sur and Director getting second and third money. The San Francisco delegation backed Starr King heavily at \$20 against \$15 for Director and \$12 for the field, and therefore made a heavy loss.

THE CHICAGO DRIVING PARK ASSOCIATION are certainly decided on making a success, as they now announce a Fall racing meeting that commences on Tuesday, October 3d, and lasts throughout the week. There are three two-year-old stakes, a like number for three-year-olds—the Northwestern Stake, a mile and three-quarters, and the October handicap, a mile and a furlong, the last named being for all ages. The nominations for these events close on September 1st with D. H. Hall, the secretary, at Chicago, and about the same time a liberal programme of purses will be offered, that, with the above stakes, will provide for not less than four races on each day. It is more than probable that the California horses will take part in these races, as they will then be on their way home for the winter.

ROWING.

A CARD FROM L. C. WHITE.

EDITOR BREEDER AND SPORTSMAN—Sir: In the issue of your interesting paper of the 19th inst. several representatives of San Francisco rowing clubs took occasion to compliment Chas. G. Yale for his kindness in acting as referee of the Fourth of July Regatta. Six weeks is a long time to spend in the composition of a card a few inches long, but perhaps the courteous scribes write as reluctantly as several of them row, and no much faster. As far as the compliment to Mr. Yale for his kindness in acting as referee is concerned, the card is acceptable to me. Mr. Yale has always been willing to assist in popularizing the sport of rowing, and needs no certificate of his enthusiasm or courtesy from the Golden Gate or any other club. His reputation as an honorable gentleman cannot be affected in the slightest degree by all the ink which Mr. Griffin and the tail of his literary kite could swing in a year. I would be surprised to learn that Mr. Yale has not felt more hurt by the publication of the card than the men who are aimed at over his shoulder. I am one of these targets, having been in the crew of the Pioneer Club which won the four-oar shell race on the Fourth of July, and was disqualified by Mr. Yale for fouling. Our chivalrous opponents of the Ariel Club, who were not fouled and who nevertheless were only able to row second, now unite in the condemnation of our action.

This is what is said of us by these high-toned critics, who can come to the front better in a newspaper column than in a row-boat:

It is a well known fact that every one cannot be satisfied, especially where personal interest is concerned; but we wish to state publicly that we disapprove of the ungentlemanly and unprofessional manner used by some of the disappointed oarsmen in expressing their disagreement with official decisions. We have noted with considerable attention the discussion over the result of the four-oared shell race, and while we are inclined to sympathize with the debarred crew, which certainly rowed a game race under adverse circumstances, still we cannot see how you could have decided otherwise by any recognized code of rules for amateur rowing.

Now what was the ungentlemanly and unprofessional manner used by the disappointed oarsmen to express their disagreement with official decisions? They did not fill the air with blasphemy and vituperation as some of our critics have done when official decisions did not suit them. They did not scare the referee off the bridge as has been done in other cases where some of the high-minded moralists were interested. All that the defeated oarsmen did was to row quietly to their boat-house; peacefully and silently await the decision of the referee, and promptly pay their bets when the race was given to the second crew. I do not think that such conduct comes under the definition of ungentlemanly behavior, but it is not surprising that our critics should be mistaken in the matter. The ability to judge of what is gentlemanly always presupposes the possession of some of the characteristics of a gentleman. It is interesting to compare with the conduct of the defeated oarsmen the actions of our critics. These chivalrous individuals waited until five weeks after the discussion in the newspapers had ended and in which the defeated crew took no part whatever. Then our high-minded moralists surreptitiously circulated the card complimenting Mr. Yale, and had neither the manhood nor honesty to submit it to the two clubs most interested—the Pioneer Club, which lost the disputed race, and the South End Club, which owned the boat that was fouled. The South End Club was as much interested in the matter as any other club on the bay, and would readily have joined in complimenting Mr. Yale for his disinterested activity. That was not what was wanted, however. The real purpose was to place the Pioneer Club in a discreditable position, and the means taken are entirely worthy of the projectors of the scheme. In conclusion, I beg to suggest that, as the Pioneer crew is now in training for the valuable trophy offered by the BREEDER AND SPORTSMAN, the energies of the Golden Gate and Ariel Clubs could be better applied on a sheet of water than a sheet of paper. A reputation supported by printer's ink is very unsubstantial. Apologizing for trespassing so much on your valuable space,

I remain, yours,

L. C. WHITE,
Capt. Pioneer Crew.

HISTORY OF THE HILLSDALE CREW.—In 1877 so little was known of boating in Hillsdale that the introduction of a single scull shell caused a sensation. A small club was organized, and in 1879 the now celebrated crew was sent to Toledo, O., to row the Undine crew. The Hillsdales scored such a success that they were next sent by their townsmen to Saratoga to take part in the National Regatta. As they were about to start, the officers of the club advised them merely to "feel their way," and not to hope for success in their first race. They promised to "feel their way" as instructed, but said also they would win if they could, whereupon they were told that, if they had that much good luck, the club would defray all their expenses. At Saratoga they met the best crews in the country, and their success created the greatest excitement in their town. On receipt of the news places of business were closed, church and fire-bells were rung, houses were illuminated, bonfires were built, the people gathered in the streets and cheered themselves hoarse and the bands made music in honor of the champions. Since that time Hillsdale has been a lively boating place, and the crew has been one of the institutions of the town.

The stroke adopted by the Hillsdale crew was taught them by Capt. Terwilliger. At first he was laughed at for giving the crew the stroke which has since made it successful and famous, and he was advised by many well known boating men and members of his club to change the stroke, but he claimed that it made the boat go, and did not overtax his men, and he purposed following out his own ideas as long as he remained captain. The crew had never gone into training for a race until within a week or ten days before the time they were to row, and the only concessions they received from the club, or anybody in or out of Hillsdale, were payment of their legitimate traveling expenses by the club, and the keeping open of their positions by their employers during their absence. The time and labor they gave were their personal loss.

HE FANCIES THE ENGLISH CREWS.—An impression having prevailed that the cowardly action of the British oarsmen was due in a great measure to an opinion expressed by the champion Hanlan while he was in England last Spring, Hanlan was asked on the press boat, while the races of this week were in progress on Detroit River, what he had to say about the matter.

"What is the statement about me?" he asked.

"It is charged," was answered, "that before you left England your opinion of the Hillsdale crew was asked by some of the English amateurs, and you said the Hillsdales could easily beat any amateur four in England, and advised the English oarsmen not to have anything to do with them. Is that a fact?"

"No, it is not," said Hanlan. "My recollection of it is that my opinion was asked, and I said that from what I had read and heard the Hillsdale crew could beat any amateur crew in America nearly half a minute. That's all I said. I didn't say they could beat the English crews."

"Because he doesn't think they can," put in Fred. Plaisted.

"But I haven't said as much as that," rejoined Hanlan. "Well, I know," said Plaisted.

The subject was then dropped, and those interested in it became engrossed in a race which had just been started.

COURTNEY'S LATEST.—The *Turf, Field and Farm* announces that Charles E. Courtney is acting as prosecutor in a remarkable case where nearly 70 persons were poisoned by tartar emetic in the ice-cream served at a Methodist Church festival at Union Springs on the 4th of July. The Church began the investigation soon afterwards, as many of the victims vomited blood and narrowly escaped death. But Courtney swore out a warrant and had J. H. Robertson arrested for the offense and taken before a Justice of the Peace, just as the Church investigation was about to reach a climax in the arrest of Courtney himself.

THE EARLY BIRDS.—The Pioneer Rowing Club seems to be testing the value of the proverb of the early bird, for already it has a crew in training for the Thanksgiving Day Regatta. The crew is comprised of the same men who represented the club on the Fourth of July, L. C. White, bow, R. Crowley, R. C. Lyne and John Sullivan, stroke. They were out for a practice spin on Sunday afternoon, and received considerable praise from an old Thames oarsman who was of the crowd on the bridge that watched them row the half mile to the mail dock. They showed a great improvement over their form in July, and with proper training will make a fine race in November. Lyne has abandoned some old and not valuable tricks, and will soon be almost faultless in his style. If White would slide up a little more and reach less he would conform more to the style of his comrades and help the boat along many lengths in a mile. Mr. Crowley, though the most conscientious of oarsmen, needs a little coaching. He shows much improvement, however, and as he never shirks his work will be a valuable member of the crew on the day of the race. The four rowed in good time on Sunday, and kept the boat on an even keel right through the choppy water. They got a very creditable pace on their craft, and by their exhibition did much to strengthen the confidence of their club that if beaten on Thanksgiving Day they will be very far from being disgraced.

THE ARIEL CLUB.—Charles Lipp, President of the Ariel Club, states that on Thanksgiving day his Club will be represented in the race for the BREEDER AND SPORTSMAN'S cup. The Ariel Club will use the paper shell now owned by the St. George Rowing Club of Oakland. The boat is one of the best on the coast, and if the Ariel four fail to win in her it will not be through any handicap in boats. Fred Smith, Watkins and the Branch brothers will in all probability represent the Ariel Club. This would be a strong crew, but if the Pioneer crew continue to improve, will hardly win the championship. The Pioneer four will be under the disadvantage, however, of training half the time with a substitute for Louis White, whose business will keep him out of town at intervals. Hopes are entertained by the Ariel Club that the Alerts of Vallejo can be prevailed on to take part in the Thanksgiving Day regatta. So far the Vallejo oarsmen have not indicated their determination to compete with the Metropolitan Clubs.

FELL THROUGH AS USUAL.—The Golden Gate Club is either very unfortunate or fainthearted in making matches. For some time the Golden Gate Club was anxious to arrange a match in lap-streak boats with the Ariel Club. Large stakes were talked of. The Ariel Club rather dodged the match, but the persistency of the Golden Gate champions proved too much for the prudent oarsmen, and last week they announced their intention of taking up the gauntlet. A meeting of the rivals was held on Long Bridge last Sunday, but the air of that resort had its usual depressing effect, and the negotiations fell through. The Golden Gate champions wanted to make the match for \$100, while the other side would think of nothing less than \$250 or \$500. It is whispered that if the Golden Gate men had set their heart on a \$1,000 race the Ariels would have prescribed \$250 as the only acceptable figure, and vice versa.

EASTERN COMMENTS.—The *Turf, Field and Farm* furnishes the following paragraph from its correspondent here relative to rowing in California:

"It is quite probable that the various rowing clubs will hold a consultation with a view of getting up a regatta for next Thanksgiving Day. The success of the last Fourth of July races has considerably stimulated our representative scullers, and they may thereby be said to be experiencing a boom. The sport has been dormant for the past two years, but lately a certain interest has been manifested that bids fair to end in a number of races between rival crews and ambitious single scullers. I have already announced in this column that a valuable cup would be offered for competition between crews. The race, which is open to the State, is to be rowed in best-and-best boats, over a three-mile course, with a turn. It would certainly be a feature if the outside clubs could be induced to participate, as both the Vallejo and the Stockton Clubs are reported as having skilled manipulators of the oars."

HANLAN AND ROSS.—The Boston *Herald* remarks that Hanlan's characterization of Ross as a coward does not appear to be relished much by boating men of Boston, and some of them go so far as to say that perhaps the boot fits the other leg. It is urged that, if there has been no race between these worthies the last two years, the fault is not that of the New Brunswick sculler, but rather that of Hanlan himself. Ross has done all he could to bring about a race, and Hanlan, it is contended, has been glad enough, on any pretext, to escape having one.

Holmes, the amateur champion sculler of America, will retire from regatta competition this year.

The Golden Gate Rowing Club contemplates several improvements in its boat-house.

The Pioneer Boat Club held a special meeting last Sunday, and authorized Messrs. White, Crowley, Lyne and Sullivan, to represent the Club in the Thanksgiving Day races.

The racing crew of the steamer Ranger, now anchored at Mare Island, is ready to row any six men in Vallejo a boat race three miles straight away, or with a turn, for from \$100 to \$300 a side.

The old boat in which Dan Leahy rowed so many races and made such remarkable time, has come to grief. Rob Crowley while taking a spin in her last Sunday came in collision with one of Sam Vincent's sloops, and both Robert and Samuel mourn the collision. There is about half a foot of the shell missing, and the side of the sloop looks as if she had passed the Egyptian batteries at Fort Mex.

YACHTING.

THE CUTTERS BEATEN.

Cutters have not fared well of late. The little American cat boat Gleam beat a lot of them on English waters the other day. Then in the match of the Eastern and New York Club, run off at Marblehead, the cutters Orwa and Maggie were both beaten in their classes by American sloops, one in the first and the other in the second class. Both the Gracie and Fanny beat the Orwa; and the Vixen and Hera beat the Maggie. This was on the 14th. Then on the 15th another race was sailed in which the New York sloop Vixen outsailed the much-vaunted cutter Maggie in a thirty-mile race at Marblehead, the cutter being outsailed from start to finish, both to windward and down the wind. The course was fifteen miles dead to windward, and return. The wind was light during the weather work but increased somewhat on the run home. The water was smooth for the whole course and the weather extremely fine. The contest was a perfectly fair one, the boats keeping together and having the same wind throughout. The result proves conclusively that in a fair sailing breeze the Maggie, whose reputation is that of the best fifteen-tonner that ever flew a racing flag in British waters, is no match for the Vixen, the best boat of her size in American waters.

The wind was very light and the sea smooth. Mr. Lawrence, the owner of the Vixen, having been recalled to New York by business engagements, the Vixen was under the charge of Mr. J. Frederick Tams, and on board to assist in sailing her was Captain Haft, of the sloop Fanny, and some of his crew. On board of the Maggie were ex-Commodore Peabody, of the Eastern Yacht Club, Mr. C. Goddard, the measurer of that club, and other friends of her owner, Mr. Warren. Both boats were about the same length on the water line and the match was boat against boat without time allowance. Much money was wagered on the result at the club-house, previous to the boats leaving the harbor, many enthusiastic enter advocates being of the opinion that in the race the Maggie had been purposely held back, while the New Yorkers were firm in their confidence in the Vixen, which had never yet disappointed them, and they were willing to put their money on her to any extent. As the two yachts reached in to the westward it soon became apparent that the Vixen in light weather was the faster boat. She not only fore-reached on the Maggie, but held a better wind, and each moment the gap between them grew wider. The direction of the match was in charge of all the members of the Eastern Yacht Club. From the accounts in the Eastern papers it seems the crew on the cutter were demoralized by their beating and did not handle their sails well. The Vixen beat the Maggie 19 minutes. Now, we shall be interested in reading why this was, as the cutter advocates will, of course, say it was anything rather than the other was fastest. They may say it was the light winds, but as they gloried over the Orwa a few days before, sailing in light winds through a crowd of sloops, they cannot stand on that; especially as the Orwa was badly beaten when a good breeze came.

FLYING STARTS.

Several clubs have this year, says *Forest and Stream*, conceded the necessity of reforming our slothful methods of starting by shortening the periods of grace to cross. Where ten minutes has been the custom the period has been reduced to five as a first step, and in the East anchor starts are becoming the rule to put more life and smartness in the initial portion of the race. Quite a number of slow skippers have found themselves handicapped in consequence of the change to five minutes, and some are inclined to lay the blame to the limited period. It is, however, due to the want of tact displayed, for most yachts are in the habit of knocking about without aim before the start and without thought of what is in store. Naturally they get "left." It is just this kind of baby's play we wish to see brought to a stop by the flying start to one gun after a preparatory signal has given all hands a warning to look out for a position. There is no reason why yachts should be excused from displaying the same amount of acumen at the start as in any other portion of the race, or it might properly be asked that bad seamanship at any time in the race should be met with the same tender consideration shown at the start.

Our present methods do not fit the rest of the race. If seamanship and judgment enter into the result in one part of the match, they should in another, and it is a sop to the clumsy and slothful that an excuse is made for them at the start. The only time a one-gun start can work really unfairly is when the elements step in to mar the skipper's plans. But a calm or too light air work just the same harm throughout the race, and no legitimate ground exists for exempting the start from accidents to which the whole course is liable and yet receives no such exemption. A yacht becalmed five minutes after five miles have been sailed receives no allowance, yet the damage to her chances are not a bit different than if becalmed the same after the gun has been given to start. This is a very plain matter, and we have no doubt that in time our starts will partake of the life and snap to be witnessed in matches abroad. Cutting down to five minutes is a step in the right direction, and anchor starts are much to be preferred to the unfair and slipshod ten minutes hitherto observed by the slow fashion set by em of the older clubs in which smart seamanship has ever been held too lightly.

A MODEL SCHOONER.

To show what fine yachts they are building in Boston waters, we give a brief description of a new schooner launched this month by D. J. Lander of Chelsea, Mass., for Wm. J. Weld, and called the Gitana. Length over all, 109 ft.; on load line 92 ft. 9 in.; beam, 20 ft. 6 in.; depth of hold, 10 ft., and 11 ft. draught. Keel of white oak 15 in., sided at center, tapering to 6 in. at stem and 5 in. at keel. Width across bottom amidships 6 in., with slight taper towards ends. Frames spaced 22 in. between centers. Sided at floors 7 in., and 5 in. at head; molded 10 in. at floors, 7 in. at first futtock, and 4 in. at head. Keelson of oak, sided 16 in. in center, tapering to 6 in. at ends, and secured with 1½-in. composition bolts. Clamps are 78 ft. long, two strokes 3 and 2½ in. thick, bolted with ½-in. yellow metal. Garboards and lower strokes of oak, 3 in. tapering up to 2 in., and at hoodends 2 in. thick. The frame is thoroughly kneed throughout, all fastenings of copper and composition, no iron being used for that purpose in the hull. Ceiling of selected yellow pine 3 in. thick amidships, tapering to 2 in. at ends. Plank in long lengths of 80 feet. Wales of oak, 5x3 in.; bottom plank of oak 2½ in. thick, and deck 2½ in. square white pine. Stanchions of locust, rail of white oak, and fittings of mahogany. The schooner carries 60 tons of lead ballast, 15 of which are outside on the keel. Accommodations consist of ladies' saloon aft 14x12 ft., finished in oak and cherry, Queen Anne style, with berths for six. Forward of this the companion way, then the main saloon, 18 ft. square, finished in solid mahogany and supplied with tile fireplace and grand piano. A door on the starboard hand leads to Mr. Weld's private room, 13x10 ft., finished in polished ash and cherry, with bath-room and conveniences attached. On the port hand, opening into the main saloon is the passageway forward, leading into the captain's room, icehouse, state-rooms for passengers, and gallery and pantry. The fore-castle contains eleven berths and is neatly furnished throughout. Eight tanks for water, holding 2,200 gallons for a long cruise.

A MOSQUITO RACE.

Last September a race of small yachts was sailed on this bay under the auspices of the San Francisco Yacht Club. It was the best race of the season, and very great interest was taken in it. This was the first race of the kind here, but it is to be repeated next month—schooners, sloops, plungers, yawls, or boats of any rig can enter. They must not be larger than thirty-five feet long on deck, or shorter than fifteen feet. Any boat, whether belonging to a club or not, or whether in trade or not, can come in. No entrance fee is charged, and the Club furnishes plenty of prizes, two or three to each class. The boats are divided up into classes, with no time allowances. Each five feet forms a class. That is, boats between 20 and 25 feet form one class, and above 25, and less than 30 feet form another class. Prizes are for each class; no boat in one class competing with a boat in another. The course is a short one and does not go out into the channel where there is any rough water; but it will take about two or three hours to go around. Among other things the whitell boats will be represented. No doubt a couple of dozen of these will go in, but they will be under sail of course. Boats will be confined to plain working canvas, no light sails being allowed. The object of this is to prevent some persons with more money than others from outfitting their boats specially for the race. The regatta will probably be sailed on September 9th, or it may be on the following Saturday. Upwards of fifty boats will be in the race, and it will be well worth seeing.

YACHTING ETIQUETTE.—At Newport, Rhode Island, where the yacht squadrons are together, the "Commodores" of the New York and Boston Yacht Clubs are engaged in a go-as-you-please match of "commooring." The Commodore of the Eastern Yacht Club writes to the Commodore of the New York Yacht Club that he, the Commodore of the Eastern Club, will have the honor of saluting the flag of the New York Yacht Club. The Commodore of the New York Yacht Club informs the Commodore of the Eastern Club that he will have the honor of returning the salute at four bells. And these important documents between the respective commodores are carried to and fro by boats and boats' crews, and the salutes are fired and returned and heard by the respective commodores in full uniform on their quarter-decks, and all the commodores feel themselves almost real commodores. "For it's the young naves of our jennesse doree whose praise our elite doth loudly chant."

The Bohemian Yacht Club is to be formally opened on September 2d.

It is getting on now towards the end of the season, which has been a very uneventful one in all respects.

The new yacht building by Turner for the Spreckels Brothers is all in frame so that her shape can be seen. She will soon be planked up and will be ready for use before very many weeks.

A yacht in racing has a perfect right to luff to prevent another passing her to windward, but must not bear away to prevent her passing to leeward—the lee side being considered that on which the leading vessel carries her boom.

A member of a yacht club owning a part of any enrolled yacht, and carrying the club flag, is the person who is responsible that the other owners shall respect and obey the regulations of the club, so long as the signal shall be carried on her.

The regatta for the big yachts, about which there has been more or less talk for some weeks, has been given up. The gentleman who was arranging for it spent a great deal of time and talk in trying to get all to agree, but was unable to get sufficient representation for the race.

ATHLETICS.

THE HANDICAPS OF THE FALL MEETING.—In the list of Olympic Club events for September 23d, published in last week's issue, two events did not appear (probably the fault of the printer). The events omitted are very important ones, being 100 and 220 yards, both handicaps, and open to all amateurs. They are favorite distances with all novices, and the competitors in each event will probably be com-

prised of almost all competing athletes of the day. As R. S. Haley is still anxious to run 100 yards for a record he is not likely to start in the handicap, and the honor of being scratchman will doubtless grace the shoulders of some other ambitious printer. Time is away; Doolan does not expect to enter. This will be a grand opportunity for Hawes. He claims to be a first class amateur, and no doubt thinks he can do 10½ with very little preparation. If the handicapper is of the same opinion, Hawes will be again able to say that he started from scratch. But the handicapper must be very careful. There is more than one in this vicinity capable of disputing the honors with Hawes.

AN EXHIBITION AT THE MECHANICS' FAIR.—There is a proposition before the Olympic Club to give an exhibition in the Mechanics' Pavilion before the Fair closes. The club would not be under any expense, and could undoubtedly get up an evening's entertainment at short notice that would sustain its past reputation as a gymnastic and athletic club. Since the meeting in the old Pavilion on Mission and Eighth streets, in June of 1881, the club has not been able to organize a tug-of-war team that had sand enough to meet all comers on equal terms. Let them gather themselves together, now, if there are enough of them that have the requisite courage, select a representative team, and show the old members of the original San Francisco Olympic Club that the club of the present day has not degenerated.

William Aikin, the well known chicken fancier, has taken possession of the premises 846 Howard street, where he has a bull court, the special attraction being the hand ball games that are played there every Sunday.

Captain Webb, who achieved the feat of swimming from England to France at Dover Straits, is giving exhibitions in this country. On Tuesday last, at Boston, he won a match of \$1,000 and the championship of the world, from Thomas Rile, the champion short-distance swimmer of America.

BICYCLING.

HOW A LITERARY MAN KEEPS WELL.—I live in the country; my general health is and has been good—that is to say, I have never had any serious illness—but I am a writer by profession; my "way of life," as Dr. Jaeger says his was before he gave his attention to gymnastics and woolen clothing, is "sitting," and for years I have suffered from occasional bilious headaches, which, although not very severe, were sufficiently acute to stop all literary work—sometimes for two days in succession—while they lasted. As I am very abstemious, never walk less than four or five miles every day, and faithfully observe the maxim of "early to bed and early to rise," I concluded that my headaches were constitutional; and under the belief that I should never get rid of them, bore the trouble as I best could. It did not occur to me that the two or three cigars a day that I was in the habit of smoking could do me any harm, or that, with more exercise, I should have better health. But it came to pass that some three months ago I abandoned smoking and bought a tricycle. I was led to give up smoking by reading an article in *Knowledge*, by Dr. Muir Brown, on the "Effects of Smoking." One of the observations particularly struck me. Replying to the argument that smoking is good because it checks waste of tissue, he observed that that is precisely the reason why smoking is bad, and that the only possession which it is a man's duty to waste is his body, new tissue being in every respect better than old. The tricycle made in this direction. It wasted tissue. You can get more exercise by an hour's tricycling, and with less fatigue, than by three hours' walking. There is an exhilaration about it, too, that a pedestrian never knows, and which can only be compared to that enjoyed by riding a good horse. As for perspiring, you perspire enough, especially if the day be warm, to satisfy Dr. Jaeger's most rigid requirements, and make your flesh as hard as the hide of a German soldier after two years' gymnastics. When I gave up my cigars and took to tricycling, I had no idea of curing my headaches. But they are cured. I have hardly had a headache since, and I eat almost twice as much as I used to eat. I sleep well, and my general health could not easily be better. In conclusion, let me recommend all my literary brethren who are conscious of not taking sufficient exercise, all whose muscles are flabby, livers torpid, and nights restless, to try tricycling and drop smoking and any other habit which may tend to check waste of tissue, and retard that rapid renewal of the body which is the condition of physical soundness.

THE FIFTY-MILE CONTEST IN ENGLAND.—In our last issue we gave the results of the English Bicycle Union's championship races of 1882 for one, five and twenty-five miles. The fifty-mile race, which was the last of the four events, took place July 29th, on the new Crystal Palace Grounds. There were eighteen entries, of which four did not start, and seven stopped at various distances before the finish. Seven men ran the full distance inside of 2 hours and 53 minutes, and were entitled to medals, and six of these beat the previous amateur record, which was 2 hours 50 minutes and 50 and two-fifths seconds. The winner was the Hon. Ion Keith-Falconer, whose ride of 994 miles from Land's End to John O'Groat's House, inside of thirteen days, we chronicled a few weeks since. His time for the fifty miles was 2 hours 43 minutes 55 and one-fifth seconds.

A GREAT TWENTY-MILE PERFORMANCE.—Another wonderful performance took place upon the same track on the 27th of July, when H. L. Cortis made the attempt to ride twenty miles within the hour. The weather was favorable, there being not a breath of wind, and the task was accomplished in 59 minutes 28 and one-fifth seconds. The rider kept on, and when the pistol fired had covered 297 yards more. This is likely to remain the record for some time to come, unless beaten in the twenty-mile race, which was to take place August 2d, between Cortis and Keith-Falconer, of which we have not yet received the report. This was to be Cortis' last appearance upon the path, as he was to be married upon the 3d, and to start for Australia on the 21st of August.

Philadelphia proposes to make a bicycling tournament one of the leading features of the bi-centennial anniversary celebration. The responses to the proposition have been so enthusiastic, that it now appears probable that four hundred wheelmen will participate. Since the Park Commissioners threw open Fairmount Park for the use of wheelmen, the exercise has acquired an extraordinary impetus in that city.

JOSEPH CAIRN SIMPSON, - - - EDITOR

SAN FRANCISCO, - SATURDAY, AUGUST 26, 1882

THE PROJECTED DRIVE IN THE WINTER TIME.

Last week we showed a few of the advantages which California presents for road driving in the Summer over the Eastern country. There are some who might question the claim which gives it such a decided preference in Spring, Summer and Autumn; not one, who had the least knowledge of the subject, who would refuse to grant that in the Winter there can be no comparison. The Eastern idea of a California Winter is a season of down-pouring, and that to live in any degree of comfort a person must be amphibious. Rain from above, mud below. The terms which are in use to designate the seasons have led to the misconception. The dry is supposed to be an endless succession of arid days, the wet a sky which is continually overcast, with scarcely an interval of sunshine, gloomy, disconsolate, despondent weather, worse than an English November, the only place endurable where there are pavements and indoor amusements to occupy the leisure hours. Tell these people that December and January are counterparts of April and May, that the sun's rays are the most brilliant if even they do strike the earth at a more acute angle, that heavy overcoats are an incumbrance, and that it is the grandest time to enjoy fast driving, and they credit it to what they call California bombast.

When the rains of the late Autumn come in the East they are succeeded by frosts. The muddy roads are frozen, and there are sharp "hubs" which the noonday may soften into slush, again to be frozen. They may be frozen so hard and so little warmth in the interval from morning to evening that the hubs are worn down and the roadway is smooth. Smooth, though it is hard as a Belgian pavement, and then there are icy spots on which the horses slip and strain themselves. The change comes, and in what are termed favored localities the snow falls, and the "merry sleighbells" ring out a tintinnabulatory strain. There is so great an improvement over the hubby roads that the "beautiful snow" is hailed with delight. We have fancied there was enjoyment when there were icicles hanging from moustache and eyelashes, and the horses were enveloped in hoarfrost, and their breath congealed into frozen vapor within a few feet of their quivering nostrils. Ears and cheeks frozen, fingers, though protected with heavy fur gauntlets, feeling like sticks, feet—ugh! we can realize the sensation now after eight years of relief—like the feet of a dead man, and yet with a sensitiveness acute and terrible as the pangs of torture inflicted by the merciless engines of the inquisition. The long wished-for Springtime comes at last. There is neither wheeling or sleighing, snow and mud conglomerated into a mixture in which the horses sink to their knees, and the wheels are laden from hub to fellow. After that the frost is "going out of the ground," and the bottom of the road has gone out as well.

There is little necessity to amplify the discomforts to those who have experienced them, and yet the contrast is necessary to show how greatly we are favored. With a properly graded speed-drive there are comparatively few days in the Winter when it would be unfit for use. The substratum of sand insures the most perfect drainage, and

by incorporating a portion of it in the top-covering only a few hours would be required after the rain had ceased to put in condition. That this would follow the construction of a drive in any of the localities mentioned is certain, as even the Bay District Course dries very quickly notwithstanding that the soil chosen for the top-covering has very little sand in it, and the half-mile track is in tolerably good condition soon after a rain ceases.

To our readers who have a knowledge of the Winter climate of San Francisco there is no need of a comparison with that of the East; those who are not familiar with the advantages can scarcely credit the wide difference. Not one of the drawbacks alluded to is found here. It is rare, indeed, when there are rains which last the whole of the day, and the temperature is never sufficiently low to class them as cold rains. There may be slight frosts during the Winter, never more severe than to blanch the sidewalks in the early morning, never hard enough to touch the tips of the grass-blades. There are flowers and plenty of sunshine, and rarely a day when there is more than a gentle breeze. In place of the perspiration being transformed into a coating of frost on the ends of the hairs, horses can be s"craped" and got in condition the same as in the Summer.

But all these advantages, as indulging in the health-giving recreation of road-driving, cannot be made available. Bumping over pavements, broken and uneven; bouncing about, now over slivered planks and then into pitch holes; Belgian blocks with patches sunk far below where the surface should be; cobbles, concrete, Nicholson, with now and then a patch of asphaltum; and after all of these are passed, not a furlong of road fit to drive upon.

SANTA ROSA.

It is a pleasant sail up the bay, if even there is tribulation for those who are so ignorant as to start for Santa Rosa at half-past two post meridian. There is the fresh ocean breeze when opposite Golden Gate, and the milder air when under the lee of Tamalpais; but when the knowledge comes that those who leave the city two hours and twenty minutes later will arrive at the same time, even the picturesque scenery is somewhat tiresome. There is little satisfaction under the circumstances of watching the unloading of freight at Sonoma, and it may be called truly tiresome as the trucks jangle along the wharf at Donahue. Still there was a glorious evening to ride from the landing to Santa Rosa, and if the delay had used several hours which we hoped would be spent more in accordance with anticipations, there was no help for it, and we could only blame the obtuseness which led into the blunder.

In lieu of seeing the place on the first evening, the shadows were falling before the cars rattled away from Petaluma, and the sun had sunk many degrees below the summits of the Coast Range ere the landing was made. A race between the "bus" and the street cars ended in victory for the "diligence" which carries passengers to the Occidental Hotel, and then there was dinner none the worse for the delay. There was a little satisfaction in winning a bottle of Sonoma hock, and likewise another of Roederer, of a fellow-passenger, the wager being based on which would be the favorite in the pools in the 2:25; and as this was supplemented by capturing the "Havanas" on another simple proposition of our companion who led us into the mistake of taking the Donahue route in place of the San Rafael, the acerbity engendered by making the mistake was in a measure mollified by success in the minor matters.

Very early we were astir the following morning. The day had "broke," but the sun was not yet up when the shutters were thrown open. This was the first glance of Santa Rosa. Luckily, the window was high, and the view as nearly "birdseye" as can be obtained from the top floor of a four-story hotel. Below were roofs and branches, a wealth of verdant leaves; and the panorama disclosed a lovely scene. There were streaks of radiance mounting skyward, and directly the crest of

Mount Hood was glowing in refulgence. The sun crowned it with a glory which did not require an imaginative fancy to liken it to the Gates of Paradise, portals of a sphere where there was nothing but brilliance: the fable, if it be a fable, of the fire-worshippers,—not an incongruity—as the dullest soul could scarcely fail to bend in adoration, and, with all the devotees' fervor of spirit, exclaim:

"And see—the Sun himself! on wings
Of glory up the East he springs,
Angel of Light, who, from the time
Those heavens began their march sublime,
Hath, first of all the starry choir,
Trod in his Maker's steps of fire!"

But there is more than to admire the sun driving the shadows into the deep cañons and gulches of the mountains from an upper window of the Occidental; and after an early breakfast, more enjoyable from the companionship, and inevitable argument on horse matters with A. P. Whitney and Payne J. Shafter, who were making ready for the morning train, we were prepared to see Santa Rosa. Mr. Byington had a pair of greys harnessed to a barouche, and in the caller air, fairly saturated with a perfume from garden and lawn, the drive was ultra-enjoyable. There are many substantial business blocks, well built, and more pretentious than a person would expect in a town of the population of Santa Rosa. But there is a rich country on all sides to supply, and every year adds to the producers, extends the list of consumers, so that the merchants are taxed to keep pace with the increase of trade. Again we were surprised at the character of the hotels. Good buildings which present an attractive appearance and in keeping with the other portions of the town. Like a majority of California places, Santa Rosa is a village of homes. Some of them pretentious. Villas which will compare favorably with those in the larger cities, snug cottages embowered among trees, vines, shrubbery and flowers. There are some splendid drives, and early as it was in the day, McDonald avenue was sprinkled and the surface nearly as smooth as a well-kept race track. Although the course has been highly extolled by those we have heard speak of it, we were not prepared to see so fine a track as the Santa Rosa Association possesses. A mile in circuit, the shape that which meets with the highest approval, viz., the stretches parallel, connected with semicircles, each an exact quarter of a mile. Though the natural soil is not bad for the purpose, a still better material was carted upon it and a depth of eighteen inches of the coating applied. The curves are thrown up to the right angle, and with the single exception of being a trifle wavy, it can be regarded as one of the very best and fastest tracks in the State. The buildings are good, the grand stand being commodious, the stalls a good size and well built. There is a neat judges' and timers' stand of three stories, the lower a weighing room, the second for timers and reporters, the upper for the judges and clerk of the course. It is an octagon and the style of architecture pleasing; but it is on the wrong side of the track, and the judges are placed too high to get the best view of the horses. Looking down on them from such an elevation is nothing nearly so favorable for a correct knowledge of what the horses are doing as when viewed from nearly the same level. As there is only one course in California with the judges' stand on the outside of the track, Santa Rosa cannot be harshly criticised for following the nearly universal example.

The sprinkling had been so thorough that on the morning of our visit there was not much of an opportunity for fast work until the day was well advanced. The jogging, however, brought out a lot of fine-looking horses, and not one of them appeared to be the least lame or even going short. There was plenty of the peculiar cough denoting that "pinkeye" was a visitor to this genial climate as well as on the shores of the bay where the breezes are harsher, and one or two so much affected as to interfere with the training. This was the cause of Crown Point being withdrawn from the 2:25 class, and placed Director in a position he could not show his usual speed. It is certainly a singular disease. The coughing fits are

so severe that there is almost strangulation, and yet the animal is never "off its feed," and many are in good spirits. The feature in the morning's exercise which attracted the most attention was a "brush" between Johnny and Vanderlynn. The horse with the dreadfully plebian name was too much for the crack green horse of the season, carrying him to breaks, and at no time seeming to be exerting himself to his fullest capacity. He is the sensation of the meeting so far, as he wound up his race by distancing the field in the first heat, and brought to a summary close a contest which it was thought before the start would be a very close one.

Our stay in the afternoon was restricted to seeing too heats in the colt-race, which were won so easily by Ned, a son of Overland, that there was scarcely a shadow of a fight. The ride home was by the San Rafael route, and was a decided improvement over the sail up the bay which entailed the loss of much time.

EDITORIAL NOTES.

THE STANFORD STAKE, the big three-year-old stake—so far as trotters are concerned—is to be decided the third Saturday in October, and the last payment of \$100 is due thirty days before that date. This is coming still better for the colts which have had the pinkeye. The third Saturday being the 21st, the same date in September will be the last day when the engagement can be perfected. This will be the day before the Occident Stake is trotted, therefore there will be no disturbing influences come from that. There is scarcely a doubt that all the colts which made the second payment will stay in.

THE PETALUMA FAIR commences Tuesday next. The great bugbear of a bad track, which has formerly been such a disastrous handicap to Petaluma being now done away with, there can be nothing lacking to make the speed department satisfactory. Had the owners of horses been aware that the course was so much of an improvement over the old, there would have been, in all probability, as full an entry list as in other places. As it stands, there are enough to insure capital sport, and if there are any breaks, other races will be substituted. In the first race, the winner of the same class, 2:50, at Santa Rosa, Huntress, will come into competition with a very strong field, and on Wednesday the 2:25 class will again try conclusions. Thursday will give another opportunity for Johnny to show his capacity, and the field he has to meet will sorely try his mettle. In it are Vanderlynn, Rowdy Boy, Marin, Frank Moscow and Exile, and notwithstanding the fine showing he made at Santa Rosa, he will be fortunate indeed should he "get away" with his competitors. All through the list there is a chance for very exciting sport, and the ease with which the trip can be made should warrant a large attendance from the city.

AT THE SAME TIME we would advise those who go to Petaluma, not to be led astray in taking passage on the Donahue boat in the afternoon, when their destination is Petaluma. Elsewhere it will be seen the trouble which arose from making the mistake, and though we are inclined to throw the onus of the blunder on Mr. Hicks, that does not make amends for the time lost. Trusting to his known skill as a traveler, famous for never getting left or taking the wrong route, we had implicit faith in his management, and now we scarcely know how to reconcile the balk with his well-known acumen, unless under the hypothesis that he had a scheme to carry out, which may become apparent by-and-by. It is certain that he did not have the inclination to while away the time with a game of pedro, but we will not say who got off the boat at the Sonoma landing. There was a waiving of plumes and a fluttering of perfumed handkerchiefs, but that might have been the effects of the breeze which was drawing through the straits.

THE FREE-FOR-ALL at the State Fair did not fill, and its place will have to be taken by something else. If Brigadier, Romero and Piedmont could be induced to put in an appearance, it would be a grand card for the Society. It may be asking too much for these two with records of 2:22 and 2:22½ to enter the lists with such an adversary as the hero of 2:17½, and yet from all we can learn, they would come out of the contest without disgrace. With a promise of this trio to start, the Association can give a purse of magnitude enough to give the second and third a remuneration, and we shall be much pleased to hear that such an arrangement has been made.

THE FRENCH POOLS at times show a big margin of profit. Thus many years ago at Saratoga every \$5 invested on Nickjack returned something over \$1,100, and this season there have been instances of over a hundred-fold coming back to the lucky ones. There is scarcely a race that there is not a marked difference between the rates in the auction and mutuals, and a ready reckoner, with some money at command, might make his skill at ciphering bring him in a fair salary. In that case he would have to ignore all the

"points" proffered, depending entirely on arithmetical calculations.

ECHORA comes prominently to the front now by winning the 2:25 at Santa Rosa. Del Sur, too, has shown that he is "getting at himself;" and now the hitherto intricate problem is still more complicated when the question is to designate the future winners of the class through the circuit. Crown Point two victories, Starr King and Echora each one, and Del Sur and Sweetness winners of heats. The new names are likely to involve other figures in the calculation, and Captain Smith, Honesty, Reliance, etc., leave the whole matter in a labyrinth of conjecture. This race is sure to be one of the most "open" of any on the programmes, and whoever can select the winner or winners of two consecutive races will surely be the champion vaticinator.

THE STATE OF THE ODDS, not on the St. Leger but the stakes and purses of the State Fair, will be found on another page. The only explanation necessary, further than is given, is that there is a good chance to win some money if the acceptor only makes the right guess. More than that, those who are of an arithmetical turn of mind can invest in the books, hedge in the auction and mutual pools, so that if their calculations are correct they can make a "sure winning." Thus by investing something at the odds offered on what is likely to be the favorite, there can be supplemental purchases in the pools the contrary way, and if the whole work has been skillfully performed, and a share of luck withal, there will follow a balance on the right side of the account.

THE OCCIDENT STAKE, which is to be trotted on the last day of the State Fair, has five in it which have paid the last installment. These are Anteco, Adrian, Nellie W, Bertha and Benefit. This insures a good race, and the time of trotting being three weeks off, will give the opportunity for the colts to recover from the pinkeye.

EVERYTHING is progressing favorably for the Golden Gate Fair. Never before has there been such a demand for stalls, and the prospects could not be better for a good meeting. It is almost supererogatory to say that the track will be better than it ever was before. The thorough incorporation of the material that has been added with the natural soil has made a perfect composition, and it is safe to assert that no one can find fault with that essential feature. The stalls are being renovated, and everything possible done to make it satisfactory at all points. Captain Mayhew having been installed Superintendent is a guarantee that all in that department will be satisfactory.

THAT CALIFORNIA is well supplied with stallions by Almont is fully apparent from the list heretofore published, and yet there are additions to be made, as will be seen from the communication from Colusa County. The publication has effected a good purpose if even the list was incomplete, by calling out corrections from those who had a better knowledge than we possessed. When the fairs are over, we intend to publish as full a list of the stock of California (race horses and trotters) as can be obtained. As the breeders here have not published catalogues of their stock, excepting the thoroughbreds at El Arroyo and those of auction sales, the public knowledge of the stock of the State is limited. A full list will demonstrate that this State can show more really valuable animals in the trotting studs than any other in the Union, excepting perhaps Kentucky; and the stallions here will not lose in comparison with that great horse-breeding State. The same can be said of the thoroughbreds as to quality, and in numbers there will not be such a discrepancy as many think.

PRINCETON, Aug. 23, 1882.

EDITOR BREEDER AND SPORTSMAN: In your list and notice of the Almonts in California, you have omitted one of the best and most highly bred of that noted strain of trotting horses—I refer to Tilton Almont, bred by Gen. Withers, and imported to this State the Fall of 1878, by Dr. Beltan of Colusa. His pedigree is as follows: By Almont, dam by Clark Chief; second dam by imp. Hootou, sire of Lulu's dam; third dam by Halcorn, by Virginian, by Sir Archie. Clark Chief by Mambrino Chief, dam Little Nora, by Downing's Messenger, grand dam Mrs. Caudle, dam of Edisson. Tilton Almont is a large brown horse, fine style, with heavy bone, and powerful form, and has many of the characteristics of the Mambrino Chief branch of the family, of which he has a double cross. Without training he can easily trot in 2:35, and his colts, the oldest now 3 years old, are very large and fine and promise to be very speedy.

Respectfully yours,

B.

THE LATEST RACES.

THE LOS ANGELES FAIR.

The last fair of the Sixth District Agricultural Association was not so great a success as might have been anticipated, and this result was due to the lateness of the season at which it was held, and also that sufficient preparation had not been made for a good speed programme and a creditable exhibition. This year the executive officers have shown a praiseworthy evidence of zeal in promoting the interests of the Association, in appointing a committee to solicit subscriptions in aid of the funds of the Association, and the citizens of Los Angeles have responded liberally to the appeal, as the sum will probably amount to about \$4,000. This accession to the funds will greatly strengthen the hands of

the executive officers, and it is expected that the fair will in all respects be worthy of the counties represented. It will commence on the 16th of October and will last until the 21st, and the speed programme is well devised to attract entries from the owners of district horses, as well as from those of a higher type. On the first day there is a purse of \$300 for the three-minute district class, and also another of \$400 for the 2:38 district class, concluding with a purse of \$200 for all district two-year running colts, a dash of half a mile.

On the Wednesday there is a purse of \$500 for the 2:30 class, and a mile and repeat running for a purse of \$250.

On the Thursday there will be a grand stock parade, and a purse of \$350 for three-year-old district horses and under, with a long-distance riding match.

On Friday we find a purse of \$400 for the 2:45 district class, and three-quarters of a mile dash for district runners, for a purse of \$200.

On the concluding day of the meeting, there is a purse of \$500, free for all; a district running race free for all, three quarters of a mile for a purse of \$250, and a dash of two miles and a quarter, free for all runners, for a purse of \$350. The entries to the above races close with the Secretary on Saturday, September 30th. Mr. F. J. Barretto, of Downey, is President of the Association; Mr. E. T. Spence is the Treasurer, and Mr. R. H. Hewitt is the Secretary and Superintendent, while the Executive Committee is composed of Messrs. Wm. Niles, L. Lichtenberger and F. J. Barretto. The programme is a good one; the exhibition of stock and produce promises well, and there is every appearance that the fair will be a great success.

TROTTING AT THE EAST.

At Rochester, on the 17th inst., there were two special races which resulted in the division of the purses, in the following order: Limber Jack first, Fuller second, Bessie M. third, Warrior fourth; time, 2:23, 2:21½, 2:21, 2:22. Following is a summary of the special stallion race: Santa Claus, 3, 1, 1, 1; Black Cloud, 1, 2, 2; Jerome Eddy, 2, 3, 3, 3; Von Arnim, drawn; time, 2:21½, 2:25, 2:19, 2:20½.

At Utica, on the same day, in the unfinished pacing race, in which six heats had already been decided, Flora Belle having taken two heats, Buffalo Girl two, Lucy two, and Gem one, Flora Belle won, with Gem second, Lucy third, Buffalo Girl fourth; time, 2:14½, 2:15½, 2:19½, 2:18, 2:18½, 2:18½, 2:18½. The 2:23 class race Captain Lewis won, Barbara Patchen second, Allegheny Boy third, Barrett fourth; time, 2:25½, 2:25½, 2:24½. On the 18th, the unfinished race in the 2:26 class was won by Cornelia; time, 2:21½, 2:24½. The special purse was won by Edwin Thorne, Clingstone second; time, 2:18½, 2:20½, 2:21. The 2:20 class was won by J. P. Morris, Fanny Witherspoon second; time, 2:26½, 2:20, 2:23½, 2:24½.

At Poughkeepsie, on August 23d, in the 2:29 class, Overman won, Independence second, Rigolette third; time, 2:25½, 2:23½, 2:21½, 2:27½, 2:24½, 2:30½. In the free for all pacers except Little Brown Jug, Flora Belle won, Buffalo Girl second, Gem third; time, 2:15½, 2:18½, 2:18. The 2:21 class was unfinished. J. P. Morris won two heats and Clemmie G one; time, 2:26½, 2:26½, 2:24½.

On the 24th there were about 3,000 people present at the races. The unfinished race, 2:21 class, J. P. Morrison won, Clemmie second; time, 2:26½, 2:26½, 2:24½, 2:22½, 2:21½. The 2:33 class race May Thorn won, Manhattan second, Wiry Jim third and Bertha Clay fourth; time, 2:28, 2:26½, 2:29. Little Brown Jug paced four times against time to beat 2:11½. His best time was 2:18. The 2:26 class race Owen won, Cornelia second, Phyllis third and Amber fourth; time, 2:21, 2:23½, 2:23, 2:23½, 2:24.

The pinkeye is again quite prevalent in Sacramento, although in a comparatively mild form. Fred Collier and Jim Renwick are both suffering from its effects, as are also three two-year-olds in Matt Storn's charge, belonging to Mr. J. B. Chase; Judge Mee's three-year-old colt, Judge McKinstry, in the same stable, has thus far escaped the malady that seems to be running its course through the entire country.

Mr. W. A. Caswell of Sacramento, has suffered a severe loss from lock-jaw of his well-known roadster, Starr. This horse has trotted in several purses and gained a record of 2:34½ at Sacramento in the past Spring races, and he was altogether a valuable animal. The lock-jaw was produced by his rolling violently against a box, from which he received a wound on the hip that proved fatal.

E. J. Baldwin's horses at the East have not earned the "Lucky" name of their owner this season. They have been very unfortunate, some in their races and others being laid up with the pinkeye. They are now at Long Branch, but will soon move to Sheephead Bay, for the Fall meeting.

L. R. Martin, at last accounts, was at Saratoga, taking the measure of some of the Eastern cracks for future operations.

The celebrated four-year-old trotter Phil. Thompson, who at one time was thought able to beat the time of Maude S, for that age, 2:17½, has been so seriously ill at Buffalo that his life was despaired of. The inflammation of the lungs has now subsided, but it is doubtful if he will be able to start again in a race during this season.

Mr. Winters has two very promising yearlings in the Prince of Norfolk and Callie Smart that are now being broken in at Sacramento. The one is a brother to the Duchess of Norfolk, and the filly is by Norfolk, from Mattie A. They are entered in several of the biggest stakes at Jerome Park, Monmouth Park and Saratoga in their two-year and three-year-old form.

Hanlan has issued a challenge to Ross to row four or five miles over any course between Toronto and New York, in June next, for \$5,000 and the championship of the world.

About 10,000 head of cattle, bought by Ryan & Lang, have been marketed at the stock-yard of Robert Mays, near the Dalles, Oregon, this season. They have been driven East.

A FINE EXHIBIT.—The attention of all admirers of good, sound, and at the same time elegant workmanship, is called to the fine display made at the Mechanics' Institute from the manufactory of Mr. M. J. McCue, of 1317 and 1319 Market street. Mr. McCue gives his personal attention to all points, thus ensuring the thoroughness of all the details of his large and increasing business.

—the Hotchkiss—has only just been perfected, and only on the 19th inst. it was for the first time submitted to experiment by the committee of the National Rifle Association. The practical work was intrusted to Gen. J. O. P. Burnside and Mr. D. A. Pollard of Washington, both of them riflemen of the highest reputation and skill. They fired over a hundred shots without cleaning from the piece submitted for trial, and found it as true at the end as at the beginning. There was no leading or serious defect, and altogether they considered it quite reliable in case it should be selected for use in the match. Mr. Pollard made 33 points out of a possible 35 with it at 900 yards, and the average at every range was well above an average of centres. Altogether there seems so far to be little on which to base any preference, and it is likely that no decision will be made until the teams themselves are able to experiment for a few days with both weapons. Only one thing is certain—that is, that the great danger which beset the riflemen of this country when the contest was first arranged, of losing the match through inferiority of armament, has been completely obviated, just as a similar difficulty was previous to the first international long range match with the Irish team in 1874.

There is naturally great emulation among the marksmen of the National Guard in all the states to represent our country on this occasion, and the National Rifle Association have arranged a four days' competition; at the conclusion of the practice, a team will be chosen from the men who make the highest average, none scoring under one hundred and fifty-two points being eligible. Following is the account of the first day's shooting at all ranges:

	200 yards.	300 yards.	400 yards.	500 yards.	600 yards.	700 yards.	800 yards.	900 yards.	1000 yards.	Totals

THE KENNEL.

WORDS—WORDS—WORDS.—For some time past the *American Field* has freely admitted to its columns communications from each and every gentleman who fancied that he knew a little more than his neighbors about the various strains of dogs. The result is rather confusing to those good old fashioned folks who believe that all which appears in print is true, and perhaps may have muddled some folks of greater discernment. An old California sportsman writes to the editor as follows:

GILROY, CAL.

EDITOR AMERICAN FIELD:—

Gobbo. "Master, young gentleman, I pray you, which is the way to the Master Jew's?"

Launcelot. "Turn up on your right hand at the next turning, but at the next turning of all, on your left; marry, at the very next turning, turn of no hand, but turn down indirectly to the Jew's house."

Gobbo. "By God's sories, t'will be a hard way to hit."

Launcelot's directions for finding the Jew's house are something like the articles from the various sporting writers in your paper on the subject of thoroughbred dogs. Some time ago I felt happy in the fancied possession of a pure Laverack setter, descended from Pride of the Border, and now comes a wretch of an iconoclast, who bowls him over, and offers to produce evidence to prove that he was not descended from Ponto and Moll. I next purchased a pure Llewellyn, and now I am told that he contains other blood than Duke—Rhoeb and Laverack—consequently, sold again. My next venture was a setter of "field trial breed," and another writer tells me that there is now no such breed.

Becoming disgusted, I went into the Irish strain of setters, and obtained a beautiful dog, by Berkley, confident that I had at last hit purity itself, when, to my horror, appears a very learned disquisition which proved to my satisfaction that Berkley was not a typical Irish setter—that means, I suppose, that he is not an Irish setter at all.

My next experiment was a very beautiful, and, as I thought, perfect specimen of a Gordon setter, by Grouse, also one from Blossom, and I thought, in my simplicity, that now I had a brace of perfect dogs; when out comes another wretch and says: "They are too lumbering," and that we "must get up a new type."

I next commissioned a friend to purchase me a brace of prize winners at an English bench show, and the week after they arrived appeared an article from an English writer, saying that bench show dogs were of no account in the field; in fact, neither they nor their immediate ancestors had ever pointed a bird.

Being of a sanguine disposition and not easily discouraged, I commissioned another friend to attend the next field trials in England and purchase me a brace of winning dogs, and no sooner had I received them, and was congratulating myself upon the envy I intended to excite among my sporting friends when I showed my new dogs on game, than out comes another English writer and says: "Winners at field trials cannot be relied on;" that he had known dogs "put up to win, who were not *de facto* worthy."

However, I don't intend to get discouraged, and just as soon as any gentleman finds the least fault with my dogs, or throws any slur or doubt upon their pedigrees, I intend at once to discard them, and try, try again; although I begin to think like Gobbo: "By God's sories, t'will be a hard way to hit."

A LOVER OF DOGS.

COURSING AT NEWARK.

Now that the mornings and evenings are getting cool San Francisco coursers are beginning to resort to Newark to give their greyhounds an occasional run on Saturdays and Sundays. Thanks to Dugan having restocked the place hares are plentiful. The early morning at this season of the year is the best possible time to train young greyhounds. The hares are not quite fullgrown, and consequently a chase is not so exhausting as in the height of the season when they are at their best. A badly trained dog is a nuisance alike to his owner, judges and slipper, and is sure to beat himself out of his chances, when otherwise he would have a good show to win. Dogs that fight in slips and dogs that do not get down to business until they see their opponent chasing the hare a hundred yards away, are utterly worthless, and would never be seen on a coursing ground if the following plan of breaking was adopted. It is universally used in England, and the writer can safely say that it will never be found to fail: When the pup is about eight months old it should be taught to lead without hanging back in the collar or tugging ahead. To teach this the best plan is to put it in a double collar with some steady old dog, who will soon cure it of any desire to tow the trainer or be dragged along. Firmness and gentleness are at all times necessary, and care must be taken never to attempt to teach a fresh lesson until the old one is mastered. When the pup has been taught to lead he should be exercised regularly on the road about three times a week to harden his feet and improve his wind. This should be limited to a walking gait or slow trot, and occasionally he should be turned loose on soft ground where he will give himself all the galloping exercise necessary. After a few weeks of this kind of exercise he should be trained to go into slips with an old dog. To do this the feeder should go a short distance ahead and get some one to hold the dogs in the slips, taking care that the pup does not pull. Then the trainer calls to them, and instantly they should be loosed to gallop towards them. When this is learned the pup should be put in slips with an old dog and taken to the coursing ground where a hare can be found. The instant the hare is sighted the dogs should be loosed. The old dog will see it and the young dog will follow his companion. When the kill is made the pup should be allowed to mouth it but not to taste the blood. Some trainers allow their pups to chase and kill a cotton-tail rabbit, to familiarize them with the game. As soon as the pup shows eagerness to chase, his education is complete, and after that he should be allowed with an old dog to chase a hare about once a week, not oftener; but always on soft ground. At first, when the hare doubles, he will be thrown out badly, but in time he will learn to steady himself as he goes up to the game and will greatly improve in his "working" qualities. His feet and nails should be carefully inspected for sores and cuts after a chase, and while in this period plenty of nourishing food should be given. Lean mutton and oat-cake are the best kind of food. Dogs trained by certain persons in this city invariably pull in the slips, and are nearly choked before they sight their game. That is the fault of the trainers, and if not too far gone they can be broken of the trick by means of a spiked collar.

HOW TO MAKE A DOG RETRIEVE.

The first thing to be done with a young dog is to teach him to fetch and carry. He will probably do this of himself if well bred and of a good kind, but he must learn to bring correctly; that is, quickly, and straight to you, releasing his grasp as you take hold; and you should receive from him directly he reaches you, allowing him no time to munch or play with the article, whatever it may be. You should put on him a cord about twenty yards long, and accustom him to bring a ball to you, or a rabbit skin, stuffed on purpose, drawing the dog steadily towards you with the cord. Short lessons, a few minutes daily, will soon make him perfect, and fond of bringing to you; and if he is inclined to be slow in coming up to you, run from him, and he will hasten to overtake you.

If he shows no inclination to bring or lift what is thrown for him, by keeping him hungry he will be inclined to lift hard biscuits or bread, and morsels to eat will reward him each time you receive from him, drawing him to you with the cord.

Great care must be taken to keep his mouth tender when under excitement; and a boy, or anybody else out at the time, will help you greatly by turning your dog gently to you with a whip, if he lingers to play with the bird's feathers.

If he lets go too soon, step back a pace or two and encourage him to carry up to you. If, on the other hand, he holds too tight, take hold of his cord with one hand and jerk it, as you receive the bird with the other, saying "Softly" to him all the time, till he releases his hold. "Softly" is a very important word, to be constantly used with a dog, that he may be punished if he is in any way rough with a wounded bird at any future time of his life.

This is only one of the many plans adopted by breeders. Its chief merit is simplicity.

BULL BLOOD IN THE GREYHOUND.

We have been asked to give the full particulars of the crossing of bull-dogs with greyhounds, and the result. The earliest instance of such a cross is found in Yonatt's work on the dog. The author says: "The breed had begun to degenerate, and lacked courage, from inbreeding and other reasons. About 1780 Lord Oxford, a nobleman enthusiastically devoted to coursing, imagined, and rightly, that the greyhound of the day was deficient in courage and perseverance. He bethought himself how this could best be rectified, and he adopted a plan which brought upon him much ridicule at the time, but ultimately redounded to his credit. He selected a bull-dog—one of the smooth rat-tailed species—and with him crossed one of his best greyhound bitches. He kept the female whelps, and crossed them with some of his fleetest greyhounds, and the consequence was that after the sixth or seventh generation there was not a vestige left of the form of the bull-dog, but his courage and indomitable perseverance remained, and having once started after his game, he did not relinquish chase until he fell exhausted, or perhaps died. This cross is now universally adopted. It is one of the secrets in the breeding of the greyhound. A favorite bitch of this breed was Czarina, bred by Lord Oxford, and at his decease purchased by Col. Thornton. She won every match for which she started, and they were no fewer than forty-seven. Two of her progeny, Claret and Young Czarina, challenged the United Kingdom, and won their matches."

TRAINING SHEPHERD DOGS.—Darwin thus describes the training of shepherd dogs: "When riding it is a common thing to meet a flock of sheep, guarded by one or two dogs, at a distance of some miles from any house or man. I often wonder how so firm a friendship had been established. The method of education consists in separating the puppy while very young from its mother and accustoming it to its future companions. A ewe is held three or four times a day for the little thing to suck, and a nest of wool is made for it in the sheep pen. At no time is it allowed to associate with other dogs, or with the children of the family. From this education it has no wish to leave the flock, and just as another dog will defend his master, man, so will this dog defend sheep. It is amusing to observe, when approaching a flock, how the dog immediately advances barking and the sheep all close in his rear, as if round the oldest ram. These dogs are also easily taught to bring home the sheep at a certain hour in the evening. Their most troublesome fault when young is their desire to play with the sheep, for in their sport they sometimes gallop the poor things most unmercifully. The shepherd dog comes to the house every day for his meat, and as soon as it is given him skulks away as if ashamed of himself. On these occasions the house dogs are very tyrannical, and the least of them will attack the stranger. The minute, however, the latter has reached the flock, he turns round and begins to bark, and then all the house dogs take quickly to their heels. In a similar manner, a whole pack of hungry wild dogs will scarcely ever venture to attack a flock guarded by one of these faithful shepherds. In this case the shepherd dog seems to regard the sheep as his fellow brethren and thus gains confidence; and the wild dogs though knowing that sheep are not dogs but are good to eat, yet when seeing them in a flock with a shepherd dog as their head, partly consent to regard them as he does."

FIELD TRIALS IN GERMANY.—There will be an international field trial in Germany in September next, on the shooting ground of Prince Albert Solms, who is one of the promoters of the trials. There will be an All-aged Setter and Pointer Stake, a stake for Setter and Pointer Puppies, and special stakes for German dogs. In spite of much grumbling at the Kennel Club for requesting its members to abstain from exhibiting or taking part in any show not held under their rules, that body is steadfast in its opinion that it is acting wisely, and its members for the most part are satisfied to absent themselves from shows not willing to guarantee them the protection which their rules afford them. No particular fault is found with the rules, but certain shows seem fearful of the power likely to accrue to the Kennel Club by an adoption of its code.

THE LAVERACK FUND.—Subscriptions to the fund for erecting in America a monument to the late Edward Laverack, the founder of the breed of setters of that name, have reached nearly \$100.

Frank Noble, of Sacramento, has sold his Llewellyn pup, Rob, to Judge W. S. Mesick, for the handsome price of \$100.

The members of the Dog Fanciers' Association, Montreal, Canada, are making efforts to awaken an interest which shall warrant them in holding a dog show during September.

Mr. Chas. A. Schieffelin has presented to Mr. Edmund Orgill his lemon and white pointer bitch Juno, out of "old Juno," dam by Flake, by W. K. C. Sensation. She will be bred to champion Rush.

Mr. Edmund Orgill of Brooklyn, has recently sold to Mr. J. A. Wright of Austin, Lander Co., Nevada, two very promising pointer puppies, viz., dog pup Random, ex Romp II., and bitch pup Rush, ex Juno.

James H. Corbin, of Sacramento, lost his fine young Llewellyn setter Roscoe, a couple of days since, by poisoning. Some miscreant administered the deadly drug to him while he was fastened in his master's yard. Roscoe was sired by Elmore's imported dog Regent, one of the best bred Llewellyns that ever came to the coast. Mr. Corbin had refused \$100 for him on the very day he was poisoned. Well bred dogs are so scarce on this coast that the loss of one is to be deeply regretted.—*Sacramento Bee*.

THE HERD.

BEEF PACKING ESTABLISHMENT.

Enormous as has been the increase in the amount of beef sent alive to Europe, America could never have supplied the demands of the foreign markets for beef had her exports been confined to cattle of the higher qualities required by that trade. Prices for beef of all kinds would have been much higher than they have been had there not been grazing on the plains of the West thousands of herds fattening on the rich, natural grasses, drinking the sweet waters, and breathing the pure air. These cattle are known to be the healthiest in the world, and loss from any cause except accident, or from exposure to severe storms, is practically unknown. But these cattle of the plains, healthy as their flesh is known to be, cannot be profitably sent alive across the Atlantic, for they are not heavy enough, except when fully fattened on corn, nor are they good enough in style to please the taste of John Bull. But by putting the meat of these cattle, properly prepared, in tightly-sealed tin cases or cans, and leaving here all the less desirable parts, the beef can be profitably sent to the consumer, and will keep pure and wholesome for an indefinite period.

A few years ago there were but two or three canning establishments in operation in North America, but since that time, favored by low prices of cattle, quite a number were opened, more perhaps in Chicago than in all other cities in the country; at least half a dozen important canning factories having been in active operation at one time. St. Louis had one which suspended work last year, but, it is said, will begin again this year. In South America, in Texas, and in Canada the various attempts to can beef profitably failed. After many failures, Chicago enterprise and skill succeeded in winning the appreciation of the civilized world, and its patronage by proving the superiority of American methods. One Chicago firm alone has shipped over 40,000 cases per month, and last year sent abroad 519,065 cases, a large number having been of cans containing 14 pounds each. This firm began business in 1868, killing only about fifty cattle per day. Now, 1,000 to 1,200 per day are killed during the busy season of the year. Of 45,000 cases per week used in England in 1878, nearly 40,000 were from one Chicago house.

LAMB—Quotable at 6@7c @ lb.
PORK—Live hogs, 8@8½c for hard and 6¾c to 6¾ for soft; dressed do 11@11½c @ lb for hard grain hogs.

[Franklin (Ohio) Chronicle.]
A TWENTY YEARS' SIEGE.

Twenty years of uninterrupted happiness would, we think, render life almost monotonous; but what must twenty years of suffering be to the average mortal? Think of it; twenty consecutive years of misery, years wherein the mind must constantly dwell upon the suffering of the body, because of the body's incapacity to labor, and therefore forget its suffering. The following official presentation of a case covered by the foregoing considerations is worthy of attention:

State of Ohio, Tuscarawas County, ss:
Before me, a Justice of the Peace, within and for the township of Franklin, Tuscarawas county, Ohio, personally appeared Isaac Fulk, who being duly sworn, according to law, deposeth as follows, to wit:—That for the past twenty-eight years I have been afflicted in both knee joints with that most dreadful disease, scrofulous white swelling; that I used and tried various remedies and took treatment of the best physicians during that time, but without receiving any benefit whatever, the disease constantly growing worse. Some time ago I was induced to try St. Jacobs Oil, and I am most happy to say that after using one and one half bottle there is great change for the better in my case, and that I can now walk better and can perform more labor than I could at any time in the past twenty years, being daily employed at hard manual labor. I feel as nearly cured as it is possible to cure such a disease. ISAAC FULK.

Signed and sworn to by the said
ISAAC FULK, before me, this
25th day of April, A. D. 1882.

PHILIP A. GARVER,
JUSTICE OF THE PEACE.

Mr. Garver, in his letter conveying the foregoing, thus speaks of Mr. Fulk: "I send herewith the affidavit of Mr. Isaac Fulk, with reference to the benefits derived by him from the use of St. Jacobs Oil. I would say that the statement is true and reliable in every particular. Mr. Fulk is an honest, hard-working man, and is greatly delighted at the benefit derived from the remedy, and I thought his statement might be of some service to you, as well as to those afflicted in a similar manner with him. Hoping that the sales of your justly popular remedy may continue to increase, and everywhere give the same satisfaction as it has in this community, I am truly yours,
PHILIP A. GARVER.

A new journal is to be established in San Francisco devoted to the interests of stock-breeding and out-door sports. Of course the breeding of horses, and especially race horses, both trotting and running, will receive most attention, but valuable information will be given on the breeding and management of all kinds of stock. A paper of this kind could be made of very great value to all farmers and stockmen, and if the proposed journal shall prove to be ably managed, it will be very likely to gain a liberal support among them. The first number of the paper will be issued on the first of next month, and will contain sixteen pages of reading matter. It will be called the BREEDER AND SPORTSMAN. The paper will be issued weekly, and will cost five dollars per year. The name of the editor is Joseph Cairn Simpson.—Greenville Bulletin, June 21st.

The BREEDER AND SPORTSMAN is the title of an elegant sixteen-page weekly journal, published in San Francisco, the initial number of which has just made its appearance. The engraved heading of the BREEDER AND SPORTSMAN is the prettiest piece of work in that line that we have ever seen. The artist has won a genuine triumph, for he has not only incorporated in his beautiful design water and foliage, fruit and blossoms, fine horses, cattle and dogs, but all the emblems and symbols of sporting life. Joseph Cairn Simpson, the veteran turfman and accomplished gentleman, is the proprietor of this new venture in the field of journalism. He is supported by an able corps of writers, all of them well trained in the several departments over which they have been called to preside. The BREEDER AND SPORTSMAN deserves and will achieve success. Its field is large and remunerative. Each of the San Francisco and Sacramento dailies dishes up a weekly pot pourri of sporting news. Then there are the California Spirit of the Times, the Pacific Life and the Olympian—all specially devoted to the subject and making fortunes rapidly for their owners. The thirst of the California public for sporting intelligence, however, remains unquenched, and Mr. Simpson's splendid journal comes in to relieve the stress. An attractive feature of the new paper is the appearance each week of a drawing of some one or other of the "Notable Horses of California"—Mr. Winters' Duchess of Norfolk leading off in the first number. The breeders of the Pacific Coast, from the Columbia to the Colorado, and from the Sierras to the sea, should now stand in with Joe Simpson and make this journal a financial success. He has done more than any other man in America to elevate the turf and advance the breeding interests of the Pacific Coast.—Territorial Enterprise.

E. S. Denison enters s m Lady Hays, by Hiram Tracy; dam, Nelson mare.

A. L. Hinds enters W. M. Hammond's s s Oakland Boy, by Wintthrop; dam, a Blackbird mare.

In addition to other premiums, H. T. Dorrance will offer a set of choice track harness, valued at \$65, for the horse owned in the District that makes the fastest trotting record at the Stockton Fair. He also offers a \$25-jockey saddle to the horse that makes the fastest running mile record owned in the District at the Fair.

Irving Ayres, owner of Mambrino Wilkes, offers a special premium at our Fair, a silver race-set and waiter, for the best two-year-old colt sired by the above horse. Also, for the second best colt, a silver water pitcher. The colts to be shown at the Stockton Fair.

REMARKS AND CONDITIONS.

All Trotting Races best three in five, except numbers 2 and 9.

In all these Races (Pacific Coast Novelty Race excepted) four moneys, \$50, 25, 15 and 10 per cent. of purse.

When there are eight or more to start in a Trotting Race, 150 yards shall be a distance.

Rules of the National Trotting Association to govern trotting, except as specified; but the Board of Managers reserve the right to trot heats of any two classes alternately, or to start a special race between heats.

All two-year-olds, when running in their classes, shall carry 100 pounds, with the usual allowance for mares and geldings.

All three-year-olds, when running in their classes, to carry 110 pounds, with the usual allowances as above; otherwise, old weights to govern.

For a walk-over in any race a horse shall only be entitled to his own entrance fee and one-quarter of the entrance received from the other entries for said purse; and a horse winning a race entitled to first money only, except when distancing the field, then entitled to first and third moneys only. A horse wins but one money under any other circumstances.

Horses entered in purses can only be drawn by consent of the judges.

The Board reserves the right to change the day and hour of any race, if they deem it necessary.

Rules of the Pacific Coast Blood Horse Association to govern Running Races, including additions to rules, except as especially provided.

In all Running Races colors to be worn by riders, and in all other races, any other particulars that will enable spectators to distinguish the horses in the race.

Races to commence each day at 1 o'clock P. M. sharp.

The track is first-class, having been improved. Stables bay and straw free to competitors.

L. U. SHIPPEE, President.

J. L. PHELPS, Secretary.

REMARKS AND CONDITIONS.

All trotting and pacing races are the best three in five, except the two year old trot, unless otherwise specified; five to enter and three to start. Entrance fee ten per cent. on purse, to accompany nomination. Purses divided at the rate of sixty per cent. to first horse, thirty per cent. to second, and ten per cent. to third.

National Association Rules to govern trotting; but the Board reserves the right to treat of any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats.

All two-year-olds when running in their classes, shall carry one hundred pounds, with the usual allowance for mares and geldings.

All three-year-olds, when running in their classes, to carry one hundred and ten pounds, with the usual allowances as above.

Those who have nominations in stakes MUST name to the Secretary, in writing, the horses they will start on Monday, on the Saturday previous; and on Wednesday the Monday previous; and on Friday the Wednesday previous, by twelve o'clock M. This rule is obvious, and must be strictly adhered to.

No added money paid for a walk over.

Horses entered in purses can only be drawn by consent of Judges.

Rules of the Pacific Coast Blood Horse Association (old weights) to govern running races, except when conditions named are otherwise.

EDWIN F. SMITH, Secretary. HUGH M. LARUE, President.

Golden Gate Fair.

No. 4. J. & W. S. Futch, entered by S. Sperry, Petaluma, ch m Nellie R., by Gen. McClellan, Jr., dam Susie Rose.
No. 5. A. Waldstein, San Francisco, names b s Albert W., by Electioneer, dam by John Nelson.

No. 7.—SAME DAY.—PACING.—Purse, \$500; first horse, \$300; second, \$150; third, \$50.

Washington and John by the regle, to wagon.
No. 1. L. E. Yates, Oakland, names b m Corlette, by Winthrop, by Old Drew, dam Cora by Ladd's Kentucky Hunter, by Kentucky Hunter.
No. 2. E. S. Dennison, Oakland, names ch m Lady Hayes, by Hiram Tracy, dam a Nelson mare.
No. 3. A. L. Hinds, Oakland, names ch h Oakland Boy, by Winthrop, dam by Blackbird.
No. 4. G. Valensin, Arno Station, Sacramento Co., names br m Ouida, by Black Hawk, dam by Fanny Kling. [Closed by agreement.]

THIRD DAY—WEDNESDAY, SEPT. 6.

No. 8.—RUNNING.—Free for all; 2-mile dash; \$100 entrance; \$25 forfeit; \$250 added; second horse to save stake.
No. 1. P. J. Shafter, San Francisco, names b c Night Hawk (5), by imp. Haddington, dam by Norfolk.
No. 2. Leland Stanford, Palo Alto, names b f Precious, by Lever, dam Frolic by Thunder.
No. 3. Wm. Boots, Milpitas, names b m Mollie H. (5), by Wildlde, dam Mamie Hall by Norfolk.
No. 4. J. T. Gilmer, Salt Lake, names b h Red Boy (aged), by Wardance, dam imp. Nielson.
No. 5. Stemler & Ayres, Portland, Or., name ch g Fred Collier, by Joe Hooker, dam Puss by Norfolk.

No. 9.—SAME DAY.—TROTting.—Free for all three-year-olds; purse, \$600; first horse, \$360; second, \$180; third, \$60.

No. 1. J. C. Simpson, Oakland, names b c Antee, by Electioneer, dam Columbine, by A. W. Richmond, g d Columbine, by Bonnie Scotland.

No. 2. Jas. M. Learned, Stockton, names — Adrian, by Reliance, dam by Kentucky Hunter.

No. 3. Irving Ayers names blk s Fred Arnold, by Nephew, dam Fanny Form, mother of Mollie Drew.

No. 4. Filly, by Admiral. [Closed by agreement.]

No. 10.—SAME DAY.—TROTting.—2:22 Class; purse, \$800; first horse, \$480; second, \$240; third, \$80.

No. 1. J. B. McDonald, Marysville, names b s Brigadier, by Happy Medium, dam Lady Turner.

No. 2. John A. Goldsmith, Oakland, names gr s Romero, by H. W. Richmond, dam by Mambrino Pilot.

No. 3. L. H. Titus names b m Belle Echo, by Echo, dam by Belmont.

[Closed by agreement.]

FOURTH DAY—THURSDAY, SEPT. 7.

No. 11.—TROTting.—Free for all two-year-olds; one mile and repeat; purse, \$400; first horse, \$240; second, \$120; third, \$40.

No. 1. L. J. Rose, San Gabriel, names br f Neluska, by Sultan, dam Gretchen by Mambrino Pilot.

No. 2. S. Rosener names b f Ruby, by Sultan, dam by Hambletonian; owner J. W. Mackey.

No. 12.—SAME DAY.—TROTting.—For all four-year-olds; purse, \$500; first horse, \$350; second, \$180; third, \$60.
No. 1. James Garland, San Francisco, names gr g Rowdy Boy, by Rustic, dam by Belmont.
No. 2. A. Waldstein, San Francisco, names b s Albert W., by Electioneer, dam by John Nelson.

No. 13.—SAME DAY.—RUNNING.—SELLING RACE.—Purse, \$250; free for all; 1-mile dash; second horse to receive \$75; horses entered to be sold for \$1,000, to carry entitled weight; 2 pounds off for each \$100 under fixed valuation.

No. 1. P. J. Shafter, San Francisco, names blk h Haddington, by imp. Haddington, dam by Norfolk, valuation of horse \$800.
No. 2. John H. Cardinell, San Francisco, names ch h Jack Douglas, by Wildlde, dam Lady Clare.

No. 3. Wm. Boots, Milpitas, names b m Mollie H. (5), by Wildlde, dam Mamie Hall by Belmont.

No. 4. Henry Schwartz, San Francisco, names Sister to Lottery, 3 years, by Monday, dam Virginia.

No. 5. J. T. Gilmer, Salt Lake, names ch g Euchre, 5 years, by Leinster, dam Flou-Flou, price \$500.

No. 6. Stemler & Ayres, Portland, Or., names b g Joe Howell by imp. Bonnie Scotland, dam Eva Shepherd, by imp. Sovereign.

FIFTH DAY—FRIDAY, SEPT. 8.

No. 14.—RUNNING.—CONSOLATION PURSE.—\$250 for beaten horses; mile-and-a-quarter dash; second horse to receive \$75; 10 per cent. entrance.

No. 15.—SAME DAY.—LADIES' RIDING TOURNA-MENT.—There will be several very choice and elegant prizes to be competed for, contributed by the merchants and citizens of Oakland and San Francisco; the lady winning first prize to have first choice, the second, second choice, and so on until all the prizes are distributed. Ladies wishing to compete for premiums will send their names to the President or Secretary on or before the first day of September, 1882, indorsed by at least two gentlemen of the Society. Conditions will be published in the daily papers.

No. 16.—SAME DAY.—TROTting.—2:25 CLASS.—Purse, \$800; first horse, \$480; second, \$

FIVE DOLLARS A YEAR.

ANTEVOLO.

FOALED MAY 12, 1882. BY ELECTIONEER, HIS DAM, COLUMBINE, BY A. W. RICHMOND.

The portraiture above is not given as being the representation of a "notable" but rather as a type of an animal which can be expected from analogous breeding. And yet there might be a wide divergence. When coupling animals that have various strains of blood, it is difficult to say which will predominate. "Reversion" "atavism," "revolution," all of the terms which writers have used, may appear appropriate to the animal under discussion, and the reversion to one parent, the following a recognized type, a revolution of an individual in the genealogy upset all recognized theories, and leave the diligent student in a maze of conjecture. There is scarcely a position which cannot be sustained from the records. The calendar will sustain the thousand and one theorists, who in bolstering their claims point to a combination that has been successful, and these are highly indignant when any one questions the accuracy of their statements. "Figures will not lie" is a favorite dogma, and though that "twice two are four" is a proposition which scarcely admits

of denial, there are numbers who will dispute the accuracy of the multiplication which interferes with their figuring. The illustration of the yearling colt which is though worthy of being placed on a page which has contained the presentment of actual notabilities is a lesson which is not entirely trustworthy. It presents very nearly our ideal of the proper form of a trotting-bred youngster, and still without displaying objectional points worthy of correction. But as proof that these do not arise from the conjunction of blood, or the making of individuals, he has an older brother which is nearly perfect in points which the younger lacks, deficient where the junior is superior.

One of the chief elements in causing the breeding of horses to be so fascinating is the uncertainty. The "glorious uncertainty" of racing affords the charm which entices all who have enjoyed in the pursuit, and in breeding this is so highly intensified that a man with a spark of feeling becomes infatuated. Like the pall which hangs over the future—es-

pecially the far-off future beyond this world—there is the ever-present doubt. The overshadowing doubt which fruition can remove, only and to which previous failures give a sombering color. The next is to be the bright spot, and the hope which springs from the shadow constantly cheers.

Now as to the breeding of the subject of the sketch. His sire, Electioneer, is so well known that there is scarcely a necessity for further comment. His breeding is of the ultra-trotting stamp. By Rysdyk's Hambletonian, his dam by Sayre's Harry Clay, there are united the lines which stand second on the list. It would still be a greater waste of time amplifying on the Hambletonian. A man who does not give them the foremost place in the trotting galaxy of wonders, is either bigoted or nonsensical. There may come up another strain which will deserve equal prominence, and he would be a rash man who asserted that there would be no changes. On the side of the dam there are lines which are not so well known. All on that side are thoroughbred, so far as they are

known, with the exception of one strain, and that "missing link" is a race which have, at least, the merit of peculiarity.

According to the formula of the stud book, the pedigree will run:

- 1st dam Columbine, by A. W. Richmond.
- 2d dam Columbia, by imported Bonnie Scotland.
- 3d dam Young Fashion, by imported Monarch.
- 4th dam Fashion, by imported Trustee.
- 5th dam Bonnets o' Blue, by Sir Charles.
- 6th dam Reality, by Sir Archy.
- 7th dam by imported Medley.
- 8th dam by imported Centinel.
- 9th dam by Mark Anthony.
- 10th dam by imported Monkey.
- 12th dam by imported Silvereve.
- 13th dam by Spanker.

This pedigree has a close resemblance to those which follow the winners of some of the big events on the legitimate, and after the first dam it would be difficult to compile a more fashionable line of dams. There would be no need of further comment if the queries were restricted to the turf, but now the question is, what is there outside of the Hambletonian to make it desirable in a trotting pedigree? A. W. Richmond was by Simpson's Blackbird, his dam by Rattler—claimed to be thoroughbred, and his granddam by Spotted Range, in the language of the bills an Arabian, though more properly an Opelousas horse. There was a race of horses in Ohio, western New York, and Northern Pennsylvania called Arabians. They were singularly marked horses, many of them spotted, with light manes and rat-tails. They were noted for gameness on the road, going long distances with little fatigue, and serviceable, though with tempers which could scarcely be called serene. In the Southern States they are denominated Opelousas horses, and their origin has been credited to the early Spanish importations. The singular markings which a majority of them show substantiates this view, and even with as little of the blood as Antevolo possesses is there, the slim tail and light mane, which are tokens of the inheritance.

A. W. Richmond is the sire of Romero, San Diego, Len Rose, Mavis, etc. He has enjoyed the smallest opportunity in the stud never having made a "regular season" until his importation to California, and then restricted to a few mares. Had he never done more than to get Romero, with the fastest four-year-old stallion record 2:22½ it would scarcely be called a poor showing. On this side of the house are California Blackbird record 2:22, Little Fred, 2:20. T. Nourmahal, who beat Lady Mac in Chicago and forced her to make the fastest record for five miles, here is a sister of A. W. Richmond, and we always regarded her as one of the most perfect, pure-gaited trotters. The grandam of Antevolo, as the pedigree shows, is thoroughbred. Her sire, Bonnie Scotland, is too well known to require more than an allusion to him as the progenitor of race horses. He had the first place in the list of winning sires in 1880, his get showing winnings aggregating \$135,700, and he is also a standard sire, as his sons Scotland and Dan Donaldson have respectively records of 2:22½—2:24½. The fourth dam of Antevolo, Fashion by imported Trustee, is generally credited with being the best race mare ever bred in America; she was certainly one of the best, and took altogether the most prominent place in the turf history of her day. Revenue, the sire of Planet, and others of the get of "Honest Trustee" kept up their reputation on the turf, and as the first horse to make twenty miles within the hour trotting was also got by him there came a trotting inheritance. In California the reputation of the family has not suffered, as John Nelson by imported Trustee is the sire of Nerea, 2:23½; Aurora, 2:27, and Governor Stanford, 2:27½. The third dam of Antevolo was by imported Monarch, and a son of this horse, Strawn's Monarch, is the sire of Monarch Rule, 2:24½, and Monarch Jr. with the same record. The sixth dam, Reality, by Sir Archy, was claimed to be the best race horse which her owner, Colonel W. R. Johnson, ever had, and as he was recognized to be the most acute turfman of his time, his classification is sure to be nearly correct. The daughter of Reality, Bonnets o' Blue, was a fair race mare and as she was by Sir Charles there was a "double Archy" cross and, of course, a double infusion of imported Diomed, which is generally accredited with being a potent mixture in a trotting pedigree.

The strains of thoroughbred blood in Antevolo have been demonstrated as a proper admixture for the trotting tracks, and with it there is a degree of quality which only comes from a strong infusion of the royal lines. There is so little necessity for written description accompanying the graphic representation of our artist, that it seems a waste of space to add to the penciled delineation. There may be an addenda, however, in giving the color and size. Antevolo is a brown with mealy nose and light tan in the flanks. He is nearly fifteen hands over the withers, rather more than that over the loins. He is fine as well as muscular and in a stable of thoroughbreds would not appear out of place. His disposition could scarcely be improved—docile as his companion the terrier, and with intelligence beyond what is usually seen in so young an animal. Trotting is nearly as natural to him as the gallop, and his action as good as need be. The fifth time he was driven on the track he trotted a quarter of a mile in fifty seconds, and the first time he was driven a mile he showed 3:12. This rate of speed, while far below what our California colts of the same age have shown, prove that the fast-trotting step has been inherited, and as he was only a few days over fifteen months when the trial was given, there is a chance for him to make a reduction while he is still in his yearling form.

Breeding of Coach Horses.

CINEGA RANCHO, August 26, 1882.

EDITOR BREEDER AND SPORTSMAN:—Your leading article of the 5th of August refers to the breeding of coach horses, and says: "The combination of blood which has been found in England well adapted for the production of these animals is three-quarters thoroughbred and the other portion Clydesdale; but the thoroughbreds used must have the requisite size and proper shape." You are, I think, rather indefinite, and this statement might mislead some of your readers. You don't specify that the Clydesdale blood must be on the dam side—and this is, I think, essential. Here in California any such enterprise on a large scale is not within reach of the ordinary farmer and stock-raiser. To begin with, the class of thoroughbred sire would, to say the least of it, be very hard to find. Secondly, the Clydesdale mares are very expensive; and thirdly, the first cross from Clydesdale to Thoroughbred is a most unequal animal. By unequal, I mean the produce is neither level as a lot, nor are the individual specimens, what every judge so much admires, level made horses. To continue breeding these mares, the cross of the Clyde and the thoroughbred, you should have a large choice of thoroughbred sires, as thus the mares from their very inequality could not, successfully, be all rated to the same stamp of sire. This choice of thoroughbred sires cannot be found in the State. This irregularity also makes the geldings from this first cross very unsaleable.

So much for my complaint, and no one should publicly find fault without having, at least, a supposed remedy.

Look out for shape, action and bone in your mares, and don't hanker so much after size to commence with. Such mares can be picked up much cheaper than the worst made Clydes in the country. Breed these to an even-made, well-boned, thoroughbred horse. Few know, however, how the first cross of thoroughbred on medium-sized, cold blooded mares increases size. Your fillies from this stock will be a much larger stamp than their dams, more rangy; breeding strongly after the horses, even as a lot and level made individually. The geldings will surely sell well as first class saddle horses or fair light road horses. In the next choice of stallion much judgment will be required. Some of these half-bred mares may require another crop of thoroughbred, but the majority should be fit to breed to a full, large, true-actioned, well-bred trotting sire; shape, size and action being more requisite than great speed. This crop will, I think, give you fine coach horses in the majority of cases, and the few that fall short should, at least, be large, useful road horses. I do not offer these suggestions to the large capitalist, who can afford to be out of his money and any return therefrom for an indefinite period, but I write to caution the ordinary farmer, who yearly expects a return on his money and trouble, against these sudden jumps in breeding, which produce clumsy nondescripts in the majority of cases. Small bodies, big legs and heads, or, worse again, large bodies, large heads, short necks, and small legs. They, in fact, ring the changes in every conceivable form.

BROAD ARROW.

Late Importations of Percherons at Petaluma.

PETALUMA, Aug. 29.

EDITOR BREEDER AND SPORTSMAN: Upon my arrival here on the morning of the 27th I met Mr. H. Wilsey and accompanied him to his ranch about four and a half miles from this place. There are ten fine Percheron stallions lately imported by himself and Mr. H. T. Fairbanks from France. They were selected by Mr. Wilsey himself from the best to be found in France and are as fine a lot as I have ever seen. They are from three years to six years of age, perfectly sound and in fine condition. Julius Caesar was the first shown, a dark iron gray; Marshal Ney, a dapple gray; Murat, black; DeLesseps, dark dapple gray; Bob Ingersol, dapple gray; Knight of Normandy, iron gray, is nearly black; Bonaparte, dark bay; Robespierre, nearly black; Dumas, gray, and Emperor, dark brown. These horses range in weight from 1450 to 1800 pounds, perfectly formed, of fine action and all of them so nearly perfect as to make it difficult to choose between them. Sonoma county is taking the lead for this class of stock, and previous to this latest importation there were many very superior animals of this popular breed. The show at the fair of the various draft breeds will demonstrate that this is the business county of the State for heavy horses.

H. P. M.

CHICO, Aug. 29.

EDITOR BREEDER AND SPORTSMAN: Since my last letter the following horses have arrived at the track to take a hand in the races to come off next week during the District Fair. Mr. Ab Ellis has the following: Fred Hunter, bay, by Norfolk, dam by Lodi. Entered in 1½ mile running race. Also Tilton Almont, by Almont. I saw an extended pedigree in your issue of last week. He is a fine, powerful looking horse. Also Kate Almont, by Tilton Almont, 3 years old. Mr. John Spurgeon's three-year-old bay colt Telegraph, by Tilton Almont. He won the three-year-old race Saturday, August 26th, for all Tilton Almont colts; best heat 2:53; by horse Shiner, by Norfolk, dam by Rifleman. Tom Haslep has ch. g. by Norfolk, dam by Rifleman. There are several draft horses on the ground, but all I had time to look at was British Stallion Sir Tom, sired by an imported Clydesdale horse.

OCCASIONAL.

SETH GREEN ON THE FINNY TRIBE.—Why talk about reasoning powers! The perseverance and instinct of these little creatures is wonderful. People go out to fish. They splash around, stand up in their boat, drop their lines three feet away, and wonder because they don't catch trout. They forget that trout can see. Fish learn that tackle, and fish are, as a rule, local in their habitation. There are not as many gypsies among fish as among men. Any man who will take the pains to study fish—or who will remember a tithe of what he reads about them—can catch them. They are smart, but our brains will beat them. I remember once of fishing for salmon trout for a long time and taking nothing. Finally I concluded to get down and look into the water, and so, throwing my coat over my head, I got the required shade and peered down. The salmon would sail up and look at the minnow. Then, with a quick dart, he would close his teeth round one-half the minnow and open them again like a flash. He did not attempt to eat the minnow, and half of the severed body would drop to the bottom. When it had fallen to the bed of the lake the salmon would go down and leisurely eat it. The next time when I dropped my hook and felt the quick bite of the trout I let out enough line to send the hook to the bottom, and the result was that when the salmon went down for his meal he was fooled and I had him.

TURF AND TRACK.

Fixed Events.

Golden Gate Fair, to be held at Oakland, from September 4th to the 9th inclusive.
Butte District Fair at Chico, from September 5th to September 8th inclusive.
El Dorado District Fair at Placerville, from September 5th to September 8th inclusive.
California State Fair, Annual meeting at Sacramento, from Monday, September 11th to 16th inclusive.
The San Joaquin Valley Association Fair at Stockton, from September 19th to the 23d inclusive.
The San Mateo and Santa Clara County Agricultural Association Fair at San Jose, September 23th to the 30th inclusive.
Itumboldt and Mendocino District Fair at Rhonerville, September 19th to September 23d inclusive.
Modoc, Plumas and Lassen District Fair at Greenville, from October 2d to October 5th inclusive.
Monterey District Fair at Salinas City, from October 2d to October 6th inclusive.
Nevada State Fair at Reno, from Monday, October 2d to the 7th inclusive.
Mount Shasta Agricultural Association Fair at Yreka, October 4th, 5th, 6th and 7th.
Eastern Oregon Fine Stock Association at Union, from October 9th to the 11th inclusive.
Los Angeles Agricultural Association, at Los Angeles, from October 17th to 21st inclusive.

FAIRS AT THE EAST.

Minnesota State Fair at Farmington, August 31st to September 6th inclusive.
Iowa State Fair at Fairfield, September 1st to the 8th inclusive.
Minnesota Agricultural Association, at Minneapolis, September 4th to the 8th inclusive.
Nebraska State Fair, at Omaha, September 11th to the 16th inclusive.
Rhode Island State Fair, at Providence, September 12th to the 15th inclusive.
Pennsylvania State Fair, at Pittsburg, September 7th to the 21st inclusive.
Wisconsin State Fair, at Fond du Lac, September 11th to the 16th inclusive.
Ontario Provincial Fair, at Toronto, September 15th to the 23d inclusive.
Connecticut State Fair, at Meriden, September 15th to the 22d inclusive.
New Jersey State Fair, at Monroeville, September 15th to the 23d inclusive.
West Virginia Centennial Fair, at Clarksburg, September 19th to the 21st inclusive.
Indiana State Fair, at Indianapolis, September 25th to the 30th inclusive.
Western Michigan Fair, at Grand Rapids, September 25th to the 30th inclusive.
Texas State Fair, at Austin, October 17th to the 21st inclusive.

The Hartford Races.

The circuit meeting of Hartford, Conn., opened on Wednesday last at the Charter Oak Park, with the largest attendance known anywhere in the circuit. The weather was delightful and the track perfect. In the 2:28 class Gladiator was first, Eva second, May Thorne third, Topsey distanced. Time, 2:22½, 2:23½, 2:26. Of the 2:25 class, pacers, Fuller came in first, Warrior second, Mattie Bond third, with Limber Jack fourth and distanced. Time, 2:17½, 2:25½, 2:22, 2:27, 2:18. In the 2:23 class Aldine was first, Flora F. second, R. P. third, and Cora Belmont fourth. Time, 2:20, 2:20, 2:22.

On the 30th there was a notable increase in the attendance, among whom were W. H. Vanderbilt and party. In the 2:29 class, Overman won, Morse's Yellow Dock second, Rigolotte third, Independence fourth, Dave Young distanced. Time—2:21½, 2:23½, 2:23½. In the special race for \$3,000, Edwin Thorne won, Clingstone second. Time—2:17, 2:19½, 2:21½, 2:21. In the pacing race, open to all pacers, Buffalo Girl won, Gem second, Lucy third, Flora Belle fourth, Mattie Hunter distanced. Time—2:16, 2:19, 2:16, 2:16½, 2:17½. In the 2:21 class, Clem McG. won, Brandy Boy second, Adell Gould third, Forest fourth. Time—2:23½, 2:21½, 2:23½.

The Blanchard Purse.

On the 14th of this month will be decided the sensational trot of the season, the great purse of \$10,000 for the 2:17 class offered by D. H. Blanchard of Boston, the race to come off at Beacon Point, near that city. The conditions of the race were that the entries should be divided into four different payments of \$250 each, at stated periods, and that the non payment of any of the sums would amount to a forfeit and release the nominator from any further liability. There were thirteen entries, and all the number have paid up their quota, the proviso being that at the final installment, due on Aug. 31st, the horses must be named that represent the interests of each nominator. As may be supposed, the relative performances of all the first-class horses throughout the circuit have been eagerly scanned by those who are interested in this great event, and on the other side, the horses that have shown first-class speed are looking around to secure a nomination on the best procurable terms. The horses intended when the first payments were made have, in several cases, gone to the bad; but on the other hand, there are such flyers as Black Cloud, Jerome Eddy, Clemmie G., Rosa Wilkes, Mattie Graham, and half a dozen others that were not expected to be in the field, whose services may be available. It is said that the owner of Clemmie G. has been offered \$1,000 for the use of her for this race, and various other negotiations are in progress for other stars of the season. It is claimed that never in the annals of the turf has there been such a grand selection of trotters on a track together as will figure among the starters of the great Blanchard Purse.

H.

A Turf Scandal in England.

That eccentric sportsman Sir John Astley, who had that serious quarrel with Mr. Watson the plunger last fall at Newmarket, has come to the fore again, having laid charges against Lord Ellesmere before the Stewards of Goodwood that his horse Lowland Chief was pulled in his races at Newmarket and Ascot so that he might be favorably weighted in the handicaps at Goodwood, where this same horse carried off one of the principal events with long odds against his chances. No one for a moment entertains that Lord Ellesmere would allow any such practices, but the owners of horses are greatly in the hands of their trainers, and there is no doubt but that there are many dubious deeds committed that would lead to the withdrawal of the stable from their care, if honest and capable public trainers were not so scarce in England as they are in this country. On this much mooted point as to whether an owner or trainer has the right to start a horse in a race, which he is not intended to even try to win, that clever writer, Bendracon, in the London *Referee* makes the following remarks: "General opinion is to the effect that if the owner or the trainer is to be brought before the stewards every time a horse practically contradicts what he has done before either at the same meeting or at previous meetings, no owner or trainer will be safe from annoyance. To put the situation in its mildest form, if you do away with public airings, you are very likely at the same time to do away with public racing. Experts will be the first to understand that, in the event of such inquiries becoming the rule instead of the exception, an owner would often be annoyed by accusation when his horse was really amiss, or when it had not recovered from being amiss, than when it was doing a shunt, or when, having done a shunt, it was going for the pieces. If you call a man, no matter whether peer or commoner, before the stewards because his

horse wins though the betting is against him, surely you will have to call him before the stewards because his horse doesn't win though the betting is in his favor. It is only now and again that a carefully planned good thing has to be carried out with anything like barefacedness. A short-distance race and a young and impulsive trainer may bring about a difficulty. But, as a rule, the people equal to arranging a "moral" are anxious not to excite unpleasant observation. In a good many cases where it looks as if the horse had been roping, or is roping, appearances, and appearances only, are against the supposed sinner. Now and again, of course, we get a flagrant case. Either a horse is stopped, and everybody knows it, or, having been stopped at one place, he gets his head loose at another.

"This is where the difficulty is with judicial interference. A great deal more evidence than is obtainable is necessary to ensure a conviction, although the judges, the witnesses, and everybody else may be as certain as they are certain of their very existences that the accused parties are guilty. Often enough when an inquiry would otherwise be held, stewards, who are above all things men of the world, allow the undoubtedly nefarious transaction to slide without notice. More harm than good is done by commencing inquiry without being able to carry it out thoroughly.

"Let us argue this matter in whatever way we will, and let us go on as long as there is any room for argument, we are always brought back to the old and hackneyed statement, which is none the less true because it is both old and hackneyed, that racing resolves itself entirely into a question of winning or losing money. This being admitted, cup races have at once no reason for existence. No man in his senses would enter a horse in a cup race while he could do anything else with him. Let us suppose that Mr. Crawford or Mr. Grettou or Lord Stamford or the Duke of Westminster or Brown or Jones or Robinson or Smith, or anybody else the reader may choose to fix upon, possesses a youngster who is, according to the kindly feelings of his owner and trainer, a good half-stone better than an average Derby winner. This horse does not happen to have been entered in any of the "classic races," (that is the great two-year-old and three-year-old stakes) but the cups and one or two other weight-for-age events are open for him. Of course an owner who had nothing but the interests of the turf at heart, and who raced for glory and for glory only, would at once enter this paragon where he would have an opportunity of showing his undoubted merit. Somehow or other no owner or trainer has yet been found to do anything of the sort. The temptation to win a valuable handicap, and the large amount of money that is to be got by means of such handicap, is too great for one or other of them, and so it is only after this same youngster has for a time been made to appear of the most ordinary caliber, that we at last discover what are his real merits. Millionaires and men to whom money cannot be the least object have owned horses similar to the one I have imagined, but they all go the same way to work—the way of getting money. This goes to prove that the honest and honorable owner is often enough the weakest man in the stable—is often enough but an instrument in the hands of his trainer."

The Oregon State Fair.

From all accounts this annual fair will be a great success. It opens at Salem on September 18th and lasts throughout the week, and it is pleasant to note that the press and the public appear more than willing to aid the executive officers in their efforts to make this meeting a credit to the great State the progress and prosperity of which these fairs ought so well to represent. Mr. E. M. Waito, the Secretary of the Association, in a recent letter, remarks: "The time for holding the annual state fair is rapidly approaching, and I am making preparations for it with better spirit than for years past. Everything points to a grand financial success if the weather is favorable. The posters will be exhibited throughout Oregon, Washington Territory and Idaho in a few days. The exhibition of cattle, sheep and swine will be unusually good, especially the former, in Jerseys and Shorthorns, while the Pavilion exhibit promises to be equal to any former year. If all arrangements can be perfected as now desired by the executive committee, our receipts will be much larger in some departments than they have been for two years. Of course the public understand that the society offers no money this year for racing, but notwithstanding that, the best trials of speed ever seen at any fair will be witnessed this year. I look for a fine display of fruits, vegetables and farm products, and for a general exhibition of unusual interest and attraction."

THE GOODWOOD CUP FOR 1882.—The subject of the chief prize at the Goodwood meeting is the parting of Hotspur and Lady Percy, and the pair are represented as they might have stood at the moment when, to his wife's question: "What is it carries you away?" Percy answers: "Why, my horse, my love—my horse." He forms the center of a group, wearing his armor, with his gauntlets hanging at the hilt of his sword, the right hand held out towards the head of the roan. His lady is on his left, her head bent towards him, and she holds his little finger in both her hands, as if about to carry out her half-playful, half-shrewish threat:

In faith, I'll break thy little finger, Harry,
An if thou wilt not tell me all things true.

The group is in oxidized silver, and the detail is most elaborately wrought out in raised and chased work, the trappings and housings of the horse bearing the motto of the Percys, "Esperance en Dieu," and the cognizances of the house, while the armor of the noble youth and the costume of his lady have been minutely worked over. The group, from the bottom of the silver base to the top of the highest figure is about twenty inches in height, and when placed on the ebony stand the trophy will be nearly a yard high. On a silver plate in front of the ebonized block is the passage from Shakespeare's play (Henry IV., Part I., act 2, scene 3) which the group illustrates.

A FAMOUS MARE.—Ghidalia, the victress in the Grand Prize at Saratoga, where she beat Thora, Bend Or and other good horses, pulled up lame a few days after that race, and was found to be incapable of further training. She now retires to the paddock and next season will be mated to Sensation, and the progeny, if they take after their sire and dam, ought to hold the van on the American turf. Her reputation was second to none of her age. As a two-year-old she started four times, winning once, when she beat Carita, Luke Blackburn and four others. As a three-year-old she won five out of nine races, and ran a dead heat with Grenada for the Breckenridge Stakes at Baltimore. Owing to sickness, her four-year-old career was a failure, but as a five-year-old up to the date of her breaking down she had won eight out of eleven races. Ghidalia is by Bonnie Scotland from Walz, representing some of the very best English and American strains.

The Crack Two-year-old at the East.

Our opinion of Pizarro is greater than ever, as his performance in winning the August stake is one that few, if any, two-year-olds in our experience would have been capable of accomplishing. He was not intended to win, and was allowed to do so only because his stable companion could not. At that juncture he was last of all, and only 400 yards from the post. Straight as an arrow he shot through them and came up the stretch as strong as a lion. At the furlong pole he was at Jacobus' head. In a few strides further he was clear, and Feake pulled him up a winner in front of the stand. It was an extraordinary bit of racing, for, in addition to the speed needed to accomplish it, we should not forget that he was conceding weight to all of his competitors—2 lbs. to Jacobus, 5 lbs. to Magnate, and 7 lbs. to Heel-and-Toe. We regard the now-acknowledged superiority of Pizarro as a sort of vindication of our judgment, expressed in *The Spirit* when he made his first appearance at Sheepshead Bay in June. Then, and at each favorable opportunity afterward, we ventured the opinion that he would develop form of the highest class. We felt justified in doing so. Pizarro is the finest two-year-old we ever saw, unless Sensation be the exception. Moreover, we had met him at the dock when he arrived—a small, rough-coated little brute—from England, in company with the great Mortimer, and were amazed at the improvement eighteen months had made in him. Again, his ancestry was the most distinguished, and he formed a link between our early reading of English racing literature and the present, for he was bred by the widow of the late Rev. John King.

Mr. King was the rector of Ashley de la Laude in Lincolnshire, and raced over the *nom de course* of "Mr. Laude," though it is possible he is dearer to English hearts as "the sporting parson." He was born to wealth and an attachment to the turf, and, like the late Lord Glasgow and Sir Joseph Hawley, loved to breed almost exclusively from "his own blood." What "Maid of Masham," and "General Peel's dam" were to the eccentric old sailor Earl, Manganese and her daughter were to "the sporting parson." From this daughter of Birdcatcher came The Miner, Mandragora, Mineral, Thorsday, Minaret, In Memoriam and Milliner. The Miner defeated Blair Athol at York, and it only requires a cold winter's night, and a social party within, with pipe and decanter, to induce George Sutchiffe to break his reserve and tell how "the dark chestnut caught old Blair," and how "Johnny," on The Miner, "flapped his wings a little," and beat the Derby winner on the post. Mandragora produced Mandrake, one of the best distance horses of his day; Agility, who, as a five-year-old, won five Queen's Plates at distances of two miles, and beat Albert Victor for the York cup, and her sister, Apology, won the One Thousand, Oaks, St. Leger, and Ascot Gold Cup. Mineral was equally distinguished as a brood-mare, having foaled Wenlock, who won the St. Leger, and Kisber, who won the Derby. Wenlock has sired Quicklime, and was recently sold in England for \$19,330. Probably there is no instance afforded in history where the love for the blood-horse, for which Englishmen of all conditions are noted, exceeds that presented in the case of the late Mr. King. His family was one of the old-fashioned English, who saw no harm in breeding and racing their horses, but envious clergymen prompted Dr. Wordsworth, the Bishop of Lincoln, to offer the old vicar the alternative of choosing between the turf and his pastorage. The correspondence between the two forms the most lively reading, but with a beautiful consciousness of rectitude and an Anglo-Saxon inflexibility, which commands the warmest admiration, he regretfully but firmly refused. It was but shortly after this that he named a full sister to The Holy Friar, Hypocrisy. Mr. King became famous, the people sided with him against the Bishop, whose intrusion they regarded as unwarrantable. At this time Apology was at the flood-tide of her renown. The One Thousand Guineas, the Oaks and the St. Leger, fell to her, but when Royal Ascot came, the following year, with its spring flowers and fashions, and Apology reached the apex of racing glory, by succeeding West Australia, Gladiator and Blue Gown, as winner of the Gold Cup, the fatal escutcheon had hung over the door of the Lincolnshire home, and the old Vicar was at sleep with his fathers.

Pizarro, as we have stated time and again, is a brother in blood to Apology, they being by the same sire, and their dams were full sisters. They are somewhat the antipodes of each other. Apology was a dark chestnut like their grand-sire, Ratanplan. She was not above 15.2, and girthed 53 inches, with not the best shoulders, and drooping quarters. Pizarro is a rich bay, of great size and substance and quarters not unlike Sensation's in their length and rotundity. His combination of blood is exquisite, possessing as he does the double Birdcatcher cross on Touchstone, which has produced more good horses in England than any other. Mr. Pryor says he remembers Adventurer as an exceedingly handsome horse, and a better racer than he gets the credit of being, but has his doubts of Pizarro's stamina. It is notorious, however, that his relations, Agility, Apology, Wenlock, and Mandrake, were thorough stayers, and his pedigree is a handsome combination of staying blood, for in addition to those noted he has crosses of Beeswing, Partisan, Glencoe, and Tomboy, five of Waxy, and as many more of Orville.—"*Vigilant*" in the *N. Y. Spirit of the Times*.

On Unruly Scoring.

Mr. John Splan is reported as addressing the following winged words to Mr. C. J. Hamlin, of Buffalo: "There is nothing that so worries the people and the horses as all these long waits to get a lot of cranky horses off. There was never a time yet, so far as I can remember, that the horse making the most fuss about getting away did the best at the finish. I think it radically wrong to keep a field of well-ordered horses dodging backward and forward for forty or fifty times to suit some horse that hasn't any intention of doing work. I think the starter, after half a dozen scores at the utmost, should send the horses which are ready away, and let those which were up to funny business take their chances. Under such a rule well-ordered horses would not be fretted, and the public would be better pleased." This language scarcely possesses the well-known Splan style, and we suspect it of not being reported by a stenographer, but the fact that a representative driver advanced the idea is the important point. There is no more essential reform in the conduct of trotting races than the one indicated. It is positively monstrous that a bad actor or two should be allowed so frequently to waste the time and exhaust the patience of thousands of spectators, and the true remedy seems to be, in aggravated cases, for the judges to take the responsibility of giving the word, and letting the unruly ones take their chances. Mr. Splan might have gone farther, and said that he did not remember many cases where the horse that "made the most fuss about getting away" won any part of the purse, unless it had as few slices as there were trotters, and, therefore, no damage would result to the bad actor by being sent on a break or in the rear. It is worth considering whether it would not be well to invest the judges with ex-

PLICIT authority in this matter. They possess the power already, but a plain provision of the rules would support their exercise of it, and inform drivers what they might expect. It is fair to assume, if a reasonably good start cannot be effected in three trials, that some horse, or horses, are to blame, and the judges cannot be at a loss to note which ones are in fault. Give them then, in so many words, in the rules, the power to start the field in their discretion after the third trial, and their discriminating use of this power will very speedily abolish the nuisance of tedious scoring. And in advance of any change in the rules, we advise judges that they are already invested with this authority, and that its exercise will redound to their credit in every way.—*N. Y. Spirit of the Times*.

Santa Rosa Races.

On Wednesday, the 23rd of August, there was a better gathering at Santa Rosa and more interest shown in the races. The first was a trot for a purse of \$400 for district horses in which were Placeda, Huntress, St. Patrick, Lady Lane and Emma Taylor. St. Patrick was first choice in the pools, but although he held the first position, he relinquished it at the start to both Huntress and Placeda and between these two all the interest of the heat was centered. They trotted very evenly to the three quarter pole when Huntress had slightly the advantage but shortly after she broke, as did also Placeda, a feat that the latter repeated near the distance pole, but she was quickly caught and passed the wire in 2:45, half a length ahead of Huntress with St. Patrick a poor third. St. Patrick still was favorite at \$20 against Placeda selling almost even with him, while the field brought but \$6. In the second heat there was a good deal of running in which both Huntress and Placeda showed to the least advantage. Huntress took the lead and maintained it to the three quarters where St. Patrick drew up to her and carried her off her feet, as was also the case near the wire, but in both cases she was handily caught and won the heat in 2:41 by three lengths from St. Patrick, with Placeda third. It was certainly a strange betting race, as despite the fact that St. Patrick could not show the speed with which he was credited, he still led in the pools, selling for \$20 against \$12 for Placeda and \$6 for the field in which was Huntress, the winner. This heat was well contested by Huntress and St. Patrick, the other ones being badly scattered through a succession of bad breaks. Huntress took the lead, closely followed by St. Patrick, and thus they trotted until well in the homestretch, the mare being always able to hold her own, and St. Patrick making a very bad break, the mare jogged past the wire in 2:41½ with Placeda a poor third and Lady Lane and Emma Taylor distanced. Huntress was now made a great favorite and in the concluding heat she showed that she possessed that day, as although she left her feet badly at the start, on the back stretch she gradually reduced the gap and passed successively both Placeda and St. Patrick and won easily the heat and race in 2:44½, Placeda taking the second and St. Patrick the third money.

The second race was a match between the two pacers, Johnny Wiegles and Washington, for \$250 a side, with \$150 added by the association. Wiegles was the favorite at \$20 to \$10, but Washington took the first heat after a very pretty struggle, the two horses being lapped nearly the entire mile, and the close finish in 2:31½ aroused some degree of enthusiasm, Wiegles being beaten by only half a length. Those who had accepted the odds about Washington thought that with a horse in the stable they could hedge their bets to advantage but this was evidently looked on as a good thing by the talent, for they ran up the quotations to \$40 to \$10 on Wiegles' chances and the results showed that their confidence was not misplaced. In the second heat Wiegles at once assumed the lead and, Washington making a bad break, Wiegles jogged in at his leisure in 2:34. In the third heat Washington barely saved his distance and the final one was taken by Wiegles as he liked, the time of the two last heats being 2:25½ and 2:32½.

SUMMARIES.

Santa Rosa, August 23, 1882. Trotting Race. 250 Class—for horses owned in the district. Purse of \$500; first horse, \$240; second, \$120 and third \$40.

Mr. Drake names ch. m. Huntress.....	2	1	1
Mr. Whitney names b. m. Placeda.....	1	3	3
Mr. Sperry names St. Patrick.....	3	2	2
Mr. Lane names b. m. Lady Lane.....	5	4	dis.
Mr. Crandall names br. m. Emma Taylor.....	4	5	dis.

Time—2:45, 2:41, 2:41½, 2:44½.

Same day. Pacing match for \$250 a side with \$150 added by the association.

Walter Mead names dun g. Wiegles.....	2	1	1
H. A. Von Amburg names blk. s. Washington.....	1	2	2

Time—2:31½, 2:34, 2:25½, 2:32½.

Thursday's races attracted a much larger attendance than the two previous days; the weather was all that could be desired. The first race was the free for all three-year-olds owned in the district for a purse of \$300. The entries being Debby Mott, Lady Starr, Buck Foster, Ned and Warwick, while Magnet was drawn. After a little scoring they got a good send off, Ned at the pole. Ned led from the start and at the half mile had opened up a gap of several lengths between himself and the rest who were all in a bunch. As they drew into the home stretch Ned still held his advantage and the rest were trailing with Debby in advance; down the stretch Debby drew up on Ned and when he passed under the wire she was a good second, with Warwick third, Buck Foster fourth and Lady Starr last. Time 2:59. After this heat Ned who had all the time been the favorite in the pools sold for five to one against the rest in the field. The second heat was almost a repetition of the first, Ned having it all his own way, winning the heat in 2:50½, Debby second, Starr third, Warwick fourth and Buck Foster fifth. The third heat the colts received a good send off, Ned at once taking the lead, holding it to the end. Coming down the home stretch there was a sharp struggle between Debby and Buck Foster for second place, but Debby was too much for the colt and came in second, Buck third, Warwick fourth and Lady Starr fifth. Ned took first money, Debby second and Warwick third.

The next race, for the 2:25 class, was the great event of the meeting thus far, in which entered Starr King, Echora, Del Sur, Cairo and Director. Starr King was largely the favorite in the pools, although he had been defeated at Santa Cruz. After some scoring they got a fine send off, with Del Sur at the pole, Echora second, Starr King third, Director fourth and Cairo outside. The favorite at once took the lead, which he maintained until the horses were well down the home stretch, but closely followed by Del Sur and Echora, the others not far behind; when half way down the stretch Starr King went all to pieces and before Welby could get him together again both Del Sur and Echora had passed him, Del Sur coming out ahead, Echora second, Director fourth and Cairo behind; time 2:24½. Although this heat ended so disastrously for Starr King, he was still largely a favorite in pools, selling nearly three to one, but the end proved the fallacy of human hopes on horse racing, as Mr. Titus' gallant little mare Echora, although quite lame, took the race on the three following heats. The second heat was an exciting one, Echora taking the lead and never once being

headed, although Del Sur and Director crowded her very hard, while Starr King was acting badly all the time. Director was a dangerously close second, with Del Sur lapping him, Starr King fourth, Cairo behind. After this heat Echora became a favorite, selling about even against the other horses that were in the field. In this third heat Starr King acted badly again, and Echora and Del Sur had a fire-fight for the lead until entering the home stretch, when the brave little mare drew away; but at this time Starr King, who had gathered himself and settled to work, came up at a tremendous rate, passed Director and Del Sur, and was only a nose behind when Echora passed the wire in 2:25.

After this heat the hopes of Starr King's friends began to revive, particularly as Echora was quite lame, and they again made him favorite; but it was useless, for the little mare's gameness proved indomitable, and she took the heat and race in 2:29. The racing in this heat was between Director and Del Sur, who made a gallant struggle for second place, Director winning by a neck, Starr King fourth, and Cairo, as usual, bringing up the rear. And so ended one of the best races of the season, in which those who pride themselves on their talent of discovering the best horse were badly cinched.

SUMMARY.

Santa Rosa, August 24th. Trotting Race for all three-year-olds owned in the district. Purse, \$300, of which \$150 to the first, \$50 to the second, and \$30 to the third.

Time—2:24, 2:25, 2:25, 2:29.

On Friday the attendance was fair, and the only race on the programme was the trot free to all that never beat 2:40, for a purse of \$500. Valderlynn, Moscow, Marin and Freestone started, Valderlynn a long way the favorite in the pools. The first heat Moscow won in 2:32; Freestone a head behind, Valderlynn third, Marin last. Before the second heat Valderlynn was still the favorite, but Moscow won in 2:32, Valderlynn second and Marin third. Before the third heat Valderlynn was selling at \$20 to \$13. It was a rattling struggle between Moscow and Freestone, with Moscow visibly ahead. But the judges gave the heat to Freestone. Time 2:32; Valderlynn second, Moscow third (for running), and Marin last. Before the fourth heat there was much dissatisfaction at the decision of the third heat. Valderlynn was selling at \$20, Moscow at \$11. Valderlynn and Moscow came in close together. The judges gave the heat to Valderlynn, in 2:33, which caused more dissatisfaction. Moscow was second, Freestone third, and Marin last. Before the fifth heat Moscow was selling for twenty dollars to twenty dollars for the field and down to seventeen dollars. Valderlynn got the heat in 2:34; Marin second, Moscow third, Freestone last. In the sixth heat Marin was out of the race rules, Moscow took the heat in 2:32, and first money; Valderlynn second, and Freestone third.

SUMMARY.

Santa Rosa, Aug. 25th—Trotting. Purse of \$500 to the 2:40 class.

A. B. Cooper names ch. g. Frank Moscow	1	3	2	3
Pat Farrell names b. h. Valderlynn	3	2	1	1
M. Rollins names J. McCord's blk. Freestone	2	4	1	3
Steve Crandall names B. F. Miller's b. s. Marin	4	3	4	2
L. Titus' b. s. Exile, G. Bernards' gr. g. Allan Roy, and A. S. Bechtel's blk. g. Slim Jim, were also entered, but did not start.				

Time—2:32, 2:32, 2:32, 2:32, 2:34, 2:32.

On the final day of the meeting, the first race was a purse of five hundred dollars for the 2:30 class, in which were Poscora Hayward, Tuca, Albert W., Blackmore, Blanche and Nellie R. The two latter were withdrawn, much to the disappointment of the spectators, who were eager to see a well contested race with a large field of horses. Albert W. and Poscora sold even in the pools for twenty dollars, and the remainder in the field brought ten dollars. Tuca took the first heat evenly in 2:27 from Poscora, with Albert W. a poor third, nevertheless he was then made, first favorite at twenty dollars against twelve dollars for Poscora and ten dollars for the field. The grey this time went to the front but nearing the half Tuca was at his wheels and the two sulkies collided, without much damaging effect. Albert W. won in 2:27, after a good finish with Tuca down the home stretch. With the odds of 50 to 25 on his chances, Albert W. disappointed the hopes of his backers during this heat by his unruly behavior, and consequently Tuca beat him out in 2:27. Again there was a change in the betting in favor of the field, where Blackmore still figured but always coming in last. This time it was all through a close struggle that resulted in a dead heat between Albert W. and Poscora Hayward in 2:28. There was a great deal of scoring, much to the disgust of the spectators, and it took about a dozen trials before the horses could be brought up on even terms. Albert W. was again the favorite and after a pretty struggle with Poscora beat him out in 2:32, showing that the protracted struggle was telling upon the horses. Blackmore not having won a heat in five was sent to the stable, and Tuca showing signs of weariness, and Poscora scarcely possessing the speed of his adversary, Albert W. started with the odds of three to one on his chances and won cleverly from Poscora in 2:33, Tuca being a fair third. There was then a match race, half mile and repeat, between James Clark's Estell C and T. D. Hoskin's Texas Boy, that was easily won by the former in two straight heats with no time given.

SUMMARY.

Santa Rosa, Aug. 26th—Trotting Race.—Purse of \$500, for the 2:30 class.

A. Waldestein names b. s. Albert W.	3	1	2	0	1
J. A. Goldsmith names br. s. Inca	1	2	1	4	3
W. D. Hammond names g. s. Poscora Hayward	2	3	3	0	2
H. McConn names gr. g. Blackmore	4	4	3	3	2
William Bihler's b. m. Blanche, and J. and W. S. Fitch's ch. m. Nellie R. were entered, but did not start.					

Time—2:27, 2:27, 2:27, 2:29, 2:32.

This race brought the meeting to a close, and it is hoped that the financial results were satisfactory to the association. The Executive officers were indefatigable in their efforts to insure success, and now with all the improvements made and projected, the meeting of Santa Rosa will gain every year in usefulness and propriety. Following are the officers of the association; James P. Clark, President; Geo. P. Noonan, Treasurer; Charles Hoffer, Secretary. Board of Directors: James P. Clark, Robert Ross, James P. Noonan, Henry Baker, John S. Taylor, Wyman Murphy. We wish the Association every success.

A new paper from the Pacific Coast makes its appearance here, the San Francisco BREEDER AND SPORTSMAN, the first number of which was issued July 1st. It is well got up and printed, and although taking general notice of sporting matters, is devoted largely to breeding and trotting interests. The Toronto correspondent of the BREEDER is Mr. James Lang, who is well qualified to attend to its interests. — Toronto Mail.

Saratoga Races.

The race meeting at these fashionable springs closed on Saturday, the 26th August, after a season of some forty days, which is without a parallel in this country or Europe, barring always the Brighton Beach races on Coney Island, near New York, which are looked on in the majority of cases as contests for the money raised from the gate money, the pool and refreshment privileges. The season has been far from a success as regards the elevation of the turf, the management having had the poor sense to quarrel with the best patrons of the turf, that is, the prominent owners of horses who do not race entirely for money. There has been some strange in and out running during the season, but there have also been some half dozen days when the racing was of a sufficiently interesting character to draw a large and fashionable attendance. Such was the case on August 22d, when there were five good contests, two of which we take the following good description from "Kirk's" letter in the New York World:

A more perfect day for racing could scarcely have been had than to-day. The weather was bright and cool, with but little wind, and as the track was good and the number of starters not too large in any of the races to prove embarrassing either to the starter or to the spectators, the day will long be remembered by those present. It was also a day to be remembered both by those who lay and those who take the odds. In the first place all four of the favorites were beaten and the Mutuals paid on the first race \$53.30, on the third \$125 and on the fourth \$105.20—an average never before known since the introduction of the system into this country.

The racing began with a dash of three-quarters of a mile, for all ages, with the usual non-winning and beaten allowances, the entrance for which in the matter of horses specially fast for the distance have rarely been equalled. Four of the horses had each run during the present season over the same course in 1.15 viz: J. Abington's Disturbance, C. Reed's Bounce, E. Heffner's Little Phil and W. L. Cassidy's Saunterer. Another, the Dwyer Brothers' Bootjack, had won over the same course in 1.15, while of the others Morris & Patten's Followplay had won over the mile course in 1.41, and Fatinitza in 1.43. The other entries, Monarch and Sir Hugh, were known to be very fast, and as none was over-loaded in the matter of weight, admirers of fast time naturally expected to see the record nearly reached. The starters and weights carried were as follows: Bootjack, 114 pounds; Disturbance, Fatinitza and Little Phil, each 108 pounds; Followplay, Sir Hugh and Saunterer, each at 105 pounds, and Monarch at 91 pounds. Bounce, of whom many expected a good race, was scratched at 10:55 A. M. In the last of the pools sold Bootjack was the favorite, with Followplay a strong second choice. The horses appeared promptly at the post and they certainly presented a very handsome appearance, decorated, as all were, in the colors of their several stables. After several small skirmishes the flag was dropped to a good start to all except Saunterer, who, by some unaccountable mystery, was left at the post. The instant the flag was down McLaughlin showed a trifle in front, with Bootjack lapped by Followplay and Monarch and Disturbance, Little Phil close up in front of Sir Hugh and Fatinitza. The instant it was possible McLaughlin took Bootjack to the rails, and with Monarch second and Little Phil third they made it a driving race to the five-furlong post and thence to the half, which they passed as they swung into the main track each a neck apart, followed by Disturbance and Followplay together. When well into the main track both Bootjack and Monarch drew away from Little Phil, and as they reached the east turn Little Phil dropped back behind Followplay, who closed upon the leaders so quickly that at the 500-yard post Followplay was at Monarch's saddle skirts. He improved at every stride, as also did Monarch, so that as they turned into the homestretch Bootjack (lying in close to the rails) only lead by a head, while the others were as even as they could run. Half way between the three-quarter and seven-furlong posts both Monarch and Followplay got up even with Bootjack, which caused McLaughlin to bring his whip into play, an example which was followed by O'Leary on Monarch, and Frank McLaughlin on Little Phil. The three kept together to the pool stands, when, amid screaming applause, Monarch got his head in front and as Stone got Followplay up on the outside at the same time it looked still to be anybody's race, but the light-weighted Monarch could not be reached and from a head he increased his lead to half a length by which he won, with Bootjack second, a head in front of Followplay and Little Phil. A length away was Disturbance, with Fatinitza and Sir Hugh. Time, 1:14, which, although it heats all the previous three-quarter time over the course, only equals the record.

After the racing the judges held a meeting and investigated the failure of Saunterer to start with the other horses for the first race, and deeming that George Barbee, the rider, was solely to blame, they decided to suspend him for the remainder of the season. The decision is thought by many to be very harsh and entirely unprecedented.

The second race was the third renewal of the Relief Stakes, for three-year-olds, at a mile and five furlongs, the conditions of which were that colts should carry 110 pounds, geldings 107 pounds and fillies 105 pounds; that winners of any race the year the stake is run should carry 7 pounds extra, and that non-winners and maidens should be allowed 7 and 12 pounds. Under these conditions Green Morris won with Goldbug at 105 pounds in 1890, and Mr. Reed with Thora at 112 pounds last year. The starters to-day were Burnham's Charley B. and Young's Boatman, each at 114 pounds, and Bryson's Kite at 95 pounds. Boatman was a big favorite. Kite was the first away, followed by Charley B. and Boatman. For the first three furlongs the pace was very slow, but when Charley B. took the lead at the three-quarters, the pace became fairly fast. Charley led by a length at the seven furlongs and by a length and a half at the end of the five furlongs, with Kite and Boatman running head to head. There was but little change until they reached the turn to the backstretch, when, as Charley B. sailed away, Boatman followed, the two running down the backstretch two lengths apart and leaving Kite at every stride. As they made the east turn Boatman closed up to just about a length, which was the best he could do until they were well-nigh into the stretch. Under the whip Boatman got up with Charley and the two ran together to the pool-stands, at which point the race ended, for Charley B. came away from Boatman and won with considerable ease by two lengths; with Kite ten lengths behind Boatman. Time, 2:54. The last mile was run in 1:45. The time, as a whole, however, is somewhat slow compared with Bend Or's 2:49 last Saturday, while it is also three seconds slower than Thora beat Crickmore in last year.

As Boatman had beaten Charley B. for the Sequel and Kenner stakes and as Charley B. had defeated Boatman for the Travers Stakes there was some interest in this their fourth meeting, and as it resulted in Charley's success the question of superiority is more than ever unsettled, although Charley B. to-day in the hands of Jimmy McLaughlin certainly ran a

very good race. Unfortunately he is not in either the September Stakes at Sheepshead Bay or the Dixie at Baltimore, although he may prove a dangerous customer for the Breckenridge. As Boatman has none but western engagements, the two cannot meet unless they should come together in some race to which they are both eligible at Sheepshead Bay.

The following are the telegraphic dispatches giving an account of the last days' races:

On Thursday August 24th, in the first race, three-quarters of a mile, Lord Raglan won; Baron Faucrest second, Barnes, the favorite, third. Time—1:19. In the second race, 1 1/2 miles, Pinafore won; Farragut second, and Thorn third. Time—2:43. In the third race, one mile, Creosote won; Vera second, Gus. Matthews third. Time—1:46. In the fourth race, steeplechase, 2 1/2 miles, Post Guard won; Annette second, Rose third. Time—5:20.

On the 25th, in the first race, three-quarters of a mile, Jake White won; Patti second, Lutestring third. Time—1:14. In the second race, a mile and 500 yards, Followplay won; Tom Plunket, second, Fannie B. third. Time—2:43. In the third race, one mile, Jake White won; Valparaiso second, Malasine third. Time—1:43. In the fourth race, hurdle, one and a quarter miles, Revenge won; Charlemagne second, Glasgow third. Time—2:19.

On the 26th, in the first race, one mile, Monarch won. Wedding Day second, Farce third. Time, 1:44. In the second race, three miles, Lydia Stanhope won; Etta Warfield, second, Bushwacker third. Time, 5:25. In the third race, one and one-eighth miles, Patti won; Standoff second, Kennewick third. Time—1:57.

The Petaluma Fair.

In the center of a large and valuable farming district, that yearly increases in value and productiveness, Petaluma is one of the most flourishing towns in the vicinity of the coast, and the visitor cannot fail to admire the many improvements projected and carried out by its thriving and public-spirited citizens. The annual fair of the Sonoma and Marin District Agricultural Society has always proved to be very popular among the farmers who take a pride in their excellent stock and produce, and so recognizing the value of fostering these important branches of stock-raising and agriculture, this association resolved on purchasing a new track, and on furnishing it with all the grand stands, stalls and exhibition buildings required for fairs of ever increasing magnitude. The tract of land is admirably suited for the purpose, being situated within three-quarters of a mile from the center of the town, the only drawback being, that those who do not have their own carriages must walk a long distance from the entrance to the race track. The grounds are about seventy-five acres in extent, twenty-five of which are laid out with walks and drives, along which is planted trees in rows and groves, that when they attain their growth will make one of the prettiest driving parks in the state.

At the entrance, facing on the main street of East Petaluma, is the pavilion, a three-story wooden building, with a tower on each side of the entrance. The building is 100x158 feet, constructed with great care, with an eye to durability as well as architectural beauty. On the left as one enters the building are the offices, dressing-rooms for the ladies and meeting-room for the officers and directors. On the right is a spacious hall for exhibits, which is decorated with the national colors. In the center plays a beautiful fountain, overhung by singing birds and surrounded by ferns and flowering shrubs.

The track is well laid out, a full mile in length, with the first turn, as at Sacramento, a little too close to the starting point, especially when there is a large field of horses. It is built on good soil, and when properly cared for will be one of the fastest and safest in the State. There is an ample grand stand with a bar and restaurant and all the details have been carried out under careful and efficient supervision. The stalls and pens are in excellent order, but ample as the accommodations appear to be, they were found inadequate to the demand and while the races were in progress additional space was being prepared on every side. The land and improvements have cost upwards of \$40,000, and with judicious and liberal management, the Petaluma park will be the finest show place of its kind in the vicinity of San Francisco.

The Races.

The early train on Tuesday from this city took up a large deputation, and the town was filling fast with visitors from every quarter and shortly after dinner there was a lively display of vehicles on their way to the track. The weather was very agreeable, save that the wind was somewhat cool on the grand stand, and the ladies, preferring comfort to display, gathered in pretty groups in the topmost benches where they were quite shielded from the breeze. The attendance was excellent for a first day and promised auspiciously for the first fair held by the Association in their new pleasant and commodious grounds.

The first race on the programme was a purse of \$500, free for all runners, a half-mile and repeat, but as the association only offered two purses for the thoroughbred horses, it was not sufficient inducement for them to put in an appearance, much to the disappointment of those who have a fondness for this style of racing. As there was thus only a trot remaining on the card, there was a long delay in ringing the horses for the start; but there was not much complaint made on this subject, as the visitors were mostly strolling through the grounds, and marking the improvements made on every side.

The race was for the 2:50 class, and the entries were Placida, Huntress, Como, Emma Taylor, Roscoe, Lady Zane, St. Patrick, No Name and Little Jim, but only the first five in the above list entered an appearance on the track. On the previous evening, Como had been a good favorite in the pools, but just at the start he and Huntress sold about even at twenty against four for the remainder, and even at that small evaluation the three horses composing the field were rated far too high, as two of them were distanced before the race was over. At the fourth attempt they got away with Placida in the lead, she leading Huntress half a length at the quarter, but she broke shortly after, and thence the heat was between Huntress and Como, and the latter leaving his feet, Huntress jogged past the wire in 2:40, Emma Taylor and Roscoe being distanced. The betting now reared round, Huntress bringing \$25 against \$15 for the two others. Placida had the best of the start and as Huntress broke at the first turn, Como played so close attendance on the bay mare that she got off her feet in mid back stretch, and Como coming away won handily by a length from Huntress, who was never able to close up the gap made by her bad

break. The time was 2:39½. There was a good deal of scoring in the third heat and it was only at the sixth attempt that the horses were tapped off with Huntress slightly in the lead, the odds being \$20 on Como, against \$10 for the other two. This heat was admirably contested and the pace was so hot that both Huntress and Como left their feet two or three times, but in each instance although they lost ground, they were speedily brought to their gait by their skillful drivers. Up to the half mile Huntress had the advantage by some two lengths, but from that point he closed on the mare and when well in the home stretch he carried her off her feet, but she was speedily closing up the gap and it looked like a dead heat when again she flew in the air, a few yards from the wire, and Como won by a length in 2:33, with Placida just escaping the distance flag. It now looked such a certainty for the chestnut stallion that there was no betting. For the fourth heat the scoring was very tedious but at last on the eighth trial they got off and Huntress showed such a burst of speed that she took the pole somewhat too soon, and Placida trotting side by side with Como, his driver found himself in a pretty pocket, a pleasant position that was in a measure due to his lack of foresight at the start. Luckily Placida broke in the middle of the back stretch and drew out and alongside of the mare, but her speed was not to be gaisaid and she gradually opened out a gap and won in a jog in 2:39½. The betting in the first heat was \$20 on Huntress and Placida against \$15 for Como. Huntress again got slightly the best of the start and going at a merry clip she opened out a gap of two lengths at the quarter, but down the back stretch Como moved up and then broke, repeating the trick on the turn into the home stretch, but even when nearing the draw gate the race seemed undecided, as Huntress broke and ran twenty yards before she was brought to her feet, she finally beating Como but by a length. It was the general opinion that the most experienced driver won and not the best horse.

SUMMARIES.

And the following were drawn: H. G. Carrillo's b. m., Lady Zanne; S. Sperry's ch. g. St. Patrick; W. G. Atkins' b. h. no name and S. P. Taylor's b. g. Little Jim.
Time.—2:40½ 2:39½ 2:38 2:39½ 2:39.

Between the two final heats there came up a novel race for decision, it being a trial of skill and judgment to make the nearest time to three minutes for a sum of \$40, offered by a gentleman interested in the success of the Association. There were four entries, Roscoe, Rustic, Plough Boy and Lady Starr, and the contest was so close that even the best timer had to await the decision of the judge, who gave the purse to Rustic with 2:59, Roscoe being credited with 3:01. The affair created a great deal of amusement, and it might be a telling part in our programmes, if collision between the drivers and outsiders could be prevented during the time of the heat, but this is almost an impossibility.

The first race on the second day was a purse of \$700 for the 2:25 class, in which were entered Starr King, selling for \$25, Sweetness for \$20, Crown Point \$15, and Cairo, \$2. The track was in excellent condition, and there was every promise of a close contest and of fast time, save by some it was claimed that Starr King was a trifle lame, while Crown Point appeared to be somewhat overtrained. After a few false starts, the horses got off on fair terms; but at the first turn Starr King was not on his good behavior, making a disastrous break and falling far into the rear, while Sweetness reached the half-mile in 1:14, with Crown Point in attendance. The position was unchanged until the three-quarter pole was reached, when Starr King was seen coming at a rapid gait, passing both Cairo and Crown Point, but he could not overtake Sweetness, who won easily by a length, in 2:27½. There was a good deal of scoring for a favorable position in the next heat, and it was only at the eighth attempt that they got the word, Starr King contenting himself with a quiet send-off when in the rear, but in trying to improve his place he broke at about the same spot as in the previous heat, and Crown Point following suit, it was left to Cairo to join conclusions with the favorite, she reaching the half mile first in one 1:13. Along the upper turn it was apparent that Sweetness could outfoot Cairo, and would surely take the heat, when Starr King was seen coming up with a fine turn of speed and at the head of the stretch he was in the second position but he could not overtake the bay mare who finished an easy heat in 2:25½, the others occupying the same relative position as in the previous mile.

As may be supposed, there were great efforts made by those who had pinned their faith on Starr King to retrieve their losses, but no one could be induced to go against the mare's chances, and betting as to the result was at an end. There was again a great deal of jockeying for a position, which appears in the eyes of the drivers to be absolutely necessary in the 2:25 class, all through the circuit, but when they come to Oakland, Sacramento and Stockton, those parties who pride themselves on their "cuteness" may find themselves "left," under a more rigid interpretation of the rules. There were fully a dozen false starts, before the drivers would deign to come up together, but at last they were well in line, and shortly after the bell was tapped the race was at an end, as all three of the horses broke in succession around the first turn, leaving the mare to show her speed to the half mile in 1:14½, when Starr King was seen once more coming up for a close brush, that for a moment revived the hopes of his backers; but this day "the mare was the better horse," and, with plenty of speed left in her, she won the heat and race in 2:24½, without a skip all through, Cairo being distanced.

The second race was for a purse of \$350, given for three-year-olds owned in the district. There were six nominations, of which but three came to the start. Ned, a son of Overland, was a prominent favorite in the few pools that were sold of two to one for the other two, Sister and Deby Mott, odds that there were no ways equal to his advantage in speed and endurance, by which he was an easy and unexciting winner in straight heats.

SUMMARIES.

Time.—2:25, 2:47½, 2:48½.

The first of the three events on the programme for the second day was the trotting dash of a mile by yearlings in harness and to run for a purse of \$150, for which there were the following entries: I. C. Reardon's Blue Gown, by Gus, dam by Geo. M. Patchen. Whitney's ch. c. Dawn, by Nutwood, dam Countess. Wm. Bourke's g. c. Dublin, by Admi-

ral, dam by Bell Alta. John Pfau's b. c. Young Eureka, by Eureka, dam Fairbank's mare. P. J. Shafter's g. c. Viking, by Rustic, dam by Lawyer's Stockbridge Chief. Bihler's b. c. No Name, by GenDana, dam by John Nelson. F. Needham's b. c. Conemara, by Volunteer, dam by Speculation. Dawn, Blue Gown, Viking and Conemara the starters. Long before the hour of starting the grand stand and every available space for viewing the race was completely packed with anxious and excited men, women and children to see the babies trot. So far no race of the week has created such interest, and from the reliable and interesting character of these juvenile contests, it is now becoming quite apparent that they, in the future, are destined to become the leading feature in sporting circles. When the excitement first began over this race, rumor had it that the chief contest lay between the Volunteer and Gus colts, but when the pool test was applied the dark one soon came to light, and in spite of the efforts of owner and driver of Dawn he was booked the favorite over all the rest at long odds. That his owner was confident of success, is evident from the fact of his having given the driver of Dawn unlimited credit in the box on that race, a circumstance well calculated to establish a favorite at any time in the absence of any known merit in the animal so backed.

Although it might be expected that such youngsters would be difficult to manage in a race it was agreeably surprising to see how exemplary their performance proved, even for some of the oldest quadrupeds in the business. In the third effort they were sent off on an even start, all going steadily, but Dawn, who broke badly and fell off thirty yards but at the first quarter he had regained his place and led by four open lengths in 51 seconds. When the half was reached he had gained to an open gap of 50 yards in 1:38, followed in long and open order by Blue Gown, Viking and Conemara. These positions were but little changed, except by Viking, who made a close contest with Blue Gown for second place, at the finish, which, after a break in the homestretch was first reached by Dawn, fully 30 yards in the lead. Conemara being far behind the draw gate. Time, 3:08½.

The 2:40 class for a purse of five hundred dollars was the next race called. For this there came the following closely matched contestants, who made the race a hot one from beginning to end: Rowdy Boy, Vanderlynn, Marin, Johnny, Frank Moscow. In the pools, Vanderlynn was a rising favorite from the beginning to the finishing of the first two heats, which he won seemingly at ease, in 2:31½ and 2:32½; Moscow and Rowdy Boy alternately claiming the lead throughout the first part of each heat, both succumbing to Vanderlynn at the finish. At the close of the second heat Johnny made a fine brush and got second place, although after a hard struggle between all but Vanderlynn for the third heat, which was won by Rowdy Boy in 2:31½, Vanderlynn was still a strong favorite at 20 dollars against all the rest at 8. In the fourth heat Johnny again became troublesome, and despite the skill of contending artists, and speed of the other horses, he made a handsome finish, working his way through all adversities from the head of the stretch home, and winning the fastest heat of the race in 2:30½. Up to this time each half mile was made as reported by timers, in 1:18 or the fraction thereof, and at no time did Johnny lead at that point, hence he must be accredited with some of the best qualities of a moneyed horse. The betting was now much duller on Vanderlynn, as he had power to be unsteady, and a looser when breaking, though his friends and backers still thought he would pull through on his speed, consequently they were badly caught in the fifth heat in which he was shut out for running to save his distance, while Johnny scored another beautiful heat in 2:34, Rowdy Boy again being a very close second, Moscow third, Marin fourth, Vanderlynn being distanced. Moscow and Marin having gone to the stable, under the rules, for not winning a heat in five, the contest was left to the frolicsome Boy and Johnny. The latter being the favorite at varying odds caused some speculation among the betters who were principally losers on Vanderlynn. The sixth heat was a close and well contested trot from the go to the finish; Johnny's driver and owner, being evidently a little excited, let him stagger and lose the heat, when within twenty yards of the wire; Goldsmith seeing this quickly seized the only chance for the heat, by virtually becoming a part of his horse, and with a most beautiful effort helped him over the score, a winner of the heat by an open length in 2:35½. The betting now changed again in favor of Rowdy Boy, and once more the boys from the Bay had a double bank. The seventh heat was much like the sixth, except in the closeness of the finish, this time Rowdy Boy broke when a foot in the lead and within no more than ten feet of the score, and for which the heat race and money were given to the son of Auctioneer.

SUMMARY.
PETALUMA, Aug. 31st.—Purse of \$500 for the 2:40 class.
W. Bourke enters b. h. Johnny.....3 2 4 1 1 2 1
James Garland enters gr. g. Rowdy Boy.....4 1 2 2 1 2
A. B. Cooner enters c. g. Frank Moscow.....2 3 2 3 3 0
B. F. Miller enters b. s. Marin.....5 5 3 4 4 0
Pat. Farrell enters b. h. Vanderlynn.....1 1 5 5 dist
J. Mackey enters b. s. Exile.....Withdrawn
Time.—2:31½, 2:32½, 2:31½, 2:30½, 2:34, 2:35½, 2:35.

The day's sport wound up with a running race, heats of half a mile for a purse of 300 dollars, in which Haddington was a great favorite at 20 dollars against 10 dols. for Estella C. The latter took the first heat, and Haddington the two next, winning the race. Time, 49½, 51 and 50½ secs.

Entries of Stock.
S. S. Drake, graded stallion four years old or over, Admiral; stallion two years old, Argenta; colt; mare four years old or over, Eve; mare three years old, Elaida; five colts.
I. F. Cook, draft stallion three years old, Prince.
Sylvester Scott, Cloverdale, thoroughbred Durham bull four years old or over, Mazourka's Royal Oxford; yearling, Royal Oxford; two years old Loujou; calf, Wily Oxford; cows four years old or over, Alice Gray; three years old, Sadie Maynard; calf, Maynard's Gem; jack, Monarch; jennet, Fanny.

F. W. Loeder, roadster stallion and six colts; Whippleton and six colts; graded yearling mare; single buggy horse.
J. Gallagher, draft stallion two years old, Robert Emmet.
J. Phillipini, draft stallion three years old, Rollin.
Fred Kuhnle, graded stallion two years old, Billy Wilson; yearling stallion, Black Prince; mare four years old or over, Mollie K.; yearling mare, Lotta Wilson; mare colt, Reni.
Francis De Long, thoroughbred Jessie, cow 4 years old or over, Fashion; graded bull calf Washington.
A. C. Shelton, Berkshire boar.
Horse Breeders' Association, draft stallion and six colts; horse of all work and six colts, Crown Prince and six colts.
Thos. Skillman, draft stallion, 4 years old or over, Toruado; draft mare 1 year old, Gertrude; horse of all work, 2 years old, Monarch.
S. Gilmore, draft stallion, 2 years old, Pollack II; draft colt, Pride of the West; draft mare, 4 years old or over, Queen.

J. Conway, saddle horse, Boney Boy.
A. J. Pierce, horse of all work, mare 4 years old or over, Mollie; colt; Flora; roadster stallion 4 years old or over; Hawlet, and six colts; roadster mare 3 years old, Nellie.

G. Pacheco, thoroughbred mare 4 years old or over, Cartie C; yearling mare.

L. W. Walker, two Cotswold rams.
Willis Faught, horses of all work, mare 2 years old, Peggy; mare 4 years old or over, Dolly; stallion colt, Billy; roadster stallion and family, Little Mac and six colts.

J. P. Rodehaver, draft stallion 4 years old or over, Time o' Day; horse of all work, 4 years old or over, La Fayette.

P. Hennelly, horse of all work, 3 years old, Petaluma Prince.

Wm. Bihler, roadsters, Grey McClellan and family; stallion, 3 years old, Buck Foster; yearling stallion John; mare 4 years old or over, Blanche; mare 3 years old, Mary Wallace; 2 years old, Sally; draft mare 4 years old or over, Doll; draft horse colt Ned; thoroughbred mare 4 years old or over, Jeannette.
Devon cow 4 years old or over, Young Curly.

J. Davener, draft stallion 3 years old, Cognac; mare colt; mare 4 years old or over.

John King, graded horse colt, Norman Star.

I. R. Jewell, draft stallion 3 years old, Rolla; graded bull 4 years old or over, Duke.

Pat Carroll, thoroughbred mare, 2 years old, Alice; saddle horse, Black Jack.

Poultry.

W. D. Freeman enters pair buff Cochins, pair brown Leghorns, pair Guinea fowls, pair Rumples, pair Toulouse geese, pair white China geese.

J. K. Fix, pair Muscovy ducks.

C. S. Gibson, pair Bremen geese.

E. C. Newton, pair brown Leghorns, pair buff Cochins, pair Plymouth Rocks.

Mrs. Wm. Hill, pair buff Cochins.

Morris Bros., pair light Brahmas, pair dark Brahmas, pair Partridge Cochins, pair black Cochins, pair white Cochins, pair Plymouth Rocks, pair white Leghorns, pair brown Leghorns, pair white faced black Spanish, gold spangled Polish, black and white Crested Polish, silver spangled Polish, black Hamburgs, Houdans, black breasted game, seabright Bantams, bronze turkeys, wild turkeys, Toulouse geese, Bremen geese, Guinea fowls, peacocks.

Mrs. A. H. Patty, pair Bantams.

G. F. Ward, pair gray China geese, pair brown Leghorns.

Pavilion Items.

The Morris Bros. deserve praise for the interest they take in improving their orchards and vineyards. On their table were found thirty-five varieties of grapes, besides oranges, walnuts, persimmons, figs and almonds, all of which were raised on their farm in Sonoma county. They also exhibit at the chicken coop twenty-five varieties of fancy fowl.

Mrs. T. T. Ennis' special exhibit was plums, of which she has fourteen different kinds. An inspection of her tables prove there is no finer plum growing country than the vicinity of Petaluma.

Bush & Co. of San Francisco, had on exhibition Bailey's "California Chief" Grain Cleaner. The operation of this machine excited the admiration of all who take any interest in agricultural implements.

Standing close to the end of the pavilion was J. W. Cassidy's fruit drier. The superiority of this drier to many others is, that a drawer may be moved without any loss of heat, and in removing no other drawer need be disturbed.

L. A. Hardin, of Vallejo township, exhibited several sheaves of Egyptian and Smith wheat, whose plump, well-filled heads guarantee it to be a good flour grain.

Mr. Geo. Wagner manipulated the working of a miniature gate. This is a very ingenious piece of mechanism, and is opened or shut by the simple pulling of a cord. It ought to work as well on a large scale as it does before the sightseers at the fair.

Wm. Zartman & Co., of Petaluma, had several neat, durable-looking carriages and wagons on exhibition.

D. W. C. Putnam had four breaking carts, of his own design and manufacture, which excited favorable comments from the criticising public. Mr. D. R. McLennan also exhibited two good breaking carts.

The sixteen Southdown sheep of C. H. Crane's are as fine-looking lot of mutton stock as one could wish to see. These animals, when full grown, weigh about 250 pounds. Mr. Crane has also one Poland-China boar, one year old, that weighs about three hundred pounds, and a fine breeding sow with four pretty pigs.

Mr. L. W. Walker, of Petaluma, exhibited two Cotswold rams, two years old, that weigh about two hundred and thirty pounds each. They are covered with coats of very fine soft wool, and though they are a mutton sheep, their fleece is very much admired.

E. W. Woolsey & Son had a band of thirty-five thoroughbred merino sheep. The fleece on these sheep is unequalled by any on the ground. One large ram, claimed to be the best of his kind in the State, took the premium at the State fair in 1880, as the most promising lamb.

From the first day the numbers that attended the Fair increased until the Pavilion would hardly hold the throng. A perfect stream of people poured through the gateway into the exhibition hall and out on the track. Though the races attracted great numbers still they were hardly missed from the other parts of the grounds.

The last article entered at the Pavilion was A. La Jeunesse's Automatic Harrow. It is so constructed that by working a lever the teeth can be set at any desired depth; or if choked up with grass or clods the same lever frees it from the rubbish and transforms it into a sled by lowering the runners that gauge the depth of the tooth.

D. M. Osborne & Co., of San Francisco, run a self-binding reaper by means of a stationary engine placed on the outside of the building, also an independent mower and a combined reaper and mower.

U. Warnekrons displayed a general assortment of hunters' and sportsmen's goods.

The stand that attracted the most interest was that of J. L. Dias' "Petaluma Incubators" which hatched out chickens daily in open view of the visitors. Nine hundred chickens will be brought to light by the last day of the Fair. Everyone who is a judge says that this is the best incubator ever invented. The mother and brooder that goes with his machine took the highest honors at the Sonoma and Marin Fair in 1881.

The success of the fair up to Thursday was beyond the most sanguine expectations, the receipts amounting to 3,788 dollars, 50cts., in the following order: Monday, 323 dollars; Tuesday, 1,017 dollars; Wednesday, 1,018, 50 dols.; Thursday, 1,430 dols. The grand parade of stock was to be held on Friday, but on Wednesday there was a preliminary parade, when the animals took up the entire track. It was a display that has never been equalled in the two counties, and all through the week the commodious pens and stalls have been crowded with visitors, comparing notes on the merits of the stock. On Friday the premiums were awarded to-day the prizes will be distributed, of which the fullest details will be given in our next issue. We hope the association will realize the truth of the old adage: "Nothing succeeds like success."

Gun-Club Shooting at Bird's Point.

On Saturday last the Gun Club held their last shoot of the season, fourteen members answering to the call. The days was very fine, and just wind enough to favor the birds, which were a very good lot, and the second barrel was often required to bring them to grass. The match was at twelve single birds, five ground traps, thirty yards rise, use of both barrels, and 100 yards boundary. The shooting of several members of the club was very good, Mr. Tom Ewing, the winner of the medal, killing all, but the last one was so unaccommodating as to fall just outside the bounds. Mr. H. Black lost his eighth bird, but killed all the rest, and in the shoot with Mr. Ewing, at four single birds, he lost one, Mr. Ewing making a clean score, and taking the medal, with the wishes of every member of the club. After the main shoot there was a freeze-out, divided between Mr. Golcher and Babcock, each killing ten straight birds.

A CLAY PIGEON MATCH.—On Saturday the members of the Alameda Sportsmen's Club held the first of a series of four matches. The trophy to be shot for was a handsome gold medal presented by Mr. F. E. Eastman and the conditions were fifteen pigeons at eighteen yards rise. Of the dozen contestants Mr. Crellin was the last but not least as he won with a score of thirteen as shown by the following table

Reeton.....	1	1	1	0	0	1	1	0	1	0	1	1	0	—	9
Benner.....	1	1	0	0	1	1	1	0	1	1	1	0	0	—	8

Vauhn.....	0	1	1	0	1	1	1	1	0	1	1	1	1	—	12
Crellin.....	1	1	1	1	1	1	1	0	0	1	1	1	1	—	13

Mr. Crellin was warmly congratulated on his adding another to the many emblems of success that are already in his possession.

Trifling with a She Bear.

C. and W. Masters, of Polk County, Or., while hunting on the headwaters of the Santiam last week, captured two bear cubs. While on their way to the camp with their prizes, the mother of the cubs suddenly attacked them and with one blow of her paw knocked Charles out of time, sending his gun out of reach and freeing one cub. She then turned upon William, who discharged his Winchester rifle, inflicting a flesh wound in her shoulder. She threw him down, releasing the other cub, and dragged him 50 yards down a ravine. Charles had recovered his gun, but was afraid to shoot for fear of killing his brother. The bear finally gave William a blow on the head, tearing his scalp fearfully, and then made off after her cubs. Charles succeeded in getting his brother to camp and dressed his wounds as well as possible, but it was two days before they were able to start for home. Charles received scratches of so severe a nature that they were yet unhealed at the expiration of five days, and his brother was confined to his bed for two weeks. Bear hunting is all very well, but when the bear turns hunter there is not much fun in it.

It is stated that jackrabbits, which were recently so abundant in the vicinity of Bakersfield that an ordinary sportsman might easily kill a hundred before breakfast, have nearly all disappeared, and that the late extremely hot weather has killed them.

Fifty dollars has been offered for the scalp of a very large and very bad grizzly bear, said to weigh 1800 pounds, that has been troubling stock men on Bailey Creek, Shasta county, killing many cattle and driving the herds from their pastures.

The Forester Club of Sacramento have issued their programme of the trap shooting tournament at the Agricultural Park during the State Fair. The shooting will commence on Tuesday, Sept. 12th, the first, or main match, being at twelve birds each, \$10 entrance, under the rules of the club. The entrance money will be divided into ten prizes. Following the main match there will be shooting for several days at pigeons, bats, balls, etc.

The Prince of Wales won three first prizes at the Norfolk cattle show—one for a Short-horn bull and two Southdown sheep. A case of farming by proxy.

Dr. Ellis, of Russell county, Kansas, offers to pay ten cents per head for sheep pastured upon his fields. He knows the sheep's foot is golden.

Subscriptions to the Laverack monument fund have already reached \$100, with several counties yet to be heard from.

THE PADDOCK.

Breeding Coach Horses.

As will be seen from the letter of "Broad Arrow" and the following article, copied from the *Sunday Oregonian*, the remarks about breeding coach horses which appeared in a late number of this paper have attracted attention. It is one of the most important questions in relation to horse breeding, and well worthy of being made the topic for the fullest discussion. The views of our correspondent are sound, through we re of the opinion that the great consideration is how to increase the size, and how to preserve the desired characteristics. The Clydesdale was mentioned as having proved a successful admixture in giving the required stature, and the preponderance of thoroughbred blood, adding the quality. There are families which are, perhaps, better than Clydesdales, and, in fact, we frequently see mares at work in the heavy teams of the city, far nearer the desired type than any of the draft breeds. That an augmentation of size can be obtained from the coupling of medium thoroughbred sizes with the ordinary mares of the country, and by liberal feeding of the offspring, is certain, and that in two or three generations the increase will surprise those who have not witnessed the effects of well-directed care.

In the article from the *Oregonian*, the writer makes a great mistake in classing Abbotsford and Stienway as below 15½ hands and less than a thousand pounds in weight. Stienway is a big horse and will come very nearly to the standard for the coach horse, and not one of them that is not above the height mentioned. Mr. Finigan has a yearling by Santa Claus, which is nearly 15½ hands, and all the Abbotsfords we have seen are larger than the ordinary run of colts of their age. Very many of the descendants of Belmont, in the second and third generation, are larger horses, though the patriarch of the family was of medium size, and the Owen Dales are invariably of powerful frames and great substance. That Oregon has taken a prominent place in the breeding of fine horses cannot be questioned, though we think the credit is due to an intelligent system of breeding rather than the possession of a superior climate and soil to California. And yet the reasons given may have some force and a longer season of green food desirable:

THE BREEDER AND SPORTSMAN, edited by Joseph Cairn Simpson probably the ripest scholar in horse lore now connected with the American press, says in the course of a leading article upon coach horses that "Oregon, so far as our observation has gone, has taken the lead of California in this class of horses, as well as in the better class of draft horses." Now the talented author of "Horse Portraiture" was never in Oregon in his life, but he judges from the horses shipped hence for sale in the California markets, and his judgment is eminently correct. Graceful as is his concession, we cannot believe it was done wholly from the desire to show himself a man of greater liberality of opinion than usually falls to the lot of most writers. There must have been some good ground for so positive a declaration, or the writer quoted above would never have made it. He is an observing man and is never hasty in expressing his opinions. We have long been of the belief that breeders cannot afford to breed for the race track alone, whether they keep running or trotting stallions for hire. Men of seant means who own good mares, must have something else to look forward to beyond the peradventure of getting a racehorse or a crack trotter. The old thoroughbred horse Owen Dale, which died in San Jose nearly twenty years ago, was a "poor man's horse," in this respect. But three of his get were ever trained to run and all got a better record than 1:47 for a mile. Yet it was not in this respect alone that this great horse, with his fine size and incomparable good temper, showed how valuable a piece of taxable property he was to the now wealthy county of Santa Clara, the garden of the Golden state. It was in the graded stock, bred from ordinary mares owned by men of moderate means. They comprised roadsters, carriage horses and workhorses, scattered all over that beautiful valley and adding to its material wealth. Just how the values originate on property of this sort, we are not prepared to say, but you will agree with us that any man will want a big price for an animal which he cannot readily replace. So it was with these great lengthy Owen Dale colts of which the noted Copperhead was such an example. He could trot in 2:38 with two men in a roadwagon, and could not get below 2:36 with one man in a sulky. It was therefore evident that ability to pull weight, rather than speed itself, was the prominent characteristic of Copperhead, who was big enough to pull logs to a saw-mill. Take it within the past few years, and you will see that this important consideration has been overlooked somewhat in Oregon, but to a far greater extent in California. To be of any service on a farm, a horse ought to be at least fifteen and a half hands high and weigh about one thousand pounds. How many of the great trotting sires of California will come up to this standard of excellence? Santa Claus (2:17½), Steinway (2:23 at four years old), Echo (2:35), and Abbotsford (2:21), all fall far below it, while Nutwood, Alexander and Brigadier were the only ones that went over it. In searching for speed they have forgotten that the true place for the trotting horse was on the road instead of the race track.

And now if the reader will pardon the digression of the past few minutes we will go back to the discussion of coach-horses in general. The coach-horse must trot; a gallop will not do. The trotting blood of some standard-bred sire must be the foundation on one side, which it does not matter; though we prefer it through the sire. Shape and quality become naturally the next consideration and should be derived through the dam rather than the sire. Now we suppose that a man has a mare sired by some running horse like Monte Christo or Osceola, with no further authenticated blood on the dam's side; which would pay him best to breed the mare to another running horse or some good reliable trotting sire? It does not admit of a moment's hesitation, and he would breed to the trotter every time because trotting-bred horses are the most useful and therefore the most saleable. Our own belief is that the coach horse of the future must have an infusion of thoroughbred blood on one side of the house, because the thoroughbred horse has a longer neck, a more shapely head and generally speaking a finer coat of hair, but the trotting blood is indispensable and therefore it must be there, on one side or the other. For reasons already given, we prefer it through the paternal line. Hugh Fields, of Umatilla, is a man well situated to commence the breeding

of fine carriage-horses, as he has been breeding from thoroughbred sires for nearly twenty years and must therefore have some very high-formed mares. He should now get a standard bred trotting sire and breed for the coach, not overlooking the stout blood of Mambrino Chief, which has the ability to pull weight. At four year old Ericsson, Mambrino Chief's son, trotted a fourth heat in 2:30 to wagon, on six weeks' work and trained by an amateur. We don't believe Maud S. was any better horse, but we do think that taining is progressive and that the lowering of the trotting record in twenty years from 2:19½ to 2:10½ is the result of education based on study and experience. Hiram Woodruff was the greatest driver and trainer of his day. He paid \$2000 for the pacer James K. Polk to convert him into a trotter and could not get him below 2:40. Now every farmer's boy from Maine to Oregon can put toe-weights on a pacer and make him trot, while dear old Hiram never once thought of it.

Oregon will always breed good horses for the coach, if men will only take proper care of their colts from weaning time to maturity. The day has gone by when a man can lie in his dirty blankets and hope to get rich by the mere spontaneous increase of dumb beasts. But for the active and studious breeder, the man who will develop and educate his horses up to a real value, there will be dollars in ten years hence where there are coppers to-day. Oregon can never hope to rival California in the development of early trotters, because the training season is so short that that a California three-year old is as thoroughly gaited as an Oregon horse of five. But for horses of ten or twelve years of age, the golden state will not surpass us much. Oregon has eight months of grass to California's five, and it is the silica in grass that makes the bone. Flesh and muscle do not give a horse stamina and endurance. He must have the bone to enable him to stand the hard work. We believe that the work horses grown in eastern Oregon have more bone than those produced in the Willamette valley, because there is more silica in the bunch grass than in the native grasses of this valley. And whenever the right men undertake their production, Oregon coach-horses will be in demand in San Francisco and at heavy prices.

Last week W. C. Moyan, living near Albany, Oregon, lost a horse, the fifth since Christmas. Desiring to know what ailed the horse, he, assisted by others, made a post-mortem examination. They were somewhat surprised to find in the stomach enough binding wire to fill one of the hands. They were the small pieces twisted together and clipped off on thrashing, and rolled together had worked themselves through the mucous membrane of the stomach in several places, of course causing death.

FISH.

FINED FOR CATCHING SALMON.—Last week an Italian fisherman was arrested by several men engaged in the same business for violating the State fish law, he having been guilty of catching salmon since August last when the close season commenced. He with others had caught and shipped ten barrels of salmon, weigh in the absence of a market in the canneries, were salted and packed for shipment. The offense was committed just below Courtland, and the case came up for trial before Justice Thomas Hodgdon, of Washington, Yolo county. I. S. Brown conducted the prosecution and L. S. Taylor was the defendant's attorney. The defendant was convicted and fined \$50 and paid that sum. Mr. Brown then had half a dozen of the fishermen about Courtland appointed Deputy Constables so that they can have the power to arrest, and it is understood that anyone found violating the law will be punished to the utmost extent. The largest fine that can be imposed is \$500, and imprisonment is also allowable. It is said the fishermen generally are desirous of having the law enforced.—*The Bee*.

A SCREW LOOSE SOMEWHERE.—It will be very hard to make people obey fish and game laws when such things as occurred in Police court No. 2 in this city this week happen. A fish dealer was tried for having in his possession salmon out of season. The guilty man confessed, the Judge properly instructed the jury, and the jury brought in a verdict of "not guilty!" We knew that it was considered impossible to punish the law-breakers in the counties bordering on the river where salmon are caught, but it seemed possible that San Francisco juries would convict when the guilt was proven. There is a screw loose somewhere.

Jacob Vetter, while fishing at Prince's Bay, New York, one day last week hooked a turtle that weighed 126 pounds.

Fishing on the Bear River in Calaveras county is not good. Either the fish are seeking new haunts, or they were too lazy to bite during the recent hot spell.

During the past week great numbers of dead weak-fish have been floating the lower bays of New York. The fishermen say that the fish were killed by the attempts made to blow up the sunken hull of the steamer Nankin in Swash Channel.

It is stated that mullet are running up the Pajaro and Elkhorn sloughs. These fish appear annually for a few weeks, and then suddenly disappear. They do not appear further north than the Bay of Monterey. It is said they come from the Mexican coast, and are among the best table fish caught.

The Mariposa Gazette says the water in the Merced River has become so hot that it has caused all the salmon fish to die. Tons upon tons of dead fish are daily drifting down the river, which is creating a terrible stench, and the like was never known before. Much uneasiness is felt among people along the river, who fear it will cause sickness.

Manzanita Lake is about three-quarters of a mile long and half a mile wide, and is fed by Manzanita Creek, a stream heading in the snow of Lassen Butte, six or eight miles above. From its borders, some of the projecting crags of Mount Lassen seem to tower above, but they are in reality six miles distant. The surrounding scenery is grand beyond description. The water of the lake, pure as crystal, reflects surrounding objects. It is very deep in places. Where the bottom can be seen the clearness of the water renders the depth very deceptive. People camping there lately report excellent fishing and pretty good hunting.

The sale of several Llewellyn setters at Aldridges, London, Aug. 4th, resulted thus: Noble Windem, purchased by Mr. Lidderdale, 23 guineas; Nimble Windem, purchased by Mr. Cunningham, 36 guineas; Royal Windem, purchased by Col. Makins, 36 guineas. Sydney Bondhu, to Mr. J. A. Platt, for 34 guineas, and Champion Baffle, a Birmingham winner, to the same gentleman, for 26 guineas.

JOSEPH CAIRN SIMPSON, - - - EDITOR

San Francisco, Saturday, Sept. 2, 1884.

THE GOLDEN GATE FAIR.

Although the horses have already distinguished themselves on the Bay District, at Santa Cruz, Santa Rosa and Petaluma, the great interest to the people of San Francisco centers in the performances at Oakland. There are many who make a practice of "following the circuit," and to those who have the necessary time at their disposal, a very good practice it is. But there are a large number who cannot afford to visit all the places, pleasant though it would be, and they are restricted to attending the grounds, which are a practical suburb of San Francisco. It is one of the pleasantest short trips imaginable. Thirty-five minutes from the foot of Market street lands the passengers at Shell Mound, and twenty-five cents is all that is required for that much of the expense, there and back. There is only one change from the boat to the cars, and only two stopping places between the wharf and the park. Although for eight years we have made daily trips across the bay, the journey is never tiresome. There is always a freshness in the air, there is always something new to interest. To those who make occasional trips there must be still more pleasure. But the attractiveness of the trip is only a small part of the pleasure which awaits those who attend the fair. In the first place there is an assurance of a fine display in the stock rings. The entries of cattle and horses will be larger than ever before, and very many notable specimens of all the breeds come into competition. Notwithstanding the great interest which is taken in this department of the fair, the contests on the track are the lodestones which draw ninety per cent., at least, of the sightseers. The speed ring is always a potent magnet when the entries give the assurance that every contest will be a sharp struggle for supremacy, and it is safe to assert that every race on the programme will prove of absorbing interest. The first day of the fair, Monday, the 4th of September, is given principally to running, there being two trots; one the 2:40 class, and the other a special purse against time. It is needless to repeat all of the entries which appear on the programme elsewhere, and a reference to which will show that there can scarcely be a lack of sport in any of them. The first is a dash of three quarters of a mile for two-year-olds, and the few which are engaged are sure to make a lively spin. The second race is the Alameda stake for three-year-olds, one and a half miles, and as Precious, Fostress, Forest King, Duke of Monday and Maria F. come together, there must result a capital race. The Pardee stake is heats of a mile for all ages, and there are six engaged in it, the Salt Lake horse, Red Boy, taking part. Night Hawk, Fred Collier, Sister to Lottery, Precious and Fostress will give him some trouble, and if the scion of the house of War Dance gains the victory, all who witness it will know that there has been a race. There are twelve entries in the 2:40 class, some of them which have already figured, with enough new names to give spice and variety. From all the indications in previous races the classes this year bring together horses which are so nearly matched that there will be surprises, startling episodes which will lend zest to the proceedings. Vanderlynn after his victory on the Bay District course was thought to have this class at his mercy. In that race Freestone demonstrated a capacity scarcely inferior, and at Santa Rosa Frank Moscow "downed" the band. Marin got a heat in the last race, and now when Manon, San Mateo Belle, Rowdy Boy, Louis D., Exile, Edwin Forrest and Big Lize come into the calculation, the ciphering will give a good deal of trouble to those who are endeavoring to select a winner. But it will be tiresome to go all through the bill of the Golden Gate Fair, and even a succinct statement of the entries a mere repetition of names. There is no question, however, that there will not be a blank day throughout the week, and while those who attend on the first day will be loth to lose any of the succeeding, each one of the six will be

well worthy of seeing. There is not a dull day in the lot. The racing and trotting are not the only attractions. There are to be bicycling and military drills, and to take part in the latter are the St. Patrick Cadets which exhibited such marvelous skill in the tactics at Sacramento a couple of years ago. It is a pity that the programme is so arranged that the boys can only compete with those of the same grade, the general impression being that they could play their part with companies longer under arms than their years from birth. There is scarcely a question that the Golden Gate Fair of this year will be superior to any which have preceded it, and those who miss it will regret the omission. The track was never in better order. In fact, the thorough incorporation of the loam and sediment has left nothing more to be desired in the soil.

THE QUAIL SEASON.

The California sportsman's cup of happiness will shortly be full. The close system for quail will expire on the 15th, and the valleys and mountains will resound with the crack of the breech-loaders. The dogs, so long pent up in back yards and between brick walls, will scamper round, mad with enjoyment. They know by the loading of shells and the cleaving of guns that their happy time has at last returned. Have patience with them, ye sportsmen, and don't blame them if they flush a few birds at starting. They are not worth much if they do not. Remember how long they have been kept from their favorite passion, and keep your temper; they will be all right before the day is through, and when they have worn off their wire edge they will make you some fine points, and with a full bag you will return to business refreshed and invigorated, to enjoy an appetite and sleep the sleep that only the quail-hunter enjoys. If you are a novice in quail hunting, do not overload yourself with a heavy gun. A gun that feels light in a gun-maker's store will weigh pretty heavy before you get through with a long day's tramp over the difficult ground you have to travel to follow quail successfully. Seven pounds, unless you are as tall and strong as Sullivan, is heavy enough, and will be quite as effective as more metal. Remember there is much walking to little shooting, and you have to kill birds whose flight resembles in speed the arrow from a bow, and quickness of shooting is of more consequence than heavy loads. When Demosthenes was asked what was the first requisite in oratory, he replied: "Action." The second? "Action." The third? "Action." If you ask for the first requisite in quail shooting, the reply is: "Legs." The second? "Legs." The third? "Legs." Therein lies its great value to the city man. He will take more exercise after quail in one day, than he could be induced to take in any other way in a month. And then the value to the lungs and digestion, to say nothing of dropping a brace right and left, down a deep ravine, and seeing your well-trained dog go down where you could not go yourself, and bring one up and then the other, to lay them down at your feet, more pleased than you are yourself. Now show your appreciation by making much of him. But don't make your bag too large; leave some for your brother sportsmen, and for yourself another time. Don't shoot the half-grown birds, for at the commencement of the season there always are such; but when an old cock gets up, bring all your Sau Bruno skill into play and drop him—there is more satisfaction in that, than the slaughter of a dozen innocents. Do not trouble about the number of your birds. You can go back to the city with a clear conscience that your bag, such as it is, has been obtained in a sportsmanlike manner, and not with what these diabolical pot-hunters call "takes," wherein they maliciously wound more than they kill. After you have found your covey, and they take wing, keep your eye well on the direction of their flight. You will find them in the next ravine, generally near the top. Then "comes the tug of war," the real science of quail shooting. You will follow them with your dog—a brace is better, too much hard work for one dog—you beat round, not a quail moves. You are positive they came there. Your dog, by his action, appears to be of the same opinion. Presently, at the foot of a small bunch of poison oak, he comes to a stand point, tail erect, himself like a statue—beautiful sight, than which nothing is more gladdening to a sportsman. You peer into the brush, hardly large enough to hide a quail. You see nothing, and begin to wonder what he is pointing at; but give it a kick, and whirr! out goes a hen quail—they always lie closer than the cocks. You shoot, and most likely miss from being over excited. Beat again, they are all there, and lying like stones. Your dog finds another. You are cool this time. Whirr!—a bunch of feathers. Seek dead. And if you will persevere and beat that ground thoroughly, going over it two or three times, you will find them all, and get your afternoon's shooting out of that flock, besides giving your dog a lesson on the tricks of quail that he will never forget.

THE SONOMA AND MARIN FAIR.

Those who have had horses at the fair of the Sonoma and Marin Agricultural Association are delighted with the new track and the stabling. Heretofore there have been growls. The track was anathemized. Whatever casualty [happened] was ascribed to the course, and the malediction over accidents that that are likely to happen on the best of tracks were laid to the shorter corners which a half mile imposes. The trainers of horses in California are exacting in their demands. They are, in a measure, spoiled by the uniform excellence of the tracks throughout the State, and insist on what would be considered in the Eastern States conditions which could not be fulfilled. Even those who date their advent on the Pacific Coast to a few years ago are worse than others who have been accustomed to the benefits of this climate for a score of seasons, and they rail at the weather and the state of the track, when in all of their previous experience they never were so well served. A foggy morning is held to be a grievous drawback, when in their old homes they might be compelled to wallow through the mud for a week at a time. When at Petaluma they had to trot over a half-mile track they were in the doldrums. The track was accorded the mishaps which may have arisen from their own want of care. But now the whole circuit of the most important fairs does not present the overrated obstacles, and at every place the tracks are such as to disarm adverse criticism. It is well that the directors of the Sonoma and Marin took steps to do away with the objections, and there cannot be a shadow of doubt that in the future the entry list will compare favorably with those of the other fairs. When horses trot as fast as they have done at Petaluma this week it is the best evidence that the course is all that is claimed for it. With the rains of one winter to give solidity it is probable that the track will be as fast as any of the others in this State, and that will be fast enough. A fast and safe track are not the only improvements which have followed the change. In a very few years it will be one of the most beautiful of fair-grounds; and the ornamentation which judicious care has provided will be one of the most attractive features. No matter how good the track may be there are surroundings which a fair-ground must have to make it popular, and this needed characteristic has been duly provided for by bringing the arts of the landscape gardener to assist. Henceforth Petaluma will not be behind adding one more to the first-rate courses of California.

DEATH OF B. B. REDDING.

B. B. Redding, one of the California Fish Commissioners, died suddenly on Monday of last week. In this death this State loses a most valuable public-spirited citizen, and one who devoted great energy to any task he undertook.

Mr. Redding has been for some years the leading spirit in the Fish Commission; the man of affairs who took an absorbing interest in all questions relating to fish and fishing; and to whose activity and intelligent direction the success of the commission is mainly due.

An ardent lover of the rod and line, and one who thoroughly enjoyed the angler's pleasures, he was at the same time imbued with a desire to advance the economic features of fish culture, and to encourage habits of scientific observation among those with interest in the finny tribes.

Mr. Redding made an annual pilgrimage to the Cloud River where he spent his vacation along its streams, rod in hand. At all other times, his interest in the fish was devoted to the public, and his efforts were directed toward replenishing the supply of streams and ponds, and stocking new waters.

His attention was not confined alone to the fish interest, but he also did a great deal toward experimenting with the acclimatization of foreign game birds in California. Whenever he heard of any species which he thought ought to do well here, he wrote for information, and obtained specimens. This with fish and game.

Mr. Redding had a scientific knowledge of fishes, and strove to impart a taste for it in others. Although in a position where his time was greatly occupied and holding several honorary places of public trust, he directed the greater space of his spare hours to his duties as Fish Commissioner. In the Commission it will be exceedingly difficult to fill his place. One with his knowledge, energy, affability, and unflagging interest, it will be hard to find.

Mr. Redding was a warm friend, a genial companion, an earnest worker, and a studious thinker. Such men as he are rare. And when they are willing to devote their energies to the public good, without fee or reward, they are rarer still. The sportsmen of California owe a debt of gratitude to the late Mr. Redding for his labors on their behalf, which will keep his memory green among them for many a year to come.

The 2:40 Class.

Again at Petaluma there has been a change in the 2:40 class, and with only five starters, seven heats more necessary to decide the race. Vanderlynn has been unfortunate ever since his first appearance, and it will take some hard work to "rehabilitate" him in the estimation of his admirers. But green horses are proverbially uncertain. At rare intervals one will appear which has the qualities of an old stager, trotting as steadily as a veteran of a hundred fights, coming to time with the exactness of an old-fashioned clock and never disappointing those who back him. These are generally of the "lead-headed" class. Never unduly excited, always showing better in a race than in their work, and bettering the trials which are shown in private. From the work we saw in Santa Rosa when Johnny and Vanderlynn were exercised in company, it was evident that the latter was not in the same order he was in his race at the Bay District. He could not speed with the son of the Auctioneer and in the attempt would go in the air. There are disturbing influences this season which are likely to upset all previous calculations, and which are not usually met.

The pinkeye is the black demon which is constantly making an appearance to mar all the carefully laid schemes. He comes in a shape to mislead. While there is a strangling cough at times so bad as to endanger choking down, the animal attacked does not get off his feed and is apparently in good spirits. But all at once the speed is gone. A move through the stretch entails as much distress as formerly followed the full mile, and the work heretofore given is found to be too violent a strain. There is only conjecture to warrant the ascribing the defeat of Vanderlynn to pinkeye, but as the disease has extended all over the country, some of those attacked giving scarcely an indication of its presence, it may be that this peculiar form of apizooty has had something to do with the result. Whatever the causes are for the changes there is an appearance that this class is on a par with the 2:25 for startling changes, and that the interest is not likely to diminish through the whole of the circuit.

DEATH OF AN ANGLER AND JOURNALIST.

Wm. E. J. Hooper, who died at the ripe age of 79 years, in this city this week, was a most enthusiastic disciple of the rod and line, and ardently followed his chosen sport up to the last few years of his life. Mr. Hooper was a close observer and wrote gracefully of what he saw. Wherever he had the opportunity he walked the banks of the trout streams readily accessible, and worked harder for a day's sport than many much younger men. He was a true lover of angling; was perfectly familiar with all its appliances, and skillful in their use. The writer well remembers his enthusiasm when the gitslse were first found to be in the vicinity of Oakland pier. And when they were gone and the trout season over, Mr. Hooper would spend much of his spare time on the pier in quest of the humbler smelt. As a handler of the rod he had few equals, and his genial nature, good humor, ready wit and pleasant conversational powers made him a sought-for companion even by much younger men.

The Shooting Season, as all true sportsmen know, opens on the 15th. Between now and then the shooters will overhaul their guns, bring out their outfits, load up their cartridge and otherwise prepare for "the fifteenth." Longing looks have for some time been thrown on the tried breech-loader and as the time draws near when it can be aired it becomes of greater importance than any other thing in the household. The opening of the season marks an era in the lives of many men. They look forward to it with eager expectation for many months. The quail will be the first sufferers but it will not be long before the ducks come in for their share too. Already there are some ducks in the marshes, but it will not be until the first rains that they will be abundant.

The Pacific Yacht Club regatta which is announced for next Saturday is expected to draw out quite a fleet. The Aggie, Ariel, O'Connor, Fleur de Lis, White-wing, Annie and Clara at least will enter and perhaps more. The course includes a stake boat at Hunter's Point and the annual prizes including the annual prize flag will be given. We have had no regatta on the bay this year, and it is even now somewhat late for one of the big yachts, August being the last month. It is to be hoped however, that the Pacific will have a good day with plenty of wind for all hands.

Men who have visited the Fair grounds at Petaluma the present week are delighted with the new arrangement. The track is not only accorded a prominent place among the grand courses of California, but the general appearance of all the appurtenances are highly extolled. The arrangement of pavilion, stalls and other necessary buildings is commendable and after a few years the trees and shrubbery will finish the beauty of the picture. Better than all this, as we learn, is the management, and probably no awards have been made that were not satisfactory to those who can look at things from this correct standpoint. Had the one missing link been

introduced there would have been nothing lacking. This gap was the neglect to furnish the information of what had been done, and, consequently, the owners of horses were ignorant in relation to the changes. There will be a remedy in the future for the only lack, and henceforward the Sonoma and Marin will come into the line showing the same liberal list of entries as marks the fairs of Oakland, Sacramento, Stockton, San Jose, etc.

Billy McCracken, the sire of the dam of Overman, we would like to hear something about. In the report copied from the N. Y. *Spirit of the Times* it was stated that Billy McCracken was at one time owned in Buffalo, and other information is that he was brought here when a suckling colt by Mr. McCracken. We will be much obliged for any intelligence regarding this horse, and also of the California stallion, David Hill. There are many of the get of these two horses in California, and the breeding is an essential feature which should not be overlooked. We are under the impression that the Eastern horse is not the one which was the sire of the dam of Overman.

We have missed the fairs so far. With all the yearning to enjoy the festivities there has been a "cruel fate" placing an interdict on participation. It may be that we can steal a few hours and pay a visit to Petaluma to-morrow, Saturday, and then comes the doubt whether the time can be given. Ever since our domicile in California we have taken delight in attending the fairs. The Eastern people have very little idea of what the exhibitions are in this State. The County fairs of the country east of the Rockies are no measure. There are State fairs back home which will not compare with the smallest of the District fairs of this Coast, and some of them show a display which the whole Eastern country cannot equal.

The trouble is to get away from home farther than the busy side of the bay. Living on the Christian shore of the water, there are enticements to spend the Sunday which are hard to overcome. There are visits to the stables when everything is as quiet as a due observance of the Sunday law entails, and it, may be, a drive to points of interest makes an afternoon's work, or rather enjoyment. Then again the colts have to be considered. It may be, with all due regard to the enactments of the State, that an experiment has to be tried; a new form of tip or shoe to be put on, and then the clang of the anvil reverberates from the stable, to the utter disgust of those who, with us, were duly christened in the auld kirk. Many Sunday trips have been outlined, and a few of them carried out. Those we have disappointed must place the onus on circumstances that are hard to control, and, if possible, give us absolution.

A Grand Picnic is one of the peculiar features if the fair at Petaluma. The residents of the two counties embraced in the district make a point of attending the "harvest home." The grounds from early morning until the last exercise are thronged. There is a constant stream of wagons passing through the gates and these are ranged so that the best profitable view of the races can be obtained. At noon time the lunch baskets are opened and a stranger who has the least hungry look in his visage is inportuned to partake. And a better luncheon could hardly be gotten up. Chickens roasted to a turn, wine of vintage which is far superior to any imported, and rolls and bread baked in a home oven, there is nothing like the average lunch put up in a farm house. The chickens have never been cooped, the eggs are gathered the same morning they are put in the pot, the sliced tongue and dried beef, the boiled ham, the fruit, everything perfect. The city delicacies are nowhere. The most delicate taste does not require condiments and sauces, and there is a relish, a *gout*, which it is troublesome to explain.

BICYCLING.

Cortis' Last Ride.

Herbert L. Cortis made his last public appearance as a bicycle rider at Surbiton near London on August 2nd., and in so doing left a record not likely to be soon forgotten. The occasion was the evening race meeting of the Wanderers B. C., at which Cortis had announced his intention of endeavoring to beat his own wonderful hour's ride of a few days previous. The Hon. Ion Keith-Falconer attended him for the first few miles, but soon retired. Several other riders also assisted as pace-makers, to such good purpose that when time expired Cortis had covered 20 miles, 825 yards, or twenty-eight yards better than his recent performance at the Crystal Palace. En route Cortis cut all previous records from three miles upwards, both professional and amateur, except the five miles amateur time.

Of this race we take the following interesting account from the New York *Spirit of the Times*: "Surbiton, where the meeting was held, is some distance from London, for such purposes; but there were, nevertheless, several hundreds of spectators—indeed, more than I remember seeing on any previous occasion, the sides of the course being crowded. The course is exactly 400 yards in circuit, and is specially prepared for bicycling, the surface being hard and the corners eased off. Its size makes the duty of timing tolerably easy. This office was undertaken on the present occasion by Messrs. Coleman and Atkinson (*Sporting Life*), and a third watch was running with theirs, as a check.

It was already past 7 o'clock, the time, when the pistol fired. Woolnough, the pace-maker, went off at his best, followed by Cortis, Falconer lying last. The time of the mile was 3 minutes, dead, but the second, with Hamilton in place of Woolnough, was a clinker, viz., 2m. 52.1-5s., the fastest of the match. The third mile was much slower, but the next two were both inside 2m. 55s. In the sixth mile the pace-maker was not fast enough for Cortis, who screamed at him to go on, whilst Falconer seemed to think otherwise. Completing this mile, the Honorable was left twenty yards in the rear, as if by magic, and not feeling comfortable, eased up; but the cheers of the spectators caused him to go on again, although only for another half mile, when he stopped for good. The seventh mile took Cortis 2m. 55.,

exactly. He eased a good deal in the next three, and the 11th, 12th, 13th, 14th, 15th, and 16th, were all outside the 3 minutes. The whole distance occupied 59m. 20. 1-5s. and, but for the wind, would have been even better than that. After passing the post Cortis eased a good deal, but still ran 325 yards over the 20 miles in the hour. It was quite dusk when he finished, and people were very glad it was all over without a mishap. The difficult task of pace-making was splendidly done throughout, and it was wonderful to see how Cortis tired out the different riders, one after the other, although they were, most of them, doing performances which would have entitled them to championship honors only a few years before. Cortis was married the next day and is now on his way to Australia, where he intends to settle, and to devote himself to his profession. What England loses, Australia gains, the possession of the most famous bicyclist that has ever entered for honors.

The following table shows how the miles were made, all above the sixth being the best on record.

MILES.	M. SEC.	MILES.	M. SEC.
1.....	3 0	11.....	32 30
2.....	5 52 1-2	12.....	35 30 4-5
3.....	8 51 1-5	13.....	38 35 3-5
4.....	11 46 1-5	14.....	41 36
5.....	14 40 2-5	15.....	44 37 2-5
6.....	17 37	16.....	47 37 1-5
7.....	20 32	17.....	50 32 2-5
8.....	23 31 1-5	18.....	53 27 2-5
9.....	26 31 3-5	19.....	56 22 3-5
10.....	29 30 2-5	20.....	59 20 1-5

The Twenty-five Mile Championship.

The Leicester trials for this championship continue to afford the most sensational spirit. It will be remembered that the directors of the Aylestone grounds offer a bet, value £25, with added money to like amount. The winner becomes the holder of the trophy (which must be won three times in all), and receives in addition £15; second, £6; third, £3; fourth, £1; while an additional sovereign is given to the leading competitor if record be beaten for ten, twenty, and twenty-five miles. The first competition was decided on the Saturday previous to last Whitsuntide, and resulted in a dead heat between R. James of Birmingham and F. Wood of Leicester. Upon running off, another dead heat resulted, but when meeting a week later for the third time, James beat the Leicester man by a good yard. For the race under notice the following were the competitors:—R. Howell, Coventry; G. W. Waller, Newcastle; F. De Civry, Paris; A. E. Derkinderin, Coventry; F. Wood, Leicester; and C. R. Garrard, Uxbridge. Unfortunately for James he met with an accident while training some few weeks since, and consequently he was not sufficiently recovered to take part in a race of so long a distance. The track on the Aylestone grounds had been well looked after, the weather was fine, and 4,000 persons were present. At the start, Garrard went off with the lead, followed by Waller, Derkinderin, De Civry, Wood, and Howell bringing up the rear. After completing two of the sixty-six laps, the Frenchman rushed to the front, and for a couple of miles took his field along at a merry pace. Afterwards, Waller, Derkinderin and Wood each took a turn at the lead. The five miles was registered in 17 min. 19 sec. Positions, Derkinderin, Wood, Waller, Garrard, Howell, and De Civry. A lap later the mile champion rushed to the head of affairs, and at times he took his opponents along at a merry rate of speed. At ten miles—33 min. 45 sec.—Howell was in front, Waller, Derkinderin, Wood, and De Civry following in the order named. A mile later Garrard went ahead, going away at a rattling pace, the Frenchman forty yards behind. Six laps later, De Civry was among his field again, and shortly afterwards rushed to the front. But one or two laps further on—at fifteen miles, 50 min. 13 sec.—Wood was leading Waller, Derkinderin, Garrard, and Howell next, with De Civry fifteen yards in the rear. The six men travelled in close company for the following thirteen laps. At the twentieth mile being hoisted, in 1 h. 7 min. 59 sec., the lot eased up, nobody seeming inclined to force the pace. Eight laps from the finish Howell got to the front, followed by Garrard and Wood, the others close up. Nearing the finish the pace rapidly increased, and just over a mile from home De Civry cried content. The others went ahead at a rattling speed, but a lap and a half from the finish Waller eased up, and when the bell signalled the last lap Howell held a yard's advantage from Garrard, Derkinderin third, and Wood close up. Half a lap from home Garrard took the lead, but getting on the straight Howell came again, followed by Derkinderin. Another splendid struggle ensued, resulting in favor of Howell by half a yard, Derkinderin beating Garrard by a few inches, with Wood just in the rear. Time, 1 h. 24 min. 15 sec. Tremendous excitement prevailed. —*The Referee*.

THE SPRINGFIELD BICYCLE CLUB, of Springfield, Mass., will hold its first annual meet and tournament at Hampden Park on Wednesday afternoon, and at the Springfield Skating Rink on Wednesday evening, September 20th. The bicycling fraternity of the United States have been invited to attend. All the races will be held under League rules, with the sanction of the League of American Wheelmen. The programme as now arranged consists of a twenty-mile professional race for a purse of \$500, by J. S. Prince, of Boston, the champion of the United States, against Thomas Harrison and James Mellen, who will alternate every five miles; a five mile professional ladies' race for a purse of \$200; also the following races open to all amateurs: Five-mile race, three prizes, value \$125; two-mile race, best two in three heats, three prizes, value \$125; one-mile race, best two in three heats, three prizes, value \$75; half-mile race, three prizes, value \$50; slow race, 100 yards, three prizes, value \$25; one mile, without hands, three prizes, value \$50; half-mile race for boys under fifteen years of age, three prizes, value \$20. At the skating rink in the evening, for the best drilled club of not less than eight members, three prizes, value \$100; best single fancy riding, three prizes, value \$75; best double fancy riding, three prizes, value \$75. The entries are free and should be made with Mr. C. K. Ferry, Secretary Springfield Bicycle Club; on or before September 15.

The San Francisco B. C. shows considerable activity, turning out for frequent runs through the park, to the beach and Cliff House, and in the Presidio Reservation. Both the park and reservation roads are kept in good repair and give many miles of superb wheeling.

Dr. A. Hubbard, G. W. Davis, Judge Bowers, Tim Crowley and Frank Sweetser have returned from a two weeks hunt at Easkott Beach, Marin county, near Bolinas bay. They found game very plenty, several deer and many doves were killed by the party, and they report many quail and good ground for the shooter when the season comes.

THE HERD.

Merino Sheep.

This variety of sheep were imported originally into France and Spain. They were placed upon the government farm at Rambouillet, where every care was given them, and the greatest attention paid to increasing their produce of fleece. After years of experimenting, the animals were increased in size and weight nearly one hundred per cent., and the wool from twenty to twenty-five. The fiber did not improve as was desired, but the attempt to combine in the same animal meat qualities as well as wool-bearing ones was assigned as the reason. During these experiments the sheep grew very large, were enormous feeders, but they lost those characteristics of wool bearers, and they were no longer as robust. Subsequent breeding has however not only restored them to their original excellence, but improved their wool growth on the rams about seventy-five per cent., and the ewes sixty-six. It required good management and about ninety years to accomplish this feat. The French were the first to produce a Merino combing wool, though subsequently they found rivals in America, Germany and Australia. The only difference between the breeds in the several countries is that the French ones still have larger carcasses.

D. C. Collins, of Connecticut, was the pioneer importer of the Merino sheep in America. Stock breeders eagerly sought the new variety, hoping to improve their flock, but were in most cases disappointed on account of the imported stocks being selected from those flocks which had been bred to increase their weight and carcass, and not from those where that policy had not been followed. Later importations disapproved any prejudice that the first one might have created against the breed. Numbers of them have found their way to California, where their success has been unparalleled. A Mr. Robert Blackard, of Calaveras county, clipped from one of his sixteen months fleece which weighed 51½ pounds; the same animal clipped a 46-pound fleece at two years old. It is only just to say however in this connection that the climate of California being so dry, the wool retains a greater amount of oil than in other countries where the rainfall is large.

Mr. J. B. Ray, in an address to the New York Merino Sheep Breeders' Association, had the following to say on the points of Merino sheep: But few persons would prefer a staple of more than two and one-half inches for a ram, while many would be contented with a two-inch staple of highly crimped wool provided the maximum density of fleece had been reached. Comparative evenness of fleece with as little glare as possible is an important point reached by our western breeders. Experience has fully demonstrated that great weight of fleece can be combined with the highest physical development, constitutional vigor and other points of perfection as indicated above. As to the point of oil, or yolk, the greatest amount that can be secreted without impairing the vitality of the animal is admissible in a ram. Most breeders prefer a coloring bordering on a buff, while a thin, sticky oil of a greenish cast is highly objectionable. As to folds or wrinkles, which is a distinctive feature of the American Merino type, there might be a diversity of opinion as to size, location and number. Still it would be difficult to find a ram of such heavy pendulous neck, tail and flank as would disqualify him as a stock animal in any flock, while many would prefer that with the above he should have a large fold extending across the point of the shoulder, a considerable number on the sides extending in massive proportion well under and nearly across the belly, yet diminishing well in size and lost to view in full fleece before reaching the back, with numerous large folds lentwise across the hips and stifles.

Those who fancy the delaine type are aiming in the main to secure the same points of American Merinos, while at the same time securing a longer staple of high quality of wool. As to folds or wrinkles, a good neck, tail and flanks are about all that is desirable, with little or none on the body. Thus we have before us a pen sketch of our ideal rams of the American and delaine Merino types.

The Milk of Ruminants.

In all probability there has not been sufficient attention, thinks Dr. Brush, drawn to the differences existing between the milk of animals which ruminate, as the cow, and those which do not chew their cud, as the ass and horse; and he would divide milk into two classes—that which is the product of non-cud-chewing, and that which is the product of cud-chewing animals. The milk of the cud-chewers contains a variety of casein, which, under the action of the digestive process, coagulates into a hard mass. Contrary to the often expressed belief, he declares that this coagulation takes place in the ordinary process of digestion in the calf. He has one tied up out of the reach of any food, and had it fed with freshly-drawn cow's milk. Half an hour after its meal, he always found it busily chewing its cud. After many inquiries, he has ascertained that the same takes place with the sheep and goat; and from these facts he is inclined to explain the difficulty often experienced by the human stomach in properly digesting the milk of ruminating animals. The other variety of milk to which human, equine, and ass' milk belongs, does not, under the action of acids, in the same way coagulate into the hard mass that is found in cow's milk, but coagulates rather into small granular or flocculent masses, which are easily diffusible. This would explain why Koomiss prepared from cow's milk is found to agree better with children than cow's milk itself; the Koomiss has been, so to speak, already chewed. In the milk of the cud-chewers there is but a small amount of sugar and a large amount of casein, while exactly the reverse of this is the case with the milk of the non-cud-chewers; and in this fact there is again a reason why the milk of the latter, at least in the case of children who cannot get their natural supply, is to be preferred. It will be remembered that Koomiss is a beverage prepared by the people of Yakutz from the mare's milk, and found to be highly nutritious, but that the beverage referred to by Dr. Bantsh is a product artificially prepared from cow's milk.—*Veterinary Journal*.

Feeding Pigs.

Pigs dropped this spring that are to be marketed this year should be pushed hard from the beginning, in order to insure the largest percentage of profit. They cannot be permitted to go back, or even stand still, in the accumulation of flesh for a day, without loss. The utmost skill of the feeder is often taxed with the little fellows when they are about a month old; for at that period the milk of the dam ceases to be sufficient to meet the wants of the growing pigs; and if they have not been permitted to learn to eat before that time, and if abundance of highly nutritious food, in liquid or semi-liquid form, is not furnished from this time on, it will be impossible to keep up the rapid growth that has been attained by simply feeding the sows properly up to that pe-

riod. Ground oats and corn, mixed, or ground corn with wheat middlings, will make a good slop for the pigs; soaked corn will also be highly relished, and will be found well adapted to keeping the pigs in high flesh; but as soon as the new corn is fairly in milk, that will be found the best of all fattening foods. "Make hay while the sun shines," is the embodiment of sound doctrine in that department of husbandry; but the injunction "Make pork before cold weather comes," is equally as sound a maxim for the government of swine raisers.

But if pigs are to be kept over the winter, and fed off for the next spring or autumn markets, we would recommend less of the forcing process; less of the stimulating, fattening grain diet; and would urge the importance of clover and grass as a means of keeping the pigs in a good growing condition, and at the same time keeping them healthy. Pigs cannot long stand up under the forcing system—the high pressure plan of feeding that produces the enormous weights sometimes attained at six to nine months—and while this is perhaps, after all, the most profitable method to the breeder and feeder, we very much doubt whether it is the course that produces the best quality of bacon and hams. In these extra-heavy pigs the weight is largely made up of fat—there is no corresponding growth of bone and muscle, and the pork is soft and oily. On the contrary, when pigs are given the run of the clover field during their first summer, with only a small allowance of grain, the bone and muscle is developed by the food and exercise; and when they come to be fattened off for market, there will be found a much greater proportion of "lean meat" than in the earlier matured pigs.

We regard the latter method—this reliance largely upon pasture during the first summer—as an essential in raising healthy breeding stock, whether males or females; and we would never buy one of those forced, exceptionally heavy, and fat show pigs for breeding purposes, no matter what might be his recommendation otherwise. Our breeders have done too much of this thing in the past. It has shown itself all over the country in a loss of constitution and a lack of vitality which has made our stock an easy prey to disease, and we are glad that there are indications of a reform in this particular.—*Live Stock Journal*.

Origin of the Ayrshire Cattle.

The Ayrshire cow, as we have her, is a native of County Ayr, Scotland, where we can trace her history back for about a century. Mr. William Aiton of Hamilton, in a communication made to the *British Farmer's Magazine*, in 1826, says: "The dairy breed of Scotland have been formed chiefly by skilled management within the last fifty years, and they are still improving and extending to other countries. Till after 1770 the cows in Cunningham were small, ill-fed, ill-shaped, and gave but little milk. Some cows of a larger breed and of a brown and white color were about that time brought to Ayrshire from Teeswater and from Holland by some of the patriotic noblemen of Ayrshire; and these being put on good pasture, yielded more milk than the native breed, and so their calves were much sought after by the farmers." The *Magazine* goes on to say: "We are verbally assured by old breeders who had known the Ayrshires since 1780 that they had received improvement from crosses with Short-horn bulls for the last half century, and although they may now be considered a good established breed in themselves, they are in reality merely high grade Durhams."

Yonatt, in his history of British cattle, says, writing in the year 1833: "The origin of the Ayrshire cow is even at the present day a matter of dispute; all that is known about her is that a century ago there was no such breed in Cunningham or Ayrshire in Scotland. Through several pages of speculation as to what crosses have encompassed the breed known as 'Ayrshire,' at the time he wrote, and an elaboration of their remarkable yields of milk and butter in the Ayrshire dairies, he leaves the impression that the present breed has sprung from a succession of crosses by Short-horn bulls upon the native Scotch cow; that the produce of these crosses were interbred among themselves with care and an eye to improvement both in form and dairy quality, which finally resulted in an animal eminently fitted to the climate and soil of southwestern Scotland, and the best they have for dairy purposes. The effort appears first to have been to introduce Short-horns and substitute them as a dairy cow, which failed, but the cross was successful, and hence the breed. Mr. Yonatt proceeds to say: "On a first view, by a judge of the different varieties, the Ayrshire would be called a diminutive Short-horn, so nearly in figure, color and prominent characteristics do they approach them. They are about the size of our common stock, compact in form, exactly built for a dairy cow, light forward and heavy behind, with an exceedingly home-like, domestic appearance. In color they vary from a brown, running in lighter shades up to red, and into a pale yellow, alternated more or less with white, in distinct patches, rarely mingling into roan. There is scarcely that uniformity of appearance with them that there is in the Short-horns, yet they appear to hold true to the dairy quality throughout, which, like the gentle voice in woman, is an excellent thing in a cow."

A much later article in the *American Agriculturist* says: "The Ayrshires have been bred for milk in a country where quantity and quality were both wanted where the pastures were only moderately rich, and where rapid fattening for the shambles was also a desideratum. The result is a breed of no more than ordinary size, many being decidedly small, but hardy, easy keepers, yielding a large quantity of milk, rich both in butter and cheese. The claim set forth for these cows is, that they will give more and better milk, on the same feed, than cows of any other breed. This, we believe, is not disputed. Ayrshires have been known in this country since 1822, when, we believe, they were first imported. The stock was kept pure, however, only a few generations, as it became blended with the Short-horns, and the blood now flows in some of our registered Short-horns. In 1831 other animals were brought over, and ever since that time the breed has grown in favor. The animals are pre-eminently of medium size. The cows have great digestive capacity, as indicated by their deep, full bodies. The colors are usually red, spotted with white, the spots being very well defined, often fine and sprinkled over the body in patches."

The Question of Prices.

The frequent sales of choice animals—horses, cattle, sheep, swine—at liberal prices, serve to employ the thoughts of certain students of events, between search for the cause of a sentiment that allows these things to be renewed with a persistency that places them in the category of a rule rather than its exceptions, and speculations upon the probable effect of such a condition upon the future of blood-stock transactions.

These convictions have found encouragement among the more conservative writers and breeders for many years. The one has steadily predicted, and the other has as constantly feared, that not only would personal disaster overwhelm the promoters and payers of these high prices, but that general

confusion and distrust would result, greatly to the detriment of live-stock interests generally. With the few exceptions that are traceable to personal imprudence, the prophecies of the one and the fears of the other are unrealized. Enthusiasm among aspiring and intelligent breeders is unabated; prudent men, who have learned the value of money by earning it, pay "four figure" prices for animals that most nearly suit their several requirements—often duplicating such purchases than stopping with the first—realizing that the insatiable demand of a steadily widening field and an advancing intelligence will not long leave the owner of really meritorious stock searching for a purchaser for his products. But the prices demanded and paid for breeding animals of exceptional merit are not too high, when measured by proper standards. Such animals are not the result of chance or experimental breeding. The world is as certainly indebted to the intelligence, the study and the labor of man for the highest type of its domestic animals as it is to the science of architecture for St. Peter's, or to the engineering skill that tunnels its mountains and spans its rivers with bridges of iron or steel. The patient study necessary to a reasonable comprehension of the science of breeding and the experience required for its successful application, added to the investment of capital in parent stock, are considerations that call for a fair return as surely and as rightfully here as in any other business or profession. And until it is shown that the rewards secured by those who have devoted themselves to advancing the standard of domestic live-stock are disproportioned to the results achieved, when measured by what is conceded to other professions, this occasional protest against prices will meet with little response outside the echo of its own feeble wail.

As a rule, the men who pay liberal prices for breeding animals are those who have enjoyed a reputation for ability to discern the better side of a business transaction, as well as sufficient nerve to back their judgment with their capital. This fact should go for something. Men of discernment and business capacity are no more likely to part with these attributes on the threshold of live-stock investments than elsewhere; and any argument predicated on an assumption of the contrary only betrays the weakness of the position it seeks to defend. In a careful study of the so-called fancy-priced sales, with due consideration of collateral and subsequent circumstances, will be found such vindication of the wisdom of buyers as will entitle their purchases to be recognized as coming within the category of prudent investment—with as few exceptions as belong to the majority of business transactions.—*The Breeders' Gazette*.

THE CHICAGO FAT STOCK SHOW.—Commenting on this coming exhibition, the *English Live Stock Journal* states: "If the Yankees have not yet beaten us in the production of fat stock of the best quality, some of the rules of their fat-stock shows are in advance of our own. A most important feature is the encouragement given to produce animals that, when fattened, produce the best quality of flesh. Prizes are frequently awarded in our shows to cattle whose meat contains an abnormal, not to say disgusting, proportion of fat to lean, and in which the fat is distributed in huge masses totally separated from the lean, instead of being properly mixed throughout. The evil is increasing rather than diminishing, and the amount of fat on the animal constantly secures him the award without due consideration of the quality and value of his flesh for human consumption. The Smithfield and other clubs would do well to follow the Chicago society, and institute prizes for dressed carcasses, and also for animals whose age and weight show the earliest maturity and the greatest disposition to fatten. By so doing, the usefulness of our Christmas fat-cattle shows would be greatly increased, and the public interest in them would increase also, or at least remain unabated."

SWIMMING SNAKE RIVER.—W. P. Hall, foreman for M. Ryan, recently arrived at the Snake river bridge at Blackfoot with 1800 head of cattle. The herd was very wild, as it had been made up of four different bands. An unsuccessful attempt was made to get the cattle across the bridge. Some of them had entered the river, and it was decided to swim the whole herd. Hall rode his horse out into the deep water above the bridge, but got into an eddy. He then called to S. C. Van Deventer to throw him a rope. Van Deventer responded, but the rope caught in his spur, and he was pulled from his horse, and with the animal floundered in fifteen feet of water. He managed to remount the horse, which struck out immediately for the cattle in the middle of the river. After a hard struggle, and several narrow escapes similar to the one described, he reached the shore a mile below the bridge. Some of the cattle were carried two miles down the stream, but only eleven head of worn out and lame animals were lost. Van Deventer could not swim, and his escape from drowning seems wonderful. It is said to be the first time a mounted horse ever swam Snake river.—*Oregon Statesman*.

ENGLISH AND AMERICAN CATTLE COMPARED.—Americans have done more for the rank and file of their common native breeds in the last five years than English farmers have done for their rank and file during the last twenty years. If any one doubts this let him go and look at a lot of imported American beasts, and then go to the fairs and markets of any part of this country—with the exception of certain breeding districts—and draw his own conclusions. Of course, the United States cattle we now receive are the best they have to send, quite the pick of their markets; but five years ago they had few, if any, as good to send. As things are going on now, the cattle of Colorado and Texas will be a long way ahead of our ordinary cattle in ten years' time. The horned stock to be found in summer in the new Forest, in Hampshire, would be a disgrace to Montana itself.—*Mark Lane Express*.

It is reported that A. A. Longley of Truckee Meadows has been offered \$29 per head for 100 head of cows for slaughter. His price was \$30 per head. When they begin killing off the cows we are in danger of a milk and butter famine. So great has been the demand for beef cattle from the East—reaching out through the Great West to this State—that cows are about all now left in the bovine line.

Hampshire sheep are but little known in this country, their next door neighbors, the Southdowns, being preferred. They own the remotest origin of any of the black-faced sheep; in England they are accorded first place as early maturers, their thriftiness is remarkable and their growth before becoming a year old is rivaled by no contending breed.

The two-year-old Hereford bull, Sir Bartle Frere, second prize at the Reading show, England, has been sold for \$3,000. The destination is America.

YACHTING.

Ocean Cruising.

Cruising outside has never been popular here. In fact there are very few yachts here in the fleet adapted to it. Those with big inner centerboards belong inside, and generally stay there. Outside the harbor the sea is rough and the wind strong, and there are no little harbors to run to in case of bad weather. Most of those who have done any ocean cruising here have given it up after a few trials, finding it unpleasant. Yachting on the broad ocean is only pleasant in a good large vessel, properly fitted for the purpose. When cramped in a small yacht there is not much enjoyment. There is a good deal of "bosh" talked about ocean cruising. Some people imagine that a man who goes yachting and does not go to sea is a sort of parlor sailor. They think when one goes sailing for pleasure, he ought to go into rough water and make himself generally uncomfortable.

Some one of these people has been writing about the cruise of the New York Yacht Club, and raking over the members because they stuck to smooth water. This is the way the New York *Spirit of the Times* answers the individual referred to, and its remarks are more sensible than conventional:

"I notice a weekly of your city is inclined to belittle the cruise of this club, insisting that its destination should have been Bermuda instead of Marblehead, and that the ocean would be a more fittingsailingplace than the Sound. 'If the object was mere social enjoyment,' the writer says, 'the Sound would be well enough.' Why, that is exactly the object. It is a pleasure cruise, and as all know who have had any sea experience, there is no pleasure in ocean sailing. 'Those who go to sea for pleasure,' says Jack, 'should go to — for pastime,' and there never was a truer saying. 'They can never learn to be sailors,' says this cheerful idiot, whose idea of sailors is gained from the pages of the dime novel, or from the conventional stage representation. Well, they don't want to learn to be sailors, and if they did they are too old to begin, even out on the ocean. But they don't. The guests on board these vessels are brokers, bankers, clergymen, lawyers, doctors, etc., taking their holidays and enjoying a breath of sea air, and enjoying the advantages of a daily sea bath. If they desired to go to sea to rough it, as this chap would have them do, the pilot boat or the mackerel schooner would be the place for them rather than the yacht, which is, as its name implies, a vessel for pleasure sailing. Even so reprehensible a matter as eating clams may be indulged in by these gentlemen if they choose to eat them, and I would respectfully represent to this chap that it is none of his concern, and remind him of Jimmy Shaw, of Gloucester, who was hung because he did not mind his own business.

"What does he suppose to be the object of the cruise if it be not social enjoyment? Shall all these gentlemen come home with blistered hands, as well as sun-burnt faces? Must they hitch up their trousers when they return to the bosom of their families and greet their wives with 'Shiver my tarry top-lights and top-gallant eyebrows, old gal, how are you, and how are all the kids?' or some other equally salt expressions.

"There are seamen on board these yachts, and some very good ones, and the yachts themselves are staunch and strong, and one object of the cruise is to test the speed of the vessels and the skill of those who sail them, even to the extent of getting them underway in crowded roadsteads, where there is scarcely room, as this chap admits, for them to turn round. Whenever it is thought desirable for the owner of one of these vessels to go to the West Indies or to Bermuda, or even across the ocean, he has always been carried safely to his destination, and it seems curious that he can't take a party of his friends out on a pleasure sail without being told that he should make tarry sailors of them before he permits them to return.

"The idea of a chap that would be sick during a trip to Rockaway on a steamer, sitting in his den and writing about 'the life, adventures, trials and experiences of a seafaring man,' or of the 'halcyon' enjoyment of a 'fleet close reefed, struggling with the gale,' is a little too utterly comical for anything. I have had a trifle of that 'halcyon' struggling with gales' in my young days, but, alas, I did not enjoy it, and I have never found, outside the pages of a novel, anyone that did."

At Lake George the other day there was a grand review of 75 canoes under sail. A steam launch ran up to the island, and soon afterward started for Crosbyside, five miles down the lake, towing nearly fifty canoes. So novel a tow attracted much attention as it passed down the lake, and was saluted and cheered by the guests of the several hotels as it went by. Various accessions to the ranks were made from several points on the lake, until a fleet of seventy-five was collected at the head of the lake. These were marshaled in three divisions, and, sailing down the lake, passed in review before Judge Nicholas Longworth, Commander of the Association at Crosbyside. The first division, consisting of light paddling canoes, was commanded by Vice-Commander Edwards, A. C. C., of the Peterboro Club. In the second division were the light sailing canoes, under command of Rear-Admiral Brentano, A. C. A., of the Knickerbocker Club, and the third division, composed of the heavier sailing canoes, was led by Commodore C. B. Vaux of the New York Club. The breeze was fresh from the southward, and the dainty white-winged fleet, with all colors flying, flew past the reviewing stand, making the prettiest marine picture ever seen on Lake George. The grassy slopes in front of Crosby House were crowded with spectators.

THE LAUNCH OF THE BEDOUIN.—The cutter-yacht Bedouin, which has been on stocks since February last, was launched Thursday afternoon, August 19th, from the yard of Henry Piepgas, Greenpoint. This yacht has the heaviest keel of any pleasure craft that has been built, there being thirty-five tons of lead in its keel. Captain Archibald Rodgers, of Hyde Park, on the Hudson, the owner of the yacht, was present at the launch. The boat is said to be the largest cutter-yacht ever built in this country. She will carry sixteen tons of ballast, and a crew of seven men and a captain will be required to sail her. She has six state-rooms elaborately finished, and the saloon is roomy and handsome. She is 82 feet long over all, 15 feet 9 inches width of beam, and 12 feet 6 inches depth of hold. She will be completed in about 14 days, and will cost when finished \$40,000.

The "Mosquito race" of the S. F. Y. C. which comes off on the 16th is attracting some considerable attention. Yachts under 32 feet only are admitted. We expect that at least 50 or 60 yachts will enter. Last year the regatta was a successful one. No entrance fee is required, and plenty of prizes are to be given in the different classes.

The Loleta is going up to the Suisun marshes on the 11th inst. to stay all winter.

THE NEW YACHT.—The new yacht which Captain Turner is building for the Spreckles boys is progressing rapidly. She is now being planked up. She is 85 feet over all and 82 feet beam. Her frames are of Port Alford cedar, six inches square and double. Her planking is 2½ inches and the ceiling is three inches from the flat of the floor up. The stem is made of a fine laurel crook, which is sided 12 inches. Between it and the frame are natural crooks of strong wood to help secure the keel, which carries ten tons of lead outside. Large bars of lead are to fit down between the frames. There is no black iron being used, all fastenings being galvanized iron or composition. The dead rise of the yacht is 35 degrees and she has a good "drag" to her keel, drawing a good deal more aft than forward. She has a handsome shear and has 6 feet archway, which is more than Captain Turner usually gives his yachts. Those interested in yacht construction ought to visit the shipyard down on Channel street near Sixth, and look at the yacht while she is being built. She is to be first class in every respect.

The Chiquita has had a new bowsprit put on to accommodate a larger jib.

The Bernc is to be used at Sherman Island this winter on a "shooting box."

The Catamarans did nothing extra in sailing in the eastern yacht club cruises.

The San Francisco Yacht Club has passed over its annual regatta this year, the fixed date being the first Saturday in August.

During the cruise of the New York Yacht Club, by invitation of the sailing-master of the schooner Phantom, E. Y. C., the sailing master of the N. Y. Yacht Club fleet were given a drive to Nahant and a dinner at that place.

The Pacific Yacht Club regatta which comes off on the 9th will be the first regatta of the year. It is hoped there will be plenty to enter. Our yachting has been dull this year and something is needed to enliven the yachtmen.

The race at Newport, during the New York Yacht cruise, proved conclusively the superiority of the Montauk among the schooners, and she beat the Halcyon fairly and squarely; she needs wind, however, and in very light weather does not go as well as some of the others. It is, however, admitted by all that she is the fastest schooner that we have, and the problem set before our builders at present is, to turn out something that will beat her. The coming schooner is to be of iron or steel, and such a one will be built, probably next season, by Mr. Busk, of the Mischief. As one of the results of the present extremely successful cruise, we may look forward, next season, for more new vessels than have been added to the fleet in one year for a very long time.

Elmo.

DANVILLE, Cal., Aug. 27.

BREEDER AND SPORTSMAN, 508 Montgomery St. Dear Editor: I noticed in your last issue the cut of the celebrated stallion Elmo, as one of the notable horses of California; and his breeding is such that you are right in calling him a notable horse, and to do him justice it would take two pages of your valuable paper.

Elmo has never shown to the public yet his greatest speed and power; this I know myself, for I have been in the stable with him for six long years, and in this time have rubbed him and driven him. You say that a former owner, Mr. Van Giesen, informed you that he had timed him quarters in thirty seconds; this I do not doubt in the least. I once saw him and Rosalind work together; Elmo started four lengths behind, the mile was in 2:22; Elmo closed this gap in the last quarter and you could not decide which was ahead at the wire. Dan Mace was on the back stretch timing them; and as soon as possible Mace came around to Elmo's stall. The door was closed and Hickok and myself were in the stall. Dan Mace rapped at the door and Hickok let him in. Mace said: "Orin, that is as fast a horse as I ever saw up to this time." Hickok said: "yes, Mace, he is, and when he is right he can beat Lucy."

Now, dear Editor, let me speak my little piece. When you see such stallions as Electioneer, Seba, Echo, Santa Claus, Whipple's Hambletonian, Bigadier, Piedmont, Cook's Hambletonian, or any good Hambletonian horse served to Elmo mares, seven out of ten will beat 2:30, and if some of his get was worked and the same attention paid them as others get on this coast, you would see some of them stay in a race from one o'clock until six in the evening, and no time give it up, and that is the kind to have in a race.

We have a large five-year-old mare on this farm that never had over two months' fast work in her life all together, and never was handled by a professional driver, and she has trotted a mile over a bad copy track in 2:32, and the last half in 1:14, and she would have gone on another mile faster. It was hard to pull her up at the quarter pole. This mare met with a slight accident when three years old, and she is so growthy that she requires age. I know that Elmo's dam is claimed to be by Sir Richard. When I was in Paris, Ky., I met a man by the name of H. W. Eness, Bourbon House, that knew Elmo's dam, and said that she was owned at that time forty miles from Paris, and that she was by Grey Eagle. Your readers can see that the Mohawk family is coming fast in the 2:20 list. Overman's record of 2:20½, and Yellow Dock, by Clark's Mohawk Jr. he by Mohawk, the sire of Elmo. Yellow Dock's record 2:20½. I look upon Elmo mares bred to Hambletonian stallions as great brood mares.

I notice that you mention Almont as being on this coast. We have on this farm a bay mare by Almont, dam by Mambrino Prince, a son of Mambrino Chief, second dam Cripple, a son of Medoc, third dam by American Eclipse. Yours truly,

SAMUEL GAMBLE.

THE KENNEL.

Buy your Dogs at Home.

As the shooting season approaches, the importance of that indispensable adjunct to a sportsman's pleasure—a capable well trained dog—becomes more and more apparent and to such as do not possess this essential the all-absorbing question is how to get one. A simple solution of that important question can be found to a limited extent in the advertising columns of this paper where the notice of sportsmen is called to some thoroughbred Llewellyn setters for sale on reasonable terms. Some local shooters seem to hold the belief that a good dog cannot be obtained except in the east and will pass over a dog raised near home and offered for a low rate to purchase an inferior animal from the east at an abominably high price.

Rather than trust their next door neighbor they will be duped by a lengthy pedigree of high sounding titles, backed up by columns of turgid prosaic and fictitious exploits in the eastern sporting journals. The writer has seen many dogs imported from the east baying the best of blood in their veins, yet almost useless to a hard working hunter. The writer has seen a number of these dogs brought from widely advertised eastern kennels, and they all appeared to have the serious faults of softness and lack of courage. Perhaps both of these faults arise from too much breeding into a fashionable strain, but sure it is that, from some cause or other, the fact is as stated. Such dogs may make a decent showing at a field trial run on fairly even ground, but in the hills and gulches, under a hot sun and with but little water they cannot do the work demanded by a California sportsman, and beside such a dog as J. K. Orr's old Gordon bitch, which has found game and retrieved for himself and Bogardus, who at the end of the day had 125 quail to show for their work, would cut but a poor figure. For duck retrieving, such dogs are worse than useless. They cannot and will not stand the hard work and cold water, and really for such work, where but little intelligence is required, a coarse, ordinary kind of dog is better than a fine bred animal.

Canadian Kennel Club.

Public notice has been given of the issuance of letters patent, bearing date July 24, 1882, incorporating the Dominion of Canada Kennel Club (limited) with Mr. Lindsay Russell of Ottawa, as President; and Mr. B. H. G. Vicars, of Ottawa, as Secretary and Treasurer. The capital stock of the club is \$4,000. The following is a list of the provisional Directors of the club. Lindsay Russell, Ottawa; Z. A. Lash, Toronto; Lieut.-Gov. Dewdney; A. O. F. Coleman, V. S., Ottawa; Dr. Nevil, London, Ont.; F. P. Austin, Ottawa; C. V. M. Temple, Quebec; John Gilmore, Ottawa; F. H. D. Veith, Halifax; W. A. Allen, Ottawa; E. F. Stephenson, Winnipeg; H. Bailey Harrison, Tilsonburg; Christopher Robinson, Q. C., Toronto; Alonzo Wright, M. P., Ironsides; Hon. A. P. Caron, Ottawa; D. C. Plumb, Niagara; B. H. V. Vicars, Ottawa, provincial Secretary and Treasurer.

The national objects of the club are to encourage, throughout the whole Dominion, the importation, sale, breeding, training and exchange of highly bred dogs of all classes; to compile and publish a national stud book, in which dogs of every breed whelped or owned in the Dominion can be registered; to endeavor to secure such legislation as will protect the game of the country, and assist in the enforcement of existing laws having that object in view; generally to assist in the conviction and punishment of persons guilty of cruelty to animals, more especially the dog, and the various kinds of game; to encourage public exhibitions of dogs, such as bench shows and field trials; to encourage legitimate sport generally. The first general meeting of the shareholders will be held in the Russell House, Ottawa, Sept. 11, 1882, at 7:30 p. m., for the election of directors, and the transaction of other business.

A Fresh Importation.

By Monday's overland train via the southern route there arrived in this city, consigned to Charles N. Post, Deputy Supreme Court Clerk, two thoroughbred Llewellyn setter puppies from the well known kennel of Arnold Burgess, at Hillsdale, Michigan. The brace comprises a dog and bitch ("Dandy Berwyn" and "Chispa"), the latter to be forwarded to John B. Martin, San Francisco. In color they are snow-white with lemon ticks. These puppies were sired by Dashing Berwyn, out of Queen Dido, the former being by Dash II., for whom Mr. Llewellyn paid \$1,650 (which is said to be the highest price ever paid for a setter) and out of Countess Bear, whom that gentleman sold to the Mountview Kennel Club, of Tennessee. When that club disorganized he bought her again for \$890 and took her back to England. Dashing Berwyn has one litter brother and two litter sisters in England—Dashing Boudhu, which won the English all-aged stakes in 1881, when only fourteen months old; and one of whose sons, Sable Boudhu, won this year's Derby; Dashing Beauty, which won the Derby in 1881, and Dashing Bear, which won the first prize for English setter bitches at the Alexandria bench show in 1881. Queen Dido was sired by Druid, which dog has the best foreign field trial record of any dog now in America, and for whom Mr. Burgess paid Mr. Llewellyn \$500, and out of Nilsson (little sister of Champion Queen Mab) which also cost Mr. Burgess \$500 in England. These are the puppies alluded to by Mr. Burgess in the *American Field* of July 22d, wherein he stated that they would these point scent staunchly, although not three months old.—*Sacramento Bee*.

Cattle by Thousands.

The Reno (Oregon) *Gazette* in speaking of the cattle interests of that State says: "W. B. Todhunter branded last spring over 9,000 calves, and has sent to market this season 6,000 beef cattle. These figures prove Mr. Todhunter to be the largest stockraiser in the country. There are others who send more cattle to the market, but they buy them instead of raising them. He has over 20,000 head of stock cattle and over 100,000 acres of patented land. He got patents last month for 35,000 acres of swamp land in one bunch. He has about 1,000 bulls and 300 saddle horses. He employs fifty men, and puts up 25,000 tons of hay to guard against hard winters. He keeps 100 work horses, and raises enough grain to feed all his saddle and work stock. Besides his cattle, he has 700 or 800 stock horses, four jacks and fifty stallions. His stock is divided among five ranches—one known as the White House Ranch, lying just inside the Oregon line, where 5,000 head are kept; one in Long Valley, in the northwestern corner of Nevada, lying alongside of Surprise, supports 4,000 head; the Pyramid Ranch, lying at the northeastern corner of the lake, has 1,500 head and a lot of horses; the Abbott Ranch, at Steen's Mountain, feeds about 5,000, and Harney Valley about 5,000 more. The home ranch is about 25 miles from a neighbor.

EASTERN FOX HUNTERS.—The first meet of the fox-hunting season took place Friday afternoon, Aug. 11th, at Bryers', Near Newport, Rhode Island. Mr. F. Gray Griswold acted as master, and Peter Smith took the position of first whip. Among those who assembled at the meet may be mentioned Mr. August Belmont, Miss Lorillard, Mrs. Martin Vanburen, Mr. and Mrs. Cornelius Vanderbilt, Mrs. James R. Keene, Gen. McKeever, Col. G. H. Waring and others. A large field participated in the hunt, including such prominent names as Mr. Pierre Lorillard, Jr., Mr. N. G. Lorillard, Mr. Geo. Stevens, Mr. Charles Carroll, Miss Emily Havemeyer, Mr. Center Hitchcock, Miss Norman, Mr. Lloyd S. Bryce, Miss Hewitt, Mr. R. Belmont, Mr. Foxhall Keene, Mr. F. R. Appleton, Mr. Geo. S. Brown, of Baltimore, and Mr. Waterbury. The run occupied sixty minutes, and was one of the fastest on record in the annals of the Queens County Hunt. Messrs.

Belmont and Bryce sustained a fall each, but neither was seriously injured. Finally the fox was run into the open, and a fair number of riders were in at the death. The brush was awarded to Miss Havemeyer, while the pads were given to Master Baldwin, a young huntsman of rare promise, and Mr. W. C. Witherbee. The run was not only very fast, but exciting, and will be long remembered by those who participated.—*Turf, Field and Farm.*

Points of the Scotch Terrier.

After much reflection and frequent consultation with leading breeders, Mr. Vero Shaw has formulated the following new scale of points for judging the hard-haired Scotch Terrier:

Skull—(value 5) proportionately long, slightly domed, and covered with short hard hair about three-fourths inch long, or less. It should not be quite flat, as there should be a sort of stop, or drop, between the eyes.

Muzzle—(5) very powerful, and gradually tapering toward the nose, which should always be black and of a good size. The jaws should be perfectly level and the teeth square, though the nose projects somewhat over the mouth, which gives the impression of the upper jaw being longer than the under one.

Eyes—(5) set wide apart, of a dark brown or hazel color; small, piercing, very bright, and rather sunken.

Ears—(10) very small, prick or half prick, (the former is preferable,) but never drop. They should also be sharp pointed, and the hair on them should not be long, but velvety, and they should not be cut. The ears should be free from any fringe at the top.

Neck—(5) short, thick and muscular; strongly set on sloping shoulders.

Chest—(5) broad in comparison to the size of the dog and proportionately deep.

Body—(10) of moderate length, not so long as a Skye's, and rather flat sided; but well ribbed up, and exceedingly strong in hindquarters.

Legs and Feet—(10), both fore and hind legs, should be short, and very heavy in bone, the former being straight, or slightly bent, and well set on under the body, as the Scotch terrier should not be out at elbow. The hocks should be bent and the thighs very muscular; and the feet strong, small, and thickly covered with short hair, the fore feet being larger than the hind ones, and well let down on the ground.

The tail—(2½) which is never cut, should be about seven inches long, carried with a slight bend, and often gaily.

The Coat—(20) should be rather short (about two inches), intensely hard and wiry in texture, and very dense all over the body.

Size—(10)—about fourteen pounds. Eighteen pounds for a dog, thirteen pounds to seventeen pounds for a bitch.

Color—(21) steel or iron grey, brindle, black, red, wheaten, and even yellow or mustard color. It may be observed that mustard, black and red are not usually so popular as the other colors. White markings are most objectionable.

General Appearance—(10), the face should wear a very sharp, bright, and active expression, and the head should be carried up. The dog (owing to the shortness of his coat) should appear to be higher on the legs than he really is; but, at the same time, he should look compact, and possessed of great muscle in his hind quarters. In fact, a Scotch terrier, though essentially a terrier, cannot be too powerfully put together. He should be from about 9 inches to 12 inches in height, and should have the appearance of being higher on the hind legs than on the fore.

Mr. Shaw also specifies the following faults:

Muzzle—either under or over-hung.

Eyes—large or light-colored.

Ears—large, round at the points, or drop. It is also a fault if they are too heavily covered with hair.

Coat—Any silkiness, wave, or tendency to curl is a serious blemish, as is also an open coat.

Size—Specimens over eighteen pounds should not be encouraged.

As an evidence of the popular interest felt in the dog and his development among Englishmen, the number of dog shows held in Britain may be cited. During the last week in July no less than nine dog shows were held at various points in the British Islands, namely, at Darlington, Chesterfield, Barmley, Stockton-on-Tees, Pickering, Newport, Frizington, Pembroke and Glasgow.

COURSING MATCH.—Mark Devlin's well known dog Chief of the Canyon and W. Bird's Blue Cloud ran a match at Newark last Thursday in the presence of quite a large gathering of spectators. Game was easily found and good runs were had resulting in favor of Mark Devlin's dog. The match was decided too late to give particulars in this issue.

CHAMPION SETTER FOR SALE.—It is understood that Calvert Meade is willing to dispose of his celebrated Irish setter dog Dick, who took the first prize for Irish setters at the last bench show, held in this city. Dick is a grand looking, well upstanding dog, without a noticeable fault, and is said to be as good a field dog as he is good looking.

No Dog Show.—The season is now so near that it is almost certain that all intention to hold a bench show this year has been abandoned. With all the setters, pointers and greyhounds either in the field or in training there would be little material left with which to make a dog show.

WELL BRED PUPS.—Crittenden Robinson has a well bred Irish setter pup about eight months old and a Llewellyn setter pup about seven months old which he will work on quail as soon as the season opens. They are already broke to heel, draw, and charge.

GREYHOUND PUPS.—The greyhound pups belonging to Mr. Keating out of his fawn bitch by the well known black dog Fides are remarkably well advanced and promise to make things lively next spring.

John K. Orr, Harry Babcock, P. McShane, Henry L. Fox, Mat Fuller, C. P. Gordon, Howard Black, S. B. Wakefield and F. F. Butler, members of the "Gun Club" had a grand dinner at the Maison Dore last Saturday, after their shoot at Bird's Point. The affair was a very enjoyable one, and several important subjects were discussed in relation to the gunning and fishing interests of the coast.

Three Chinamen were convicted and fined \$50 or 50 days in the county jail for trapping quail at Suisun, Napa county, this week.

The Alameda County Sportsman's Club hold their last shoot of the season to-day at Bird's Point.

The Pacific Club shoots to-morrow (Sunday) at Bird's Point, for the last time this season.

FISH.

A Novel Style of Fishing.

Excise Commissioner William P. Mitchell and a few friends with their families are together at Bath, L. I. Among the boarders in the house is a Japanese student. He is a neat, bright, good-natured young man, and appears anxious to learn the ways of Americans. Commissioner Mitchell and friends have been playing tricks on the Japanese student. Not long ago they got up a game of base-ball. They kept the "Jap," as they called him, at the bat, by refusing or purposefully failing to catch him out, and he ran around the bases all the afternoon. Next day the muscles of his legs were so sore he had to remain in bed. When he reappeared he climbed up a tree to look at young owls in a nest and discovered rotten apples.

One morning lately "Jap," while out rowing, came across a multitude of fish of all sizes and varieties floundering in the water. They showed their fins and appeared to keep within a certain space. The "Jap" thought he had struck a fish bouanza, and he resolved to keep his "find" a secret.

That afternoon Commissioner Nichols and a number of the boarders were walking along the shore, talking about fishing. The "Jap" said it was cruel and unfair to catch fish with hook, line and bait. "In Japan we catch them with our hands," he exclaimed, in good English. All his hearers, with the exception of Alderman Strack, were astonished; the alderman said he had read about Japanese diving into the water and chasing and catching fish just as fish-hawks do. "I will show you," ejaculated the Jap, "how to catch fish without hooks," and he got into a boat and rowed out about two hundred yards. He pitched the anchor over and pulled off his coat, vest and shirt. He was next seen to lie down in the boat, while he peeped carefully over the sides. Every now and then he would plunge his right hand into the water and would haul up a fish. "Look at him," yelled Commissioner Mitchell, "he is catching fish with his hands, by thunder!" The "Jap" continued "yanking" up the fish for over half an hour, much to the amazement of the boarders on the shore. When he rowed in, the boat contained fifty fish of all kinds. "That's the way we catch fish in Japan," he remarked, as he pulled the boat on the sands. Commissioner Mitchell had nothing to say, and Alderman Strack said that the "Jap" must have mesmerized the fish as they swam by.

That evening the boarders were on the balcony of the house, listening to versions of the fishing exploit, when the path gate was violently swung open, and a big Irishman in a blue shirt swaggered up and wanted to know "Who in— had been robbing his fish-pond? Do you suppose," he yelled, "that I catch fish and put them in a pond to furnish this ere shebang with? If you New Yorkers want fresh fish, go and catch 'em, or else pay for 'em. Who robbed my pond, that's what I'm after knowin'?" The "Jap" was pointed out, and he paid for his spoils very meekly. "You see," explained Mitchell, "he didn't know the fish were yours—he thought he'd found a nest of them."—*New York World.*

John Brown, Queen Victoria's servant, has received from her the sole right of fishing on the river between Invercauld Bridge and Balmoral Bridge. One day he landed fourteen fine salmon for the royal table, but still an expensive luxury when it is stated that her majesty pays \$1500 a year for the rental of this part of the stream. The Princess Louise is an expert at angling, but she will scarcely find on this coast the sport for which Scottish and Canadian rivers are so famous, as our salmon will rarely rise to the fly.

A fly casting tournament, open to the anglers of the United States and Canada, is to be held in New York city during September. The management of the contest will be in the hands of Mr. Frederick Mather, Assistant United States Fish Commissioner. As yet the arrangements are not complete, but the Park Commissioners will be applied to for permission to allow the competition to be held on one of the ponds in Central Park.

A fly casting tournament, open to the anglers of the United States and Canada is to be held in New York during September. The management of the contest will be in the hands of Mr. Frederick Mather, Assistant United States Fish Commissioner. As yet the arrangements are not complete, but the Park Commissioners will be applied to for permission to allow the competition to be held on one of the ponds in Central Park.

The average catch of salmon in the seine before the State added to the number by artificial hatching was five million pounds. Under the present law the fish have so increased that the annual catch has more than doubled. The law is often violated by many unscrupulous men, and it is not an easy matter to correct them.

The striped bass, which the Fish Commissioners tried to introduce here, is a valuable fish of the Atlantic Coast, that is very game and supplies a large amount of food to the people of the Eastern States.

For all that this is the close season, salmon have been served on the hotel tables at Petaluma during the week of the Fair. They are purchased of fishermen from Tomales and the Sacramento River.

ATHLETIC.

GEORGE BREAKS OTHER RECORDS.—Among the notable things done at the London Midland Athletic Club's sports, held at Stamford Bridge Grounds, London, England, July 28, was W. G. George's wonderful two-mile run, which beats anything done by any amateur. The race which brought about this wonderful piece of running, was won by H. W. Cross (385 yards start). George started from scratch, finished second, 4 2-58 behind the winner. George's time for each quarter of a mile is:

Miles	M.	S.	Miles	M.	S.	Miles	M.	S.
1/4	1	15	1/2	2	25	3/4	3	35
1/2	2	7	1	5	1	1	10	45
3/4	3	18	1 1/4	5	11	1 1/2	6	57
1	4	55	1 1/4	5	11	1 1/2	6	57

† Denotes fastest amateur time on record. ‡ Fastest English time, Myers having run 1,000 yards in 2m 13s.

OLYMPIC CLUB REGULAR TICKET.—For President, J. H. Jennings; Vice President, Martin J. Flavin; Treasurer, H. B. Russ; Secretary, R. S. Polastri; Leader, H. B. Cook. For Directors: J. B. Stetson, C. W. Platt, Joseph Lyons, W. C. Brown, Wm. Levison, Ed. A. Givring. Members' Independent Ticket: for President, Jas. H. Jennings, Vice President, Samuel Foster; Treasurer, H. B. Russ; Secretary, R. S. Polastri; Leader, H. B. Russ. For Directors: J. B. Stetson, C. W. Platt, Chas. S. Neal, Wm. C. Brown, W. F. Bouton, Thomas Pennell. The election takes place on Monday, Sept. 4th. Polls open from 2 to 9 p.m.

Market Report.

FLOUR—Is in good supply and rates are somewhat easier than those of last week. We quote Best City Extra, \$5 37½ @ \$5 50; Superfine, \$4 50 @ \$4 75; Interior Extra, \$4 75 @ \$5 25; Interior Superfine, \$3 75 @ \$4 75 bbl.

WHEAT—Is quiet. Some few parcels of mixed No. 1 and 2 shipping are reported as having changed hands at \$1 65 @ \$1 67½, the latter an extreme price. Yesterday opened the new year and if transactions are yet somewhat light, there is every appearance of a large business for the coming season.

BARLEY—Operators were too busy in making August deliveries to give much heed to new business. Small sales of coast feed are reported at \$1 28, though \$1 30 is the general asking figure. On November account sales were made on the 31st 200 tons No. 1 feed at \$1 26½ and 300 do at \$1 26½ ctl.

OATS—No heavy orders on the market. Sales are affected in a quiet way in jobbing quantities at a range of \$1 55 @ \$1 75 ctl. Market weak and declining.

RYE—The best bid on Thursday for September delivery was \$1 90 ctl. Sellers would not name a price.

GROUND BARLEY—Fair trade. Quotable at \$30 @ \$31 75 ton.

BUCKWHEAT—Nominally quotable at \$1 40 to \$1 50 ctl.

CRACKED CORN—Business not urgent. Quotable at \$38 75 ton.

SHORTS—Sellers are asking \$17 @ \$18 75 ton.

MIDDLINGS—Quotable at \$26 @ \$28 75 ton for lots at mill.

OILCAKE MEAL—The oil works sell to the trade at \$32 50 75 ton, less usual discount.

HAY—We quote: Alfalfa, \$11 @ \$13 50. Wheat, \$13 @ \$15 50; Wild Oat, \$12 @ \$15 50 75 ton.

STRAW—Quotable at 55 @ 60c bale.

HOPS—Local operators are paying from 40c to 50c 75 lb for good to choice.

SEEDS—We quote: Mustard, \$2 50 @ \$2 62½ for brown and \$1 90 @ \$2 for yellow; Canary, 5 @ 5½c; Hemp, 6c; Rape 2½ @ 3c; Timothy, 7 @ 8c for native, and 9 @ 10c for imported; Alfalfa, 10 @ 12½c; Flax, 2½ @ 2¾ 75 lb.

CORNMEAL—Local millers quote feed at \$34 to \$36 75 ton; fine kinds for the table in large and small packages, 3c 75 lb.

POTATOES—Receipts are fairly liberal, but stocks are kept low by constant good custom. Wharf rates are as follows: Early Rose, in sacks, 60 @ 85c; boxes 80c @ \$1; Garnet Chile, 90c @ \$1 per ctl; Sweet, \$2 12½ @ \$2 37½ per ctl.

ONIONS—Slow of sale. Quotable 50 @ 70c per ctl. for Silverskins and 30 @ 40 per sack for Red.

BEANS—Market weak. We quote prices for job lots as follows: Bayos, \$2 50 @ 2 60; Butter, \$3 50 @ \$3 75 for small and \$4 for large; Lima, \$3 75 @ \$4; Pea, \$3 50 @ \$3 75; Pink, \$2 40 @ \$2 45; Red, \$2 40 @ \$2 45; small White, \$3 50 @ \$3 75; large White, \$3 @ \$3 50 75 ctl.

VEGETABLES—Low prices continue to rule. Tomatoes are being dumped daily. We quote job lots as follows: Marrowfat squash, \$7 @ \$10 75 ton; Artichokes, 10c 75 dozen; Parsnips, 75c; Beets, 75c; Carrots, 75c; Turnips, 75c @ \$1 75 ctl; Cauliflower, 60 @ 65c 75 dozen; Cabbage, 50 @ 75c 75 ctl; Garlic, 1 @ 1½c 75 lb; Cucumbers, 15 @ 30c 75 box; Green Peas, 2 @ 3c 75 lb; Green Peppers, 50 @ 75c 75 box; Tomatoes 15 @ 30c 75 box; Spinach, 25c 75 sack; Celery, 50c 75 dozen; Summer Squash, 30 to 50c 75 box; String Beans, 3c 75 lb; Green Corn 5 @ 10c 75 dozen; Okra, 50 @ 75c; Egg Plant, 50 @ 75c 75 box.

FRUIT—Peaches are in good demand, and stocks kept well cleaned up. Grapes are also in favor. Apples 25 @ 50c 75 basket and 50 @ \$1 75 box; Pears, 25 @ 40c 75 basket and 40 @ 60c 75 box; Bartlett do, 50 @ 75c 75 basket and \$1 @ \$1 50 75 box; Nectarines, 75c @ \$1 75 box; Strawberries, \$10 @ 12; Raspberries, \$10 @ \$12 75 chest; Peaches, 35c to \$1 75 box, and 30 @ 60c 75 basket for common and 75c @ \$1 75 basket for choice; Figs, 40 @ 75c 75 box; Grapes, 35 @ 50c for common, 50 @ 75c for Black Hamburg, 50 @ 75c for Rose of Peru, and 50 @ 80c 75 box for Muscat; Plums, 25 @ 75c 75 box; Blackberries, \$4 @ \$5 75 chest; Watermelons, \$3 50 @ \$8 75 hundred; Cantaloupes, 50c @ \$1 75 crate; Lemons, \$8 @ 9 75 box for Sicily and 50c @ \$1 for California; Limes, \$10 @ \$11 75 box for Mexican; Tamarinds, 12 @ 15c 75 lb; Bananas, \$2 @ \$3 50 per bunch; Pine-apples, \$6 @ \$8 per dozen; Tahiti Oranges, \$35 @ \$45 per thousand.

WOOL—The market continues to present an easy tone. Humboldt and Mendocino, 25 @ 26½c. Sonoma, 14 @ 26c. Siskiyou and Modoc, 20 @ 25c. San Joaquin, free 27 @ 18c. San Joaquin, defective 15 @ 16½c. Southern Coast, burry and egon, poor 18 @ 19c. Valley Oregon, fine 25 @ 27. Valley Orseddy 15 @ 17c. Eastern Oregon, choice 23 to 24c. Eastern Oregon, coarse 23 @ 24c.

HIDES AND SKINS—Values well maintained. Dealers are paying the following cash rates for lots in order: Dry Hides, usual selection, 20 @ 20½; culls one-third less, and Mexican hides 1c. 75 lb less, Dry Kip, 18 @ 19c; Salted Kip, 25 to 30 lbs, 10c to 10½c; Salted Calf, 11 to 12½c per lb; Dairy Calf, 65c to 70c each; Sheep Skins, 20 to 25c for Shearlings, 25 to 50c for short, 60 to 80c for medium, and 75c to \$1 apiece for long wool and wool skins. Butchertown Green Skins bring higher prices.

Following are rates for whole carcasses from slaughterers to dealers:

BEEF—Prime, 7½ to 8c; medium grades, 6½c to 7c; inferior, 5½ to 6c per lb.

VEAL—Large Calves, 6½ to 7c; small ones, 8 to 10c per lb.

MUTTON—Wethers are quotable at 4½ to 5c and Ewes at 4 to 4½c per lb, according to quality.

LAMB—Quotable at 6 to 6½c per lb.

PORK—Live Hogs, 7½ to 8c for hard and 7c to 7½c for soft; dressed do, 10½ to 11c per lb for hard grain hogs.

CHEESE—There is no change in the situation. Market easy. We quote jobbing lots as follows: California, 12½ @ 13½c for choice; 10 @ 12c for fair to good; do. factory, in boxes, 15 @ 16c; Eastern, 16 @ 17c; Western, 11 @ 13½c per lb.

EGGS—Many holders have been asking 40c today, and some few box lots changed hands at this figure. Invoice parcels generally sell at our range: California, choice, 35 @ 38½c; Interior, 30 @ 34c; Western, 22½ @ 27½c per dozen.

PROVISIONS—Market, firm: Eastern Hams, 17½ @ 18½c; California Hams, 16½ @ 16½c for plain, 16½ @ 17c for sugar cured unsmoked; Eastern Breakfast Bacon, 17½ @ 18c; California Smoked Bacon, 16½ to 17c for heavy and medium, and 17½ to 18c for light and extra light; Clear Sides, 16½ to 16½c; Pork \$21 50 to \$22 for Extra Prime, \$24 to \$25 for Prime Mess, \$25 to \$25 50 for Mess, \$27 for Clear and \$28 to \$28 50 for Extra Clear; Pigs' Feet, \$16 to \$18 per bbl; Mess Beef, \$14 for bbls and \$7 for lb bbls; Extra Mess Beef, \$14 50 to \$15; Family Beef, \$16 to \$16 50 per bbl; California Smoked Beef, 14½ to 14½c per lb; Beef Tongues, \$9 50 to \$10 per doz; Eastern Lard, 15½c for tierces and 16½ to 17c per lb for pails; California do, 10-lb tins, 14 to 15c; 5-lb tins, 15 to 15½c; pails, 16 to 16½c; kegs, 15 to 15½c; Royal do, 16½ to 16½c for 10-lb, 16½ to 16½ for 5-lb and 16½ to 17c per lb for 3-lb pails.

POULTRY.

Fowls in Orchards.

Nothing is more reasonable to conclude than that if we allow our fowls the range of the orchard they will in a great measure, if not thoroughly destroy the worms and to her injurious insects that infest the trees. Presuming that it is generally understood that hen manure is one of the most powerful of fertilizers, by following out our suggestions it will be readily conceived that two, if not three material advantages are to be realized. This whole subject is based upon the idea that there are, no chicken thieves in the neighborhood, or if there are that there are good dogs and shot-guns within reasonable distance. Set four stakes in the ground three feet from the trees, nailing slats to them, beginning three feet from the ground, for the fowls to roost on. This is done in order that the droppings may be left close to the trunk, for two reasons; first, that the roots may receive the benefit of the manure; second, the droppings are so strong that it is offensive to all kinds of worms that crawl on the ground, and will tend to prevent their approaching the trees. It is in our opinion that during the spring, summer and fall months fowls are benefitted by being allowed to roost in the open air, especially in this country, where we have but little rain from May to October.—*Resources of Oregon and Washington.*

ROWING.

SAN FRANCISCO, Aug. 30.

EDITOR BREEDER AND SPORTSMAN: Please be obliging enough to publish this article in your next issue.

The first barge crew of the South End Boat Club intend to compete for The Breeder and Sportsman's trophy to be rowed for upon Thanksgiving Day. As this is a new crew it would please us to try our muscular and physical strength with the supposed champion four-oared barge crew of this coast, the "Golden Gates," so that we could take a little pride out of them.

If the "Golden Gates" think they can take that trophy from the "South Ends" without perspiring pretty freely, they will be very badly mistaken on that Thanksgiving afternoon; and if they have not game enough to compete against us, it will be plainly seen that Griffin and Brown do not row for pleasure or the healthfulness derived from rowing, but for the love of money. Yours truly,
WILLIAM THOMAS,
Captain of "South End" crew.

Cattle in Nevada.

It is estimated that 40,000 and perhaps 50,000 head of stock cattle will be taken out of Nevada this year. Ora Haley, of Laramie, has bought the Ritchie & Barnum herd of about 2,000 head. He is shipping east now from Iron Point. Russel & Bradley have made one drive of over 5,000 head, and L. Filmore will ship from Wells and Winnemucca over 2,500 head McCormick & Keogh Bros. will send out about 5,000 head, from the southeastern part of the State mostly. Lieutenant-Governor Adams is driving out everything but cows and calves to the number of probably 2,500 head. It is said his entire herd will be taken over inside of two years, and Nye county will know him no more. Sparks & Tennon will take 7,000 head from north of the Wells. Hammond of Cheyenne, and others from Wyoming are buying and all they can get will go to Wyoming, and eventually find their way to Chicago. This is beside the natural shipments of fat cattle which will go to San Francisco for beef. It is thought that Nevada is being depleted too much and that it will take several years to fill up again to the capacity of the feed. The late rains have filled the country with feed and the State loses wealth by not having cattle to eat it up. Cattle men say that Nevada is far superior to Wyoming as a breeding country, but Wyoming excels in fattening properties. The climate here is milder but the feed there is richer and better. Some think it would pay to breed in Nevada and ship Wyearling and two-year olds toyoming to fatten.

Dorrance will offer a set of choice track harness, valued at \$65, for the horse owned in the District that makes the fastest trotting record at the Stockton Fair. He also offers a \$25-jockey saddle to the horse that makes the fastest running mile record owned in the District at the Fair.
Irving Ayres, owner of Mambrino Wilkes, offers a special premium at our Fair, a silver tea-set and waiter, for the best two-year-old colt sired by the above horse. Also, for the second best colt, a silver water pitcher. The colts to be shown at the Stockton Fair.

REMARKS AND CONDITIONS.

All Trotting Races best three in five, except numbers 2 and 9.
In all these Races (Pacific Coast Novelty Race excepted) FOUR moneys, 50, 25, 15 and 10 per cent. of purse.
When there are eight or more to start in a Trotting Race, 15 yards shall be a distance.
Rules of the National Trotting Association to govern trotting, except as specified; but the Board of Managers reserve the right to trot heats of any two classes alternately, or to start a special race between heats.
All two-year-olds, when running in their classes, shall carry 100 pounds, with the usual allowance for mares and geldings.
All three-year-olds, when running in their classes, to carry 110 pounds, with the usual allowances as above; otherwise, old weights to govern.
For a walk-over in any race a horse shall only be entitled to his own entrance fee and one quarter of the entrance received from the other entries for said purse; and a horse winning a race entitled to first money only, except when distancing the field, then entitled to first and third moneys only. A horse wins but one money under any other circumstances.
Horses entered in purses can only be drawn by consent of the Judges.
The Board reserves the right to change the day and hour of any race, if they deem it necessary.
Rules of the Pacific Coast Blood Horse Association to govern Running Races, including additions to rules, except as especially provided.
In all Running Races colors to be worn by riders, and in all other races, any other particulars that will enable spectators to distinguish the horses in the race.
Races to commence each day at 1 o'clock P. M. sharp.
The track is first-class, having been improved. Stables hay and straw free to competitors.

L. O. SHIPPEE, President.

J. L. PHELPS, Secretary.

REMARKS AND CONDITIONS.

All trotting races are the three best in five, unless otherwise specified, three to enter and two to start. Entrance fee, 10 per cent. on purse, to accompany nomi-

nation. Purses divided at the rate of 60 per cent. to first horse, 30 per cent. to second, and 10 per cent. to third.
All running purses to be divided, two-thirds to the first horse and one-third to the second horse; four to enter and two to start, except race No. 11, three to enter and two to start.
National Association Rules to govern trotting; but the Board reserves the right to trot heats of any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats.
Two fill running races, four or more subscribers are necessary.

All the two-year-olds, when running in their classes, shall carry 100 pounds, with the usual allowance for mares and geldings.

All three-year-olds, when running in their classes, to carry 110 pounds, with the usual allowance as above.

No added money for a walk-over.

Horses entered in purses can only be drawn by consent of the Judges.

Rules of the Pacific Coast Blood Horse Association (old weights) to govern running races, except when conditions named are otherwise.

All entries made in writing, giving name, sex, color and marks of horses; also, name and residence of owner.

In running races, full colors to be worn by rider; and drivers of trotters are respectfully requested to wear caps of distinct colors, to be named in their entries, as their horses will be designated upon programmes by the colors worn by drivers.

Entries to all the above races to close with the Secretary on Saturday, Sept. 30, 1882.

Write "Entrance to Races" on outside of envelope.

NOTE—"Exile" is barred from trotting races 1, 2 and 8.

G. J. BARETTO, President.

R. H. HEWITT, Secretary.

REMARKS AND CONDITIONS.

All trotting and pacing races are the best three in five, except the two-year-old trot, unless otherwise specified; five to enter and three to start. Entrance fee ten per cent on purse, to accompany nominations. Purse divided at the rate of sixty per cent to first horse, thirty per cent to second and ten per cent to third.
National Association Rules to govern trotting; but the Board reserves the right to trot heats of any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats.
All two-year-olds, when running in their classes, shall carry one hundred pounds, with the usual allowance for mares and geldings.
All three-year-olds, when running in their classes, to carry one hundred and ten pounds, with the usual allow-ances as above.
Those who have nominations in stakes must name to the Secretary, in writing, the horse they will start on Tuesday, on the Monday previous; and on Thursday the Tuesday previous, and on Friday, the Wednesday previous, by twelve o'clock A. M. This rule is obvious, and must be strictly ad-hered to.

No added money paid for a walk-over.

Horses entered in purses can only be drawn by consent of the Judges.

Rules of the Pacific Coast Blood-Horse Association (old weights) to govern running races, except when conditions named are otherwise.

REMARKS AND CONDITIONS.

All trotting and pacing races are the best three in five except the two year old trot, unless otherwise specified; five to enter and three to start. Entrance fee ten per cent. on purse, to company nomination. Purses divided at the rate of sixty per cent. to the winner, thirty per cent. to second, and ten per cent. to third.
 National Association Rules to govern trotting; but the Board reserves the right to trot heats of any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats.
 All two-year-olds, when running in their classes, shall carry one hundred pounds, with the usual allowance for mares and geldings.
 All three-year-olds, when running in their classes, to carry one hundred and ten pounds, with the usual allowances as above.
 Those who have nominations in stakes must name to the Secretary, in writing, the horses they will start on Monday, on the Saturday previous, and on Wednesday the Monday previous, and on Friday the Wednesday previous, by twelve o'clock P. M. This rule is obvious and must be strictly adhered to.
 No added money paid for a walk over.

Horses entered in purses can only be drawn by consent of Judges.
 Rules of the Pacific Coast Blood Horse Association (old weights) to govern running races, except when conditions named are otherwise.
 EDWIN F. SMITH, Secretary. HUGH M. LARUE, President.

Golden Gate Fair.

SPEED PROGRAMME FOR 1882

NOTABLE HORSES OF CALIFORNIA.

ALEXANDER.

The origin of the tribe, clan, family, whatever distinctive appellation is used, to designate the Clays has been partially explained in the histories of horses which have been given in previous numbers. The fountain head proper is Henry Clay, a son of Andrew Jackson, a grandson of the imported Barb Grand Bashaw. A son of Henry Clay, Cassius M. Clay, got Geo. M. Patchen and from this horse have sprung all those which are known as Patchens. The founder of the family was one of the great trotters, and as nearly as can be predicated has the right to be classed with the best. At the time he was performing, the art of training trotters had not been brought to

the perfection of the present day, and his record of 2:23½ made twenty-two years ago is equivalent to several seconds faster in this era of improved tracks, vehicles, manner of treatment, etc. He was one of the grandest trotters ever seen; large and commanding in appearance, his action nearly perfect and with endurance of the highest order. His type has descended with more than ordinary fidelity to the members of the family, and the horse which has been taken for the present illustration carries the inheritance in an eminent degree. The sire of Alexander was Geo. M. Patchen Jr., better known, however, as "California Patchen." He is also

the sire of Sam Purdy (2:20½), Starr King (2:22), San Bruno (2:25½), Susie (2:26½), Vanderlynn (2:27), and several others either in the 2:30 class or very close to it. He was a fine performer, this son of the original Geo. M. Patchen, having a record of 2:27 and showing a slight of speed in some of his private trials which was very nearly at the top notch. According to an advertisement published in 1862, the dam of California Patchen was by Bellfounder, and her dam by Messenger Eclipse. This in all probability is correct, and the dam of Alexander was a mare brought here by Samuel Krim in an early day,

(Concluded on Page 9.)

The Original Morgan's Pedigree.

Woodstock, Vt., Aug. 26, 1882.

EDITOR BREEDER AND SPORTSMAN: The Morgan breed of horses originated or were first bred in Vermont, and the founder of the breed was taken by Justin Morgan when a two-year-old colt, from Springfield, Mass., to Randolph, Vt. The colt in time was called the Morgan horse, and after awhile was given Mr. Morgan's full name. Thus it was the Morgan name was given to this breed or blood of horses. Mr. Morgan, whose name is so intimately connected with the Morgan horse, was born at West Springfield, Mass., in 1747. His father was only able to give him a common education. His health was poor, inclining to consumption, and he was not able to do hard work after he was twenty. He was an excellent penman and a very fine singer, and supported himself mostly by teaching singing, writing and common district schools. At about 30 he was married and the fruits of this marriage were one son and four daughters. The son, named after his father, was born March 15, 1776. It is evident that he took quite an interest in the horse as he owned or kept Sportsman, a gray horse by Lindsey Arabian, from 1779 to 1782. In 1783 he advertizes Dimond. As Dimond is given as the sire of the dam of the horse Justin Morgan, the advertisement is of value, and is here given from the *Massachusetts Gazette* for April 29, 1783:

WILL COVER THIS SEASON AT THE STABLE OF MR. JUSTIN MORGAN in West Springfield, the horse called Dimond, who sprang from a good mare, and from the horse formerly owned by Mr. Church of Springfield. West Springfield, April 29, 1783.

In 1785 Mr. Morgan advertised True Briton, or Beautiful Bay. From the *Hampshire Herald* of May 3, 1875:

THE ELEGANT FULL-BLOODED HORSE BEAUTIFUL BAY WILL cover this season at Justin Morgan's stable in West Springfield at 25s. the season.

True Briton was advertised to stand at John Morgan Jr.'s stable at West Springfield the season of 1788, as early as April 16, and to the season of 1789. The advertisement for 1788 states that "it is the same horse that was kept three seasons ago at West Springfield by Justin Morgan and got so many fine colts in that, this and the neighboring towns."

True Briton was advertised the season of 1791 at East Hartford, Conn. The advertisement is of value and is here given in full:

BEAUTIFUL BAY WILL COVER AT MY STABLE (FOR THE benefit of the public) at 15s. the season, cash or grain next fall, and 9s. the leap, pay down. His sire was the imported horse Traveler, owned in New Jersey. His dam, Delaney's imported racer. Ten pounds was offered for one of his colts at ten days old at Lanesborough, and it is affirmed that he sired sixteen colts in one day at Springfield. He is in his prime, in fine order, bright bay, 15 hand high, trots and canters very light; the price is low and so is the price of shipping horses, one thing ought to be in proportion to another. SELAH NORTON, East Hartford, April 26, 1791.

The above is from the *Connecticut Courant* for May 9, 16 and 23. The *Courant* for June 6, 1791, states: "Beautiful Bay will not cover at East Hartford this season." It must be understood from this, that True Briton made the balance of the season of 1791 at some other place than East Hartford, and as it is stated he did so well at Springfield, he may have been taken there.

March 12, 1788, Mr. Morgan sold his place at West Springfield, which consisted of a horse, barn and two-thirds of an acre of land, to Abner Morgan, for £33, 17 shillings and 6 pence, and removed to Randolph. The month that Mr. Morgan removed to Randolph is not given. It was stated that it was in the spring of 1788. It is claimed he moved on an ox sled. That was the way they mostly moved at that time in Vermont. Some moved on horseback, and some with a wheelbarrow and a hand-sled. The roads were poor and there were no wagons or horses. The horses were mostly used at that time in Vermont by riding them. They were ridden when visits and journeys had to be made, and to the village, the church and the mill. Winters they were harnessed to the sled. As Mr. Morgan's name is not on the tax-list of Randolph for 1788, if he arrived in Randolph on or before the 20th of June, he had no taxable property. At that time all stock excepting sheep were taxed. Clergymen and schoolmasters were exempt from paying a poll-tax, and a person to be taxed must be a resident of the place on the 20th of June. If Mr. Morgan arrived at Randolph after the 20th of June, 1788, his name would not be on the list for that year, if he had taxable property. His daughter Nancy was born at Randolph, Sept. 3, 1788. Mr. Morgan's list in 1789 was three pounds and fifteen shillings, with a deduction of one pound and sixteen shillings; this shows that he may have owned a yearling colt that year. He was chosen Lister this year, and Town Clerk from 1790 to 1793. March 20, 1791, Mr. Morgan's wife Martha died and there can be no doubt but it was in the summer of this year that he visited Springfield, and he made the journey on horseback. He made this visit to get money that was due him in Springfield, and his son says instead of getting money as he expected he had to take two colts, one a two-year-old stud colt, and the other a three-year-old gelding colt. His son said, too, that his father was very much opposed to taking the two-year-old colt, on account of its being so small and scrubby, and it was only after the intervention of the friends of the two parties that he consented to, and a lawsuit was prevented. This is one of the cases that often happen where one has to take against his wish what he don't want, and which turns out in the end a blessing in disguise. Mr. Morgan little thought at the time he did not want to take the little scrubby colt that the colt would be the founder of a breed of horses that would be for a time the popular blood, and that it would be given his name. The fact that Mr. Morgan owned and took the colt to Vermont is all that causes his name to be mentioned at the present time.

Mr. Morgan in taking the colt to Vermont saw so many good qualities in him that he was so taken with him that he informed his friends on arriving home that he was going to keep the colt for a stock horse. This his friends, many of them, advised him not to do on account of his inferior size. In 1791 a law was passed in Vermont that all stallions two years old and upwards should be set in the list for 20 pounds. This fact speaks well for the colt. Mr. Morgan, with his large experience with horses, would not have paid in his limited circumstances this large tax on a horse of low, obscure blood and origin.

In 1792 Mr. Morgan's list was 23 pounds, 13 pounds larger than in 1791. His wife's sickness and death and his going to Springfield must have lessened his property in 1791 several pounds, yet his list the next year is 13 pounds larger. The only reasonable explanation for it is that he was taxed for a stallion in 1792. The following is Mr. Morgan's advertisement

for the Figure horse, from Spooner's *Vermont Journal*, April 15, 1793. The paper was printed at Windsor, Vt.:

WILL COVER THIS SEASON AT CAPTAIN ELIAS BISSELL'S STABLE in Randolph, and at Captain Josiah Cleveland's stable in Lebanon the famous Figure horse, from Hartford, Connecticut, at 15s. for the season if paid down, or 18s. if paid in the fall, in cash or grain at cash prices. Said horse's beauty, strength and activity the subscriber flatters himself the curions will be best satisfied to come and see. Said horse will be in Lebanon the second Monday in May next, there to continue two weeks and then return to Randolph, so to continue at said Cleveland's and Bissell's two weeks at each place through this season. JUSTIN MORGAN, Randolph, April 8, 1793.

This year, 1793, Mr. Morgan sold all of his real estate at Randolph and broke up keeping house. His children were found homes at Randolph. His son's and daughter Emily's home was with Daniel Carpenter. In 1794 Mr. Morgan's list, and the last one he has at Randolph, is just 20 pounds, and there can be no doubt but this 20 pounds is for a stallion. His list for 1793 was 27 pounds, and 8 pounds for 1790. Mr. Morgan advertizes the Figure horse again the season of 1794. The following is the advertisement from Spooner's *Vermont Journal* for April 28, 1792:

THE BEAUTIFUL HORSE, FIGURE, WILL COVER THIS SEASON at the moderate price of \$1 the single leap, \$2 the season, if paid down or by the first of Sept. next; if not paid then it will be 16s. Said horse will be kept at the stable of Ezra Edgerton in Randolph and Lieut. Durkee or E. Stevens in Royalton. He will be kept at Randolph till the second Monday of May, when he will be taken to Royalton, there to be kept every Monday, Tuesday and Wednesday, then return to Randolph where he will continue Thursday, Friday and Saturday, and so alternately during the season. The subscriber flatters himself that the horse's strength, beauty and activity will bear examination by the curions. Constant attention will be paid at each of the above places. JUSTIN MORGAN, Randolph, April 21, 1794.

Without knowing more, it is hard now to say what horse the Figure horse was. He may have been the horse Justin Morgan, but we think not. It is claimed on good authority that the three-year-old gelding colt was a grey stud colt, and was the Figure horse, and was taken north from Randolph. Grey Figure was advertised to stand at Williamstown, Vt., in 1795. The advertisement states that he was six years old, 15½ hands high and sired by old Grey Figure, an imported horse owned by Col. Hart, of Pennsylvania. The Figure horse was in Lebanon the 20th of June, 1793, according to his advertisement, and it must mean Lebanon, N. H. Mr. Morgan did not pay a tax on two stallions at the same time. The United States law that was passed in 1863 taxing stallions \$10 was avoided by many by their saying they did not breed them. It looks more reasonable that the Figure horse was a horse that Mr. Morgan took to keep, the same as he did Dimond and True Briton.

Seventeen hundred and ninety-five is the year that Mr. Morgan Sen. gave in 1842 as the year his father took the original Morgan horse to Vermont. He gave the year 1795 from memory and it was so accepted without any investigation. It is nothing strange that he made a mistake in the year, as he had no data to refer to. He told his son, H. D. Morgan, now of Stockbridge, that he had found that he had made some wrong statements in regard to his father's horse. H. D. Morgan says he understood his father that the horse was taken to Randolph before his father broke up keeping house, and there can be no doubt that he was. Mr. Morgan's means were limited and he needed what was his due at Springfield to do the business he did at Randolph. He did not wait seven years before going after it. The grand lists of Randolph show that he owned no property there after 1794, or before June 30, 1795. Randolph must have been his place of residence after 1794, as it was the home of his children, and it will be shown that his residence was there at the time of his death.

Mr. Linsley states that Mr. Morgan supported himself after he broke up keeping house by teaching. This shows he would not have been encumbered with a stallion. His son said the horse was five years old the spring that his father died. Mr. Weir says that Mr. Morgan did not own the horse at the time of his death and there cannot be much doubt that it was the spring of 1795 that Mr. Morgan sold the horse, and he was five years old at that time. This is why Mr. Morgan's son made the mistake he did. He remembered that there was something done in 1795 in regard to the horse, and gave it that that was the year he was taken to Vermont, when it was the year that his father sold him.

The grand list of Randolph shows that Wm. Rice had a list at Randolph from 1792 to 1797. This shows that he removed to Woodstock in 1796 or 7. Mr. Morgan's son said his father's horse passed into the possession of Mr. Rice. Mr. Morgan died March 22d, 1798. It is stated by some that he died at Woodstock at Wm. Rice's, but the records in the Probate office in regard to Mr. Morgan's estate rather show that he died at Randolph. Spooner's *Vermont Journal* for April 19, 1799, contains the notice for the settlement of Justin Morgan's estate. The first volume of the records at the Probate office for the district of Randolph contains the appraisal of Mr. Morgan's property by the Commissioner at the time of his death. It is stated that the deceased was a resident of Randolph at the time of his death. The amount of property appraised is \$160 13. There is no horse or stock of any kind appraised. A saddle and bridle are appraised \$7; a whip, 17 cents; Bible and Testament, 25 cents; "Scott's Lessons," 30 cents; "Pope Essay on Man," 10 cents; his clothing, \$23.06. The different articles of property are stated. The expense of last sickness is given: Dr. Bissell's bill, \$4.69; Aaron Stearns' bill for nursing, \$1.02. Messrs. Bissell and Stearns were residing at Randolph. A dividend of 18 cents is paid the creditors Nov. 18, 1800.

Mr. Linsley states that Mr. Rice let Robert Evans of Randolph have the horse in 1801 and that he let John Goss have him in 1804, and that Mr. Goss let his brother David at St. Johnsbury have him; that he was taken back to Randolph in 1811 and kept there and in the vicinity until his death. The following advertisement shows that the horse was kept at Randolph the season of 1807. It is from the *Weekly Wanderer* of May 4, 1807. The *Wanderer* was printed at Randolph:

THE MORGAN HORSE WILL STAND THIS SEASON AT THE STABLE of John Goss, in Randolph. May 1, 1807.

It is claimed that he stood part of the time this season at Claremont, N. H. A private letter states that he was shown at the fair at Randolph in 1817. He died at Chelsen in February, 1819, or was killed. The cause of his death was a kick that he received from a mare hitched in the barn beside him, there being only a pole between them. This is a sad end of so remarkable a horse, who was the founder of a distinct family of horses.

After the Morgans had become popular, it was desired to know the origin and blood of their founder. It was claimed by many that he was taken from Canada, and was a French horse. The June number of the *Albany Cultivator* for 1842 contained Mr. Morgan's son's statement in regard to when and where he got the horse. The *Cultivator* was then a monthly. The next number, the July one for 1842, contained the statement of John Mayer, then of Lima, N. Y., that he resided at Springfield, Mass., near Justin Morgan, previous to his removal to Vermont, and that the two-year-

old stallion that he took with him to Vermont was sired by a horse called True Briton, or Beautiful Bay; that Justin Morgan kept True Briton at Springfield one season, and two years after he, John Morgan, kept him two seasons. In the January number of the *Cultivator* for 1846, is Frederick Weir's statement in regard to the origin of the Morgan horse: "From my correspondence with Justin and John Morgan and others I am able to state the pedigree on both sides of the Morgan horse. He was foaled in 1793 and was sired by True Briton or Beautiful Bay, then kept by John Morgan at West Springfield. The dam of the Justin Morgan horse at the time he was sired was owned by Justin Morgan himself at Springfield, where he then lived."

The dam is described by Mr. John Morgan, who knew her, as of the Wild-air breed, of middling size, heavy chest, very light bay color, bushy mane and tail, the hair on the legs rather long and a smooth, handsome traveler. Her sire was Dimond, a thick, heavy horse with a heavy mane and tail, hairy legs, and a handsome traveler. Dimond was kept by Justin Morgan at the time the dam of the Morgan horse was sired. His sire was the Wild-air known as the Church horse; his dam, the noted imported mare Wild-air, owned by Capt. Samuel Burt, of Springfield, Mass. The Church horse's sire was Wild-air which was taken back to England."

The advertisement of Dimond shows that Justin Morgan kept Dimond the season of 1783, and that his sire was the Church horse. So much of what Mr. Weir says Mr. John Morgan wrote him is proved true, but the advertisement of Dimond does not sustain the Wild-air crosses and they cannot be considered true. Mr. Weir claims that John Morgan gave these Wild-air crosses in the letters that he received from him dated Jan. 9, 1845, and Jan. 31, 1845. Mr. Weir declines to let any one read these letters, or to have them published in full; only extracts from them have been published. This leads to the belief that they do not give the Wild-air cross as given by Mr. Weir and that this is the reason Mr. Weir does not want them published. The May number of the *Albany Cultivator* contains a second letter from Justin Morgan of Stockbridge, Vt., in which he states what Mr. Weir had already stated, that John Morgan kept True Briton the season that his father's horse was begotten.

The statements of Messrs. Morgan and Weir satisfied the public in regard to the origin of the Morgan horse. Mr. Linsley published his "Morgan Horses" in 1857. He restated what had been stated. He thought he had discovered an error in the Weir statement that "the dam of the Justin Morgan horse at the time he was sired was owned by Justin Morgan himself at Springfield, Mass., where he then lived." It was said then that the horse was foaled in 1793, and taken to Vermont in 1795, and this was an error, as Mr. Morgan removed to Vermont in 1788. But call it as it was, that the horse was foaled in 1789 and taken to Vermont in 1791, Mr. Morgan could have bred him. His Dimond mare was four years old in 1788. True Briton's advertisement showed he was at Springfield as early as April 16, 1788. Mr. Morgan could have bred his mare to him and moved to Vermont on snow. There have been years when one could move from Springfield, Mass., to Vermont on snow as late as the 1st of May.

In 1871 Mr. Wallace published his first volume of the "Trotting Register," and in it he states that True Briton was the sire of the horse Justin Morgan. Mr. Wallace does not admit the statement of Mr. Weir that the dam of the Justin Morgan was by Dimond. In the December number of his Monthly for 1875, Mr. Wallace goes over the ground at some length in regard to the origin of the Morgan horse, and he states: "He certainly was the progeny of True Briton." He says, too that he has not been able to find any trace of evidence that Justin Morgan kept Dimond, thinks John Morgan got the names confused, and that Sportsman was the sire of the dam of Justin Morgan instead of Dimond.

In 1878 it was discovered that John Morgan removed from Springfield to Lima, N. Y., in March, 1791, and it is claimed that he could not have known in regard to a colt that Justin Morgan took to Vermont in 1795. In 1879 the advertisements of True Briton for the seasons of 1785, 1788 and 1789 were found. These proved that True Briton was not the sire of the Justin Morgans, as he was got in 1792. The True Briton colt that John Morgan knew of Justin Morgan's taking to Vermont, was one taken to Vermont in 1788, when he removed there, and was got in 1785, the season that Justin Morgan kept True Briton, and the original Morgan horse was another colt that Justin Morgan took to Vermont in 1795, that John Morgan knew nothing about. They would not admit that Justin Morgan's son made a mistake in the year that his father took the horse or colt to Vermont. It was the year 1795 for a certainty. Mr. Wallace accepted this theory, says the sire of the Justin Morgans is not known, and talks as though his blood was Dutch, because Mr. Morgan's son said his father called him a Dutch horse. They seemed to have forgotten the statement of John Morgan, that he kept True Briton the season he sired the colt that he knew Justin Morgan took to Vermont. The advertisement of John Morgan for True Briton, the season of 1788-9, showed that the colt he meant was not taken to Vermont in 1788, as the colt he meant was not then born.

The grand lists of Justin Morgan are soon found, and it is learned that when John Morgan removed to Lima, N. Y., he left a son John, of a few years of age, at Springfield; that the son visited the father at Lima when nineteen years of age; that the father visited Springfield; that his son removed to Bellows Falls, Vt., in 1829, and to Windsor, Vt., in 1833; that he visited his father at Lima while living at Windsor, and his father must have learned from him in regard to the Morgan horses of Vermont, and it was how he was so well posted in regard to them.

Mr. Wallace published the third volume of the "Trotting Register" the last of the year 1879. He says nothing in it about the pedigree of the horse Justin Morgan. In 1882 Mr. Wallace publishes his fourth volume of the "Trotting Register." He is silent in it in regard to the pedigree of the horse Justin Morgan, and it stands now as he gives it in the first volume: "Justin Morgan, b. h., by True Briton." The time he was foaled and taken to Vermont should be corrected, for if he was sired by True Briton the season John Morgan kept him, he was not foaled in 1793 and taken to Vermont in 1795.

ALLEN W. THOMSON.

THE BREEDER AND SPORTSMAN is the name of a new weekly paper, conducted by Jos. Cairn Simpson, and published at San Francisco, Cal., at five dollars per annum. The first copy is at hand. For beauty of typography, extent and variety of matter, and general make up, it is unexcelled by its contemporaries. Mr. Simpson is author of a popular book, called "Horse Portraiture," and for more than a quarter of a century has been a popular writer on horse and sporting matters. He is admirably qualified to conduct such an enterprise, and the breeders of the Pacific Coast are to be congratulated upon having so able and gifted a champion of their interests.—*St. Louis Rural World*.

TURF AND TRACK.

Fixed Events.

Golden Gate Fair, to be held at Oakland, from September 4th to the 9th inclusive.
Butte District Fair at Chico, from September 5th to September 8th inclusive.
El Dorado District Fair at Placerville, from September 5th to September 8th inclusive.
California State Fair. Annual meeting at Sacramento, from Monday, September 11th to 14th inclusive.
The San Joaquin Valley Association Fair at Stockton, from September 15th to the 23d inclusive.
Oregon State Fair at Salem, from September 18th and during the week.
The San Mateo and Santa Clara County Agricultural Association Fair at San Jose, September 25th to the 30th inclusive.
Humboldt and Mendocino District Fair at Rhonerville, September 19th to September 22d inclusive.
Modoc, Plumas and Lassen District Fair at Greenville, from October 2d to October 5th inclusive.
Monterey District Fair at Salinas City, from October 2d to October 6th inclusive.
Nevada State Fair at Reno, from Monday, October 2d to the 7th inclusive.
Mount Shasta Agricultural Association Fair at Yreka, October 4th, 5th, 6th and 7th.
Eastern Oregon Fine Stock Association at Union, from October 5th to the 14th inclusive.
Los Angeles Agricultural Association, at Los Angeles, from October 17th to 21st inclusive.

FAIRS AT THE EAST.

Minnesota State Fair at Farmington, August 31st to September 8th inclusive.
Iowa State Fair at Fairfield, September 1st to the 8th inclusive.
Minnesota Agricultural Association, at Minneapolis, September 4th to the 9th inclusive.
Nebraska State Fair, at Omaha, September 11th to the 16th inclusive.
Rhode Island State Fair, at Providence, September 12th to the 15th inclusive.
Pennsylvania State Fair, at Pittsburg, September 7th to the 21st inclusive.
Wisconsin State Fair, at Fond du Lac, September 11th to the 16th inclusive.
Ontario Provincial Fair, at Toronto, September 15th to the 23d inclusive.
Connecticut State Fair, at Meriden, September 18th to the 22d inclusive.
New Jersey State Fair, at Monroe, September 18th to the 22d inclusive.
West Virginia Central Fair, at Clarksburg, September 19th to the 25th inclusive.
Indiana State Fair, at Indianapolis, September 25th to the 30th inclusive.
Western Michigan Fair, at Grand Rapids, September 25th to the 30th inclusive.
Texas State Fair, at Austin, October 17th to the 21st inclusive.

Clingstone's first Defeat.

The Grand Special race at Utica on August 18th will create a sensation throughout the country and will be memorable as the first defeat of Clingstone. It was over this same course a year ago that he lost his first heat, but in it he made a break; but, fortunately for his backers, they did not meet a Waterloo, as little betting was effected on the race. The public had become strongly impressed with the idea that Thorne might snatch a heat from him, but there was little hope of his winning the race, so after the first heat Clingstone was as great a favorite as ever. The Utica meeting was not productive of heavy speculation, and had this reverse been sustained at Cleveland, or Buffalo, it would have been a severe blow to the friends of Clingstone, for an old pool clerk, who knows the run of the betting from year to year, told me that there was more money changed hands at the Circuit meetings previous to Utica, than during any year since the pool law of New York State was enacted.

Now that Edwin Thorne has plucked the laurels from his doughty rival, I made a few brief inquiries of noted horsemen as to what they thought of the race. One said: "Oh, the day is raw and cold, and Clingstone may not be at himself." "Well, he was not badly off for speed," I suggested, "for he forced Thorne to the half in 1:07½ the second heat, and the day is not so bad after all, as Murphy jogged in with Cornelia in 2:21½; some made it faster." "That's so," chimed in a second trainer, "but it was warmer then than now, and Thorne is growing better and stronger all the time. You know it was more a difference in endurance than in speed between the horses in their other races." A third said: "The little bay gelding will lose little reputation by the defeat. He is one of the kind who will come again and take more of a beating than he received to-day before he is conquered."

The only non-starter for the special purse of \$2,000 was J. B. Thomas. A murmur of admiration was heard as Clingstone appeared for the preliminary warming up, and Edwin Thorne was greeted with similar applause, for they were regarded as the contending horses, with public opinion in favor of Clingstone's success by a large majority. I have heard it claimed that the little bay "demon" was not himself to-day; but excuses are not in order. The truth is that Thorne is a better horse than he has been, and the sharp contests through the circuit have keyed him up to put in his heats closer together. He has already verified my prediction, made after the Buffalo race, viz: "It is not by any means a forlorn hope to cherish that he will wrest a heat, or possibly a race, from Clingstone before they close their engagements through the circuit."

But I look for Clingstone to redeem his laurels and continue to win the best three out of five races, even from as good a horse as Edwin Thorne, notwithstanding the great son of Thorne's marked advantage in his breaks, which are sometimes a positive advantage to him, while if Clingstone leaves his feet it is almost fatal to his chances for a heat or race, as was clearly shown to-day.

First heat.—Pools: Clingstone, \$100; field, \$20 to \$25. The horses scored unevenly a number of times, with Thorne at the pole, So-So second, and Clingstone third. When the word was given all was working level. So-so was not up in her place, and Clingstone immediately ranged alongside of Thorne. He kept his nose on the leader's wheel around the turn, but Thorne opened a little daylight to the quarter in the neighborhood of 34s., with So-so a good third, Kate Sprague fourth, and Pickard last. The leaders began to draw away from the others on the second quarter, and Clingstone seemed to shoot up for a few strides, as if about to collar Thorne, and then the big chestnut would let out a link and keep him at his distance, a length behind to the half in 1:08½. These movements were continued around the upper turn, and as they approached the three-quarter pole, which was made in 1:45, Saunders drew the whip on Clingstone, and was on Thorne's wheel as they straightened into the stretch. The small-fry of betters who crowd the open space in front of the grand stand and are always ready to catch "suckers" were soliciting bets of from a dollar upward that Clingstone would win it. Down the stretch they came, each horse and driver doing his level best. Clingstone got to Thorne's saddle-girths at the distance and closed up a little more before the finish, but, although apparently doing his level best, the chestnut beat him out by a neck, in 2:18½.

Second heat.—The Clingstone party were as confident as before the start, and stood ready to back their favorite at \$100, the field ranging from \$24 to \$36, according to the way Thorne showed up in the scoring. Everybody anticipated a good heat, but the opinion prevailed that Thorne would be beaten at the finish, as usual. Clingstone scored up with determination in every movement, and, no matter what fielder proved laggard, he was there, even with Thorne, every time. "They're off," and the Paris Mutual machines were closed. The chief contestants were even as they left the

wire, but Thorne was first under full headway, though Clingstone was in close pursuit of him, clinging to his wheel around the turn, and on to the quarter-pole in 34½ seconds. Inch by inch the little grey gelding crept up to Thorne's body, and, gaining little by little, he seemed to have the leader within his grasp at the half in 1:07½. This uncommonly fast clip left the fielders far in the rear, Kate Sprague being the boss of the rear division, with So-so already beaten. After passing the half and rounding the turn leading from the backstretch, Thorne began to draw away a little, and the friends of Clingstone were exclaiming: "Oh, that is only Thorne carrying him out. You will see how he will cut him down in the straight work." And their words appeared to be true, as Clingstone gained on him at the three-quarter pole in 1:45; but just as he was making the last turn, and everyone was looking for a magnificent struggle, the pride of the Forest City broke. Those who were not in a position to see the unfortunate occurrence thought that the shout: "Clingstone has broken up," was only a joke; but as they saw Thorne passing under the wire three or four open lengths, with the hitherto unconquerable horse merely able to beat the others for second place, they learned that the shout was true. Time, 2:20½.

Third Heat.—There is a first time in everything, and now Clingstone sold in the field at \$10 against \$24 for Thorne, and never did a field look stronger than until within a few yards of the finish of this heat. The word was quickly given, and, in an instant, Thorne and Clingstone drew out from the others, entering into a desperate struggle. Clingstone is not to be shaken off this time. He drew up almost even at the quarter in 35½ seconds, and kept gaining little by little, until at the half, in 1:10, he was even with Thorne. Hope here lent wings to him, and he carried Thorne to a short break. "He's got him at last. Why don't he let out a little more and take the pole!" cried his too-anxious backers. But, before he could do so, Thorne had settled, and trotted even into his place; but midway of the third quarter he could not stand the pressure, and again the big chestnut left his feet, running about fifty yards and maintaining his position. When he settled he went at Clingstone with renewed vigor, and they came into the stretch on almost even terms, Clingstone swinging well out. Thorne came up on the inside. Whip and rein were busily at work on each, and within fifty yards of the wire, when Clingstone, was even with his competitor, Saunders, seeming to fear that he would be beaten out, and placing too much confidence in the steadiness of his horse, let go of his head for an instant, as he raised his hand to give him an extra cut. This movement and the severe blow were more than Clingstone could stand, and he left his feet when the heat was almost won, running out two lengths behind Thorne. Time, 2:21. Kate Sprague was trotting steadily close to the pole, but Murphy brought Pickard up with a rush, and beat her out for third place and third money.—*Special Cor. N. Y. Spirit of the Times.*

Saratoga Races.

The Saratoga Association brought its racing season for the current year to a close August 26th, with good weather, an excellent track and a very large attendance, including numerous ladies, and perhaps a larger number of Saratogians than has been present on any previous day of the meeting—the last day having for years been, as the late John Morrissey used to say, "Saratoga's day." Of the meeting, it can only be described as an unqualified success. Since July 11 there have been no less than forty days of continuous racing, as against thirty-seven days last year, when, as has been the case this year, the weather continued so fine that the meeting was run through without a single day's postponement. As to the financial success of the meeting, it is scarcely possible that the total of receipts will reach as large a figure as on some previous years, a fact due as much as anything to the falling off in the betting, caused principally by the absence of some of the larger Eastern stables. But there has been no falling off in the amount of money raced for in the shape of purses and added money to the stakes, which foots up \$86,000, and which has been so nicely divided up that a majority of the owners of horses racing here during the meeting, which covered nearly seven weeks, obtained some portion of it. The 161 races run were won as follows: Eighteen by the Dwyer Brothers, fourteen by Milton Young, thirteen by C. Reed, ten by W. L. Cassidy, nine by Mr. J. A. Grinstead, eight by A. Burnham, six by ex-Governor Bowie, five by Bowen & Co., five by C. Boyle, five by W. M. Conner, five by J. P. Dawes, five by E. Heffner, four by Davis & Hall, four by Preakness Stable, four by W. Kavi, three by Noah Armstrong, three by Morris & Patten, two each by J. J. Merrill, J. W. Loud, W. P. Burch; P. C. Fox, D. Colaizzi, Mr. Abington, P. H. Duffy and J. C. Forbes, and one each by Connolly & Co., Darden & Co., W. A. Dun, Carson & McBride, Watts & Co., W. L. Scott, J. T. Williams, Graham Brothers (a dead heat which they divided with Governor Bowie), C. L. Hunt, Dr. Craik, Stevens & Co., A. J. Scott, Sheppard Brothers, F. Gebhard, J. H. Harbeck, W. K. Bender, Riley & Co., R. Leary and O. C. Lefevre. One conspicuous feature of the meeting has been the number of horses that have been sold, Mr. Doswell having sold all of his and Mr. Grinstead all but one during the meeting.

In "Krik's" letter to the New York *Herald* he remarks that the second race on the cards, the Baden-Baden Handicap, was the race of the day, and no doubt attracted the large crowd present. It had five starters, and as a race it was one of the best of the meeting. All five of the contestants ran in close order, with the old favorite Bushwhacker in the lead, and although many present were disappointed in not seeing the last year's winner of the same race, Mr. Reed's Thora, take the lead in the last mile, as they wished her to do attended by Checkmate, they were treated to a splendid race between the two mares Ella Warfield and Lida Stanhope. The latter was superbly ridden by Shauer, who journeyed up from New York specially for the occasion, he winning with comparative ease in the best time ever made for three miles. Although Lida's ability to run a good distance was shown by what she did as a three-year-old, only a select few knew her real form to-day, and although she sold well up in the pools they made a good winning. The defeat of Ella Warfield was a sore disappointment to the Maryland and West Virginia party, as they knew Ella was just about good enough to run the distance nearly in record time, which they supposed would be sufficient to beat Thorne and Lida Stanhope. Of course, Thora's inability to run the distance effectually settles her chances for the four-mile races at Sheephead and Baltimore, while as to Bushwhacker, he made such a gallant effort that not a few were sorry when it was seen that he could not possibly reach the leaders after they had once run into the lead. The starters were Checkmate, at 118 pounds; Thora, at 117 pounds; Bushwhacker, 101 pounds; Lida Stanhope, 100 pounds, and Ella Warfield, 92 pounds. Notwithstanding Thora's "quitting" exhibition a few days ago she was made the favorite, with Ella Warfield and Lida Stanhope each well supported, particularly the latter, for which Shauer had specially been en-

gaged to ride. When the flag was dropped Thora was in front, with Checkmate second, Lida Stanhope third, Bushwhacker fourth and Ella Warfield last. In an instant Bushwhacker took the lead and, going right away, opened a gap of three lengths, and, with Checkmate second and Thora third, they ran nearly the whole of the first mile, which was ended with Bushwhacker leading two lengths, Checkmate second, half a length in front of Ella Warfield, who was one in front of Thora, and the latter half a length in front of Lida Stanhope, both fillies under a hard pull. Half way round the west turn Thora again showed third, but with that exception there was no other change in the second mile, all five running up the stretch good and strong, with Bushwhacker leading two lengths, followed by Checkmate, a length in front of Thora, who was the same distance in front of Ella Warfield, and the latter the same in front of Lida Stanhope. Half-way round the west turn those who backed Thora knew her fate, for instead of moving up she dropped back while those who backed Ella Warfield were delighted to see her take second place. In the meantime Bushwhacker was still running very strong, but as they reached the woods the secret of the race was shown, for with the greatest ease Lida Stanhope took the lead, and as she was followed by Ella Warfield, they passed the half with Lida Stanhope leading by half a length, Ella Warfield second, nearly clear of Bushwhacker, with both Thora and Checkmate out of the race. When well into the west turn Thora raised some little hope for her supporters by taking third place, but as she was unable to reach Lida and Ella, the attention of all present was turned to them. From the 500-yard pole they ran a tremendous race, both under the whip, with Lida leading by half a length, which distance separated them until they reached the pool-stands, at which point Shauer brought Lida Stanhope away from Ella Warfield, and amid the enthusiastic shouts of nearly all in the stand Lida Stanhope won a great race by two lengths and a half, Ella Warfield second, four lengths in front of Bushwhacker, who was three in front of Thora and the latter five in front of Checkmate. Time 5:25, which just beats the record for the distance by a quarter of a second. On the return to the scales both Lida Stanhope and Ella Warfield were loudly applauded, as they fully deserved to be, for it will be seen that from the time they began racing the pace increased wonderfully. The following is the time by quarters as taken by the timers:

1st, 29½; 2d, 28, half-mile, 0:57½; 3d, 28½, three-quarters, 1:26; 4th, 27, mile, 1:53; 5th, 27½, mile and a quarter, 2:20½; 6th, 27, mile and a half, 2:47½; 7th, 27½, mile and three-quarters, 3:15; 8th, 25, two miles, 3:40; 9th, 27, two miles and a quarter, 4:07; 10th, 26, two miles and a half, 4:36; 11th, 26, two miles and three-quarters, 4:59; 12th, 26, three miles, 5:25.

DEATH OF CATESBY.—Ex-Governor Bowie has had the misfortune to lose his well-known thoroughbred race horse and sire, Catesby, the son of imported Eclipse and Katie, having died on Sunday last at his owner's farm, Fairview, in Prince George's county, Maryland. Catesby was bred by Mr. Bowie in 1870 and raised on the farm where he died. His racing career was by no means a brilliant one, though it promised to be so, when, on his first appearance, Catesby won the valuable Saratoga Stakes in 1872, beating Long Branch and such good ones as Springbok, Fellowcraft and Count D'Orsay in the ten that followed him home. Catesby next ran in the Kentucky Stakes, and later in the Nursery Stakes at Jerome Park, being third on each occasion. Catesby then fell a victim to the prevailing epidemic, the epizootic, and he was a long time ere he recovered, so long indeed that his three-year-old career was a failure, only one small purse at Jerome Park being credited to him. As a four-year-old he ran a dead heat with Grainger at the Baltimore spring meeting, won a selling purse at Saratoga, and then closed the year with the most creditable performance since his initial success. This was the defeating Wildile, B. F. Carver and Ransom in the Maturity Stakes at Jerome Park. In 1875 Catesby ran once unsuccessfully at Saratoga and was then sent back to Fairview. He began his stud career in 1876, producing Cinderella from one of the two mares sent to him. In 1877 he sired Crickmore, Compensation, Sportsman and a bay colt now used as a saddle horse by Mr. Bowie. Cinderella was turning out so badly as a yearling that the following year Catesby's services were dispensed with and he was sent to Virginia, where he remained for three seasons. The excellent running of Crickmore and Compensation in 1880 induced Mr. Bowie to have Catesby brought back, and he has been used at Fairview for two seasons since then.—*N. Y. Herald.*

A strange mistake was made one day last week by a pool firm at Brighton Beach near New York which cost them \$302 50. The name of the winning horse in a race is telegraphed in cipher from the track to the pool-rooms. In the case in point the man whose business it is to receive these dispatches and announce the winners shouted "Madrigal wins," and \$802 50 was paid out before he looked at the dispatch a second time and found he had read Madrigal for Miss Woodford, who had really won the race. \$500 of the amount was refunded, but the holders of the remainder refused to return the money they had received.

The Petaluma Fair.

PETALUMA, Sept. 30, 1882.

EDITOR BREEDER AND SPORTSMAN: The fair and races at Petaluma have closed, after having the most brilliant and successful season they ever knew. Notwithstanding that the grand stand is capable of seating several thousands of people, the place was so thronged as to hardly leave standing room. The last two days' races were very exciting. On Friday the races commenced with a two-year-old colt race, trotting for a purse of \$300, with the following entries: G. C. Fountain's blk f May Day, Whitney's ch c Ideal, John Pfau's b g Mike, P. J. Shafter's g m, S. S. Drake's b c Staudard, and J. E. Foster's f Clara Patterson. Of these the only starters were May Day and Ideal, the latter being the favorite in the pools at \$15 to \$10 for May Day. After some scoring they got a good send off, trotting very evenly and close together the whole heat, the only skip made in the heat being a slight break by May Day coming down the stretch. The favorite took this heat in 3:31 by only a length.

After this heat Ideal sold at the pool box for \$10 to \$4.50 for May Day with but few takers, but again were the knowing ones upset in their calculations, for after a very close heat Ideal broke near the wire and gave up the heat to May Day in 3:2. The result of this heat so dampened the ardor of the favorite's friends that no one could guess who the winner would be and there were no pools sold. The third heat, like all the others, was a very close one, but the bay mare proved to be the best horse and won the heat in 2:59½ by only a length. May Day is by Eugene Casserly, her dam by Toronto Chief, and is a very promising filly.

As the Consolation purse did not fill there was a made-up race for a purse of \$400. The entries for this purse were J. Hughes's Cairo, Valensin's Crown Point and Titus's Bullet. Before the first heat Crown Point was a favorite in the pools, selling for \$30, while the other two in the field sold at from \$10 to \$37. After some considerable scoring the horses were tapped off evenly, with the favorite inside, Bullet Second and Cairo on the outside. Crown Point immediately took the lead, and although he made quite a bad break before reaching the first quarter, never lost his vantage to the end, but took the heat in 2:30½. Cairo acted very badly during the whole heat, making no less than six bad breaks, and but for running would have been distanced. Bullet trotted evenly and well, but hadn't speed enough to keep him to the front. After this heat Crown Point sold in the pools for \$20, while Cairo and Bullet sold for \$12 and \$14 respectively. This time the horses got the send-off at the first attempt and a good one too. As in the former heat, Cairo acted badly, breaking and running frequently, and coming around the lower turn he ran clear around Crown Point, taking the pole from him, and Crown Point himself making a bad break in the home stretch was unable to pass him again and the heat was given to Cairo by a length, Bullet third; time, 2:26. For all Crown point had lost a heat, he still remained a favorite in the pools, bringing \$20 to \$10 for the field, with Bullet and Cairo in it. This time there was some scoring before the horses got a good send-off. From the start the little chestnut went for the big bay, taking him off his feet twice before reaching the first quarter, and would have passed him there but went up himself. As it was, the quarter was made in 25 secs. and the half in 1:14; from there the struggle was a hot one until inside the distance Crown Point again drove the big horse off his feet and took the heat right out of his teeth in 2:27½. Business in the pools now closed, as the most sanguine friends of the field gave up in despair. After the usual rest the horses were called for the final heat. At the first trial the horses were off at a good start, the favorite taking the lead, and though collared by Cairo at the half-mile he had no trouble taking the lead, especially as Cairo made several bad breaks before reaching the goal. Time, 2:30½.

SUMMARIES.

Petaluma, September 1, 1882.—Purse of \$300 for district two-year-olds, mile and repeat.

G. C. Fountain enters blk f May Day..... 2 1 1
A. P. Whitney enters ch c Ideal..... 1 2 2
Time: 3:08, 3:02, 2:59.

Same day.—Purse \$400. An agreed race for named horses.

G. Valensin names ch s Crown Point..... 1 2 1
J. Hughes names ch c Cairo..... 2 1 2
L. H. Titus names b g Bullet..... 3 3 3
Time: 2:30½, 2:26, 2:27½, 2:30½.

The fifth and last day of the fair started in fair and beautiful although quite warm. There were four races commencing with a ½-mile dash between Quin Sabé and Stella Clark for a purse of \$100 which was won easily by the former in 1:20½. The second race was a yearling trotting race, one mile out; the starters were P. C. Rierdon's Blue Gown, P. J. Shafter's Viking and Needham's Conemara, for a purse of \$150 which was won by Blue Gown, Viking 2nd, Conemara 3d, Blue Gown winning the heat and money. After this the two most interesting races of the week came off, a pacing race for a purse of \$500 and a trotting race for purse of \$500. The starters in the pacing race were Johnny Wiegler, E. P. Dennison's ch m Lady Hayes and Valensin's br m Ouida, Lady Hayes being the favorite in the pools at \$20 against \$20 for the other two. With very little trouble they were tapped off to a good start with Ouida 1st, Wiegler 2nd, and Lady Hayes outside; before reaching the first quarter both Lady H. and Wiegler had passed Ouida, who seemed to lack in speed and soon was a long distance behind the other two, who were pacing swiftly along, Lady H. a little in advance, a position which she held until near the wire when she broke and Johnny, who was close up, passed her and took the heat by a length in 2:25½. After this heat Wiegler became a favorite, selling for \$20 against \$15 for the other two. After the usual breathing spell they again received a good send off, Wiegler at once taking the lead, Lady H. close up and Ouida trailing away behind; and thus in one, two, three order, Lady H. a good second, Ouida barely saving her distance. Time 2:28. Wiegler now became a greater favorite than ever, selling for \$25 to the others \$7, but alas for human calculation, in the third heat Ouida, who seemed to be as fresh as a daisy while the others were tired, passed Lady H. before reaching the first quarter and crawled up into Johnny's wheel where she stayed until near the wire when by a galant spurt she passed him and took the heat in 2:26½. In spite of Wiegler having lost a heat he was still favorite, selling for \$20 while he others brought \$14, but the favorite had had his day and the brown mare took the lead at once and maintained it to the end, winning this the fourth heat in 2:30½. After this, pool selling was at a stand still for this race. The fifth and last heat was but a repetition of the preceding one, Ouida taking it easily in 2:32½, winning the race and first money, Wiegler 2nd and Lady H. 3d. During the races here and at Santa Rosa the knowing ones have had several severe attacks of dismay but this was perhaps the worst of all. The final race of the meeting was a trotting race for the 2:30 class for a purse of \$500. The entries were A. Waldstein's b s Albert W., W. D. Hammond's g s Poscora Hayward, Goldsmith's br s Inea and Henry McConn's Blackmore. Albert W. was the favorite in the pools, selling for \$25, Poscora \$12 and the rest in the field for \$8. There was

a great deal of scoring before the horses got the word but finally they received a fair start with Albert at the pole, Blackmore second, Poscora third and Inea last. Albert W. at once took the lead and retained it although crowded close by Poscora, who took second place before arriving at the first quarter, but at third quarter Inea came up and took second place and in that order they came in, Albert W. first, Inea second, Poscora third, Blackmore behind. Time 2:27. After this heat, Albert W. brought \$20 in the pools while all the rest sold in the field for \$5. This time they got a good send-off with but little scoring. Immediately after the start Inea made a break and Poscora took second place and all the way around she made the favorite step very lively and he barely beat her in 2:26½, Inea third, Blackmore fourth. After this heat, as every one believed that Albert W. would win; there was no pool selling. The fourth heat it seemed as though they never would cease scoring but after more than a dozen trials they at last received the word. Before getting around the first turn Albert W. made a break and Poscora took the pole away from him and held it until near the end, and it seemed as though he would win the heat, but when near the end Albert W. pressed him so hard that he broke and ran under the wire and the heat was given to Albert W., Inea third, Blackmore last. Time 2:24½. So ended a very exciting and interesting meeting.

SUMMARIES.

PETALUMA, Sept. 2d, 1882.—Pacing Race, purse \$500 for following entries:

G. Valensin enters br m Ouida..... 3 3 1 1 1
Walter Mead enters d g Johnny Wiegler..... 1 1 2 2 2
E. P. Dennison enters ch m Lady Hayes..... 2 2 3 3 3
Time: 2:35½, 2:28, 2:26½, 2:30½, 2:29½.

SAME DAY.—Trotting Race.—Purse \$500, with the following entries:

A. Waldstein enters b s Albert W..... 1 1 1
W. D. Hammond enters g s Poscora..... 3 3 2
J. A. Goldsmith enters br s Inea..... 2 3 3
Henry McConn enters gr g Blackmore..... 4 4 4
Time: 2:27, 2:26½, 2:24½.

The resume of the week's proceedings must indeed be most gratifying to the Directors of the association, and to all those who were interested in the exhibition and races. The fair was an unprecedented success, and the visitors and the citizens of Petaluma seemed to be mutually pleased at the fact. The full list of awards is prepared but the pressure in our space causes its publication to be postponed until our next issue. Many thanks are due to W. E. Cox, the efficient Secretary of the association, for information and favors granted to the attaches of the BREEDER AND SPORTSMAN during the fair.

The Golden Gate Fair.

The fifth annual fair of the Golden Gate District Association, representing the counties of San Francisco, Alameda and Contra Costa commenced on Monday last under the most favorable auspices. The weather was delightful and the trip across the bay was most enjoyable, a light wind tempering the warm atmosphere, but not sufficiently strong to disturb the glass-like waters that reflected with beautiful precision the hull, masts and rigging of the countless merchantmen at anchor in the harbor. On arriving at the fair grounds it was evident that unusual interest was already manifested in the success of the fair, as the attendance was far in excess of that of the first day on previous years, lines of vehicles almost doubling on the quarter stretch, while a great many ladies and children were comfortably ensconced in the grand stands where an excellent view could be obtained of the races, with a superb vista of mountain scenery in the Contra Costa Range, which forms such a pretty background to the Oakland track.

As is usually the case on the first day of the Fair, the interest was mainly centered in the races, as the exhibition of live stock and agricultural implements is seldom complete before the Wednesday, but there was no lack of interest on that account as this was a great gathering of some of the leading men of the State, and for the time being the fields of potatoes were vacated, and on all sides were heard hearty greetings and friendly discussions in regard to the relative performances of the chief representatives of the California turf.

Promptly at two o'clock the horses were called up for the first race, the Golden Gate stake, a dash of three-quarters of a mile for two-year-olds, \$50 each, \$15 forfeit with \$150 added in which were originally five entries, but as Satinet and Panama were absentees, the issue of the first struggle was left to Satanella of the Palo Alto stable, May B, belonging to Mr. Put. Robson and Mr. Contts's filly, Flou Flou. As shown at the spring meeting of the blood horse association, these horses all possess a fair amount of speed, but they cannot as yet aspire to first-class honors, and the betting, as the result showed, ought to have been about even, but there were so many rumors bruited around in regard to a private trial at which Satanella had given a most satisfactory answer that there was a rush to get in, and just previous to the start she brought \$20 against \$5 each for May B and Flou Flou. As usual there was some delay in getting the horses to the post, and in this and the succeeding races much valuable time was lost at the starting post, that necessitated the postponement of a part of the final race until the next day. After a slight break away the fillies were sent on their destination with Flou Flou the quickest on her feet, but she was soon joined by Satanella, who ran with her neck-and-neck down the homestretch until within a hundred yards of the wire, when Flou Flou was beaten, and the rider of Satanella slightly easing, George Hanson, who had been trailing within reaching distance, came up with a rush and May B won by nearly half a length in 1:17, which was not particularly fast, as the track was in fine order. The backers of the favorite were rather blue, as they maintained that it was the best jockey and not the best horse that had won.

The next race was the Alameda stake, a dash of a mile and a half for three-year-olds, \$75 entrance, \$25 forfeit, with \$175, in which of the five original entries there were only two that sported silk, they being the Duke of Monday and Precious, the absentees being Fostress, Forest King and Maria E, the latter having been sent to Chico to fill her engagement there. At first the betting was pretty even but again there were sundry rumors in regard to the great improvement shown in the running of the Palo Alto filly and she gradually rose in the betting until the odds of \$30 to \$20 were freely laid upon her chances. Once more a great deal of time was lost, and the Duke in refusing to face the starter spilled Patsey Duffy on the soft earth as he backed suddenly around. At last, after half an hour's delay, they were sent off together and from the start it was evident that Precious was to make the running, as she led for a mile by two lengths, when the Duke moved up, and thence home to the wire the race was of the most exciting character, the horses and whips and spurs being locked together to the last stride, when the Duke succeeded in win-

ning by half a dozen inches, amid the greatest excitement. The time was 2:41½, the fastest first being made in 2:50.

The third race was the Pardee stake heats of a mile for 1 ages, the starters Red Boy and Night Hawk. The betting was slightly in favor of the horse, and had the speculating fraternity known how good the mare was the odds would have been large on the other side. A capital start was given them at the first time of scoring. The mare had the inside and she commenced the work at a rapid rate. The quarter was made in 25 seconds, the half mile in 50½, the mare still leading. She was yet in the lead at the three-quarters in 1:16 and the heat looked as though it was a foregone conclusion that she must win. But Patsy was riding for dear life and he managed to bring the horse under the wire a few inches in advance of the mare in the fastest time ever made in California, 1:21. The result of this heat changed the betting in favor of Red Boy, though it was conceded that should he fall off a trifle the mare would beat him. She made a good effort though the horse won in 1:45½. Then came the trotting for a purse of \$600, 2:40 class; in which were Freestone, Edwin Forest, Manon, Louis D., Marin, San Mateo Belle, Vanderlynn, Frank Moscow, and Big Lize. In the betting, Manon was soon installed as first choice owing to her private reputation for great speed, and she brought \$80 against \$18 for San Mateo Belle, and \$10 for Edwin Forrest, and \$60 for the others comprised in the field. The usual difficulty was experienced by the Judge in getting so large a field away from the score on something approaching even terms, but all were trotting equally except Vanderlynn, whose rank behavior betrayed his experience. Manon made her way to the front at the outset and successfully withstood all assaults, Louis D. contesting the last quarter in a grand speedy style but being obliged to content himself with second place, the field ranging after him with Big Lize third, Freestone fourth, San Mateo Belle fifth, Frank Moscow sixth, Marin seventh, Edwin Forrest eighth, and Vanderlynn ninth. Time 2:26.

Manon took a still higher place in the betting after the first heat. Some scoring followed the call in the second attempt, the drivers at one turn mistaking the signal of the judges and going to the pole before they pulled up. When they did get the word on a tolerable start Manon and Louis D. both rushed for the point and in the brush Louis D. skipped and swerved, colliding with Manon and splitting a wheel in the latter's sulky, but fortunately not causing any serious accident. The mare got a clear track before her near the pole and although there was a momentary bunch at the head of the stretch she came under the wire with a length of daylight behind her, Marin second, San Mateo Belle third, Edwin Forrest fifth, Big Lize sixth, Frank Moscow seventh, Louis D. eighth, Freestone distanced. Time 2:27.

In the pools Manon was now barred. In this heat Wm. Donathan essayed the management of Vanderlynn without much better success than had attended the efforts of Mr. Farrell. At the start Big Lize made a disastrous break and dropped to a hopeless position. Louis D. and San Mateo Belle went to the quarter at a rapid gait, yoked like a double team, the favorite being seemingly boxed and Vanderlynn supplying a wing accompaniment between the leading pair and the rear guard. Positions were not materially changed for the rest of the mile, Louis D. winning the heat in an exciting finish by half a length, San Mateo Belle second, Vanderlynn third, Manon fourth, Moscow fifth, Edwin Forrest sixth, Marin seventh and Big Lize eighth. Time 2:27½. Mr. Donathan complained that some loose horses running in the inclosure caused his horse to act badly and that was probably the reason why Vanderlynn was not penalized for running. As the hour was late and the shadows of evening drawing in the judges declared the finish of the race postponed until Tuesday afternoon.

On the second day the weather was delightful in the extreme and as there was a full programme of unusual interest, the attendance was far in excess of that of the previous day, the number of ladies on the grand stands and in the many vehicles that lined the quarter stretch giving an animated appearance to the track. The horses of the 2:40 class were called up promptly, but Edwin Forrest was withdrawn on account of lameness. There appeared to be such an unanimity of opinion among the drivers of the horses to make it "hot" for the favorite, that they scored time and again without an appreciable effort at getting together, and it was but at the fourteenth attempt that they were tapped off, Manon being the favorite at \$30 against \$6 for Louis D. and \$7 for the field. Manon broke a few yards from the start, which was a very fair one, considering the number of horses, and Vanderlynn at first appeared in the van, but as he left his feet at the quarter post Louis D. assumed the lead, and Manon was seen coming through the rack and taking a commanding position at his wheel. Thus they trotted well around the upper turn when Manon closed up and they were head and head until half down the homestretch, when the mare drew away and won the heat and race in 2:24, Louis D. being second and taking second and San Mateo Belle the third money. Manon made a very favorable debut and Mr. Kuox, the former owner of Nutwood, who was present on the track, was much pleased with her performance as when he sold her with other stock he prophesied that she alone would bring back more than the entire purchase money. She is grandly bred, her sire being three-quarters of the same blood as Maude S, while the sire of her dam is the first son of Rysdyk's Hambletonian ever brought to this coast. Her gait is almost perfect, throwing the fore feet so well to the front that she covers more ground than might be imagined with a casual glance at her stride. If she continues to improve as in the past year, she will be one of the most valuable mares of her class on the coast.

In the 2:30 purse that followed, the betting was \$100 in favor of Sweetness, \$45 for the field and \$50 for Albert W. although it was generally known that the driver of the stallion had requested the permission to withdraw the horse, as he did not deem him to be in a condition to trot in such company, but the request was not granted. After six attempts they got off to a good even start save that Poscora Hayward, who appeared to be a little lame in her exercise was in the rabble and broke at the draw gate. Sweetness at once took the lead with Nellie R. in close attendance, while Albert W. trained, as they passed the half mile in 1:12½; it was evident that the heat lay between the two mares, and Nellie breaking at the distance Sweetness won by a length in the fast time of 2:22, Albert W. cleverly saving his distance and Poscora Hayward having hopelessly broken down. The next heat was almost a repetition of the previous one as when Nellie was at the wheel of the favorite she broke and Sweetness jogged in, the time being 2:24½. In the third heat the same tactics were resorted to, the mares trotting fast and furiously for the lead, while the horse made a waiting race of it. Sweetness and Nellie were lapped all the way round and the latter, keeping well to her stride, won by a neck after an exciting finish in 2:23½. Sweetness was still by far the favorite as Nellie was tiring after her exertions, but in the next heat Albert W. was on his good behavior and closed up on Sweetness at the three quarter pole, where he

made a break, then quickly regaining his stride he was soon at the mare's wheel, but another skip lost him the advantage, and yet within the distance he came with a rushing speed and beat Sweetness out by somewhat more than half a length in 2:23. The backers of the favorite felt somewhat aggrieved at the decision, as the horse had made two breaks in the heat, but they should have remembered that in each instance Albert W. perceptibly lost ground so the general uninterested opinion coincided with that of the judges. There was now a good deal of lofty betting around the pool box, and as those who had pinned their faith on Sweetness were desirous of hedging, the result was to make Albert W. first choice at \$100 against \$40 each for the two mares. The horse made the pace to mid back stretch when he went up and Nellie took the lead, while Sweetness was trailing far in the rear. On the home stretch Albert trotted very fast but broke and, although he was quickly caught and came again, he was beaten out after a desperate and close finish in 2:26, with Sweetness distanced. Still heavier betting on even terms, and Nellie trying to outfoot her rival who, making a break at the upper turn, seemed to have lost his chance of the heat, but he had the speed of the mare and was soon again on even terms and then outfooted her at every stride and won easily in 2:25. The last heat was never in danger, as Albert W. trotted squarely in the lead all the way around and won the heat and race in 2:26. This was, thus far, the most sensational trot of the meeting. Then came the pacing race for a purse of \$500 in which were Corette, Lady Hayes, Oakland Boy and Ouida, the first named fetching \$60 in the pools against \$25 for Ouida and \$20 for the field. The race was a very one-sided affair for although Lady Hayes showed in front to the half mile in the first heat, Corette went to the front and was never headed again throughout the whole race, winning in three straight heats in 2:23, 2:22, and 2:24, Ouida taking second and Lady Hayes third money, while Oakland Boy was distanced in the first heat.

On the Wednesday there was again an increase in the attendance and the weather simply delightful. The first race on the card was a two-mile dash, \$100 each, \$25 forfeit with \$250 added, in which was entered Precious, Mollie H, Fred Collier, Night Hawk and Red Boy, and there was every expectation to see a rattling good race, but the two last had probably had enough running for a time after their mile and repeat on the previous Monday, and as Fred Collier was also an absentee the race was reduced to a fizzle. Precious was sent along briskly with the odds of a \$100 to \$20 on her, and at the end of half a mile she had Mollie H in difficulties, and hence home the only chance of her been beaten was in her falling down. Precious made the first mile in 1:45 and the entire distance in 3:36, a very creditable showing that demonstrated the fact that had she not made a waiting race of it she would have beaten the Duke of Monday in the Alameda stakes, also run on the previous Monday. Then came the purse for the three-year-olds in which were Adrian, Olivette, Bonnie Wood and Fred Arnold, the former being a big favorite at \$40 against \$20 for all others combined. Anteeo, belonging to J. C. Simpson was also entered in this race, but he had to be withdrawn on account of an attack of epizooty. This was also an uninteresting race as the other horses were no match whatever for Adrian. When the gong sounded for the start in the first heat the driver of Olivette mistook it for the recall signal and the horses were well on their way before he discovered his error. Bonnie Wood was for a good while in the lead, but she broke and afterwards the result was a mere exhibition of fine speed for Adrian, who made the quarter in 43 seconds, the half 1:22, and the mile in 2:41, winning by ten lengths from Bonnie Wood, and Olivette being distanced. The second heat was a mere repetition, the time for the winner being 42 seconds for the quarter, 1:21 to the half and 2:37 to the mile, the placing being the same as before. In the final heat, Adrian won as he liked with Bonnie Wood second, the first quarter being in 40 seconds, the half mile in 1:17 and the mile in 2:33.

The stock parade on Thursday was a grand display of all that connoisseurs do most admire in the higher order of the lower animals. The attendance of visitors was large, and with the neighing of high-spirited horses, the lowing of cattle and the stately procession on the course, they were presented with a living, breathing panorama that induced their closest attention and elicited continual expressions of pleasurable surprise. In affairs of this kind the interest increases as time advances and culminates on the last day, but the inexorable necessity of going to press on time knows no such law as delay, and all reference to the incidents and exhibits of the fair must be hurried and incomplete at this time, and reserved for digestion and elaborate treatment in the future.

The race for the 2:22 class, which followed, was shorn of much of its attraction from the fact of the forced withdrawal of Romero and from the rumour that Belle Echo was not quite herself. Consequently Brigadier was a great favorite in the pools at \$100 to \$40. The first heat seemed to be trotted slowly by mutual consent, Brigadier assuming the lead of about two lengths and keeping it to the end, in 2:27. The second heat was very interesting, for although the mare broke at the first turn and lost four lengths, Belle Echo, showing some of her famous speed, got at Brigadier's wheel on entering the homestretch and beat him out by a head in 2:23. This result brought the mare into a better position in the pools, which she could not maintain in the succeeding heat. To an excellent start, Brigadier at a rapid gate went to the front at the first turn and led by a length at the half mile in 1:12, and thence home. The result appeared to be in doubt to the last moment, as the finish was very close, the stallion winning a well-fought contest in 2:22, both showing in the last half mile fleet and square trotting. It was now evident that the mare was not equal to the task of beating Brigadier, as he led from start to finish in 2:24, and took the race, but at some future day she will take her revenge when at her best form. Altogether it was a fair race, with some fine bursts of speed for the two given horses.

On the fourth day the attendance was much larger during the morning hours, and the stock attracted much attention, the prevailing opinion being that the parade was a great credit to the Golden Gate Fair. Towards the afternoon, when the San Francisco delegation had arrived, the grounds presented a very animated appearance, there being a large number of ladies present on horseback, in carriages, and in the grand stands. The first was a trot for two-year-olds, in which there were but two nominations, both from the same stables, Neluska, belonging to L. J. Rose, and Ruby, owned by T. W. Mackey, they both being sired by Sultan. As it was understood that this would be a real trial of speed, a good deal of money was invested, Neluska holding the best position in the betting. Neluska made the pace and was leading at the quarter in 37 seconds by two lengths, but at the half, in 1:15, the gap had been reduced by half that distance, and Ruby gradually moving up the race appeared to be very evenly and steadily contested until the finish, when it was seen that Neluska, had a few inches the advantage, passing the wire in 2:30, the best time made in the two-year-old form in a race, Eva having trotted at the last Sacramento fair against time in 2:26, and the later performances of Wildflower

in 2:21, is not likely to be forgotten for years and years to come. The second heat was a repetition of the first, save that at the distance when on pretty even terms, Ruby stayed the longest and won handily in 2:34, the quarter having been made in 38, the half in 1:16. In the final heat Neluska was so tired that she was not persevered with and Ruby jogged in, the time being 2:40. Neluska was beaten, but then it must be remembered that she was sick for a long time this last summer, and is yet weak from its effects, and it may be she will show better powers of endurance when she has fully regained her strength. Mr. John W. Mackey was present and received many hearty congratulations on the success of Ruby, who promises to be a great credit to the Sunny Slope Stud Farm.

Then came a special trot between Frank Moscow, Marin, Rowdy Boy and Vanderlynn, the latter being installed a great favorite, and as he was well driven and in prime condition the race was never in danger, he coming out first in every heat, but the third one was given to Rowdy Boy, as Vanderlynn had indulged in some running in which the judges were of the opinion that he had gained too much ground before he was brought to his gait. The time was 2:30, 2:27, 2:30, 2:28. The races were brought to a conclusion with a selling purse of \$250, a dash of a mile, in which Euchre, with \$100 to \$20 on his chances, fairly galloped away from Haddington and Inauguration in 1:43, and although the winner was entered to be sold at \$500, there was no bid made for over and above that amount.

The Horses.

Of the thoroughbreds in the stallion class, the veteran Thad Stevens is present in fine form, also Wm. Bost's Nathan Coombs by Lodi and Ira J. Gift's Idler by Wildidle.

Thoroughbred stallions one year old: J. C. Simpson's Sir Thad by Thad Stevens, dam Lady Amanda; Ira J. Gift's Billy Foot by Norfolk, dam Kate Gift.

Colt under one year: J. C. Simpson's Cito, by Joe Hooker, dam Too Soon.

Thoroughbred mare three years old and upward: J. C. Simpson's Too Soon, by Norfolk, dam Lady Davis.

Mare two years old: Ira J. Gift's Miss Gift, by Wildidle, dam Kate Gift.

J. C. Simpson's Lady Viva, by Three Cheers, dam Lady Amanda.

Mares one year: John Leach's Miss Stevens, by Thad Stevens, dam Minnie.

Families: R. P. Clement's Thad Stevens and 5 colts.

Families other than thoroughbred: Antonio Bellina, Hayward's General Grant and five colts.

Stallions of all work three years old and over: A. A. Smiler, Pleasanton, Carl Carr.

R. C. Baldwin, Danville, Gold Hill.

Henry Pierce, San Francisco, Alonzo Hayward.

Antonio Bellina, Haywards, Gen. Grant.

Ira Munion, Dixon, Pedro Jr.

L. Barnes, San Jose, Don Pedro.

Chisholm & Sacksider, Oakland, Black Prince.

L. Hewlett, Oakland, George Washington.

Stallions two years: P. J. Shafter, Olema, Black Prince.

Antonio Bellina, Haywards, May Boy.

W. S. Brown, Petaluma, Monarch.

Stallions one year: Antonio Bellina, Haywards, Frank.

Mares three year old and over: L. Hewlett, Oakland, Brownie H.

Antonio Bellina, Haywards, Dolly.

Mares one year: R. P. Clement, Alameda, Lugina.

Ben E. Harris, St. Francisco, Abbotine

Filly under one year: Chisholm & Sacksider, Oakland, Lill.

Roadster stallions four years and over: W. K. Robinson, Santa Ana, Odd Fellow.

P. J. Shafter, Olema, Rustic.

W. D. Hammond, Oakland, Grand Moor.

Henry Pierce, San Francisco, Alonzo Hayward:

E. Stone, San Leandro, James Lick.

Stallion three years: J. F. Houghton, Oakland, Belmont Chief.

Stallion two years: Chas. Duerr, Sunol, Meteor.

Geo. Copsey, Oakland, Redwood.

L. Hewlett, Oakland, Echo Jr.

J. M. Learned, Stockton, Harmony.

Yearlings: P. J. Shafter, Olema, Sir King.

J. A. Goldsmith, Oakland, Sidney.

J. A. Goldsmith, Oakland, Judge S.

Antonio Bellina, Haywards, Elijah Belmont.

J. C. Simpson, Oakland, Antevolo.

Sucking colts: W. D. Hammond, Oakland, Tom Moore.

Same, Maid of the Oak.

Antonio Bellina, Haywards, Royal Boy.

B. C. Harris, San Francisco, Littleton.

Same, Style.

Mares or geldings, three years: W. K. Robinson, Santa Ana, Patriarch.

D. Berry, Oakland, Molly.

W. D. Hammond, Oakland, Lady Lightfoot.

Same, Hambletonian.

S. Rosenstock, Oakland, Prince.

Two years old: L. J. Rose, Los Angeles, No Name.

Yearlings: Chas. Duerr, Sunol, Goldelse.

B. E. Harris, San Francisco, Rose Abbott.

Sucking colts: W. D. Hammond, Oakland, Maid of the Oak.

B. E. Harris, San Francisco, Littleton.

Same, Style.

Roadster matched span: C. Younger, San Jose, Whisper and Mate.

S. W. Sawyer, Oakland, Prince and Bill.

Newland & Purney, Oakland, Jack and John.

Draft Stallions: A. J. Pierce, Point Reyes, Charlemagne.

W. S. Brown, Petaluma, Tornado.

Chisholm & Sacksider, Oakland, French Spy (imp).

Same, Papalon.

Same, French Spy 2d.

Two years old: F. Thalman, Pinole, Pinole Chief.

One year old: Chisholm & Sacksider, Decide.

Under one year old: Chisholm Sacksider, Spy Jr.

Mare. Three years old: Chisholm & Sacksider, Kate.

W. S. Brown, Petaluma, Gertmde.

Chisholm & Sacksider, Lizzie.

Mare, under one year: Chisholm & Sacksider, Puss.

Carriage Horses: Mrs. Rose Duffy, Oakland, Jack and George.

Saddle Horses: B. E. Harris, Mike Peer.

Same, Major Jacks.

Ira Munion, John Henry.

Cattle—Jerseys.

Henry Pierce of San Francisco, who is an enthusiastic admirer of the Channel Island strains, exhibits 19 head of thoroughbred Jerseys, at the head of which stands imported Victor of Yerba Buena, nine years old, who arrived this season. The yearling bulls William of Scituate and Electric stand next, followed by Como of unadulterated blood, one of which, Fanny of Yerba Buena, is a granddaughter of Coomassie,

so celebrated in the annals of the Jerseys. Four yearling heifers and two yearling bulls, and four heifer and two bull calves less than one year old, make up Mr. Pierce's herd at the fair grounds.

Guernseys.

Mr. Pierce also shows five head of Guernseys, the bull Champion of Guernsey and four cows, all imported.

Ayrshires.

Geo. Bennet of Redwood is the only breeder of Ayrshires represented and his exhibit includes the bulls Archie, 3 years, Lindo, 2 years, Macbeth, 1 year, and bull calf Melcomb, with six cows, all sleek and shining in the snug and diminutive form characteristic of the race.

Durhams.

Of these the delegates were numerous. Col. Younger of Forest Home Farm, San Jose, eighteen head, the patriarch of which is the second Duke of Alameda, 4 years old, third Duke of Alameda, Forest King, and fourth Duke of Forest Home, each 1 year following in the order named. The Colonel shows five cows over 1 year, four heifers 1 year, two bulls and two heifer calves.

Paige Bros.

Of Sonoma, show fourteen head of Durhams—the bull El Medico, 6 years, at the head, with Lord of Clover and Cherry Prince, each two years, following; four cows, over one year; four yearling heifers, two bull calves, and one heifer calf under one year, complete the list. As may be expected, the stalls occupied by Col. Younger and Paige Bros. are much frequented by visitors, the opportunities for comparison being the leading attraction; but if a line can be drawn between the two herds, it must be done by some technical expert, and even then it would probably be more a question of predisposition than judgment, so even is the balance and so perfect in detail do these different collections appear to be.

Miscellaneous.

In addition to the fine displays made by the systematic, and, in one sense, professional breeders, there are some by private parties that are of a character that evince a pardonable pride on the part of the exhibitors in their family pets.

J. S. Wall, Oakland, shows bull Modoc, 2 years; cows, Young Duchess, 4 years, and Bonita, 3 years, and heifer calf, 6 months—all blue-blood Jersey.

P. J. Shafter, Olema, Jersey cow, Mouse, 4 years.

J. S. Emory, Oakland, Jersey bull, Terry, 1 year.

Wm. Mahoney, Berkeley, Jersey bull, Young Glory, 1 year.

F. K. Shattuck, Berkeley, Jersey bull, St. Valentine, 18 months.

A. J. Snyder, Oakland, Jersey bull, James Hayward, and cows, Lizzie, 6 years, and Dot, 1 year.

Mrs. R. P. Clement, Alameda, Jersey cows, Jessie Weeks.

Second, 6 years, Alfalfa, 4 years, Nancy, 2 years; heifers, Vira, 20 months, and Bunny S., 15 months.

F. K. Shattuck, Berkeley, Alderney cow.

Sheep.

Col. Younger exhibits Cotswold ram, Hancock, and five ewes.

George Bank, Redwood, Southdown ram "No name."

J. H. Strobbridge, Haywards, Spanish Merino ram and a pair of fine ewes; also a pair of fine lambs.

Woolsey & Son, Sonoma county, ram and pair of fine ewes and pair of fine lambs.

Swine.

In this department A. C. Dietz exhibits a pair of Berkshires, and T. McInnery a Berkshire boar.

BICYCLING.

Moore, the winner of the one and twenty-five mile English amateur championships, is now in this country, and will no doubt shortly give American riders a chance to find out what their relative speed is.

Two or three entries are promised from the professional ranks to compete for the prizes offered by the management of the Golden Gate Fair, and there will also be some fancy trick riding. This part of the programme takes place Saturday, the 9th.

Notwithstanding the prediction of one of the daily papers of this city, the entries for the athletic meeting of the 23d promise to be sufficiently numerous to make a series of very interesting races, with a good prospect that the Pacific coast record will be broken.

It is to be hoped that when the home production commences, the makers will carefully study the abandoned experiments, as well as the popular styles of the numerous English makers, so that whatever they produce shall at least be equal to what has already been done.

The Eastern bicyclist is not happy. With the thermometer away up in the nineties, and the perspiration starting from every pore at the least prospect of exertion, he is much more inclined to lounge at the various beaches, bathe in the surf, or taking yacht excursions than to work his own passage upon the inland.

The demand for tricycles in this country is slowly but steadily increasing. While the three-wheeler is not likely to supplant the bicycle, it will make it possible for a larger number to enjoy the pleasure of wheeling, and not the least of the enjoyment will be the rides upon the "sociable" or double machine, with a lady companion.

The American Star bicycle, having the small wheel in front, has been pretty thoroughly tested by the Louisville (Ky.) bicyclists. One of the number purchased a Star, which not being approved by his fellow wheelmen, they commenced a systematic endeavor to run it out. The result has been to win friends for the novel machine, which has proved itself about equal to the old one in climbing, far ahead of it on a down grade, and is not quite up to it on a level.

A Buffalo (N. Y.) man is reported to have constructed a steam-engine-driven tricycle. The engine is placed between the seat and the forward wheel, the boiler is of the upright pattern and the fuel is gasoline which is supplied by pipes from a tank beneath the seat; the engine is of one and one-half horse power, and it is said that a consumption of one gallon of gasoline per hour will drive the machine for nine hours at the rate of fifteen or twenty miles per hour. We prefer to see it tested before giving entire credence to this statement as this is not the first experiment of this sort which we have seen.

Miss Lillian T. Smith, a young lady only eleven years of age, gave an exhibition of her shooting with the Ballard rifle last Tuesday at Petaluma. Of 170 balls thrown up twenty feet, twenty feet distant, she only missed nineteen. She shot at the rate of ten shots in 48 seconds. Very good for a little one.

The Shooting Season.

It has been the experience of the writer within the past twenty-five years that, eighteen times out of twenty, by the sportsman going direct to the house of the farmer or rancher and asking for permission to shoot over his lands, it has been cheerfully and readily granted, and frequently I have found the farmer or one of his boys, if he has any, willing to show where the birds are located, and very often followed by a kind invitation to join the family at dinner. Therefore I

Alameda Club at Bird's Point.

Wild Rice for Ducks.

BATTLE MOUNTAIN, Nev., Aug. 25.

Wild rice should be sown in the fall when wild seeds ripen and drop. All that is necessary is to sow it in the water from one to six inches deep, and also some should be scattered on the ground that overflows just before the fall rains set in. Some of the seeds will catch the next spring, and water-fowls will begin to feed on the young grass as soon as it is up, thereby insuring their presence ever after in increasing numbers; for every bird that has once been there and raised young will return with her young in the fall, and the young in turn will bring their young in the future, so they constantly increase year by year, and I would advise your sportsmen who have leased grounds to try it this fall. The seed can be procured of the editor of the *American Field*, E. Eaton, of Chicago, W. H. Holabird of Valparaiso, Ind., or Petty & Collins, Omaha. It costs in the neighborhood of \$12 per barrel. We have ordered some to come this fall from the latter firm, which we propose to sow in the upper Humboldt river, in Nevada, which will eventually spread to the sink of the Humboldt, and your sportsmen must look out or Nevada will hold your ducks away until the last hole is frozen over with ice. Try wild rice, brother sportsmen.—Hoosier, in *Sacramento Bee*.

The Watsonville Pigeon Shooting.

The match commenced at 1 o'clock and lasted about two hours. A sharp breeze blew across the grounds, but as the contestants shot with the wind it did not interfere with them, but harassed in-flying birds. Most of the birds were strong flyers, but there were a few squabs who would not fly. The match was shot to California State Sportsman's Association rules, at 10 birds to each man, 21 yards rise, birds sprung from plunge traps. But few of the contestants had ever shot at pigeons, and hence many of the scores can be considered good, notably those of White, Frutig, Fletcher and Eastace. In our opinion White and Frutig were a close match and the best trap shots on the ground. Eastace and Fletcher are reliable shots, men who will always make a good average. Ren, who is a young man, is a coming shot, and has won the club medal at Gilroy. Millikin was the quickest snap shot, and like

The run of orders from the country on gun and ammunition stores shows that there will be a grand slaughter of the innocents as soon as the game law is out, on the 15th of this month.

A LARGE BEAR.—Norman Kingsley killed a brown bear Thursday, August 17th, in the mountains west of Taylor's ranch, that weighs 700 lbs. The bear had been killing Tyler's cattle for some time, and in order to get rid of him, Kingsley had set a trap for his bearship near an animal he had killed the night before. When he came to get a second meal he got one of his feet into the trap, which he pulled loose from its moorings, and dragged the trap and chain with him into the brush. Kingsley took the trail and followed it until he found old Bruin, and with a well directed shot laid the cattle destroyer dead at his feet. He was not very fat, but would have got so in a very short time if he had been allowed to kill all the cattle he had wanted.—*People's Cause.*

Dr. Hayes denies the charge made against him in the BREEDER AND SPORTSMAN of some weeks since that he killed an innocent, unoffending billy-goat, mistaking it for a deer, while deer-hunting in Nevada County. But the proof is overwhelmingly against him, as in the Pearson hog-killing case.

On August 27th a pigeon shooting match took place at Stockton between L. F. Lastreto and A. E. Mayers, 25 birds each, at 21 yards, with boundaries fixed at 10 yards. Lastreto won. score, 20 to 15.

THE RIFLE.

Composition of Gunpowder.

BY DR. E. H. PARDEE.

(Continued from No. 7.)

Gunpowder is a mechanical combination of niter (or saltpeter), charcoal and sulphur, and while it may be regarded that the niter is the most important of all the ingredients, chemistry has elucidated the fact that no one of the three component parts can be taken away and any other substituted in its place that will make the compound as perfect as the original given us by Roger Bacon. Therefore it is safe to say that gunpowder has not undergone any material change, as regards its component parts, for the last six hundred years, while the material used has been refined and improved in many ways, resulting in a superior article, and now fitted to the different calibers, in accordance with established laws of gunnery.

Niter is a compound of three parts each of oxygen, nitrogen and potassium; and by the chemical action of these parts on each other, and the attraction and repulsion of affinities existing between them at a high temperature, an immense effect is produced on gunpowder by the application of fire.

It is true that gunpowder is made without the use of sulphur, and it has been claimed by some that it is not an active agent in the propellant power, but both experience and theory have taught that the compound is more complete with the addition of sulphur. Without it gunpowder is not capable of producing so perfect a gas, less regular in its action, more porous and friable, possessing less firmness in its granules, consequently cannot bear transportation without crumbling into dust, and more easily affected by damp and rainy weather.

Says the Edinburgh Encyclopedia: "There is one good reason for the use of sulphur, although it does not contribute to the production of any elastic fluid. The carbonic acid which is generated would doubtless combine with the potash, if it were not for the presence of sulphur, and thus so much of the elastic fluid would be lost. That this is the case we know to be true, from the fact that carbonate of potash is always formed when niter is decomposed by charcoal alone, which fact I shall almost immediately show." This, I have no doubt, is a fact, which I have proved to my entire satisfaction from experiments made on this subject, and which are in accordance with chemical analyses also. The sulphur is engaged during the combustion of the gunpowder, and expels a portion of the oxygen from the potash, and unites with the potassium and forms a sulphuret of that metal.

Any observing sportsman has witnessed the fact that no sulphuretted hydrogen can be detected by the sense of smell, or in fact by any ordinary tests, coming from the residuum always left in the breech of the gun after firing; but as soon as he puts down the wet wiping rod, the decomposition by the moisture which the sulphuret of potassium draws from the atmosphere causes, by this decomposition and liberation, a gas that makes the sportsman clasp his nose to prevent the inhalation of fetid sulphuretted hydrogen, generally potassa, or that substance better known as potassum.

Chemical science has taught us, in the manufacture of gunpowder, that an exact amount of each ingredient is necessary in order to make the article perfect.

The government of the United States has adopted the present formula, and it is almost the same as that of England and other European nations: S plus C³ plus K O N O⁵ = 3 C O² plus N plus S.

Recognizing that gunpowder is made strictly after the above formula, it becomes absolutely necessary, in order to acquire their most perfect combination and to secure the largest possible amount of gas, that the ingredients should be reduced to an impalpable powder before their combination, as it is a law both in philosophy and chemistry that the closer particles are united the more readily will their affinities be influenced the one for the other. Thus oxygen and hydrogen can be united so as to form water, but no union or combination will take place, for the good reason that the particles of the two gases are not sufficiently close to each other for their chemical affinities to be brought into play. But the brilliant discoveries in chemistry tell us that to create great pressure and force these gases together, an immediate combination takes place, and the production of water is the result. Therefore in order to insure the most perfect combination of the ingredients of gunpowder, the same conditions are necessary, that is, that the minute particles of niter, charcoal and sulphur must come in close contact, or the explosive power of the combination will be trifling at best.

In a former communication I stated that in some subsequent article I would give the capacity of gas generated from one hundred grains of American rifle powder. It is an estimated fact that to ignite 100 grains of gunpowder in an ordinary temperature of the atmosphere, that is, in the open and unconfined air, the gas would occupy a space three hundred times as great as that of the bulk of the powder used; but taking into consideration the intense heat at the instant of the explosion, the gases occupy at least one thousand five hundred times the space occupied by the original gunpowder.

But I am not satisfied with this imperfect explanation, and will illustrate so that the reader will more easily grasp the idea. Take a rifle barrel, caliber fifty-hundredths, or one-

half inch in diameter, and one hundred grains of powder would fill the barrel about two inches at the breech; ignite this two inches of gunpowder, and you will have generated a gas that will fill a barrel three thousand inches long of the same caliber as that in which the gunpowder exploded. With this immense powder generated, in the twinkling of an eye, almost instantaneously, behind the projectile, starting it from its quiet state of inertia, at its point of initial velocity or 1,600 per second, is it to be wondered at that the bullet undergoes the process of upsetting, or changing its original shape and contour? Or that the hard metal shot should break into fragmentary parts, and fly off in tangents like the asteroids of a once glorious and magnificent planet.

I will in due time refer to this almost incomprehensible power of powder gas, a subject so many are familiar with in its practical workings, but possess so limited a knowledge of the fundamental principles of the laws which govern it. I find very few sportsmen that will admit that there is any difference between the terms *propellant* and *explosive*, but there is such a striking difference that a little explanation will make it apparent to the casual observer—the terms are not and should not be used as synonymous, as all must admit that a chemical compound may possess the *explosive* power in a much greater degree than the *propellant*; fulminating gold, silver and mercury, and nitro-glycerine are all of the high order of explosives. But neither of them possesses the same projectile force that gunpowder does. Nothing can resist the exceeding intensity of the action of fulminating powder. A charge of dynamite when ignited exerts an equal power in all directions, and if it is carelessly placed on the top of a rock or boulder and ignited, it will overcome the cohesive power of the rock, and cause it to break into fragmentary parts as much as though it had been carefully laid beneath the rock when ignited.

Therefore a shot fired by any of these fulminates cannot be projected as by gunpowder, but has a tendency to split into fragmentary parts by the velocity created by its instantaneous explosion.

I remember a few years ago, I had an esteemed friend who used gun-cotton in one of Billingshurst's bookjack-stocked pistols; while he claimed quite as good shooting as with gunpowder, it was done with composition hard-pointed bullets, and with very small charges of cotton. Any one can manufacture it with little expense, but I should advise all not to toy with it. The usual manner of preparing it is by steeping cotton or wool for a short time in a mixture of sulphuric and nitric acid, then washing and drying at a gentle heat. Gun-cotton chemically contains the elements of gunpowder, viz: carbon, nitrogen and oxygen; while at the same time it possesses another highly elastic gas, hydrogen.

The curve in the fibers of the wool presents to the action of the flame a considerable surface in a small space, terminating as near as possible to the instantaneous, causing from its rapid ignition a violent recoil of the gun, as sufficient time is not given to put heavy bodies that lie in a state of inertia in motion, and as a consequence it cannot be used with either safety or satisfaction as a propelling force. Again it is an exceedingly dangerous compound, as numerous accidents have happened from its exposure to the sun, and other various causes.

I intended, Mr. Editor, to have closed my remarks on gunpowder in this communication, but as a full understanding of this subject will have a great bearing on my future remarks upon the theory of trajectory and projectile I will be compelled to ask your indulgence for extended remarks on this subject.

[To be continued]

The International Rifle Match.

For the first time since they were elected the American team were all present at Ormeau on the 26th of August. The weather was splendid, except that a wind from 2 to 6 o'clock bothered the riflemen somewhat. Only the 200, 500, 600 and 1,000 yards ranges were shot over regularly, but each man was allowed to fire one or two shots over the 800 and 900 yards ranges in order to get the proper elevation and sight for the longest distance. No record of the shots fired over the last named ranges was kept. The shooting over the short distances was in the main very good, but at 1,000 yards it was poor. John Smith, of the Ninth New Jersey Regiment, headed the list with 118 points, C. W. Hinman following with 117, J. M. Pollard and T. J. Dolan with 115 and D. H. Ogden with 113 coming next in their order. Pollard made a clean score of 35 points at the 500-yard range, D. R. Atkinson being only one point behind. The coaching was done by Colonel Bodine, his adjutant, Captain C. F. Robbins, Ransome Rathburne and Dr. S. T. G. Dudley, who wore the uniform of the team of '77. The team, with three exceptions, used their own weapons to practice with. The exceptions were Messrs. Atkinson and Hinman, who used the new Remington-Heppburn rifle, and J. L. Paulding, who shot with the Hotchkiss gun. The following is the score:

Name.	200.	500.	600.	1,000.	Aggregate.
M. D. Hinds.....	29	28	26	13	96
D. H. Ogden.....	29	29	28	27	113
T. W. Grijth.....	31	32	22	26	111
N. D. Ward.....	26	27	30	14	97
D. R. Atkinson.....	30	34	31	21	116
C. W. Hinman.....	31	36	31	25	117
J. Smith.....	31	29	32	26	118
E. O. Shakespeare.....	28	30	27	23	108
A. B. Van Heusen.....	29	31	24	24	108
J. L. Paulding.....	31	30	26	24	111
Colonel G. E. P. Howard.....	29	33	27	18	107
J. McNevin.....	28	28	24	19	99
J. M. Pollard.....	30	35	28	22	115
S. E. Hain.....	26	21	23	17	86
T. J. Dolan.....	30	29	30	26	115
Fred A. Her.....	30	30	24	11	95

The date of the match has been changed to September 14th and 15th, and the subscriptions for the necessary expenses amount to upwards of \$2,000.

THE NATIONAL AGAINST THE CARSON GUARD.—A rifle match came off last Sunday between the National Guard, Company C, 1st Regiment, and the Carson Guard of Nevada. The National Guard shot at Shell Mound Park and the Carson Guard at their range at Carson. The teams consisted of ten men each, ten shots at two ranges, 200 and 500 yards. The scores made by the National Guard were, Merryweather 43 at 200, 44 at 500, total 87; Cummings, 42 and 36—78; Kelly, 44 and 40—84; Raye, 42 and 47—89; Snook, 45 and 41—86; Sine, 42 and 42—84; Perkins, 43 and 41—84; Klein, Julius, 41 and 41—82; Templeton, 41 and 40—81; Klein, J. E., 43 and 46—89. Grand total, 834. The scores telegraphed of the Carson Guard were: Thaxton, 44 and 45—89; King, 42 and 46—88; Little, 43 and 45—88; Haskins, 40 and 44—84; Saffie, 44 and 40—84; Parker, 38 and 44—82; Cheney, 42 and 39—81; Crawford, 42 and 38—80; Borges, 40 and 39—79; Chesley, 39 and 37—76. Grand total, 819. The Carson Guard's representative at Shell Mound was Lieut. Pierce of the Oakland Light Cavalry, Lieut. Galusha of the Emmet Guard of Virginia City representing the National Guard at Carson.

The San Francisco Schuetzen Verein held their regular shooting tournament at the Alameda range last Sunday. The winners of the first three prizes on the Company targets are Messrs. Boeckmann, Schmaecke and Ehrenpfort. The Company prizes will be distributed next Friday. The winners of the first three prizes at the public targets are Messrs. Stanton, Kuhls and Shreeke. The special prize for the first bulls-eye in the morning was won by F. Brandt; the special prize for the last bulls-eye at night was won by Mr. Fischer, Jr.

Sept. 1st a rifle match took place at Schuetzen Park, Alameda, between Philo Jacobs and Henry Plagemann, in which Jacobs gave Plagemann the odds of 100 rings. The following are the totals in ten shots: Jacobs, 194, 205, 198, 220, 207, total, 1,024; Plagemann, 178, 179, 184, 169, 161, and 100 rings (given by Jacobs), total 971. This shows Jacobs to be the winner with 53 to spare.

ATHLETICS.

ONE HUNDRED YARDS IN 9½ SEC?—From Winnipeg, Manitoba, under date of Aug. 19, we received the following: "The great foot race, one hundred yards, between Charles McIvor and an unknown, for \$2,500 a side and the championship of America, took place this afternoon at 3 o'clock at Dufferin Park, and was witnessed by at least two thousand people. Great excitement prevailed, and from \$2,500 to \$3,000 are said to have changed hands. The unknown is given as D. H. Madara, of Rochester, N. Y., and is backed by George B. Eldridge, of the same city. The race was the best two in three heats, and two straight heats were taken by McIvor in 9½ and 9½ seconds. Mr. Armstrong of Detroit won a large amount on McIvor. McIvor always got the start on his opponent, but the latter almost made up the loss before the finish of the race. The winner won the first heat by two feet and the second by three feet. Pools were sold, prevailing odds being 100 to 70 in favor of McIvor."

We have written to several reputable parties who witnessed the contest, for information regarding the correctness of the time and the amount of money posted. Until we hear from them, we will refrain from criticism, merely questioning the 9½ sec. and the \$5,000 stake; 9½ is much too fast for McIvor, and \$2,500 a side on a 100-yard sprint, that took place in Manitoba—well, we don't believe it. —*Turf, Field and Farm.*

DISPUTED RECENT ENGLISH AMATEUR PERFORMANCES.—The 50 1-5 sec. 440 yards run of Mr. H. B. Ball, amateur, reported to have been made July 29th, at Home Park, Windsor, over grass, is not accepted by the more discriminating of our English contemporaries. The same runner's 220 yard performance at the Aug. 5 games of the Moreley Harriers, as well as his time in the 300 yard event, at the same meeting, is also questioned. Regarding these performances, *Bell's Life* says: "It is necessary to draw the line somewhere, and we must certainly do so at this latest of the Midland records. According to the official timekeeper, our London flyer did six yards inside 'evens' in the 220-yards handicap, the race being alleged to have occupied 21 1-5 sec., and Ball getting within two yards of the winner. If this form were true, Myers and Phillips would have to 'take a back seat,' as Ball should be able to give either of them ten yards and hold them pretty safe. Yet, we fancy long odds would be laid against the scratch man, and by those, too, who do not as a rule throw their money away. Ball's reputed time in the 300 yards race is also rather too warm. He won that event in a canter by seven yards, 'looking round all down the straight,' and the time was given as 31 1-5 seconds, or about four yards and a half worse than Hutchin's best, or three yards better than Myer's record. Most likely the old excuses as to the course and the direction of the wind will be urged. In that case it would be obviously unfair to men who have achieved their records without adventitious aids, that a runner who is favored either by a downhill course or a gale of wind behind him should have the credit of beating their time."

Late Base Ball Notes.

It is said that the Reddington and Olympic clubs will play a match at Sacramento during the State Fair, but it would be far more interesting to the public if the Olympics could arrange a match with a team chosen from the leading players of the Capital's clubs.

The juniors of the University have organized a base-ball club. The nine is composed as follows: Wallace catcher and captain, Ramm pitcher, Bosse first, Beatty second, Mezes third, Huggins left field, Chase center field, Pond short stop.

The Reddingtons played a match last Sunday morning with the Underwriters' club at the Recreation grounds that was well contested, the Reddingtons winning by a score of eleven runs to ten.

The game to-morrow at the Recreation grounds will be between the Renos and the Haverly Theater nine.

Joseph White, of Bake Oven, Wasco county, Oregon, began as a sheep herder in that region without funds five years ago. He recently sold his band of sheep for \$6,000. From his this year's shearing he sold from 678 ewes, \$1,178 worth of wool and raised 478 lambs.

We have received the first number of the BREEDER AND SPORTSMAN, published at San Francisco, and edited by Mr. J. C. Simpson, and it presents a fine appearance. It is the kind of a paper which has long been needed on the Pacific Coast, and it is hoped that it will meet with generous support. Its discussion of breeding topics will rouse interest in that subject and add to the value of the products of breeding farms, and its treatment of the turf will swell the receipts of racing parks. The journal which is devoted to breeding and sport, and which is conducted with enterprise and ability, frequently puts more money into other people's pockets than its own, but we cannot believe that such will be the result of Mr. Simpson's venture. If the breeders and track managers of the Pacific Coast do not sustain him, they will not deserve to reap the benefits which will grow under the fostering care of a vigorous home organ.—*Turf, Field and Farm.*

We are in receipt of a new paper, THE BREEDER AND SPORTSMAN, Joseph Cairn Simpson, editor and proprietor. Its typographical appearance is excellent, and it is devoted to the interest of stock-raising, as well as to a variety of other matters interesting to sportsmen. It is edited with marked ability, published in San Francisco, and we commend it to breeders, sportsmen and others.—*Lower Lake Bulletin.*

THE Breeder and Sportsman.

PUBLISHED WEEKLY BY THE
BREEDER AND SPORTSMAN PUBLISHING CO.

THE TURF AND SPORTING AUTHORITY OF THE
PACIFIC COAST.

OFFICE, 508 MONTGOMERY STREET
P. O. Box 1333.

Five dollars a year; three dollars for six months; one dollar and a half for three months. Strictly in advance.

MAKE ALL CHECKS, MONEY ORDERS, ETC., PAYABLE TO ORDER OF BREEDER AND SPORTSMAN PUBLISHING CO.

Money should be sent by postal order, draft or by registered letter, addressed to the "Breeder and Sportsman Publishing Company, San Francisco, Cal."

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith

JOSEPH CAIRN SIMPSON, - - - EDITOR

San Francisco, Saturday, Sept. 9, 1882.

THE GOLDEN GATE FAIR.

The present fair of the Golden Gate Association has been one of the most successful ever held. In fact at the time of writing there has not been a hitch or anything to mar the smooth running of all the departments. The decisions have been satisfactory all through, and every contest evidently "straight." There have been several notable performances. The running of Red Boy in the fastest time ever made on the Pacific Coast was something of a surprise to those who were only aware of his losing three of the big \$5,000 matches, and speaks well for the change of climate from Salt Lake to Oakland. He is a fine looking horse showing the Sovereign conformation as well as that of his son. As he only beat Night Hawk by a few inches the honors may be considered easy, and when it was granted that the mare was scarcely up to the mark her performance was still more wonderful. The two-year-old race was a very fair one considering that the first and second in it had each a penalty of five pounds and that between the three-year-olds was one of the close finishes which always raise the enthusiasm of the spectators. The two mile run of Precious was proof that a faster pace in the other for the first mile might have turned the tables, though the Duke of Monday has such a rare flight of speed that any one which beats him will have to rate along at a good clip from start to finish. Even with the ten pounds allowance the running of Euehre in 1:43½ was a very good showing as he still carried 108 pounds, and for Inauguration to keep so close to him with the same weight is not a bad mark for a three-year-old.

The trotters have shown very well. Manon, the handsome daughter of Nutwood, is surely an animal of fine promise. For a five-year-old in her first race to make 2:24 after rather a bad start compelling her to trot around the others, making a break soon after the start, is a very good record. The Nutwoods are certainly coming to the fore and the full seasons he made in California will be of immense benefit to the stock of the State. Although Sweetness was unfortunate it cannot be said that she was in reality disgraced. The "leg" is a troublesome thing for her trainer to contend against, and if she were entirely sound the work might be more in accordance with ensuring her coming up to the mark for a bruising race. Albert W. is a great colt; he had been in the clutches of the pinkeye, had fallen down in transit to the Bay District, which mishap entailed broken knees, and trotted two very hard races up the country. In the race he won the intuition was to draw him, and his trainer was only a few minutes late to get him out of the race. The rules are somewhat inexorable and the appeal to the judges to prevent him being "scratched" had to be decided against. His combination of Electioneer and John Nelson blood will give him a value outside of the tracks, and his place in the stud is already assured. Adrian, the three-year-old, which won in straight heats, is also a remarkably promising colt. He is of fine size, capital form and action that is an augury of still better doings. He is a grandson of Alexander, his sire being Reliance, and there is scarcely a question of his taking a place in the gallery of notables at some future day. The description of Alexander which accompanies the illustration was of necessity too brief to do justice to the claims of the horse and his distinguished relations on this coast. When the busy season is over there will be more time to enter into details, and fortunately for the scribe who does the pen portraiture there is abundant material in California for many disquisitions on breeding. Vanderlynn, the winner of the special race, is of the same blood as Alexander on the side of the sire and with that he combines some of the stoutest strains in the American Stud Book. Although rather on the "in and out" order, as shown by his public performances, he is a horse of fine speed, and that he will stay is a merit which should follow the in-

heritance. Being his first season, without any great deal of preparatory work before trotting in races, there are strong probabilities that he will develop into a first-class performer.

The two-year-olds made a display which can only be seen in California. Though Neluska has been sick for some time, ailing so that blisters had to be resorted to, she gave evidence that the family inheritance of speed has fallen to her lot as well as the others which have the same dam. It would have been better, perhaps, not to have trotted her, as the difference between the time of the first heat and the third was so great that to those who were not aware of the difficulty she labored under it seemed as though she would have to take rank with the impostors which dazzle to mislead. She trotted the first heat easily in 2:30½, and the merit of this performance is apt to be overlooked in California where so many of the same age have beaten it. Nevertheless, it is faster than has ever been made outside of this State and the fastest time on record when two or more trotters were engaged.

The falling off in the second was not great, but the third showed a gap which was very marked. People are prone to ascribe to one strain in a pedigree whatever shortcomings there are, and a few who had backed Neluska gave her dam the anathemas for the lack in stamina of the daughter. As the winner, Ruby, is by the same sire, this gave a little color to the claim, and had it not been for the lack of condition which the sickness entailed the reasoning would be good. Ruby showed the very reverse qualities and it is nearly certain that she could have trotted the third heat as fast, probably faster, than either of the others. As she was bred by Mr. Maekay there is an additional satisfaction to him in the victory, and there is not a particle of risk in making the prediction that she will eventually develop into a first-class mare.

Mr. Rose will share in the glory as she was not only bred at Sunny Slope, but has been trained there, and only taken from "the stable" when the rules compelled the change. We cannot close without congratulating the managers of the Golden Gate Fair on the complete success of the exhibition. Though this was well-deserved from the efforts which all made even labor does not always meet the proper reward. President, directors, secretary, superintendent, committees, in fact, every one connected with the fair have worked hard to make it deserving of support.

A DEMORALIZING PRACTICE.

The indecent prominence given to the doings of a certain class of pugilists, by the daily newspapers and the flashier periodicals of the Eastern States is being emulated by the California press with one or two honorable exceptions and we regret to say that this ill-advised puffing of the class of people who bear such names as Tug Wilson and Slugger Sullivan is working a positive injury to the rising generation. To speak of the men whose names figure alternately as prize-fighters and vagrants in the newspaper reports of the day, as athletes and sportsmen, does an injury to the standing of athletics, more especially on this coast, where they are in need of fostering care and liable to be blighted by the chilling wind of adverse criticism. We are not at a loss to understand how a great and otherwise respectable newspaper will deliberately become the organ of a Sullivan or a McCormack, publish their slightest movements, and act as their mouth-pieces to throw out challenges or answer those from other men of the same class. It is bad taste and worse morality to do this, yet such papers as the New York Herald and Sun and their imitators on this Coast actually employ special men to write up the doings of brawlers, law-breakers and disturbers of the peace who, under the thin disguise of a pair of leather gloves, set at naught and defy the laws of the land.

A Captains Williams or a Captain Douglass, both of whom are doubtless well meaning, respectable men, in their way, dare to stand by and see the law against prize fighting broken because they know that the "great dailies" which are supposed to voice popular sentiment will sustain the prize fighters and sneer at those who try to suppress them. They argue that so long as the papers do not cry out against these vulgar shows the public want them and will express their displeasure at any attempt to stop such exhibitions. The papers justify the police, but it is as well to stop for one instant and ask how they justify themselves. Any city editor or publisher would, if asked this question, simply reply that their province was to give the news, and that any show that attracted the public attention was a proper thing to mention, and if very popular, to report in detail. They would further say: "The people like to read of such things and therefore we publish them." Now the instant those excuses are looked into and weighed their shallowness is painfully apparent, and reduced to plain language they simply mean that the publishers report such

affairs regardless of decency and morality, because their publication pays. The excuse that "the people have to read about prize fights," really means that the dregs of the people will buy a paper if they know it contains such a report. The people who do this are not regular newspaper subscribers, hence they have to make a special purchase at single rates, and the extra sales in this way will often put a hundred dollars or more into the pocket of the publisher. We do not believe that any paper in this city would lose a single subscriber if it ceased to publish these obnoxious accounts of affairs which are not sport but simply brutal exhibitions gotten up for the purpose of making gate money.

In writing of this subject one naturally asks: "Where is this sort of thing to stop?" Day by day the papers become more and more vulgar and vie with each other in pandering to the coarser tastes of the people. If it is proper to report prize-fights because it pays, is it not equally proper to report the evidence of brutality and bestiality with which our divorce courts teem? They are not more corrupting than the vivid photographs of fights, and are only a shade nastier to people of real culture and refined tastes. It is true the reports of which we complain are not worse than contemporary publications in book form. Perhaps they are not as bad as the degrading realism of Zola and Ouida, but it must be remembered that though it is possible to keep these books from the young and pure, a daily newspaper is ubiquitous and if the daughters and sons of the house are not allowed to read them in the parlor they can find them in the servants' hall. To us the present question of importance is: "How do these reports injure the interests of athletics in California?" To us the answer is self-evident. It is that by meretriciously exalting, as sport, brutal and degrading exhibitions which are not sport they injure the character and check the advance of those athletic and manly exercises to which the youth of this country, not forced to labor hard, must look for physical perfection; nay, for the least claim to be considered physically men. They cause a gentleman who has learned enough of boxing to be able to defend his person from attack or punish a ruffian to be spoken of with contempt as a shoulder-hitter, and so far have they blunted the public sense of propriety that less than two months ago one reputable paper actually conned over the names of gentlemen, members of the Olympic club, in search of some one to pit against the champion brawler and ruffian of America.

A rough is exalted to the place of a hero, and not a large paper in New York manly enough to pull the plumes of victory from his unhandsome heart and paint him ruffian as he is. We say that they injure reputable sport by their unsavory association, the same as the cheating tricks of the sharper years ago have made the race-track shunned by certain persons to this very day. If we are wrong we are open to correction but if we are right we will be vindicated in time. We have not in the past and will not in the future speak of their exhibitions or report them in any tone or temper differing from this writing, and from the support awarded to this paper by the respectable public we shall draw our conclusions as to the acceptability of the course which in the interest of true sport we have adopted.

THE STANFORD STAKES.

The third payment of \$100 in the Stamford Stake will be due the 21st inst. The race is to be trotted on the third Saturday in October, the 21st, over the Bay District course, and according to the conditions the last payment has to be made thirty days previous to the time set for trotting. Notice, accompanied with the \$100, on or before the time, to Jos. Cairn Simpson, Secretary of Stanford Stake, or R. T. Smith, Treasurer, Pacific Breeders' Association. This is the largest trotting stake for three-year-old colts which has been gotten up, and is likely to result in a very good race.

EDITORIAL NOTES.

The two-year-old trotting races excite a great deal of attention, and the performance of Ruby and Neluska in their race at Oakland, show that we are not likely to forfeit the reputation California has acquired of being second to no other State in the development of young trotters of high degree. The race at the State Fair on Tuesday next will be still more interesting as Palo Alto is represented in the nominations by Flower Girl, an own sister to Wildflower, and by Sallie Benton by General Bonton, his dam Sontag Mohawk, while Dr. Hicks has also entered his fine filly Pride by Buecaneer, dam by Flaxtail. With the exception of the last named all the above figure in the race for the same class at San Jose, and it will doubtless be one of the best attractions on the card of the San Mateo and Santa Clara Association that will induce a large number of San Franciscans to pay a visit to San Jose to witness this contest, the more so as the 2:25 class comes off on the same day.

THE STATE FAIR.

That the coming State Fair will be the finest exhibition ever held at Sacramento is beyond doubt. The entries in the speed purses insure this most attractive feature of all being superior to any of former years, and from the number of stalls engaged, and the space in the pavilion applied for, everything in connection with it justifies the most sanguine predictions. There is also an appearance of the finest weather, if the isothermal sharps are not entirely off in their ratiocinations.

It is unnecessary to do more than call attention to the advertisements in the appropriate columns which give the entries in the various purses to show that the racing and trotting cannot be otherwise than first-class. People are so well aware of the fact that a large attendance from San Francisco is beyond doubt and we would advise those who have not already made arrangements to secure rooms by letter or telegram. Notwithstanding that the indications are that a larger concourse of people will visit Sacramento the coming week than ever before owing to the well-known hospitality of the citizens, there need be no fear of not obtaining rooms. At the State Fair especially the latch strings are never pulled in.

THE KENNEL.

The Gordon Setter.

The following interesting account of the origin of the Gordon setter is from an article by Harry Malcolm in the *American Field*:

"This favorite breed of setters was called Gordons after the late and last George, Duke of Gordon, because they were first brought out by his father and him when he was Marquis of Huntley, and lived at Huntley Lodge. From this place many noblemen and gentlemen obtained specimens of the breed, and their descendants retain the strain to this day; such as Lord Lovat, Lord Kintore, General Leith, Lord Paumure, Captain Barclay, of Urie, etc. Of course, all these crack shots and sportsmen mentioned have long passed away but they were of the right stuff, and knew well a good setter. At the time to which I have referred a Mr. Etchis, an Englishman, was head-keeper of the Marquis, at Huntley Lodge, and was considered in his day the best breaker of dogs in the kingdom. It was nothing uncommon for him to hunt three brace together, and he could handle them properly without any trouble. He was succeeded by Matthew Jubb, as head-keeper, who came from Innis House, and who is still alive.

"Matthew Jubb was the first man with the Duke who bred the black, white and tan, about which there was a controversy years ago in a London paper—some writers asserting that the black, white and tan were the original breed kept by his Grace, others holding to only two colors in the animal; and lately in the *Live Stock Journal* I have seen it boldly asserted by a writer (to whom I shall have to refer by-and-by) that the black, white and tan were the first favorites. Jubb is still alive, or was a year ago, and is still at Gordon Castle, and could possibly be asked for his opinion. He brought the dogs to London, where they were sold at Tattersalls on the death of the Duke, and I know a keeper with whom he lodged while on his journey, to whom he stated that two or three of the black, white and tans were his own property, and I believe he sold them to considerable advantage. A trustworthy authority and excellent writer on dogs, Idstone, I believe, purchased some of these dogs, and bred from them, vastly improving their shape and appearance. No one living has done more for this valuable breed of setters than Idstone, who deserves every credit. The imported Gordons, now at the Marquis of Huntley's seat, Aboyne Castle, were produced by Idstone, and not only there, but at many other places I could name, I have seen many grand Gordons in England, and feel thankful to my neighbors for showing such respect for the northern setter. I have already mentioned Idstone. Besides him we have the late Mr. Stokes, of Grindon Rectory, a most enthusiastic admirer of the breed. He was the owner of Shot (he was a grand dog) and the famous bitch Daisy. These two dogs used to sweep the boards of prizes at every show where they were exhibited. Another grand dog of which I am very fond is Grouse, which I am sure would make a first-class stud dog, and is a thorough Gordon. Mr. Allison's Reuben is also a very nice animal indeed, and others I could name, but I shall only mention one more—Young Lorn—the property of Mr. H. Gibbs, of Aberdeen, which has been very highly spoken of in the *Live Stock Journal* and other papers. This dog has a grand pedigree, and I know that not only at the stud, but in the field, he has proved himself as good as he is bonny. I may add another brace, viz.: Captain Farquhar's of Lowndes Square. They are of Lord Lovat's strain, and are certainly very fine specimens. This breed is almost in every kennel in the north and west of Scotland, and all who have them or have seen them at work admire them. The cross of white was by an English dog, called at that time, and may be yet, the New Forest setter breed, which was a present to the Duke."

Strathgogie then describes what he thinks a Gordon setter should be: "His head should be long and high, square muzzle, neck longish, back rather short, shoulders well sloped or oblique, forelegs straight and well feathered, with good hard pads, good bent stifles, which give one a notion of going. Tail short, compared with some breeds, and with a grand fringe. The tan on muzzle, legs, tail, etc., should be of a bright sienna color, and there should be no mixture of black hairs through the tan. The chest is deep, with well-arched ribs, giving plenty of bellows room. Altogether, taken from any point of view, the dog gives one the idea of great powers of going, and his finely feathered feet show he was made for much endurance. No one could look on his bonny face, with that rich hazel eye 'ever melting, ever loving,' without noticing the great amount of intelligence and kindness this dog is gifted with. In short, he is not only 'the old man's dog' but he has been for many years also the young nobleman's and young chief's only favorite setter, and is likely to continue so. The inherited sagacity of the pure Gordon is distinguishable by his adapting himself intuitively to the fluctuating scent, which, according to the soil and atmosphere, is elevated or depressed, carrying his head low in sultry weather and high in breeze, etc."

SPREAD THE NEWS.—Not the least important work that is being done by the BREEDER AND SPORTSMAN is the dissemination

of correct information through the East in regard to California sport. In the last issue of the *Turf, Field and Farm* to hand we notice three items about California dogs, all founded upon articles which appeared in this column. We often copy freely from the *Turf* and always find its news reliable, and we are pleased to see that the *Turf* pays a similar compliment to the BREEDER. We want the people East to see the spirits of this State as they really exist, and to cease regarding California sportsmen as a cross between a poacher and a cowboy, and that is one of the reasons why in times past we have pointed out failings as freely as we have commended excellence.

The Coach Dog.

Perhaps the most beautiful of all the smooth haired breed of dogs is the Dalmatian, oftener called the carriage dog, and in England the Talbot from the family name of the first Earl of Shrewsbury, who was generally identified with the introduction of the breed to Great Britain. The breed is really a small type of the great Danish dog commonly though incorrectly known in America as the Siberian bloodhound or Siberian mastiff or German boarhound, for they are all one and the same breed and possess the distinction of being the tallest and largest species of the canine race. These were the spotted dogs given by Pan to Diana, the goddess of hunting, and are generally supposed to be the dogs of Epiaus. The great Danes are used in Europe for boar hunting and in Siberia for tracking criminals who have escaped. They are said to possess marvelous powers of scent though some splendid specimens of the breed in possession of J. W. Ames, Warden of the State Prison at San Quentin, cannot be induced to take up a cold scent. Perhaps in this instance lack of practice for several generations may have caused the power of scent to deteriorate, for several instances are known in England where they have taken up a trail two days old. They are fleet and strong and belong to the class known to the ancients as *celeres et pugnaces*, that is, dogs that could run fast, like the greyhound, and could also fight like the great dogs of Molossice, of whom Plin says: "They disdain to attack a bear or wild boar but could easily slay a lion or elephant. The breed of great Danes is becoming scarce. The Dalmatian or lesser Dane is so common on all our streets as to receive little notice, though on account of their great intelligence and faithfulness the breed is worthy of the greatest consideration. In England and America they are only used as ornaments to follow the carriage and sun themselves around the hallway, and so constantly are they associated with horses that it is often thought that they have little love for the companionship of man and are lacking in the qualities of affection and obedience.

No greater mistake than this was ever made, for in all the best qualities they rank second to no other breed. The French call them *le braque de Bengal*, and often use them in hunting and in fact it is generally claimed by French writers on this subject that they are a cross with the pointer and the greater Dane. As a proof that even so high an authority as Gouate was badly mistaken in stating that the breed lacks intelligence and affection it is not necessary to go outside the city of San Francisco. Captain Harris, the well known horseman, has a dog of this breed called King, which will perform more tricks and of a more intricate character than any poodle ever trained for a circus. Those who attended the first dog show ever held in this city, October, 1877, will probably remember the performance given by King on a platform in the center of the hall, and which included walking along a piece of 2x4 scantling raised 20 feet from the ground, standing on the back of a common chair, fetching different articles selected in accordance with the word of command and an infinite variety of tricks demanding the highest quality of obedience and canine reason. The writer has a dog of this breed which will select from a pile at his command either quail, robin, hare or dove. It is in the habit of bringing in the newspaper every morning and has learned to distinguish between a copy of the *Call* left for his owner and a copy of the *Chronicle* left for the next door neighbor. The papers generally lie close together. They are folded exactly the same, yet after a few lessons the dog invariably brings in the right one. He will also bring boots and slippers, hat or cane when ordered and do all the tricks usually taught to pet dogs. He has always been kept in the house and does not show the slightest desire for the company of horses. He has a great aversion to salt water, yet he is so obedient that he will jump into the bay for a stick when ordered though the struggle between duty and desire is a hard one. His only vice is a fondness for hunting chickens but a word will always cause him to desist from this offense against canine morality and neighborly courtesy. Another dog of this breed known to the writer has as good a nose as the ordinary pointer and will find game readily, though on account of his small size he is not of much value as a hunting dog. These examples are sufficient to show that the breed is inferior to none and if owners of such dogs would only take a little pains to teach them they would find the experiment well rewarded.

COURSING AT PETALUMA.—There are few places on the coast that afford better facilities to a city coursing man to give his dogs a good run than Petaluma. The Sunday excursions to this pleasant spot allow of time for six hours' sport, more than enough to tire both men and dogs. The fare is a mere trifle, and one can always be sure of finding half a dozen hares.

The BREEDER AND SPORTSMAN has been publishing some very fine illustrations of California horses, that of Abbotsford in the August 5 number being particularly noticeable. Mr. E. Wyttenbach is the artist whose services Mr. Simpson has had the good fortune to secure. Mr. Simpson seems to have made a great success with his paper.—*N. Y. Sportsman*.

The Olympics at the Fair.

Next Wednesday evening, Sept. 13, the usual routine of the Mechanics' Fair will be varied by a gymnastic and athletic exhibition under the auspices of the Olympic Club. The club programme will be as varied and entertaining as the accommodations in the pavilion will permit. The fair this season is unusually attractive, and is well patronized, but an evening set apart for the benefit of the Olympic Club (a club unrivaled in its combination of gymnastic, athletic and social features), should attract the largest audience of the season. The programme is as follows: Groupings, club swinging, gladiatorial groupings, perch bar, fencing, juveniles, boxing, horizontal bar, acrobatics and tug of war.

(Continued from page 1.)

and she was by a son of Brown's Bellfounder who was by imported Bellfounder from Lady Allport by Mambrino. There has been a great deal of controversy over the Bellfounder blood in Hambletonian. Some have given it the preference over the Abdallah strain, but at all events the combination has been a happy nick beyond question. The back crosses of Alexander come from the "old fashioned, hard-bottomed sort" which delighted in a distance of ground. But the best evidence of the value of a stallion is what the progeny has done, and for the small opportunity which Alexander has had in the stud there could scarcely be a better showing. There is Tommy Dodd with a record of 2:24, made when he was suffering from a "leg" which would have stopped many horses from making an effort. Reliance, 2:25 at five years old and with a flight of speed that proved a capacity far inside of that mark, Nelly Patchen, 2:27, and the only California-bred trotter which is credited with a victory in England, and Alex. Button, a winner at three years old in 2:29, and at four in 2:26½. It is almost supererogatory to add a written description to the portrayal of our artist. The points are delineated with a fidelity which can scarcely be bettered, and anyone seeing the picture could select the original in a field of a thousand. Alexander is a very handsome shade of bay, is nearly sixteen hands in height, and one of the most symmetrically formed trotting horses ever seen. He shows a great deal of quality and yet with immense muscular power. Altogether it is seldom that a finer specimen of the American trotter is seen in any country and even among the notabilities of California he is worthy of a high place. This is praise enough, for a horse which can occupy a front position on the Pacific Coast is worthy of the same rank in any country. The family connections on both sides of the continent represent the best on the tracks, and we add him to the picture gallery of the BREEDER AND SPORTSMAN with the feeling that he is fully entitled to the place. In writing this brief sketch we nearly overlooked what he had done himself. Though it could scarcely be called training, he won a record of 2:31½, and Bud Doble drove him a trial in 2:26.

The Chico Fair.

CHICO, Sept. 1, 1882.

EDITOR BREEDER AND SPORTSMAN:—Our District Fair opened on the 5th with a rather slim attendance. There was but one race on the cards, 2:30, free to all, best 3 in 5 to harness, for a purse of \$350; first horse sixth-tenths, second three-tenths, third one-tenth that closed with the following entries: E. Downer names ch g Tump Winston, C. Sherman names g g Carlisle by Plumas, Chas. Shear names blk g Slim Jim by Tyler's Blackhawk, and were allotted positions in order named: Carlisle, Winston, Slim Jim. After two false starts they got the word with Carlisle slightly in the lead but broke after going two hundred yards, slim Jim following suit immediately after, Winston leading to the quarter pole in 42½ seconds, at the half in 1:23 and the mile in 2:43, Carlisle second, Slim Jim distanced. After three ineffectual attempts they got the word with Carlisle slightly in the lead but Winston had too much speed and led at the quarter pole two lengths in 37½ seconds; Carlisle moved up to him on the back stretch but broke just before reaching the half in 1:13½. Winston kept up his lick trotting and Carlisle breaking, Winston winning the heat, race and money, Carlisle distanced for running; time, 2:27.

There was a marked improvement in the attendance on the second day, there being two running races on the card, the first a dash of a mile for all three-year-olds, Dooley Stake, \$25 entrance p. p. \$125 added. George Hearst enters ch f Maria F.; J. Q. Anderson enters Minnie Bell, by Joe Daniels, dam by Norfolk; A. Miller names Lady Partisan, by Partisan, dam by Jewel. Betting on this race about 5 to 3, Maria F. being the favorite over the other two. After one false break they got sent off with Maria F. a length in the rear, but when they showed around the turn Maria was on even terms, and after leaving the quarter pole showed a length to the front which she increased to three at the half in 51 seconds, three-quarter pole 1:19, and finished an easy winner in 1:46½, Minnie Bell second. Then came Reavis Stake, 1½ miles, free handicap, entrance \$50, \$25 forfeit, \$10 to declare, \$200 added, declaration to be made September 1st, weights published Aug. 29th, closed with the following nominations: Geo. Hearst enters ch s Slim Jim, Brown by Forster; Ab Ellis enters b g Shiner by Norfolk by Rifleman; Thos. Hazlet names ch g Jubilee by Norfolk by Lodi; F. M. Coltherp names Bob Ingersoll, pedigree not given; Shemler & Ayers enter b g Joe Howell by Bonnie Scotland; Etta Sheppard by im. Sovereign; George Hearst names Jim Brown by Foster; W. Hunter enters Fred Hunter b g, by Norfolk, by Lodi. There was quite a spirited competition in the pools, Brown selling for a few times favorite but they chopped on Howell at the same odds, \$20 to \$16½. The Hunter was drawn and left five starters; they got a passable send-off; Brown and Ingersoll came very near being left at the post, and I think if starters would adopt it as a rule when they warn a jockey twice to come up and he refuses, to send him off there would be less false breaks and better starts. Jubilee rushed off in the lead with the three others bunched close up, Jim Brown seven lengths in the rear; when they passed the stand entering the backstretch Howell and Shiner moved up and Howell took the lead before they reached the half-mile pole, which he opened to a gap of six lengths at the three-quarter pole, when Shiner and Jim Brown came with a rush and they finished Howell first by two lengths in front of Brown with Shiner lapped on his hip, the others strung out.

OCCASIONALLY.

HERD AND SWINE.

Color in Jerseys.

A close attention to this valuable and beautiful breed of cattle has convinced me that "breeding for color," i. e., to the exclusion of white, has been carried out in many cases with a total disregard to milking qualities, and, as your article truly says, much injury has been done to the breed thereby. The fashion for "whole color" was, I believe, originally set by the Americans, but they, with their natural acuteness, have for some time back been aware of the error of "going for color" alone, and many of their most noted butter-making cows are now broken colored. It will scarcely be credited, although it is a fact, that there are gentlemen officiating at the present day as judges at shows who will not award a prize to an animal with white about it, because for that reason they do not consider it to be true bred. On the other hand, the late Mr. Jessett, of Mottesbone, Isle of Wight, who was a first-rate judge of a Jersey, would never have a cow without white about her, averring that, unless it had, the animal had some other than pure Jersey blood in her.

Of course, if an animal with all milking points perfect is at the same time whole colored, it is the more valuable, but it is the greatest absurdity to set color either of body or tongue before these essential qualifications, and either in judging or choosing a Jersey with regard to the great attribute of the breed, milk and butter indications should be the *sine qua non*, the color of the body and tongue being after-considerations.

Upon the same question the *Farmer's Gazette*, Dublin, upon color-judging and the crossing of Jerseys upon other breeds, has the following: "Jerseys, in their island home, are found of many colors, from the ever-fashionable silver gray—a color which was rarely found till within the last few years—down to the common red and white; some, but very few, are black, and it is generally considered that a cow of this color gives the richest milk of all. Whole, self, or solid colors, by which are understood cows of one color—that is, without any white—have of late years been the fashion in this country; but it is asserted by many, and with justice, that great injury has been done to the breed by this fancy, and fancy it may well be called, since on the island—their native home—no attention whatever is paid to the color, the greatest aim of the best breeders being a graceful form and grand milking qualities. Before a judge (says the *Frome Times*) enters upon his duties at an Island show, he has to make a solemn declaration that he will fairly and honorably judge according to the best of his ability, without favor or affection. If we had this rule at all our shows, less grumbling would be the result, neither should we hear the judges so often accused of partiality in their awards. It would be their safeguard.

Every breeder knows how difficult it is to breed for color, and when self-colors are bred for, and agreeably expected, from the sire and dam being self-colored, disappointment often results. Cattle will throw back, and thus we find calves with white; so often from a self-colored hull and a parti-colored cow, a white-colored calf is unexpectedly obtained. For beauty and appearance I prefer the cattle of one color, providing the milking qualities are not lost, but never discard a good milker for her color, as fashionable breeders have so often learned to their cost. My favorite color of all is a solid orange gray, with a white muzzle, and her ears tipped with a black fringe. The crossing of the Short-horn with the Jersey has often been tried, and has sometimes been attended with success; but as they are larger, and consequently larger consumers of food, nothing is obtained except size; for I have never known a cross-bred Jersey make more butter, although she will give more milk than a really good Island cow. Yet the cross-bred is nearly always superior to a Short-horn for milking properties alone. If Jerseys should be crossed at all, the South Ham Devon is the best, and I have seen one really good cow from this cross, and so like a Jersey that, with the exception of being a little large, one could hardly tell the difference.

The great thing in choosing a Jersey is to be sure that her udder is large and not fleshy, extending behind as nearly as possible to the vulva, and reaching in front nearly to the navel; so that as much milk may be obtained from her front quarters as from her hind ones. Her milk veins must also be sought for and examined; feel and see that they are large and swelling, especially noticing that the hole where the veins enter the body is so large that you can easily push the top of your second finger into them. She should also have a deep orange color inside her ears; the deeper the color is, the richer her milk.—*London Live Stock Journal*.

Advice to Dairymen.

The fourteenth annual report of the Northwestern Association contains much valuable information taken from those having experience in this business. It is well known that milk speedily becomes tainted when brought more or less into contact with matter charged with odor, and the following remarks in the pamphlet are very pertinent to the matter:

"The water used to wash this butter must not be taken from a well that is any way influenced by the washings of the factory, nor drawn from a wooden cistern. We think that as much butter is spoiled from being washed in impure water as from any other one cause.

"It is of the greatest importance that we use good salt—that which is free from shells, scales and dirt; the finer the better, in our opinion. Fine salt dissolves quickly, and leaves no gritty taste. Our butter stands twenty hours after being salted, when it is re-worked and packed for the market. If it stands longer, it becomes set, and, after working, has the appearance of re-worked butter. As to package, we cannot always suit ourselves, as different markets want different packages.

"Absolute cleanliness in every department of the creamery is necessary. The accumulation of filth in drains, in corners, under stairs, or even in the immediate vicinity, outside of the building, soon develops bad odors, which are taken up by the cream, working sure destruction to the butter. We once lost \$60 on two days' butter, by thoughtlessly having our butter-maker go out to the piggery and catch twenty pigs. Although, on returning to the factory, he washed his hands in the usual way, yet enough of the scent adhered to his hands and clothes to cause the above loss. At another time our butter was complained of, and remained for some time in a condition that brought criticism and a serious loss—we being compelled to take back much of the butter, or submit to a large reduction in the price. At last, the trouble was found, in the fact that the butter-maker was in the habit of cleaning his horse in the same clothes in which he worked the butter. As soon as this was corrected, we had no more trouble. We mention these causes, as they are out of the usual path where we are in the habit of looking."

THE MANUFACTURE OF CONDENSED MILK.—Dr. Voelcker makes the startling statement in a recent report on condensed milk that it is manufactured mostly from skimmed milk or from milk naturally poor in fat. There are, on the average, 115 parts of casein to 100 of fat in unskimmed milk, but in skimmed milk, with 0.75 per cent. of the fat left in it, there are about 500 parts of casein to 100 parts of fat. In the case of more than 50 analyses of American, Italian, Swiss, German, Belgian and English condensed milk, made from 1870 to 1880, I found the highest proportion of casein to fat to be 173 to 100 in a Belgian sample; six others contain 150 or more of casein, and one sample has 132 of casein to 100 of fat; all the rest have from 130 down to less than 100 parts of casein to 100 of fat—more than ten of these better brands contain less casein than fat. If only skimmed milk were used, or if it were very largely used, in all or in most cases we should have from 300 to 500 parts of casein to 100 of fat. Either Dr. Voelcker has been misrepresented, or else a very decided change has taken place in the methods of this manufacture within the past two years.

AN ENGLISH DAIRY FARM.—A number of gentlemen interested in agriculture recently visited the farms of the Short-horn Dairy Company, near Brentwood. The party was under the guidance of the Earl of Dunmore (Chairman of the Company), and Mr. Collinson Hall (Managing Director), and was shown the workings of the system under which the cattle (which are all Short-horns) are stall fed on the produce of the farms mixed with a proportion of foreign food, for the most part half malted. The cattle are housed in concrete-built sheds with mangers, always kept clean, above which flows a constant stream of pure water, so that the animals can drink whenever they wish from a clear stream. When the company acquired the business they took 470 head of cattle. The stock had increased in less than eighteen months to 1,120 head of cattle. The Company is now farming 2,200 acres of land, and has, besides the cattle, 500 Southdown sheep and 400 pigs. They send to London 160,000 quarts of milk weekly.

KINDNESS TO CATTLE.—A shipment of twenty-two car-loads of cattle left the Chicago stock-yards Aug. 30th on a special train for New York via the Grand Trunk and Erie roads. The cars used were those of the Montgomery Palace Stock-Car Company of New York, so arranged that the cattle can be fed and watered on the train without unloading. They are supplied with water at the same time the engine is taking water at the stations and their feed is let down while the train is moving from bins at the top of the car. It is expected the trip will be made in sixty hours instead of five days. It is thought that the animals can be put in compartments and loading effected in about the same time as upon ordinary stock cars. A Pullman coach attached to the train was occupied by Hon. Hylas Sabin, Railroad Commissioner of Ohio, Mr. Horn, representing the Illinois Humane Society, the officers of the car company and others.

REGISTERING THE YIELD OF EACH COW.—In a catalogue of sale in 1846 of Short-horns, with a few Alderneys, the property of Mr. Lakin, of Beauchamp's Court, four miles from Worcester, this statement was made by the auctioneer: "It has been a remarkable feature in Mr. Lakin's system of farming that he registered the yield of milk, showing the annual quantity given by each cow, enabling him thereby to select his rearing calves from the best milkers." Whereupon a correspondent of the *English Agricultural Gazette* asks: "Are these registers in existence?" Such documents gain in value by time, and it would be curious to learn, in the now increasing attention which is paid to dairying, if Mr. Lakin had better returns in 1846 than he can show at the present time.

A HINT FOR THE CATTLE FAIRS.—Quite a sensation was caused at the Ayr Show, by the turning out of the prize-ring of three animals entered by the Duke of Buccleuch. The examiners said that the beasts had been "doctored"—that is their tents had been bound around with tape to give them a nicely rounded appearance, which scores so many points in a severe competition. Mr. Cranston, the Duke's representative, pleaded hard for the restoration of the animals to the ring, even if they were debarred from taking prizes, but the judges were firm, and declined to look at the beasts which had been condemned by the examiner as having been tampered with.

BASE BALL.

The Niantics vs. the Haverlys.

The match between these clubs that was played last Sunday at the Recreation Grounds was not distinguished by much brilliant fielding but this may in part be attributed to the heavy dust that was at times blown across the field. The Niantics led off with a heavy score of ten, and although the Haverlys played fairly an uphill game, they were beaten in the end by one innings and three runs. Following is the score:

NIANTIC.										
	Emerson, 3d b.	Incell, r. f.	Donahue, s. s.	Egan, 1st b.	Arnold, c. f.	Finn, 3.	Sweeney, p.	Sharkey, r. f.	Fogarty, 2d b.	Totals

ROWING.

The Saratoga Regatta.

The Subscription Regatta, conceived, managed and carried out by a committee of visitors at Saratoga, came off on August 25th with a success never before equaled by any professional or amateur regatta on Lake Saratoga. We take the following full account of the races from Krik's letter in the *New York World*:

"The contestants, both amateurs and professionals, made a fine exhibition, the professional race being one of the best ever seen in this country. Five amateurs and seven professionals responded to the call of the referee, and as both races were rowed and the results known to the crowd before 6 o'clock, Mr. Referee Stanford not only deserved the praise of all, but, as was suggested, he deserved to be used as the subject of Roger's next group of statuary, and to be represented standing on the bow of Mr. Durkee's yacht, hat in hand, with the timers, Edgar M. Johnson and Phil Dwyer, immediately behind him, the group to be labeled: 'A referee who knew his rights and carried them out to the letter.' So punctually were the details carried out that at exactly 3:55 the 'get ready' gun was fired from Mr. Moon's boat, the Luna, to which five of the dozen entries for the amateur race responded.

FIRST RACE.

"SARATOGA LAKE, N. Y., August 25th.—Amateur single scull race, free to all, three miles, with a turn, for prizes given by a visitor's committee; to the first a piece of plate valued at \$200, to the second a gold medal valued at \$100 and to the third a silver medal valued at \$50.

P. Holmes, Pawtucket, R. I. 1
J. Kirby, Pawtucket, R. I. 2
J. Pilkington, Metropolitan R. C., New York 3
C. E. Bulger, Mutual B. C., Albany, N. Y. 4
P. A. Dempsey, Philadelphia, Pa. 5
H. E. O'Brien, Union Springs, R. C. 6
H. E. O'Brien, Boston, Mass. 7
J. J. Murphy, junior champion United States, Boston, Mass. 8
J. I. Smith, Pallade Boat Club, Yonkers, N. Y. 9
D. Lamberg, Seaside Boat Club, Brooklyn, N. Y. 10
J. O'Brien, Boston, Mass. 11
O. P. Nolan, Seaside Boat Club, Brooklyn, N. Y. 12

Betting.—The field, \$100; Mr. Holmes, from \$90 down to \$75.
"At the start, which was a good one, Holmes from the extreme western stake took the lead, and with Kirby second and Bulger third they rowed nearly a quarter of a mile, when the last named failed to hold his position and was passed by both Pilkington and Dempsey. The two Rhode Islanders in the mean time had secured such a lead and were laying such a good course that at the mile post there were a dozen lengths between them and Pilkington and Dempsey. Holmes was first to reach the turning point, which he made in about 9m. 50s., followed by Kirby, Dempsey, Pilkington and so late by Bulger that the referee's boat could not wait. Once round Holmes laid a good course over towards the western shore, and although not in any way hurried he kept the pace good, and with his friend Kirby a few lengths away he rowed to the end, winning by about a dozen lengths, followed out by Kirby, about three lengths in front of Dempsey, who was two in front of Pilkington. As soon as he could reach the referee's boat Mr. Dempsey claimed a foul against Mr. Holmes, but to his own surprise he was informed that he himself was disqualified, having turned the stake-bout the wrong way, and that his complaint would not be entertained. With this the result of the race was announced: Holmes, first, 21m. 16s.; Kirby, second, 21m. 48s.; and Pilkington, third, 21m. 58s., and with that announcement the gun was fired for the professionals to get ready.

"As the smoke of the gun drifted across the smooth surface of the lake all were interested to see who would be the starters of the nine entries. It was known that Plaisted would not and that Elliott, having found that he was in no condition for a hard race, had also decided not to row. In other words, the Englishman found out that he could not make a 'deal,' and so wisely refrained from showing how hollow his pretensions are now. Among those first to show were Lee, Hosmer, Sheldon and Ross. The last named attracted much attention and in his white-sleeved shirt and home-darned brown drawers he looked in fine condition. Ten Eyck was the next to show, followed a few minutes later by Riley, who, although somewhat under the weather, decided to row. Several minutes elapsed and there began to be a general inquiry for Courtney. Some expressed a belief that he would not start, and an offer was then made on the Luna to bet its owner \$100 to \$60 against Courtney. Mr. Moon said he would wait until he saw Charley in his boat, and not a few began to look as if they feared some new accident had happened. Finally, however, Courtney appeared. He looked well in his sleeveless white shirt, blue drawers and blue kerchief, and as he rowed to his station Mr. Moon took the \$100 to \$60 offered and in turn offered to do so again, which was declined. With a few more minutes delay, caused by the contestants putting on their colors, they finally took the several stations assigned them.

SECOND RACE.

"SARATOGA LAKE, N. Y., August 25.—Professional single scull, free for all, three miles with a turn, for prizes given by a visitor's committee; to the first, \$1,000; to the second, \$200, and to the third, \$100.

G. W. Lee, Newark, N. J. 1
C. E. Courtney, Union Springs, N. Y. 2
Wallace Ross, St. John, N. B. 3
H. Sheldon, Saratoga, N. Y. 4
G. H. Hosmer, Boston, Mass. 5
J. A. Ten Eyck, Peekskill, N. Y. 6
J. H. Riley, Saratoga, N. Y. 7
W. Elliott, Newcastle, England. 8
F. A. Plaisted, Boston, Mass. 9

*Fouled.
Betting.—Ross, \$375; Courtney, \$200; field, \$45.
"As the seven contestants waited at their several stakes they not only looked well, but promised to make a race of unequalled merit. With a few words of warning from Mr. Stanford, he gave them the word 'Go' to a splendid start. For a furlong no one seemed to have any advantage, but before they had rowed a quarter of a mile Lee from the extreme western station began to show in front, with Courtney and Ross pulling out on the eastern side, Hosmer and Riley being well up between Lee and the two cracks, while close up with them was Sheldon on the western side and Ten Eyck on the eastern, all rowing so closely together that it was difficult to say which of the four, Lee, Hosmer, Ross or Courtney, was actually in the lead, and they kept so not only for a mile, but right on down to the turning stake, which Lee reached first, but with the others so close up that all four were engaged in turning at the same time. Lee made a splendid turn, Courtney a bad one, as also did Ross. Hosmer had just got around when Riley ran into him, his boat passing over the stern of Hosmer's. For an instant both men seemed to be in danger of sinking, and both the referee and press boats steamed out of their course for a rescue, but as three or four row-boats were seen making for them they were left and the two steam-boats turned to follow the contestants, of whom there were really but three left, for not only were Hosmer and Riley out of the race, but Ten Eyck and Sheldon were so far behind Lee, Courtney and

Ross that neither the referee nor the press boat could wait for them. At the end of two miles Ross was also virtually out of the race, the interest in which from that point centered in the efforts of Lee and Courtney. The former was rowing a magnificent course, having somewhat unfairly the assistance of several of the amateurs that had rowed in the previous race, while Courtney had not only to row but to watch his course. He did both wonderfully well, but in Lee he found a stubborn antagonist, and notwithstanding all the encouragement that the crowd could give the ex-champion he could not pass the Newark man, who, rowing good and strong right to the end, was the first to pass the finishing point, he winning by a couple of lengths from Courtney with Ross a bad third. The others were virtually nowhere.

"As soon as possible the referee and press boats came together, when it was announced that Lee was the winner in 20m. 43½s., Courtney second in 20m. 46½s. and Ross third in 21m. 31s., and with three cheers for the referee the crowd broke for home in every direction, convinced that with good management it is still possible to have honest professional sculling, that of the seven that started Lee was really the best man under the condition of the race, and that while both Courtney and Ross might beat him in a match, it would be only after a terrific struggle. The time would have been a little faster but for a northerly breeze which sprang up just at the turn and which was dead against the rowers all the way back.

"George W. Lee, the winner, was born at Newark and is twenty-four years of age. He is five feet ten inches tall and weighs 153 pounds. He began his career on the Passaic River as an amateur and was very successful. In 1878 he won the amateur championship of the United States, and the following year went to England. While there he was defeated by Moss at Henley. On his return he determined to enter the professional arena and was defeated in a match with John A. Kennedy, of Portland. Since then he has been a contestant at the numerous regattas throughout the country, meeting with some success. On July 4, 1882, he won the Boston race, defeating Conley, Ham, Hosmer, Riley and Plaisted. In his last race, about a month ago, he defeated Riley and Dempsey on Lake Keuka, N. Y. While practicing Thursday last Lee was swamped, smashing a new boat belonging to Riley and just barely escaping a watery grave."

DOUBTS THEIR HONESTY.—Sampson, the editor of the London *Referee*, places no faith in the professions of the two leading oarsmen of the world. He says in the last number of the *Referee* which has come to hand:

According to American sporting papers, Hanlan and Ross are now exchanging vigorous defiance. Most likely there is a purpose to be served by this portion of the programme which has not as yet made itself manifest to the outer world. For the last three or four years Hanlan and Ross have either been the closest friends or the bitterest enemies, and I shouldn't like to say which of these attitudes is the most dangerous to a confident public. When Ross and Hanlan do row—providing Providence at last permits of this perennial engagement being brought to a conclusion—it is likely enough we shall be left more in the dark than we are now as to which is really the superior sculler. Both fit and well, and with a guarantee that the race was fair and square, it would be a good thing to lay odds on one, and that one not the Black Brunswicker. But that Hanlan and Ross ever will row a genuine match I do not believe, unless indeed the match that will probably be made soon becomes genuine by Hanlan "putting the double on." The merest novice must by this time be aware that Hanlan and Ross have something in their mind's eyes beyond the desire for discovering which is the better man. It is pitiable to think that the two fastest and best scullers that the world has yet produced should descend to this sort of work, but what can be expected of professional rowing men after recent experiences? Notwithstanding the horror my confession will create in the minds of such as do not dare to think that men ever willingly row behind, I will admit that to me the chief cause for regret in all this negotiation is the clumsy way in which pitiful design has been allowed to expose itself. Hanlan's much-advertised illness now turns out to have been merely a feint for the purpose of extricating himself from the Ross engagement. Malingering is a new form of professional device; when it is again adopted, the interesting individual should take care not to recover too quickly. I am in receipt of information upon which I can rely—which comes from various sources, all of them independent—to the effect that if Hanlan had been half as bad with typhoid fever as he was said to be, his recovery and return to robust health would have been a best on record such as the medical profession never believed possible previously.

PROSPECTS OF A FINE RACE.—The Detroit correspondent of the *Turf, Field and Farm* writes that journal, under date of Aug. 19, as follows: John McEldowney, backed by a prominent and wealthy citizen, is endeavoring to get up a regatta on the island course here in October, in which there will be two great events: A four-oared race between the fastest fours in this country, and a professional sculling race participated in by Hanlan (if he will row), Ross, Plaisted, Hosmer, Riley, Lee and all the other first-class scullers in the United States and Canada. Since the Centennials so handsomely won the the National and Northwestern championship in the regatta here, a great many rowing men and the public generally have expressed a desire to see them pitted against the Hillsdales, with whom they would make a very interesting race. A number of the best oarsmen in the country, who attended the recent regattas, have also expressed great anxiety to meet the champions of last year and this year in a four-oared contest. Holmes and Appley, Kirby and Cattinach have organized themselves into a four-oared crew for that purpose, and those who saw the first two win the pair-oared race in the Northwestern, and saw the other two scull, will know that they would give any four in the world a hard race. O'Connell and Buckley, the Portland scullers, say they also have a four-oared crew "by the sea waves," which they will enter in the proposed regatta, and which they think can win. Yates, the two Muchmores and another, constituting the Farragut four, of Chicago, are also eager for the contest, so that if the consent of the Hillsdales to row on their return from England can be obtained the regatta will make one of the finest aquatic contests ever had in this country. It is proposed to give as prizes for the winning four gold watches and chains, worth \$250 apiece; and for the professional sculling race \$800 in money to first; \$300 to second, and \$150 to third. Correspondence has been opened with the Hillsdales, to see if they will enter, before anything definite is decided upon.

GAISEL DEFEATS MOORE.—The three mile with a turn race for \$1,000, between George Gaisel, of this city, and A. H. Moore, of Westchester, was rowed on Little Neck Bay, Long Island Sound, August 23rd. Moore was the favorite but Gaisel outrowed him, winning easily in 30 min. 11 sec.

The Hillsdales in England.

There has been a great deal of unmerited abuse heaped upon the heads of the amateur oarsman of England by some of the sporting journals of this country, who do not understand the difficult position made for the different crews by the action of the English Rowing Association. It is with a view of dispelling some of the prejudices arising from such indiscriminate abuse against the English oarsman, that we take the following article from *Land and Water*, the most able and conservative journal of aquatic and field sports in England, giving a resume of the positions held by the Hillsdales and the English crews:

In all branches of sport the present is an age of associations. Swimmers, runners, bicyclists, foot-ball players, have all their associations or unions. Now quite recently it has been discovered that there is in existence an association who have vested in themselves the sole and absolute control of all English amateur oarsmen, and all matters relating to amateur aquatic sport. It is somewhat strange that this autocratic body, self-elected and apparently irresponsible to any other authority, or even the will of the majority of its constituents, is able to completely paralyze the action of our oarsmen and keep them in the most abject subjection to its commands and behests. It is no doubt a very useful thing for an association to possess this complete authority, but when that association uses this authority against the wishes of nearly the whole of the body it is supposed to represent, and does its best to bring the members into contempt and ridicule, the sooner the association is done away with the better. The Amateur Rowing Association (so-called) in the case of the Hillsdale crew has undoubtedly brought English amateur rowing and oarsmen into a most humiliating and degrading position, and the sooner this upstart crew of the amateur rowing world is uprooted the better for sport and our English character for pluck and fair play.

The American Association of Amateur Oarsmen, with great enterprise and praiseworthy ambition, have sent over to this country their champion four-oared crew, to test the relative merits of the best American and English amateur talent in fours. It was no secret that they were coming, and that they were not going to enter at Henley, but at the other regattas in England; and, if possible, row matches against our best club fours. Other strangers have done this, been duly accepted as amateurs, rowed with our club crews, generally were beaten, without any objections being raised by an association, club, or committee. Special regulations were then made for foreign entries, so that there might be no hitch or question on the subject of the entry of a foreign crew or oarsmen. The Hillsdale men were therefore perfectly justified in assuming that there would not be any further proofs required as to their status, especially when they came as the representative crew of the American Association. On their arrival here, they, however, found nothing but difficulties and impediments thrown in their way. First, they discovered that the Metropolitan Regatta entries were hedged around, as regards foreigners, with all the clauses of the Henley rules. As this was unknown to nearly everybody outside the London R. C. committee, it is not surprising the Hillsdale were unprepared as to the entry date and the affidavits. Although the Marlow Regatta committee were English enough to take the strangers' entry, and the long-expected trial between the two styles was about to be tested, the English Association at once determined to put their authority to the test, and issued a ukase which virtually closed the door of every amateur regatta and club against our visitors. Since then the Association has dogged the unfortunate Hillsdales' footsteps, and on every occasion when the strangers seemed likely to obtain a race or an entry at a regatta, the machinery of terrorism was put in motion, and the boycotting process extended. More recently the Hillsdales have openly challenged the Thames R. C. to row them a match, and although the members of their club almost to a man are anxious to accept the challenge for the honor of their club and country, the association sternly refuses to allow the wished-for trial.

Here the matter at present rests. The Association is supposed to be making inquiries in America as to the *bona fides* of the Hillsdales sworn declarations, and then, if these inquiries are considered satisfactory, permission will be given to the clubs to row as desired. It is difficult to know which is the most astonishing fact, either the cowardice and want of self-reliance of the modern race of amateur oarsmen, or the daring impudence of the self-elected body which is able to obtain such implicit obedience to its commands. They do not make the slightest explanation or defense of their conduct or procedure, which are both indefensible, unwarranted and cowardly. The whole of the amateur rowing world is against the association's actions, and yet no club or body of oarsmen have sufficient pluck to shake themselves free from the trammels of such an organization. The Americans have a just grievance against English hospitality, fair play, pluck, and justice, and this present assumption of strict amateurism by the association is something very new in the annals of amateur rowing. At county regattas, and even at Henly itself, our best clubs and University crews have frequently met oarsmen of the mechanic, artisan, and laborer class, and have not suffered very much by the contaminating influence of such antagonism. This makes the present rabid craze in the amateur interest all the more inexcusable when a foreigner is in the case.

HANLAN'S LATEST PROPOSITION TO ROSS.—Edward Hanlan has written the following letter to the *Toronto Globe*: In answer to Mr. Ross' challenge to me, I may say that I have thoroughly made up my mind not to row any race this year, and therefore cannot accommodate Mr. Ross, who seems to be eager to wrest the championship from me. But I hereby make him an offer. I will consent to row him four or five miles on any course between here and New York, next June, for \$5,000 a side and the championship of the world. If Mr. Ross does not embrace this opportunity for making a match, there is every probability that I will not be able to accommodate him with a race even next year. I may be engaged in business which will prevent me making any matches unless I have long notice ahead. If he entertains this proposition he can send along articles of agreement.

Toronto, Aug. 21.

EDWARD HANLAN.

A SWEEPING CHALLENGE.—Wallace Ross publishes a card stating that he has received no reply to his challenge from Hanlan, wherein Ross offered to row him for \$1,000 a side and the championship of the world. Ross claims the championship. He refers to his inability for two years to get a race with Hanlan, but offers to accommodate him this year or next. Finally, Ross offers to defend the challenge against all comers, and will make a match with any one for from \$1,000 to \$5,000 a side, Hanlan preferred.

THE HILLSDALES' OPPONENTS.—The four-oared crew of the Thames Boat Club, which has accepted the Hillsdales' challenge to a race, will make up as follows: H. B. Tween, bow; J. Hastie, No. 2; H. Rush, No. 3, and J. Canton, stroke. The race will be rowed early in September.

THE NATIONAL REGATTA.—The tenth annual regatta of amateur oarsmen was rowed August 8th and 9th at Detroit. The course was a mile and a half straight down stream, the current averaging about one mile and a half an hour. The course was slaked at right angles with the Island Survey Stakes, instead of with the channel, the consequence being diagonal lines at start and finish, which, in one case, at least, caused much discussion; one crew claiming to have won by ten lengths, while in fact they had barely that number of feet lead, and they could not understand it. No regatta ever had finer accommodations for seeing races than those provided by the committee in the shape of a grand stand on the island, where every one of the three thousand occupants could see every stroke rowed, from start to finish, with a common glass, and the only pity is, that the stand was not built twice as large, for, in spite of the weather, it was filled each day, and during the Northwestern Regatta, which followed on the 10th and 11th, crowds were unable to get inside the grand stand inclosure. The weather was everything but good, and during the whole two days, the course was not once smooth for a shell race. The officers postponed races from time to time until the water should smooth out or the rain stop; but got through the whole programme each day, and no races went over. The weather had been bad for a whole week. After the stand was half full Tuesday, the heavens opened and a tremendous thunderstorm came up and drenched the crowd, who had no escape, but it soon cleared up and the sun restored good humor. At the time set for the race the rain was coming down in torrents and the lightning was flashing beautifully. The word was given between two peals of thunder and the rain almost immediately hid the oarsmen from view.

The trial heats were rowed the first day; on the second day the final heats were rowed with the following results:

Senior fours, final heat, water good, wind light, up stream—Centennial B. C., 8m. 27½s.; Wyandotte B. C., 8m. 34½s.; Chatham B. C., 8m. 54½s. For nearly half a mile the crews pulled side by side, Chatham getting too far out into the stream. At the half, Centennial showed a slight lead, rowing 46 strokes per minute, while Chatham was doing 44 and Wyandotte 42, the Centennials rowing in much the best form of the three, and getting the most speed, gradually drew away. At the mile Wyandotte spurred desperately, but although their stroke went up to 48 they could not overhaul the little Centennials, who kept up their even 46, not seeming to think that there was the least danger of their being caught. As they neared the finish Chatham hit her up to 46, but could not reduce the distance, the Centennials finally crossing the line without a spurt, leading the Wyandottes by about two open lengths, Chatham last by several lengths.

The Centennial Club was organized in 1876, and for four years rowed just well enough to be beaten in every race they entered. Various changes have been made in their crew, and in 1880 they commenced going to regattas and picking up points on rowing which they applied, and progressed so successfully that they were the only crew who made the Hillsdales row at the Northwestern regatta, and this year, with one entirely green man in their boat, they can probably outrow any amateur crew in America.

Senior single-sculls, final heat, water in very fair condition.—Holmes, 10m. 5s.; Laing, 10m. 9s.; Kirby, 10m. 14½s. Holmes got slightly the best of the send-off, but was closely followed by Laing who was lapped on to him, while Kirby in turn was lapped on to Laing, and so the three rowed to the half mile very close together. Here Holmes tried to shake off Laing but could not do it. Kirby spurred and drew up alongside the Canadian, whom the other two now had in a pocket, and who spurred again and again, each time a foul being the result, and during the second half mile, a half dozen fouls were committed by one or the other. The pace all the way was a killing one, and at the mile Kirby and Laing dropped back, Holmes taking a good length lead, and finally winning the race by a short length, Laing about that distance ahead of Kirby. All entered protests, but the referee decided promptly that the men had all been in the wrong at times, and placed them in the order of the finish. The *Post and Tribune* said: "Not even Holmes, who thus retained the championship he won in 1881, seemed satisfied, and the oarsmen rowed away to the boathouse together, scolding each other like a parcel of old women. Laing indeed had the worst of it in the race, which looked as if the Eastern men had conspired to beat him."

As the ex-champion amateur is receiving a good deal of advertising, he has been winning several races, one of which was a close brush with the coroner. Only the other day he was heralded as having swallowed a few pounds of poisoned ice cream and then stimulated by that healthful diet he threw himself into his scull and raced second to Lee and in front of Ross on the 25th ult. at Saratoga Lake. He told all his friends that he was going to win the race and the confiding believers in his word got badly cinched. We next hear of Courtney defeating Lee at Canandaigua Lake in the extraordinary time of 19 min. 31½ sec., for three miles with a turn. All these remarkable achievements seem to indicate that it is in the programme for Courtney to row Ross for the championship of the world when the Brunswicker shall have grown tired of challenging Hanlan who will not row any one this year. Notwithstanding the eccentricity of his rowing career there are hosts of rowing men and admirers of the aquatic sport who still regard Courtney as the best oarsman in the world and would put their money on him in a match with Ross. It is not at all improbable that their judgment of Courtney's ability to defeat Ross may be correct, but the prudence of betting that he would do it would be quite a different matter.

CHANGE IN A CREW.—It is very likely that Louis White, captain of the Pioneer four, will not take part in the combat for the BREEDER AND SPORTSMAN cup on Thanksgiving day. Mr. White has been engaged in a new business which takes him out of the city two weeks in a month and it will be impossible for him to train properly for the match. An effort will be made to supply his place by either Al Tobin, who is one of the most reliable bowmen, or Win. J. Burke, late of the Cork Rowing Club. Both of these gentlemen have not done much rowing during the past year and it is not easy to draw them into hard practice again. Mr. Burke is a famous stroke and if he should consent to take a seat in the Pioneer boat the positions of the crew would be changed and John Sullivan, who now pulls stroke, placed in the forward seat with Al Tobin in the crew; the four would be a strong one, as Mr. Tobin steers admirably. As there is plenty of time before the race will take place the necessary changes will be made, and the crew made as strong as possible.

TRITON ENTERTAINMENT.—The Triton Swimming and Boating Club will give its first social party on Sept. 30, at Turner Hall, Trunk street. Handsome cards of invitation have been issued to the various rowing clubs. The committees having charge of the entertainment are—Committee of ar-

rangement: E. Kehrlein, C. Rudolph, R. Oliver, A. F. Schuppert, A. R. Tuckey. Reception Committee: A. Tuckey, J. Artigues, B. Kehrlein, J. Hanghy, W. Poehman. Floor Committee: V. Kehrlein, J. W. Heerdtwick, A. L. Schuppert, J. Kehrlein, H. Tuckey.

THE PROBABLE PROGRAMME.—It looks very much as if Courtney is to be brought out again as champion of the world. The plans of those professional oarsmen are as complicated as the programmes of the professional politician, and when they seem to be making headway in one direction it is always prudent to keep a look-out on the opposite course. One can never tell where the wily gentry are going to turn on their tracks and elude the public eye. Last year Courtney rowed in the Toronto regatta and made a pretty fair showing, but the matches between Hanlan and Boyd and Trickett distracted attention from the ex-champion amateur and towards the end of the boating season he dropped out of sight. This year there is no one to row Ross a match race.

YACHTING.

Why Not Race?

A few weeks ago the BREEDER AND SPORTSMAN published some reasons why yachtsmen did not enter their boats for races more frequently, and why yacht racing was on the decline. These reasons are those shown by experience. They are not commonly recognized outside of yachting circles, but those who have ever had anything to do with getting up races or regattas know with what difficulty every one is brought up to the scratch. It will be thought that everything is going on swimmingly until all of a sudden one man will change his mind, whereupon half a dozen more will have fault to find and will draw out or want conditions which cannot be complied with. It is very hard to get a lot of yacht-owners to agree to enter their boats for a race, especially if one very fast yacht is likely to get the prize. During the New York Club contest recently a spirit of this kind was shown, as will be seen by the following statement by a correspondent:

"The schooner Montauk did not start in the race of last Monday. Various reasons are given for not starting. It was said that Mr. Platt, hearing that he had been styled a 'mug hunter,' decided to show that he was not by declining to start for this particular mug; but I judge the real reason to be that the Halcyon, which had come on from Vineyard Haven with the fleet, instead of coming into Marblehead with the rest, went to Boston and was hauled out and had her bottom cleaned. Then she went to her owner's place at Nahant, where she was stripped for the fray, every superfluous article having been sent ashore; and Mr. Platt, of the Montauk, or, more properly, Captain Joe Ellsworth, who was charged with the conduct of her racing, did not deem it advisable to race under unfair conditions, the Montauk being obliged to go in cruising trim, with anchors on the bow, tanks full of water, ice-house full, etc.

"As the result proved, the Montauk could have won had she started, for she went over the course with the Halcyon, starting behind her and finishing ahead. It was to be regretted that she did not start, as it permitted an Eastern schooner to again capture the prize. This has been done now for many years, and the Montauk was relied on this year to reverse the result. Last year the Tidal Wave, the only schooner of the fleet that could have captured the Eastern schooners, was barred out by the unjust prejudices of—not the club but—the fleet captain against the gentleman in whose charge she had been placed by her owner, and this year the New Yorkers have been prevented from capturing the schooner cup by a childish notion that a shrewd Yankee trick had been played on them. There was nothing reprehensible in the conduct of Mr. Payne, the owner of the Halcyon. It was his duty, representing, as he did, the Eastern Club, to put his vessel in as perfect a condition as possible for the race, and so long as he violated no rule he is not blameworthy. The Montauk should have started, and if beaten, then all this extra preparation of the Halcyon could have been alleged in excuse, and if she conquered, then her triumph would have been all the more.

"These petty jockeyings by boats with a reputation for speed, such as refusing to start when there is the least doubt of their winning, should be discountenanced by all means by a club such as the New York, which is an association of gentlemen, and not a sporting organization at all. While all should desire to win as a matter of course, they should enter their boats for the sake of the race, and not for the sake of the victory. It is this spirit that has made it well-nigh impossible to have a regatta.

"I've got no chance," says Mr. A., "and why should I enter?"

"My boat has got a reputation for speed," says Mr. B., "and why should I jeopardize it? If she should be beaten it would detract \$2,000 from her value."

"They call me a mug-hunter," says Mr. C., "and I'll show 'em I ain't one. I've got a boat faster than any that is entered, but I won't start her, though I could take the prize as easy as not if I chose."

"Then others object on the score of canvas. They have no balloon sails, and others have, and so, as I have before this pointed out, the money spent for the regatta might as well be saved."

The Chispa now flies the owl flag.

The Clara will not sail in the race to-day. There are no other boats of her class to compete with and the schooners are all too large for her.

The little Whitewing has been made ready for the fray and hopes to clean the O'Connor and Fleur de Lis on Saturday; she is not, however, sure of the Nellie.

The Casco looks very handsome under sail, and last Sunday in the channel in the stormy breeze, just heeled over a little, she made a perfect picture of a fine yacht.

The Pacific Yacht Club regatta committee consists of W. H. Masteustein, Con O'Connor and G. J. Denny. The judges are J. C. Kelly and C. O'Connor, John L. Eckley being referee.

The Bohemian Yacht Club is going to open its new clubhouse on the 16th with suitable ceremonies. There are only five members of this club, each one being a yacht owner. The members are all of them also members of the San Francisco Yacht Club, using the wharf, etc., of that club as a landing place. Their new house is a little gem of a place, very neatly fitted up.

The yacht Turner is building for the Spreckels brothers is all planked up and they are waiting for deck plank to go ahead with that part of the work. Port Orford cedar (\$50 per M.) is used for deck plank. The yacht will be completed

in two months. The internal arrangements are not yet fully decided on. With an 85 feet yacht and no centerboard in the way there is plenty of room.

The small yacht race of the San Francisco Yacht Club will take place on the 16th inst. over the same course as last year. In addition to the usual plungers, sloops, etc., there will be 12 or 15 whitehall boats. City yawl boats and boats from Oakland will make up the fleet. The classes will be within five foot limits, and in each class will time allowance be given. There is a good deal of interest manifested among the runners of small yachts and the race will, no doubt, be a very interesting one.

The "fast and favorite" yacht Nellie is not going "for blood" in the race to-day apparently, for she has not been taken out of the water to be cleaned. She was last on the dry dock some time in July; moreover, her owner, Mr. Bowie, is going to sail her himself, the one who usually sails her, Captain Murphy, going on the Ariel with Turner. The crew that usually sails on the Nellie is also going on the Ariel, so the Nellie will not be in good shape for a race. She has enough glory, however, to let some other yacht have a show.

The schooner Ariel is sailing much better than she ever did before, since she has a new Bermudian mainsail, lead keel, etc. But she has not sailed in the past two weeks as she did at first when launched. Perhaps she is foul. At one time the Ariel almost beat the Nellie; now she cannot come as near it as Commodore McDonough's fine yacht Aggie, which now carries the prize flag of the Pacific Yacht Club, and is expected to take it again in the race on Saturday. However she has a team to buck against. The Ariel, Nellie, Fleur de Lis, Annie, O'Connor and Whitewing are all "going for her scalp." She has a good deal of allowance to give these yachts and must keep running to beat them. The Ariel and Nellie in particular are going to be hard to beat. Turner is going to sail the Ariel and Hyde Bowie will sail the Nellie.

FISH.

Fishing in Oregon.

The fishing season is about ended, and the general cry is "no fish," unless you go away up the Mackenzie or the headwaters of the Clackamas. Within forty miles of Portland, trout fishing is virtually at an end until such times as a ripper civilization shall guarantee more stringent and arbitrary laws for the preservation of streams. If men would content themselves with one or two dozen good-sized trout and throw back all the little fingerlings, to give them a chance to grow, Oregon would continue to be a good trout-fishing State for many years. But the love of making a big count is set so deep in the breasts of some men that they will keep on catching them by hundreds, regardless of whether they can use them or not. So they bring back to town the surplus and distribute them among their friends, and the streams are furnishing food to men who never think of incurring the toil and labor required to catch them.

Then there are the dynamite fiends, who sink their accursed cartridges in the streams and kill five fish where they actually catch one. This has been a crying evil about Seattle and Tacoma, which once boasted an abundance of the most beautiful and gamest of trout. Now it is almost impossible to catch a dozen trout in a day's fishing in any of those streams. This work is a villainous offense and calls for the severest punishment. Those who practice it are generally low men, of coarse and brutal natures, whom a few months in jail would benefit on general principles.

The incoming legislature will be permitted to enact a general and stringent law that will discriminate between the words "game" and "meat," and teach these wretched poachers that they cannot wantonly destroy fish in our beautiful streams without incurring heavy fines and imprisonments. Then we may be able to give the fish a chance to grow and to breed, and compel these lazy vagabonds to go to work. Not an angler ever was known that destroys and exterminates as many fish in a week as these giant powder fiends are doing in a day. If they go on in this way for five years longer, split-bamboo rods will be worth about a dollar apiece.—*The Oregonian*.

CARP FISHING.—In Virginia they seem to think the carp is a good biter and puller, more particularly in the month of August. A gentleman gives his experiences as follows: "We found these fish would not bite at worms, but would at bread, and that the best bread with which to bait the hook is the crust of a baker's loaf or roll, fastened on the hook with the crust side up. Our party, including some old and experienced anglers, were astonished to see how some of the fish bit in genuine black bass style. In bottom and wind the black bass does not compare with the carp. We might say that among fish the carp is what an old-fashioned foxhound is among dogs—a little slow, but of long enduring power. This fish, we believe, fights as gamely for life when in water as a mountain trout. It does not pull so hard as a bass will for a little while, but long after a bass would throw up the sponge the carp comes up smiling, and you cannot see that it has lost a particle of its power to repeat the same thing for many rounds. The truth is that of the carp we caught, though allowed to play a long time, not one of them said 'I give it up,' but continued to the last to fight hard. To any man of soul who knows what good sport is, we would say: 'Make a pond, get some (as many as you can) young carp and put them in said pond. Throw out some scraps of bread to these fish once a day, and in twelve months you can have such sport as would have electrified old Isaac Walton.'"

A MEAN TRICK.—The other day a well-known sportsman doing business on the south side of J. street, between Second and Third, went fishing. The first thing he did was to cast his expensive throw-line from the bow of the boat without first taking the precaution to fasten it. He got out other tackle, however, and set to work in a lively way, and soon began to drop perch, catfish, etc., into the bag suspended from the side of the boat. After he had taken a goodly number, he drew in his sack to start for home, when he made the disheartening discovery that some thoughtful friend had cut open the bottom of it before he left town. He is still on the warpath.—*Sacramento Bee*.

It is stated by one of the pilots that in the vicinity of the wreck of the steamer Escambia on the bar outside the Golden Gate, the fishing is very good. Since the wreck occurred it seems that large quantities of fish have gathered in the neighborhood. Why this is so is not known, unless they find food in the great quantities of wheat which have come out of the steamer's hold. Whatever the reason, there are plenty of fish there. It will not do, however, to go there in a skiff or a Whitehall boat, so the fish are likely to remain abundant unless they emigrate to the neighborhood of the seawall where they can rejoice the hearts of many anglers by their presence.

A WASTE OF FINE SALMON.—The thousands of pounds of salmon that have gone to waste during the last few days have aroused the indignation of all true sportsmen. The fish that have been thrown into the bay would, judiciously caught, have supplied hundreds of people with substantial food. It is without doubt a fact that the salmon that spoiled on the wharves and steamers were caught before the season opened and it seems as if something might be done by our Fish Commissioners to punish the violators of the law, and were there such men as the late B. B. Redding at the head of fishing matters there would no doubt be some steps taken in the matter. There is a little satisfaction for us to know that these salmon catchers have had all their work and expense of shipping for nothing by the fish spoiling on their hands.

Many of the trout streams are pretty low now and afford no sport.

They have introduced the California trout into New Zealand.

Some of the yachtmen had very good sport in Vancouver Straits last Sunday.

A number of people were fishing on the shoal ground near Anita rock last Sunday.

Giant powder is used for fishing on the Hudson river, and sportsmen are trying to stop it.

The trout are all down at the lower end of the stream, our headwaters being no longer fashionable.

Last Sunday morning the Market Inspector condemned as unfit for food 21,000 pounds of salmon.

Wm. T. May with H. C. Neff caught 35 pounds of rock cods in one hour at Alcatraz Island on Friday, the 1st inst.

Before long the split bamboos will be laid up in ordinary and the shotguns taken as the reigning favorite.

People who expect to go up to the Cloud river next season are very much disgusted to read of the killing and wasting of thousands of salmon in the bay.

On Sunday last there were a great many boats anchored all along the Saucileto shore, and inquiry among the occupants showed they were having fine sport.

On the Yuba and American rivers there is very fine Eastern and California trout fishing lately. The Eastern trout were placed in these rivers several years ago by the Fish Commissioners and now weigh from $\frac{3}{4}$ to $1\frac{1}{2}$ pounds each.

A large number of black bass are being put in Lake San Andreas not only for the purpose of stocking the lake, but also to exterminate a small fish called the stickleback which gets into the small pipes in the city, as San Andreas is one of the Spring Valley Water Co.'s reservoirs.

In measuring distance on the water for fly casting tournament the method adopted is to have a cord with buoys attached, weighted underneath, so that when the cord is stretched the buoys stand upright, and the numbers are easily read for some distance. Buoys placed five feet apart. The first buoy is marked 25; a knot is tied in the rope at zero, that is, drawn to the stake from which they cast, so that the buoys register correctly. The odd feet between the buoys are estimated, if the full distance is not reached, as it would take so many buoys to mark every foot.

It seems astonishing that people who will talk about fish and fishing by the hour will not write about the same subject for a minute. As a rule it is difficult to get much information from anglers for publication. They have their favorite streams, which they keep quiet about, and their favorite flies, which they keep secret. When one goes to them to find out about these things they will talk about them but will not give permission to publish the facts. Nor will they take up a pen to write a few points which will be of interest to their fellow sportsmen. Yet these same men will quickly find fault if there is not plenty of fresh news for them. This is not a "growl" but only a "hint."

The intention of the originators of fly casting contests was to encourage and instruct amateurs in fly-casting; but, by some means, of late years the judges have laid but little stress upon any of the points except distance, a ruling that some object to from the fact that while a man may be able to cast a long distance, he may at the same time do it in the most awkward manner, and in the nice points in handling a fly-rod for fishing, such as "accuracy" (in being able to cast his fly direct to a certain spot), "delicacy" (in being able to drop his fly lightly upon the water), and "style" (being able to handle his rod easily and gracefully, using both hands equally well, in fact, a practical fly fisherman) be entirely deficient.

If any one catches a flounder in the bay with numerous teeth in a double row, on both jaws, irregular in size, with large hooked upturned ones among the smaller upright teeth, he will know he has caught the rare hook-billed flounder. Sometimes they grow to eighteen inches in length. The fish in form is extremely slender, the greatest width scarcely extending one fourth of the total length, and tapering rapidly toward the extremities. The head enters about $4\frac{1}{2}$ times in the total length, and is narrow, with an immense mouth, the upper jaw of which exceeds in length the one-half of that of the head. The eyes are almost even in front, the upper one placed almost across the top of the head. The scales of the fish are large and soft; the fish is sometimes caught in these waters, but not very often.

A ROYAL BATTLE IN GERMANY.—At Hohenwald is situated the royal game preserve of Germany—a large tract of woodland stocked with game birds and animals, the *hoch-wild* or red deer being conspicuous. At various intervals in the forests are glades of considerable extent, and on each of these is a *hoch-sitz*, or shooting-box, half hidden in foliage. In these structures the adventurous sportsmen enclose themselves and wait the coming of the deer driven past them by bands of peasants who, stationed at intervals, advance, in beating the bushes and trees, thus drawing the deer from their retreats. The danger is not great, and to an American sportsman it would seem that the excitement of the chase must be entirely wanting; but it suits the convenience and ease of the nobility, and that is the chief end and aim among these doughty Nimrods.

WILD HORSES IN IDAHO.—It is stated by cowboys engaged on Snake River, Idaho, that a band of over 500 horses, mostly Indian ponies, are running in the Snake River bottoms without any claimants. The Indian ponies have been running loose in that section since the removal of the Bannock Indians from the reservation, having escaped at that time, and since then many horses owned by prospectors and others have been missed, and are, no doubt, with the wild ponies. Some of the Wood River boys propose organizing a party and striking out to capture the entire band.

Trotting at the East.

By cable we learn that the Charter Oak Park races closed on September 1st. The 2:19-class race Minnie R won; Pickard second, William H third, Driver fourth, Humboldt ruled off. Time—2:21, 2:21½, 2:20½, 2:20, 2:21½, 2:23. The open-to-all race Santa Claus won; Fanny Witherspoon second. Time—2:17½, 2:19½, 2:21½. The three-minute class race Wilson won; Eva second, Sweetness third, Red Bird fourth. Time—2:25½, 2:22½, 2:23.

The Springfield (Mass.) meeting commenced at the Hampden Park on September 6th. In the 2:29 class, Yellow Dock won; St. Cloud, Valley Boy, George A, Independence, and Brutus in the order named. Time—2:23½, 2:23, 2:25½. In the 2:23 class, Captain Lewis won; Florence Maid, Lucrece, and R P in the order named. Time—2:20½, 2:20½, 2:22½.

The fall meeting of the Cleveland Trotting Club opened on September 5th. In the 2:40 class, Fred Goldust won; Sam'l J. Tilden second, Kittie Patchen third, Colonel Banister fourth; best time, 2:27½. In the 2:29 class, Ewing won; Gift Junior second, Rigolette third, Polka Dot fourth; best time, 2:21½. The two mile running race between Miss Williams of Kansas and Miss Burke of Nebraska, was won by Miss Williams in straight heats; time, 3:46½, 3:55½.

Foxhall, Bookmaker, Romeo and Wallenstein have been accepted for the Czarowitz stakes, October 10th at New Market, and Iroquois, Nereid, Sachem, Aranza, Foxhall, Don Fulano, Bookmaker, Romeo and Wallenstein have been accepted for the Cambridgeshire stakes, October 24th. Both these important handicaps were won last year by Mr. Keene's horse, Foxhall.

At Minneapolis on Sept. 7th, in the first race for the 2:40 class, Prince Arthur won, Brown Wilkes second, Mollie B. third, Lady Florence fourth; time, 2:27½, 2:27½, 2:29½. In the pacing race for a purse of \$5,000, four heats were made, when the race was postponed. The horses paced as follows: Gem, 5, 2, 1, 1; Buffalo Girl, 2, 1, 5, 2; Mattie Hunter, 1, 4, 2, 3; Flora Belle, 3, 3, 3, 4; Lucy, 4, 5, 5, 5; time—2:19½, 2:15½, 2:17½, 2:17½.

At the Cleveland meeting was a four-in-hand team race, which trotted the second heat in 2:40½, beating the best previous record for four-in-hand teams 7½ seconds.

At the Hampden Park races on the 7th, Clingstone gave an exhibition of speed for a purse of \$1000, trotting three heats in 2:20, 2:19 and 2:18. In the 2:34-class race six heats were trotted. The result was: Louise N, 1, May Thorne, 2; Barrett, 3; Winchester Maid, 4. Time, — 2:30, 2:26, 2:26, 2:25, 2:27½, 2:25½. In the 2:26 class Onawa was first, Mannie second, John Hall third, Ethel Medium fourth. Time—2:21½, 2:25½, 2:22½, 2:22½.

The Chico Fair.

It is pleasant to learn that the fair of the third District Agricultural Society, composed of the counties of Sutter, Yuba, Butte, Colusa, Tehama, Yolo and Sacramento, is growing in popularity every year, and that more strenuous efforts have been made to insure its success. The track has been very much improved under the charge of Charles Sherman, despite the fact that no races have taken place this season at the driving park. The fair opened on the 5th, but as is usually the case there was a great deal of delay in getting the exhibits into order, as the secretary, J. H. Krause, was busy all the day in registering the entries, the same showing thus far a notable increase on those of the previous years. On the succeeding day the pavilion was in far better order and the visitors were generally pleased with the result, although a few vacant spaces that were bespoken showed that some exhibitors were yet to retard at the races. There was the largest show of good stock ever seen at these fairs, and the racing gave general satisfaction to the large crowd of visitors who were present. On the opening day the first race was for a purse of \$450, trotting, for the 2:30 class. The entries were: Winston, Slim Jim and Carlisle. The former won in three straight heats. Best time, 2:27. Slim Jim was distanced in the first heat, and Carlisle in the second heat. On the second day there was a large crowd at the track. The first race was running, a mile dash, for \$150. Maria F., Minnie Bell and Lady Partisan started. Maria F. won easily; Minnie Bell second and Lady Partisan third. Time 1:46½. The second race was a free handicap, running, one and an eighth mile; entrance \$50, \$25 forfeit, \$200 added. Fred Hunter, Shiner, Jubilee, Jim Brown, Ingersoll and Howell started. Howell won. Time, 1:57½.

The first attraction on Thursday was the parade of horses and cattle. Next came the ladies' tournament. The entries were: Mrs. B. C. Trefry, Mrs. R. A. McCormick, Miss Horner and Miss Annie Clark. They gave a fine exhibition of equestrianism, and the large audience expressed great satisfaction. The judges will award the prizes to-morrow morning. Following the tournament was a race of a mile and a half, for three-year-olds. Hearst entered Maria F., Miller entered Lady Partisan, and Anderson entered Minnie Bell. Maria F. won the race and money. Time—2:58½. The second race was running, one mile and repeat, for a purse of \$250. Hunter, Shiner and Jubilee were entered. Jubilee won the first heat. Time—1:46; Shiner won the second heat. Time—1:49½; Jubilee won the next heat and race. Time—1:59½. The third race was trotting; \$150, for three-year-olds; three in five. Monte, Telegraph and Zulu Chief entered. Monte won the first heat. Time—2:54½, and Telegraph the second.

ond. Time—2:58. The race was postponed until the next day.

THE ENTRY FOR THE SARATOGA STAKES.—The entries for the great stakes of next year and of 1884 that were recently closed, show such a large increase in the number of subscribers that all fear that the "boom" of last year and of this year up to the present will not be sustained in at an end. Not only have the entries for the Saratoga events closed well, but those to be run at Jerome Park, Sheepshead Bay and Monmouth Park also show an increase. The number of entries for the Saratoga events as closed on the 15th, compared with those for the previous four years, are as follows:

	1882.	1881.	1880.	1879.	1878.
Saratoga Stakes, 2 y. o.	62	45	47	18	40
Kentucky Stakes, 2 y. o.	67	37	30	22	21
Travers Stakes, 3 y. o.	77	54	56	36	45
Alabama Stakes, 3 y. o.	72	50	51	18	38
Kenner Stakes, 3 y. o.	87	44	44	37	40

In addition to the stakes given above, the two new three-year-old stakes—the Iroquois and Foxhall—both received a large entry, the Iroquois 84 and the Foxhall 96. One reason, perhaps, for the large increase is that all the stakes have a small declaration clause—for the Saratoga and Kentucky \$20 if declared on the 1st of next January, and for the three-year-olds \$25 if declared out by January 1, 1884. Among the subscribers for both the two and three-year-old stakes appear the names of Mr. Kelso, N. W. Kittson, Oden Bowie, Churchill & Johnson, T. J. Megibbon, R. W. Walden, Dwyer Brothers, W. M. Conner, C. Reed, Milton Young, W. A. Dun, Appleby & Johnson, W. L. Scott, the Suffolk and Preakness stables, and a dozen others; but the great eastern stables—the Lorillards, the Belmonts, Withers, and others—are apparently conspicuous by their absence.

AMERICAN HORSES FROM ENGLAND.—Mr. James R. Keene has weeded out his English stable, as four of his thoroughbreds have recently returned to New York. These are Bushman, b. c., 4, by Glenelg—Anna Bush; Seminole, ch. c., 4, by Australian—Alabama; General Scott, 3, by Glen Athol—Lotia, and Cromwell, br. c., 3, by King Alfonso—Quickstep. All four were bred in America, and have been sent back after various phases of lack of success on the English turf, three having started and none being bracketed as winners. The passage over was a long and tedious one, head winds prevailing during the best part of the journey, which occupied thirteen days. The horses are now quartered at the Sheepshead Bay track in charge of Warfield, a young colored man, who rode and won the Breeders' Stakes with compensation at Monmouth Park in 1880. Although the horses have been in their present quarters two or three days they bear the marks of the voyage and perhaps lack of good treatment. In the stable are also Palmetto and Manhattan, both two-year-olds, which are expected to start at the Sheepshead Bay autumn meeting. Dan Sparling has been retired to Harrisburg, Va., where, under charge of F. A. Dangerfield, he will be put to the stud.

ELECTRIFIED HORSES.—A great crowd collected recently in Nassau street, New York, to see the astonishing conduct of the horses at a certain point in the road. One horse no sooner reached the mysterious spot than it reared, pawed the air for a moment, and then started off at a speed that fairly took away the driver's breath. Other animals acted in a similarly inexplicable manner, to the astonishment of the spectators. It was at length discovered that a discharge of electricity underground was the cause of the trouble, the electricity communicating with the horses through their iron shoes. A policeman gave notification of the disturbance to the Edison Company, and the current was cut off. "You see," said Edison, "excavations are made from time to time for the laying of steam heating pipes, and this causes us no end of trouble. Our conductors become undermined and get pressed down upon the pipes, so that when a heavy truck passes along there is a jar, and an electric shock is the result."

THE LAWS OF THE TURF.—Donohue, the jockey, has brought an action for libel against James Kelly, the bookmaker, placing the damages at \$10,000, and Kelly has furnished bail in the sum of \$3,000. The action is based on a turf event which occurred at the Monmouth Park meeting. On July 20 Donohue was mounted on John H. Harbeck's horse, Marathon, who was backed heavily to win the race. Carroll Livingston's horse, Hospodar, came in ahead and it was charged on the course at the time that Hospodar won the race because Marathon was "pulled" by the jockey. Kelly was the principal accuser against Donohue. He said that Donohue while pretending to whip Marathon with his right hand was holding him back with his left hand, and that Donohue was bribed to do so by F. Theodore Walton, proprietor of the St. James Hotel.

THE PURSE OF \$10,000 offered by W. P. Balch of Boston, and that will be decided on September 14th at the Beacon Park, closed on August 31st, when the fourth payment was made together with the following nominations: Fanny Witherspoon, Black Cloud, Helene, Clingstone, Parana, Edwin Thorne, Humboldt and Santa Claus. There were thirteen entries paid up, so evidently there were some nominators who could not find horses of sufficient speed to contest with those who would probably be named. It promises to be the sensational trot of the season.

OLYMPIC CLUB ELECTION.—The Olympic Club election on Monday last resulted, after a close contest, in the victory of the following compromise ticket: President, Horace F. Fletcher; Vice-President, Martin J. Flavin; Treasurer, Henry B. Russ; Secretary, Richard S. Polastri; Leader, Hiram B. Cook. Directors—James B. Stetson, Charles W. Platt, James H. Jennings, Joseph Lyons, Wm. Levison, Wm. C. Brown.

The first conviction in Los Angeles county for shooting game out of season was obtained on Tuesday last. The prosecution was made by the Los Angeles Sportsmen's Club.

Market Report.

FLOUR—Market fairly firm. We quote as follows: Best City Extra, \$5 37½@55 50; Superfine, \$4 50@4 75; Interior Extra, \$4 75@55 25; Interior Superfine \$3 75@4 75 bbl.

WHEAT—The situation is less favorable for the selling interest, and if any great pressure were made to realize, a bad break would probably be the result. The asking figures are reported to be \$1 67½. Spot sales of good shipping in small parcels recorded as low as \$1 62½ also No. 2 White, September delivery, at \$1 58½ ctl.

BARLEY—The deliveries of October and November absorb most of the attention. Prices range, for No 1 Feed, October, from \$1 32½@1 34; do November, \$1 34@1 35 ½ ctl; Brewing, \$1 38½; coast Chevalier, \$1 30; coast Feed, \$1 27 ½ ctl.

OATS—The market is well supplied and the prices unsteady. The range for spot lots is from \$1 55@1 75 ½ ctl.

RYE—\$2 05 is bid and and \$2 37½ asked for No 1. September.

HAY—We quote: Alfalfa, \$11@13 50; Wheat \$13@16; Wild Oat, \$12@15 50 ½ ton.

STRAW—Quotable at 55@60c ½ bale.

BEANS—quoted at: Bayos, \$2 40@2 50; Butter, \$3 25@3 50 for small and \$3 60@3 80 for large; Lima, \$3 50@3 75; Pea, \$2 50; Pink, \$2 32@2 25; Red, \$2 22@2 25; small White, \$2 50; large White, \$2 30@2 40 ½ ctl.

ONIONS—Silverskins sell for 50@70c ½ ctl, and Red for 30@40c ½ sack.

POTATOES—Small choice lots only sell at the extreme quotation. Wharf rates are as follows: Early Rose, 85c@81; Garnet Chile, \$1@1 10 ½ ctl; Sweet, \$1 50@1 75 ½ ctl.

POULTRY—Job lots quoted as follows: Live Turkeys, gobblers, 15@1 c; do Hens, 15@17c; Roosters, \$5@6 for old and \$4 50@5 for young; Hens, \$5@5 50; Broilers, \$3@3 50 according to size; Ducks, \$4@5 50 ½ doz; Geese, \$1@1 25 ½ pair; Goslings, \$1 25@1 75 ½ pair.

RABBITS—We quote: Hare, \$1 75@2 25; Rabbits, \$1@1 50; Doves, 50@75c ½ dozen; Venison, 10@12c ½ lb.

PROVISIONS—Values steady. We quote: Eastern Hams, 17½@18½c; California Hams, 16@16½c for plain, 16½@17c for sugar-cured canvased; Eastern Breakfast Bacon, 17½@18c; California Smoked Bacon, 16½@16c for heavy and medium, and 17½@18c for light and extra light; Clear Sides, 16½@16c; Pork, \$21 50@22 for extra Prime, \$24@25 for Prime Mess, \$25@25 50 for Mess, \$27 for Clear and \$28@28 50 for extra Clear; Pigs' Feet, \$16@18 ½ bbl; Mess Beef, \$14 for bbls and \$7 for hf bbls; Extra Mess Beef, \$14 50@15; Family Beef, \$16@16 50 bbl.

HONEY—Comb, 14@17c; extracted, 7@9c ½ lb.

EGGS—Liberal arrivals would break prices, as the inquiry at present rates is said to be very limited. We quote prices: California choice, 40@45c; Interior, 32½@37½c; Eastern, 30@32½c; Oregon, 35@37½c ½ doz.

BUTTER—An absence of outside orders and close purchases on the part of local buyers give the market an easy tone. Fancy, 40c; choice, 35@37½c; fair to good, 20@32c; Interior lots from country stores, 2½@2c; firkin, 20@31c for good to choice, and 25@27c for ordinary; pickled roll, 30@31½c; Eastern, 20@25c ½ lb.

CHEESE—Market easy, and quotations are, California, 12½@13c for choice; 10@12c from fair to good; do, factory, in boxes, 15@16c; Eastern, 16@17c; Western, 11@13c ½ lb.

HIDES AND SKINS—Fair business reported. Dealers are paying the following cash rates for lots in order: Dry hides, usual selection, 20@29c; culls one-third less, and Mexican Hides 1c ½ lb less. Dry Kip, 18@19c; Dry Calf, 21@22c; Slated Steers, over 55 lbs, 11c ½ lb; Steers and Cows, medium, 10c; light do, 7½c; Salted Kip, 15 to 30 lbs, 10@10½c; Salted Calf, 11@12½c ½ lb; Dairy Calf, 65@70c each; Sheep Skins, 20@25c for Shearlings; 25@50c for short, 60@80c for medium, and 75c@13 apiece for long wool and wool skins. Butchertown Green Skins bring higher prices.

TALLOW—Good demand, quotable at 8½@8¾c ½ lb for rendered and 10½@11c for refined, both in shipping order.

WOOL—The week so far has not been productive of any notable result. Inquiry nominal. We quote: Humboldt and Mendocino, 25@26½c ½ lb; Sonoma, 24@26c; Siskiyou and Modoc, 20@25c; San Joaquin, free, 17@18c; San Joaquin, defective, no sale; Southern Coast, burly and seedy, 15@17c; Eastern Oregon, choice, 21@24c; Eastern Oregon fair, 20@22c; Eastern Oregon, poor, 18@19c; Valley Oregon, fine, 25@27c; Valley Oregon, coarse, 22@24c.

FRUIT—Supplies are not coming forward quite so freely, and occasional sales are made above our quotations. We quote: Apples, 25@50c ½ bskt and 50@81 ½ box; Pears, 25@40c ½ bskt and 40@60c ½ box; Bartlett do, 50c@81 ½ bskt and \$1 50@2 25 ½ box; Strawberries, \$10@12 ½ c chest; Raspberries, \$10@12 ½ c chest; Peaches, 35c@51 ½ box and 30@60c ½ bskt for common and 75c@1 ½ bskt for choice; Figs, 40@75c ½ box; Grapes, 35@50c for common, 50@75c for Black Hamburg, 50@75c for Rose of Peru, 50@80c ½ box for Muscat and 75c@81 25 ½ box for Tokay; Plums, 25@75c ½ box; Quinces, 75c@81 ½ box; Blackberries, \$4@5 ½ c chest; Watermelons, \$4@10 ½ hundred; Cantaloupes, 60c@81 ½ crate; Lemons, \$8@9 ½ box for Sicily and \$1@1 50 for California; Limes, \$12@15 ½ box for Mexican; Bananas, 32@33 50 ½ bunch; Pineapples, \$6@8 ½ dozen; Tahiti Oranges, \$35@45 ½ thousand.

VEGETABLES—Continue in large supply at unchanged rate. We quote: Marrowfat Squash, \$5@8 ½ ton; Carrots, 30@50c; Turnips, 75c@81; Cauliflower, 60@65c ½ dozen; Cabbage, 50@75c ½ ctl; Garlic, 12½c ½ lb; Cucumbers, 15@20c ½ box; Green Peas, 4c ½ lb; Green Peppers, 50@75c ½ box; Tomatoes, 10@30c ½ box; Celery, 50c ½ doz; Summer Squash, 30@50c ½ box; String Beans, 3@4c ½ lb; Green Corn, 7@12c ½ doz; Okra, 50@75c; Egg Plant, 50@75c ½ box.

MEATS—Following are the rates for whole carcasses from slaughterers to dealers:

SAME DAY.

No. 12. Running, free for all, 2 mile dash; purse, \$350

REMARKS AND CONDITIONS.

All trotting races are the three best in five, unless otherwise specified, three to enter and two to start. Entrance fee, 10 per cent. on purse, to accompany nomination. Purses divided at the rate of 60 per cent. to first horse, 30 per cent. to second, and 10 per cent. to third.

All running purses to be divided, two-thirds to the first horse and one-third to the second horse; four to enter and two to start, except race No. 11, three to enter and two to start.

National Association Rules to govern trotting; but the Board reserves the right to trot heats of any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats.

To fill running races, four or more subscribers are necessary.

All the two-year-olds, when running in their classes, shall carry 100 pounds, with the usual allowance for mares and geldings.

All three-year-olds, when running in their classes, to carry 110 pounds, with the usual allowance as above.

No added money for a walk-over.

Horses entered in purses can only be drawn by consent of the judges.

Rules of the Pacific Coast Blood-Horse Association (old weights) to govern running races, except when conditions named are otherwise.

All entries made in writing, giving name, sex, color and marks of horses; also, name and residence of owner. In running races, full colors to be worn by rider; and drivers of trotters are respectfully requested to wear caps of distinct colors, to be named in their entries, as the colors worn by drivers.

Entries to all the above races to close with the Secretary on Saturday, Sept. 30, 1882.

Write "Entrance to Races" on outside of envelope. NOTE--"Exile" is barred from trotting races 1, 2 and 3. C. J. BARRETT, President.

R. H. HEWITT, Secretary.

No. 4--RUNNING--Half mile and repeat; free for all horses owned in the District; purse, \$75; entrance \$5, added.

No. 5--TROT--Free for all three-year-olds and under, owned in the District; 2 in 3; purse, \$75; entrance \$5, added.

THIRD DAY--FRIDAY, OCT. 6.

Grand parade of Stock.

No. 6--TROT--Free for all in the District; 3 in 5; purse, \$100; entrance \$5, added.

No. 7--FOOT RACE--75 yards and repeat; purse, \$50; entrance \$5.

No. 8--RUNNING--Free for all three-year-olds and under owned in the District; dash of three-quarters of a mile; purse, \$75; entrance \$5, added.

FOURTH DAY--SATURDAY, OCT. 7.

No. 9--RUNNING--Free for all; 2 in 3; purse, \$500. First horse receives \$400; second horse, \$100; entrance 10 per cent. of purse; 5 to enter, 3 to start. Entries close Sept. 1st.

No. 10--TROT--Free for all horses in the District that have never beaten three minutes; 3 in 5; purse, \$100; entrance \$5, added.

Rules and Regulations.

1st. The above purses will be given without discount.

2d. In all District Races the second horse to save entrance.

3d. Entries to be placed in the entry box, kept for that purpose at the Pavilion, prior to 9 o'clock P. M. on the day prior to race.

4th. Entries must give name, pedigree, and description of horse entered as far as known.

5th. In all District Races two or more entries make a field.

6th. All trotting races must be in harness.

7th. National Trotting Association Rules to govern trotting races.

8th. Pacific Coast Blood-Horse Association Rules to govern running races.

9th. Free for all in races 1 and 9, means just what it says, and all entries to these races must be made with the Secretary on or before September 1st.

H. MAGOFFEY, Secretary. L. SWAIN, President.

THIRD FAIR

OF THE

Ninth District Agricultural Ass'n

TO BE HELD ON

September 19, 20, 21 and 22, '82

AT

Rohnerville, Humboldt Co., Cal.

SPEED PROGRAMME.

FIRST DAY.

TUESDAY, SEPT. 19th, at 1:30 o'clock P. M.

RUNNING--No. 1. Purse of \$40. Free for all saddle horses that have never run for money. Catch weights. Half mile and repeat. First, \$30; second, \$10.

SECOND DAY.

WEDNESDAY, SEPT. 20th, at 10 o'clock A. M.

PARADE OF STOCK in front of the Grand Stand.

At 1:30 o'clock P. M.--RUNNING--No. 2. Purse of \$100. Free for all. Half mile and repeat. First, \$75; second, \$25.

At 3 o'clock P. M.--RUNNING--No. 3. Purse \$30. Mile Race. Half mile and repeat. Catch weights. First, \$20; second, \$10.

THIRD DAY.

THURSDAY, SEPT. 21st, at 10 o'clock A. M.

RUNNING--No. 4. Purse of \$150. Free for all. Mile heats, two in three. First, \$100; second, \$50.

At 1:30 o'clock P. M.--TROT--No. 5. Purse of \$100. Free for all horses that have never beaten three minutes. Mile heats, two in three. First, \$75; second, \$25.

At 3 o'clock P. M.--RUNNING--No. 6. Purse of \$40. Single dash of one mile. Free for all saddle horses that have never run for money. Catch weights. First, \$30; second, \$10.

FOURTH DAY.

FRIDAY, SEPT. 22d, at 10 o'clock A. M.

LADIES' EQUESTRIANISM. First, \$15; second, \$10; third, \$5. The ladies will prepare themselves with horses for the exhibition, and no changing will be permitted.

At 1:30 o'clock P. M.--TROT--No. 7. Purse of \$200. Free for all. Mile heats, three in five. First, \$150; second, \$50.

At 3 o'clock P. M.--RUNNING--No. 8. Novelty Race. Purse of \$150. Free for all. Weights for age. One mile dash. First horse to last quarter pole, \$30; first horse to second quarter pole, \$30; first horse to third quarter pole, \$40; first horse to last quarter pole, \$50; that is, the horse that first reaches a quarter pole wins money. If a horse reaches all the quarter poles and home first, that horse wins the whole purse.

REMARKS AND CONDITIONS.

These races are open to any horse owned in the Ninth District (composed of the counties of Del Norte, Humboldt and Mendocino) by a bona fide resident of the district, on the 1st day of July, 1882.

In all races three or more to enter, and two or more to start. Any horse distancing the field receives the entire purse.

Entrance fee, 10 per cent. on purse, to accompany the entrance.

All entries in these races must be made with the Secretary by seven o'clock on the evening previous to the race,

except in the race, the horses named and entered in the name of the owner, who must be a member of the association, and the entrance fee paid in full.

The trotting races will be conducted under the rules of the National Trotting Association, and the running races under the rules of the Pacific Blood-Horse Association.

All horses entered for a race will be under the control of the Judges from the moment they are brought on the track.

If from any cause there shall not be a sufficient amount of money received from all sources, including appropriation from the State, to pay all purses and premiums in full, after paying the expenses of the fair or exhibition, the same will be paid pro rata.

Neither the association, the Directors nor officers in any event to be liable for any purse or premium beyond such pro rata amount.

 E. S. Denison enters s m Lady Hays, by Hiram Tracy; dam, Nelson mare.
 A. L. Hinds enters W. M. Hammond's s s Oakland Boy, by Winthrop; dam, a Blackbird mare.

In addition to other premiums, H. T. Dorrance will offer a set of choice track harness, valued at \$65, for the horse owned in the District that makes the fastest trotting record at the Stockton Fair. He also offers a \$25-jockey saddle to the horse that makes the fastest running mile record owned in the District at the Fair.
 Irving Ayres, owner of Mambrino Wilkes, offers a special premium at our Fair, a silver tea-set and waiter, for the best two-year-old colt sired by the above horse. Also, for the second best colt, a silver water pitcher. The colts to be shown at the Stockton Fair.

REMARKS AND CONDITIONS.

All Trotting Races best three in five, except numbers 2 and 9.
 In all these Races (Pacific Coast Novelty Race excepted) four money, 50, 25, 15 and 10 per cent. of purse.
 When there are eight or more to start in a Trotting Race, 150 yards shall be a distance.
 Rules of the National Trotting Association to govern trotting, except as specified; but the Board of Managers reserve the right to trot heats of any two classes alternately, or to start a special race between heats.
 All two-year-olds, when running in their classes, shall carry 100 pounds, with the usual allowance for mares and geldings.
 All three-year-olds, when running in their classes, to carry 110 pounds, with the usual allowances as above; otherwise, old weights to govern.
 For a walk-over in any race a horse shall only be entitled to his own entrance fee and one quarter of the entrance received from the other entries for said purse; and a horse winning a race entitled to first money only, except when distancing the field, then entitled to first and third moneys only. A horse wins but one money under any other circumstances.
 Horses entered in purses can only be drawn by consent of the Judges.
 The Board reserves the right to change the day and hour of any race, if they deem it necessary.
 Rules of the Pacific Coast Blood Horse Association to govern Running Races, including additions to rules, except as specially provided.
 In all Running Races colors to be worn by riders, and in all other races, any other particulars that will enable spectators to distinguish the horses in the race.
 Races to commence each day at 1 o'clock p. m. sharp.
 The track is first-class, having been improved. Stables hay and straw free to competitors.

L. U. SHIPPEE, President.
 J. L. PHELPS, Secretary.

\$12,500

In Purses and Stakes.

 No. 4. O. C. Jackson names ch b Fruant.
 No. 5. J. L. Zuer names ch m Nellie Woods.

REMARKS AND CONDITIONS.

BREEDER AND SPORTSMAN

Vol. I. No. 12.
NO. 508 MONTGOMERY STREET.

SAN FRANCISCO, SATURDAY, SEPTEMBER 16, 1882.

SUBSCRIPTION
FIVE DOLLARS A YEAR.

EXILE--By Echo, his dam, Belle Mason, by Belmont.

Again is presented an illustration of a type, and in our estimation as nearly the model form for a trotter as can be found, when there is an admixture of other blood than that of the thoroughbred. That the "highest form" of the race-horse is also the most favorable for speed at the trot, has been our belief for many years, though, as is well known, there are other qualities that are of still more importance than high form, and in the fast trotter as well as in the fast race-horse there must be a capacity which is not indicated by the physical configuration. The fast trotter must also inherit an adaptability to acquire the fast-trotting step, and the combination of the Hambletonian, and other families of trotters, with the thoroughbred has given the inheritance, and the mingling of the blood of Echo and the old thoroughbreds of California has proved to be a successful admixture, well adapted for road and track. As was shown in the article accompanying the picture of Echo, he had a good share of thoroughbred blood, and according to the theory of some of the writers, his greatest success should have followed the coupling with mares of cold blood. But there is a progres-

sion in breeding trotters as in everything else, and now the most intelligent breeders are seeking for further infusions of thoroughbred blood. Maud S., Clingstone, Black Cloud, and many others have one grandparent thoroughbred, and with scarcely an exception the crack performers of the day are strongly combined with it in the near crosses. There is not room in this article, however, to present a list of the notabilities of the track which are bred in this way, but only the ultra-higoted advocates of cold blood will deny that there is an increased finish in the animals possessing the "royal blood." The portraiture, as the others which have preceded it, is an admirable likeness of the animal. Exile is a very handsome horse as the representation shows; a bright bay with near hind foot white, a touch of white on the right fore foot with a diamond-shaped star in the forehead. His coat is "silky" and the hair in the mane and tail is fine. He is magnificently adorned in this respect, both mane and tail being long and very full. He is fifteen and a half hands high and as wiry in form as a four-miler. He was foaled in 1876, bred by F. M. Slaughter, who still owns his dam. She is by Belmont, thoroughbred, his dam Lucy Johnson by The Pony, a son of imported Leviathan, and her grandam Catalpa by Frank. The favorite dam of Exile was by John Richards,

one of the great horses of his day, a brother to Betsey Richards, one of those Col. R. W. Johnson intended to run against American Eclipse, but going wrong, Henry was substituted. With the American Star, Kentucky Whip and Shakespeare crosses in Echo, and the known thoroughbred blood in the sire of Echo, Rysdyk's Hambletonian, it is not surprising that Exile should show "a deal of quality." He has shown so much speed that before the sale to J. B. Haggin, Wm. Titus entered him through the circuit, and he was confident that he would have made a good record. His brother, Joe Hamilton, now owned by G. Valensin of Hicksville, Sacramento county, Cal., was one of the most prominent colts of his day, and when four years old was only beaten by a neck a third heat in 2:30. He was then troubled with "a leg" which interfered with his training, and incapacitated him so that he has not started since. That Echo has been remarkably successful as the progenitor of trotters few will deny, and besides Exile and his brother there is Belle Echo to prove the value of the combination of Echo and Belmont blood. It is rare, indeed, that excellence on the track is not followed by excellence in the stud, and hence we confidently predict that the subject of this sketch will excel in both spheres.

CORRESPONDENCE.

Pictures of Horses.

Under the above caption a correspondent sends in the following article, and the reasoning would hold good in a majority of cases.

Three of the series published in the BREEDER AND SPORTSMAN are from photographs, and, according to our view, those which the artist drew from life are superior. But it is not often that an artist can be obtained who has the talent for animal delineation such as Mr. Wyttenbach possesses. The talent is rare, as it requires a knowledge of the form of the horse as well as the skill to place it on paper or canvas. There is scarcely one photograph in ten which is anything near the faithful portrayal of the animal. To be perfect every portion of the body would have to be equally distant from the camera, and these without a motion to mar the shadow on the plate. We have scores of photographs which if copied exactly as they are would be hideous caricatures of the animals they are intended to represent, and the very best of them require corrections before publication.

We can assure our correspondent that every picture is a faithful representation of the animal; nearly every one of them admirable:

STOCKTON, Sept. 6, 1882.

EDITOR BREEDER AND SPORTSMAN, Dear Sir: The interest that attaches to pictures of horses or of human beings is much alike. If you cannot see the person in question, the next best thing is the picture of that person.

A picture is of value or not according to the fact whether the truthful or the fanciful about it predominates. All reliable sincere people seek the reality before the fictitious or imaginative.

When is a picture of the horse truthful? Not often is it correct when it depends upon the integrity and talent of the artist. The lack of ability to faithfully delineate an animal is so prevalent that any drawing of a horse is almost fated to be defective. I would not look with favor upon any picture of a horse made by an artist of less merit and fidelity than that which belonged to Rosa Bonheur. This rule would condemn the majority of the painted pictures of horses in this country.

With common sense and common honesty, or rather that which belongs to the high order of business integrity—a photograph exhibits a likeness that is correct. But even the photographer, through purpose or fashion, will distort and falsify the picture of a person, if the instrument and sitter are brought too near to each other. Therefore, the picture of a famous horse to me is of no value that is not made from a photograph.

Some years ago a paper on the Pacific Coast published a picture of Flora Temple. Some time thereafter the writer saw a picture of Flora Temple with her colt, made from a photograph and published as a frontispiece to a book which treated of the horse and his development. That likeness was strong and captivating. It was self-evident and harmonious throughout. It was beautiful and instructive without glamour. It was truthful as artistic. The other artificial picture of that renowned mare—I think in the *Spirit of the Times*—was no more like Flora Temple than she was like a greyhound. It was a mockery.

Why not let the pictures of horses, in your good paper, be photographic likenesses? Then we should feel that after seeing the image of the animal we shall not be disappointed at the actual view of the original. Respectfully yours,

A. S. H.

Whipple's Hambletonian.

EDITOR BREEDER AND SPORTSMAN: There having been many inquiries about Whipple's Hambletonian I send you the following history: This grand old horse ranks well up among the celebrated trotting sires of America, and to-day holds the prestige on this coast. It was in the year 1863 that Mr. S. B. Whipple purchased in the State of New York the above named stallion, then a three-year-old, and brought him to California. The arrival of this horse laid the foundation for the successful breeding of trotters on the Pacific Coast. Whipple's Hambletonian, or as he is familiarly called the "old horse," is a rich chestnut, standing 15½ hands high. His sire by Guy Miller, by Rysdyk's Hambletonian, dam Martha Washington, by Burr's Washington, her dam by Abdallah. He trotted but four races, and never failed to bring home first money; his record is 2:39, made in his five-year-old form (certainly a very fair record for a colt seven years ago), and without doubt he would have lowered it a peg or two previous to the accident that befell him (being hurt across the loins on the boat while going to Sacramento). He had pulled George Evans a half mile, to wagon, in 1:09. The accident referred to above compelled his owner to withdraw him from the turf, where he could not help but make his mark, and to place him in the stud, where all was uncertainty; but the son of Guy Miller proved equal to the emergency, as his get will show.

The old horse served seven mares during his first season (1864); all proved in foal; the most promising of the seven colts died when three years old. The remaining six were: Lady Blanchard, trotted one season, won five races out of six and retired with a record of 2:26½; Westfield, record 2:26½, made when dead lame; Ajax, record 2:29, the winner of the \$10,000 aside race with Alexander; Countess, who gave the charmed 2:30 list a tight rib for admittance, and though she more than once beat thirty in private trials, never accomplished more than 2:33 in public. Starr Queen, out of an American Starr mare, a fine large chestnut, was thought more of than her half sister, that wondrous little mare, Harvest Queen, but receiving an injury was used for a brood mare. The last of the six was the brown colt owned by Mr. Arguilla of Santa Clara, a very speedy horse.

Since his first season in the stud, which alone makes him stand parallel with the most illustrious sires of America, he has shown such celebrities as Graves, 2:19; Empress, 2:24; Lou Whipple, 2:26½; Alameda Maid, 2:27½; Maggie C, 2:27½; Rustie, 2:30; Whipple, 2:34; Medora, 2:33½, in a fifth heat, when three years old; Mayboy, four years old, dam Harvest Queen, has made his mile over a private course in 2:31. Whipple's Hambletonian is the grandsire of Volunteer, 2:27; Honesty, 2:25½ (four years old) and Rowdy Boy.

Whipple's Hambletonian, though twenty-two years old, is still in a good hardy condition, and bids fair to equal the ripe old age of his illustrious grandsire, Rysdyk's Hambletonian, and who will say that he is a degenerated grandson of that famous horse?

SAN MATEO.

MARYSVILLE, Sept. 8, 1882.

EDITOR BREEDER AND SPORTSMAN, Dear Sir: Noticing an inquiry for information regarding Billy McCracken I append the following:

"Billy McCracken, black stallion, foaled 1850, died August 1871, owned by D. E. Knight, Marysville, Yuba county, Cal. by Morgan Black Hawk, son of Hill's Black Hawk—dam a messenger mare by Hambletonian horse." I am quoting the words of the stud bill. Billy McCracken is half brother to Young Flora Temple, Black Swan of Wisconsin, and Paul Jones of Oregon. Billy McCracken took first premium at State Fair of Wisconsin when five years old. Billy McCracken has trotted five miles in 14 m. and 10s., and challenged any stallion for a race of five or ten miles without any takers. He was bought by J. G. McCracken when four months old, kept a number of years by him and then sold to D. E. Knight, Marysville, Yuba county, Cal., who owned him sixteen years. The dam of Overman was afterwards bred by Mr. Mendenhall to Milton Medium (record 2:25½), son of Happy Medium. The dam of Susie Brown (2:42½), winner of *Spirit of Times* Stake at Sacramento, was by Billy McCracken, also dam of yearling trotter Chevalier, entered to trot at Sacramento. D. E. Knight has a yearling filly by Brigadier, dam by Billy McCracken, that trots quarters in 43 seconds and halves in 1:27. The McCrackens are a gamy up-headed tribe of horses, and will go the length of the road without whip or spur, remarkably docile and gentle in harness, with plenty of courage, a race of pleasant and cheerful drivers and the very acme of gentlemen's roadsters, I regard his fillies as the coming brood mares of this State as they seem to nick well to the stallions that have been bred to them. They put that race horse courage in their offspring which is such a valuable quality in the horse. Yours, etc.

FRANK GRANT.

TURF AND TRACK.

Fixed Events.

The San Joaquin Valley Association Fair at Stockton, from September 10th to the 23d inclusive.
Oregon State Fair at Salem, from September 18th and during the week.
The San Mateo and Santa Clara County Agricultural Association Fair at San Jose, September 25th to the 30th inclusive.
Humboldt and Mendocino District Fair at Rhonerville, September 19th to September 23d inclusive.
Modoc, Plumas and Lassen District Fair at Greenville, from October 2d to October 5th inclusive.
Monterey District Fair at Salinas City, from October 2d to October 6th inclusive.
Nevada State Fair at Reno, from Monday, October 2d to the 7th inclusive.
Mount Shasta Agricultural Association Fair at Yreka, October 4th, 5th, 6th and 7th.
Eastern Oregon Fine Stock Association at Union, from October 9th to the 11th inclusive.
Los Angeles Agricultural Association, at Los Angeles, from October 17th to 21st inclusive.

FAIRS AT THE EAST.

Pennsylvania State Fair, at Pittsburg, September 7th to the 21st inclusive.
Wisconsin State Fair, at Fond du Lac, September 11th to the 16th inclusive.
Ontario Provincial Fair, at Toronto, September 18th to the 23d inclusive.
Connecticut State Fair, at Meriden, September 18th to the 22d inclusive.
New Jersey State Fair, at Monroe, September 18th to the 22d inclusive.
West Virginia Central Fair, at Clarksburg, September 10th to the 21st inclusive.
Indiana State Fair, at Indianapolis, September 25th to the 30th inclusive.
Western Michigan Fair, at Grand Rapids, September 25th to the 30th inclusive.
Texas State Fair, at Austin, October 17th to the 21st inclusive.

ON INSTRUCTIONS TO JOCKEYS.—Captain Hayes in his book "Riding in the Flat and Across Country" makes some pertinent remarks on this important subject: "With a young hand instruction may be necessary, but if the jockey be a fairly good one, the riding should be left to his discretion. It is impossible to foresee all possible circumstances, and decisions must be taken on the spur of the moment. As for starting, he calls attention to the necessity for 'getting off' as quickly as possible—a matter in which, though it is obviously of paramount importance, some people would appear to be strangely indifferent. As he says: 'Whatever distance is lost at the start must be made up when the horses are galloping, at which time the effort to regain the lost lengths may very possibly be equivalent to throwing away an advantage of as many pounds.'

The St. Leger, the last great three-year-old sweepstake in England, comes off on the 13th inst., and is commencing to attract a good deal of attention. As things run, the two favorites are trained in the same stable and as the owners are averse to any trial, it is difficult to pick the winner. Lord Stamford's filly, Geheimness, the winner of the Oaks, and the Duke of Westminster's filly, Shotover, the winner of the Two Thousand Guineas and the Derby, are equal favorites at nine to four. These, with Quicklime and Sweetbread, are absolutely the only animals backed. The prestige of her Derby performance will probably cause Shotover to start the first favorite. There are half a dozen American horses in, but there is little chance of repeating our last year's victory with a second Iroquois.

When Edwin Thorne was taken back to his stall after his defeat of Clingstone at Utica a great crowd flocked around the victorious horse. "It makes a great difference," said Turner, "whether you win or lose. Heretofore we have had three men call upon us after a race, now we have three hundred."

G. W. Bowen & Co., Runnymede Farm, Paris, Ky., have sold to Messrs. Dwyer Bros. the bay colt Barnes, two years old, by Billet, out of Mercedes, Runnymede's dam, by Melbourne Jr., for \$12,000.

Milton Young, Henderson, Ky., has purchased from the Dyer Bros., Brooklyn, N. Y., the chestnut colt Onondaga, three years old, by Leamington, out of Susan Benn, Sensation's dam, for \$6,000. He is likely to prove very valuable at the stud.

Disreputable Turf Practices.

As the legitimate racing season of 1882 is fast drawing to a close, the officers of the different clubs should take some action to get rid of a certain betting class that has sprung into existence and increased in number within the last few years. There is a growing and menacing danger to the turf, arising from the actions and methods of this class of men, more especially to the Eastern associations.

In noticing the charges recently preferred by Mr. Kelly against Mr. Walton, better known as the Great American Plunger, few of the papers that discussed the matter laid any stress upon the methods Mr. Walton pursues to obtain the information upon which he bets large sums of money. No one seems to look at the demoralization certain to result to the turf by the use Mr. Walton makes of money in the way of presents to trainers and jockeys. If traced out in all its connections and bearings it will be found a questionable scheme by which he fills his purse at the expense of owners and the public. If his methods are legitimate and proper, why is it that he never applies to the owners of horses, the proper and only source from which information should be sought or obtained, but it is sought and obtained by nocturnal visits to trainers and jockeys? In the last few years Mr. Walton has taken from owners, bookmakers and the public a vast sum of money in America and England, agreeable with his own reports. How was this money obtained? For what purpose has he given large sums to trainers and jockeys? Legitimate and honest turf transactions require no such heavy disbursements of money to trainers and jockeys as he has made. There is more in it than meets the eye. There is something behind all this more than information; it smells strongly of corruption and bribery. It is no excuse to say that others also have used money for the same purpose. If this is so, it is no defense of the practice, and is a still stronger argument why the turf authorities should squelch it. If Mr. Walton is allowed or others are allowed to use money where it is most effective in eliciting information which is alone the property of the owner, what hope can there be to maintain the purity of the turf?

If this system of Mr. Walton and his followers is not arrested it must lead to a loss of public confidence. This loss of public confidence will end in decay and the disintegration of the turf. The doings of these vampires are already a stench in the nostrils of honest patrons of the turf, and it is high time that the clubs of the country take the matter in hand and rid our race courses of such characters. The laws are sufficient, and if not, frame one to meet the case. Every one who runs a horse or visits a race course agrees when he enters the grounds to abide by the laws governing the club, and in accepting or purchasing a ticket assents to be controlled by its rules as long as he remains on the grounds. This is a plain statement of what ought to be an accepted truth. It is the principle of every honest and correct individual or turfman. But a class have sprung up who boldly assert the right of going upon our race courses, and by the free use of money obtaining information the exclusive property of owners from their trainers and jockeys, and surprising to say there are plenty of persons to be found who admire and praise this sort of dishonesty, and call it shrewdness. What right has any person to take the property of another without giving an equivalent?

The safety and welfare of the turf dominates all the rights and privileges of such as Walton and his followers, and nothing is so shameful and dangerous to the rights of owners and our courses as the methods brought into practice by these plungers on one side and trainers and jockeys on the other. No one can deny that the turf suffers great injury and discredit by reason of Mr. Walton's course, and it is plain to be seen that it will suffer greater damage if he is permitted to pursue his present methods. The officers of our clubs must take a bold and manly stand for the maintenance of the purity of the turf. There is no middle ground or room for compromise between the purity of the turf and corruption. There is no room on the turf for Mr. Walton's system and that of his followers. He and they have brought and will continue to bring discredit upon honest sport, and they have no right to stay and practice what is detrimental to fair and legitimate racing.—*National Live Stock Journal*.

HOW CLINGSTONE'S SPEED WAS DEVELOPED.—Mr. C. F. Predmore had charge of Mr. Pond's stable, and developed Clingstone. When the horse was three years old Mr. Predmore thought he would feed of him. He trotted a half mile in 1:32, and the next week covered the distance in 1:27. He was out of condition at Meriden, and trotted against Magnol and Jewell, and was beaten. He was taken home, where he trotted a mile in 2:53, and a week after that went around the track in 2:46. He was given a rest, and then showed 2:42. Mr. Pond had seen none of these trials, but some days later went to the track for the purpose of holding his watch on him. He trotted in 2:42, and with a brief rest repeated in 3:39½. Late in the fall the three-year-old was given a trial with the stallion Thomas Jefferson for company, and he made his mile in 2:36½. He was not speeded again that year, but was jogged to sleigh during the winter. As a four-year-old his trials were 2:35, 2:31, 2:32, and a repeat in 2:26½. He had no engagements as a five-year-old, but late in the fall trotted a mile in 2:19. As a six-year-old he was given a trial previous to going to Fleetwood Park. The day was hot but the track was fast. The trials were 2:25, 2:24, 2:14 and 2:14½. The last quarter of the last mile was trotted in 31 seconds. Mr. Predmore says he always found the horse cheerful and ready to go, and he believes that he can beat 2:13.—*Turf, Field and Farm*.

The weights for the Cesarewitch and Cambridgeshire handicaps have been issued. The former at two miles, two furlongs and twenty-eight yards, will be run October 10, and the top weights are Mr. J. R. Keene's Foxhall, four years, and Mr. H. Bragg's Victor Emmanuel, five years, each 136 pounds; Mr. Pierre Lorillard's Iroquois, four years, 135 pounds; Duke of Hamilton's Fiddler, four years, 133 pounds, and Lord Ellesmere's Wallenstein, five years, 132 pounds. The Cambridgeshire, one mile and 240 yards, will be run October 24, for which Foxhall is weighted at 136 pounds, as also is Sir John D. Astley's six-year-old horse Peter. Iroquois has 132 pounds and Wallenstein 126 pounds.

ANOTHER PURCHASE BY VANDERBILT.—That fine young promising mare Early Rose has been purchased by W. H. Vanderbilt. During the late meeting at Buffalo, New York, Mr. Vanderbilt made a proposition to purchase the mare for \$16,000 provided she could show 2:18. A trial was made but the fastest that could be shown was 2:19. Subsequently Mr. Vanderbilt reduced his offer \$2,500, and it was accepted. Early Rose is a brown mare, by Almont, dam Jennie, by Flying Cloud. She began last season with a record of 2:36 and reduced it to 2:25½ and now she leaves the turf with a public record of 2:20½.

The Golden Gate Fair.

Another grand day was the unanimous verdict of all who attended the fair of the Golden Gate Association Friday, the 8th inst. The encomiums of the weather became somewhat moutinous, as a finer five days than from Monday until Friday night are rarely enjoyed. Those who went over on the 1 p. m. boat from the city were aware that the largest attendance of the week was assured. The boat was crowded, and nine-tenths of those on board sought the Berkeley train when the wharf was reached. The train was a long one, and it was not surprising that many who were accustomed to travel by that route thought they had made a mistake and got on the wrong cars. Large as the numbers were who came on that train the arrivals by carriages, wagons and horse cars from Oakland were still larger, and when the horses were called for the Consolation purse the assemblage was far greater than on any preceding days, more people, probably, than had been on any two of the previous days, and whether this was owing to the attractions of the 2:25 class, or the ladies' equestrianism, was a mooted question, only to be settled by the preferences of those who were called upon to arbitrate. It made little difference to the exchequer of the association what the motive was which induced people to attend, and certainly those who made a part of the throng were pleased that they had so much and so good company.

The track was in the same condition as it has been before, and there was also the same hearty concurrence in the decision of the judges. As will be disclosed by reading the description of the heats, the judges were in some doubt whether the distancing of Starr King was intentional or not, and the "in and out" work of the horses is certain to awake suspicion, whether merited or not. There were also adverse criticisms on the way that Dictator was driven in Santa Rosa and here, and, popular as his pilot is, it is sure that he will be a little more careful if he escapes ostracism. It is also certain that the day of "helpers" is nearly played out in California, and a few well deserved penalties will prove a cure for both of these evils. There is trouble for spectators to reconcile completely opposite doings, and though sickness, accidents or other causes may work wonderful changes, the opposites are usually laid to the drivers. Legitimate criticism is usually valuable, and now, at the outset of the circuit, it will behoove the knights of the whip and snaffle to be careful of their conduct. There is nothing more certain than that punishment will follow "proven" guilt and popularity or standing be of no avail if "led astray." It is scarcely necessary to add to the description of the heats. Reliance gave conclusive proof that his name is most clearly a misnomer. Winning in 2:22½ and then distanced the next heat some seconds less shows the nomenclature in his case is wrong, though Honesty indicated that his name was well chosen. Had Ashley kept out of his way he would have been nearer at the finish, and it might have been that in one of the games his nose might have been in front. The following is a description of the various heats: In the Consolation race the start was excellent, Nighthawk in front as they passed the stand, a position held to the finish, a savage application of whip and steel by the rider of Inauguration in the last quarter making no appreciable change. Time, mile and a quarter, 2:12; last mile 1:46½. Pools—Nighbaw \$115, Inauguration \$108, and at the start Nighthawk \$50, Inauguration \$20.

The ladies who were to compete for the prizes offered by the association for equestriennes came upon the course and exhibited their grace in the saddles and skill in the manege in a series of maneuvers on the stretch, during which time the judges took notes for the awards. Seven ladies appeared, most of them unfortunate in not having horses sufficiently educated to enable the riders to display their accomplishments to the best advantage, but the exhibition was very fine, and elicited the closest attention from the large audience and frequent applause as the fair contestants dashed past the stand. The decision was in favor of Miss Penniman of San Jose, as entitled to the first prize, Miss Ellis of San Francisco second, Miss Marchant of Alameda third, Miss Peters of Oakland fourth, Miss Long fifth, Mrs. A. E. Sessions sixth, and Miss Chisholm seventh.

The event of the day from the pool-box standpoint was called promptly, and the lottery for position placed Ashley at the pole, Del Sur second, Honesty third, Starr King fourth, Director fifth, Cairo sixth and Reliance outside. There was some tedious scoring for a start, Starr King and Del Sur being somewhat rank and indisposed. When they were sent away, in tolerable order, Reliance shot ahead and soon had the better of Ashley and Honesty, and was on even terms with the best of the field. At the turn Del Sur broke and fell back, Cairo following suit soon after. At the quarter (time 37½) Reliance was leading, Starr King pushing him close and Del Sur going third. Around the further turn Starr King closed with the leader, and there were frequent offers of money that he would win; but up the stretch, although he came fast and true, Reliance drew away and came to the score winner by a length, Starr King second, Director third, Cairo fourth, Honesty fifth, Ashley sixth and Del Sur last. The judges decided to penalize Cairo for running in the first quarter, and placed him seventh, thus changing the position of Honesty to fourth, Ashley to fifth and Del Sur to sixth; time, 2:22½.

Second Heat.—The Director party had backed their favorite heavily from the first and were more than pleased when Reliance won a heat and helped to bring up the field in the pools. The betting before the start for the second heat was, Director \$100, field 70. Director scored in the front rank when they came up for the word, and at the first turn, where Reliance and Starr King both made wild breaks, the favorite made his first appearance as a leader, going past the quarter in 36½ with a commanding lead, the others well bunched three lengths behind. In the straight work of the back stretch positions improved somewhat, but Director allowed nothing closer than on his wheel. Near the half Reliance and Starr King both broke again badly, and when the rest of the field rounded into the homestretch both the awkward ones were a distance behind. Honesty came forward in the trot home, but the son of Dictator was in his element, and reached the wire first by a length; Honesty second, Ashley third, Del Sur fourth, Cairo fifth, Starr King and Reliance distanced. Time—2:24½. The judges deliberated long before making the announcement the cause of the hesitation being an impression that Starr King had been handled in the heat with a purpose to get him behind the flag, but finally concluded to allow him to retire. Complaint was also made that Ashley had interfered with the speed of Honesty, and Mr. Kennedy was admonished to be more careful in the future.

Third Heat.—With the field reduced to five, a good start was soon effected, Director leading away at a spinning gait, but not at any time getting far from the field. The quarter was made in 36½, and the half in 1:12½. Both Honesty and Cairo were lapped on to Director, but not able to reach his collar. In the stretch the three had a lively set-to, but Cairo fell off before the distance was reached, and Honesty could do no more than score a good second; Cairo third,

Del Sur fourth and Ashley fifth. Time—2:24. Ashley crossed the line fourth, but was reduced to the last place for bad behavior.

Fourth Heat.—Further complaint of the conduct of Ashley's driver was made by the owner of Honesty, and in the interval the judges decided to remove the offending reinsman and appoint another in his stead. When the word was given the position was as good as could be desired, Director getting away handily with the lead after a few strides had been made. Honesty was close up at the quarter, and at the half Cairo and Del Sur both joined the company. Ashley was practically out of the race, and certainly interfered with no one more. In the stretch Honesty and Cairo repeated the performance of the previous heat with the same result; Director first, Honesty second, Cairo third, Del Sur fourth, Ashley fifth. Time—2:24½.

The Close of the Fair.

If universal commendation is a recompense for months of hard work, the president, directors and secretary of the Golden Gate Fair Association have been amply remunerated. The encomiums came from all sides, and even the "chronic kickers" were subdued after a feeble attempt to raise a muss upon one occasion, heartily joining in the plaudits when the futility of the attempt became evident. It is extremely rare that a week's trotting and racing is got through without some disagreeable attending circumstances, and though in the 2:25 class there was room for aspersions on the conduct of the drivers, that was the only race which had a show of crookedness. It is difficult at times to determine the right and wrong, and circumstances may naturally arise which look like proofs of wrong-doing. That the managers did everything in their power to overcome all objections is cheerfully conceded, and hereafter the elan of this meeting will aid them.

The weather of Saturday was superb; that of the whole week was so good that the most captious of critics could not find fault with it. The track has been kept in admirable order, and the time made in nearly all the races is proof that that the contestants were far above the average in their respective classes. Although there is little necessity for adding to the detailed accounts of the heats, the combination race between the one trotter and three pacers is worthy of comment. The winner, Corette, appears to be destined to take a prominent place in the pacing fraternity, and "Old Gib" displayed powers which his most ardent admirers did not credit him with possessing. Corette is a very handsome mare, and as these two races are the only ones in which she has participated, there is a strong probability that a little longer training will develop still more speed. She never made a break in any of the heats, and although Gibraltar did his best in the first heat, was relieved in the second by Weigle, and again essayed in the third, the young mare was too much for the combination. There was fast work all through. In the second heat, when Weigle made his endeavor, the quarter was reached in 33½ secs., and the half-mile in 1:08. The first quarter on the Oakland track has always been considered slow, and if Weigle had been able to keep up the pace, the mile would have been still faster.

The race throughout was very satisfactory, and the mixing of the "lateral" and "diagonal" movements a good idea.

In the roadster race there was a queer finale. Emperor had the race when a hundred yards from home, being several lengths in the lead at that point, but his amateur driver took a pull; and before he could get him in motion again the mare won. The time shows that it was a very creditable performance for roadsters. The following is the account of the heats:

The opening turf event was a special trot against time, for yearlings, for a purse of \$50. Five colts had been entered, but J. C. Simpson's Antevolo, by Electioneer, and P. J. Shafter's Viking, by Rustic, were the only two trotted. L. J. Rose had an unnamed entry, but the colt was quite lame, and the judges permitted him to be withdrawn. The purse was for the colt that made the best mile, three trials being allowed, if desired. Antevolo appeared first, and in his second trial scored his mile handily in 3:07, a highly creditable performance for a yearling without training and without shoes. Mr. Shafter's entry was also driven two trials, his best time being 3:16. The purse was awarded to Antevolo.

The last regular purse of the meeting was free for all trotters and pacers, and Corrette, Johnny Weigle and Lady Hays, pacers, and Gibraltar, trotter, came to the wire as claimants for the money, subject to the usual contingency of winning it before taking it. Gibraltar had the call in the pools at the opening, but the betting gradually changed in favor of Corrette, and before the start she was a decided favorite. Corrette drew the pole, with Gibraltar second, Lady Hays third, and Johnny Weigle outside. At the word Corrette and Gibraltar got away together, the other two dropping astern, Lady Hays last. At the quarter Gibraltar was still lapped on to the handsome little mare, with Weigle close up. Time—35½. Down to the half in 1:10 Corrette began to open a gap, and at the head of the homestretch had a certain lead. Down the stretch Gibraltar thundered at a tremendous pace, but Corrette skipped along without apparent effort, and crossed the line winner by two lengths; Gibraltar second, Weigle third, Lady Hays fourth. Time, 2:20.

Second heat—Corrette was not fixed in the estimation of the spectators, and \$40 for the mare to \$20 for the whole field against her was about the average of the pools. At the start Weigle made a bold brush for the front, and went around the turn like the wind, Corrette dropping in close behind him, and Gibraltar third. The pace was too hot for Lady Hays, and she broke badly before the quarter pole was reached. Weigle showing his head there in 33½, and continued his triumphant career to the half in 1:08, where Corrette and Gibraltar were close on to him. Around the turn and up the stretch Corrette paced past Weigle so smoothly that she scarcely seemed to touch the ground, and came to the wire a winner by three lengths; Weigle second, Gibraltar third, Lady Hays distanced. Time, 2:19.

Third heat—The start was unexceptionable, but early in the fight Gibraltar made a wild break, running to the front and barely escaping a disastrous collision with Corrette. He was pulled down reasonably soon, but not as quickly as some observers thought he should have been, but at the quarter in 36½ the little mare was again on even terms with him and began to show in front. Gibraltar struggled to keep in her company, and at the three-quarter mark in 1:46½ he was still on her wheel, but from there she drew away and won again by a safe margin; Gibraltar second, Weigle third. Time—2:21½.

The concluding piece was a race for a set of harness, open to roadsters driven to road wagons, the owners to drive. J. M. Learned's Allie Ray, W. S. Hewlett's Brownie H. and Mr. Sawyer's Emperor went for the prize, Allie and Emperor to carts and Brownie to wagon. There was some betting that Allie Ray would take the straps. At the start Brownie broke badly, and at the quarter pole Allie was leading, with Emperor second, but thence Brownie successively overtook and passed the others, winning the heat easily; Allie Ray

second, Emperor third. Time—2:41.

Second Heat—At the turn Emperor and Brownie both broke up, Emperor getting his feet first and going to the front, Brownie following closely, and leaving Mr. Learned in the tail of the procession. Brownie closed with Emperor at the half, and was in a fair way to repeat the story of the first heat, when a bad break sent Mr. Hewlett to the rear, and gave the heat to Emperor; Allie second, Brownie third. Time—2:42.

Third Heat—Allie began the breaking in this heat, Brownie doing a share, and Emperor going for business without a skip. Brownie got to the quarter first, but was unsteady and made frequent breaks, that gave Emperor all the opportunity the most anxious seeker after a new harness could desire. At the head of the stretch Emperor was far ahead, and was let down to a jog, but Brownie got level again, and crept past the leader, apparently unnoticed, and won the heat and prize, greatly to the surprise of Mr. Sawyer and the amusement of the spectators. Time—2:46.

Mrs. J. Raynor of San Francisco and J. W. Cuming of North Temescal had on exhibition three coups of chickens called the Langshan. These fowls are large, color black, average ten pounds in weight and are good egg producers.

The following is a complete list of the premiums awarded to exhibitors:

Horses.

Thoroughbred stallions, three years old and over, first premium to Thad Stephens, owned by R. P. Clement; second premium to Nathan Coomb, owned by Wm. Boots.

Thoroughbred stallions, one year old first premium to Sir Thad, owned by J. C. Simpson; second premium to Billy Foote, owned by W. A. J. Gift.

Thoroughbred stallions, under one year, premium to Cito, owned by J. C. Simpson.

Thoroughbred mares, three years old and up, first premium to Too Soon, owned by J. C. Simpson.

Thoroughbred mares, two years old, first to Miss Gift, owned by W. A. J. Gift; second to Lady Viva, owned by J. C. Simpson.

Thoroughbred mares, one year, first to Lagina, owned by R. P. Clement. The committee recommended a special diploma to Miss Stevens, owned by J. Leech.

Thoroughbred families, first to Thad Stephens and five colts, owned by R. P. Clement.

Families other than thoroughbred, first to General Grant and five colts, owned by Antonio Bellina.

Horses of all work, for stallions three years old and over, first to General Grant, owned by A. Bellina; second to Gold Hill, owned by R. O. Baldwin. For stallions two years old, first to May Boy, owned by A. Bellina; second to Black Prince, owned by P. J. Shafter. For stallions, one year old, first to Frank, owned by A. Bellina. Colt under one year, first to Little Prince, owned by Chisholm & Sackrider; second to "Butt Cutt," owned by A. Bellina.

Mares of all work, for three years and over, first to Brownie H., owned by H. Hewlett; second to Dollie, owned by A. Bellina. For one year and over, first to Abboteen, owned by Ben Harris. For filly under one year, to Lill, owned by Chisholm & Sackrider.

Roadsters, stallion, four years, first to Rustic, owned by P. J. Shafter; second to Odd Fellow, owned by W. K. Robinson. Stallion, three years, first to Belmont Chief, owned by J. F. Houghton; second to Anteco, owned by J. C. Simpson. Stallion, two years old, first to Echo Sr., owned by L. Newlett; second to Redwood, owned by George Copsey. Yearlings, first to Sydney, second to Judge S., both owned by J. Goldsmith. Sucking colt, first to Tom Moore, owned by W. D. Hammond; second to Royal Bow, owned by A. Bellina.

Mares or geldings, four years—First, unknown, owned by Mark Rollins. Three years old—first to Patriarch, owned by W. K. Robinson; second Lady Lightfoot, owned by W. D. Hammond; two years old, to No Name, owned by J. L. Rose; one year old, to Rose Abbot, owned by B. E. Harris.

Matched span, first to Jack and John, owned by Newland & Pymyca; second to Prince and Bill, owned by S. W. Sawyer.

Draught horses, stallions, three years old, first to Tornado, owned by W. S. Brown; second, to French Spy, owned by Chisholm and Sackrider; two years old, to Penola Chief, owned by F. Toleman; one year old, to Deceda, owned by Chisholm & Sackrider; under one year, to French Spy Jr., same owners.

Mares, one year old, first to Gertrude, owned by W. S. Brown; second to Lizzie, owned by Chisholm and Sackrider; under one year, to Puss, same owner.

Carriage horses, first premium to Jack and George, owned by Mrs. R. Duffy.

Saddle horses, first premium to Mike Price, second to Major, both owned by Ben Harris.

Sweepstake stallions, any breed, first to Anteco, owned by J. C. Simpson; second to Odd Fellow, owned by W. K. Robinson.

Sweepstake Maros, First to Lady Viva, owned by J. C. Simpson.

Jacks, first to John Henry, owned by W. A. Memyan.

Durham Cattle.

Bulls, three years and over, first to Second Duke of Alameda, owned by Coleman Younger; second to El Melico, owned by Paige Bros. Two years old, first to Cherry Prince, second to Lord Clover, both owned by Paige Bros. One year old, first to Forest King, second to Fourth Duke of Forest Home, Coleman Younger. Bull calf under one year, first to Eighth Duke of Forest Home, Coleman Younger; second premium to Roscoe, same owner.

Cows, three years old, first to Jessie Maynard, second to Red Dolly Second, Coleman Younger. Two years old, first to Oxford Rose, Coleman Younger; second to Bolle of Sonora, Paige Bros; one year, first to Belle Medico, Paige Bros.; heifer calf, under one year, to Red Dolly Fourteenth, Coleman Younger.

Ayrshire Cattle.

Bulls, three years old, to Archie, George Bennett; two years old, Lindo, same owner; calf, to Malcolm, same owner.

Cows, three years old, first to Stelita, G. Bennett; second, to Ethel Brown, same owner; two years old, to Stellanita, same owner; one year old, to Sultana, same owner; heifer calf, to Sybil, same owner.

Sweepstakes—Durhams.

Bulls, first premium to Second Duke of Alameda; second to Third Duke of Alameda, Coleman Younger.

Cows, first to Jessie Maynard; second to Red Dolly Second, Coleman Younger.

Sweepstakes—Ayrshires, Jerseys or Alderneys.

Bulls, first premium to Archie (Ayrshire, owned by G. Bennett; second to Champion of Guernsey, Henry Pierce.

Cows, first premium to Rumor Second, (Jersey), Henry Pierce; second to Lane, (Ayrshire), owned by G. Bennett.

Herd - Durhams.

Over two years old, one male and two females; First, to Second Duke of Alameda, with cows, Rose of Forest Home, Red Dolly Second, Jessie Maynard, Red Dolly Fifth, Coleman Younger.

Under one year, one male and five females; bull, Third Duke of Alameda; cows, Red Dolly Ninth, Red Dolly Eleventh, Laurene Fifth, Rose of Forest Home Fourth, Rose of Forest Home Ninth, Coleman Younger.

Herd - Jerseys and Alderneys.

Over two years, one male and four females, bull, Victor of Yerba Buena; cows, Bloomer Second, Oakland Maid, Mon Plaisir, Fairy of Yerba Buena, Henry Pierce.

Under two years, bull, William Scituate; cows, Eva Third of Yerba Buena, Coquette of Yerba Buena, Carrie of Yerba Buena, Flora Third of Yerba Buena, Henry Pierce.

Herd - Guernseys.

One male and four females, bull, Champion; cows, Lizzie, Lassie, Lillie, Daisy, Henry Pierce.

Best Jersey, Alderney or Guernsey in Class.

Bulls, three years and over, first to Victor, Yerba Buena, second, to Champion of Guernsey, Henry Pierce. Two years old, first premium to James Hayward, A. J. Snyder; second, to Modoc, Jessie Wall. One year old, first to William Scituate; second to Electric, Yerba Buena, Henry Pierce. Under one year, first to Shotover, Henry Pierce.

Cows 3 years and over, first to Bloomer Second; second to Fairy of Yerba Buena, Henry Pierce. Two-year-olds, first to Nancy, Mrs. R. P. Clement. One year old, first to Carrie of Yerba Buena; second to Eva Third of Yerba Buena. Best calf, first to Coomassie, Yerba Buena, second to Delta of Yerba Buena. Henry Pierce.

Graded Cattle.

Best cow, three years and over, first to Betty, F. Rosenstock. Two years old, first to Minnie, F. Rosenstock.

Sheep.

Spanish Merino, ram, two years and over, to Sprightly, J. H. Trowbridge. One year old, first to Comet; second to Lightly; same owner. Pen of five ewes, two years and over, No. 2, J. H. Trowbridge. Pen of five ewes, one year and under two, same owner. Pen of five ewelambs, same owner. Pen of one ram and five lambs, same owner.

Cotswold, first to ram Hancock, Coleman Younger. Southdown, Premium to ram "No Name," G. Bement; pen of five ewes, Coleman Younger.

Hogs.

Essex and Berkshire, best boar, first premium; best sow, first premium, owned by C. L. Dietz.

Poultry.

Light Brahmas, first premium to E. Woolfeden. Dark Brahmas, first premium to same owner.

Partridge Cochins, to W. Hubbard. Buff Cochins, to E. Woolfeden; Plymouth Rocks, to J. N. Lund; brown Leghorns, to same owner; golden-spangled Polish, to A. J. Jackson, black-breasted game, to C. L. Dietz; blue game, to W. H. Hubbard, black breasted game bantams, to J. N. Lund; black African bantam, to C. L. Dietz; white pile game bantam, to C. L. Dietz.

Langshan, special premium for new breed, to Mrs. J. Raynor.

White-faced Black Spanish, to J. W. Cummings. Pekin Duck, to C. L. Dietz.

For the largest collection of poultry, to J. N. Lund. Pigeons, Jacobins, special premium to J. N. Lund; Carriers, premium to C. L. Dietz; Flying Ponters, to same owner.

Summaries.**RACING.**

GOLDEN GATE FAIR, OAKLAND TROTTING PARK, Sept. 4, 1882.—Golden Gate stake.—For all two-year-olds; three-quarter mile dash; \$50 entrance; \$15 forfeit; \$150 added; second colt to save stake; winners 5 pounds extra.

P. Robson's May B, by Shannon, 112½ lbs. 1
Leland Stanford's ch f Satalia, by Lever—Frou-Frou by Asteroid, 112½ lbs. 2
Peter Coutts' blk f Mon-Flon, by Monday—Jennie C, 107½ lbs. 3
Leland Stanford's ch f Satalia, by Wildidle—Rose by Chatham, paid forfeit.
Peter Coutts' Panama, by Shannon—Abbie W., paid forfeit.
Time—1:17.

Same Day.—Alameda stake for three-year-olds; one and one-half mile dash; \$75 entrance; \$25 forfeit; \$175 added; second to save stake.
Geo. Hearst's b h Duke of Monday, by Monday—Demirep, 118½ lbs. 1
Leland Stanford's b f Precious, by Lever—Frolic, 115½ lbs. 2
Leland Stanford's ch f Fostress, by Foster—Planeta by Planet, paid forfeit.
Peter Coutts' b c Forest King, by Monday—Abbie W., paid forfeit.
George Hearst's ch f Marie F., by Leinster—Flush, paid forfeit.
Time—2:41½.

Same Day.—Pardee stake.—Free for all; one mile and repeat; \$75 entrance; \$25 forfeit; \$200 added, second to save stake.
J. T. Gilmer's h h Red Boy, by War Dance—Nelson, 118½ lbs. 1
P. J. Shafter's b m Night Hawk, by imp. Haddington—Norfolk, 115½ lbs. 2
Leland Stanford's b f Precious, by Lever—Frolic by Thunder, paid forfeit.
Leland Stanford's ch f Fostress, by Foster—Planeta by Planet, paid forfeit.
Henry Schwartz's Sister to Lottery, by Monday—Virginia, paid forfeit.
Stemler & Ayers' ch g Fred Collier, by Joe Norfolk—Puss by Norfolk, paid forfeit.
Time—1:42½, 1:45½.

Sept. 6.—Free for all; two mile dash; \$100 entrance; \$25 forfeit; \$250 added; second to save stake.
Leland Stanford's b f Precious, by Lever—Frolic by Thunder, 118½ lbs. 1
Wm. Boots' b m Mollie H., by Wildidle—Mamie Hall by Norfolk, 118½ lbs. 2
P. J. Shafter's b m Night Hawk, by imp. Haddington, dam by Norfolk, paid forfeit.
J. T. Gilmer's h h Red Boy, by War Dance—Nelson, paid forfeit.
Stemler & Ayers' ch g Fred Collier, by Joe Norfolk—Puss by Norfolk, paid forfeit.
Time—3:36.

Sept. 7.—Selling Race.—Purse \$250; \$175 to first, \$75 to second; one mile.
J. T. Gilmer's ch c Enchre, by Leinster—Flush, \$500, 108½ lbs. 1
Wm. Boots' ch c Inauguration, by Wildidle—Miami by Belmont, \$1,000, 108½ lbs. 2
P. J. Shafter's blk m Night Hawk, by imp. Haddington—dam by Norfolk, \$800, 114½ lbs. 3
H. Schwartz's Sister to Lottery, by Monday—Virginia, drawn
Stemler & Ayers' b g Joe Howell, by imp. Bonnie Scotland—Eva Shepherd, drawn
Time—1:43½.

Sept. 8.—Consolation Purse.—\$250 for beaten horses; \$175 to first; \$75 to second; dash of one mile and a quarter.
P. J. Shafter's b m Night Hawk, by imp. Haddington, dam by Norfolk, 115½ lbs. 1
Wm. Boots' ch c Inauguration, by Wildidle—Miami by Belmont, 108½ lbs. 2
Time—2:12.

TROTTING AND PACING.

Sept. 4.—2:40 Class; purse, \$600; \$360 to first; \$180 to second; \$60 to third horse; mile heats 3 in 5.
Peter Coutts' b f Manon, by Nutwood, 114½ lbs. 1
Lons Duncan's b g Louie D., by Speculation, 114½ lbs. 2
W. Z. Price's b m San Mateo Belle, by Speculation, 114½ lbs. 3
F. Miller's b m Marin, by Geo. M. Patchen Jr., 114½ lbs. 4
W. H. Henderson's b m Big Liza, 114½ lbs. 5
A. B. Cooper's ch g Frank Moscow, by Frank Moscow, 114½ lbs. 6
P. Farrell's h b Vanderlynn by Geo. M. Patchen, 114½ lbs. 7

no. McIntyre's ch g Edwin Forrest by Blackbird, 8 4 6 dr
J. W. Trues' b s Exile by Echo, 4 dis
Jas. Garland's gr g Rowdy Boy by Rustic, withdrawn
G. Bernard's gr g Allen Roy, 1 1 2 2 dis
Time—2:26, 2:27, 2:27½, 2:28.

Sept. 5.—2:30 class, purse \$800, \$480 to first, \$240 to second, \$80 to third horse, mile heats, three in five:
A. Waldstein's b s Albert W., by Electioneer, 3 3 3 1 2 1 1
S. Sperry's ch m Nellie R., by Geo. McClellan, 2 2 1 3 1 2 2
J. A. Goldsmith's b m Sweetness, by Volunteer, 1 1 2 2 dis
W. D. Hammond's gr Poscora Hayward, by Billy Hayward, dis
S. Crandall's b m Blanche, by Gray McClellan, withdrawn
Time—2:22, 2:24½, 2:25½, 2:26½, 2:26½, 2:26½.

Same day.—Pacing, free for all, purse \$500, \$300 to first, \$150 to second, \$50 to third horse (Washington and Johnny Wiegles to Wagon):
L. E. Yates' b m Corette, by Winthrop, 1 1 1
G. Valensin's b m Onida, by Black Hawk, 2 3 3
E. S. Denison's ch m Lady Hays, by Hiram Tracy, 3 8 2
A. L. Hinds' ch s Oakland Boy, by Winthrop, dis
Time—2:23½, 2:22½, 2:24.

Sept. 6.—Trotting for all three-year-olds, purse \$600, \$360 to first, \$180 to second, \$60 to third horse, mile heats, three in five:
J. M. Learned's Adrian, by Reliance, 1 1 1
H. Meek's b f Bonnie Wood, by Nutwood, 2 2 2
Irving Ayres' blk g Fred Arnold, by Nephew, 3 3 3
A. C. Dietz' ch f Olivette, by Whipple's Hambleton, dis
J. C. Simpson's b c Antee, by Electioneer, dwn
J. B. Wymann's b c Commodore by Conductor, dwn
Babb's b f by Admiral, dwn
Time—2:41½, 2:37½, 2:38½.

Same Day.—Trotting, 2:22 class, purse \$800, \$480 to first, \$240 to second, \$80 to third horse, mile heats, three in five:
J. B. Macdonald's b s Brigadier, by Happy Medium, 1 2 1 1
L. H. Tims' h m Belle Echo, by Echo, 2 1 2 2
J. A. Goldsmith's gr s Romero, by A. W. Richmond, drawn
Time—2:27, 2:23½, 2:24, 2:24½.

Sept. 7.—Trotting for two-year-olds. Purse \$400, \$168 to first, \$67 20 to second, \$44 80 to third horse, mile heats, two in three:
S. Rosner's J. W. Mackay's b f Ruby by Sultan, 2 1 1
L. J. Rose's b f Neliska, by Sultan, 1 2 2
Time—2:34½, 2:34½, 2:40.

Same day.—Trotting, Special purse of \$600, \$265 to first, \$130 to second, \$85 to third, \$60 to fourth horse, mile heats, three in five:
P. Farrell's b h Vanderlynn, by Geo. M. Patchen, 1 2 1
Jas. Garland's gr g Rowdy Boy, by Rustic, 4 2 1 3
A. B. Cooper's ch g Frank Moscow, by Moscow, 3 3 2
S. Crandall's b s Marin, by Geo. M. Patchen Jr., 2 4 4 4
Time—2:30, 2:27½, 2:30½, 2:28½.

Sept. 8.—Trotting, 2:25 class. Purse \$800, \$480 to first, \$240 to second, \$80 to third horse, mile heats, three in five:

Time—3:16.
Geo. Bayless' ch f Dawn, by Nutwood, withdrawn
J. A. McLeod's b c Mt. Vernon, by Nutwood, ..
J. J. Rose's ch by Sultan, ..

Chico Fair.

Chico, Sept. 7, 1882.

MR. EDITOR: There was a large increase in the attendance at the park to-day. The first on the programme was ladies' tournament and prizes were awarded in the order named: Miss Lena Homer first, \$30, Mrs. Frefoy second, \$20, Miss Nellie McCormack third, \$15, Miss Annie Clark fourth, \$10. Misses twelve years and under: Miss Nellie Sherman first, Lizzie Decker second, Miss Winnie Williams third, Matilda Gorre fourth, Miss Eva Clark fifth. The ladies and misses presented a very fine appearance and did some very fine feats of horsemanship.

The first race on the cards for the third day was the Chico Hotel Stakes, one and one-half mile dash, free for all three-year-olds, entrance \$40, \$25 forfeit, \$300 added, second horse to save stake. Closed with following entries: Geo. Hearst names ch f Maria F., by Leinster, Flush—A. Miller, names bg Lady Partisan by Partisan, Jewell, J. Q. Anderson names g f Minnie Bell by Joe Daniels, by Norfolk; 115 pounds on each. Betting 6 to 2 on Maria F., and the result sustained the judgment of those betting the odds, as she won, Minnie Bell second, Partisan third. Time—quarter mile 32s., one-half 59, three-fourth 1:28, one 1:55, one and one-fourth 2:22½, one and one-half 2:48½.

Same day, second race, running, one mile and repeat, best 2 in 3. Closed with following entries: Ab Ellis names Suiner by Norfolk, by Lodi, 111 pounds. W. Hunter names bg Fred Hunter by Norfolk, by Kidman, 111 pounds. Thos. Hazlet names ch g Jubilee by Norfolk, by Lodi, four years, 105 pounds.

Pools on this heat, Shiner \$10, Jubilee \$4, Hunter \$2 and \$3. Jubilee jumped off in the lead and led to the quarter pole in 27s., half in 53s., three-fourths 21s., mile 1:46½, Shiner second, Hunter distanced. Second heat, Shiner jumped off two lengths in the lead; as they entered the back stretch, Jubilee lapped him and they ran head and head until half way round far turn, where from some cause the chestnut was seen to toss his head in the air twice and commence to lose ground, Shiner winning the heat by one length, and now came a howl from the backers of Jubilee that he was being pulled. When they came out for the third heat the rider of Maria F. was placed on Jubilee and Johnny Branan on Shiner. They made three false starts, when they got the word with Shiner a length the worst of it; he lapped him on the back stretch but was beaten by a length. Now I would like to know what benefit there is derived by simply dismounting a jockey for fraud as plain as this case was without attaching some punishment to the dismount.

SUMMARY.

Thomas Haslet names ch g Jubilee, 4 yrs, 105 lbs. 1 2 1
Ab Ellis names bg Suiner, aged, 111 lbs. 2 1 2
W. Hunter names bg Fred Hunter, aged 111 lbs. Dist.

Same day, trotting race for three-year-olds to harness. The following horses started and were allotted positions in order named: Zulu Chief, Telegraph, Katy Almont. Telegraph was favorite over both the others, \$10 to \$6. After four ineffectual attempts they got the word to a very even start; the filly outfooted both around the turn in 41s. and came home a length better than Telegraph, he four in front of Zulu Chief.

The second heat they were sent away after four attempts, Telegraph in the lead, and was never headed. The race was postponed until next day, 1:30 p. m. sharp. A little larger crowd than yesterday, fully one thousand persons being present, the quarter stretch rails having teams hitched as thick as they could stand, a large proportion of spectators being ladies, and their handsome toilets lent an additional attraction to the scene.

SUMMARY.

E. Downer enters bg Telegraph by Tilton Almont, 2 1 1 1

Billips enters blk f Katy Almont by Tilton Almont, 1 2 2 2
J. L. Sullivan enters bg Zulu Chief by Tilton Almont, 3 3 Dist.
Time—2:34, 2:38, 2:48, 2:54½.

Fourth day, running, mile and repeat, best 2 in 3, free for all, purse \$400, entries close at Sept. 5th, 8 p. m., first horse to get six-tenths, second three-tenths, third one-tenth. Entries, Joe Howell by Bonnie Scotland, by imp. Sovereign, aged, 115 pounds. Maria F. by Leinster—Flush, 3 years, 105 pounds. Howell had the pole; time, first heat by quarters, first quarter 27½, one-half 53½, three-fourths, 1:20. Time—1:46½. Second heat, first quarter 29, one-half 54½, three-fourths, 1:21. Time—1:46½.

Official timers, J. T. McIntosh, Chico, Fred Shafer Esq., Wm. Harky, Marysville. Same day, agreed trotting race, closed with the following entries, and were allotted positions in order named, Dutchman (rec 2:30½), Bones, Roanoke, blk s Challenge.

SUMMARY.

Chas. Sherman enters Roanoke, 1 2 2 2
J. T. McIntosh enters Dutchman, 2 1 1 1
Jas. Sullivan enters Bones, 3 3 3 3
Challenge, 4 4 Dist.
Time—2:45½, 2:49, 2:40½, 2:42½.

Fifth and last day. The attendance was as large as any previous day. The first race on the cards was a pacing race. C. D. Coward names bg Roden, Nelson McDonald names ro g Buz., Chas Salutus names blk g Prince.

SUMMARY.

Roden, 1 1 1
Buz., 2 2 2
Prince, 3 3 3 Dist.
Time—2:48½, 2:48½, 2:47½.

Same day.—Agreed trotting race, 3 in 5 to harness, owners to drive, Z. W. Barnham names bg Dutchman, 1 2 1 1
Chas Sherman names bg Roanoke, 2 1 2 3
Time—2:44, 2:58½, 1:46½, 2:37½.

The running race for mules did not fill. I take this opportunity of returning thanks to the officers of the association for many favors granted.

The show of horses and cattle beats any fair ever held here. Every stall was occupied and some had to stable their horses in sheep-pens.

Premiums were awarded as follows:

Horses.

Thoroughbred stallions, W. L. Sullivan, Sacramento, Jim Brown.

Thoroughbred mares, J. Q. Anderson, Stockton, Minnie Bell; A. J. Stenler, Sacramento, Lady Partisan.

Graded stallions, J. J. Reeves, Blackbird, 3 years; same, William B, 2 years; James Hasty, Chief, 1 year.

Graded Mares, Ben True, Nellie, 3 years and over; David Snyder, Lucy Tolman; J. J. Reeves, Belle Howard, 2 years; J. T. McIntosh, Sallie M., 1 year; J. J. Reeves, Lady Hilda Second, 1 year.

Stallions, T. Garrett, Chief, 3 years; John Grabley, Sir Tom; Alfred Cross, Cub, 2 years.

Mares, J. J. Reeves, Lancet, 3 years; Alfred Cross, Beckey Second; David Snyder, Nellie, 2 years.

J. C. Hess, Willows, Napoleon, 3 years; J. W. Hedge, Oroville, Black Tom, 2 years.

Roadsters, Chas. Sherman, Carlisle, 4 years; Shorty, Roanoke, 2 years.

Gelding roadsters, Carnell, Colusa, Telegraph.

Two years old, L. H. McIntosh, Colusa, Prince; L. D. Jenkin, Olimps, Rockwell.

Roadster stallion, J. T. McIntosh, Singleton, 3 years.

Roadster mares, James Hasty, Blue Bell, 3 years; D. M. Hooper, Rodie Ann, 3 years; Chas. Sherman, Belle Kimball, 2 years; J. T. McIntosh, Exact Second, 2 years.

Carriage horses, Allen Henry, Don and Joe.

Best single carriage horse, W. A. Titrean, Polly.

Roadster team, A. Bullard, Dave and Heitsick; Herman Bay, Cloud and Nig.

Saddle horse, Burke, Johnnie.

Colts, Jas. Hasty, Chico, yearling; J. W. Fritters, Orphan Boy, second best.

Sucking colts, J. T. McIntosh, Signate; Ben True, Ben T, second best.

Yearling mare colts, J. T. McIntosh, Sallie M; Chas. Sherman, Chevalier.

Sucking mare colts, J. J. Reeves, Chico Maid; J. T. McIntosh, Solitaire.

Sweepstakes, stallion, J. J. Reeves, Blackbird.

Mare, J. T. McIntosh, Exact.

Jacks and Mules.

A. B. Collins, Prince, 2 years; J. J. Reeves, Humbolt, 2 years; A. B. Collins, Jack, 1 year.

Cattle - Durhams.

Bulls, J. J. Reeves, Twilight, 3 years; M. Wicks, Oroville, Major Butler Second, 3 years; J. J. Reeves, Henry Clay, 1 year; M. Wicks, Oroville, Louan, 1 year; M. Wicks, Oroville, Dexter, bull calf; J. J. Reeves, Stonewall, second best.

Cows, M. Wicks, Oroville, Frantic Louan, 3 years; J. J. Reeves, Sallie Short, 3 years; J. J. Reeves, Queen Victoria, 2 years; M. Wick, Oroville, Frantic 24th, 2 years old; J. J. Reeves, Beauty; M. Wicks, Oroville, Matilda, heifer calf; J. J. Reeves, best herd.

Devons.

Bulls, R. McEncsy, Ben Butler.

Cows, R. McEncsy, May Flower, 3 years; same, Queen Second, 3 years; same, Maud, 2 years; same, Spy, 1 year; same, Calf, Trixy.

Jerseys.

Bull, A. B. Collins, Hawkins.

Cows, Geo. F. Hawkins, Roxana, 3 years; Geo. F. Hawkins, Dutchie, 3 years; A. B. Collins, Maud, 2 years; A. B. Collins, Blackey, 2 years; Geo. F. Hawkins, Bessie, 1 year.

Graded (Jerseys.)

A. B. Collins, Nellie, 3 years old; A. B. Collins, Bridget Second, 3 years.

Swine.

Best China boar, M. Wicks, Oroville, Gabriell.

Best China sow, M. Wicks, Oroville, Betty.

Finest and fattest hog, J. W. Padon, Silrina.

Best five pigs under six months, Chas. Sherman.

Goats.

M. Wicks, Oroville, Jack; same, Jarad; same, Lizzie; same, Jennie; same, four kids.

Poultry.

A. B. Collins, best five varieties; same, light Brahmas; same, trio black Cochins; same, best Game cock; Matilda J. Clark, Nelson, trio Selkies; same, Buff Cochins; same, white Cochins; same, Brahma cock under 1 year; Charley Henry, Nelson; China geese; B. F. Allen, Pekin ducks; Willie Reed, Nelson, Bronze turkey; Wm. Cleveland, Nelson, turkey gobbler.

Machinery.

M. L. Mery, Farm and Feed Mill; J. M. Ormsby, Sewing Machines; Hubbard & Earle, Display Harvesting Tools; Hubbard & Earle, Best Well Pump; Hubbard & Earle, Best Gang Plow.

The State Fair.

Never before in the history of the California State Agricultural Society was there a more auspicious opening. From the first there has been a good attendance, increasing as the week wore away, and the machinery running as smoothly as could be desired. The stock exhibition has been very fine, all the departments well filled, and when the conclusion comes it is safe to assert that the returns will show to the satisfaction of every one interested. The racing and trotting have been first class and with scarcely an exception every purse a contest to the end of the last heat.

The Races.

There could scarcely be a finer day for the races than the afternoon of Monday. There was no great degree of warmth, and yet there was caloric enough in the atmosphere to ensure the "sweating out" of the horses. There was a fine attendance for the opening day and a good deal of speculation. The first on the list was a dash of three-quarters of a mile, the entries and conditions will be found in the summary. In the pool-selling before the start Premium and Jim Renwick alternated as favorites, the rate being, \$50 on each of them, \$20 on Atlanta and \$40 on the others grouped in "the field." At the starting point it was difficult to tell the different horses unless by those who were posted about the "colors," though there was only a short delay at the post—one false start—when the flag fell to a very good send-off excepting that Bob and Premium were slow in getting under motion. The leading horses for a time were Atlanta, Jim Renwick and Jim Douglas, and it looked as if the race was going to be confined to a struggle between the trio, but "it and mare" came along with a rush, Ella Doane also improved her position, and though Jim Douglas essayed to get to the front it was not his day, Premium winning by an open length from Ella, Jim a fair third. The following is the

SUMMARY.

AGRICULTURAL PARK COURSE, SACRAMENTO, September 11.—Running, introduction stake for all ages; three-quarters of a mile dash; \$50 entrance, \$15 forfeit, \$200 added, second to save stake.

Time—1:16.

The second race was the Breeders' stake for three-year-olds, a dash of a mile and a half, that closed with nineteen entries at \$50 entrance, play or pay, with \$300 added money. Of these the only starters were John Windover's Captain Kidd, George Hearst's Maria F and Duke of Monday, and the Palo Alto filly Precious. Mr. Hearst's pair were favorites in the pools, selling for \$100 against \$75 for Precious and \$10 for Captain Kidd. The horses were promptly dispatched at the first trial, Maria F. starting off in the lead to make the pace hot for Precious, while the Duke was evidently biding his time. As they passed the wire for the first time Maria was leading by a length, with Captain Kidd third, and the Duke making up his lost ground rather too quickly it seemed for the length of distance he had to travel. At the half-mile it was apparent that Maria F. and Captain Kidd had to succumb, for they resigned the lead to the Duke and Precious, who began a desperate brush that lasted to the draggate, when the Duke, under the whip, swerved from the outside towards the inside rail, and the result was then never doubtful, as, although Duffy rallied the Duke, he was beaten by Precious in 2:38, Captain Kidd being a poor third and Maria F. last.

SUMMARY.

Same day.—Running, Breeder's stake, for foals of 1879, one and a half mile dash; \$50 entrance, p. p., \$300 added. Closed March 1st with nineteen nominations.

Time—2:38.

The third race was for a selling purse of \$300, heats of a mile for all ages, and there were nine entries, five of which came to the post. These were Joe Howell, Euchre, Inauguration, Patrol and Vila Randlett. Joe Howell was largely the favorite in the pools, selling for \$100, Euchre bringing \$50, \$15 for the three others combined. Under the conditions Joe Howell had six pounds from the old schedule of weights under which the State Fair races were run. Inauguration and Patrol had their weight up, Vila Randlett five pounds off.

Owing to the refractoriness of Vila Randlett there was some trouble in getting them off, and when the flag fell she had a trifle the best of the start. Patrol soon joined her, and around the further turn all were in a bunch. It was a pretty race home, but at the draggate "Old Joe" came away and won with apparently something in hand in 1:44. Euchre was second, Inauguration third, Vila Randlett fourth and Patrol last.

The pool selling was at an end. The few sold showed Joe Howell such a favorite as to bring \$40 for \$2 on all the others. The heat showed that the estimate of the old veteran was none too high, for although Inauguration led at the quarter and a half, proving himself a good colt, Joe was first in the stretch and first under the wire. The positions will be found in the

SUMMARY.

Same day.—Running; selling race, purse \$250, free for all, one mile and repeat, second horse to receive \$75, entrance five per cent. to third horse. Horses entered to be sold for \$1,500 to carry entitled weight, one pound off for each \$100 under fixed valuation.

Time—1:44, 1:44.

The next race was the 2:40 trotting class, and of the eleven entries, six came to the front, viz: Louis D, Manon, Vanderlynn, Rowdy Boy, Marin and Big Lize. Manon was largely the favorite in the pools before the start, bringing \$68 to \$11 for Vanderlynn and \$12 for all the others. This was long odds for a five-year-old filly, at the outset of her

career, and though the form she showed at Oakland appeared to justify the high estimate the result proved that there was misfortune to mar the scheme.

The first heat there was a good deal of scoring. The starting judge had to impose several fines, in one instance five of the six drivers being mulcted. The eighth score brought them near enough together to tap the bell, Big Lize slightly in the lead, but at the half mile pole Manon was first with Rowdy Boy on her wheel. The gray obtained the advantage and was first at the three-quarter pole when he was passed by Manon, who won the heat in 2:25. The placing of the others will be found in the summary appended.

The second heat was startling to the backers of the favorite. Manon led at the start but broke before rounding the turn, losing ground. At the half mile the field was strung out with Rowdy Boy in the lead though at the three-quarters Manon came up apparently the winner of the heat, but the judges penalized her for a run on the back-stretch and gave the heat to Louis D, Big Lize placed second. Time, 2:24.

The third heat Louis D took the lead with Rowdy Boy second at the half mile. Rounding the further turn there was a change of places, a general mixing, which made it almost impossible to say what the positions were at this point, and the contest down the stretch was remarkably good. Louis D amazed the spectators by coming to the score first with Vanderlynn second and the others as given in the summary. Time, 2:24.

The fourth and last heat was trotted when it was growing dusk, and patrols were appointed. Louis D. and Vanderlynn had a fight for precedence and before the quarter was reached Van's nose showed in front. At the half mile Louis D. had much the best of it, a straggling field behind him. There was a closing up when the straight work was reached but not enough to jeopardize the chances of Louis D., who won in 2:25 with Big Lize second. This gave huge Elizabeth the third money, Manon having made the second prize score in the first heat.

SUMMARY.

Time—2:25, 2:24, 2:24, 2:25.

There was an increased attendance at the track on Tuesday afternoon, the second day of the fair, and everything went along smoothly. The president insisted that the drivers should wear distinctive colors, and though there were a few recalcitrants all had to comply, and the consequence was that the races were far more satisfactory to the public and enabled the reporters to follow the horses with more accuracy. This was a wise measure which should be followed by the other fairs.

The first race called was the 2:25 class for a purse of \$1,200, and of the nine entries only Ashley was withdrawn.

Director, owing to the Oakland showing, was made first choice at \$100 against \$15 for Starr King, \$12 for Crown Point and \$25 for the field, composed of Capt. Smith, Honesty, Del Sur and Reliance, the latter proving himself excessively unreliable by getting distanced in the first heat. After ten false starts, they were sent off well together and Starr King, driven in an able and determined manner by Tim Kennedy, made for the lead and broke at the first turn and they almost all followed suit so that Goldsmith was balked in his efforts to get through the scampering steeds. When they settled down to their work Starr King was in the lead with Honesty and Capt. Smith in fair attendance, but at the upper turn Director was seen coming up, and he took the place of Honesty, who found the pace too hot for him, and so after a very close and exciting finish Starr King won by three-quarters of a length, Captain Smith being a poor third. This heat in no wise decreased the faith held by his backers in Director's speed and they backed him as fully as before. In the second heat Goldsmith was not caught napping as he went at once to the front and leading at the half by ten lengths he won handily in 2:25 with Starr King second and Cairo a bad third. Crown Point was now withdrawn on account of lameness and Director with \$100 to \$20 on his chances out on all the work in the two final heats and won as he liked, Starr King being second and Cairo next in the third heat, and Honesty second and Del Sur third in the final heat, the time being 2:24 and 2:25.

SUMMARY.

Time—2:23, 2:25, 2:24, 2:25.

The next after the 2:25 trot was a purse of \$300, a dash of a mile, for yearlings, in which were entered Chevalier, by Charles Sherman, Monnt Vernon, by M. E. Cloud, Rose Abbot, by Ben E. Harris, the Sultan—Gertrude colt by L. J. Rose, and the filly by Priam, the dam by Chieftain by W. H. Parker. The youngsters were all pretty unruly except Mr. Rose's colt who won by six lengths in 3:04, while the others timed it a second less, the quarter being made in 49 seconds, the half in 1:34 while the Priam filly came in second in 3:08 after making a very bad break when within reaching distance of home. It was a good performance and Mr. Rose named the colt Edwin.

Time—3:04.

Then came up for discussion the purse of \$500, mile and repeat, for two-year-olds, in which were entered Neluska, by Sultan from Gretchen, owned by L. J. Rose; Ruby, by Sultan, dam by Hambletonian, belonging to John W. Mackay and Pride, by Buccaneer, dam by Flaxtail, owned by M. W. Hicks. The little betting that took place was in favor of

Ruby, and regrets were freely expressed that neither Flower Girl nor Sallie Benton belonging to the Palo Alto farm had put in an appearance to fill this engagement. There was an immense deal of scoring, as Dr. Hicks' filly was evidently out of condition through a long spell of epizooty and could not score with her stronger opponents. Ruby started out in the first heat and at the half-mile led Neluska by ten lengths and won as she liked in 3:33. In the second heat Ruby was not on her best behavior, making three or four bad breaks, of which Neluska took advantage to get a good lead, and although Goldsmith brought Ruby down the home stretch at a very fast gait, Neluska won by a head in 3:33. The final heat was very one sided, as Neluska was tired out and Pride for the nonce had lost her former speed, so Ruby won easily in 2:34 with Pride second and Neluska last. For two-year-olds this was a great performance and caused much favorable comment.

Time—2:33, 2:33, 2:34.

The Third Day.

At the Park Wednesday morning, there being no parade of stock, the attendance was not so large as Tuesday, but the races drew as large a crowd as has been seen there for many a day. The feature of the exercises in the forenoon was a walking match for draft stallions for several prizes. The first prize was a farm wagon worth \$150. The second prize, \$25, was offered by the Society. The rules required the carrying a ton, which was of grain, on light four-wheeled wagons. Honest John, owned by T. W. Williamson of Sacramento; Monarch, owned by H. W. Wilson of Nicolans, and Conquerer, owned by C. Porter of Marysville, were entered. Monarch won the first prize, making the mile in 12:40; Conquerer took the second prize.

The Races.

The third day again opened auspiciously; there was a fine attendance and though the afternoon was warm, so warm as to make the visitors from the Bay divest themselves of all warm clothing, replacing it with linen, the horses started out well and the racing was capital. Night Hawk astonished and pleased the spectators by making the fastest mile ever run on the Pacific Coast, and as will be seen by the report the race was a good one all through. Judge Shafter was warmly congratulated on having bred so good a mare, and the Haddington-Norfolk blood the happiest kind of nick.

P. A. Finigan was starter and succeeded admirably in the trying position.

The first race was the filly stake for two-year-olds, a dash of five-eighths of a mile, \$50 each, \$15 forfeit, with \$200 added. There were originally eight subscribers but only two came to the post, George Howson's Augusta E selling at \$60 against Mr. Coutts' Flou Flou at \$20. There was seemingly no reason for this difference in the odds, because Flou Flou had shown great speed in her trials in the spring, but afterwards she went amiss and now has recovered somewhat of her old form. Flou Flou was out off to make the running but Augusta E. closed up and made an excellent effort on the homestretch but she was beaten out by Flou Flou in 1:02.

SUMMARY.

AGRICULTURAL PARK COURSE, SACRAMENTO, September 13.—No 8, running, two-year-old fillies; five-eighths mile; \$50 entrance, \$15 forfeit, \$200 added, second to receive \$75, third \$25.
C. Van Buren's blk f Flou Flou..... 1
George Howson's br f Augusta E..... 2
Time—1:02.

The second race was the California Derby Stake for three-year-olds, a dash of a mile and a half, \$100 entrance, \$25 forfeit, with \$250 added, \$100 to the second and \$50 to the third horse. For this there came up only three contestants, Maria F. and the Duke of Monday belonging to George Hearst, and Captain Kidd named by W. L. Pritchard. The betting was \$100 to \$45 on the Hearst stable, and when they were given the word Maria took up the running and passed the stand a length in advance of Captain Kidd whose jockey was saving the horse's head off in his attempt to keep him in reserve, but ineffectually, as the Captain was jumped out before he had gone a mile. Thus left to themselves, the two came rattling down the stretch and finished well in 2:40, the Duke taking the victor's spoils. Judge McKinstry was eulogized also in this race but did not start.

SUMMARY.

Same day—No. 9, running, California Derby stake; three-year-olds, one and a half mile dash, \$100 entrance, \$25 forfeit, \$250 added, second horse \$100, third \$50.
Hearst's b c Duke of Monday..... 1
Hearst's ch f Maria F..... 2
Pritchard's b c Kidd..... 3
Time—2:40.

Next on the programme was the Jennie B stake, a dash of a mile for all ages, \$50 entrance, \$15 forfeit with \$200 added. In this there were Red Boy, a great favorite in the betting, Night Hawk, May D, Forest King and Frank Rhodes. On the fall of the flag both Red Boy and Night Hawk, who were on the outside position, made a rush for the pole and at too close proximity for safety, but luckily a collision was avoided and they both began to race at a clipping gait, Night Hawk always having slightly the advantage of Red Boy, and holding her position, she shook off Red Boy's desperate challenge at the drag gate and won in 1:42, the fastest time made on the Coast, and, as it beat Jennie B's record in this race, 1:42, it will hereafter be named the Night Hawk Stake until her time is beaten.

SUMMARY.

Same day—Jennie B stake, running, for all ages, dash of one mile; \$50 entrance, \$15 forfeit, \$200 added, second horse \$75, third \$25. Stake to be named after the winner if Jennie B's time, 1:42, is beaten.

Time—1:42.

The next race was the selling race, a dash of a mile and an eighth for a purse of \$250, \$100 to second horse and five per cent. of the purse to the third. Horses entered to be sold for \$1,000 to carry usual weight and two pounds off for every \$100 under that valuation. In this race there were only three entries, Joe Howell, aged, entered to be sold at \$800, selling in the pools at \$100 against \$20 for Joe Daniels' Jim, aged, at \$250, and Lady Partisan, three years old, for \$1,000, both in the field. At the end of half a mile Joe Howell held them both safe and cantered home in 2:00, Joe Daniels taking second and Lady Partisan third money.

SUMMARY.

Same day—Running, one and one-eighth miles, selling race. Purse \$250, second \$100, entrance (5 per cent.) to third horse. Two pounds

There was no delay whatever. The scullers had a preliminary burst and then dropped back to the starting buoys. At 2:33.23 o'clock Referee Brandegee gave the word which sent the men on their journey. Courtney lost half a stroke in starting; his chronograph was so placed in his boat that he could note the pace he was making. From the tremendous pace at which the men went away it was patent that each had made up his mind to do the greater part of his work

at the beginning of the race, with a view of securing such a lead as would give him the command of his opponent to a certain extent, and by acting discouragingly upon the latter perhaps materially aid in gaining the day. It had been anticipated by Lee's friends, and thought possible by the backers of Courtney, that the former would immediately show in front. But for the starting of his chronograph Courtney would have got away evenly with the other, getting his work in at the rate of thirty to the minute. He quickly drew level with the Newark man, who was doing thirty-two strokes and pulling for dear life. The adherents of Lee, who had been willing to bet more than the other party cared to accept that their man would at least keep the lead from the start until rounding the half way buoys, were soon astonished to see Charley not only maintain his position, but gradually, inch by inch, rush his boat ahead.

Lee made desperate efforts to hold his powerful opponent and did so for a brief period, but then Courtney, wrenching his sculls through the placid water with an expenditure of power which sent his boat fairly flying down the lake, again commenced to edge ahead, and when nearly three-quarters of a mile from the start he was nearly a length the best of it.

Courtney was now working his sculls at the rate of twenty-nine a minute, while Lee was doing thirty, and pulling each stroke strong and clean. Approaching the turning buoys they had a very sharp tussle, being for a second on almost even terms, but as before muscle and skill carried the day. Going ahead again the brawny armed carpenter from Union Springs turned his mark buoy at the one mile and a half in just 9 minutes, 45 seconds, while Lee was 9 minutes, 45½ seconds in getting around.

Such a close race had never been seen by any of the spectators or officials, and the interest was now coupled with intense excitement.

When straightened for the home work Courtney dropped his stroke to twenty-eight, and Lee almost passed him, rowing in good shape and with great strength. Charley subsequently explained that his right arm had troubled him for a day or two, and he desired to give it a rest, as he feared that the excitement might bring on lameness.

Lee's lead was for a brief period only, as Charley, at the two-mile point, had again reached the post of honor, and he was pulling so grandly it was dollars to farthings on his winning. At two miles and a half Charley was three-quarters of a length ahead, and holding his man beautifully. One-quarter of a mile further on, Courtney drew his sculls through the water more firmly than ever, and then led a length. As the last quarter was reached Charley dipped the old blades to the tune of thirty-one, and, as he drew further away from his plucky opponent, the cries of the spectators on shore were deafening.

A spurt of decided earnestness finished the great race, and when Professor George R. Smith dropped the blue flag, denoting Courtney's victory, his shell was one and a half lengths in front of Lee's.

The victory of Courtney seemed very satisfactory, and cheers and the waving of handkerchiefs were universal. He pulled up to the referee's boat as soon as practicable, and then Mr. Brantegge said:

"Mr. Courtney, I award you this race in the unprecedented time of 19m. 21½s.

Lee's time was then given at 16m. 35½s. This speed shows that winner and loser are extraordinary men.

The following particulars concerning the contestants and their boats are interesting:

Charles E. Courtney of Union Springs, N. Y., is thirty-four years old, six feet and one-half inch in height, and weighs 167½ pounds. He rowed a paper boat 30½ feet long, 11½ inches beam, 5½ inches deep and weighing thirty pounds, built by Waters & Sons, of Troy, N. Y.

George W. Lee, of Newark, N. J., is twenty-six years old, five feet nine inches in height and weighs 153 pounds. He rowed a cedar boat 30½ feet long, 10½ inches beam, 5½ inches deep and weighing thirty-one pounds, built by William Wallace, of Newark, N. J.

A DEFAULTER'S STAKEHOLDER.—How much actual fact is there, I wonder, in a curious story that is going about concerning the Hanlan-Ross difference? For some little time now American papers which touch on sport have referred mysteriously to a loss of £200 by Ross. This, they insinuate, sometimes remotely, sometimes pointedly, should be shared equally by Hanlan, seeing that through him the loss was made. Not often is it that professional scullers in their designs upon an easy-going, not to say idiotic, public, are brought to grief by one of their own instruments. Therefore it may be as well to tell the story of Ross' ill-fortune as he himself tells it. Upon being interviewed two or three weeks back, he stated that the £200 which he put up for his match with Hanlan had never been returned him, the sporting editor of a paper in Toronto, with whom it was deposited, having gone away, and forgotten to leave either it or his address behind him. The stake-holding paper referred to contained a few weeks back a notice that this same sporting editor had departed, and that the proprietors were in no way responsible for his actions. If the story be as told by Ross, he has no reason to fear that his money is gone. The proprietors in question are legally responsible to him for money entrusted to their representative, if it was entrusted to him as such. Their ignorance of this great truth need make no difference to Ross. "*Qui facit per alium facit per se*" is a legal maxim which obtains in all parts of her Majesty's dependencies, including Canada. Providing the paper is worth £200, the fact that this sum was entrusted to a servant of the proprietors, and not to the proprietors themselves, would be no bar whatever to Ross' recovering it. If my memory does not mislead me, this has been proved before now here in London. When deposits are made at the office of a sporting paper, the proprietor of such paper is responsible for them. The statement that clerk or cashier, sub-editor or reporter, has absconded with the money, would in no way hold him harmless.—*Pendragon, in the Referee.*

STILL ANOTHER CHALLENGE: The latest card from Wallace Ross has been telegraphed across the continent and runs as follows:

"I am prepared to defend the title of champion, which I now hold by reason of Hanlan's reported failure to accept any challenge against any sculler, whether from Toronto or any other part of the world, and am open to a match under the usual championship conditions as to distance and the amount of stakes, which Hanlan well knows, and £200 a side. I prefer to row Hanlan a race of this kind, and as an inducement shall give him the champion's right to name the course, and will allow a mutual agreement as to the condition of the water. The race must, however, be rowed five weeks from date."

Considering that Hanlan has published several cards announcing that he would row no one this year the defiant proclamation of the New Brunswick is robbed of much of its value. It is high time for the telegraph agents to give these aspiring champions a rest and allow them to remain in obscurity until they have done something more meritorious than to sound their own praises through the columns of the newspapers.

A Card from J. D. Griffin.

EDITOR BREEDER AND SPORTSMAN, Sir: In the issue of your interesting paper of August 26th, L. C. White, Captain of the Pioneer crew, hits me and my club by saying we can row better on a sheet of paper than on water. Mr. White is well aware that the Golden Gates challenged his club several times and they would not accept. Is he also aware that his club had a standing challenge of \$5,000, against any club-crew in this State? I accepted this standing challenge through a friend, Mr. Ellis, but that glorious challenge of the Pioneers fell through. "They were only rowing on paper". Mr. White must acknowledge that in his club house committees from my club and his were to meet and make arrangements for a race, but the Pioneers failed to come to time. I said they would beat them, he said it looked like it. I will challenge Mr. White to show me an instance, when myself or my crew rowed first-class men against second-class men or second against juniors, but Mr. White has rowed a first-class crew out of his house against juniors for the Lumbermen's cup, but the juniors very gentlemanly drew out of the race after training hard for two weeks. I can hardly blame the Pioneers to steal a victory if they can, it is so long since they have won a square race. The Pioneers can keep in training from now until Thanksgiving Day. The Golden Gates will not go into training till two weeks before that day, and in their old lapstreak will give them the hardest race they ever had in their fine paper shell. I have got a son, a light weight, that will row Mr. White or any man in his club a single shell race except Dan Leahy or Ned Nelson, for any reasonable amount, say \$100 or \$1000. This is what the tail of my literary kite can swing in or out of a row boat. As you are anxious for a race I will match you a crew outside of the Brown crew against any four men in your club, a lapstreak or barge race. I will be light with you, say a \$40 prize.

As for the delay in complimenting Mr. Yale it was on account of two of the officers of one of the clubs being out of town.

In answer to Captain Thomas of the South End Club, he is well aware that the arrangement before the Lumbermen's Picnic regatta was, that in the near future they would row for \$100 a side, but the vain glorious South End crew won by a scratch through a foul. They raised the sum to \$250 a side thinking they had a dead thing, but they were sadly mistaken. It is plain to be seen that the South Enders row for money and not for pleasure or health. The Golden Gates row, game and honest races and are not tools to any club in the 4th of July regattas

J. D. GRIFFIN,

Treas. G. Gate Rowing Club.

Challenge.

TO THE EDITOR OF THE BREEDER AND SPORTSMAN: We the undersigned members of the first crew of the Golden Gate do hereby challenge any crew in the South Ends, or in the Pioneers, for a purse of from \$500 to \$1,000, to be rowed in barge or lapstreak.

Signed,

JAMES BROWN, Bow.
P. KAEGAN, Forward Waist.
J. KAEGAN, Aft "
J. WALTHOUR, Stroke.

If the South Ends or the Pioneers think we are rowing on paper let them put up the above sum of money and that will talk.

Only a Gambler's "Squeal."

The men who were unfortunate in backing Ross in the Saratoga professional single-scull race are filling the papers with startling news. They aver that Ross was bought off, and that Courtney sold out to Lee. They seem to forget the fact that in 1877, over the same water, Courtney, who was then looked upon as invincible, rowed the three miles, with a turn, in 20:47½, while Lee's time in Friday's race was 20:43½, and Courtney's 20:48—only a quarter second slower than his '77 performance. Courtney's record, 20:14½, was not made at Saratoga, as has been erroneously reported, but at Owego, in October, 1877. Ross was in no condition to row such a hard race as Lee won over Courtney, and it is contemptible business, now that he is beaten, after having made a game struggle, for his friends and backers to cry "wolf."

In connection with this, we have received the following card from Mr. John H. Robbins, of the Associated Press, on of the managers of the late regatta:

EDITORS TRUE, FIELD AND FARM: I have been handed a slip containing some telegrams printed in a Philadelphia paper, which reflect on the late boat race at Saratoga Lake. The first telegram, a special from Auburn, pronounces the race a "skiu"; the next attempts to show how the skin was put up; the third attempts to show how the pool-box was manipulated, and another how Riley was a participant in the alleged outrage. A paper that would print such malicious stuff is not worthy of being read by any lover of honest sport. The race in question was most assuredly rowed on its merits, and Courtney rowed to win, and had he not fouled the number attached to his stake he certainly would have won. He lost 22 seconds turning the buoy. This fact seems to have been lost sight of. Courtney was not paying attention to Lee. He was determined to beat Ross. When he turned around to look for Lee and saw him seven lengths in the lead after turning the stake, then he set himself to work and rowed as grand a stern race as ever a man saw, finishing a short length behind Lee, who never was in finer condition. Regarding the pool-box, \$10,000 is all that Mr. Cathcart's books show were bet. Ross averaged as first choice, \$325, Courtney as second choice averaged \$195, while the field, with Lee in it, went begging throughout the entire selling, seldom bringing over \$35. This fact alone tells the story and is the indicator that an honest race was rowed. The first to cry skin are the losers. Courtney's race defies the allegations of the mean, contemptible gamblers who are so loud in their denunciations. Mr. Roche, who bet three-fifths of the money lost on Ross, cannot speak in too high terms of Courtney. Why? Because he saw the race. Nine of the fields that were sold during the pooling were purchased by horse-racing men; some of them had never seen a boat race. Mr. Meeker, who lost heavily on Ross, expressed himself satisfied, and I could recount to you numerous facts that would knock this combination of gamblers' squeal and penny-a-liners' ambition into a cocked hat. As regards the statement that Jim Riley was employed to foul Hosmer, I do not hesitate to call the man who uttered the statement a liar. Yours truly,

JOHN H. ROBBINS.

—True, Field and Farm.

THE COURSE WAS CORRECT.—Lest there should be any question regarding the accuracy of the measurements of the course on Lake Candaraga, on which Courtney made his recent great record, the following affidavit is published:

"Otsego county, ss.: Jay L. Comstock, being duly sworn, deposes and says that he has been a practical surveyor for thirty or more years last past; that the buoys for the race between Charles E. Courtney of Union Springs, N. Y., and George W. Lee of Newark, N. J., were located and placed by me, and under my direction, near the west shore of Candaraga Lake, on the 30th and 31st of August, 1882; that the said race was rowed by the said Courtney and Lee on the 1st day of September, 1882, as this deponent is informed and believes; that the distance between such buoys, as placed by me, was measured under my direction and computed by me, and is 1¼ miles and no less.

J. L. COMSTOCK.

"Subscribed and sworn before me this 1st day of September, 1882.

A. C. TENNANTS,

Notary Public in and for Otsego county, N. Y."

Three miles in 19:31½ is very fast going for a man who had so many mishaps. It is almost certain that this record will be accepted by the authorities. Dan Leahy made a more wonderful record over the Saucelito course in his five mile race with Hoyt, and the surveyor testified to the correctness of the course, but Dan gets in place this year in the accepted rowing records. Anything extraordinary of which California would like to boast is generally denounced as suspicious by Eastern authorities and not accepted until the performance has been repeated in the East.

ROWING AT LONG BRIDGE.—The Golden Gate club extended its hospitalities last Sunday to the visiting oarsmen of the Dolphin and Triton clubs of North Beach. The afternoon was enlivened by racing over the course to the rolling mills and back. The first contest was a scratch between the crews of the Golden Gate Club. H. Peterson, John Keegan, C. Smith and J. Griffin manned the Golden Gates' barge Gov. Perkins. P. Keegan, J. Lamb, J. Brown and D. Griffin manned the Dolphins' barge Dolphin. The superior qualities of the Gov. Perkins enabled the first named crew to get off quickest and at the mile buoy they had a commanding lead of several lengths. They increased the advantage on the run home going almost as they pleased. Both crews showed good form considering the circumstances under which the race was rowed. A race between the Dolphin and Triton crews followed on the same course. The Triton four were James Hughey, S. L. Schuppert, B. Kehrlein and J. Kehrlein. The Dolphin's four were S. Rathkoph, W. Whistler, G. Van Guelpen and T. Frazer. The Tritons had the best of the send-off and led to the rolling mills. In making the turn the bowman of the Dolphin lost the button of his oar and the boat came round so slowly that the Tritons gained a commanding lead and won easily. While the victory of the Tritons was not unexpected, the Dolphins' defeat is not by any means a disgrace, and another contest under different conditions would be interesting and agreeable to the lovers of rowing.

DRAW IT MILD.—Mr. Louis White, of the Pioneer Rowing Club, and Mr. J. D. Griffin, of the Golden Gate Club, are railing at each other through the papers. Mr. White insinuates that Mr. Griffin's club was better able to row on paper than in a boat, and Mr. Griffin retorts by sneers at the capabilities of Mr. White and his compeers of the Pioneer Club. If this kind of thing goes on the disinterested reader will begin to think that there is some ground for the implied charges made by both gentlemen. Instead of wasting time in writing challenges and manufacturing bad sarcasms, which have no particular interest for the public, it would be better for the rival oarsmen to keep their peace until they meet on the water, which they can soon do in a legitimate, manly and decorous manner. There is a time-honored proverb about boasting before one puts on his armor and after he has taken it off, that might be pondered over with much profit by the ardent competitors of the Golden Gate and Pioneer Clubs. We have more than once heard our great champions promise to eat their boots if they got beaten and though they did not win they are not visibly suffering from the indigestion that should follow if they had kept their bounds. Buckle down to your oars, gentlemen, and avoid printer's ink. It is not at all conducive to muscular vigor.

A SQUARE RACE.—The Boston Herald says: The absurd story that the Saratoga boat race was "dropped" to Lee is almost too ridiculous to comment on. The contestants did their best to win, and the time would have been much faster than it was if the struggle had not been so hard a one. Every man who has rowed a boat race knows that the excitement of competition is weakening, and lessens the power of each stroke long before the race is finished. A man starting for a trial on a three-mile course can often row the distance nearly a minute faster by judging his strength and lasting qualities, and using them accordingly, than if he engaged in a race with several others and was forced to do his best from the beginning. At Saratoga, Courtney had the task before him of rowing down Ross, Hosmer and Lee, each of whom fought him in turn and kept him spurring all the way. The time made in that race, under the circumstances, was remarkable.

A FAST AMATEUR.—The time announced for Holmes in the amateur race at Saratoga was several seconds slower than the distance was rowed in. The gentlemen who acted as timekeepers, not clearly understanding the rules, dropped the flag when the stern of Holmes' boat crossed the line, whereas they should have timed from the bow. The amateur champion stopped rowing just as his bow reached the line, and his shell moved slowly past the timekeepers. It is safe to say that Holmes rowed the three miles, under the rules of racing, in 21m. 10s., instead of 21m. 16½s., as given. Lee's time was about 20m. 40s., so that the champion amateur's performance was a great one.

ROWING AT PORTLAND.—In the annual four-oared race for the Grant cup, which took place at Portland, Oregon, last Saturday, the Portland Rowing Association won, beating the Willamettes nearly one hundred yards. The course was three miles with a turn. Time, 19:20. The bow oar of the Willamettes was taken ill at the turn, but until then the race was close. The Portlands have won the cup in three races, and it now goes to their club permanently.

Courtney has not yet responded to Kennedy's offer to row him for \$1,500 or \$2,000 a side. Such a race would prepare Charley for a meeting with Ross, which now seems almost inevitable.

William Elliott, ex-champion sculler of England, intends returning to the old country in October, but he says he will come back to America in the spring. He will not be missed if he fails to keep his promise.

JOSEPH CAIRN SIMPSON, - - - EDITOR

San Francisco, Saturday, Sept. 16, 1882.

THE ETHICS OF THE TRACK.

There must be an entire revision of the code of morals by which the drivers of track trotters are governed. Laws which are obeyed, not enforced, rules of conduct which are cheerfully submitted to from the consciousness of rectitude on the part of those who come under the control. There must be a higher sense of honor, a higher plane than smartness, a grander object than to manipulate races so as to make the most money out of them. In the old days of racing, a man who was found guilty of dishonest practices on the turf had to submit to social banishment. He was held to be unfit for the companionship of gentlemen and placed in the same standing as a petty thief, or trick-of-the-loop operator.

But the phase of the question which we shall consider now is a practice which does not meet with the reprobation it so justly deserves. This is a combination among the drivers to "play" the fastest horse. The manager of the horse which is conceded to be the superior enters into an agreement to divide the profits. This is with the express understanding that the contracting parties shall all work to the same end. There may be six horses in the race. D. is held to be the safest to put money upon. R. is speedy but unreliable. S. R. is badly handled, or still worse, rogishly handled. D. S. and H. are thought to have so little chance that they are left out of the combination as well as the uncertain R. But to guard against any contretemps A. is delegated a part which will prevent those who are not in the pool from upsetting the calculations. He is chosen as a helper to the prospective winner. Help at the right time is of incalculable service. A slight assistance at the critical moment may be an advantage which insures victory. It may be "carrying a contending horse out," it may be surrendering a position to the favored one. Under such an arrangement the driver of the favorite has a comparatively easy task to perform. For instance in making the second curve we will suppose that A. and H. are lapped, the former on the inside and leading a trifle. D. saves all the ground he can by keeping close to the inner rail behind A., and when the homestretch is reached A. carries H. out and gives D. the pole, so that in place of going around the two he has saved many yards, and wins a heat which he otherwise would lose. It may have been that there has been no infringement of the rules, according to a strict construction, and this one thing decides the race. If even it be found necessary for A. to do something which will subject him to punishment nine times in ten a fine is the penalty. The largest fine the judges can impose is a trifle in comparison with the pecuniary return from the sharp practice, and though it is paid with the greatest display of indignation there is an inward chuckle over the success of the scheme. Were every race a stubborn fight by everyone engaged in it there might be fully as much foul driving. We always sympathize with a driver who in the eagerness to win infringes, but when the guilty act is done to aid and abet in carrying out a nefarious combination, can we see him punished to the full extent of the law. These combinations are the hardest things the judges have to meet. The only evidence, perhaps, is the betting, and that is oftentimes illusory. Men of sanguine temperament have an overweening confidence in their horses, and will back them when the calmer can see that there is no hope for them to win. There are races when the betting misleads those who are the most acute in "catching points," and if that were taken as a guide and verdicts based on it without corroborative testimony great injustice would follow. But how can these things be remedied? is a pertinent question, and what rules shall be framed to correct the evil? There may be amendments to the code which will assist, though our greatest hopes are in the drivers themselves. There must be an endeavor to increase the standard of morality, and if a driver does not come up to the requirements get rid of

him. Owners are frequently more to blame than the persons they employ. They are careless in this respect, criminally careless. They will put horses in the hands of men who are notorious for a want of honesty, and laugh over the stories which brand the relators as the lowest kind of thieves.

There should be a determination on the part of owners and drivers to elevate the profession, among the latter there should be an esprit to make their business rank as highly as any other. To be a good driver—a good trainer especially, demands ability of a high order. There must be a level head, an inquiring mind, industry in study as well as to carry out the lessons which study gives. When this is combined with a high sense of honor, a resolution never to do anything that will jeopardize the standing, to frown on any schemes which are not based on the strictest honesty, then there will be little necessity for rigid rules. Let us hope that this day is not far off, and when it comes the only opposition to the fast trotter will be from those too bigoted to enjoy any of the good things of this world.

THE FAIRS.

The fairs of the Sonoma and Marin and the Golden Gate Associations have passed, and now as we write that of the California State Agricultural Society draws to a close. To say that the Oakland and Petaluma exhibitions were satisfactory in every respect is only to reiterate what has been universally acknowledged. The new grounds of the former association have removed all cause of complaint, and it is conceded by all those who attended that it is hereafter destined to be one of the foremost of the California fairs. The great advantage is in ownership. There is not a member who will not take an interest in every tree and shrub that is planted, every adornment that is added. Even those who argued that the old park was good enough will acknowledge their shortsightedness, and heartily applaud the energy which carried the opposed projects to a successful termination.

There is no more beautiful location in the vicinity of San Francisco than the Oakland Trotting Park. Directly opposite Golden Gate, within the sound of the waves, it is so sheltered that rough breezes are of rare occurrence.

The plantation that skirts the shore is not the only protection. To the East is the Contra Costa range, an eddy which flows back carries the trade winds above the level of the course. Nearer still there is a belt of timber. Along San Pablo Avenue, from the drive which leads to the park on the south, to the northern limits, are handsome residences, around them trees of such size that our Eastern visitors can scarcely credit the story that they are only of twenty years' growth. Between the natural coppice on the west and the partially artificial on the east, the park nestles, cosy as a "clearing" in the woods.

It only requires a little aid from the architect, the builder and the landscape gardener to make it one of the handsomest places in the whole country, and which could not fail to attract a multitude of visitors at all seasons of the year. With these improvements the fair week would interest such assemblages of people as throng the park at St. Louis when the annual exposition is held. The ownership vested in an enterprising body of men who would make the necessary improvements, it is safe to predict that five years will return every dollar invested, with a valuable property left. This is all that is needed to place the Golden Gate Association on the right foundation, a guarantee that for many years there will be a park worthy of the two large cities to which it is contiguous. There is now a good prospect that the property will be purchased in time so that the desired changes can be made for the fair of 1883, and then the Golden Gate will be on the same footing as the sister societies.

We read and hear great things of the California State exhibition. This is the first time we have missed witnessing it since "living on the Coast," and we lament the "stern necessity" that compelled the lapse. In fact there is not one of the fairs of this State that has not attractions, and to a person of leisure who could spend the time there would be continual pleasure.

Sacramento is just the place for the State Fair. The capital of the State, it is meet that the exhibition embracing the whole country should be held there. Apart from it being the location of the other branches of the State Government, there are advantages that cannot be overlooked. We have often adverted to them, and in a mere sketch of this kind there is no necessity for repetition. There is little question that the display of stock is as good as has ever been held there, and this promises a grand display indeed. Every department is reported equally well filled with articles on exhibition, and so far the races have been very satisfactory. We anticipated hearing encomiums regarding the manner in which everything has been conducted, as it would be difficult to find a more efficient set of officers.

LETTER FROM MR. FINIGAN.

Below will be found the copy of a letter from Mr. Finigan in response to that which accompanied the medal presented Mr. F. by the Santa Clara Valley Agricultural Association, a description of which was given in the "Breeder and Sportsman."

In the first place was a very graceful act on the part of Mr. Finigan when he helped the managers out of their dilemma at the time of the visit of General Grant to the San Jose Fair; the second it was a graceful acknowledgment by the association, and the reply is equally felicitous. It is a great pleasure in these days, when so many owners of horses merely regard them as the means of making money, to find one imbued with the old-time spirit, one who has no mercenary motives in keeping a "stable," and who does so from a true love of sport without a sordid thought. It is true that to be able to do so a man must have the necessary means, but there are plenty of such who are as intent on emoluments as the poorest, and not a few of them who are more rigid in their exactions, than those who depend upon the race.

ALDERNEY FARM, Sept. 8, 1882.

TO THE BOARD OF DIRECTORS, SANTA CLARA VALLEY AGRICULTURAL SOCIETY, *Gentlemen:* Your highly esteemed favor came to hand in due time. How to thank your honorable board I know not. Today that I was surprised beyond language to express would only convey a small portion of my appreciation of your eddy and highly-prized medal. It is so perfect in design, so wise in form, pure and glittering, who could be so indifferent as not to make it a life-long memento of the kind donors. I assure you, gentlemen, I will never tarnish it as long as I live, and the S. C. V. A. Society will always shine bright in my remembrance. Were the inscription, design, and supermechanical skill on the plainest of metal, in place of the finest, it would be a present dear to me as long as I live, and at death I will bequeath it to the child most in favor with me, to the one of my children who I think will regard it the highest, and who after me will bear in loved remembrance of the S. C. V. Society.

Before Santa Claus sent East he trotted fourteen races, all of which he won, but I prize my medal more than all the rest of his winnings though there was placed a large amount to the credit of his account. The stamp on coin is the same. It is simply the government certificate of its value, and as they are issued from the mint there is no difference. There is only one medal such as you have sent me, and as I have stated before it is to me beyond price, as it bears the stamp of kind feelings embodied in the inscription, and recalls some of the pleasantest moments of my life.

The great pleasure of that occasion was in being able to assist you in entertaining your distinguished guest, and General Grant was doubly pleased, as up to that time he had never seen a trotter go fast.

The five-year-old record of Santa Claus still stands at the head of the list. He won the 2:18 over your track on the occasion referred to and that is the last time when a colt of his age showed so much. It yet leads a bold and defiant challenge, and I propose to accept the offer, and with a son of Santa Claus excel the time of the sire. I can assure you, gentlemen, that the ground I shall select for the trial will be on which this was made, and I feel the utmost confidence in the result. Should the son equal or surpass the time of the sire on the same track, and in the presence of the kind friends to whom I am indebted beyond terms to express, it will be an additional source of gratification.

That Santa Claus keep up his California reputation, and to-day stands at the head of the list of trotting stallions, is very gratifying to me, as my interest is still as great as when I was the owner, greater as the token of your goodwill has come since I parted with him, and this heightens the interest.

Again, gentlemen, permit me to thank you. I shall visit your coming fair, and I can return my heartfelt thanks in person. The medal will bring, so that those of your members who have not seen it can have the opportunity.

With assurances of respect and esteem I am, gentlemen, very sincerely, your obedient servant,

P. A. FINIGAN.

OUR HORSES IN THE EAST.

At last there is a rumble of satisfaction in the news from the Orient. On Tuesday last at Sheephead Bay, Coney Island, N. Y. Luck B beat a strong field of two-year-olds, and Duchess of Norfolk won a sweepstake for all ages. This is probably the turning point in the run of bad luck and for this time on we hope to record many victories. The California horses are named in nearly all the stakes at the fall meeting at Chicago, which opens October 3, and this will end in time for them to take part in the Pacific Coast races in November. The following is the telegraphic account

In the fourth race one mile, for two-year-olds, P. Lorillard's Breeze and Bete sold for \$500, Pannon Fever for \$300, Magenta \$125, Empress \$105, Vintage \$800, Lucky B. \$80 and the field \$7. After a little delay an even start was made, with all but Vintage, who was nearly left at the post. Breeze took the lead but was passed by Bridesmaid on the turn, and the latter gave way to Baron Fever as they neared the half. Turning into the stretch, Lucy B and Empress

neither of whom had been among the first five during the previous running, moved to the front. Lucky B won the race by three lengths. The French pools paid \$40 90 post odds of eight to one against the winner. In the first race, 1½ miles for all ages, handicap sweepstakes, Carley B sold at \$575, Della \$220, Duchess of Norfolk \$110, Wedding Day \$100, Addie Creal \$70 and the field \$8. Carley B took the lead with Nettie second and Della third. At the stand Carley B and Nettie were on even terms. As they passed the half mile Carley B led by a length with Duchess of Norfolk second. As they made the turn into the stretch Carley B and Duchess of Norfolk were on even terms, the latter beginning to draw away. The French pools paid \$50 70 post odds; seven to one against the winner.

"THE FIFTIETH."

The opening of the shooting season, which dated from yesterday, has been looked forward to for many weeks by the enthusiastic disciples of the gun. Breech-loaders have been overhauled, cartridges loaded and shooting traps put in order. Yesterday hundreds left the city anxious to have the first "what" at the quail or duck. The ferry boats and cars have been overrun by men and dogs all heading for the country.

To-day and to-morrow man-hundreds who were unable to be out on the 15th will make it lively for the as yet unsuspecting birds. Up on the marshes the duck men will get their pick of young mallards, which have been raised there, and the season's quail everywhere will be kept moving pretty lively.

The shooting season this year seems to have attracted even more than ordinary attention. Gunsmiths report a greater demand than usual for things in their line. This is their harvest time and the boys' money flies freely when getting ready for the fall.

The next few days both dogs and men will be hard worked. New dogs will develop their bad or good qualities, and there will be a great deal of powder burned and feathers scattered. The first few days' sport only serves to whet the demand of the ardent gunner to renewed exertion, and for many weeks to come the birds will be kept moving.

THE SECRETARY OF THE STATE FAIR.

We hear that an effort has been made to have Edwin F. Smith, the efficient Secretary of the California State Agricultural Society, removed, the animus of the attack being occasioned by Mr. Smith having written two articles for the "Breeder and Sportsman."

While we cannot believe that single director will pay any attention to a charge based on such frivolous grounds it cannot be passed without comment. It is admitted by every one with whom we have conversed that Mr. Smith has performed the duties of his office in the most satisfactory manner, not only in regard to the office work, as all of those who have had business to transact with the society are well pleased and write in the highest commendation. Prompt, active, urbane, systematic and untiring he unites the qualities which are so essential in the office he fills and without a word of disparagement intended for others who have preceded him in the position we hold that it would be a serious detriment to the society and every one outside of the association who is interested in any portion of the great exhibition to lose his services.

We have not the least fear that the Board of Directors of the California State Agricultural Society will lend themselves to a scheme so much below the dignity of themselves or the office they hold. They are gentlemen and this secures them from the obloquy of furthering the spite of any individual.

Furthermore we can hardly credit the report that a person of any standing should approach them with such an impudent request.

LOS ANGELES FAIR.

The dates of the Los Angeles Fair are Oct. 6, 18, 19, 20 and 21. In the advertisement the first day is omitted from an error in the copy and the correction was not received in time to be made in this number. The officers of the society are: F. J. Barretto, President; E. F. Spence, Treasurer; R. H. Hatt, Secretary and Superintendent.

PACIFIC BLOOD HORSE ASSOCIATION.

The fall meeting will commence with an "Introductory day," Saturday, November 5th, the regular days following on the 18th, 20th and 21st. The programme will appear in the next number.

The Mosquito Regatta of the S. Francisco Yacht Club comes off over the short course on Saturday, the 23d inst.

The Bohemian Yacht Club opens its new club house to-day.

Concluded from page 181.

off for each \$100 under fixed valuation. Horses to be sold for \$1,000 to carry entitled weight.

Time--2:00½.

The last race was for the 2:30 class, and as it had been fully shown that Sweetness was the fastest of all those entered, although it was doubted whether she could stay, she was eagerly sought after at \$100, while Nellie R. brought \$40, and the field \$60, in which were Albert W., Manon and Tump Winston. Albert W. and Nellie both went to the front in this heat with Sweetness, but the former was rank and Nellie broke badly at the back-stretch, and as Sweetness appears to be steadiness itself, she won after a slashing finish with Albert W. in 2:24, Nellie R. being third and Winston last. As Albert W. had shown so well in this heat and as Charley Marvin was given charge of Nellie R., the hopes of the fielders revived and against \$90 for Sweetness, Albert W. brought \$45, Nellie R. \$35 and the field \$20.

The next was a finely trotted heat, as when in the back stretch opposite the grand stand, Sweetness, hard pressed, was only a short length ahead of Nellie R., she leading Albert W. by half that distance. They all three came down the homestretch in beautiful style, but close at the draw gate Nellie could not stand the strain and was off her feet and Sweetness outtrotted Albert W. by a length amid a great deal of excitement and applause; the time being 2:21½.

The fielders kept up a brave mien and they wagered freely on even terms that Sweetness would not win the race, counting that if she could only be beaten one heat her chances would be at an end. Sweetness again cut out the pace and soon opened a gap of two lengths and although in the upper turn Albert W. and Nellie R. closed on her, she maintained her position to the end, winning by a length from her in 2:22½. Albert W. took the second and Nellie the third money and this well contested race brought the day's proceedings to a close.

SUMMARY.

Same day--No. 12, trotting, 2:30 class, mile heats, 3 in 5, purse \$1,200; first horse \$720, second \$360, third \$120.

Time--2:24, 2:21½, 2:22½.

The Fourth Day.

One of the old-time rousing crowds were on hand to witness the races Thursday afternoon. The hot north wind was met by the breeze which had come through Golden Gate and following the valley northward routed the unwelcome visitor. There is great relief when the red-mouthed demon of the north is exorcised and his place taken by the sweet breath of the Pacific.

Notwithstanding the room on the stands they were densely packed, every seat occupied and the ground for carriages was completely filled. Hundreds were congregated between the stands and the quarter stretch, and altogether the course was probably as large as has ever been seen at Agricultural Park. The management continues to give complete satisfaction, all the officers being complimented, and the secretary, who has been untiring in his efforts from the close of the last Fair until the present time, was heartily applauded for his zeal and official labor.

The first race on the programme was the 2:22, the entries, Brigadier, Romero and Belle Echo. With the knowledge that Romero had not recovered from a severe attack of pink-eye, which threw him out of training so far as giving him fast work went, and even if he had not been subjected to the weakening effect of the disease, the break in his work was sufficient to incapacitate him for making a bruising race, under the circumstances he made a fine performance, as 2:20 is the fastest heat trotted in California this year, and is the fastest time ever made by a California bred stallion.

The betting immediately before the start was \$70 on Romero, \$50 on Brigadier and \$15 on Belle Echo.

For the first heat little time was wasted in scoring as at the third attempt a good start was given.

At the outset Romero took advantage of his position at the pole, and at the quarter he was well to the fore, leading Brigadier by four lengths, he being half that distance ahead of the mare. Shortly afterwards Brigadier made a bad break and lost so much ground that his driver probably thought he had no chance of winning the heat, so he reserved his horse for future operations. In the mean time Belle Echo had closed up toward the leader, who passed the half-mile post in 1:10½, and thence they came around the upper turn, but Belle Echo could never get within more than a length of Romero, and when at the drawgate she was driven to her utmost, she wobbled for a moment and then was off her feet, and Romero jogged past the wire in 2:22½, with Belle Echo second and Brigadier last.

The betting after this heat was \$100 on Romero to \$40 on the other two. The start for the second heat was not long delayed. Romero again started off in the lead, but Brigadier this time would not allow him to open up any gap, and moving up he reached Romero's flank; but the latter, under pressure, resumed the lead by a length, and so they traveled to the half mile post in 1:10, and all around the upper turn Brigadier seemed to improve his position inch by inch, and on entering the homestretch Brigadier was lapping the leader, and thence they came like a double team, until at the drawbridge Goldsmith was seen urging his horse to the utmost, and under the pressure he broke, and amid the wildest excitement the crowd congregated at that point breaking into the open course with yells of delight, Brigadier came away and won the heat in 2:23.

Previous to the fourth heat betting was very heavy, and indeed it was constantly chopping all through the race. After Romero's winning the first two heats, those who had backed Brigadier hedged their bets and now the Romero party were following suit, they paying \$150 for Brigadier against \$80 for Romero, and a great many backed Belle Echo up to \$70, so as to stand even or suffer a small loss, the pool-box being probably the largest winner through its commissions. In this heat Brigadier went ahead, accompanied by Belle Echo, while Romero played a waiting game; but when on the upper turn the mare broke badly. Goldsmith brought up Romero at his utmost speed, but he could not reach the leader; he winning by four lengths in 2:23½.

The fifth heat was something of a surprise. The betting ruled \$90 on Brigadier to \$20 on the other two, and again a good start was given. At the half-mile post Brigadier was just lapped by the two others, but Brigadier around the upper turn gradually drew away from them and seemed to be winning handsily, when Mr. Titus brought Belle Echo up with a tremendous rush of speed, and secured a dead heat in 2:27½, with Romero last.

In the sixth heat Brigadier appeared to be the freshest and the odds were \$50 to \$20 in his favor. He set out at a brisk

pace on the next heat and kept Belle Echo just at his wheel, and trotting evenly down the homestretch it looked almost like a second dead heat, when at the drawgate Belle left her feet and Brigadier won the heat and race by four lengths in 2:25½ from Belle Echo, Romero following her at a like distance.

SUMMARY.

AGRICULTURAL PARK COURSE, SACRAMENTO, SEPTEMBER 14.--Trotting 2:22 class, purse \$1,200, mile heats, 3 in 5.

J. B. McDonald's b s Brigadier.....	3	2	1	0	1
J. A. Goldsmith's g s Romero.....	1	1	2	2	3

EDITORIAL NOTES.

The San Joaquin Valley Fair.--Ho! for Stockton. Today will bring to an end the great Fair of the whole of the commonwealth; Tuesday next will bring the opening of the great Fair of the San Joaquin. In all of the States excepting California, the State Fairs so completely overshadow all the others that there is little chance for comparison. Here the District Fairs are also great exhibitions, and that which is held at the Capital of the rich valley has attractions sufficient to secure the attendance of a vast assemblage. The premium list is liberal in all its departments, the speed programme outranks any other in the State for the magnitude of the purses offered. This liberality has secured an entry list which assures the highest class of sport, and in addition to the amounts on which an entrance fee is charged, sums are added which will be a powerful incentive to the making of fast time. There is a glamour to the American people in witnessing previous records beaten. There is an enthusiasm following fast time which it is difficult for less mercurial folks to understand. When all the horses are likely to go fast there is a still greater desire to see them perform, as this is a guarantee of good races as well as fast time. It is unnecessary to reiterate that the horses in the classes at Stockton are so near together that the excitement in every race must continue from the start of the first heat to the finish of the last, as the record of the previous races proves it. Not a single trotting horse has won through. The most fortunate of them like Sweetness and Director have been beaten in their classes, and the warfare is sure to be a violent struggle all through. It is also unnecessary to acquaint those who have visited Stockton in previous years that there is a strict impartiality observed, and that the management is superior. This is well known and there are often inducements to make the trip exceedingly pleasant.

Night Hawk.--There cheers for the bonnie bay mare. She has cut down the California record to 1:42½, and that is not a very big gap to close if even the fractions of seconds are troublesome when the time to equal is recorded as fast as 1:40½. That is Boardman's at Sheepshead Bay, but he was a four-year-old and only carried 91 pounds, whereas under the same schedule as Night Hawk ran under, it would have been 108 pounds. Ten Broeck's running against time does not come into competition, as there is a great difference between that and having a field of horses to contend against. One and three-quarters seconds is something of an undertaking, and yet we think there is a California bred colt which will be able when four years old and with 91 pounds up to make a mark in favor of the Occident.

Gibraltar scarcely ever in a race fails to show that he is a wonderful horse. In the race with Corrette and Weigle last Saturday, at the Oakland Trotting Park, he forced Corrette to 2:20, and was so close up that the race was apparently doubtful until the last moment. The most acute critic of the "looks of a trotter" could scarcely believe it possible for him to go the pace, and fewer still concede that "gameness" was his forte. The young pacing mare, too, gave evidence that she is certain to take a front rank in the grand army of side wheelers. This was her second race, and though in the second heat Weigle went at her from the score, took the track and went whirling to the half in 1:08, it did not disconcert her in the least. She drew up to him at will and won quite handsily in 2:19. She had just recovered from an attack of the "pink-eye" and it seems reasonable to expect much from her in the future.

Fred S. Butler, the artistic member of the "Cordelia Shooting Club," has produced a very handsome picture of all the members of the club composed of the following members: Pres., E. T. Bent; Secy., Fred S. Butler; Commissary, C. W. Kellogg; Harry Babcock, T. C. Friedlander, Wm. S. Bradford, Ward McAllister, John K. Orr, W. McPherson, Hall McAllister. Their headquarters are on the Yacht Lolita, which is in charge of Chas. Chittenden at Teal Station. Some of the members left for the happy hunting grounds Thursday to be on hand for the opening day. Among them are Messrs. Bradford, Kellogg, Orr, Babcock and H. McAllister.

HERD AND SWINE.

Pure-Bred, Thoroughbred and Full-Bloods.

In answer to the questions as to the number of crosses it requires to produce a thoroughbred animal, and as to the difference between a full-bred and a thoroughbred, the *Prairie Farmer* gives us the following full and explicit replies:

"1. A pure bred animal is one that has descended from a pure original race without admixture of other blood. The Devons are a pure race of cattle. The wild cattle of Chillingham may be called a pure race. The true Arabian horse is a pure race. Wild animals are pure races.

"3. A thoroughbred is an animal originally of mixed lineage, but which has been interbred so long without recourse to foreign sources, that the progeny comes true or nearly true to the type established. The Shorthorns and Herefords among cattle, and the racers among horses arising from a mixed lineage, are thoroughbreds. That they have not yet ceased the endeavor to improve these breeds, through the careful selections of sires and dams, always carefully within the line of the oldest and well defined blood of the varieties from which they originally sprang, is proof that breeders do not believe that their ultimate excellence has been reached.

"3. The term full blood indicates neither purity of blood nor thorough breeding, except relatively. An animal of the common blood of a country may be bred indefinitely to a pure blood, and yet never reach purity. The first would be one-half blood; the third cross seven-eighths blood; the fourth cross, fifteen-sixteenths; the fifth thirty-three-sixty-fourths of the pure or the thoroughbred blood, if none other had been used in the cross. Yet the resulting progeny would always contain a fraction of the original or pure blood. Yet often seven-eighths, and especially those fifteen-sixteenths bred, show the characteristics, to a great degree, that none but experts can distinguish from outward observation between the full blood or thoroughbred type. Hence seven-eighths and fifteen-sixteenths bred animals are by courtesy called full-bloods. A grade is an animal containing some pure or thoroughbred blood. A seven-eighths grade is sometimes called high grade."

Green Feed for Pigs.

The writer is raising about fifty pigs, which he hopes to market about Christmas or New Years, especially if the remunerative prices still prevail, and they will. These pigs were farrowed in June, and have been kept growing from the start. They are a mixture of Berkshire, Poland-China and Jersey Red. But at the present and rising prices of corn, and with the prospect of not one-fourth of a crop, it seems quite a difficult thing to make pork. We are giving these youngsters and their mothers three barrels of soft feed per day, consisting of a mixture of milk (in moderate amount), a dash of ground oil-cake, bran, corn-meal and water—the percentage of the last article being very large. In addition to this, in a sly nook, inaccessible to the sows, the pigs are treated to a peck or more of shelled corn and two or three pails of sweet milk per day. It is simply wonderful how quite young pigs will get away with the old corn—and how much good it will seem to do them. But the biggest and best element of food these porkers, old and young, are getting, is all the green oats and peas they can consume, in addition to the above. We sowed about an acre and a quarter with oats and peas, in proportions as nearly equal as possible. As soon as they had grown tall enough to make a swath we began mowing them for these sows and pigs, although it seemed scarcely economical to do so. The high price of corn, however, left no other alternative. We have still left enough of this green food to last a week or more, and after that the old ones will have jewelry put in their noses to prevent them from rooting, and the herd will be turned on an early mowed meadow, where the young clover will be eight or ten inches high. Very soon after the older pigs will be weaned. We have a field of sweet corn for the sows and pigs, from which we shall very soon begin to draw such supplies as they will need. Later, we intend to have as much green rye as our stock can eat.

Upon this regimen our breeding sows have kept "in good heart," not getting thin and weak, while the pigs have been growing without any sort of check or hindrance. There is not a runt or stunted pig in the entire lot. If we get any corn to finish off with we expect them to weigh upon an average two hundred pounds each by the 1st of January. But if the corn crop fails, as it now seems there is immediate danger of its doing, our hogs will be fit for the cleaver before our green food gives out. And that is the way we raise our pigs this year; not expensively, for this green feed, which costs next to nothing at all, is now, and has for several weeks been the main reliance—the sheet anchor, so to speak, of our this year's venture in swine. It would simply astound those people who keep their pigs on corn and water in close pens, up to their eyes in mud and manure, thus inviting the cholera to come every day in the year, to see the satisfied way a quiet young pig will devour a large green pea vine, made still more succulent and refreshing by the morning dew! The way to make cheap and healthy pork is to provide such green food as we have mentioned, and then so feed the animals that their appetites are always kept sharp and exacting.—Hon. Charles Aldridge, in the Iowa Homestead.

SHEEP AND CATTLE IN OREGON.—A Cattle buyer reports to the Greenville (Plumas county) *Bulletin* that beef cattle in Oregon are very scarce and consequently high. Sometimes a buyer can strike an Oregonian who will let beef cattle go at 4 cents a pound, on foot, but a well posted seller wants 7 cents. The dealer spoken of by the *Bulletin* says he left a buyer in Oregon who wanted to invest \$10,000 in beef cattle, but had not found enough animals to make it an object to invest. The beef-steak will soon be only obtainable by a millionaire or by a newspaper man, which is about the same thing. On the other hand the *Eastern Oregonian* states that there are 300,000 head of sheep at present in the mountains, all owned in Umatilla county. These sheep are worth on an average \$2 each, making a total of \$600,000 for one of Umatilla's branches of business. There were driven out of the country this year nearly 100,000 sheep and there still remain in the country, it is said, 500,000 head of sheep. So if beef becomes scarce they can fall back from the juicy steak to the tender mutton chop.

By a gentleman just returned from an overland trip to San Louis Obispo, we are informed that a mysterious disease is making havoc among cattle in that country. The animals which are attacked by it die suddenly and swell within a few hours after death to an enormous bulk. Dissections of the carcasses reveal nothing as to the causes of the disease.—*Monterey Democrat*.

A Safe Investment.

We count that the highest style of cattle rearing in which the farmer breeds, rears and fattens the cattle which he markets. In many cases we believe this course will give the best profit, but it is not adapted to the circumstances of all farmers. There are many for whom it is best to purchase the grown animal and fatten it. There are localities in which trial shows that animals can be bought for feeding to better advantage than they can be reared.

Just now many are hesitating whether to buy. It may be questionable whether much profit will result from fattening cattle this fall or winter, if they must be bought at full prices. But it seems to us, all the indications are that the purchase of young stock, of fair quality, at present prices, will prove a good investment to farmers who have a good supply of grass, and of "rough feed" for the winter. Making no attempt to predict prices, it seems certain that there can not be an over supply of good cattle ready for market next year. We may have as high-priced corn next year as we now have, but this is improbable; as next year's crop will probably be larger than that now growing. Compared with the price of good fat cattle, prices for young stock are low.

There is force in the saying that "young stock will grow up to their price, even if that be too high." A half cent or a cent per pound on a grown steer is an important matter; on a calf or yearling it is of much less consequence. Increase of weight is nowhere made so easily and so cheaply as on a good pasture. Yet we have known men, even with unstocked pastures, delay buying until the season was nearly over, paying for two or three hundred of pounds more than would have been necessary had the animal been bought in the spring.

Late in the season, delay is frequently advisable. Many farmers are so unfortunately situated that they are compelled to sell when the season of grazing is over. So that prices are often lower in November than in October. Again, the buyer in early winter often pays for less pounds than if he had bought from the grass, with the cattle full of "sap." Inexperienced breeders are sometimes sorely perplexed at the slight gain of their stock in the early winter. Shrewd buyers understand the reason and are often able to take advantage of it.

We repeat our belief that the purchase of good young stock now is a safe investment, where there is a good supply of food for the autumn and winter.—*Eastern Exchange*.

The Polled-Angus Craze.

The craze for the Polled-Angus cattle continues without signs of diminution. American buyers are purchasing everything that can be secured in Scotland, and the breeders of the black hornless cattle are gradually putting up prices. The cattle thus far brought to this country are certainly worthy representatives of the polled breed, which has within the last two years come into such prominence. Within the last three or four months over three hundred polled cattle have been brought to American and Canadian ports and quarantined, and as fast as the rules of the quarantine can be complied with and the cattle pass the inspectors' examinations they have been forwarded to the farms of the breeders, who see in this breed of cattle the foundation of a class which will at least equal any of the best known families thus far introduced into America.

Several small herds have gone into Nebraska; Iowa breeders have not invested to any great extent, while Illinois and Indiana breeders seem to have thus far taken the lead in point of numbers exported. It is not probable that breeders can afford to raise the pure strain of Angus, the money to be realized from their ownership coming, as a matter of course, from judicious crossing upon native stock. It will be several years before the cross will begin to show itself, and the result will be watched with great interest, particularly on the great western plains and ranches.—*Chicago Tribune*.

Premiums Awarded at the Petaluma Fair.

Class 8—Thoroughbred Cattle.

J. B. Redmond, best Durham bull 4 years old or over, Little Pat, \$20.
Page Bros., best Durham bull, 2 years and under 3, Cherry Prince, \$10.
Sylvester Scott, best Durham bull 1 year and under 2, Royal Oxford, \$8.
J. B. Redmond, best Durham bull calf, Orion, \$5.
Page Bros., best Durham cow 4 years old or over, Belle Christmas, \$15.
Page Bros., best Durham cow 3 years and under 4, Rosetta, \$10.
Page Bros., best Durham heifer 2 years and under 3, Belle Sonoma, \$8.
J. B. Redmond, best Durham heifer, 1 year and under 2, Queen XIII, \$5.
J. B. Redmond, best Durham heifer calf, Nymph XII, \$4.
J. R. Rose, best Devon bull, 2 years and under 3, Curly John, \$10.
J. R. Rose, best Devon bull calf, Sonoma Boy, \$5.
J. R. Rose, best Devon cow, 4 years old and over, Maud III, \$15.
J. R. Rose, best Devon cow, 3 years and under 4, Ruby, \$10.
J. R. Rose, best Devon heifer, 2 years old and under 3, Lolo, \$8.
J. R. Rose, best Devon heifer, 1 year and under two, Buttercup, \$5.
J. R. Rose, best Devon heifer calf, Winona, \$4.
Jas. Biggins, best Ayrshire bull 4 years old or over, Duke, \$20.
Geo. Bement, best Ayrshire bull 3 years and under 4, Archie, \$15.
Geo. Bement, best Ayrshire bull 2 years and under 3, Lindo, \$10.
Geo. Bement, best Ayrshire bull 1 year and under 2, Macbeth, \$8.
Geo. Bement, best Ayrshire bull calf, Malcolm, \$5.
Geo. Bement, best Ayrshire cow 4 years old and over, Ethel Brown, \$15.
Geo. Bement, best Ayrshire cow 3 years and under 4, Elaine, \$10.
Geo. Bement, best Ayrshire heifer 2 years and under 3, Stellinita, \$8.
Geo. Bement, best Ayrshire heifer, 1 year and under 2, Sultana, \$5.
Geo. Bement, best Ayrshire heifer calf, Sybil, \$4.
P. J. Shafter, best Alderney bull 4 years old or over, Bismarck, \$20.
Mrs. T. M. Chapman, best Alderney bull 3 years and under 4, Billy, \$15.
D. S. Dickson, best Alderney bull 2 years and under 3, Gen. Grant, \$10.
Francis De Long, best Alderney cow 4 years and over, Fashion \$15.

A. P. Whitney, best Alderney heifer 2 years and under 3, Olivia IV., \$8.

Sweepstakes.

Page Bros., best thoroughbred Durham herd of not less than six animals, with one bull 2 years old or over, and not more than one 2-year-old and 1 yearling, owned by one person, Cherry Prince and five cows, \$15.

J. R. Rose, best thoroughbred Devon herd of not less than six animals, with one bull 2 years old or over, and not more than one 2-year-old and one yearling, owned by one person, Curly John and five cows, \$15.

Geo. Bement, best thoroughbred Ayrshire herd of not less than six animals, with one bull 2 years old and over, and not more than one 2-year-old and one yearling, owned by one person, Archie and five cows, \$15.

Class 9—Graded Stock.

I. R. Jewell, best bull 4 years old or over, Duke, \$10.
F. Starke, best bull 3 years and under 4, Valentine, \$7.
Fred Woodworth, best bull 1 year and under 2, El Medico, Jr., \$4.

A. J. Pierce, best bull calf, Poney, \$3.

Wm. Hill, best cow 4 years old or over, Beauty, \$8.

Ralph Woodworth, best heifer 1 year and under 2, Fanny, 4.

A. J. Pierce, best heifer calf, Blossom, \$3.

Class 10—Thoroughbred Sheep.

E. W. Woolsey, best Spanish ram, \$8.

E. W. Woolsey, best five Spanish ewes, \$8.

E. W. Woolsey, best five Spanish ram lambs, \$2 50.

E. W. Woolsey, best five Spanish ewe lambs, \$2 50.

R. H. Crane, Santa Rosa, best Shropshire ram, \$8.

R. H. Crane, best five Shropshire ewes, \$8.

S. W. Keuyon, best Southdown ram, \$8.

R. H. Crane, best five Southdown ewes, \$8.

Robert Crane, best five Southdown ram lambs, \$2 50.

R. A. Crane, best five Southdown ewe lambs, \$2 50.

L. W. Walker, best Cotswold ram, \$8.

Class 11—Swine.

P. J. Shafter, best Berkshire boar, \$8.

Fred Stark, best Berkshire sow, \$5.

R. H. Crane, best China Poland boar, \$8.

R. H. Crane, best China Poland sow, \$5.

Fred Starke, best five pigs of any breed, \$5.

Class 1—Thoroughbred Horses.

J. B. Chase, best stallion 4 years old or over, Wheatley, diploma and \$20.

Wm. Bihler, best mare 4 years old or over, Jeanette, \$15.

C. Underhill, best mare 3 years old or under 4, Nora, \$12.

P. Carroll, best mare 2 years or under 3, Alice, \$8.

C. Underhill, best mare 1 year and under 2, no name, \$6.

M. C. Fisher, best sucking horse colt, Duke, \$5.

C. Underhill, best sucking mare colt, no name, \$5.

C. Underhill, best stallion and six colts, Wheatley and family, \$20.

Class 2—Graded Horses.

S. S. Drake, best stallion 4 years old or over, Admiral, diploma and \$15.

Fred Kuhule, best stallion, 2 years and under 3, Billy Wilson, \$8.

Jos. Biggins, best stallion, 1 year and under 2, Comet, \$6.

Jos. Biggins, best mare 4 years old and over, Katie Watson, \$12.

S. S. Drake, best mare 3 years old and under four, Alada, \$9.

Jos. Biggins, best mare 2 years old and under 3, Fanny Parnell, \$7.

Fred. Kuhule, best mare 1 year old and under 2, Lottie Wilson, \$6.

S. S. Drake, best sucking horse colt, no name, \$5.

Jos. Biggins, best sucking mare colt, Mollie K., \$5.

S. S. Drake, best stallion and six colts, Admiral and family, \$20.

Class 3—Horses of All Work.

Petaluma Horse Breeders' Association, best stallion 4 years old and over, Crown Prince, diploma and \$15.

Pat Hennelly, best stallion 3 years and under 4, Petaluma Prince, \$12.

P. J. Shafter, best stallion 2 years and under 3, Black Prince, \$8.

John Russell, best stallion, 1 year and under 2, Lafayette, \$6.

Willis Faught, best mare 4 years old and over, Dolly, \$12.

J. R. Rose best mare 3 years and under 4, Topsy, \$9.

Willis Faught, best mare 2 years and under 3, Peggy, \$7.

V. Berri, best mare 1 year and under 2, Mary, \$6.

J. R. Rose, best sucking horse colt, McPherson, \$5.

V. Berri, best sneeking mare colt, no name, \$5.

Petaluma Horse Breeders' Association, best stallion and six colts, Crown Prince and family, \$20.

Class 4—Draft Horses.

Theo. Skillman, best stallion 4 years or over (Duke De Chartres barred) Tornado, diploma and \$15.

A. J. Pierce, best stallion three years old and under 4, Charlemagne, \$12.

S. Gilmore, best stallion 2 years and under 3, Pollock II, \$8.

P. McAuliffe, best stallion 1 year and under 2, Young Duke, \$6.

Wm. Bihler, best mare 4 years and over, Doll, \$12.

Wm. Hill, best mare 2 years and under 3, Annie, \$7.

Theo. Skillman, best mare 1 year and under 2, Gertruda, \$6.

S. Gilmore, best sucking horse colt, Pride of the West, \$5.

J. Dauber, best sucking mare colt, no name, \$5.

Petaluma Horse Breeders' Association, best stallion and six colts, Duke De Chartres and family, \$20.

Class 5—Roadsters.

Wm. Bihler, best stallion 4 years old or over, Grey McClellan, diploma and \$15.

Wm. Bihler, best stallion 3 years and under 4, Buck Foster, \$12.

P. J. Shafter, best stallion 2 years and under 3, Greyson, \$8.

P. J. Shafter, best mare 4 years old and over, Julia, \$12.

Wm. Bihler, best mare 3 years and under 4, Deby Mott, \$9.

Wm. Bihler, best mare 2 years and under 3, Sally, \$7.

G. W. Savage, best colt 1 year and under 2, sired by a roadster stallion, Eureka, \$6.

F. W. Loeber, best stallion and six colts, Whippleton and family, \$20.

Class 6—Standard Trotters.

P. J. Shafter, best stallion 4 years old or over, Rustie, \$15.

Class 7—Carriage and Saddle Horses and Jacks.

A. H. Fraser, best matched carriage team, sixteen hands or over, owned and used as such by one person, Dick and Aleck, \$15.

F. W. Loeber, best single buggy horse, no name, \$7.

J. Conway, best saddle horse, three distinct gaits, Bony Boy, \$5.

Sylvester Scott, best jack, Monarch, \$10.
Sylvester Scott, best jennet, Fanny \$8.

Class 12—Pure Bred Poultry.

Morris Brothers, best exhibit not less than five varieties, \$10; best pair light Brahma fowls, \$2 50; best pair dark Brahma fowls, \$2 50; best pair Partridge Cochins fowls, \$2 50; best pair black Cochins fowls, \$2 50; best pair white Cochins fowls, \$2 50; best Plymouth Rock fowls, \$2 50; best pair white Leghorn fowls, \$2 50; best pair white-faced black Spanish, \$2 50; best pair black and white crested Polish, \$2 50; best pair silver spangled Hamburg fowls, \$2 50; best pair black Hamburg fowls, \$2 50; best pair black-breasted Game Bantam fowls, \$2 50; best pair sea-bright Bantam fowls, \$2 50; best pair Bronze turkeys, \$5; best pair wild turkeys, \$5; best pair white Holland turkeys, \$5; best pair Toulouse geese, \$3; best pair Bremen geese, \$3; best pair Poland geese, \$3; best pair Guinea fowls, \$2 50; best pair Peacocks, \$3.

Mrs. Wm. Hill, best pair Buff Cochins fowls, \$2 50; best pair black African Bantam fowls, \$2 50.

L. C. Byce, best pair brown Leghorn fowls, \$2 50.

W. D. Freeman, best pair gold spangled Polish fowls, \$2 50; best pair golden spangled Hamburgs, \$2 50; best pair Houdan fowls, \$2 50.

T. B. Carey, best pair black-breasted Game fowls, \$2 50; best pair brown-red Game fowls, \$2 50; best pair blue Game fowls, \$2 50.

G. W. Ward, best pair China geese, \$3.

E. K. Evans, best pair Pekin ducks, \$2 50.

J. K. Fix, best pair Muscovy ducks, \$2 50.

Class 2—Carriages, Buggies and Wagons.

Wm. Zartman & Co., best exhibit carriages, buggies and wagons, \$20.

R. Spotswood & Co., second best exhibit, \$12.

Wm. Zartman & Co., best family carriage, \$10.

Wm. Zartman & Co., best open buggy, \$8.

D. W. C. Putnam, best breaking cart, \$4.

E. Hopes, best spring wagon, \$8.

H. Pimm, best carriage painting, \$8.

Gwinn & Brainerd, best carriage trimming, \$8.

Class 3—Saddlery and Harness.

Gwinn & Brainerd, best exhibit saddlery, diploma and \$15.

Gwinn & Brainerd, best set double harness, \$7.

Gwinn & Brainerd, best set single harness, \$5.

Gwinn & Brainerd, best saddle, \$4.

Class 4—Agricultural Implements.

E. J. Holly, best cultivator, \$5.

Wm. H. Worth, best cheese press (honorable mention for cheese press screw), \$5.

CRICKET.

The Australians in England.

In the way of cricket the visit of the Australians to England has given an immense impetus to this healthy and inspiring game. The colonists have played havoc with the county teams and other organized clubs of the second class. The great match of the players of England and the Australians the former won in one inning, with thirty-four runs to spare. Afterwards they took their revenge in vanquishing the gentlemen players also in one inning, with a run to spare, and strange to say, there was the same record in 1878, when the gentlemen beat the Australian team. They will return home through the United States, and will play two or three matches in New York and Philadelphia before leaving for San Francisco. At a rough estimate they have as yet captured some twenty-eight games, losing only three or four, and the Cambridge University team, of which we take the following account from the *Referee*, was one of the best contested of the entire series:

Remembering that the members of Cambridge university have on two occasions defeated formidable elevens emanating from Australia, it is no wonder that such a contest as the above caused considerable interest in the cricket world. The team selected on this occasion to represent the Light Blues was a very strong one, though it was not quite the same as advertised. Mr. J. E. K. Studd being unable to play on account of indisposition, Mr. C. H. Alcock, who has never gained the "blue," but has made a lot of runs in minor matches, figured in his place. On the side of the Australians Messrs. Palmer and Giffen were missing, and Murdoch kept wicket in place of Blackham. The United Service Recreation ground was very carefully prepared for the event, the wicket having been rolled and watered daily for some weeks past. Heavy rain fell here on Wednesday, however, and this made it rather slow and holding, but it played fairly well throughout the day. The Australian captain won the toss, but after a careful examination of the wicket he elected to put in his opponents. Whether this was good judgment is doubtful, as the Light Blues succeeded in obtaining 196 before they were dismissed. The wicket played none too well, especially towards the close of Thursday's play. The batting of Mr. Lucas was the feature of the combined team's innings; it was a piece of undoubtedly bad luck his being run out. Mr. Thornton hit freely, and with greater judgment than usual, and both Messrs. A. Lyttelton and C. T. Studd met the bowling in good style. On the conclusion of the first day's play the Light Blues had finished their innings for 196 runs, and the Australians had scored 27 for one wicket, Jones, who had played a ball into his wicket, after scoring four runs. When time was called, Blackham was not out sixteen, and Garrett six. On Friday the wicket had not quite recovered itself, and was still slow; there was, nevertheless, a capital day's cricket. The Australians did not do nearly as much as might have been expected, and the total of the innings only amounted to 141, or 55 behind their opponents' score. Blackham and Bannerman played capably, but received little assistance. C. A. Smith, the young Sussex amateur, was put on late in the innings, and bowled remarkably well, taking four wickets for sixteen runs. Murdoch was bowled without making a run. In the second innings of Cambridge the Australians bowled admirably, and the score was increased with considerable difficulty. The Hon. Alfred Lyttelton, however, played splendid cricket, showing excellent defense, hitting out well whenever an opportunity presented it. He was still not out at the call of time, and had made 59. The contest was resumed to-day in dull weather and in the presence of a moderate company. Then the score stood—Cambridge, first innings, 196; second innings, 131 for six wickets. Australians, first innings, 141. At five minutes past twelve the brothers Lyttelton continued the Cambridge batting to the bowling of Boyle and Spofforth. Mr. Alfred Lyttelton was caught by McDonnell at slip-off Boyle for 60, including six 4's, three 3's, and five 2's. Mr. E. Lyttelton was finely caught at mid-on by Boyle off Spofforth for 8. Mr. Alcock, played on from Spofforth for 7. Mr. Smith was bowled by Spofforth for 0, and the Cambridge second innings closed on 152 at 12.35. With 207 to get to win, the Australians sent

in Bannerman and Massie to open their second innings. Massie was bowled after making 6, Bonnor hit tremendously, and put an altogether different appearance on the game. He ought twice to have been caught at slip, but his play was wonderfully vigorous. Of course the Cantabs tried several bowling changes, but Bonnor held them in check for a long time, and it was not until he had compiled 66 that he was caught and bowled. His innings was made up of four 6's, six 4's, three 3's, a 2, and seven singles. Jones gave little trouble, but Murdoch and Bannerman played steadily and well, and took the score up to 153 before the latter was caught behind the wicket for a patiently-played 30. With six good wickets to fall, and sixty-five runs to get to win, it seemed certain that the Australians would gain a victory, but the game took an extraordinary turn in favor of the Cantabs, who bowled and fielded splendidly. Murdoch was caught at slip for an admirable 43, and then in quick succession Horan, Blackham, McDonnell, Garrett and Boyle were dismissed, the innings closing for 187. Thus the Cantabs proved victorious by twenty runs, amidst a scene of the wildest excitement. Score:

THE BREEDER AND SPORTSMAN is the title of an elegant sixteen-page weekly journal, published in San Francisco, the initial number of which has just made its appearance. The engraved heading of the BREEDER AND SPORTSMAN is the prettiest piece of work in that line that we have ever seen. The artist has won a genuine triumph, for he has not only incorporated in his beautiful design water and foliage, fruit and blossoms, fine horses, cattle and dogs, but all the emblems and symbols of sporting life. Joseph Cairn Simpson, the veteran turfman and accomplished gentleman, is the proprietor of this new venture in the field of journalism. He is supported by an able corps of writers, all of them well trained in the several departments over which they have been called to preside. THE BREEDER AND SPORTSMAN deserves and will achieve success. Its field is large and remunerative. Each of the San Francisco and Sacramento dailies dishes up a weekly pot pourri of sporting news. There are the *California Spirit of the Times*, the *Pacific Life* and the *Olympian*—all specially devoted to the subject and making fortunes rapidly for their owners. The thirst of the California public for sporting intelligence, however, remains unappeased, and Mr. Simpson's splendid journal comes in to relieve the stress. An attractive feature of the new paper is the appearance each week of a drawing of some one or other of the "Notable Horses of California"—Mr. Winters' Ducness of Norfolk leading off in the first number. The Breeders of the Pacific Coast, from the Columbia to the Colorado, and from the Sierras to the sea, should now stand in with Joe Simpson and make this journal a financial success. He has done more than any other man in America to elevate the turf and advance the breeding interests of the Pacific Coast.—*Territorial Enterprise*.

TRICKETT'S TALK.—On his return to Australia Edward Trickett was received with open arms, and the committee of reception put \$2,000 in his vest pocket "just for luck." Trickett said it was impossible for him to express his thanks for the hearty reception he had received in coming home as a defeated man. He was so sanguine of success that, when beaten, it was a deathblow to him. He was assured they all felt it very much, but not worse than he did. He believed he could beat Hanlan, and tried him a second time, but had failed. In Canada he was treated thoroughly well, and had met with a hearty welcome in England. He did not succeed in meeting Hanlan in Canada, and had to return to England to suffer a second defeat. [Cheers.] It was a pleasure to find his old friends standing by him with all friendship, as though he were going away, and that they thought none the less of him on account of his defeat. Although he thought he could beat Hanlan in the first contest, he was worse beaten on the second. Trickett said that Hanlan was the greatest rower in the world, and superior to anything he had ever witnessed. When he defeated him (Trickett), he could not altogether understand how it was done, and undoubtedly he was the greatest man in the world. "I laughed," said the speaker, "at the idea of this little man beating me, but, by Jove, he did."

HOOTING THE JOCKEYS.—The English have a rough and tumble style of showing their displeasure at a steal, that is surprising to an American who is accustomed, under such circumstances, simply to talk about the matter in a manner more or less profane. Thus we find that recently at Egham racecourse (the Runnymede of Magna Charta fame) the three-year-old stakes caused a great sensation in consequence of the general body of the public being unaware of the fact that Mr. Evans, as part owner of Marden and sole owner of Refiner had declared to win with the former, who carried his colors, and had copious odds laid on him. The declaration came too late for everybody to know of it, and the uninformed not only hooted the jockeys of both Marden and Refiner as they returned to the place of weighing, but took serious liberties with Cranham, the jockey of Refiner.

THE BREEDER AND SPORTSMAN is the name of a new weekly paper, conducted by Jos. Cairn Simpson, and published at San Francisco, Cal., at five dollars per annum. The first copy is at hand. For beauty of typography, extent and variety of matter, and general make up, it is unexcelled by its contemporaries. Mr. Simpson is author of a popular book, called "Horse Portraiture," and for more than a quarter of a century has been a popular writer on horse and sporting matters. He is admirably qualified to conduct such an enterprise, and the breeders of the Pacific Coast are to be congratulated upon having so able and gifted a champion of their interests.—*St. Louis Rural World*.

POULTRY.

The Care of Poultry.

Many mistakes are made in the management of fowls. On most farms no person has special charge of the fowls. Some one looks carefully after the wants of the horses, sheep, cows and pigs, but the fowls are often left to take care of themselves. Young chickens, ducks and geese demand constant care, or many of them will die from exposure and other causes. It is as necessary for success to have some one in charge of the poultry yard, as of the barn, stable and pig pen. A person too young or too old for hard work in the field or house can generally be found who can take care of fowls at small expense. Another mistake is in keeping birds until they are too old to be profitable. Chickens will generally bring a higher price when they are large enough for the gridiron than after they are more mature. By selling them when they are quite young many losses are prevented and much food saved. Male birds should in every instance be sold as soon as they get their growth. They should never be kept till after they are mature except for breeding purposes. Young hens, ducks and geese lay more eggs than old ones, and are consequently more desirable to keep for other purposes than for sitting on eggs and taking care of young. Another mistake is made in trying to keep fowls in the same building with farm animals. They should for a variety of reasons be kept in quarters by themselves. By adopting the practice of early marketing a great saving can be made in the matter of affording protection. Still another mistake is made in not furnishing a variety of food for fowls. They generally eat too much corn and not enough fish, meat, vegetables and small grain. There is generally more profit in feeding milk to fowls than to any kind of animals.

YACHTING.

Types of Models.

The old and long-continued discussion on the question of deep and shallow models for speed in yachts will hardly ever be concluded. The advocates of each type can see nothing in the other. The man with the deep yacht calls the other type a skimming dish and a wash bowl; the man with the centerboard yacht calls the other one a "lead mine," "a plank on edge," etc. Whenever the deep cutter wins a race there is great rejoicing among the keel men; but this is quickly turned into mourning by the defeat which is sure to follow. Last season in eastern waters the Madge seemed to show that keels were in the ascendancy. This year the Maggie came over to tackle bigger boats, and, being confessed the best 15 tonner in England, it was thought she would clean out our centerboards without trouble. But this was found to be a mistake. She won one or two races and then was beaten two days in succession. The race with the Viper was even in every particular but she was badly beaten; the cutter Oriva was also beaten by the centerboards. During the recent cruises of the New York and other clubs great interest was shown in this question of type. It will be of interest to see what a correspondent of the *Spirit of the Times* has to say in this direction, as he has been with the yachts and has had an opportunity to compare the vessels as they sailed:

In the race of Monday, the squadron race, the Maggie was beaten, not only by the New York sloop Vixen, which led her over twenty-four minutes, but by the Boston sloop Hera, which beat her over five minutes. What then? Shall I say that the larger cutter which Mr. Warren expects to bring over here next season will not beat the Fannie or the Gracie? By no means; but this I will say, that with strong breeze and smooth water I don't believe that there is a cutter afloat that can beat the Fannie or the Gracie. Should the race, however, take place in the fall, with a reefing breeze and a jump of a sea, I think that the cutter would win.

This cruise of the New York Club has been an important one, as determining definitely the advantages of different types of models, and the conclusion is, as it has ever been, that for our ordinary cruising weather in our yachting months of June, July and August, the broad, shallow centerboard is the best. That she is the more comfortable has never been denied; that she is, on account of her light draughts, handier is evident, and the only reason that could by any possibility be offered why we should change our broad, comfortable and convenient centerboard boats for the narrow, uncomfortable and inconvenient deep and expensive keel boats, was that the latter were the faster. This cruise has demonstrated that they are not. That skimming-dish of the skimming dishes, Fanny, defeats the Oriva; the Vixen beats the Maggie, and in the passage from New Bedford to Vineyard Haven, that skimming-dish the Madeleine, with only working canvas, and that gray with extreme old age, comes up with and goes through the lee of the new and deep schooner Montauk, equipped with racing canvas brand new; and the Haleyon, another skimming dish, wins the Marblehead regatta.

While sailing against second-class boats both the Montauk and the Maggie won races with ease, but the Montauk had never been matched against the Palmer, Madeleine or Columbia, our three fastest schooners, and the Maggie had not been matched against the Vixen, Regina, Fanita, or Valkyr, our four fastest sloops. Never since the first cutter was built in this country has this type of boat done as well in comparison with the centerboards as has the Oriva during this cruise, and I have been quick to note and comment on her success; but she was beaten by the Vixen in the New London race, when both were classed together, and was also beaten by the Vixen in the race of last Monday, when they were classed separately, the elapsed time of the Vixen being less than that of the Oriva. Here, then, is the result as clearly demonstrated as anything can be. In extremely light weather, when our boats will hardly get steerage way, the cutter will go a little, and will beat them in a reefing breeze, and in a sea the cutter will beat a centerboard. In our ordinary cruising weather and water—and such as we have had during the late cruise is a fair sample—the beamy centerboard will beat the cutter. As I stated in my last, the result of the cruise will be the introduction of an improved model, which will be, as I stated some years ago, a deep centerboard boat of ample beam.

The idea that you can't combine beam and depth and secure speed has been exploded by the success of the Montauk, which stands to-day the queen of the fleet, and will retain the title unless challenged and beaten by the Madeleine or Columbia, and the idiots who have favored the introduction of the abortions of the British fleet, on the assumption that their narrowness gave them speed, quite overlooked the fact that in all cases the builders of these boats gave them all the beam possible and would gladly have given them more if the class had permitted.

I see by the papers that the cutter Bedouin, built by Piegras for Mr. Rodgers, has been launched. I trust that an

extreme racing rig has been put upon her, and that she may develop a speed superior to the Gracie or the Fanny.

I fear, however, that the British idea of rig—correct enough there—will be found too limited for our weather and waters, and that, for the first season, the Bedouin will be a failure.

The Pacific Yacht Club Regatta.

The second annual regatta of the Pacific Yacht Club on Saturday last was in some respects the best ever held on this bay. The day was delightful and there was a good breeze all over the course, lighter however to leeward, as usual, than it was in the channel. There were five large schooners matched against each other, and there was one sloop and a yawl. The fleet looked very handsome indeed, as light sails were carried wherever possible. The only thing to mar the interest of the day was the confusion which resulted from most of the yachts being behind time at the start and the unfortunate misunderstanding which this occasioned in the end.

The gun fired promptly at 1 P. M. when the judges, Messrs. Eckley, Kelly and O'Connor, stood on Mission Rock wharf to see the yachts pass the line.

The first to make her appearance was the splendid big yacht Aggie, belonging to Vice-Commodore Macdonough, the largest one of the fleet. She went by under a cloud of canvas, carrying in addition to her working canvas both fore and main gaff-topsail, staysail, balloon jib and a watersail on her main-boom. The sloop Annie followed, with working sails, balloon jib and topsail. Then came the schooner Whitewing, with balloon jib, staysail and topsail. Commodore Floyd's schooner Ariel then came along, with balloon jib, watersail on main-boom, and a very large staysail. Following her came the Fleur de Lis, with a balloon jib, staysail and topsail. The Elia, with her new yawl-rig, went by next and the favorite Nellie brought up the rear. The Nellie had in addition to plain sail a balloon jib and a very large staysail, which set very well and did its work finely.

The only yacht which went over the line at the proper time was the Aggie, as the rules of the race required that all which were not past the line within fifteen minutes after gun-fire should have their time taken as if they had gone by fifteen minutes past. All the time therefore, after the fifteen minutes, was a dead loss to them.

The Aggie crossed at 1:09:13, so she was within limits. At the end of the fifteen minutes there was not a yacht in sight from the judges' position, all coming up behind Mission rock with a head tide and not too strong a breeze.

The judges were afraid the race would be spoiled, so it was informally agreed to take the time as they passed and ignore the fifteen minute rule. At all events the referee called out the time as they went by, the official timer called the time and the official time-keeper took it down, as the yachts actually passed. Everyone supposed therefore—until some time afterwards—that the fifteen minute limit rule was suspended or ignored. The Annie passed at 1:18:24; Whitewing, 1:19:37; Ariel, 1:20:55; Fleur de Lis, 1:21:08; Nellie, 1:24:30, and Elia, 1:23:13. The wind lightened along under the lee of the rolling mills and sugar refinery, and some were nearly becalmed. The Aggie, the largest, was far ahead, the rest being in a bunch. The breeze was steady and not strong, and all light sails were carried. From the start to Hunter's Point, the Ariel beat the Aggie 1:22, the Nellie 2:39, the Fleur de Lis 2:45 and the Whitewing 3:16.

From Hunter's Point to Oakland was a pretty sight but there were no special features to notice except that the Ariel continued to gain, and from the start to Oakland beat the Aggie 3:15, the Nellie 2:46, Fleur de Lis 2:59, and Whitewing 4:12.

When the yachts got their sheets aft rounding the leeward stake boats they all stood along a short distance to get everything fairly set and then most of them made a short hitch on the starboard tack, the Annie, however, standing on direct for Goat Island. The Fleur de Lis, failing to pass the Whitewing, and being close on her weather quarter, also tacked and started after the Annie.

None of the yachts passed along the city front. They kept out in the ship channel and even to leeward in that. The Aggie, way ahead, led out into the channel, standing out as far as Blossom Rock before tacking down towards the Fort.

The Ariel, Whitewing, Fleur de Lis and Annie all kept to leeward, weathering Goat Island by about a mile, and then standing out into the channel, heading on the port tack for Sheep Island. The wind gradually let them up, however, so they could point to windward of Angel Island while on the same tack.

The Ariel and Nellie stood on, the wind, letting them gradually head up until they pointed for Saucelito, all this time without making a tack. They stood on up until abreast of the light of Richardson's bay before tacking to fetch the stake boat, which they did on the next leg. The Fleur de Lis, Whitewing and Annie kept down in the main channel to the southward of Alcatraz, following the Aggie. This yacht rounded the Fort Point boat first and the others followed in the order named in the accompanying table, all setting light sails as helms were put up and sails eased off. The time made in beating to windward was as follows:

	hr.	min.	sec.		hr.	min.	sec.
Aggie.....	1	8	39	Fleur de Lts....	1	18	30
Nellie.....	1	16	10	Annie.....	1	23	52
Ariel.....	1	17	25	Whitewing.....	1	24	43

The Aggie here beat the Nellie on this stretch 7 minutes, 31 seconds.

The wind gradually lightened as they ran to leeward and it was much lighter off Goat Island. The Aggie ran into the light wind first and the others crept up to her. But she also ran into the stronger breeze beyond the stake boat first and again crept away from those yet in the light breeze. The strong wind she carried home as they all did when they struck it. The run to leeward was made in the following time:

Boat	M.S.	Boat	M.S.
Nellie.....	64:07	Fleur de Lis.....	66:16
Whitewing.....	65:24	Annie.....	66:21
Ariel.....	65:40	Aggie.....	68:56

When abreast of Goat Island the Aggie met, as we have said, light winds, which accounts for her position on the list.

The Aggie passed over the line first, followed by the Ariel. Then the Nellie came along, the Annie, Fleur de Lis and Whitewing following in order named.

Some one in the crowd with the judges called out when the Nellie passed by that she had beaten the Aggie over two minutes, whereupon one of the judges announced that the Nellie had done no such thing as her time was to be taken at 1:15 instead of 1:24:30. As she had really started 9 minutes and 30 seconds behind this, it was just so much added to the time and gave the prize to the Aggie. This rule was

eventually enforced. Instead therefore of the Nellie winning first prize, Aggie second, and Annie third, the judges' ruling gave first prize to Aggie, second to Nellie, and third to Annie.

In our table, the "actual time" gives the figures of actual time as well as the real time of starting given in the first column. The "corrected time" shows the real result, the allowances being taken off. The judges' time shows the yachts as if they had all except the Aggie started at 1:15.

The following table shows the record of the race.

Judges' Time...	Corrected Time.	Actual Time....	Home.....	Hunter's.....	Oakland.....	Fort.....	Oakland.....	Hunter's.....	Start.....	YACHT.
3:35:37	3:35:37	3:35:37	4:44:50	4:22:46	4:01:35	3:02:39	1:54:00	1:32:52	1:09:13	Aggie.....
3:47:30	3:47:30	3:47:30	5:02:58	4:37:48	4:15:41	3:19:52	2:09:27	1:43:12	1:20:55	Ariel.....
3:42:03	3:41:05	3:42:03	5:07:35	4:42:04	4:19:05	3:24:58	2:09:38	1:49:26	1:24:30	Nellie.....
3:42:17	3:42:17	3:42:17	5:13:21	4:44:12	4:20:25	3:24:09	2:05:39	1:46:10	1:21:08	Fleur de Lis.....

3:50:53	3:50:53	3:50:53	5:22:27	4:52:26	4:28:55	3:32:04	2:09:12	1:47:14	1:18:34	Annie.....
3:45:41	3:45:41	3:45:41	5:22:27	4:52:26	4:28:55	3:32:04	2:09:12	1:47:14	1:18:34	Elia.....

By reading the column "corrected time" the result of the race from actual sailing with usual allowances will be seen. By reading judges' time it will show how prizes were awarded on the decision before alluded to.

As to this decision, it has given rise to great discussion. The original rule should have been adhered to, but it was not. Once broken, however, the judges had no right to turn to it again after the end of the race, thereby so deciding the result of the race that the first place in it would be changed. No fault whatever could have been found had the rule been adhered to, although in the paragraph of the printed rules, saying yachts must cross within 15 minutes of gun fire, there was no hour named for said gun fire.

Actually, the Nellie beat the Aggie 2m. 50s.; by the judges' time the Nellie was beaten 6m. 40s. by the Aggie, that is, the Nellie was timed as starting at 1:15 instead of 1:24:30 when she did start. It is interesting to note that the Aggie beat the Nellie to windward from the Oakland stake boat 7m. 31s., and the Nellie beat the Aggie to leeward between the same stake boats 4m. 49s. Over the course the Nellie beat the Fleur de Lis 11m. 59s.; beat the Annie 9m. 20s., and beat the Ariel 8m. 18s. It is worthy of note also that not only did the Aggie and Nellie beat the Fleur de Lis, but the Ariel and Annie did so also. The Fleur de Lis beat nothing but the Whitewing. The Lillie only went by one stake boat and evidently never intended to go around, as she had no racing crew on board.

The little Elia came out as a yawl with new sails; her driver set like a bag and was worse than unless. In fact in beating to windward it had to be furlled. Nevertheless her owner, under these great disadvantages, with a new rig, poor sails, and being the smallest yacht, pluckily went around the course, starting way behind. But the judges did not even pay her the compliment of waiting to take her time at the finish, though she was rounding Hunter's as the Whitewing crossed the line, moreover, she got guyed and made fun of in the newspapers. Of course this will encourage him, and others who see the example, to put in small yachts to make up a show in the next regatta. This is one of the reasons why yacht racing has fallen off here as elsewhere, as we have taken occasion to explain in a previous article.

The Aggie was sailed by Dave Wheeler, Ariel by Captain Turner and Captain Murphy; Nellie by Hyde Bowie and Sam McDowell; Annie by Stewart Menzies; Fleur de Lis by Capt. Galloway and Mr. White; Whitewing by Pete Deming and Elia by Fulton Berry.

We understand that Mr. Bowie declines to receive the second prize, thinking himself entitled to the first. Whatever the disposition of the prizes, there is no question that with her legitimate allowance the Nellie beat all the other yachts. She was sailed by two amateurs and had not been cleaned or specially prepared for the race. The two largest competitors were prepared for the race and were sailed by professional sailors. The Turner model therefore showed itself superior in this race to those of Poillon and Fish of New York, Hall of Port Ludlow and Stone and Nichols of San Francisco.

The Annie sailed very well. She too was handled by an amateur and had not been put in the ways to be cleaned. Until the beat down channel she did not show up well, but gradually came forward in going down along North Beach. It was her day exactly and with a good sloop man at the tiller, a clean and smooth bottom, good spinnaker and topsail she could have made it lively for others. Still it is hardly fair sailing her against much larger boats with such small allowance.

The three-quarters of a minute time allowance on the water line is a relic of past ages anyhow and ought to be abolished.

FISH.

A Fishing Party.

Last Sunday morning at 1 o'clock the tug Hercules and the yacht Azalea with a party of forty persons cast off from Mission street wharf, bound for the fishing grounds near the Farallone Islands. The day opened up very pleasant and the party would have had a good time had it not been for a heavy ground swell which made all hands—or rather all stomachs—feel very uncomfortable. Seasickness, like death, leveled all, lawyers, bankers, coal merchants and the prosecuting

attorney, to the lowly bed of misery. A joke is told of Mr. Walter B. Lyon's fishing: Though the sickest of the sick, he was too plucky to return without casting a line; he cast and pulled a large rock cod to the surface of the water, but was too sick to draw it in and there they gazed at each other—both with their mouths open—until Mr. Lyon received help from others of the party. There were about seventy fine rock cod caught on the two boats. The fishers returned to the city at 6 o'clock. Messrs. Seales and Scott were the gentlemen who attended to the getting up of the expedition. Mr. Seales was the only one who did not get sick.

Senator W. W. Traylor has been appointed Fish Commissioner by the Governor, to fill the vacancy caused by the death of B. B. Redding. Mr. Traylor is an enthusiastic angler and it is to be hoped that his health will permit him to give that attention to the duties of his new position which is so much needed and to which his tastes so strongly incline.

ATHLETICS.

Once again the Olympic Club has survived the agonies of the annual election of officers. For several weeks previous to and especially on the actual day of balloting, partisan feeling raged with unusual virulence, and no doubt the younger and more inexperienced members were agreeably surprised last Monday evening to observe the friendliness and good nature of the members present at the installation of the new board of officers. The enthusiasm with which each little extemporaneous speech was received should be an extinguisher of all the "late unpleasantness," and an assurance that every individual member has the welfare of the club at heart, and intends to support the new officers in their avowed intentions, individually and collectively, of raising the reputation of the club one peg higher. The old members are justly proud of its past reputation and stand ready to blow about all future success. The new ones must get their share of credits. With Horace Fletcher at the helm, backed by a board of officers composed equally of old and experienced members and new and enthusiastic ones, the coming year promises to be a red letter in the history of the club. The finest rooms in the world, consisting of a fine gymnasium and running gallery, well supplied with the best paraphernalia known, superintended by unsurpassed instructors in gymnastics, sparring and fencing, a cosy and well-stocked reading-room, elegant parlor for ladies, the best private billiard and chess rooms on the Coast (and William to handicap uncertain games), every employee of the club anxious to make the club-rooms an agreeable place of resort to each individual member; outdoor grounds in Oakland with splendid accommodations for athletics and base ball, and a mine that has yet to acknowledge a single defeat, more attractions promised by the new Board of Directors—well, what more is wanted? The prospects for the coming year are unusually encouraging. As a gymnastic club the Olympic has always been the representative of California, San Francisco, and of the entire Pacific Coast. It now has a membership of fully seven hundred, and should take the lead in athletics, rowing and all other outdoor sports. The seasons on this Coast are so well defined, and the membership of the club so large, that there need be no difficulty in encouraging every department of indoor, and outside, gentlemanly sports, if the members will really take hold in earnest, with the honest intention of helping each other for the benefit of the club. The new board ask the support of every individual member of the club, and have already earnestly undertaken the duties of their positions. Help them out for the next year, and the club will receive the benefit.

Each individual member of the new board of officers in the Olympic Club is much exercised as to the *modus operandi* necessary to secure the gold medal in the officers' race next Saturday. The late secretary has already realized that his present colleagues would smile audibly at any attempt to repeat the little dodge of which he was an unsophisticated victim last May, and is fearful that his diabolical designs on various sections of a brother director's running apparatus will be of little avail against so wary an opponent. Our worthy President consoles himself with the reflection that his dignity will not permit his being roped in a second time by his best friends. He is perfectly willing to sacrifice business and pleasure for the benefit of the club, but no such little job as the last one in his'n. Not much! Any suggestion, between now and next Saturday, that will secure the trophy for the coming year, will be thankfully received and properly rewarded by any one of several ambitious official sprinters.

Last Wednesday evening the Mechanics' Pavilion was filled to overflowing by the friends of the Olympic Club, the largest audience of the season being present. During the progress of the exhibition the entire gallery, and every possible space on the main floor from which a view of the exercises could be had, were crowded by interested visitors. The accident to R. F. Stombs necessitated the omission of some of the best features of the programme. Most fortunately Mr. Stombs was not seriously injured although at present he is a sight to behold and is slightly bearish over his sore head. The club will probably repeat the performance next week, on which occasion he intends to "do the perch" or break something. Financially the affair was very successful.

The art of training is an ancient one, and in early days among the Greeks was quite simple. The regimen consisted chiefly of cheese and figs, and the body was hardened by exposure to all sorts of weather and by frequent plunges into cold water, while oil was daily rubbed over the joints to make them supple. The decadence of sports began with the Greeks, when, through niceties in training, the chances of competition could not be taken by the people at large, and athletic rivalry became purely professional. Athletic sports lose their chief value where skill in them is expected only from those who are paid for exhibiting it, while all others are made either idle lookers-on or foolish betters on the result.

In the 100 yards scratch run next Saturday, Masterson of the Lacrosse Club appears to have a walk-over for the gold medal. With Haley barred there is no amateur on the Coast at present that can compete with him from scratch, if he does as well in a race as he does in private trials. Several members of the Olympic Club think he will weaken when he toes the mark for the actual contest, and do not propose to be beaten by him in worse time than 10½ seconds. That's right; fight it out.

The Bodie champion weight-tosser, who is supposed to be capable of putting a sixteen-pound weight about forty-three feet, is expected to be on the Olympic Club grounds to-morrow. As he is anxious to back himself heavily to put any of the standard weights an extraordinary distance, we

cannot hope to see him extend himself in an exhibition before a few amateurs, but still it will be considerable satisfaction to the athletically inclined members of the club to see him put the above mentioned weight close to forty feet.

R. S. Haley has been training faithfully for some time, with the avowed purpose of making a record for himself and beating club and Pacific Coast records, at two distinct sprint distances. He is still undecided as to whether he will try 100 and 220 yards or 220 and 440 yards. Judging from his recent trials, he will probably lower the present record at 220 yards (his own twenty-three seconds being the best on the coast). J. T. Belcher's fifty and three-fifths at 440 yards requires more strength than he has shown this year, and unless he improves very much in the last two weeks he will surely fail to beat or even equal it, and to do even time at 100 yards, with an exacting starter and prompt timer, he needs to be in the pink of condition. Haley has the natural gift of speed at any distance from 100 to 800 yards, but lacks strength. When he acquires the latter requisite he will be fit to represent the Olympic Club in the best of company.

As an inducement to the amateurs of the Coast, the Olympic club has decided to award gold medals in several events, next Saturday, in open events, to any one beating club or Pacific Coast records from scratch. Haley will probably secure one of them in the 220 yards, and perhaps another in the running wide jump, and will undoubtedly try for another at same standard sprint distance. Slater has long been anxious to distinguish himself at pole vaulting, but has been waiting to capture something more than an ordinary medal. Brown knows all about the running high jump, and wants the pegs raised to a respectable height without any preliminary foolishness. In the other events members of the O. C.—well, they are not talking very loud.

BICYCLE.

The English Championship.

The English twenty-mile professional championship race took place on the 21st of August on the Belgrave Road Grounds, Leicester. We give below an account of the race:

Of the ten competitors who entered, Keen and Duncan were the only non-starters, and at a quarter to seven o'clock the following were sent on the journey: Howell, Wood, Derkinderen, Garrard, P. Kaye, Edlin, Waller and Warwick. Upon the signal being given Garrard rushed off with the lead, followed by Wood, the first lap of the eighty required to complete the distance occupying forty-five seconds. When a mile had been run in three minutes, one second, Garrard was still taking his opponents along at a good pace, and Edlin was first to be in difficulties. At two miles Garrard was at the head of affairs, Warwick bringing up the rear. In the succeeding laps, some capital spurring was witnessed, and at five miles the leading men were Derkinderen, Waller, Garrard and Wood, Kaye, Howell and Warwick lying close up, although the last named did not seem to relish the business. Derkinderen, Garrard, Wood and Howell in turn made the running up to the ten mile (32m. 31s.), but during the next two miles the Newcastle man had changed. At fourteen miles the local man spurred, and the fifteen miles were recorded in forty-nine minutes, thirty-one seconds. Wood still held the lead, closely followed Garrard, Derkinderen, Walter, Howell and Warwick, and three miles from the finish, these fairly settled down to their work, and the pace rapidly increased. Garrard now dashed to the front, but directly afterwards Warwick took the lead for the first time. Some grand spurring ensued, which resulted in Howell taking the lead, the excitement growing intense. Entering the nineteenth mile, Wood, Kaye, Edlin, and Warwick gave up, and a quarter of a lap from home Howell held the lead, with Garrard and Derkinderen close up. Rounding the bend for the post, Garrard, by a tremendous effort, got on even terms with Howell, and in the last few yards got his wheel in front, and won a splendid race by half a yard, Derkinderen two yards in the rear. Time, 1h. 5m. 40s. Mr. F. G. Walker was referee and time-keeper.

The fall meeting of the Olympic Athletic Club which takes place upon Saturday, the 23d of September, promises to bring out some fine racing in the various bicycle contests. The programme of the wheelmen as announced embraces a half mile, one mile and a two mile race, and a dash of one fifth of a mile, (once around the track). This latter to be ridden by each competitor singly and the time to be taken by the judges. It is the intention to make this the finest race meeting of the season and entries are being made for the various events.

Country roads at this season of the year are badly cut up and deep with dust, so that any extended bicycle trips are out of the question. The roads out of Oakland as far as San Leandro and San Lorenzo are, however, kept well watered and the Oakland riders may enjoy a twenty-five or thirty miles run at any time over good roads.

The Golden Gate Fair Association offered among other prizes one of fifty dollars for an open one mile bicycle race, thirty-five to the first and fifteen to the second. This brought

out two competitors, F. F. Merrill, the professional trick rider, and W. S. Hull, one of his pupils. The time given was 3 min. 40 sec. for Merrill, who won the race, and 3 min. 54 sec. for Hull.

The Beacon Park track, Boston, Mass., has been at last repaired and put in excellent order under the immediate direction of John S. Prince, and is this week opened to practice. It is well provided with dressing-rooms and other facilities, and ought to become a popular resort of wheelmen for both racing and practice. We understand that J. S. Prince will at present have the management of the track, and will give his personal attention to training competitors and others.

There seems to be no limit to the speed of bicycles under favorable circumstances. Not only has Cortis done twenty miles within an hour, but one hundred and ninety-three and a half miles of road have been traversed in the short time of 18h. 55m. by W. T. Sutton of the London Scottish Bicycle Club.

The same gentlemen will attempt to do two hundred and thirty miles in twenty-four hours. Such traveling as this should forever silence the "croakers" one meets with occasionally, who still doubt the practicability of the bicycle.

The Oakland Bicycle Club held its regular monthly meeting on Saturday evening, September 8th, at 912 Broadway, transacting the usual routine business, electing several new members and making arrangements for future runs.

Market Report.

FLOUR—We quote as follows: Best City Extra, \$5 37½@55 50; Superfine, \$4 50@54 75; Interior Extra, \$4 75@55 25; Interior Superfine \$3 75@34 75 hbl.

WHEAT—With lower freights and a stronger market in England holders are firm and offerings light and there has been a marked advance for all grades. We quote No. 1 November, at \$1 71½; No. 2, September, \$1 62½ and do. November at \$1 65.

BARLEY—Heavy arrivals have forced the price down a few cents since last week, although there is a lively export demand, especially for Chevalier. We quote good feed, \$1 30; common do \$1 27½; new brewing, \$1 35@1 40 per cental.

OATS—The market is rather quiet and prices range from \$1 50@1 70.

RYE—There has been a lowering of holders' prices during the week, though but few sales. For No. 1 \$2 25 may be counted as the outside price.

HAY—We quote: Alfalfa, \$11@13 50; Wheat \$13@15 50; Wild Oat, \$12@15 50 per ton.

HOPS—Medium, 35¢@40¢; good to choice, \$45@50¢ per lb.

STRAW—Quotable at 50¢@55¢ per bale.

BEANS—quoted at: Bayos, \$2 40@2 50; Butter, \$3 25@3 50 for small and \$3 60@3 80 for large; Lima, \$3 50@3 75; Pea, \$2 50; Pink, \$2@2 25; Red, \$2@2 25; small White, \$2 50; large White, \$2 30@2 40 per cbl.

ONIONS—Silverskins sell for 50¢@70¢ per cbl, and Red for 30¢@40¢ per sack.

POTATOES—Prices are lower. We quote wharf rates; Early Rose, 85¢@1; Garnet Chile, 95¢@1 05 per cbl; Sweet, \$1 50@1 75 per cbl.

GAME—We quote: Hare, \$1 75@2 25; Rabbits \$1@1 50; Doves, 50¢@75¢ per dozen; Venison, 10¢@12¢ per lb.

PROVISIONS—Values steady. We quote: Eastern Hams, 13¢@14¢; California Hams, 16¢@16½¢ for plain, 16½¢@17¢ for sugar-cured canvased; Eastern Breakfast Bacon, 17¢@18¢; California Smoked Bacon, 16¢@16½¢ for heavy and medium, and 17¢@18¢ for light and extra light; Clear Sides, 16¢@16½¢; Pork, \$21 50 @ \$22 for extra Prime, \$24@25 for Prime Mess, \$25@26 50 for Mess, \$27 for Clear and \$28@28 50 for extra Clear; Pigs' Feet, \$16@18 per hbl; Mess Beef, \$14 for bbls and \$7 for hf bbls; Extra Mess Beef, \$14 50@15; Family Beef, \$16@16 50 @ bbl.

POULTRY—With a strong demand prices have gone up and there are indications that will be still higher before they are lower. Job lots quoted: Live Turkeys, gobblers, 18¢@20¢; do Hens, 17¢@19¢; Roosters, \$5 50@6 50 for old and \$5@5 75 for young Hens, \$6@8 50; Broilers, \$3@4 50 according to size; Ducks, \$5@5 75 per doz; Geese, \$1@1 25 per pair; Goslings, \$1 50@1 75 per pair.

HONEY—Comb, 14¢@17¢; extracted, 7¢@9¢ per lb.

EGGS—There has been a marked decline since our last report. We quote prices: California choice, 35¢@41¢; Interior, 32¢@35¢; Utah, 25¢@35¢ per doz.

BUTTER—Prices remain practically unchanged. We quote: Fancy, 40¢; choice, 35¢@37½¢; fair to good, 26¢@32½¢; interior lots from country stores, 22¢@25¢; firkin, 20¢@31¢ for good to choice, and 25¢@27½¢ for ordinary; pickled roll, 30¢@32½¢; Eastern, 20¢@25¢ per lb.

CHEESE—With a quiet market we quote: California, 12¢@13½¢ for choice; 10¢@12¢ for good;

do, factory, in boxes, 15¢@16¢; Eastern, 16¢@17¢; Western, 11¢@13½¢ per lb.

HIDES AND SKINS—Dry hides, 20¢@20½¢; culls one-third less, and Mexican Hides 1¢ per lb less. Dry Kip, 18¢@19¢; Dry Calf, 21¢@22¢; Slat Steers, over 55 lbs, 11¢ per lb; Steers and Cows, medium, 10¢; light do, 7½¢; Salted Kip, 15¢ to 30 lbs, 10¢@10½¢; Salted Calf, 11¢@12½¢ per lb; Dairy Calf, 65¢@70¢ each; Sheep Skins, 20¢@25¢ for Shearings; 25¢@50¢ for short, 60¢@80¢ for medium, and 75¢@18 apiece for long wool and wool skins. Butcher town Green Skins bring higher prices.

TALLOW—Good demand, quotable at 81¢@8½¢ per lb for rendered and 101¢@11¢ for refined, both in shipping order.

WOOL—Sales are light and mostly confined to fall. We quote: Humboldt and Mendocino, 25¢@26½¢ per lb; Sonoma, 24¢@26¢; Siskiyou and Modoc, 20¢@25¢; San Joaquin, free, 17¢@18¢; Southern Coast, burry and seedy, 15¢@17¢; Eastern Oregon, choice, 22¢@24¢; Eastern Oregon fair, 20¢@22¢; Eastern Oregon, poor, 18¢@19¢; Valley Oregon, nne, 25¢@27¢; Valley Oregon, coarse, 23¢@24¢.

FRUIT—Apples are more plentiful and consequently lower, while the supply of pears and raspberries is limited and prices are higher than last week. We quote: Apples, 75¢@1 per box for good; Pears, 25¢@40¢ per basket and 40¢@60¢ per box; Bartlett do, \$1 50@2 per basket and \$1 50@2 per box; Strawberries, \$8@10 per chest; Raspberries, \$10@12 per chest; Peaches, 35¢@51 per box and 30¢@60¢ per basket; Figs, 40¢@75¢ per box; Grapes, 35¢@50¢ for common, 60¢@15¢ for Black Hamburg, 60¢@75¢ for Rose of Peru, 50¢@75¢ per box for Muscat and 75¢@81 per box for Tokay; Plums, 25¢@75¢ per box; Quinces, 75¢@1 per box; Blackberries, \$2@2 25 per chest; Watermelons, \$3 57 per hundred; Cantaloupes, 75¢@81 per crate; Lemons, \$8@9 per box for Sicily and \$1@1 50 for California; Limes, \$14@15 per box for Mexican; Bananas, \$2@3 50 per bunch; Pineapples, \$6@8 per dozen; Tahiti Oranges, \$3@3 50 per thousand.

VEGETABLES—We quote: Marrowfat Squash, \$5@8 per ton; Carrots, 30¢@50¢; Turnips, 75¢@81; Cauliflower, 60¢@65¢ per dozen; Cabbage, 50¢@75¢ per cbl; Garlic, 1¢@1½¢ per lb; Cucumbers, 25¢@30¢ per box; Green Peas, 4¢ per lb; Green Peppers, 50¢@75¢ per box; Tomatoes, 15¢@30¢ per box; Celery, 50¢ per doz; Summer Squash, 50¢ per box; String Beans, 3¢@4¢ per lb; Green Corn, 17¢@15¢ per doz; Okra, 50¢@75¢; Egg Plant, 50¢@75¢ per box.

MEATS—Following are the rates for whole carcasses from slaughterers to dealers:

BEEF—Prime, 7½¢@8¢; medium grade, 6½¢@7¢; inferior, 5½¢@6¢ per lb.

VEAL—Large Calves, 6½¢@7¢; small ones, 8¢@10¢ per lb.

MUTTON—Wethers are quotable at 4½¢@5¢ and Ewes at 4¢@4½¢ per lb, according to quality.

LAMB—Quotable at 6¢@6½¢ per lb.

PORK—Live Hogs, 7½¢@7¾¢ for hard and 7¢@7½¢ for soft; dressed do, 10½¢@10¾¢ per lb for hard grain hogs.

ENGLISH SETTER PUPPIES FOR SALE.

By MR. THOMAS BENNETT'S REGENT, OUT of Waddington's Daisy; and Mr. Thomas Bennett's Regent, out of Leavessley's Juno. Both Daisy and Juno are field trial winners. Price \$25 and \$35. Apply to E. LEAVESLEY, Gilroy.

Valuable Catalogue Free. Mention this paper. **WORLD MANUFACTURING CO., 42 Nassau Street, New York.**

A 32 CALIBRE \$10.00 REVOLVER FREE TO EVERY READER OF THIS PAPER.

READ THIS!

The 32-Calibre BLUE JACKET IS WITHOUT EXCEPTION THE MOST ELEGANT AND BEAUTIFUL FINISHED REVOLVER IN THE WORLD. Every Revolver Guaranteed in every respect. They are made of the finest steel. The barrel and frame are finest Nickel Silver-Plate and the Cylinder and Base Pin are of the Finest Gold-Plate. Every Revolver is BEAUTIFULLY ENGRAVED. The Engraving is BEAUTIFULLY ENAMELED in blue by a patent process, owned by us. The frame near the handle is set in imitation of Beautiful Rubies, which taken together with the BLUE BEYOND DESCRIPTION. It must be seen to be appreciated. No pen can picture its beauty or describe its actual merits. The name BLUE JACKET is enough to stamp it as a first-class weapon in every respect. It has the New Russian Model Hip-Snapper lock exactly fitting the hand, enabling one to hold it firmly and steadily. We guarantee its Shooting Qualities equal to Smith & Wesson's. It is the only revolver in the world that cannot be equalled. The Cylinder is provided with Positive Stop Action holding it firmly in place. It uses the Long 32-Calibre Cartridge making it one of the Strongest Shooting Revolvers in the world. It is the special terror of burglars, highwaymen and tramps. We pledge our reputation that it is the first 32-Calibre Ivory Handle Engraved, Nickel and Gold-Plated Revolver ever sold for less than \$10.00, and the ENAMELED and RUBY FINISH is the FIRST EVER SEEN ON ANY REVOLVER. We hereby guarantee to refund money for each and every Revolver found to be different from what we represent it. We purchased these Revolvers at less than FOURTEEN PER CENT, and wish to give all who read this the benefit, and at the same time introduce our publication THE HOUSEHOLD GUEST MAGAZINE. If you will send us \$3.50 and FIFTEEN CENTS EXTRA to help pay postage, we will send you the Revolver and Magazine, and when full amount is sent with the club THE HOUSEHOLD GUEST MAGAZINE contains 32 quarto pages, with handsome illustrated Engraved Cover, and is filled with choice illustrations from all parts of the world. Stories by the best authors; Poetry; Anecdotes; Sketches; Illustrated Fashion Department; useful instruction; Statistics; Answers to Correspondents; Household Notes; The Kitchen; Ladies' Items; The Toilet Table; The Garden; Wit, Humor, etc. It is now in its fourth year, has a large circulation, and the regular price for a year's subscription has always been \$1.50.

FREE TO YOU! If you will cut this advertisement out, show it to your friends, and get a CLUB pay postage, we will send you the Revolver and Magazine free for your trouble. **PLEASE BEAR IN MIND** that each one in the club will also get the Revolver and Magazine, and when full amount is sent with the club order, we will put in a box of cartridges for each Revolver. Any one can sell these Revolvers at from \$5.00 to \$10.00, and they give perfect satisfaction. As to our reliability, we refer to any New York Publishers or Merchants, Commercial Agency or Express Company. Send Money by Registered Letter or Post-Office Order at our risk.

Address, E. C. RIDEOUT & CO., 10 Barclay Street, N. Y.

The Target illustrated here was made with the Blue Jacket at 27 yards. Every shot being put in a bull's-eye one inch in diameter. Cut this out, it won't appear again.

SAME DAY.

No. 12. Running, free for all, 2 mile dash; purse, \$350

REMARKS AND CONDITIONS.

All trotting races are the three best in five, unless otherwise specified, three to enter and two to start. Entrance fee, 10 per cent. on purse, to accompany nomination.

Purses divided at the rate of 60 per cent. to first horse, 30 per cent. to second, and 10 per cent. to third.

All running purses to be divided, two-thirds to the first horse and one-third to the second horse; four to enter and two to start, except race No. 11, three to enter and two to start.

National Association Rules to govern trotting; but the Board reserves the right to trot heats of any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats.

To fill running races, four or more subscribers are necessary.

All two-year-olds, when running in their classes, shall carry 100 pounds, with the usual allowance for mares and geldings.

All three-year-olds, when running in their classes, to carry 110 pounds, with the usual allowance as above.

No added money for a walk-over.

Horses entered in purses can only be drawn by consent of the Judges.

Rules of the Pacific Coast Blood-Horse Association (old weights) to govern running races, except when conditions named are otherwise.

All entries made in writing, giving name, sex, color and marks of horses; also, name and residence of owner.

In running races, full colors to be worn by rider; and drivers of trotters are respectfully requested to wear caps of distinct colors, to be named in their entries, as their horses will be designated upon programmes by the colors worn by drivers.

Entries to all the above races to close with the Secretary on Saturday, Sept. 30, 1882.

Write "Entrance to Races" on outside of envelope.

NOTE—"Exile" is barred from trotting races 1, 2 and 4.

G. J. BARETTO, President.

R. H. HEWITT, Secretary.

"Red Clover."

NEEDHAM'S RED CLOVER BLOSSOMS AND extracts are the greatest blood-purifier in the world; also a sure cure for cancer, salt rheum, catarrh, bronchitis, etc. I can refer to many letters and testimonials of those who have been cured—some of them very remarkable. I will send circulars and testimonials to those wishing them. Address

At 3 o'clock, P. M.—RUNNING—No. 8. Novelty Race. Purse of \$150. Free for all. Weights for age. One mile dash. First horse to first quarter pole, \$30; first horse to second quarter pole, \$30; first horse to third quarter pole, \$40; first horse to last quarter pole, \$50; that is, the horse that first reaches a quarter pole wins money. If a horse reaches all the quarter poles and home first, that horse wins the whole purse.

REMARKS AND CONDITIONS.

These races are open to any horse owned in the Ninth District (composed of the counties of Del Norte, Humboldt and Mendocino) by a bona fide resident of the district, on the 1st day of July, 1882.

In all races three or more to enter, and two or more to start. Any horse distancing the field receives the entire purse.

Entrance fee, 10 per cent on purse, to accompany the entrance.

All entries in these races must be made with the Secretary by seven o'clock on the evening previous to the race, except in the race, the horses named and entered in the name of the owner, who must be a member of the association, and the entrance fee paid in full.

The trotting races will be conducted under the rules of the National Trotting Association, and the running races under the rules of the Pacific Blood-Horse Association.

All horses entered for a race will be under the control of the Judges from the moment they are brought on the track.

If from any cause there shall not be a sufficient amount of money received from all sources, including appropriation from the State, to pay all purses and premiums in full, after paying the expenses of the fair or exhibition, the same will be paid pro rata.

Neither the association, the Directors nor officers in any event to be liable for any purse or premium beyond such pro rata amount.

OFFICERS OF THE BOARD.

G. C. BARBER, Ferndale.....President
S. H. GRABER, Rohnerville.....Secretary
MORRIS LEVINGER, Rohnerville.....Treasurer

SPEED PROGRAMME

OF THE

Mount Shasta Agricultural Association,

TO BE HELD IN

YREKA, SISKIYOU CO.,

ON

Wednesday, - - - October 4th, 1882.

In addition to other premiums, H. T. Dorrance will offer a set of choice track harness, valued at \$65, for the horse owned in the District that makes the fastest trotting record at the Stockton Fair. He also offers a \$25-jockey saddle to the horse that makes the fastest running mile record owned in the District at the Fair.

Irving Ayres, owner of Mambrino Wilkes, offers a special premium at our Fair, a silver tea-set and waiter, for the best two-year-old colt sired by the above horse. Also, for the second best colt, a silver water pitcher. The colts to be shown at the Stockton Fair.

REMARKS AND CONDITIONS.

All Trotting Races best three in five, except numbers and 9.
In all these Races (Pacific Coast Novelty Race excepted) four moneys, 50, 25, 15 and 10 per cent. of purse.

When there are eight or more to start in a Trotting Race, 150 yards shall be a distance.
Rules of the National Trotting Association to govern trotting, except as specified; but the Board of Manager reserve the right to trot heats of any two classes alternately, or to start special race between heats.

All two-year-olds, when running in their classes, shall carry 100 pounds, with the usual allowance for ares and geldings.
All three-year-olds, when running in their classes, to carry 110 pounds, with the usual allowances as above; other wise, old weights to govern.

For a walk-over in any race a horse shall only be entitled to his own entrance fee and one quarter of the entrance received from the other entries for said purse; and a horse winning a race entitled to first money only, except when distancing the field, then entitled to first and third moneys only. A horse wins but one money under any other circumstances.

Horses entered in purses can only be drawn by consent of the Judges.
The Board reserves the right to change the day and hour of any race, if they deem it necessary.

Rules of the Pacific Coast Blood Horse Association to govern Running Races, including additions to rules, except as especially provided.
In all Running Races colors to be worn by riders, and in all other races, any other particulars that will enable spectators to distinguish the horses in the race.

Races to commence each day at 1 o'clock P. M. sharp.
The track is first-class, having been improved. Stable bay and straw free to competitors.

L. U. SHIPPEE, President.
J. L. PHELPS, Secretary.

\$12,500

In Purses and Stakes.

HORSE HISTORY.

A Notable of War Times.

There is oftentimes a spice of romance in the history of horses, strange vicissitudes in their lives which are almost a parallel to the striking changes which sometimes occur in human life. The following sketch, cut from the *Call* of last Sunday, recalls the history of one animal which has had a checkered existence:

"Git Up, Chee-ka-go."

Fenton White, a special policeman in Hayes Valley, is an admirer of fast horses, and is of the opinion that he can tell a horse's gait by simply looking at him. Last Monday some of his acquaintances, wishing to test his judgment of trotting, took a horse, put old, worn and patched harness on his back, and hitched him to a dilapidated old wagon which they hired from a rag, bottle and glass man, and had the owner of the wagon drive out to a place in the valley where White is frequently to be found.

The acquaintances soon followed, and meeting White, engaged him in conversation on horses.

"Now," said one of them, "what do you think of that broncho?" pointing to the animal hitched to the rag, bottle and glass wagon.

White smiled but made no reply.

"What do you think he'll make a mile in?" asked the speaker.

White examined the horse with the air of a connoisseur and then declared that he was satisfied that the animal could not make it inside of ten minutes.

"What's the time of that nag?" asked one of the party of the driver.

"I guess about four minutes."

"I'll bet that he'll trot inside of 3:30," said the one who had broached the subject, and after some parley White put up \$25, which was covered by the one who had made the offer.

The animal was driven to the Bay District Park, harnessed to a sulky, and trotted at a slow gait once around the track. When the animal was under the string the man who drove him touched him up with the whip, hollowed "Git up! Chee-ka-go," and away went the horse and made the mile in 2:58. White admitted that he had lost, and he was then informed that the animal was Chicago, a once celebrated trotter with a record, but retired from the turf several years ago. White consoles himself now by saying: "Well, it was worth \$25 to see the old horse warm up to his work."

To commence the history after the style of the old-time story book: On a bright spring morning in that part of Kentucky where the blue-grass is the sweetest, and the birds sing the most joyous notes, a brown filly was gamboling about his dam. It is twenty-three years and over since that gay youngster was performing his gladiatorial, and as he caracolled through all the paces of the manège, his owner felt satisfied that the object he had in view was accomplished. His aim was to breed a first-class saddle horse, and a favorite old mare by American Eclipse was coupled with Ole Bull, a son of the old pacer Pilot. He anticipated that the union of the blood of the horse which was the acknowledged champion of the turf, never having lost a race even when matched against the choice of the whole South, and that of the "Canuck" would "fill the bill," and as the colt had got the quality from his dam and the desired gait from the sire he felt that his wish was to be gratified. In this he was not disappointed. As he grew from colthood to maturity he improved, fell readily into all the saddle gaits, and at the same time was tractable and took kindly to harness. He did not show any trotting speed, however, ambling at the start, and if pressed for greater speed would singlefoot and pace, much as he did when carrying a rider.

During the war Harvey B. Ring made a contract to furnish "hard bread" to the army and his bakery was in the suburbs of Louisville. The owner of the colt loaned him to Mr. Ring to drive in his business and harnessed to a road wagon he would jog pleasantly to the bakery and back, and stand quietly without "hitching."

There were huge piles of empty barrels in front of the bakery, and one day while he was left standing at the door, he took a fancy to investigate. He did it carelessly, moving

one and then another, until he caught one with his teeth and pulled it out. Down came the stack with a horrible uproar, the barrels rolling in all directions. Never was a colt more demoralized, and away he went at a rate which would not have discredited his illustrious grandsire on the maternal side of the house. The racket brought all hands to the door but all that could be seen was casks still rolling, and a fleeing brown phantom with a black streak behind him. But there was a counter pull. The blood of the Canuck was putting a break on that of the high-mettled racer and the pace was too severe to last. He was too much frightened to think of the manege gait, too anxious to get away from the din and the crazy dance of the barrels to go slow, and the "black drop" forbade keeping up the speed at the gallop. He struck a square, open trot, with grand action, head high in the air, and kept up his stride until he reached his stable in the city. As was the case with old Topgallant, accident had developed unthought-of capacity. He was placed in training and in his first race christened "Hardbread." He performed so well that he was purchased by John Aiken, of Pittsburg, a hale, hearty old man who had a great fancy for the sports of the track, a straightforward, bluff old fellow, who carried his sixty-five years as lightly as though the years had been under two score, and his cheek was ruddy though his hair was streaked with gray. He placed Hardbread in the hands of a driver who years ago acquired notoriety on this coast, also a big, powerful looking man and somewhat given to swagger and "blow." They came to Chicago and Hardbread was engaged in the races. There was sharp practice and that night "Old John" met his driver in a livery stable kept by Edward Price. He asked him a question to which the driver gave an answer to that was palpably false.

"You are a liar and thief, Col. D—," replied the owner of Hardbread.

"If you were not an old man I would lick you," was the response.

"Take that, you —," was the counter reply and the valiant Colonel was crying "murder," and "take him off," in less time than it requires to write the description.

"How much will you give for the horse, Mr. Price," was the next query, and the livery man named a sum much below his value. "He is yours; write a bill of sale," and Hardbread was transferred in due legal form to his new owner. At that time the famous driver, Jim Rockey, was working Mr. Price's horses, and the name was changed to that of the skillful whip. He trotted under that name many good races, and was then sold to Henry Graves, a man who has had as much to do with the old trotting days and up to the last few years of the present, as any man in the country. He was the owner of Lady Jane when she beat Jack Rossiter and other cracks of the time, and though he aided in moving the Indians from Chicago it is long odds that he was a delighted spectator at the last great meeting at the "City by the Lake."

After awhile there was a disagreement between him and the driver of the quondam Hardbread, and he was rechristened Chicago. In the summer of 1868 he was matched against the stallion Young Bashaw, then thought to be the fastest and best horse in the West, and capable of successfully coping with the flyers of the country. Young Bashaw was owned by A. F. Fawcett, who sold Dexter to Robert Bonner, and he firmly believed him to be the "king of the track." We were in New York when the matches came off, and now, writing entirely from memory, we do not attempt to give the particulars, but the remembrance is very distinct of the telegram which was brought up the long flight of stairs to the *Turf, Field and Farm* office that Chicago had won the first of the series, the time 2:24. This was capital time fourteen years ago, and stamped Chicago as one of the good horses of any part of the country.

In 1871 he created still more of a sensation. There was a free-for-all purse at Chicago and it was well known that Goldsmith Maid and Lucy would be in it, and there was

quite a surprise when the entry box was opened and the name of Chicago was found. The purse was \$5,000, \$2,500 to the first, \$1,500 to the second and \$1,000 to the third. When the race came off there was still more surprise as at one time it looked as though he were going to win the third heat. He was some distance in the rear when the horses came into the stretch, but was rapidly overhauling the leaders, and such a shout went up as is rarely heard on a race course, and a man who holds a high position in the National Trotting Association became so excited he fairly shrieked "Chicago will win," and for the only time in our long acquaintance with him accompanied the exclamation with the sharpest kind of an epithet which some might have thought profane. But it was too much to expect of even so good a horse as our hero was on that day, and he was forced to succumb to the reigning belles of the track.

To the best of our recollection it was in 1871 or 1872 that we received a letter from a friend in New York to buy Chicago for him. He was a liberal purchaser, very fond of the fast trotter, and owned several, some of which we had bought for him. In the whirligig of events he has become associated with the press and is now the editor of a New York paper as widely known as any journal in the United States. The price authorized was \$13,000, and though we felt that it was in reality rather more than the horse was worth and that he ought to be obtained for less money, the letter was read to Mr. Graves. The answer was to the point. "Thirteen thousand dollars, why it would not buy the hairs in his tail" was the reply. "I have three horses the poorest of which it would take \$20,000 to get and Chicago is not that one."

It is unnecessary to follow his career since he came to California, but enough has been shown to display the vicissitudes in equine life. From a valuation of a sum akin to a respectable fortune to being harnessed to an old wagon filled with rubbish, the driver shouting rags, sacks and bottles through the byways of the city is a sorrowful denouement. Poor old Hardbread. Perhaps as he stands with his head down while his owner is chaffering for the refuse he hauls he is recalling his early days, the green pasture fields of his old Kentucky home, the happy, happy days of colthood, the caracolled through the streets of Louisville gay and graceful, and the dream of the rolling, rattling barrels. He rises his head, and it may be that he again hears the cheers, the frantic shouts as he is pressing the Queen to do their best to reach the score first. Who can say that there is no gift of retrospection granted? Let us believe that there is, and that the pleasure of memory is some atonement for his hard lot.

Hanging on the wall of the editorial room of the BREEDER AND SPORTSMAN is a picture. It can scarcely be called a picture, more properly an unfinished sketch. In the background there are rounded, wooded hills, a stream winding through a meadow, between the hills, and the foreground representing an opening in an oak forest with a horse darting through on a fast trot. But there are blotches of white on the canvas and on the right the trees are incomplete. That, too, has a history, a history in part connected with the subject of this sketch. When Henry Graves was the owner of Chicago he employed the artist Scott to make paintings of his favorite horses. Queen of the West, a handsome grey mare by Pilot Jr., was the subject of one. She was of the fleetest sort, had trotted half a mile in 1:03 in her training, but fully as unreliable as she was fast. The second was Bay Henry by Mambrino Chief, from a thoroughbred mare and also a remarkably fine looking horse, and the third was Chicago. A Mr. Loomis was then associated with Mr. Graves in the ownership of the horses, and he made some remark which Scott did not like. Besides the finished picture, which showed Chicago harnessed to a sulky he had made a sketch of the horse in motion entirely untrammelled; not a strap upon him. The latter was the most lifelike, the most spirited of the two. He would not let the owners have the finished

icture which he entrusted to our care. The sketch he presented us with.

Some time before the great fire in Chicago D. A. Gage, with whom we were then associated in a horse breeding establishment, was made acquainted with the necessities of a Norwegian artist, so poor that he was actually in want. There was none more liberal than Mr. Gage, and after presenting the artist with money enough to relieve him he gave him a commission to put Atwood Place, where we then lived, on canvas, and for which he paid him a large sum in advance. The house, a pretty cottage surrounded with large oaks, made a pretty picture, and admirably the artist succeeded in reproducing it. When finished it was hung in the rotunda of the Sherman House and elicited many encomiums. While working at that we suggested that he should take the sketch of Chicago and fill in a landscape, complete the coloring of the horse, have it chromoed, and under the title of "the trotter at play" it would be likely to meet with a sale which would remunerate him. He spent the week days at Atwood Place, the Sundays with his family in Chicago. Sunday night Chicago was a mass of flame, Monday it was a reeking ruin. From that time we never could get a trace of the artist; the picture which was finished was burned in the Sherman House, and the unfinished sketch on the walls is all that remains. The artist undoubtedly perished in the fire as Mr. Gage had obtained plenty of work for him in the future.

There are other sad remembrances connected with the horse. The man who drove him and gave him his first name, after making a fortune in oil speculations, moved to Denver, where he committed suicide. One of his former owners died from the effects of excess, and poor Jim Rockey, one of the best drivers that ever sat in a sulky, went completely to the bad and died when he should have been in the prime of his usefulness.

TURF AND TRACK.

Fixed Events.

The San Mateo and Santa Clara County Agricultural Association Fair at San Jose, September 23 to the 30th inclusive.
Humboldt and Mendocino District Fair at Rhonerville, September 19th to September 24th inclusive.
Modoc, Plumas and Lassen District Fair at Greenville, from October 2d to October 5th inclusive.
Monterey District Fair at Salinas City, from October 2d to October 6th inclusive.
Nevada State Fair at Reno, from Monday, October 2d to the 7th inclusive.
Mount Shasta Agricultural Association Fair at Yreka, October 4th, 5th, 6th and 7th.
Eastern Oregon Fine Stock Association at Union, from October 9th to the 14th inclusive.
Los Angeles Agricultural Association, at Los Angeles, from October 17th to 21st inclusive.
Fall meeting of the Pacific Coast Blood Horse Association, November 11th, 14th, 15th and 24th.

FAIRS AT THE EAST.

Indiana State Fair, at Indianapolis, September 25th to the 30th inclusive.
Western Michigan Fair, at Grand Rapids, September 25th to the 30th inclusive.
Texas State Fair, at Austin, October 17th to the 21st inclusive.

The Contra Costa Fair.

The 24th annual fair of the Contra Costa Agricultural Association commenced on Monday, the 11th, and ended last Saturday. The directors of the association labored hard and faithfully to make the fair a success and if it has not come up to their expectations it was no fault of theirs. The premiums offered for home and farm productions, and the purses offered as inducements for the sporting classes to bring out their fast horses, show the liberality and the lively interest they have for the welfare of the organization.

On the first, second and third days the attendance was very small, but as the week advanced the numbers increased and gave the fair grounds quite a lively appearance.

It was without doubt held too early in the season as the farmers had not finished their harvesting, and being held at the same time as the State Fair it did not turn out as successfully as in former years.

The fair grounds are situated between, and half a mile distant from, the towns of Concord and Pacheco. The pavilion is a large and commodious building and quite handy to the grand stand and the judges' stand. The numerous productions of the field speak well for Contra Costa farmers; the housewife with her many specimens of handiwork and the works of local artists deserved their share of praise. The stock sheds and stalls are well arranged and capable of accommodating quite large numbers of stock, but their capacity was not taxed this year to any great extent.

The race track is in rather bad order but a winter's rain will pack it down and in time it will be excelled by few others.

Many of the races on the programme were not filled and special purses were made up to take their places. Among the principal races was one for all yearlings in the county that came off on Monday. The babies trotted well and showed much promise of future greatness. Capt. Danham entered Oscar; J. E. Tennent, Don Carlos; J. B. Tennent, Pinole Jr.; R. H. Nason, F. McGuire and J. H. Nason's, McVey. The race was best three in five. R. H. Nason's F. McGuire won the first and second heats and first money, \$35; Oscar second money, \$10; McVey third \$5. Don Carlos and Pinole Jr. were distanced in the first heat.

The second was a running race, free to all two-year-olds in the county, for a purse of \$50; \$35 for the first, \$10 for the second, and \$5 for the third, best three in five. Rosette, Lady Emma, and Idler were the horses. Mr. Gett's Idler won the race and first and third money, Lady Emma second. The trotting race of Tuesday was the most exciting race of all. The purse was \$250, free to all horses owned in the county; first horse \$165, second \$60, and third \$25. John Rogers entered Barney; H. G. Cox, Vengeance; J. E. Durham, Conductor; N. Graber, Gypsy Huntington and R. H. Nason, Urania. The horses took their positions in the order above mentioned; Urania was the favorite. The first heat was trotted in 2:46, the horses coming in in the same order that they started. On the second heat Urania was let out and showed what she could do, going under the wire in 2:46 with Vengeance second, Gypsy Huntington third, Barney fourth and Conductor fifth. The third heat was made in 2:44, the horses all doing their best. Urania came in first, Barney second, Vengeance third, Conductor fourth and Gypsy Huntington fifth. Urania won the fourth heat and first money, \$165;

Barney second money, \$60; Vengeance third money, \$25; Conductor fourth and Gypsy Huntington distanced; time 2:44.

The second race of Tuesday was for pacing horses that could beat 2:50. R. H. Nason entered Doc; T. Downing Silvertail, and Capt. Downing Onward. Onward won the race and first money in one heat leaving Doc and Silvertail outside of distance. After this came a running race, free to all horses in the county. Purse \$150. First horse \$100; second horse \$35; third horse \$15. T. Pacheco entered Dick Ruby, W. A. J. Gift, Idler, and B. McKinny, Lady Emma. In the first heat Idler lost considerable on the start but crowded Dick Ruby on the homestretch. Dick Ruby won the heat, Idler second, Lady Emma distanced; time 1:49. Idler won the second heat in 1:52, the third heat in 2:01 and the fourth heat and first money in 1:57, Dick Ruby winning the second money. On Thursday only one race on the programme was filled but several special purses were made up and competed for, one of which caused considerable excitement which was not down on the bills. The race was for a purse of \$100, best 3 in 5. Capt. Durham entered Ned; H. G. Cox, Vengeance, and N. Graber, Gypsy Huntington. The first heat was won by Gypsy Huntington, Vengeance second and Ned third. Time 2:58. On the second heat Ned came in first, Vengeance second and Gypsy Huntington third; time 2:53. Complaint was made against H. G. Cox, the driver of Vengeance, for foul driving and a marshal was ordered to escort Mr. Cox around the track; on the following heat, which was the third, the marshal reported that Cox was not driving to win. When Cox heard the report he drove toward the stalls but when he reached the gate he struck his horse with the whip, dashed through the gate and started for the county road. Both marshals started in pursuit of the horse and a lively race took place around a stubble field before the horse was captured and returned to the track. Cox's excuse for this singular conduct was that he "was afraid of violence from those who had bet on his horse; and also that his horse was coming down with the pinkeye, and he wished to withdraw from the race." The only race of any note on Friday was for a purse of \$150. Barney, Jim Lee, Clieago and Urania were entered. The best time was 2:42; the race and first money was won by Urania. There were no races on Saturday owing to a heavy rain. The award of prizes on stock will be published later.

Fall Meeting P. C. B. H. A.

The programme of the Fall meeting of the Pacific Coast Blood Horse Association is as follows:

Introductory day, Saturday, November 11. No. 1, purse \$200; free for all, \$10 each; a dash of three-quarters of a mile.

No. 2, purse \$200; free for all maidens, \$10 each; one mile, entrance money to second horse.

No. 3, Handicap stake for all ages, free for all; \$25 entrance and \$10 if declared, \$250 added; \$50 to second horse; a dash of a mile and an eighth.

No. 4, selling purse, \$200; a mile and a quarter for all ages; entrance free; \$50 to second horse. The winner to be sold at auction; horses entered for \$1,500 to carry regular weight, if for \$1,000, five pounds allowed; if for \$750, ten pounds; if for \$500, seventeen pounds; and if for \$300, twenty-two pounds. Any one can claim the winner, and the excess realized beyond the amount at which the horse is entered to be divided between the association and the owner of the second horse.

First day, regular meeting, November 15. No. 1, the Ladies' stake.

No. 2, purse of \$250, free for all, three-quarters of a mile and repeat, entrance free; the winner of the dash of three-quarters on the first day to carry 10 pounds extra.

No. 3, the Vestal Stake.

No. 4, handicap purse of \$250 for two-year-olds; \$25 each and \$10 if declared; \$50 to the second horse, dash of a mile.

Second day, regular meeting, November 18. No. 1, purse of \$200, a dash of seven-eighths of a mile, \$50 to the second horse; entrance free; the winner of the three-quarter dash to carry ten pounds extra.

No. 2, purse of \$250; heats of a mile and an eighth, entrance free; \$50 to second horse; maiden three-year-olds allowed seven pounds; four-year-olds twelve pounds, and maiden five-year-olds and over twenty pounds; the winner of the dash at this distance on the first day to carry five pounds extra.

No. 3, handicap purse of \$250 for all three-year-olds. A dash of a mile and quarter; \$25 each and \$15 if declared; the second horse to receive \$50.

No. 4, purse \$250, a mile and repeat over four hurdles; \$50 to second horse. Entrance free.

Third day regular meeting, November 23. No. 1, the Finnegan stake.

No. 2, the Fame stake.

No. 3, the Baldwin stake.

No. 4, Consolation purse of \$200, of which \$50 to the second horse; entrance free; a mile dash; horses beaten twice allowed ten pounds, and three times, fifteen pounds.

In the stakes already filled there are many nominations and in order to encourage this style of running it has been decided to give a second purse for a hurdle race, of which the particulars will be given in our next issue.

The Colts That Have Gone East.

From the following note it will be seen that the Palo Alto colts are now well on their way to the scene of their engagements, and it also gives dates and places where they will trot. It appears like a short time to get them in readiness to trot in less than two weeks from the time of their arrival in New York, but if the weather is favorable we think it will be all right. The latter part of September is generally fine in that country, though in some years the equinoctial storms extend into October. The news will be eagerly awaited in California, and if there are no mishaps we have the utmost confidence that they will win through.

PALO ALTO, Sept. 18, 1882.

EDITOR BREEDER AND SPORTSMAN: The following is a list of the colts shipped East on Sunday last, and their engagements:

Wildflower, 3 yrs. Mali Stakes, Oct. 3, New York.
Marlet, 3 yrs. Mali Stakes, Oct. 3, New York.
Bertha, 3 yrs. Kentucky Stakes, Oct. 11, Lexington, Ky.
Hinda Rose, 2 yrs. Lexington Stakes, Oct. 10, Lexington, Ky.
Flower Girl, 2 yrs. Lexington Stakes, Oct. 10, Lexington, Ky.
Kentucky Stakes, 76 nominations, 39 declarations.
Lexington Stakes, 85 nominations, 36 declarations.
The above stock was shipped in charge of Chas. Marvin.
Yours truly,
FRANK COOKEY.

The State Fair.

The weather on the Friday was a very welcome contrast to the intense heat of the Tuesday and Wednesday, when every one, and especially those living on the Bay, suffered immensely from its effects. During the morning there was a great deal of talk indulged in concerning the race of the 2:22 class, and the general idea prevailed that if Romero, through his recent sickness, had not been short of work, the final result would have been different, and the many stories were amusing, how hundreds and hundreds were at stake, that by careful and systematic hedging resulted in the gain or loss of only a few dollars. Through an error made in the transcribing of the race from the original notes, the principal heat was omitted from our report last week, and the following is another account of this very interesting race:

There was but little difficulty in getting them off on even terms, Goldsmith sending Romero at once to the fore and at the half, in the fairly good time of 1:10, the gray led by three lengths, Brigadier, driven by his owner, having lost in a break, while Belle Echo, also piloted by her owner, was apparently being held in reserve. After the first half the pace became slower, Belle Echo getting off her feet, and although Brigadier closed up part of the distance that separated him from the winner, Romero finished in a jog in 2:22. The second heat was of a far more lively character and this time Brigadier was shaken up to his work and he was almost lapped with Romero when the latter reached the half mile in the fast time of 1:08, and Romero trotting very squarely finished the heat in 2:20 by three lengths from Brigadier, the mare making a poor third. The announcement of the time was received by the public with applause, but his backers were less confident about his being able to repeat in any such time.

Nevertheless there was as yet but little hedging as it was also thought that Romero could finish the race in the next heat, and \$100 to \$40 were still wagered freely on his chances. Romero to a fair start again tried to outspeed Brigadier, but the latter put in some pretty bursts of speed that kept him always within reaching distance and along the upper turn he gradually closed up, so that on swinging into the home stretch he was at Romero's wheel and although he was urged to his greatest speed, a bad skip ended his chances and Brigadier dashed under the wire the winner in 2:23, the half having been made in 1:10.

Now the boys began to be alarmed and there was a good deal of hedging on both sides that made up a very profitable race for the pool-box. Brigadier sold on an average at \$150 against \$80 for Romero while Belle Echo brought \$75 on the strength of a report that she had been kept in reserve for a brilliant finish. This time it was Brigadier who assumed the initiative and Belle Echo was sometimes in pretty close attendance, but when the half was reached in 1:14 and Brigadier was well in advance it appeared evident to the staunchest friends of Romero that he was not in condition to last through a race of split heats. But he still made a good effort in the homestretch and was only beaten out by Brigadier by four lengths in 2:28.

Now there was a stampede to hedge the Romero tickets and Brigadier sold for \$100 to \$30 on the field. This time again the pace was of a leisurely description, Brigadier reaching the half mile in 1:15 with both the others on even terms just lapping him. Here the speed was increased and the three came down the stretch with Brigadier still well in the lead when within the last fifty yards Belle Echo was brought up with a masterly rush, and they went under the wire so closely locked that the judges decided it a dead heat in 2:27. The final heat was altogether between Belle Echo and Brigadier, the odds being \$50 to \$20 in the latter's favor. The two horses trotted to the half lapped together in 1:13, while Romero's movements were hampered by a bad break on the first turn. They trotted together admirably and on so even terms that it looked like a repetition of a dead heat when at the draw gate Belle left her feet and could never close the gap, Brigadier being pressed to the finish in 2:25, and yet as before mentioned the original backers of Brigadier were not happy, as they had so carefully hedged their bets that they lost on their investments.

The card for the Friday was composed of four running races, the first of which was the colt and filly stake, a dash of a mile for two-year-olds, \$50 entrance, \$15 forfeit, with \$200 added. There were ten original entries, but only three sported silk, May B running highest in the pools at \$50 against \$35 for Flou Flou and \$5 for Certiorari. Among the principal absentees were Satanela of the Palo Alto stable, Lou Spencer, belonging to Mr. Winters, and Panama, owned by Mr. Coutts. It was an easy task for Mr. Finigan, who acted as starter, to get them off pretty well together, and May B at once shot to the front, with Flou Flou held readily within reaching distance, and thus they traveled well around the upper turn when Flou Flou gradually moved up and challenging May B at the distance won a beautifully contested race by a short head in 1:46, Certiorari being a poor third.

SUMMARY.

AGRICULTURAL PARK, SACRAMENTO, September 15.—Colt and Filly Stake for two-year-olds; dash of one mile, \$50 entrance, \$15 forfeit, \$200 added; second horse, \$50, third, \$25. Ten entries, of which seven pay forfeit.

C. Van Buren names P. Coutts' blk f Flou Flou, by Monday, dam Jennie C, 97 pounds..... 1
Put. Robson names ch f May B, by Saturday, dam Jennie R, 97 pounds, 2
G. W. Trabern names ch g Certiorari, by Joe Daniels, dam by Norfolk, 97 pounds..... 3
Time—1:46.

The next was a selling race for all ages, a dash of a mile and a quarter, in which Ella Doane was privately announced as a sure thing and consequently she fetched the highest price at about \$25 against \$40 for the field in which were Haddington, Vila Randlett, Enchre and Sister to Lottery. The race was entirely between Ella Doane and Haddington, both carrying nearly even weights. At the drop of the flag Haddington moved briskly to the front and at the end of half a mile was fully five lengths ahead of Ella, and going so easily that it looked as if the favorite was destined to be bowled over for the second time in the day, but down the back stretch and around the straight Ella, Enchre and Vila moved closer up and at the draw gate they were all whipping save Ella and she out-stayed them all, winning in a handy manner in 2:10, Haddington a good second, and Vila Randlett a fair third.

SUMMARY.

Same day.—Sell race, purse, \$40; for all ages; dash of one and a quarter miles; \$10 to second horse; entrance, five per cent. to third; horses entered to be sold for \$1,500 carry full weight; for \$1,200, three pounds off; for \$1,000, five pounds off; for \$750, seven pounds off; for \$500, ten pounds off; 12 entries of which seven declared out.

J. T. Gilmer names ch h (5) Enchre (\$600), by Leicester, dam Flush, 167 lbs..... 0
Time—2:10.

the field became first choice at \$50, but there was seemingly no desire among the backers of Honesty to hedge their investments, as he sold for \$35 and Ashley for \$8. In this heat Del Sur was left on a run and Ashley passed Cairo at the quarter as he was indulging in the same jumping, but Cairo soon resumed the advantage, and although Honesty this time made an effort to come up, Cairo beat him out by two lengths in 2:28½, Ashley being a poor third and Tump Winston distanced. Now there was some lively hetting, the field bringing \$120, \$40 for Honesty and \$10 for Ashley, and when his backers were abandoning his chances Honesty took it into his head to make a rattling good heat, for although both Cairo and Ashley were ahead of him at the half mile, he was even with them on the homestretch and after a handsome tussle: Honesty won in 2:26½ by a short head from Cairo, Del Sur being third. Honesty was again installed first choice at \$50 against \$40 for the field, but this time Cairo gave a good proof of his endurance, for he waltzed away from his opponents and won in 2:27 by seven open lengths from Honesty, Del Sur being a poor third, and this brought the week's meeting to a rather tame conclusion.

SUMMARY.
Same Day—Purse, \$600; for arranged entries, divided at the same rates as in all the other purses, sixty per cent. to the first, thirty per cent. to the second and ten per cent. to the third horse.

Stock Exhibits and Premiums.

The exhibits of blood stock, horses, cattle, sheep and swine at the State Fair which closed last Saturday were larger and more varied than have ever been before seen at Agricultural Park and indicated a healthy and increasing interest in the breeding of the noblest specimens of the bluest blood. The great increase in the number of exhibitors in these departments is a matter of congratulation and satisfaction to those who hope and desire to see California moving toward that place in the first rank to which she is entitled as the natural home of the equine and bovine nobility. Farmers recognize the value of book pedigrees as they never have before and the gentlemen of wealth who can find congenial employment for their money and tastes in a systematic effort to attain perfection in the lower animals are steadily growing in number. One of the notable features of the fair this year was the exhibit of Mr. J. B. Haggin, which included thoroughbred horses of the most unexceptionable strains, standard trotters, draft and coach horses. The collection was larger than that of any other single exhibition and of a character that elicited the unqualified admiration of the lookers-on, both the versed and unversed in horse lore. All branches of the horse family were represented among the different competitors for prizes and the specimens submitted were of the finest in their several classes. Of the cattle, Col. Younger was alone as an exhibitor of Shorthorns and deserved the many high encomiums his herd received. In the list of Jerseys, many breeders appeared, Henry Pierce of this city being the largest, with twenty-eight thoroughbreds. Major Robert Beck was at the fore and carried off the first prize with his handsome bulls. R. Noel of Grass Valley and Jas. Askew of Placerville also showed fine herds of Jerseys and divided the honors with the valley breeders. Ayreshires, Devons, and other less prominent herds were present in the highest types. Appended is a list of the exhibits, and the premiums awarded:

Entries in Horse Department.

Thoroughbred stallions, 4 years and over, Wm. M. Murray, Tulare, Saml. Stephenson, by Thad Stevens—by Rifleman.
Wm. Boots, Milpitas, Nathan Coombs, by Lodi—Miami.
Geo. Hearst, San Francisco, Jim Brown, by Foster—Flash.

Three-year-olds, W. M. Murray, Tulare, Bird Catcher (brother to Modoc).

Two-year-olds, W. L. Pritchard, Berrian, by Bazaar—Avail.
Thoroughbred mares, 4 years old and over, Wm. Boots, Milpitas, Mollie H, by Wildidle—Mamie Hall.

Three-year-olds, A. M. Ottenback, Rottier Station, Sacramento county, Lillie S, by Leinster—by Breckenridge.

Two-year-olds J. B. Haggin, Young Flush, by Leinster—Flush; ditto, Irene by Leinster, ditto—Irene Harding.

Yearlings, J. B. Haggin, Rosebella, by King Alphonso—Miranda; ditto, Joy, by Lever—Alix; ditto, Mariposa, Monarchist—Heliotrope; ditto, Faustini, by imported Glenelg—Marmot; ditto, Lina, by King Alphonso—Titania; ditto, Mileta, by Lever—Malta; ditto, Ginlietta, by Monarchist—Alert; ditto, Hironelle, by imported Glenelg—Susie Linwood; ditto, Sweetbriar, by Virgil—Impudence; ditto, Schoolgirl, by Pat Malloy—Gleniune; ditto, My Love, by Virgil—Lightfoot; ditto, La Favorita, by Glenelg—Edeny.

Families not thoroughbred, sire and not less than 5 colts, S. S. Drake, Vallejo, Admiral and 10 colts, by Volunteer—Ia y Piers n.

Families not thoroughbred, dam and not less than 2 colts, Wm. Bandon, Hicksville, Dollie and 2 colts, by Teemseh—by St. Clair.

Class 2, horses of all work, stallions, 4 years and over, W. A. Munnion, Dixon, Pedro, Jr., by Pedro—Kentucky Whip Stock.

J. Bassett, Elk Grove, Charlie, by Charlie—Unknown; ditto, Byron, by Charlie, ditto—unknown; ditto, Bob, by Charlie—unknown.

A. Bellina, Haywards, Gen. Grant Jr., by Gen. Grant—Morgan Mare.

W. R. Cummington, Nicolaus, Montreal Telegraph, by Champion—Blanche; ditto, Levy Slaggard, by Capt. Slaggard—Lucy.

E. Comstock, Sacramento, Prince, by Sir Wm. Wallace—Polly.

A. Martin, Davisville, Yolo county, Frank Murphy, by Tam O'Shanter—Norman.

J. W. Chiles, Davisville, Joe, Joe Daniels—Unknown.

T. Van Veehten, Brighton, Sacramento county, Combination, by Vibrator—Hamheltonian.

J. B. Haggin, San Francisco, Admiral, an imported French stallion, three years old.

Wm. McClellan, Madison, Prince, Clydesdale—unknown.

J. Rassett, Elk Grove, John, by Charlie—Unknown.

A. D. Miller, Brighton, Hamilton, by Cal. Star—Nelson.

Two-year-olds, J. Rassett, Elk Grove, Prince, by Charlie—unknown.

A. Bellina, Haywards, Mayboy, by Gen. Grant Jr.—by Belmont.

P. J. Shafter, Olema, Black Prince, by Crown Prince—Runk mare.

Yearlings, S. W. Horn, Sutter Creek, Major Nelson, by Chiefain—by Nelson.

A. Bellina, Haywards, Frank, by Gen. Grant Jr.—by Rattler; ditto, Elijah Belmont, by Gen. Grant—Belmont mare.

For the next race there were great expectations, it being a post stake, a dash of three miles, \$100 entrance, with \$500 added, weight 100 pounds save for three-year-olds, they to carry 90 pounds. There were six entries, namely: W. Boots, Palo Alto Stock Farm, W. L. Pritchard, George Hearst, J. T. Gilmer and Stemler & Ayres. Now from this list it appeared as if Precious, Jim Brown, Red Boy and Fred Collier would all be started for this valuable stake, but the lovers of a well contested race were doomed to disappointment, as when the nominations closed on the Wednesday evening it was found that there were only three, Wm. Boots naming Mollie H; W. L. Pritchard, Captain Kidd, and Stemler & Ayres, Fred Collier. This race seemed almost a walk-over for Fred Collier and odds were freely laid at \$100 to \$15 in his favor but as a miniature simoun broke over the track just before the horses were called to the post, the quotations became rapidly reduced and \$20 to \$25 could be obtained on the field against \$80 for Fred. There were several reasons adduced for the change, one being that Fred Collier had not quite recovered from his sickness, and that he would find it hard to go the distance at any kind of a good pace. Then there were some dark kints thrown out that Captain Kidd was a far better horse than he was given credit for, and that if he could be controlled he would give a good account of himself, but this he disproved, immediately he arrived at the post, as at the first false start he broke away and galloped nearly half a mile before he was got under control. Again the wind came whirling the sand up in countless eddies, and in such masses that sad havoc was played with the costumes of the ladies and children who crowded the grand stand, and at times the clouds of dust were so dense that no view could be obtained of the track on the opposite and upper turns, a strong presage of an approaching heavy rain storm. The race requires but very little description. Captain Kidd, apparently overpowering his jockey, rushed off at a terrible pace, and when he finished the first mile in 1:45½ with Fred and Mollie respectively twenty and twenty-five lengths behind, it was evident he could not keep up the pace, as already he showed signs of distress. Shortly after passing the grand stand the Captain began falling back and on the mid back stretch Fred Collier assumed the lead amid great applause and at the completion of the second mile in 3:38 he led Kidd by thirty lengths and soon after the latter fell back to the rear division, but Mollie H had no chance whatever to close the gap between her and the leader, and Fred won in 5:40 by a couple of hundred yards with Captain Kidd beaten off.

SUMMARY.

Same day—Post Stake, dash of three miles, free for all, \$100 entrance, \$500 added, weight 100 pounds, three-year-olds 90 pounds, second horse to receive \$150, third \$100. Starters to be named to the Secretary Wednesday evening, at or before 8 o'clock p. m., the subscribers being Wm. Boots, Palo Alto Stock Farm, W. L. Pritchard, George Hearst, J. T. Gilmer, and Stemler & Ayres.
Stemler & Ayres name ch g Fred Collier, 4 years, by Joe Hooker, dam Puss, by Norfolk. 1
Wm. Boots names b m Mollie H, 5 years, by Wildidle, dam Mamie Hall, by Norfolk. 2
W. L. Pritchard names b c Captain Kidd, 3 years, by Leinster, dam Tibbie Dunbar. 3
Time—5:40.

The fourth race was a Consolation purse of \$250 for beaten horses, entrance free, a mile and repeat, in which were nominated Maria F, Atalanta, May D and Jim Douglas; the entries being made immediately before the running of the Post Stake. As the meeting was drawing to a close in a hetting point of view there was a general scramble among the talent either to make up their losses or to increase their little hoard in this race and betting was consequently very heavy while the mutual pools were, as in all running races, totally inadequate to the demand. Curious to relate, May D was made first choice, probably on a favorable answer to some private trial; but public form was far from being ignored and Maria F and Atalanta both had enthusiastic supporters while the fine running of Jim Douglas last year was not forgotten.

It was now 4:30; the sky again grew dark, clouds of dust raised by contesting winds blowing from all quarters, apparently, swept up and down the track, and filled the air so that one could not see a distance of fifty yards. Hats were blown across the paddock, light wraps wafted aloft, parasols reversed, plumes disarranged, bonnets crushed in, horse nets torn off or turned over the animals' heads, the cards on the judges' bulletin board torn down, and all sorts of light damage done. The people enjoyed the scene immensely, and cheered loudly every unlucky pedestrian who went scudding after his fleeing hat. Presently thunder was heard, sheet and forked lightning flashes athwart the lowering sky, and just as the Consolation race was called, down came the rain. Then there was one of the liveliest and most amusing scenes witnessed that has been recorded. Twelve hundred people in the paddock and on the course broke for cover, while the 7,000 under shelter poked all sorts of fun at them, and gave them sonorous and gratuitous advice how to dodge between the drops and pick themselves out of the sloppy mud of the track that developed in ten seconds after the down-pour began. For the next half hour, between the laughter of one side, and the eblagrin of the other, the storm, mud, thunder and lightning, the dripping jockeys and the drenched pedestrians, there was merriment and entertainment enough to satisfy the most laughter-loving mortal ever born. The race was sent off in the midst of the rain, and part of it was run in mud hoof deep. The jockeys came in so covered with mud, and their faces so plastered with mother earth, that it was difficult to recognize them, while their silk and satin uniforms were fairly ruined. It was their own desire to run the race, despite the storm, for at one time the Board of Judges were on the point of ordering the race postponed.

As may be supposed there was not so much trouble sending the horses off as there was to get the jockeys out from the eaves that gave them shelter from the drenching rain. At the first trial they were dispatched to a somewhat straggling start, Atalanta forcing the pace at a furious rate and at every stride bespattering May D and Maria F, who were striving to get up with her, but in vain as she finished first in 1:44½, two lengths ahead of May D, with Jim Douglas a fair third. This was considered very fast time by those who had not had experience on the Eastern race courses, where it is known that when the rain has not the time to soak into the second and hard coating, the track is not made much heavier by a strong rain storm, as the effects are felt much more on the succeeding day. Atalanta now became the heat choice, but there were a great many who freely backed Maria F, as she had shown rough, but good honest form all through the season, while the other two met with only lukewarm support. In the second heat Jim Douglas at first made the running and at the half mile post he just led the three others all bunched, but he could no longer keep the pace and resigned the first position to May D, who, as they rattled down the homestretch, looked a winner, but Maria F gradually overhauled her and beat her out in 1:47, with Atalanta a good third. There was now a great deal of betting on the final heat, Maria F selling for \$60 against \$10 for May D, and \$25 for the other two combined. A prettier finale was never seen on a race course, Atalanta running up to Maria

F for the lead and never being able to get more than the shortest of necks ahead, and thus at the hight of their speed they went around locked together as a team and as they entered the homestretch Atalanta was seen to give way a little and an excited trainer offered \$100 to \$10 that she was beaten, that was quickly taken up by one of the directors of the Blood Horse Association, and it looked as if the long odds were lost, as Atalanta, with great gameness, came again, but amid yells and applause, whipping and spurring, Maria F headed the race in 1:47 by the shortest of heads, the general belief being that the two fillies were so evenly matched that if Maria F had held the outside position the result would have been reversed.

SUMMARY.

Consolation Purse, \$250 for beaten horses; one mile and repeat; entrance free; second horse to receive \$50.
George Hearst names ch f Maria F, by Leinster, dam Flash, 3 years, 92 pounds. 4 1 1
Theodore Winter names ch f Atalanta, by Norfolk, dam Lady Jane, 92 pounds. 1 3 2

George Howson names b s Jim Douglas, 4 years, by Wildidle, dam by Norfolk, 108 pounds. 3 4 4
Time, 1:44½, 1:47, 1:47.

Saturday.

Through reasons over which the Society had no control, the final day of the meeting did not possess those attractions that in some years caused the receipts at the Park to equal if not to exceed those of any previous day of the meeting. The first on the card was a double team race for a purse of \$800 for the 2:40, class which fell through by reason of ailments in one horse in each team. Then the purse for the 2:19 class failed to fill and to take its place the directors offered a purse for runner of \$350 for a mile and repeat race; that was the first one on the card and included in the entries were Nighthawk, Howell and Frank Rhoades, Maria F being withdrawn after her punishing race of the previous day. To use a very common but expressive word, there seemed to be a little "shenanagin" going on in regard to the betting in this race. On the evening before, there was some rivalry for first position between Howell and Nighthawk, the former selling at last as first favorite at \$50 to \$40 with \$5 to Frank Rhoades. In the morning there was a good deal of useless cackle indulged in as to a rider being got at to throw a heat and other nonsense that induced Mr. Shafter to give the mount on Nighthawk, to Howell, on a resolution that in the way of results was lamentable indeed as the mare is very difficult to manage, and as she was already somewhat sore and ill tempered, it is not astonishing that she could not run anywhere up to her previous bright record and consequently was beaten. But nevertheless Nighthawk was made a great favorite in the pools, selling for \$100 against \$65 for Howell and \$10 for Frank Rhoades. The mare was terribly fractious, greatly delaying the start, but when the flag was dropped Frank rushed for the lead and held it for nearly half a mile and at that point the three were all on even terms, but on the home stretch Howell came away and won handily in 1:43½, Nighthawk a fair second. In the second and final heat Howell was a great favorite and he had a slight advantage under a pull, all the way round, and although Nighthawk made a desperate finish under whip and spur, Howell took the race easily in 1:45.

SUMMARY.

AGRICULTURAL PARK, SACRAMENTO, September 15.—Purse of \$350, the second horse to receive the entries, five per cent. of the purse and the third horse \$50; a mile and repeat.
Stemler & Ayres name b g Joe Howell, aged, by Bonnie Scotland dam Eva Sheppard, by imported Sovereign, 111 pounds. 1 1
P. J. Shafter names b m Nighthawk, five years, by imported Had-dington, dam by Norfolk, 111 pounds. 2 1
W. H. Pritchard names b s Frank Rhoades, four years, by Leinster, dam Addie A., 103 pounds. 3 3
Time—1:43½, 1:45.

The next race for decision was the famous Occident Stake, in which of all the original entries only five made their third payments, and as they have all suffered more or less from the epizooty, there was but one that made her appearance and that was Bertha of the Palo Alto stable, and she walked over for the stakes and piece of plate presented by the Association.

SUMMARY.

Same day—Occident Stake for 1882, closed in 1881, and the third payments have been made on the following:
Leland Stanford names b f Bertha, by Electioneer, dam American Girl, by Toronto Sontag. w.o.
James M. Learned names b c Adrian, by Reliance, dam by Kentucky Hunter. pd ft.
J. C. Simpson names b c Anteeo, by Electioneer, dam Colmbine, by A. W. Richmond. pd ft.
H. Waldstein names b f Nellie W, by Electioneer, dam full sister to Aurora, by John Nelson. pd ft.
Leland Stanford names b c Benefit, by Gen. Benton, dam Lucetta, by Rysdyk's Hambletonian. pd ft.

Next on the card was a race for gentlemen's saddle horses in which professional riders were barred. The entries were Prince, Truant, Nellie Woods, John and a chestnut horse without a name. At the drop of the flag the running was made by the two latter, but before they reached the half mile they were both pumped out and John took the lead, while Truant was gently held in reserve, and when, while well in the homestretch, he was let loose, he won with something to spare in 1:55, with Prince second two lengths ahead of John and Nellie Woods pulling up far in the rear. The race was well ridden on the winning and second horses.

SUMMARY.

Gentlemen's Saddle Horse Race; Purse \$100; dash of one mile; weight not less than 140 pounds. Professional riders barred.
O. C. Jackson names ch h Truant. 1
Fred Bridge name ch h Prince. 2
Henry Clump names b h John. 3
B. W. Cavanaugh names ch h —. 4
J. L. Zuyver names ch m Nellie Woods. 5
Time—1:55.

It had been announced that Wildflower would trot against her record of 2:21, but she in turn was suffering from the prevailing complaint and she was merely shown in the track, where her fine and graceful form elicited many favorable comments.

The last was an arranged race for a purse of \$600, in which Honesty was whooped up into the first position, and until the contest was at an end he was almost always the favorite and his sanguine backers realized that "Honesty is not always the best policy." He sold for \$80 against \$25 for Ashley and a like amount for the field, in which were Cairo, Del Sur and Tump Winston. Why Ashley should sell over Cairo as second favorite was a conundrum no one could understand, and before the race was over many regretted that they had not followed the British example and "taken Cairo." The first heat was all between Del Sur and Ashley, and the former beat the latter out by a length in 2:25½, and at double that length came Cairo, and then the favorite, with Winston last. In the second heat Del Sur again made the pace but with a bad break he resigned the position to Ashley who in turn was lapped at the half mile and then passed by Cairo, who finished a pretty heat first in 2:26½, two lengths ahead of Tump Winston, with Honesty a fair third. At last

Under one year, A. Bellina, Haywards—Rowdy Boy, by Gen. Grant Jr., by Belmont; ditto, Butt Cut, by Gen. Grant—by Belmont.

Horses of all work, mares, four years and over, J. Russell, Elk Grove, Lucy, by Charlie—unknown.

A. Bellina, Haywards, Dollie, unknown—unknown.
E. Comstock, Sacramento, Coalie, by Old John Nelson—Pollie.

S. S. Drake, Vallejo, Eva, by Admiral—unknown.

A. D. Miller, Brighton, Lucy Gray, by Senator—Hambletonian; ditto, Perch, by Idol—Black Hawk and Messenger.

Four years old and over with colt, M. Wick, Oroville, Fly and colt, Clydesdale—Potomac mare.

Two-year-olds, S. S. Drake, Vallejo, Mary, by Admiral—unknown.

Yearlings, B. E. Harris, San Francisco, Abbottine, by Abbotsford—Lena Bowles.

R. Brown, Brighton, Fanny, by Franklin—Messenger.

Sucking colt, E. Comstock, Sacramento, Lena, by Leinster—Cora.

Class 3, draft horses, stallions, four years and over, A. J. Ogden, Woodland, Tam O'Shanter, by T. O'Shanter—unknown; J. Conrod, Davisville, Norman, by imported Cupid—Young America; T. Skillman, Petaluma, Tornado, by imported St. Lawrence—imported Eureka; A. H. Thomassen, Rontier Station, Highland Laddie, by Wm. Wallace—by Laboo; T. Wilson, Nicolaus, St. Lawrence, by Champion Bell Eyre—St. Lawrence mare; J. B. Haggin, San Francisco, Black Prince, by imported Shire Horse.

Three-year-olds, R. J. Merkley, Sacramento, Normandy II by Normandy—Nellie; A. J. Pierce, Petaluma, Charlemagne, by Duke de Chartres—Susie Rose; P. H. Murphy, Brighton, Grey Eagle, by Normandy—Black Maria.

Two-year-olds, T. Skillman, Petaluma, Monarch, by Tornado—Polly; E. Comstock, Sacramento, Bellie, by Norman horse—Mary.

Yearlings, R. J. Currey, Dixon, Nimbus, by Duke of Mayons—Clydesdale mare; T. Skillman, Petaluma, Model, by Tornado—Lucy.

Under one year old, R. J. Currey, Dixon, Chief, by Duke of Mayons—Mag; E. Comstock, Sacramento, Maje, by Grey Eagle—Maud.

Draft horses, mares, four years and over, with colt, R. J. Currey, Dixon, Mag and colt, by Tam O'Shanter—unknown; R. J. Merkley, Sacramento, Nellie and colt, by Lafayette—English draft mare; E. Comstock, Sacramento, May and colt, by Sir Tom Wallace—Polly.

Four years and over without colt, C. Thodt, Dixon, Fanny, pedigree unknown; ditto, Daisy, by Norman—unknown; E. Comstock, Sacramento, Maud, by Sir Tom Wallace—Polly.

Three-year-olds, C. Thodt, Dixon, Lucy—pedigree unknown.

Two-year-olds, R. J. Merkley, Sacramento, Fanchon, by Normandy—Nellie.

Yearlings, T. Skillman, Petaluma, Gertude, by Tornado—unknown; A. H. Thomassen, Rontier Station, Lady St. Patrick, by Highland Laddie—unknown.

Sucking colt, R. J. Merkley, Sacramento, Juanita, by Sir Archer—Nellie; A. H. Thomassen, Rontier Station, Jennie, by Highland Laddie—unknown.

Roadsters, stallions four years old and over, Jno. Denner, Grass Valley, Don Castor, by Elmo—Lady Emile; H. Webster, Sacramento, Jack Wilson, by Jno. Wilson, Flag of Truce, by Messenger; A. T. Hatch, Suisun, Admar, by Admiral—Bruna; P. Fitzgerald, Woodland, Killarney, by Black Ralph—Eclipse mare; P. J. Shafter, Olema, Rustie, by Whipple's Hambletonian—by Belmont; Wm. Rawson, Woodland, Victor, by Echo—by Woodburn; J. B. Haggin, San Francisco, Zulu Chief, by Mohawk Chief—Sallie Come Up; W. K. Robinson, Santa Ana, Odd Fellow, by Echo—Thortis; M. W. Hicks, Florin, Sacramento county, Prompter, by Blue Bull—Prairie Bird.

Three-year-olds, W. M. Murray, Tulare, Fresno Boy, by Monday—unknown; ditto, Serrel Frank, by Patchen—by Belmont; ditto, William W. by Washington—by Signal; M. W. Hicks, Florin, Starling, by Egmont—by Flaxtail.

Two-year-olds, A. M. Otterback, Rontier's station, Rival, by Buccaneer—by Compromise; J. M. Learned, Stockton, Harmony, by Reliance—by Kentucky Hunter; Wm. Ingram, Leemoore, Tulare county, Almoore, by Algona—Oregon mare; S. S. Drake, Vallejo, Argenta, by Admiral—by Speculation; Standard, by Admiral—by Mohawk; J. A. McCloud, Stockton, Judge Patchen by Nephew—by Chieftain; A. D. Miller, Brighton, Sacramento county, Young Bashaw, by Buccaneer—Tecumseh; M. W. Hicks, Florin, Privateer, by Buccaneer—by Marion.

Yearlings, H. Webster, Sacramento, ch e, by Jack Wilson—unknown; ditto, Jack Wilson—unknown; J. C. Hasty, Chico, California Chief, by Buccaneer—Voleian; ditto, Chico by Buccaneer, by Reno; B. F. True, Chico, Ralph T, by Buccaneer—Harkaway; L. G. Rose, San Gabriel, br c, by Sultan—Gertrude; S. S. Drake, Vallejo, Aleck, by Admiral—by Ventura; A. L. Frost, Sacramento, Roscoe, by Brigadier—Flora F.

Sucking colts, B. F. True, Chico, Ben T, by Singleton—Harkaway; B. E. Harris, San Francisco, Style, by Del Sur—by Tenbrook; ditto, Littleton, by Athurton—Smoothbriar; S. S. Drake, Vallejo, Amateur, by Admiral—Mary; R. H. Newton, Woodland, Del Sur Jr., by Del Sur—by Black Ralph.

Roadsters, mares, four years and over, G. W. Hancock, Sacramento, Jennie St. Clair, by old St. Clair—by Lexington; ditto, Lolo Nelson, by Jno. Nelson—unknown; J. M. Learned, Stockton, Ollie Ray, by Reliance—by Signal; S. T. Cottonwood, Yolo county, Katie, by Dietz St. Clair—by Tom Moore; C. Younger, Forest Home, Fanny, by Black Eagle—Black Maria; P. Van Nichten, Brighton, Nell, by Liberator—Morgan mare; W. J. O'Brien, Sacramento, Maggie A, by Tecumseh—Messenger mare; M. W. Hicks, Florin, Pearl, by Blue Bull—by Flaxtail.

Three-year-olds, S. T. Cottonwood, Yolo county, Susie, by Turtlote—Dietz St. Clair; J. B. McDonald, Marysville, Hazel Kirke, by Brigadier—by Jim Brown; S. S. Drake, Vallejo, Sister, by Admiral—Black Flora.

Two-year-olds, J. B. McDonald, Marysville, Yuba Maid, by Brigadier—Reese River; J. B. Haggin, S. F., Lady Gray, by Algona—by Jack Hawkins.

Yearlings, B. E. Harris, S. F., Rose Abbott, by Abbotsford—Young Rosedale; S. S. Drake, Vallejo, Flora, by Admiral—Flora; M. Toomey, Brighton, Minnie Toomey, by Adonis—Lady Brighton; M. W. Hicks, Florin, Clara, by Buccaneer—by Wayland Forest; ditto, Cora, by Buccaneer—by Blue Bell.

Sucking colts, G. W. Hancock, Sacramento, Daisy, by Nutwood—Jennie St. Clair; ditto, Thela, by Nutwood—Lola Nelson; S. S. Drake, Vallejo, Peggie, by Admiral—Goldfinder.

Class 5, carriage horses, matched span, B. Ma'den, Dixon, Peanut and Pop Corn, by Challenge, Young Nelson—unknown; W. R. S. Foye, Sacramento, Frank and Charles, by Challenge—Morgan mare.

Class 6, roadster teams, H. Stegall, Woodland, Ralph sis-

ters, by Black Ralph—dam unknown; A. H. Thomassen, Rontier's Station, Jane, unknown—by Laboo; ditto, Lena T, Hambletonian—Morgan Blackhawk.

Class 7, standard trotters, stallions, four years old and over, J. B. Haggin, S. F., Alaska, by Electioneer—Lucy.

Yearlings, J. A. McCloud, Stockton, Mt. Vernon, by Nutwood—Chieftain.

Standard trotters, mares, E. K. Miller Jr., S. F., Adalia, by Fred Low—Addie Lee; J. B. Haggin, S. F., Woodbine, by Electioneer—Woodbine.

Class 8, saddle horses, B. E. Harris, S. F., Mike Price, by Irvington—Min Price; Vanity, by Belmont—Big Lize; W. S. Enos, Davisville, Pinto, by Dick Turpin—Nellie.

Class 9, sweepstakes horses, stallions, J. B. Haggin, S. F., Echo, by Rysdyk's Hambletonian—by Magnolia; Algona, by Belmont—Emma Kincaid.

Sweepstakes horses, mares, R. J. Merkley, Sacramento, Nellie, by Lafayette—English draft mare; J. B. Haggin, S. F., Woodbine, by Electioneer—Woodbine.

Class 10, jacks, four years and over, W. A. Munnion, Dixon, Jno. Henry by imp. Mammoth; J. Conrod, Davisville, Black Jack—pedigree unknown.

Three years old, L. U. Shippee, Stockton, Castilian, by Sure John—Carlisle.

Jennies, L. U. Shippee, Stockton, Duchess, by Royal Duke—Revelie; Beauty, by Goliath—by blk Warrior.

Mules, best span, W. Miner, Davisville, Colie and Jamie, by Merri's Jack—dam unknown.

Cattle.

Durhams, E. Comstock, Sacramento, 3 head; P. H. Murphy, Brighton, 4 head; R. J. Merkley, Sacramento, 8 head; M. Wick, Sacramento, 13 head; C. Younger, Forest Home, 20 head.

Jerseys, Henry Pierce, San Francisco, 28 head; Robert Beck, San Francisco, 12 head; R. Noel, Grass Valley, 12 head; P. Stanton, Sacramento, 9 head; Jas. Askew, Placerville, 6 head; J. Lyon, Placerville, 4 head; Wm. Hook, Sacramento, 2 head; J. W. Crites, Jan Jose, 1 head; F. P. Lowell, Sacramento, 1 head; A. Landers, Sacramento, 1 head; Devons, R. McEnespy, Chico, 7 head; C. M. Bryant, Chico, 1 head.

Ayrshires, George Bement, Redwood City, 10 head.

Guernseys, Henry Pierce, San Francisco, 6 head.

Herds, Durham old herds, C. Younger and M. Wick; young herds, C. Younger and M. Wick.

Jerseys, old herds, Henry Price and R. Noel; young herd, Henry Price.

Guernsey herd, Henry Price.

Devon herd, R. McEnespy.

Ayrshire herd, George Bement.

Sweepstakes, cattle, best bull, C. Younger and M. Wick.

Best bull and three of his calves, C. Younger and M. Wick.

Milch cows, George Bement and J. Askew.

Fat cattle, C. Younger and M. Wick.

Sheep.

French Merinos, J. R. Bramton, Reno, Nev., 1 head.

Spanish Merinos, J. H. Strowbridge, Haywards, 13 head; F. Bullard, Woodland, 13 head.

Shropshires, J. B. Hoyt, Suisun, 12 head.

Cotswolds, C. Younger, Forest Home, 26 head.

Southdowns, Geo. Bement, Redwood City, 1 head.

Crossed sheep, J. B. Hoyt, Suisun, 10 head.

Sheep, sweepstakes, J. H. Strowbridge and F. Bullard.

Swine.

Berkshires, Thomas Waite, Brighton, 2 head; John Rider, Sacramento, 10 head; J. Kennedy, Sacramento, 1 head.

Poland China, E. Gallup, Hanford, 14 head; Jos. Melvin, Davisville, 5 head.

Swine, sweepstakes, best boar, John Rider; best sow, John Rider; best pen of six pigs, J. Melvin, Davisville; John Rider, Sacramento; M. Sprague, Sacramento.

Family of nine, John Rider and J. Melvin.

Poultry.

Chickens, T. Morris, Sonoma, 15 pairs; R. G. Head, Napa, 4 pairs; Thomas Waite, Brighton, 8 pairs; J. Conrod, Davisville, 2 pairs; J. E. Roberts, Sacramento, 1 pair; F. S. George, Sacramento, 1 pair.

Turkeys, T. D. Morris, Sonoma, 1 pair; R. G. Head, Napa, 1 pair.

Ducks, Thomas, Waite, Brighton, 1 pair; G. B. Cosby, Sacramento, 1 pair; R. G. Head, Napa, 1 pair.

Geese, Thos. Waite, Brighton, 1 pair; T. D. Morris, Sonoma, 3 pairs.

Premiums—Horses.

Class 1, Thoroughbred horses, stallions, best three-year-old, Jim Brown owned by George Hearst, \$40. Second best, Nathan Coombs owned by William Boots, Milpitas, \$20.

Mares, best four-year-old, Mollie H. owned by William Boots, Milpitas, \$30.

Best two-year-old, Irena, owned by J. B. Haggin, \$15;

second best two-year-old, Young Flush owned by J. B. Haggin, \$7 50.

Best yearling, School Girl, owned by J. B. Haggin, \$10;

second best yearling, old Hironde, owned by J. B. Haggin, \$5.

Animals not thoroughbred, stallion and five colts, Admiral and five colts, owned by S. S. Drake, Vallejo, \$50; dam and two colts, owned by William Bandoen, Hicksville.

Class 2, horses of all work, stallions, best four-year-old, Admiral, owned by J. B. Haggin, \$40.

Best two years old and over, General Grant Jr., owned by A. Bellina, Haywards, \$20.

Best three-year-old, John, owned by J. Bassett, Elk Grove, \$30.

Best two-year old, Prince, owned by P. J. Shafter, Olema; second best two-year-old, Prince, owned by Wm. McClellan, Madisen, Yolo county, \$15.

Best yearling, Major Nelson, owned by G. W. Horn, Sutter Creek, \$15; second best yearling, Frank, owned by A. Bellina, Haywards, \$7 50.

Mares, best four years old and over, Coalie, owned by E. Comstock, Sacramento, \$40; second best four years old and over, Eve, owned by S. S. Drake, Vallejo, \$15;

Best two-years-old and over, Mary, owned by S. S. Drake, Vallejo, \$15; best yearling, Abbottine, owned by B. E. Harris, San Francisco, \$10; second best yearling, Fannie, owned by R. Brown, Brighton, \$5.

Best sucking colt, Lena, owned by E. Comstock, Sacramento, \$10.

Class 3, draft horses, stallions, best four years old and over, Tornado, owned by T. Skillman, Petaluma, \$40. Second best two years old and over, Black Prince, owned by J. B. Haggin, \$20.

Best three-year-old, Normandy 2, owned by R. J. Merkley, Sacramento, \$30. Second best three-year-old, Charlemagne, owned by A. J. Price, Petaluma, \$15.

Best two-year-old, Monarch, owned by T. Skillman, Petaluma, \$20; second best two-year-old Billie, owned by E. Comstock, Sacramento, \$10.

Best yearling, Nimbus, owned by R. J. Currey, Dixon, \$15.

Best under one year, Grey Chief, owned by R. J. Curry, Dixon, \$10; second best under one year old, Maje, owned by E. Comstock, Sacramento, \$5.

Sweepstakes, best stallion, Al Gena, owned by J. B. Haggin, \$100, or silver pitcher; best mare, Woodbine, owned by J. B. Haggin, \$100, or silver pitcher.

Roadsters, stallions, best yearling and over, Rustic, owned by P. J. Shafter, \$40; second, Zulu Chief, owned by J. B. Haggin, \$20.

Best three-year-old, Starling, owned by M. W. Hicks, \$30.

Best two-year-old, Privateer, owned by M. W. Hicks, \$20; second, Almore, owned by Wm. Ingram.

Best yearling, California Chief, owned by J. C. Hasty, \$15; second, Roscoe, owned by A. L. Frost.

Best sucking colt, Del Sur Jr., owned by R. H. Newton, of Woodland, \$10; second, Ben T, owned by B. F. True.

Mares, best four years old and over, Maggie A, owned by W. J. O'Brien, \$40; second, Allie Ray, owned by J. M. Learned.

Best three-years-old, Hazel Kirke, owned by J. B. McDonald, \$30; second, Tartilote, owned by S. Tutt.

Best two-year-old, Laly Gray, owned by J. B. Haggin, \$20; second, Yuba Maid, J. B. McDonald.

Best yearling, Clara, M. W. Hicks, \$10; second, Cora, M. W. Hicks.

Sucking colt, Daisy, George W. Hancock, \$10; second, Theta, George W. Hancock.

Mares, best four years old and over, with colt, Nellie and colt, owned by R. J. Merkley, Sacramento, \$40; second best four years old and over, with colt, May and colt, owned by R. J. Currey, Dixon, \$20.

Best four years old and over, Fannie, owned by C. Thodt, Dixon; second best four years old and over, Maud, owned by E. Comstock, Sacramento, \$15.

Best three-year-old, Lucy, owned by C. Thodt, Dixon, \$30.

Best two-year-old, Fanchon, owned by R. J. Merkley, Sacramento, \$15.

Best yearling, Gertrude, owned by T. Skillman, Petaluma, \$10.

Best sucking colt, Juanita, owned by R. J. Merkley, \$10;

second best sucking colt, Jennie, owned by A. H. Thomassen, Rontier Station.

Class 5, best matched span carriage horses, owned and used as such by one person, Frank and Charley, owned by W. R. S. Foye, Sacramento, silver goblet or \$40; second best ditto, Peanut and Popcorn, owned by B. Madden, Dixon, silver goblet or \$20.

Class 6, Best double-team roadsters, owned and used as such by one person, Ralph Sisters, owned by H. Stegall, Woodland, silver goblet or \$40. Second best ditto, Jane and Lena T, owned by A. A. Thomassen, Rontier Station, silver goblet or \$20.

Class 7, standard trotters, stallions, best four years old and over, Alaska, owned by J. B. Haggin, \$40.

Best yearling, Mount Vernon, owned by J. A. McCloud, Stockton, \$15.

Mares, Best four years old and over, Woodbine, owned by J. B. Haggin, \$40; second best, Adalia, owned by E. H. Miller Jr., \$20.

Class 8, saddle horses, best saddle horse, Vanity, owned by Benjamin E. Harris, \$21; second best, Mike Price, owned by Benjamin E. Harris, \$10.

Class 9, jacks, best four years old and over, John Henry, owned by W. A. Munnion, Dixon, \$40; second best, Black Jack, owned by J. Conrad, Davis, \$20.

Best three years old, Castilian, owned by L. U. Shippee, Stockton, \$30.

Jennies, best four years old and over, Beauty, owned by L. U. Shippee, Stockton, \$30; second best, owned by L. U. Shippee, Stockton, \$15.

Mules, best span, Charlie and Jennie, owned by N. Miner, Davis, \$35.

Walking match for draft stallions, St. Lawrence, owned by H. H. Wilson, Sacramento; second best, Conqueror, owned by C. Porter, Marysville.

Cattle.

Devons, bulls, best three years old and over, Ben Butler, premium, R. McEnespy.

Cows, best three years old and over, Queen, owned by C. M. Bryant, first premium; Mayflower, second premium, owned by R. McEnespy.

Best two years old, Maud, premium, owned by R. McEnespy.

Best yearling, Spry, premium, owned by R. McEnespy.

Ayrshires, bulls, best three years old and over, Archie, premium, George Bement.

Best two-year-old, Lindo, premium, George Bement.

Best yearling, Macbeth, premium, George Bement.

Best bull calf, Malcolm, premium, George Bement.

Cows, best three years and over, Stellita, first premium, George Bement; also Ethel Brown, second premium.

Best three-year-old, Stellita, premium, George Bement.

Best yearling, Sultana, premium, George Bement.

Best heifer calf, Sybil, premium, George Bement.

Herds, Durham, best herd of Durham thoroughbreds over two years old, consisting of one male and four females, owned by one person, C. Younger, first premium; M. Wick, second.

Jerseys, best herd over two years old, consisting as above, and same conditions, first premium, Henry Pierce; second premium, R. Noell.

Best herd under two years old, same conditions, Henry Pierce, first premium.

Guernsey cattle, best herd of any age, consisting of same conditions as to number and ownership, Henry Pierce, first premium.

Devons, best herd of any age, same conditions, R. McEnespy, premium.

Ayrshires, best herd, under same conditions, George Bement premium.

Alderneys, Jerseys and Guernseys in one class, bulls, best three year olds and over, Buffalo Bill, Robert Beck owner, first premium; General Grant, J. Askew owner, second premium.

Best two-year-old, Commodore, first premium, R. Noell owner; Garfield, second premium, J. Lyon.

Best yearling William of Seitate, first premium, Henry Pierce owner; Fred Baker, second premium, owned by William Hook.

Best bull calf, Shotover, first premium, Henry Pierce owner; Buffalo Bill, second premium, Robert Beck owner.

Cows, best three years old and over, Daisy, first premium, Henry Pierce owner; Katie, second premium, R. Noell owner.

Best two-year-old, Miss Murdock, first premium, Robert Beck owner; Nellie, second premium, R. Noell, owner.
 Best yearling, Carrie, first premium, Henry Pierce owner; First Duke of Eldorado, second premium, J. Askew owner.
 Best heifer calf, Paragon, first premium, R. Noell owner; Olita, second premium, P. Stanton owner.
 Cows, best three years old and over, Rose, premium, R. J. Mockley.
 Best two-year-old, Chnt, premium, E. Comstock.
 Best yearling, Blossom, premium, P. J. Murphy.
 Best heifer calf, Pink, premium, J. Lyon.
 Sweepstakes, best bull of any age or breed, Second Duke of Alameda, first premium, C. Younger.
 Best cow of any age or breed, Gem, first premium, M. Wick.
 Best bull and three of his calves under one year old, second, Duke of Alameda, three calves, first premium.

Swine.

Swine, best boar, two years or over, prize \$20, awarded to Prince, owned by J. Kennedy; second prize, \$10, Jolly, owned by John Rider.
 Berkshire best breeding sow, first prize, Maud Hamilton, owned by John Rider; second prize, Pacific Queen, owned by Thomas Waite.
 Best pair of pigs under ten months, first prize, Nimbus and Laguna, owned by John Rider;
 Poland-China boars, first premium, King of Bonnieview, owned by E. Galley.
 Best six months old and under one year, first premium, John, entered by J. M. Davis; second prize, Black Boy, owned by E. Gallup.
 Poland-China breeding sows, first prize, Cantilina, owned by E. Gallup; second prize, Daisy, owned by J. M. Davis.
 Sweepstakes, best boar, first premium, John Rider.
 Also for best sow.
 Best pen of six pigs, M. Sprague, first premium.

Poultry.

Best pair of light brahmas, first premium, T. D. Morris and A. G. Head.
 Best pair of dark brahmas, premium, T. D. Morris.
 Cochins partridges, first premium, Thos. Waite.
 Black cochins, first premium, T. D. Morris.
 Silver Spangled Hamburgs, first premium, Thomas Waite.
 White Leghorns, Thomas Waite.
 White-faced, Beak Spanish, first premium, T. D. Morris.
 Plymouth Rock, first premium, R. G. Head.
 Houdans, premium, Thomas Waite.
 Golden Seabrights, premium, Thomas Waite.
 Bronze turkeys, premium, R. G. Head.
 Pekin ducks, premium, R. G. Head.
 Rouen ducks, R. G. Head.
 Toulouse geese, premium, T. D. Morris.
 Bremen geese, premium, T. D. Morris.
 China geese, premium, T. D. Morris.
 Langshans, premium, R. G. Head.

The Stockton Fair.

The rain on Saturday last put the finishing touch on the track and it could scarcely have been in better condition to make fast time in the trotting contests. Too hard, perhaps for the gallopers, and rather too much so for working even the trotters upon, but yet the soaking had given it considerable elasticity, and still the surface was beautifully smooth. The time of the various contests proves, that the course was in the right order, and that the managers were anxious that the premiums offered for bettering the specified time should be awarded. The weather has been delightful and the chances for grumbling narrowed to a minimum. The crowds in attendance were as orderly, probably more so, than a convention of ministers, and everything gone off smoothly. From the following account it will be seen that there was little chance for complaint.

The first race on the card was "District Running," for three-year-olds and over, heats of a mile, for a purse of \$500. Jack Douglas, Sam Stevenson, Bird Catcher, Joe Daniels Jr., Pic Nic, Minnie Belle and Lady Partisan came to the post. Pools, Jack Douglas \$60, Sam Stevenson \$20, Bird Catcher \$12, field \$38. After considerable maneuvering a tolerable start was effected and they were sent away for the first heat.

When the flag fell Stevenson showed a facility in starting not possessed, or at least exercised, by any other horse in the field. Almost before the flag had touched the ground he was a clear two lengths in advance and when the first turn came he had increased the advantage to four lengths. At this point Duffy took his horse in hand and he ran steadily down the back stretch, having a strong lead at the half with Bird-Catcher, Jack Douglas, Joe Davis Jr. and Pic Nic well together in the order named, Minnie Belle and Lady Partisan further back. In the farther turn Minnie Belle parted company with Lady Partisan and moved up to the second tier and at the three-quarter mark there was a general draw of whips on all but Stevenson. The gap was closed partially in the run home but Duffy merely slackened his pull a little and sitting in his saddle like a centaur landed the son of old Thad under the wire, winner by two lengths, Bird Catcher second, Jack Douglas third, Joe Daniels Jr. fourth, Pic Nic fifth, Minnie Belle sixth, Lady Partisan distanced. Time, 1:45. Pools, Stevenson \$40, Jack Douglas \$10, field \$9. The Paris Mutuals (\$2.50) paid first heat \$7.70; second heat \$4.40; Killip & Co.'s book not open.

At the start Stevenson went to the fore with the same readiness displayed in the preceding heat and the general outline of the running was much the same: Stevenson in hand, the field urged to their utmost. Result, Stevenson first, Jack Douglas second, Bird Catcher third, Minnie Belle fourth, Joe Daniels Jr. fifth, Pic Nic sixth. Time, 1:45.

SUMMARY.

SAN JOAQUIN VALLEY FAIR, STOCKTON, Sept. 19.—District running, for three-year-olds, and 1 mile heats, purse \$500, four moneys.
 W. M. Murray names ch h Sam Stevenson, by Thad Stevens—dam by Rifleman, 5 years, 114 lbs, Duffy..... 1 1
 Jack Douglas names ch h Jack Douglas, by Wildidle—Lady Clare, 5 years, 114 lbs, Ross..... 3 2

 Time—1:45, 1:45.

W. L. Ashe's br g Reel Terry, by California—Lara Barnes; G. W. Trahern's ch m Kate Carson, by Joe Daniels—by Norfolk; Seth Peyton's b g Geo. Bender, by ———, dam Sugar Plum; W. E. Pigott's br c Idler, by Wildidle—Kate Gift; were named in the race but did not start.

The second event was the purse for trotters of the 2:36 class. This race closed with fourteen nominations but various causes had brought the field down to four actual starters. Prominent among these causes were the pinkeye and the superior prowess of Manon. But the race itself was another evidence that no man holds the world in his hand even though he does own a speedy trotter. Manon met with inglorious defeat and had figures marked upon the board that it was beyond her power to reach. After the first heat of Tuesday it seemed as though there was nothing in the race; Manon, Vanderlynn, Frank Moscow and Big Lize were to start, and sporting men took too much stock in the doctrine of accidents to lay dollars against cents on a three in five race. Later on the announcement that Mr. Goldsmith would drive Vanderlynn brought about a change. Mr. Goldsmith is fortunate in the possession of a circle of friends who repose the utmost confidence in his abilities and his honesty. No doubt he deserves it as many of those who thus regard him are gentlemen of discrimination and judgment. His success with Cairo at Sacramento last Saturday seemed to indicate that his fingers know just the touch for "backing" trotters, and when it was settled that he would drive on Tuesday there was money ready to be laid on Vanderlynn. It was an untired experiment and the odds were long but there was quite an active business done in the pool rooms at the rate of \$30 for Manon, \$16 for Vanderlynn and \$7 for the field. When the horses were called there was a little difficulty in getting off, caused by the bad behavior of Big Lize. When the bell did tap it was on a good start and the business began at once. Vanderlynn went to the front with a spurt and Manon left her feet almost at the same time. She did not lose by the break and at the quarter, which Vanderlynn touched in 36, Manon was close behind, Frank Moscow a good third and Big Lize in difficulty ten lengths in the rear. On the back stretch Big Lize went to pieces and lost her hope of saving distance. At the half in 1:11 Vanderlynn had two lengths the lead, and around the turn the little mare made a brush for him and broke at his wheel as they reached the three-quarter pole and Vanderlynn carried off the honors of the heat, Manon second, Frank Moscow third, Big Lize distanced. Time, 2:22.

In the pools Manon was put into the field and business opened with Vanderlynn \$30, field \$23, but gradually changed until when the names were called the prevailing rate was Vanderlynn \$30, field \$40. When the bell struck Manon left her feet and ran a full eighth of a mile before McCartney got her to a trot again. In the meantime Vanderlynn was going lively and passed the half in 37½, two lengths ahead of the mare; at the half in 1:13 there was no change, but on the turn Manon broke again and Moscow followed her example. Vanderlynn swung into the stretch with the heat already won and came to the score four lengths in advance of Manon, Moscow four lengths further back. Time—2:23.

Vanderlynn's stock had now taken a boom and the closing sales before the start were three to one in his favor. It was a heat of breaks. At the outset Manon broke badly and ran three hundred yards. Soon after passing the quarter Vanderlynn made a vicious break, going to the rear, and for the first time Moscow was in front. On the far turn Vanderlynn broke again and Manon and Moscow were left to fight it out in their own way. Manon settled and overhauled Moscow with a steady stride bringing her to the mile in 2:28, Moscow second, Vanderlynn third.

Vanderlynn's behavior in the third heat braced the field up somewhat, and the last sales were Vanderlynn \$25, field \$16. At the word Manon broke and made another long run gaining perceptibly and almost moving past Vanderlynn, who had got away first. After passing the quarter Vanderlynn made a break but soon settled and at the half the three went in a bunch, Manon showing her head in front. Around the turn Moscow fell to the rear, and at the three-quarter pole Manon and Vanderlynn were on even terms, but in the trot up the stretch the pace got hot and the mare broke, leaving Vanderlynn to win the heat and race as suited him. Manon second, Moscow third. Time, 2:26½. The Paris mutuals paid, first heat, \$7.65; second heat, \$4.35; fourth heat, \$2.95.

SUMMARY.

Same Day.—Pacific Coast Trotting; 2:36 class. Purses \$1,000 and \$200 added if more than ten entries. Four moneys.
 P. Farrell names b h Vanderlynn..... 1 1 3 1
 P. Coutts names b m Manon..... 2 2 1 2
 H. B. Cooper names s h Frank Moscow..... 3 3 3 3
 W. H. Henderson names b in Big Lize..... dis
 Time—2:22, 2:25½, 2:28, 2:26½.

F. S. Hatch's Blacksmith Boy, G. Bernard's Allen Boy, W. Z. Price's San Mateo Belle, John McIntyres' Edwin Forest, C. H. Shears' Slim Jim, James Garlands' Rowdy Boy, L. H. Titus' Exile, G. W. Trahern's Revolution, Louis Duncans' Louis D, and S. Grandall's Blanche were drawn.

The third race was a mile trot for yearlings. No. 5 on the society's programme was called and decided between heats of the last race. Only two appeared, L. U. Shippee's ch f (sister to Honesty), by Priam and J. H. McCloud's b h Mt. Vernon, by Nutwood. They started off more after the manner of older horses and Mr. Shippee's filly was an easy winner. Time, 3:03. Mt. Vernon's time, 3:09.

Second Day.

On Wednesday the day was pleasanter if possible than on Tuesday and the attendance at the grand stand and carriage parks was large and extremely brilliant and fashionable. On account of the late arrival of some of the stock for exhibition and the difficulty in making room for it all in due season the first parade was postponed till Thursday. The interest centered on the races, of which there were three on the programme. The first number was a mile dash for two-year-olds owned in the district and it was a slow race for the speculators. G. W. Trahern's Certiorari, T. H. Williams Jr.'s Bryant W, D. S. Terry's, Lara and Jas F. Mahon's Gracie Mahon started, the odds being so long on Certiorari as to preclude betting although a few outsiders who had noted his indifferent performance at Sacramento last week laid a little money against him. When the starters' flag fell the position was only tolerable. Bryant W cut out the running at once, the other three being willing he should do so to all appearances. At the quarter in 27 and the half in 52½ Bryant W was first, Gracie Mahon second, Certiorari third, and Lara last, all running in a line. Around the turn they closed in a bunch and the favorite in a few strides placed himself in front. Turning the three-quarters Certiorari left them rapidly and galloped under the wire, winning by ten lengths, Lara second, Bryant W third, Gracie Mahon fourth. Time—1:48. Pools, Certiorari \$25 to \$20, Bryant W \$16 to 10, field \$9 to \$7. The Paris mutuals paid \$5.90.

SUMMARY.

SAN JOAQUIN VALLEY FAIR, STOCKTON, Wednesday, September 20.—

District running for two-year-olds; miledash; purse \$400; four moneys.
 G. W. Trahern names ch g Certiorari by Joe Daniels—by Norfolk 97 lbs; Whittcock..... 1
 D. S. Terry names ch g Lara by Joe Daniels—by Woodburn, 97 lbs, 2
 T. H. Williams Jr. names br c Bryant W by Monday—Bete, 100 lbs, 3
 Howson..... 4
 J. F. Mahon name b g Gracie Mahon by Modoc—by Norfolk, 97 lbs, 4
 Ross..... 4
 Time—1:48.

The second event was trotting for a prize of \$1,000, for the 2:25 class. Cairo, Starr King, Director, Echora and Honesty answered the call and were assigned positions in the order named. In the betting it was four to one in favor of Director and but little money was put in, but some pools were sold for second place, the odds varying with the fluctuations of the race.

First heat. When the word was given Director was not up in his place and he broke up within four lengths of the score. Starr King went around the two first, the others well together behind him, and he passed the quarter in 35½ with a clear advantage of three lengths. On the straight work to the half, Echora spurted to King's wheel and Cairo broke and fell to the rear. The time to the half was 1:10½ with King first, Echora second, Honesty third, Director fourth, and Cairo last, there being an interval of two lengths between Echora and Honesty and four lengths between Director and Cairo. As they rounded into the stretch Director came first for a few strides but his driver changed his mind and took him back, leaving King and Echora to settle the heat between them. The two finished up the stretch on almost even terms, the mare making a little skip in the first dash, but near the distance King made a bad break and all but Cairo gave him the go-by, Echora arriving at the wire first, Director second, Honesty third, Starr King fourth, Cairo fifth. Time 2:23½. Pools, Director \$100, field \$15, Starr King \$12.

Director barred, Starr King \$30, Echora \$15, field \$12.
 Second heat. At the tap of the bell Echora broke and Starr King again went to the quarter first (time 35) with daylight between him and Echora, Director third. In the straight Director worked gradually past Echora and she left her feet in an effort to hold her ground. At the half in 1:10½ King was still leading, Director second, Echora last. In the last quarter Director trotted to King but allowed him to win the heat by a head, Director second, Honesty third, Echora (reduced by the judges for breaking) fourth, Cairo fifth. Time 2:22½. Pools, Director \$100, Echora \$16, field \$7.

Third heat. Director got away level this heat and took his usual place in front and from here to the end of the race the interest was in the struggle between Echora and Starr King for the second place. At the quarter Echora was a close second to Director (time, 36½) and in the back stretch King made a wild break that increased her advantage. Around the turn Echora was three lengths ahead of King, but he closed the gap and the two had a lively set-to in the stretch, Echora beating him to the score by half a length, Cairo fourth, Honesty fifth. Time, 2:23½. Pools, Director \$100, Starr King \$24, field \$14. Director barred, Starr King \$30, field \$20.

Fourth heat. At the outset Director broke and Starr King was pulled to the pole, suddenly causing Mr. Tims to check his mare and pull out. King was first to the quarter in thirty-six seconds, Director close behind and Echora third, but making frequent skips. Before the half was reached (1:11½), Director was in front and from there home it was a jog, Starr King second, Honesty third, Echora fourth, Cairo fifth. Time, 2:25½. Pools, Director \$50, field \$18. Director barred, Echora \$30, field, \$10.

Fifth heat. The last mile was devoid of interest as Echora had given up the fight. Director won as he pleased, King second, Honesty third, Echora fourth, and Cairo fifth. Time, 2:26½.

SUMMARY.

Same Day.—Trotting, 2:25 class. Purses \$1,000, and \$200 added if more than ten entries. Four moneys.

 J. Hughes names b g Cairo, by Chieftain..... 5 5 4 5

J. M. Learned's b s Reliance, by Alexander, H. R. Covey's b g Capt. Smith, by Locomotive, G. Valensin's ch s Crown Point, by Speculation, J. Cochran's ch g Ashley, by Plumas, and L. J. Rose's blk s Del Sur, by the Moor were drawn.

The third race was for district trotters. Patchen, Silver Threads and Mac appeared but while going for the wind Silver Threads and Mac collided and both ran away. The drivers were thrown out but not seriously injured, but Mac demolished the sulky and bruised himself so badly that he was drawn from the race. Silver Threads was caught and brought back and the remaining two were set off for the race. It was not an affair of much consequence. Silver Thread won the first heat by trotting in the lead from wire to wire. Time—2:45½. He was also given the second heat by the judges, who set Patchen back for running although he crossed the score first. Time—2:43 Patchen won the third in 2:46 and the finish was postponed till Thursday.

The attendance on Thursday was far above the most sanguine expectations of the directors, the grand stand being packed. In the unfinished contest of the preceding day Patchen won easily in 2:40½ and 2:40½. The first race was a mile and repeat which was won by May D in straight heats in 1:44 and 1:44½, Jim Douglas second and Inauguration third. The second was a trot for district two-year-olds, mile and repeat, in which Mr. Viseher's Magdalene was first in 2:45 and 2:43, with J. W. Warren's Alpheus second, H. Robinson's Almora third, and G. W. Trahern's Baby Mine fourth. The third race was a special trot between Tump Winston, Ashley and Frank Moscow, which was won by the former, he taking the first, second and fourth heats, the third being given to Moscow, both the others being put back for running. Time—2:26½, 2:27, 2:30½, 2:30½. Of these races and of the ladies' tournament, a full account will be given in our next.

RACES AT GREENVILLE.—Owing to the rain the races set for the 18th inst. were postponed until the following day. The track was in good order. The first race was a trot, 2:35 class. Roanoke and Plough Boy were the only contestants. The former was the favorite at two to one. Roanoke took the lead easily from the start and won in three straight heats; best time, 2:46½. The second race was in the two-year-old class, in which there were but two entries, Mollie and June, which was won by the former at a very slow gait. The third race was in the three minute class. Mollie Barnes and Billy were entered. There was no contest. Mollie was first and Billy nowhere. He ran most of the way and was distanced the first heat. Time—3:20. The fourth race was running, mile heats. There were three entries—Redlight, Snuffbox and Overland Pat. Pat was the favorite and won the race; Snuffbox second, Redlight distanced. Best time—1:56½. The fifth race was a half-mile dash, for which there were five entries. Lillie, Rose Ballinger, Nellie Banta, Summit and Nellie G. Rose was the favorite and won in 55 seconds.

The Great Boston Trotting Race.

The Blanchard \$10,000 race for horses of the 2:17 class at Beacon Park, which had been looked forward to with great interest, took place on the 14th. The rain of the previous night and that afternoon served to make the track heavy, and deterred many townspeople from attending. The weather partially cleared before noon, and it was decided not to postpone the race. A light wind improved the condition of the track, and when the horses were called it was in fair shape. From eleven o'clock until the middle of the afternoon the thoroughfares leading to the park were lined with conveyances filled with people, while special trains frequently brought large numbers. There were fully 15,000 people on the grounds, and a most lively scene was presented, delegations being present from all parts of the country. Before the race, betting was about even on Elwin Thorne and Clingstone, Thorne being a slight favorite, with Santa Claus third choice. The judges were W. H. Wilson of Cynthiana, Kentucky, C. H. Keeler and B. F. Ricker of Boston. Keeler also acted as starter.

The horses were called at two o'clock promptly, but did not appear upon the track until half an hour later, when they drew positions as follows: Fanny Witherspoon first, Santa Claus second, Clingstone third; Parana fourth, Edwin Thorne fifth, Helene sixth, Humboldt seventh. All the horses appeared in good condition except Santa Claus. He was quite lame. Nevertheless he trotted throughout the race. In the first heat much time was lost in scoring, fifteen times the horses coming to the wire and as many times were they sent back. On the sixteenth attempt a fair start was made with Parana slightly in the lead. Thorne came to the front at the turn with Parana, Helene and Clingstone following in the order named, and thus they went to the half. Here Parana fell back into fourth place, Helene came up, and from here to the homestretch made a pretty race with Thorne. On the homestretch, however, Thorne pulled away from the mare and won by at least three lengths; Clingstone third, Fanny Witherspoon fourth, Santa Claus fifth, Parana sixth, Humboldt last, Edwin Thorne now sold for fifty dollars for the field.

For the second heat the horses were sent off well together on the fifth scoring. Again Elwin Thorne led after passing the quarter, Helene second, and Clingstone third. Here Clingstone overtook Helene, and gained second position. The other horses, except Parana and Humboldt, gradually closed up and coming into the homestretch were well bunched. Helene and Santa Claus here broke and fell back, but Thorne, Clingstone and Witherspoon kept together and trotted splendidly. Thorne however had a slight advantage, and was closely pressed by Clingstone. This order was maintained down the homestretch, where all the horses showed fine speed. Clingstone was out-traveled and could not overcome Thorne's advantage, and Thorne finished winner by a head, Clingstone second, Fanny Witherspoon third, Santa Claus fourth, Parana fifth, Helene sixth, Humboldt seventh. Thorne stock here boomed, and he sold for \$50 against \$21 for the field.

The celebrated stallion Smuggler, winner of the stallion race of 1874, and who has the best record of any stallion in the world, was now exhibited upon the track, and was greeted with great enthusiasm.

In the third heat Elwin Thorne, Santa Claus, Clingstone and Parana rounded the turn in the order named, and so continued to the backstretch. Here Santa Claus overtook Thorne, and the two went neck and neck to the three-quarter pole amid great excitement. Clingstone came up with Thorne and Santa Claus, and the three kept abreast till half way down the stretch, when Thorne pulled ahead. Clingstone, by a fine burst of speed, passed Santa Claus when within a few rods of the finish, and came under the wire less than half a length behind Thorne. The order of the finish was: Thorne 1, Clingstone 2, Santa Claus 3, Parana 4, Helene 5, Fanny Witherspoon 6, Humboldt 7. Edwin Thorne consequently took first money, Clingstone second, Helene third and Santa Claus fourth. Following is a

Pertinent Remarks on "Fixed" Races.

The authorities at Saratoga a short time since ruled off two Canadian jockeys, McBride and Phair, for fraud. It appears that three horses, Turfman, Raven, and Bailey, were engaged in a handicap hurdle race, and it is claimed an arrangement had been entered into to pull Raven and Bailey and make a "sure" thing of it for Turfman. This intention was carried out, but the game was so clumsily played that McBride, the rider of Raven, and Phair, who had the mount on Bailey, were called by the judges to the stand, and, being unable to make any defense, were promptly ruled off the course. Now, so far so good, but we would ask the managers of the Saratoga Association if they think they have done their whole duty in the matter. They were satisfied that the jockeys they punished deliberately pulled their horses back and made no attempt to win or they would not have ruled them off, but they surely are not simple enough to imagine that the riders were the only guilty parties in the affair. Jockeys who go into such business ninety-nine times out of a hundred do it at the instigation of bigger rascals than themselves; theirs is not the head to plan the swindle, they are merely the tools with which the work is performed. It is as plain as noon-day that somebody stood behind McBride and Phair and planned the trick, and who the wire-pullers were it is the bounden duty of the Saratoga authorities to ascertain. It is scarcely necessary to suggest to experienced turfmen how best to proceed, but there is little doubt in our minds that if the tools were given to understand that their reinstatement depended upon their exposing their principals the truth would soon be ascertained. A prominent gentleman of this city who was present the day the race was run was steered by the owner of one of the three horses to the tune of a couple of hundred on Raven, and another Canadian present was treated in the same way, so that no preference was shown by those who worked the oracle. Phair, one of the expelled jockeys, has been in this city for a few days past, and we are informed on good authority has boasted that certain parties at Saratoga have told him to keep away for a few weeks, then come back, and the chances were that it would be made all right. If any such promise as this has been made, tho why and wherefore it would be advisable to learn. Certainly no honorable turfman would desire to lend his influence to reinstate a dishonest jockey unless he had most positive proof that he had repented of his rascality; then who would exert himself in the matter? The answer seems plain enough

that some person or persons at Saratoga who benefited by the work in question are interested in getting the judgment reversed. The sport of the turf has made marvelous strides upwards in the favor of the American people within the past ten years, but it behooves those who occupy the places of authority to see to it that it is kept as free from suspicion as possible. Fast as it rose, it will sink with greater rapidity if honest men who now walk the quarterstretch are liable to be pounced upon by sharpers and the selection of a winning horse is to be made dependent upon its position in the betting. McBride and Phair, if guilty of the charge they have been punished for, are the tools of others. Who these others are is the question asked of the Saratoga Association, and they owe it to their own reputation to make an effort to find out. Hundreds of dollars were taken from the turfmen of this city on this race we allude to, and it is little satisfaction to them that while the judge's action substantiated their own opinion that they had been swindled, no attempts were made to reach the real culprits. If an attempt is made by Phair and McBride to enter or ride a horse on a Canadian racecourse while under expulsion by the Saratoga Association we hope they may be firmly dealt with. The Ontario Jockey Club and the Province of Quebec Turf Club are the representative turf institutions of their respective provinces, and as they advertise to race under the rules of the American Jockey Club they must pay heed to the judgments of the chief American turf organization. The latter having done a part of their duty in this matter, we wait to see if they are willing to perform the balance which, as honest men, it is their duty to undertake, even though influence at Saratoga be brought to bear to stay proceedings. Make McBride and Phair tell the whole story.—*Canadian Sportsman*.

Blair Athol.

The death of Blair Athol, which occurred in England a few days since, following close upon that of Adventurer, leaves a void in the ranks of the English stud fathers which cannot soon be filled, for whatever may be said of Blair Athol's career as a stallion, he was the darling of English breeders, who stuck to him through thick and thin. It is not a little curious but still a fact often remarked by observers of racing affairs, that the greatest successes have been obtained by turfmen with horses bred from their own strains, of which the cases of Lord Jersey, Sir Joseph Hawley, Lord Glasgow, Lord Falmouth and Mr. King are conspicuous examples. Queen Mary may truly be said to have laid the foundations of the Anson fortunes, which Blink Bonny built upon, and her son, Blair Athol, "crowned the edifice."

Blair Athol was the first son and second foal of Blink Bonny, who was seven years old when she foaled him, Stockwell, his sire, being twelve. He was a chestnut, with a white face, and, as a colt, was so gross and loose-framed that it was deemed best not to run him as a two-year-old, and accordingly he did not make his bow to the public until he was stripped for the Derby of 1864. His private reputation however was so great that he started favorite, and though he ran sluggish, his green jacket shot to the front at Tattenham Corner when Snowden called upon him. The Grand Prize of Paris was his next essay, but he could do no better than run second to Vermont. There was great excitement in England at the time, and it was darkly hinted that the late Napoleon had something to do with the result. Blair Athol re-crossed the channel, and the following week appeared at Ascot, where he met and defeated Ely, one of the best and hand-somest horses in England. At the York August meeting The Miner beat him, but in the St. Leger he turned the tables upon his critics, and won in the grandest style.

He had now become the property of Mr. Jackson, the famous Yorkshire book-maker, and was retired from the post to the paddock as sound as bell-metal. In his first season he got a winner of the One Thousand Guineas in Scottish Queen, but, before this, failing health had caused Mr. Jackson to break up his stud, and at the auction sale Blair Athol fell to Mr. Blenkiron for 5,000 guineas, and was transferred to Middle Park, where he remained until 1872, when the death of Mr. Blenkiron caused the dispersal of that gigantic stud. In the meantime the fame of Blair Athol was at its flood-tide. Prince Charles had taken the field, and was enjoying the reputation of being the fleetest horse ever saddled at Newmarket; and, by his aid and that of his numerous progeny, Blair led the list of winning stallions. When he was offered for sale, with the rest of the Middle Park stock, commissions from Australia, Germany, France and Austria were sent to purchase him. A stock company was agitated in this city with a view to his purchase. England took the alarm. The press rang with calls for the formation of a stock company for the purpose of saving to England the mighty Blair and the cream of the brood mares.

The result was the formation of the Cobham Stud Company. The sale occupied three days, and was attended by thousands. When Blair Athol made his appearance in the ring he was received with thunders of applause. Mr. Tattersall made a speech, in which he told the assemblage that Blair "was the best horse in the world." Then the bidding began. The English, who loved the horse, watched the proceedings closely, and as the bidding rose by thousands, the most feverish anxiety was manifested, particularly when the French and Austrian commissioners clung tenaciously to the horse. But the spirit of patriotism would not allow Blair to be taken from England, and he was knocked down at the enormous figure of 12,500 guineas amid the wildest cheering. The breaking up of the Cobham Stud again sent him to the hammer in the autumn of 1879, when he was sold for 4,500 guineas, and last season he was resold for 1,950 guineas.

Probably no stallion since Stockwell has enjoyed such a monopoly of the best of English mares. His success in getting winners was great, but it can hardly be said that he got any number of real first-class performers. Prince Charlie, Craig Miller, and Silvio were his best colts, winning the Guineas, a Derby, and two St. Legers, and while his daughters failed to place the Oaks to his credit, his Scottish Queen and Cecilia won the One Thousand. His get have shown some tendency to softness, and did not train on, but their speed was of the highest order. Blair Athol's progeny have made quite an impression in this country, his son, Glen Athol, being the sire of Glenmore and Checkmate. Mr. Withers has a son of Blair's in Stonehenge, the sire of the Julietta colt and Buckstone. Blair's daughter, Highland Lassie, at Mr. Lorillard's, is the dam of Neva, Nerad, and Nimrod. Whatever may be said of the softness of his get in England, certain it is that in Glenmore and Checkmate he has given us through his son two of the best campaigners of the day. He has played his part in the world's affairs, and challenged its admiration, and his death will be sure to cause a pang of regret wherever the merits of a good horse are known and appreciated.—*N. Y. Spirit of the Times*.

A VALUABLE BROOD MARE.—One of the most noted and valuable brood mares ever owned in New England was May Queen, a daughter of the famous trotting stallion Ethan Al-

len. Her dam was the noted pacing mare Pocahontas, one of the fastest of her kind upon the turf. It is stated upon apparently good authority that she was once driven a full mile by Adam Carpenter over the Union course, drawing a wagon weighing 155 pounds, in 2:10, which is 1 1/2 seconds faster than the best pacing heat on record. The estimated value of May Queen's produce before being trained was as follows: Pudence, by Daniel Lambert, \$6,500; Dolly Varden, by Daniel Lambert, \$10,000; May Flower, by Daniel Lambert, \$4,000; May Morning, by Daniel Lambert, \$2,500. May Morning is the dam of Revenue, formerly Pilgrim, by Smuggler, for which Com. Kittson paid last summer \$13,000. May Queen's next was Driving Wind, by Mambrino Prince, \$1,500; Hurricane, by Fearnought, \$3,000; Tempest, by Fearnought, \$1,000; Boston Boy, by Abraham, a son of Daniel Lambert, \$1,000; a colt, by King Philip, son of Jay Gould, \$1,000; Virginia Jefferson, by Thomas Jefferson, \$2,000; Gypsy May, by Thomas Jefferson, \$1,500; making a total of eleven valued at \$33,000. It is noticeable that her produce by Daniel Lambert is estimated much higher on an average than the others, which, considering the fact that both May Queen and Daniel Lambert were the offspring of Ethan Allen, may be thought remarkable.—*American Cultivator*.

CARE OF THE BUGGY.—We lay it down as an axiom, says an exchange, that the farmer who cannot afford a cover for his implements and vehicles has no business with a buggy. A buggy is too frail and delicate to stand heat and storms. The buggy must be kept housed when not in use. When brought out of the house it should be dusted off with a feather duster. If it comes home muddy it should be cleaned before putting in the house. It may be inconvenient, but in the end it will pay. There is no need of taking it to a creek, and there attack it with the old scrub broom. Take a bucket or two of water and a sponge and gently wash the top, then the bed, and wring out a chambray and wipe so no water stands on the varnish. Whenever water dries on varnish it will lose its luster. A bucket and a sponge and chambray and feather duster are as necessary adjuncts to a farmer's buggy as a wrench. A careful man will have his buggy look neat and last three times as long as the class first named. The average farmer can ill afford to buy a buggy and harness for pleasure. And neither he nor any other farmer can afford to neglect and destroy them. Wastefulness treads on the heels of extravagance, and the model farmer will not tolerate either on his premises.

FISH.

The Fisheries in Oregon.

It is pleasant to remark that the *Oregonian* sound is a word of warning as to the future of the river fisheries in that prosperous State, but in the following extract from an article on that subject the journal is apparently oblivious of the fact that an export duty is against the laws of the Union, and that even if imposed it would place Oregon at a disadvantage in the marts of the world. The question arises if it be not more rightly a matter of joint State and Federal expenditure and supervision:

A State hatchery should be established for salmon and trout at some point so far inland that the young fish will not be able to reach the sea until they have attained sufficient size and strength to protect them from their natural enemies. This involves the expenditure of money, it is true, but it can easily be obtained by taxing the products of the canneries, say two cents on each case of salmon put up by them. The output of the Oregon side of the river is about 324,000 cases for 1882, which would give \$6,500 as a revenue for maintaining the hatchery. This hatchery should be, in our belief, established at a point east of The Dalles, either in the Des Chutes, the Grand Ronde or the Innaha, subject to the decision of the commissioners.

It will require \$1,500 a year for the salary of a superintendent of the hatchery, and \$1,000 more for the wages of his assistant. First class talent, (and in this juncture we can afford to employ none other) will demand first-class pay, and a man like Seth Green, or Livingston Stone, is worth at least \$250 per month for the six months of the breeding season. The assistant superintendent does not require much greater qualifications than sobriety and fidelity. He will be required to remain at the hatchery during the entire year, to assist the superintendent during the season of propagation, and to keep the state's property clean and in good repair. The commissioners should not exceed three in number, and should receive about ten dollars per day for six days in each year, to hold semi-annual meetings of the board, paying their own traveling expenses out of their *per diem*, and reporting biennially to each session of the legislative assembly.

One of the board should act as president, and another as secretary. The state should issue stamps of the value of two cents each to be placed upon each case of canned salmon entered for export at the custom house of Portland or Astoria, on the sale of which some compensation should be allowed, say three per cent., to the secretary of the board. He would have all the work of the concern to perform, and this would give him \$250 a year against \$60 for each of the other two members. Failure to stamp each and every case according to the requirements of the act, should involve a fine of \$50 for the first offense and \$100 for each subsequent one, to be paid into the state treasury and set apart into the fishery fund, less say twenty per cent. for collection, to be paid to the court collecting it. This would, in our belief, afford ample revenue for re-stocking the Columbia river, and carry over a surplus in each and every year to provide against unforeseen accidents to the state's property.

In our belief the cause of failure in the Clackamas hatchery was its want of proper location. It was in charge of competent officers, and all its details were properly and regularly carried out, hence no fault can be found on that score. The next hatchery built should be further inland and, should that prove no better than the one on Clackamas, locations should be changed from time to time until the right place is found. The effects of pisciculture in California have already been felt in Oregon, for there has not been a day in July or August of the present year that shad have not been taken in the harbor of Astoria. None of these fish were ever planted here. True to their natural migratory habits, they wended their way northward from San Francisco, where they were hatched, and probably the same run of fish is now somewhere about the Fraser or the Skeena in British Columbia. These fish were two years old and were of delicate flavor.

In some places in Germany are trout ponds in which the trout are simply fattened, not raised. The dealers buy, often at great distances, young trout measuring five or six inches in length, which have been caught in brooks, and place them in the ponds. Here they are sorted according to years and fed with the worthless cyprinoids which are caught in large numbers in some of the rivers. In Heidelberg and Wurzburg these food-fish are generally placed in the ponds alive, but in Mayence they are only put in dead. The former method of feeding is more convenient and may be especially recommended in small ponds where the trout have not far to look for food. The method of feeding with dead fish is, however, better calculated to fatten the trout.

The most destructive element to fish in Nevada so far is the great quantity of sawdust annually discharged into the Carson and Truckee rivers. There being no effective law to prevent it, all attempts at remedy have proved futile, and until some strong reciprocal laws between California and Nevada can be adopted and enforced, no relief from this practice can be hoped for. The large amount of capital invested in the manufacture of lumber will hardly give way to the comparatively insignificant revenue or employment derived from the fish business, hence without kindly considerate protection by the lumber interest in the absence of needed laws we must expect instead of an increase a gradual diminution of fish in the rivers above named and their tributaries.

A sight that attracted general notice last Sunday afternoon on the seawall was the extraordinary run of young fish that was noticeable along the three last sections of the seawall, and at the time that the tide was going out millions apparently of small fishes, of two and three inches in length, wiggled past at a depth of one to two feet, their presence being known by the countless flashes of their silver sides as they moved in a southerly direction for a considerable portion of an hour. This was probably owing to an organized attack of sturgeons, just as the menhaden in New York waters are pursued in so remorseless a manner that they throw themselves on the sands to be out of the way of the Bluefish that prey upon them.

"Unele Sam," said a colored boy to black Sammel, a negro who used to bottom chairs for Colonel Sandy Faulkner, "whar yer gwine?" "Gwine fishin', chile; why ye ax me?" "Did yer know dat Annt Tildy is dead?" "Go on, chile! Is dat a fak? Yer doan mean ter say dat my wife is dead?" "Yes sah." "When she die?" "Dis mornin'." "Wall, I'se sorry I wan't dar! Tell 'em to go an' make 'rangements, dat I'll be back agin de funeral. I'se done dug worms for bait now. Wish I'd knowed it sooner."—*Arkansas Traveler*.

Before starting to spend any money in beginning a piscicultural establishment, a man ought to inform himself as accurately as possible regarding the water which will be at his command. He must know the average quantity of water; counting the dry season; he must know the temperature of the water during the greatest heat and the greatest cold. Although such hints seem almost superfluous, they are nevertheless much needed.

Every season the chances of catching trout near this city are lessened. This does not make very much difference to people of means and leisure; but to persons who have only an occasional outing it means giving up fishing altogether. We know of several people who are fond of fishing who have not wet a line for a long time because they knew that it would be time wasted to go to the creeks where they were once accustomed to find good sport.

The sea fishing outside the heads is said to be very good just now and some fine catches have been made. The pilots who have an opportunity once in a while report that the fishing was never better. Strange to say, the tom-cod are plenty wherever there is a protected nook.

The anglers are hanging up their rods and taking down their guns. The fishing season is pretty well over. The creeks are low and the fish have been pretty well hunted. Lots of them are no longer green and a footstep is enough to send them to deep holes for half a day.

A beginner in pisciculture is generally mistaken as regards the quantity of the food required, thinking that it is sufficient to let a proper quantity of water flow through his ponds but forgetting that fish live in the water but not by the water.

The first number of the BREEDER AND SPORTSMAN, published in San Francisco, reached our sanctum a few days ago. It is a very handsome journal, devoted to field sports in general. The illustration of Electioneer on the title page is an artistic effort far above those seen ordinarily in sporting papers. Joseph Cairn Simpson is the editor, and judging from his leading articles, he is the right man in the right place. We will always welcome the BREEDER AND SPORTSMAN with pleasure, and read the accounts of that wonderful country where it is published.—*Southern Industries, Nashville, Tenn.*

BICYCLING.

A Steam Tricycle.

A Buffalo man has perfected an important invention which is nothing less than a steam tricycle. It is expected that it is destined to revolutionize the modes of travel on the highway. It at first sight resembles a low, open buggy or buckboard. The seat is placed between the two principal wheels, the third wheel being in front, about five feet away from the other. It is smaller, and is used for guiding the vehicle. The two main wheels are the same as those used in bicycles. The motive power is applied to them by means of a small spur wheel and a few feet of belting or chain. The engine and boiler are located between the seat and the forward wheel. They take up very little space, and much of the machinery will be enclosed in a wooden case when the vehicle is completed. The engine is a one and a half horse power, and it rests on the bottom of the conveyance. The exhaust is underneath, and will be nearly noiseless and invisible. The cylinder is two by four inches. The generator is upright and stands directly over the neat little boiler. For fuel gasoline is used, and two gallons of this fluid, surrounded by water, will be carried in a reservoir under the seat. It will be conveyed to the furnace by means of tubes. It is claimed that one gallon will be sufficient to run the engine for nine hours at the rate of fifteen to twenty miles an hour. The tricycle as it now stands cost about \$200, but can be duplicated for \$150.

BICYCLE TOURNAMENT.—The Springfield (Mass.) Bicycle Club has perfected a great meet and tournament, to be held on Wednesday afternoon and evening, Sept. 20. The programme consists of a twenty-mile professional race, for a purse of \$500, by J. S. Prince of Boston, champion of the United States, against Thomas Harrison and James Mellen, who will alternate every five miles; a five-mile professional ladies' race, for a purse of \$200; and the following amateur races, open to all amateurs: Five-mile race, three prizes, value \$125; two-mile race, three prizes, value \$125; one-mile race, three prizes, value \$75; half-mile dash, three prizes, value \$50; slow race, 100 yds., three prizes, value \$25; one mile, without hands, three prizes, value \$50; half-mile race for boys under 15 years of age, three prizes, value \$20. The one and two mile races will be run in heats, best two in three. These races will take place on Hampden Park. A handsome gold and silver-plated bicycle bag, value \$30, will be presented to the club having the largest number of wheelmen in the parade. At the skating rink in the evening the following prizes will be contested for: Best-drilled club of not less than eight members, three prizes, value \$100; best single fancy riding, three prizes, value \$75; best double fancy riding, three prizes, value \$75.—*N. Y. Clipper*.

On Wednesday, August 2nd, the Wanderers B. C. held their second running race meeting upon the Surbiton grounds, London, England. The important event was the twenty mile race between the present amateur champion, H. L. Cortis, and the Hon. Ion Keith Falconer, the race being also against time. The track was far inferior in surface to the Crystal Palace track upon which the record was made the previous week, and early in the evening there was a strong south-west wind blowing with sharp showers falling at intervals.

Shortly after 7 the riders started, an outsider acting as pace-maker, Cortis heading and Keith Falconer bringing up the rear. The first mile was done in exactly three minutes. Nothing of importance occurred until the seventh mile, when Keith Falconer finding the pace too hot for him withdrew. From this time Cortis went on assisted by the different racing men, who relieved each other at intervals in keeping up the pace, until the last lap, when Cortis put on a tremendous burst and left his companion, completing the twenty miles in 59 m. 20 1-5 seconds.

WHY NOT TRY THE BICYCLE.—The English physicians are just at this moment differing as to the amount of physical exercise necessary to create or continue health in the human system. One side of the disagreeing doctors claim that eight hours' exercise a day is absolutely essential, and advocate walking as the best form. The others hold that such an amount of exertion is injurious and long walks are positively deleterious to the system. They claim that the passive exercise of riding is much more wholesome than the active exertion of pedestrianism. There are other physicians who are solving the problem in favor of the bicycle, and now-a-days the village doctor often leaves his mount at the porch, instead of tying it up to the garden gate as in former days.

Another exciting finish took place at the Leicestershire Cricket Ground Saturday, Aug. 5th, being the occasion of the second twenty-five miles professional championship race. It will be remembered that the first race was run off May 27th, after two dead heats, by R. James, of Birmingham, and P. Wood, of Leicester. Both James and Wood met with accidents a short time previous to the present race, but Wood was able to start. The other contestants were R. Harwell, professional one mile champion, G. W. Waller, A. E. Derkinderin, C. R. Garrard and F. De Ciury, the latter of Paris. The lead was taken by the riders alternately, although some of them seemed anxious to make the pace very fast. Five miles was done in 17:19, ten miles in 33:45, and twenty miles in 1 h., 7:59, which will give a chance for comparison with Cortis' twenty-mile time. The Frenchman gave up three laps from the finish, and Walter soon after, leaving the others to fight it out in the last lap, which they did with a tremendous rush, Harwell fairly lifting his machine through the tape, half a yard in front of Derkinderin, with Wood immediately in the rear. Time, 1 h. 24:15.

The following item, clipped from a daily paper, ought to cheer the hearts of the bicycler, as indicating that the public apathy respecting bad kept highways is not universal: "Reading, Pa., August 21.—The fifty-five Councilmen of this city, and the Mayor, were arrested to-day by virtue of a bench warrant issued in pursuance of the indictments found against them last week for not keeping the streets in proper repair. They gave bail for their appearance at the November court." Here, as we have often urged, is proper work for the local wheelmen in all parts of the country. Throw your votes and influence for municipal officers, and especially for road commissioners, for men who are public-spirited, liberal, and regardful for the good name of their city or town, irrespective of party politics, which latter element ought never to enter into local elections.

We are glad to see that the excellent literary monthly, the Brooklyn *Advance*, has taken up the advocacy of bicycling. It not only indicates the wisdom of its managers, but evinces the general and growing recognition of the wheel as a factor in healthful physical development and recreation.—*Ex.*

An English bicycling paper, the *Cyclist*, has called attention lately to the practice in certain localities of offering money or plate, at option of winner, as prizes in events advertised for amateurs. This opens the interesting question whether the losers would be amateurs if plate is chosen, and professionals if the money were taken. At all events, it is clear that the practice is questionable, and I trust it will not find supporters in this country.

W. J. Morgan, the Canadian bicycle champion, offers to ride any man in America, John S. Prince preferred, a 100 mile race for from \$200 to \$500 a side; the race to take place in any city in the United States in four weeks from signing articles.

At Salt Lake City, July, 24 the Salt Lake Bicycle Club held one-mile and ten-mile events, the first race being won by William Jennings in 3m. 20s.; James Wood second in 3m. 36½s. Jennings also won the ten-mile race in 40m.

San Francisco Bicycle Club men have been accorded partial riding privileges in Golden Gate Park, under limitations and at certain hours. This will do for a beginning, but the time must come when their full rights will be conceded.

W. J. Morgan is willing to race any bicycler in America except J. S. Prince, 50 miles, for \$200 a side; or he will race Prince one hundred miles for the same amount.

The price of suspenders for holding up stockings has gone up, while the monkey wrench still holds its price at seventy-five cents.—*Springfield (Ohio) News*. Now, how do you apply the monkey wrench for the purpose?

Cortis not only got married the day after his great twenty-mile ride but spent his honeymoon on a social trip.

Factions youngster to party [of bicyclers passing along: "Why don't you keep step?"

BASE BALL.

The Renos and Niantics.

It was a red letter day last Sunday at the Recreation Grounds, the weather being delightful, the attendance large and well pleased, and the game between the Niantics and the Renos being stubbornly contested until the last inning, when the Renos could not secure one run to tie their antagonists. The game was played well, but few faults being made on either side, and the spectators were warm in their demonstrations of approval of a good play, as the game advanced to its final stages. Following is the score:

NIANTICS.											RENOS.										
T.B.R.B.H.P.O.A.E.											T.B.R.B.H.P.O.A.E.										
Incell, c.f.	5	0	0	0	0	0	0	0	0	0	Barnes, 1b	4	1	1	13	0	2				
T. Sweeney, 3b	5	0	1	0	0	0	0	0	0	0	Swanton, r.f.	4	1	2	0	1	0				
Donahue, s.s.	5	1	0	0	2	1	0	0	0	0	Riordan, 3b	4	1	0	2	1	1

Totals	40	6	8	27	24	9					Totals	36	5	4	27	18	7				

Innings	1	2	3	4	5	6	7	8	9
Niantics	0	0	2	1	0	0	0	3	0-6
Renos	3	1	1	0	0	0	0	0	0-5

Earned runs—Niantics 1.
Home run—Sweeney.
Two-base hit—Sullivan.
Base on balls—Niantics 2.
Double plays—Riordan and Sheridan.
Passed balls—Creagan 2, Finn 4.
Wild pitches—McElroy 1.
Struck out—Niantics 7, Renos 7.
First base on errors—Niantics 4, Renos 6.
Left on bases—Niantics 6, Renos 5.
Umpire—Pete Meegan of the Californias.
Scorer—J. F. Hennessey.
Time of game—Two hours.

The Howards and Olympics.

These clubs met at the Oakland Grounds on Sunday last and played a rather one-sided game, the Olympics starting off with a rattling score of four runs, and thenceforward they rested on their laurels and were badly beaten, as the following score shows:

HOWARDS.											OLYMPICS.										
T.B.R.B.H.P.O.A.E.											T.B.R.B.H.P.O.A.E.										
Hardie, c	5	1	2	11	4	4	0	0	0	0	Neal, p	4	1	1	12	5					
Maxwell, c.f.	5	1	2	0	0	0	0	0	0	0	Ebner, 3b	4	1	2	1	0	0

Howards	0	2	0	0	4	0	0	3	0-9
Olympics	4	0	0	0	0	0	0	0	0-4

Time of game—One hour and forty-five minutes.
Scorer—Mr. Strauss.
Umpire—J. Carroll of the Californias.

The Rural Home B. B. Club which was organized some months ago would like to meet some of the amateur clubs of San Francisco. Clubs desiring games will please notify B. Gunn, County Clerk's office, to that effect and they will be accommodated on any Saturday. The nine consists of the following players: J. Lowth, pitcher; Max Brackett, catcher; S. Hunter, 1st base; Cranz, 2nd base; A. Jenkins, s. s.; Coffee, 3rd base; Gunn, left field; T. Jenkins, center field; Nat Page, right field.

THE BREEDER AND SPORTSMAN is the name of a new weekly paper, conducted by Jos. Cairn Simpson, and published at San Francisco, Cal., at five dollars per annum. The first copy is at hand. For beauty of typography, extent and variety of matter, and general make up, it is unexcelled by its contemporaries. Mr. Simpson is author of a popular book, called "Horse Portraiture," and for more than a quarter of a century has been a popular writer on horse and sporting matters. He is admirably qualified to conduct such an enterprise, and the breeders of the Pacific Coast are to be congratulated upon having so able and gifted a champion of their interests.—*St. Louis Rural World*.

THE Breeder and Sportsman.

PUBLISHED WEEKLY BY THE
BREEDER AND SPORTSMAN PUBLISHING CO.
THE TURF AND SPORTING AUTHORITY OF THE
PACIFIC COAST.

OFFICE, 508 MONTGOMERY STREET
P. O. Box 1333.

Five dollars a year; three dollars for six months; one dollar and a half for three months. Strictly in advance.

MAKE ALL CHECKS, MONEY ORDERS, ETC., PAYABLE TO ORDER OF BREEDER AND SPORTSMAN PUBLISHING CO.

Money should be sent by postal order, draft or by registered letter, addressed to the "Breeder and Sportsman Publishing Company, San Francisco, Cal."

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

JOSEPH CAIRN SIMPSON, - - - EDITOR

San Francisco, Saturday, Sept. 23, 1882.

"DECLARING TO WIN."

One of the most pernicious practices on the turf is the following an English custom, always of doubtful propriety, many times the vehicle of unmitigated rascality. That is when an owner had two or more horses in the same race that he could select which he would win with and if before the race he made the intention public it was held sufficient to absolve him from censure if even the poorest were the winners. There is not a single argument that will justify such a course, but a hundred reasons why it should be abolished. It gives an opportunity to fleece the unwary betters; it disgusts the spectators, when the palpably superior horse is made to give way to an inferior. There is nothing in the rules which can be twisted so as to sanction the practice, but, to the contrary, a provision to punish those who are guilty. The owner and trainer who gives the instructions, the jockey who rides the horse which could have won, are amenable, and in accordance with the law should be expelled. It does not require a rigid construction to punish under the circumstances but it is the imperative duty of the judges to inflict the penalty. This, of course, is a hard thing to do when there are so many vicious precedents to sustain the action, but if the officers of the association or judges of the race should notify parties who have more than one horse engaged that they must strive to win if even the contestants are both in the same stable no fault could be found with the punishment which would follow transgression. We would like to see such a rule embodied in the code of the Pacific Coast Blood Horse Association, not that it is required to enable the proper steps for the correction of the evil, but to place it beyond question. Either that or incorporating the same restriction on starting as there is in heat races, and only admitting one horse in the same interest to start.

The latter plan might work injuriously to the nominator inasmuch as he would be deprived of a privilege of testing as many colts as he chooses to pay the stakes upon, and when there is a prize to the second as well as to the first to be won. By insisting that there should be a race, no injustice is done to the owner; the betters are protected; though far beyond the welfare of those who speculate are the true interests of turf sports. This interest is sure to suffer when the general public have cause for dissatisfaction. A large majority of those who attend race meetings cannot see the points which the betters are governed by, nor understand the logic that gives any owner the right to perpetrate a fraud. A fraud it certainly is when in place of a contest they have been promised they witness one jockey "pulling the head off his horse" to enable another to reach the winning score first. Neither can it be reconciled to the common understanding that an action which is met with the severest punishment in one case should be considered an innocent device in the other. A satisfactory explanation cannot be given. The reasoning based on precedents will not answer. Because Lord So-and-so declared to win with A. when his horse B. was known to be superior, and that this privilege is granted in a country four or five thousand miles away, it would also follow that as Black Donald "lifted" herds of cattle a couple of centuries ago it was all right to steal a fat steer when the larder was at a low ebb. The day of the empty platter with a pair of spurs served for supper has passed, and if the sports of the turf are brought to a standard that will insure the support of the right-minded they must be based on a higher plane. The argument that the betters are protected by the "stable" in place of the horse being sold in the pools has not the weight of a feather in the balance. There are other rights besides the settlements of wagers to consider, more momentous questions at issue than "protection" to those who invest in the pool-box. Even this protection is denied when this course is sanctioned. There may be those who do not buy pools who like to in-

teusify the interest of the race by a wager, perhaps small, it may be large. The riders are mounted and A. says to B. "I will take the horse with the colors scarlet jacket and black cap against any you will name for \$—." "All right," responds B. "I will take the scarlet jacket and yellow cap." Scarlet and black is pulled to a standstill and scarlet and yellow wins. It is a palpable fraud, a self-evident piece of rascality, and the innocent speculators await the verdict. If there is a telegraph board they are amazed to see that the positions are awarded as they came in and preparations made for another race. The whole thing is a roaring farce if robbery can be termed fun, a caricature of the "royal sport," far beneath a donkey race when the long-eared coursers are compelled to do their best. Thousands join A. and B. in saying if this be racing the less of it the better. Indignant, disgusted, disappointed in their expectation of seeing a race, all the false reasoning in the world cannot reconcile them, nor any number of titled delinquents to share the opprobrium cause them to acquiesce in considering it right.

We write plainly, feeling that more depends upon a proper view being taken of the malpractice than many realize who are equally as intent on bringing the turf above reproach, but who have not given the thought it demands to foresee the consequences. We have advocated the abrogation of heat-racing on this very ground, and because it gave a chance for combinations to defeat the better horse. In heats a horse is "laid up" in order to give him a better chance to win; in a dash he is laid up to lose provided he has a stable companion that suits "the book" better. In either case there is an opportunity for faultfinding, and whatever is inimical to the general appreciation we desire to see removed.

BOOK-BETTING VS. POOLS.

There has been a good deal of discussion whether the English system of "book-betting" or the American pools should have the preference with the backers of horses. In England and Australia where there is so much speculation on the turf, and many who desire to invest something before the races come off, the argument is in favor of the English method. This is more especially the case as from the greater certainty of "getting round" the bookmaker is enabled to lay larger odds. In this country, however, there is no comparison between the two and the auction and mutual pools combined are by far superior. An illustration came to our knowledge which will be applicable. A person who wanted to invest a little money on the races at Sacramento took the programme, and out of the eleven nominations in race No. 1 he selected Jim Renwick and Jim Douglas, at the odds of \$30 to \$10 against each. In No. 2, there were nineteen nominations and his choice was Precious, against her getting \$40 to \$10. In No. 3 there were nine entries and Joe Howell was booked at \$30 to \$10. In No. 8 Flou Flou was his choice at \$30 to \$10, there being eight nominations, and in No. 9 he took Precious, six being named in it. In No. 10 there was thirteen nominations and Jim Douglas at \$40 to \$10 was the investment. In No. 11, of the nine entries Belshaw at \$60 to \$10 and Joe Howell at \$20 to \$10 were booked, and in No. 16 Flou Flou and Satauella were coupled, the former at \$40 to \$10, the latter at \$30 to \$10, there being ten nominations. In No. 17, of the twelve entries he selected Joe Howell at \$20 to \$10. As a matter of explanation, he had no knowledge of what the odds would be, leaving the money with a friend to give the bookmaker. It was certainly a poor investment according to the calculation of the chances from the numbers engaged. He had \$120 at hazard and the most he could win was \$240 or the "short odds" of 2 to 1. But "all's well that ends well," as the following account shows:

WINNING TICKETS.

No. 2, Precious.....	\$ 50
No. 3, Joe Howell.....	40
No. 8, Flou Flou.....	40
No. 11, Joe Howell.....	30
No. 16, Flou Flou.....	50
	\$210

Thus he was \$90 "ahead" but the most remarkable feature was that with the exception of No. 1, in which Jim Renwick and Jim Douglas were beaten, every race that he had a starter in he won. Four of the selections did not start, and in No. 11 and No. 16 he had a loser coupled with a winner. It was a rare stroke of good luck seldom witnessed, and without a parallel so far as we are acquainted. But any one of the least knowledge of pools can see how much better the money could have been invested. It is true that there was the advantage of being able to lay a little money without being present, and also the opportunity to restrict the risk to a definite sum. To offset this in pools the money would have been returned for non-starters excepting when these were in the field, and in the mutuals the amount can be gauged the same as in book-betting. Still all three can be combined to advantage, and we hope to see the odds in the books more in accordance with that which the pools show.

THE STATE FAIR.

Despite the "pinkeye," and the rain that deluged the track on Friday, the State Fair was a grand success. Successful from every point of view and in every department. The racing and trotting was in the main excellent and the decisions of the judges acquiesced in by a large majority of the spectators. The rainstorm was an innovation, and though unwelcome was, nevertheless, heartily enjoyed, rather a paradoxical statement, though the ludicrous features made amends for the discomfort. Californians were treated to a scene which is common in the east. The heavy showers came after the riders were weighed and mounted, the starter was on the ground, and then there was such a downpour that the water was inches deep on the track. Atalanta got off with the lead, and those behind him were so mud-bespattered that the colors were undistinguishable. Elsewhere there is an account so that repetition is unnecessary. It is rare indeed, when an eastern meeting does not include just such a spectacle, and a "good mud horse" wins over fields that can easily beat him when the course is dry. It will be some time before space enough can be given to publish a proper review of what the horses have done at the fairs. In order to have the material to do them justice it will be necessary to await the close of the circuit. At one of them, perhaps, a horse was out of condition and did not come up to the form he afterwards displayed, while the prevailing epizooty caught others in its clutches and they fell short of the expectations of owners and trainers. Notwithstanding the attending drawbacks the horses have shown remarkably well, and when the horse history of the year is compiled, California as usual will not be behind.

The managers of the fair are the recipients of eulogies from all sides. There is usually a great deal of sore-headedness, if one may be permitted to coin a word to express the bickering of those who have been disappointed, but this season it is only the chronically captious who grumble. The President has labored assiduously and been ably supported by the members of the board, while the secretary has been awarded golden commendations for the thorough manner which has characterized his management of the office. Not merely during the fair, as from the close of the last exhibition until the completion of this, he has labored with enthusiasm. The crowning thought in his mind was the success of the fair, and he went at the work with energy and continued it with determination. During the whole of the summer the track has been kept in first-rate order, and in lieu of the usual complaints there have been warm eulogies.

It is now understood that steps will be taken to remedy the only defect in the course. As it now is the "first turn" is very short, and the track narrows suddenly from the starting point. With a large field of horses it is almost impossible to avoid collision or losing of places, and abrupt curvature makes it trying on the horses' legs. The contemplated plan is to make the semi-circle much easier by increasing the radius and carrying the backstretch a good deal further eastward. The judges' stand will be moved so as to give more room after the start, and we earnestly urge that it be placed on the proper side of the track which, of course, is opposite from where it is at present. The whole track will be carried further away from the grand stands so that there will be a space available for a "quarter-stretch," and the sale of tickets to the quarter-stretch will be so much larger than the present that the revenue from this source will soon pay the cost of the improvements.

The State Fair of 1882 has come to an end, but the lessons it has given will have an influence for years. The money value of the teachings, could it be figured, would reach an enormous sum, though there are other influences of more actual value than dollars and cents. It teaches a better system of rural life, and these teachings end in happier homes, better people, better citizens. That the fair of 1883 will be still superior is an insured fact, as the experience of every year adds to the knowledge of the managers.

TROTTING AT MELBOURNE, AUSTRALIA.

Heretofore we have noticed the \$2,500 trotting purse that has been advertised to be trotted over the Elsterne-wick track, Melbourne, Australia. A double purpose can be effected by making entries in it, as any good horse which trots there can be sold for a round sum.

It would well repay the expense for the breeders here to take measures that would insure several starters from California, and by making a joint venture, so far as sharing the expense, the outlay could be reduced to a minimum sum. With these entries for this State and the horses already in Australia, there will be a field that will attract an attendance of at least twenty thousand of the sport-loving inhabitants, and there will be plenty of other opportunities given for them to display their pow-

ers. It was a wise movement on the part of the club there to restrict the entries to procreative animals, inducing the importation of the class which will be of the most benefit. After the fairs are over we hope to see arrangements made for shipping quite a number of the right sort of trotters, and above all other considerations the right sort of men to accompany them.

OUR ILLUSTRATIONS.

There is the first break in the picture gallery of the "Breeder and Sportsman." Twelve illustrations have been given, ten of notables and two of types of what we regard as a good combination of blood to produce the fast trotter. One of these, Antevolo, since the picture was given trotted a mile at the Golden Gate Fair in 3:07, and that for a colt, not then sixteen months old, with scarcely any training, and "barefooted," proves that he has the gift naturally. The other has shown "low-down in the twenties," so that it is reasonable to expect that he will be entitled to a place among "the notables" in the not very far-off future.

The break, however, is only temporary, and the illustrations will be resumed before long. As has been stated before, the series will comprise others than fast horses, or those of breeding which insure speed at the trot and gallop. The coach-horse, we learn, is represented in California by one of the finest specimens ever imported and ere long his picture will grace the title page. In due course of time there will be cattle pictures, dogs, etc. One thing has followed the interregnum of the kings and queens of the turf and track, and that is the opportunity to see what a really handsome "heading" the artist has supplied us with. Joined to the fine pictures of the horses it is not so striking as when the letter-press takes up the most of the first page.

THE FILLIES' YEAR.

Lord Falmouth's brown filly Dutch Oven first, Lord Stamford's brown filly Geheimniss second, the Duke of Westminster's Shotover third, is the placing in the great St. Leger of 1882. Of the fourteen starters four were fillies, and thus the old adage that September is the month for them to show to advantage is again proved to be true. There was not much interest taken in the race in America this year, as it was concluded that not one of "our colts" had shown form that would warrant even the most sanguine to look for victory. Sachem running into fourth place will be something of a surprise to many, and securing the next place to the fillies is further proof that the English three-year-old colts are an inferior lot. It was more of a surprise that Dutch Oven gained the first prize as after the race at York the odds were 100 to 1 against her, and but for the money which is always put on "Archer's mount" that would probably have been the rate at the start. As it was forty to one was laid and the backers of the popular jockey reaped a rich reward. J. R. Keene's Romeo, a brother to Monitor, made a poor showing.

THE STOCKTON FAIR.

As we write, Friday morning, the Stockton Fair is in full swing. From our correspondent we learn that it is by far the most successful ever held. The stock on exhibition filled the stalls on the track and many of them had to be quartered outside. The animals in every department are superior, and as will be seen by the reports in another column the racing and trotting has been very satisfactory.

The attendance has been in excess of former years, every day showing an increase over former exhibitions and the management is pronounced to be of the best kind. One capital move was made in the suppression of gambling both on the fair grounds and in the city. The practice tolerated heretofore was the only point in the management of the San Joaquin Fair that could be found fault with, and we are much pleased to learn that it has been done away with.

The liberality displayed in "getting up" the programme was well worthy of a liberal return, and it is very gratifying to all concerned that it met with a liberal response.

EDITORIAL NOTES.

Horses For Sale.—In the advertising column will be found notices of the auction sale of thoroughbreds belonging to W. L. Pritchard and a yearling trotting colt of rare breeding. Those which Mr. Pritchard offers are well worthy the attention of buyers. The breeding is very fine and the success which has followed the colts of the same strains is sufficient guarantee that there must be high excellence in those offered. Lena Dunbar, Jim Brown, Maria F. Enchre, Patsy Duffy and others are sufficient illustrations of the value of the blood, and as to good looks, that will be found satisfactory upon examination. The pressure of other business compels Mr. Pritchard to part with them, and there can scarcely be a

question that great bargains can be had at the sale. The present popularity of racing at the East has increased the number of meetings to such an extent that the value of blood stock has been greatly enhanced in the horse-breeding regions, and it will not be long until California is drawn upon extensively to furnish animals. There cannot be a more auspicious time to engage in the breeding and rearing of thoroughbreds, and the sale which is to be held on Monday, the 16th of November, gives a capital opportunity to purchase. The yearling colt offered is an animal of the highest form, and his blood will be found of great service to cross with the Hambletonian and other strains. We brought his dam here when a yearling, and she was one of the most promising we ever saw. When three years old she trotted three quarters of a mile in 1:55, a 2:34 gait, and she was only broken that spring. Owing to an injury she received in the stable she had to be thrown out of training. The combination of Belmont, Mambrino Chief, American Eclipse and Blackbird is sure to mingle harmoniously with the other trotting families.

To Judge by the number of challenges that have been flying around for the past week, the bay must be covered with ambitious oarsmen practicing for important contests. So far, however, not a match has been made. Nothing has yet come of Jim Brannen's defy to young Griffin, and the elder Griffin has not covered the deposit of \$500, made with the BREEDER AND SPORTSMAN by representatives of the Pioneer club. Mr. Griffin offered in print to match his son against any man in the Pioneer club except Leahy and Nelson and his second crew against the Pioneers' best crew. The Pioneers have deposited \$500 and offer to match a sculler against the best sculler in the Golden Gate club, who is of course Peterson, and also to match a crew against Mr. Griffin's best crew for \$1,000. On Tuesday Mr. Griffin complained that sufficient time to make the match had not been granted him, and the Pioneer men extended it several days and left their money in the BREEDER AND SPORTSMAN office. This looked like business. Peterson is a professional waterman who ought to be able to row any man in the world. Mr. Griffin, after several days to consider, offered to match a four-oar crew against the Pioneers; but as the Pioneers had expressly stipulated that the sculler's race and the four-oar race should take place the offer was declined. On Friday afternoon, the specified time for making the match having expired, the Pioneer representatives withdrew their money.

Krick's "Guide to the Turf."—We are in receipt of the September edition of this extremely valuable work, and it is praise enough to say that it is fully up to the standard of former volumes. It is difficult to account for the absence of support which this work receives on the Pacific Coast. Fortunately the labor of the compiler is better appreciated in the East, or rather it is found so indispensable there that no one who has any fondness for racing can do without it. The growth of racing in the United States has been so great that the summaries, brief comments on the condition of the track, rates of betting, and the index of names of the horses which have run, occupy 343 pages of Nonpareil. The index gives the sire and dam and the pages where the races are to be found. When inclosed in brackets it means that the animal won, and from that practice has originated the term "bracketed," meaning a winner. Those who have had something to do with putting races in shape for the papers have a knowledge of how vast the labor of putting them in shape, and though turfmen, breeders, trainers, etc., if at all intelligent, can scarcely get along without it, the frequenters of the track get a benefit far beyond the cost. For this handsome volume the price is only fifty cents. Address H. G. Crickmore, *The New York World*, 31 and 32 Park Row, N. Y.

Overman has been matched against Helene for \$2,500 a side, the race to be trotted on the Gentlemen's Driving Association track, N. Y. The day of the trot is to be named between the 1st and 15th of October. Helene has a record of 2:21, so that Overman has three-fourths of a second the best of it on that score. The match is attracting a great deal of attention in New York and more interest is taken in it than in any which has come off for some time. Overman is thought to have rather the best of it, though the mare is very fast. As Hickock drives Overman, and Murphy Helene, there is talent on both sides, and unquestionably the race will be one of the best of the season.

Goldsmith received universal commendations for the able manner he handled Cairo in the special race at Sacramento. That the encomiums were well-deserved there cannot be the least doubt, as every one we have heard speak of it joins in extolling the skill he displayed. Those who have seen Cairo in his previous races are aware that he was very unsteady, breaking, pulling and generally unmanageable. By a slight change in his harness, the removal of weights and skillful manipulations of the reins he only made one break during the race, and scored his first victory of the season.

Old Joe Howell has added another feather to his plume, or rather, like that of the Prince of Wales, there are three as a record of his time of victories at the State Fair. He is a wonderful old horse, and seems likely to emulate the doings of the "Carlisle Gelding" of the olden time, which ran successfully until he was eighteen years old. We have been taken to task for giving his pedigree as being from Eva Shepherd, while it has been stated that his dam was Etta Shippen. The former is correct, as we were instrumental in C. C. Parks (who bred for Howell) buying her at the sale of D. A. Gaze, 1869, then being in foal to Bonnie Scotland, and that fall we sold him the horse. There is scarcely a proba-

bility that Etta Shippen ever was bred to Bonnie Scotland. Mr. Parks was starting his breeding farm at Glen Flora at that time, and when he purchased Eva Shepherd it was with the intention of using her in the trotting stud, but the purchaser of Bonnie Scotland changed his views. We sold him Mande, by imported Australian, and from her he bred "Paper-maker."

Lady Viva, two years old, by Three Cheers, from Lady Amanda, by imported Hurrah, and Sir Thad, one year old, by Norfolk or Thad Stevens, from Lady Amanda, has gone into Mr. Winters' stable and will be trained by Dudley Allen. Lady Viva is in the two-year-old stakes of the Pacific Coast Blood Horse Association, but as she never had a saddle on up to the time of reaching Sacramento Thursday last there is scant time to get her in any order.

Duroc Swine.—In another part of the paper will be found a capital article written by Col. F. D. Curtis for the *Breeders' Gazette* from which it was copied, and without giving that spirited journal credit. This came from the "form" going to press before we were aware of it, the intention being to precede it with some remarks in which the credit would have been awarded. There can scarcely be a doubt that this breed of hogs is well adapted to the California climate and will be found a valuable addition to the Berkshires, Essex, Magie's and other dark-colored swine.

Helpers.

From the following, cut from the last number of the *Turf, Field and Farm*, it will be seen that there are others who agree with us that some plan should be adopted to stop the evil of helpers in trotting races. In fact the ideas are so similar that it appears as though our views were based upon those of our contemporary, though the article was in type before the *Turf, Field and Farm* reached here. If all of the papers were to take the same stand there is not a question that measures will be taken to correct this evil, and it is the duty of the journals that make the sports of the track a speciality to have the practice done away with. United effort will accomplish the purpose and that without other rules than are now in force. The helper must be punished so severely that one offense will be all that is necessary to get rid of him entirely. With support from the papers the "charity" of the judges will be replaced with an inflexible resolution to do their part in counteracting the schemes, and a few combinations broken will have the effect to stop others being entered into:

There is a practice somewhat difficult to reach, and yet is doing harm to the turf, and that is of forming a combination to help this or that horse to win. When a driver is satisfied that he sits behind a horse which has not speed enough to show the way to the wire he makes an arrangement to help, for a consideration, what he regards as the most formidable contestant. The help consists in surrendering the pole to the animal of his choice, should he be fortunate enough to get it, or in giving up to him any place of advantage he may hold. It further consists in doing everything which can be done under a strained interpretation of the rules to block the way of the dangerous rival. For instance, the helper has speed, if used in bursts, to trot around the horse to which he is opposed, and he does so without interference, but when he is fairly in front he takes his horse back and compels the other to shorten its stride, or to pull out and trot around him. Much of this would be deemed fair under the rules, were each driver using his art to get his own horse to the score first, but it is not fair when done in the interests of a combination. The difficulty of determining where an unlawful combination exists is the protection under which the practice spreads and grows. It is easy to suspect, but suspicion is not proof. The rules are broad enough to cover the case, but it is rare to find three men in the judges' stand who will agree to narrow the definition and to sternly impose the penalty. It is the usual desire to exercise charity, and to allow plenty of latitude to the drivers. There are drivers who will not abuse the generosity of the stand, but, unfortunately, they can be counted upon the fingers of the hand, and so do not form the common standard of action. The only remedy which suggests itself is for the judges to make up their minds that tolerance is working injury to the turf, and to stop looking at a race with charity in their eyes. This helping business has been carried too far. If efforts are not made to put an end to it, the grumbling of owners will be louder, and trickery every year will become more and more apparent.

The Ladies' Tournament at the State Fair.

The equestrian display on Friday of the State Fair was the best ever seen on such occasions, both in regard to the number of entries as also to the skill, dash and grace shown by most of the young ladies who participated in the tournament. At the best of times it is a thankless task trying to adjudicate fairly on the proficiency shown on such occasions, and the president in making the award stated that the judges had studiously avoided taking the names of the ladies who contested, and that thereby their opinion was unbiased by the slightest form of favoritism, and the ladies were recognized only as bearers of certain numbers on their saddles. There was a great deal of trotting and galloping indulged in by the contestants one by one, both in the saddle and on the bare back, and one or two showed good trick riding, but owing to the horses not having been properly trained, or not being under the complete control of their riders, the evolutions in squads were very poorly managed. There was some divergence of opinion as to the relative merits of the young equestriennes and there was far from being a unanimity in regard to the awards made by the judges, which were as follows: First prize, Mrs. Marchand; second, Miss Belle Ellis; third, Miss Nellie Ryan; fourth, Mrs. Treffry; fifth, Miss Katie Londale; sixth, Miss Mabel Lunebach; seventh, Miss Carpenter; eighth, Mrs. Kate George; ninth, Alice Odibert; tenth, Edith Bradford; eleventh, Emma Londale. There were fourteen prizes awarded to the best bareback riders, as follows: First prize, Miss Carpenter, second, Miss Mabel Lunebach; third, Miss Nellie Ryan.

ROWING.

THE HILLSDALES.—The telegraph announces that the Hillsdale fours are coming back from England. The race with the Thames crew last week proved a most unfortunate affair for the Americans. Defeat under any circumstances is not pleasant, but in the case of the Hillsdales, after all the challenging and railing against the committees, the pill of misfortune must have been a very bitter one to swallow. The Hillsdales as previously remarked in these columns are not entitled to much sympathy. Had they acted in a sensible and business-like manner, made their arrangements properly and been sure before leaving America that they would be allowed to row in English regattas, their return would have been very different from what it is. They might have been beaten but they would not have been insulted as well as humiliated. Considering the rough and discouraging treatment that the Hillsdales met in England, they could not have been expected to do as well in a race as if they had been favorably received and allowed to proceed systematically with their training. The race has decided nothing. The question of the comparative merits of English and American champion fours is still unsettled. When the captain of the Hillsdale crew broke his slide his men were leading the Thames crew but there was still a long course before them and he would have been a wise man who could predict that the Englishmen would not get to the front before the finish. Many a good crew and sculler has been half a dozen lengths behind midway in the Thames course and in the last two miles pulled up and won easily. Boat racing is very uncertain, and unless it is a Hanlan who is to the front early in the race, it is a poor speculation betting that he will keep there over a four or five mile course. While the Hillsdales are very fast over one and a half and two mile courses they have no record over longer stretches of water, and as they practice a new style of rowing it is not certain that they can go the championship distances at their best pace. It is to be regretted that the Thames men refused to give the Hillsdales another race and their refusal to do so may indicate that they had had enough of the Americans. The crew that rowed the American four is not regarded by English professional oarsmen as the strongest amateur four that could be got together on the Thames. The London Rowing Club could put forward a much stronger crew and it is likely that such would have been the programme if the Americans had won their first match.

COURTNEY'S GREAT PERFORMANCE.—The *Turf, Field and Farm* says: In the three-mile single-scull race at Saratoga, August 25, Courtney finished second to Lee, who won in the very good time of 20 minutes 43 seconds, and immediately after the race the opinion was advanced that Courtney would have been victorious had he not fouled the number attached to his stake. As the foul cost him 20 seconds, and as his time was about 5½ seconds slower than Lee's, the opinion was well founded. On Canadago Lake, at Richfield Springs, September 1, Courtney rowed a three-mile race and vanquished him in the wonderful time of 19 minutes 31 seconds. The time of Lee was considerably faster than that made in the Saratoga race. It was 19 minutes 35 seconds. As the course was carefully measured, and as the watches were held by men of experience and reputation, we must accept the returns as correct. Courtney appears to be gaining courage. He has his nervous system under better control. He has been like a sensitively organized colt, which raises the hopes of its owner by astonishing trials, but which gets frightened when at the post and is unable to perform in a way satisfactory to any one. The thought of the race and the sight of the crowd seem to have half paralyzed him, and he was met with defeat after defeat when victory was within his grasp. Now that he has stepped out of the timid, fawn-like state, and demonstrated to himself and the world that he is gifted with great skill and power at the sculls, it is to be hoped that confidence will not again desert him. He ought to be able to vanquish both Hanlan and Ross.

SOMNAMBULISTIC OARSMEN.—The latest reported eccentricity of Charles Courtney is somnambulism. Some of the sporting journals are poking a good deal of fun at the Saratoga sculler because of his alleged propensity for taking exercise in his sleep.

Although it is likely that the story of Courtney's sleep-walking originated in the lively imagination of some reporter, it is a fact that somnambulism affects some famous oarsmen. One of the bright and shining lights of the Pioneer Rowing Club who some time ago dropped \$500 on a three-mile race is accustomed to train for his matches by a regular night ramble in undress. A couple of nights before his last race he created a panic in his boarding house by using the dining room as a sprinting path. As he was making the tenth lap the landlady rushed in thinking that a Greenback convention had met in the dining room, and discovered the somnambulist athlete flying around with as much contempt for superfluous clothing as the Long Bridge oarsmen show every Sunday when they go out to scare away all the sensitive females on shore.

AN ENTERPRISING CLUB.—The Ariel Rowing Club has probably less to say in the newspapers than any other club in San Francisco, but notwithstanding its silence it is always to the front when there is any rowing to be done. While some of the other clubs are blowing their horns and trying to startle the world with the praise of what they are going to do, the Ariels quietly keep on practicing and when Thanksgiving Day comes they will be found none the worse for their modest reticence. Last week they purchased the four-oar paper shell, formerly used with such determination but bad luck by the St. George Rowing Club. With some alterations in the rig of the boat she will be well suited to the Ariel four. Last Sunday they were practicing in the new craft, but the novelty had not worn off and their style could not have been considered a sample of what they will do in a few weeks.

COURTNEY'S LATEST VICTORY.—Until of late it was the regular thing to expect Courtney to get beaten in every race in which he entered. The burly carpenter seems determined to change the order of things, for he is beginning to figure prominently as a winner. A dispatch from Alexandria Bay (N. Y.), dated September 18th, thus describes the race on Poplar Bay, St. Lawrence river, between Courtney, Ten Eyck and Dempsey:

"A mile and a quarter from the turn Courtney was leading Ten Eyck two lengths and rowing thirty-four strokes to the minute. He passed home an easy winner by the same lead. Time 20:59. Dempsey was fully half a mile behind. The water was not good, but the men were willing to start. Courtney said it was the hardest race he ever rowed. Ten Eyck was quite exhausted."

AN ATHLETIC STATESMAN.—Thomas Murphy of the Potrero, Vice-president of the Pioneer Rowing Club and Champion wherry rower of the Pacific Coast, has been temporarily attracted from the aquatic arena by the prospective spoils of office. It was thought that Thomas would enliven Thanksgiving Day by a match on wherries with that tireless sculler R. C. Lyne of the Pioneer Rowing Club, but the glittering attractions of a statesman's career have interfered with the anticipated sport. Mr. Murphy is an announced candidate for the Legislature and the sentiment of the rowing clubs is strongly in his favor. A vote taken on Sunday at Long Bridge would send Thomas flying in a special train to Sacramento and make him Chairman of the Assembly.

A VETERAN HEARD FROM.—John Griffin's challenge on behalf of his son has drawn out the following defiant card from Jim Brannen, the veteran oarsman of the Pioneer club:

"In reply to J. D. Griffin's challenge to match his son against any member of the Pioneer Rowing Club, barring D. Leahy and E. Nelson, I will match P. J. Brennan for \$1,000 a side, any distance from three to five miles, the race to be rowed in six weeks from signing articles. A forfeit of \$250 awaits your pleasure. JAMES E. BRANNEN."

YACHTING.

The Mosquito Regatta.

The following are the rules of the Mosquito regatta, which comes off to-day at 1:30, starting from Long Bridge. The regatta will be under the auspices of the San Francisco Yacht Club:

Class 1 includes Whitehall boats; class 2, yachts fifteen and under twenty feet, length on deck; class 3, yachts twenty and under twenty-five feet, length on deck; class 4, yachts twenty-five and under thirty feet, length on deck; class 5, yachts thirty and under thirty-five feet, length on deck.

A time allowance of one minute to the foot, difference in length over all, will be given. This allowance will only be given to the boats on each class separately. A twenty-four-foot boat will have to give two minutes to a twenty-two-foot boat, for instance, but has nothing to do with boats out of her class.

The course is as follows: Crossing a line from the end of Long Bridge to the southerly line of Mission Rock, thence to and around a stake boat (yacht Chispa) anchored about three yarters of a mile east of Mission Street wharf in mid channel, thence to and around stake-boat (yacht Aggie, about half-way between Mission Rock and Alameda wharf, and in line with these two points), thence to Mission Rock again, passing to southward of it, and crossing starting line.

All boats must take this course. Fourth and fifth-class boats must, however, continue on, passing to westward of Mission Rock, thence to leeward and around the Alameda stake-boat again and back to starting point, passing southward of Mission Rock, and crossing starting line to finish. In this second turn, it is to be understood that the stake-boat Chispa, off the city front is omitted.

The sails allowed are as follows: For plungers, mainsail; for sloops, jib and mainsail; for yawls, jib, mainsail and driver, and for schooners, jib, foresail and mainsail. No light sails allowed. All yachts must carry a number on the starboard side of mainsail, which will be furnished, by the committee on the morning of the race. As to crews, class 1 and 2 may carry four men; class 3, five men; class 4, six men, and 5 class may carry seven men.

On the morning of the race, yachts will form in line according to classes:

Class 1 will anchor in line, south and east of Long Wharf; class 2 will anchor in line, east and abracast of class 1; class 3 will anchor in line south of class 1; class 4 will anchor in line south of class 2; class 5 will anchor in line south of class 4.

The Committee will be present when the lines are formed, and all are requested to endeavor to second their efforts by prompt compliance with directions.

The preparatory whistle will be blown from the judges' steamer at 1:30 P. M., when all yachts may set after-sails.

At 1:35 P. M., the second whistle will be blown, when class 1 will slip their moorings, and get under weigh.

At 1:38 P. M., the third whistle will be blown, when class 2 will get under weigh.

At 1:41 P. M., the fourth whistle will be blown, when class 3 will get under weigh.

At 1:44 P. M., the fifth whistle will be blown, when class 4 will get under weigh.

At 1:47 P. M., the sixth whistle will be blown, when class 5 will get under weigh.

Anchors may be slipped or weighed, as preferred.

The regular sailing rules of the San Francisco Yacht Club will govern this race.

Yachts fouling stake-boats, or competing yachts, will forfeit all claims to prizes.

The yacht nearest the stake-boat will be considered ahead, and if forced against the stake-boat, the one so forcing her will be barred out.

No shifting of ballast will be allowed during the race.

Yachts on port tack must give way to those on starboard tack.

Yachts running free must give way to yachts running by the wind.

Large yachts when passing, should go to leeward of smaller ones, and give smaller classes every chance.

The committee reserve the right to exclude any entries they may think proper, or to subdivide the classes; and also to decide all questions of any kind which may arise during the sailing of the regatta.

Two or three prizes will be given in each class, and will be distributed immediately after the race, at Mission Rock. All competitors are requested to come to judges' boat as soon as the race is over.

On Saturday last the Bohemian Yacht Club opened its new quarters at Sausalito. This new club is really a social one, all of its members being already members of the San Francisco Yacht Club. Her house is back of the San Francisco's and the landings have to be made at the S. F. Y. C. wharf and steps. There are only six members in the new club, J. C. Macdonough of the yacht Aggie, Jno. Rae Hamilton, yacht Clara, H. Tevis, yacht Whitewing, I. Gutte, yacht Chispa and J. D. and A. D. Spreckels, whose new yacht is not yet launched. It is not the intention to admit any more members. There is an idea of opposition to the present clubs. The club house is neatly fitted up and when everything is in place will be quite elegant. On Saturday last a couple of hundred ladies and gentlemen went over to the inauguration of the club house. After an inspection of the premises all hands adjourned to the more spacious hall of the San Francisco Yacht Club where some literary exercises were held, presided over by George Bromley, Daniel O'Connell and others. Members of the Loring club furnished excellent vo-

cal music. On the conclusion of the exercises the guests repaired to the tents, where table was spread and an old-

The Casco has been on a good deal lately.

The Gaviota lies at North Beach and is not used much.

The Flirt, Thetes and Spray are pretty evenly matched and ought to make a good race.

Commodore Harrison is around again in the Frolic, and keeps up her reputation for cruising.

The Consuelo and the Sweetheart will represent Lake Merrit in the Mosquito regatta to-day.

The Oakland boat Bessie which took the prize last year at the Mosquito race has been taken up river by some young men for a "shooting box."

The plunger Skipper, belonging to Capt. Ed. Munfrey of the Potrero, is a heeler in a breeze, and should the wind be pert to-day is expected to show her heels to some of the light weather crafts.

Lake Merrit is now the liveliest sailing place in the country. There are so many boats there that on Sundays there is great sport among those sailing them. It is not lonesome sailing, as it is on the bay.

The new yacht built by Turner for the Spreckels brothers will be launched in a few days. Those who want to see her on the ways will have to be quick about making their visit. The new yacht will be fitted up after she is in the water.

The Lolita has gone up to the Suisun marshes to stay for the winter as a "shooting box." She is moored where she was last year, in the Frankhorn slough, near the railway bridge at Teal station. A full outfit of hunting boats, traps, etc. has been taken up, and Captain Chittenden is prepared for a long siege upon the the ducks.

Commodore Macdonough and Mr. Gutte very peacefully permit their fine yachts to go as stake boats to encourage the "Mocquitos." It is but just to say that Mr. Bowie of the Nellie, Commodore Harrison of the Frolic, Mr. Hawkins of the Annie, and other gentlemen also volunteered their yachts and their services; all this is good for "the cause."

The 36 foot plungers, Restless Boss and Annie, were expected to go on the Mosquito race to-day. After a good deal of talk, however, and after a prize was provided, a race between them had to be given up. The Annie's sails were old and the owner did not want to sail except with new sails; the Boss was busy carrying oysters and couldn't be spared from trade long enough to be cleaned and put in readiness. This is the usual result in trying to put evenly matched boats to sail in a race on the bay.

fashioned clam bake had been prepared by Charley Dexter. After lunch music was provided for dancing but the guests seemed to prefer visiting the yachts. Small boats were in readiness at the float to take people on board the yachts which were moored near by, all decorated and decked out in gay bunting of all colors. The owners of the respective yachts were on hand to receive their guests and dispense hospitality. A special steamer was provided to take the visitors home though many returned in the ferry. All expressed themselves as having had a very good time.

ATHLETICS.

Another Amateur Sprinter.

At last another amateur sprinter has appeared that seems fit to compete with R. S. Haley from scratch. Masterson, of the Lacrosse Club, has very lately shown the ability to do 100 yards in 10 1-5 in a trial and at the rate he has been improving during the last two months, he is likely to do even time before the season is over. A match for a gold medal has been made between himself and Haley, the event to take place to-day, on the grounds of the O. A. A., and will be the most exciting contest on the programme of the fall meeting. It is well known that Haley can do 10 1-5, and that he invariably makes a game finish in all his races, and he will have hosts of friends on the grounds full of faith that he will be the first to breast the tape at the finish. And he has the additional encouragement of knowing that Masterson has never before shown himself, in an actual race, to be better than a fourth or fifth rate amateur. In the O. A. A. meeting last May, with 2½ yards in the 100 handicap, he failed to get a place in his trial. In the 440 handicap he won first, starting at the ten yards mark, but was completely run out in the slow time of 57½ seconds. His excuse for his bad showings on that occasion was that he was sick and out of condition, but was fairly forced to compete by the taunts of outside individuals. Since that time he has improved wonderfully, and has demonstrated his ability to give six yards to some of his opponents in the spring meeting and jog by the side of them for the last 25 or 30 yards. He does it so easily and quietly that it is very aggravating to the doubters.

There seems to be a feeling among the members of the O. A. A. that he will quit in a hard contest, and also that he cannot run beyond 60 or 70 yards. In the 440 yards last May he struggled as gamely for the last 40 or 50 yards as any one could wish, and the amount of work he does on the grounds every Sunday morning is sufficient testimony as to his staying qualities. An hour of Lacrosse, running wide and high jumping, a try at the hurdles, perhaps a 220 yards dash, from one to two or three rounds of the track at different times with different members of his own club whom he is constantly coaching and encouraging, and after all that the strength and speed remaining to make an extraordinary showing in any of the impromptu 100 yards handicaps among the sprinters present, and a stride of 7 feet 2 inches in the last spurt—well, he will bear watching, and being a healthy man, of good physique, promises to be the leading athlete in all running and jumping events on the coast. Even if defeated in his match to-day with R. S. Haley, we still feel confident that he will in the near future demonstrate his ability to compete with any amateur at any distance below and including 440 yards, and attend to his own business for a living at the same time. He should become a member of the Olympic club and the club should see that he does.

AN INVITATION.—The Triton swimming and boating club hereby respectfully invites all rowing clubs to be present at their social gathering to be held at their boat house next Sunday, Sept. 24th, at 9 A. M.

San Francisco, Sept. 21.

The bicycle races to take place to-day at the meeting of the Olympic Athletic Club promise to be well contested, and if we are not much at fault will show a material lowering of the Pacific Coast record at one mile.

THE RIFLE.

The International Rifle Match.

When the rival teams for international honors came down to daily practice, it was evident that the result of the match was a foregone conclusion, as at each distance the British team showed an average score that almost invariably showed a slight advance on that of the Americans, and that was bound to count heavily in the aggregate. It must be at once confessed that in making the match we labored under a great disadvantage, as among the British Volunteers it is a part of their yearly duty to go through a regular course of musketry drill and to fire a certain number of rounds in single, squad and skirmishing order, each shot being as carefully marked as in a prize match. Then there is not only a spirit of emulation but also the many valuable prizes offered for competition, that induce many to make a study of marksmanship and thus in organizing a team there is a far greater field to pick from in Great Britain and Ireland than there is in this country. It is pleasing to say that our men accepted their defeat with the feeling of gentlemen and in toasting the victors Colonel Bodine, the coach of our team, congratulated the victors and expressed the hope that the Americans would be able to turn the tables on their opponents in the return match to be held at Wimbledon next year, a wish that we thoroughly indorse, and that was received by the British, on hospitable thoughts intent, with great applause. Annexed is an account of the targets, as also the score made at each distance:

There are three descriptions of targets in use at Creedmoor, styled first, second and third class. The first-class target is used at all distances over 600 yards. It is six feet high by twelve wide. The bull's-eye is thirty-six inches in diameter. It is surrounded by another circle, known as the "center," fifty-four inches in diameter. Without this is a square, known as the "inner," six feet by six feet. The remaining oblong, three feet by six feet, at each end of the target, is termed the "outer." The second-class target is six feet by six feet and is used at all distances over 300 and to 600 yards. The bull's-eye is twenty-two inches in diameter, the "center" is thirty-eight inches in diameter, and the "inner" fifty-four inches in diameter. The remainder of the target forms the "outer." The third-class target is six feet high by four feet wide and is used at all distances up to and including 300 yards. The bull's-eye is eight inches in diameter, the "center" twenty-six inches in diameter, the "inner" forty-six inches in diameter and the remainder of the target forms the "outer." On all the targets a shot on the bull's-eye scores five points, on the "center" four points, on the "inner," three points and on the "outer" two points. The targets are made of cast-iron and are placed along two long embankments at the north end of the range.

On the embankment on the left-hand side of the range are placed eleven targets of the third class. On the other embankment are twenty-one targets of the first and second classes; those of the first class being grouped on the right hand side, and those of the second class on the left. The third-class targets have their bull's-eyes about six feet above the level of the range, the bull's-eyes of the first and second-class targets being about ten feet above the level of the range. The embankment behind the mid-range and long-range targets—the targets of the first and second classes—is about twenty-five feet high; that behind the third class or short-range target being much lower. Each embankment is surmounted by a thick board fence as a still further protection against badly aimed bullets. Beneath each embankment and in front of the targets is a covered way or tunnel about six feet by four feet where the markers are stationed. Fronting each target is a skylight and a trap door. When the target is struck the marker looking through the skylight sees the mark left by the bullet. He pulls a lever which opens the trap-door and at the same time causes to be displayed a red-colored disc on the right hand-corner of the target which indicates that the target is not to be shot on until the disc is removed, which is done by closing the trap-door. Then through the open trap-door the marker raises a pole with a disc attached to it, which by its color, indicates to the scorer what part of the target has been struck. When the bull's-eye has been struck he raises a white disc; for a "center," a red disc; for an "inner," a white disc with a black cross, and for an "outer," a red disc. To the reverse side of each disc is attached a brush. These brushes are used to paint over the marks made on the target by the bullets, so that when the marker signals to the scorer the number of points made, he at the same time obliterates the impression left by the bullet. The target being thus kept clean the marker can see readily where each fresh bullet strikes.

At the 200-yard range the Americans made the following scores: Hinds 29, Dolan 25, Alder 27, Ogden 27, Atkinson 29, McNevin 22, Pollard 29, Shakespeare 25, Paulding 27, Smith 30. Total, 331. The British made: Parry 28, Henp 31, Goodyear 23, Boulter 26, Oliver 29, Pearce 23, Dods 31, McVittie 31, Goodsell 29, Humphrey 27, Bates 23, Caldwell 24, Hinman 30, Howard 31. Total, 342.

In the 500 yards the score of the Americans was: Hinds 29, Ogden 31, McNevin 33, Atkinson 32, Howard 29, Shakespeare 29, Dolan 28, Alder 30, Pollard 31, Hinman 32, Smith 34, Paulding 31. Grand total, 369. British team: Parry 30, Goodyear 29, Caldwell 33, Dods 31, Bates 31, McVittie 34, Henp 34, Boulter 32, Pearce 32, Oliver 30, Humphrey 32, Goodsell 27. Grand total, 378. The result of the firing at the 500 yards added nine points to the lead the British secured at the 200-yard range, making a total lead in favor of the British of 18 points. The spectators now conceded a victory to the visitors. Their shooting was remarkably strong. McVittie and Henp made 34 out of possible 35. Humphrey, one of the best shots in the British team, was coached by his wife.

After the finish at 500 yards the men were soon at work upon the 600 yards range. The wind by this time had fallen considerably. The following is the score at 600 yards: American total—Ogden 31, Hinman 28, Hinds 28, Alder 23, Dolan 34, Atkinson 27, McNevin 30, Pollard 33, Shakespeare 29, Howard 25, Paulding 24, Smith 31. Grand total, 343. British score—Goodyear 24, Pearce 27, Parry 27, Boulter 32, Henp 26, Dods 32, Caldwell 31, Goodsell 30, Oliver 29, McVittie 30, Humphrey 24, Bates 28. Grand total, 344.

The aggregate scores at the three ranges were: Americans, 1,043; British, 1,062. Of the British team, McVittie made the highest aggregate score at the three ranges, scoring 95. Of the American team, Smith made the highest aggregate score at the three ranges, scoring 95.

On the 15th at the 800-yard range the score of the Americans was: Hinds 19, Dolan 17, McNevin 17, Hinman 19, Smith 23, Paulding 20, Ogden 27, Atkinson 26, Pollard 23, Shakespeare 16, Howard 19. Total for Americans at 800 yards, 255. British—Henp 10, Boulter 31, Goodsell 29, Humphrey 21, Caldwell 25, Pearce 29, Goode 29, Perry 25, Bates 24, McVittie 26, Oliver 21, Dods 26. Total for British, 293.

The score at 900 yards was: American—Hinds 19, Ogden 17, McNevin 24, Atkinson 23, Howard 17, Shakespeare 25, Dolan 27, Alder 22, Pollard 23, Hinman 23, Smith 26, Paulding 20. Grand total, 271. British—Parry 24, Goodyear 26, Caldwell 26, Dods 26, Bates 23, McVittie 30, Henp 18, Goodsell 24. Grand total, 313.

The score at 1000 yards was: Americans—Hinds 10; Ogden 20, McNevin 23, Atkinson 19, Howard 29, Shakespeare 21, Dolan 21, Alder 11, Pollard 18, Hinman 23, Smith 21, Paulding 20. Grand total, 236. British—Parry 31, Goodyear 26, Caldwell 25, Dods 20, Bates 25, McVittie 25, Henp 24, Boulter 24; Pearce 27, Oliver 27, Humphrey 32, Goodsell 22. Grand total, 307.

Grand aggregate total of the two days' shooting—Americans, 1,805; British, 1,975.

That Shooting at Carson.

CARSON CITY, NEVADA, September 19, 1882.

EDITOR BREEDER AND SPORTSMAN: In your issue of the 16th inst. I find the record of the rifle match of the 7th between Messrs. Williams, Kellogg, King and Thaxter, and I also notice your doubting and somewhat facetious remarks relative to the handsome score made by the latter gentlemen.

The Carson Guards, a regularly organized military company, is composed of honorable men and among them King and Thaxter; the practice of target shooting with this company is done for improvement and is not conducted to deceive anyone. I placed the target in position, saw every shot made, removed the target and had it photographed, a copy of which is herewith enclosed, and I confidently assert that it has not been tampered with, but that every shot was made as telegraphed and as they appear on the photograph, and would send you the 200-yard score had it not been made on an iron target.

These two gentlemen are not the only good shots in our company, as we have a team of twelve men that for money, moss-agates, marbles, Indian legends, or photos of Kellogg and Williams' score, can beat the score of the American team in the International match.

This is intended as a challenge, and with malice prepense and aforethought, and knowing how words sound and what they mean, it is so written a challenge as open and broad as the universe is boundless.

If you harbor a thought that these two gentlemen cannot repeat the score, come up here, act as marker, and if they fail you can win money enough to enable you to travel in foreign lands in Pullman palace cars during the rest of your days and make valuable presents to your multitude of friends, and the money you will win will tend to increase your friends, and also a present to your subscriber and to your servant, Rick B. Shay. Very Respectfully,

HUBB G. PARKER,
Captain Carson Guards.

Note by the editor of the BREEDER AND SPORTSMAN.—It is pleasant to call attention to the remarkably fine score made by Messrs. King and Thaxter, and in order to promote a spirit of emulation among our own marksmen a fac simile of the target is hereto appended, taken from the photograph so courteously sent by Captain Parker, commanding the Carson Guard.

One hundred shots, 500 yards.

* Sighting shots

THE SCHUTZEN CLUB.—The California Schutzen Club held its monthly medal and bullseye shooting on Sunday last at Alameda Schutzen Park. The shooting was made especially interesting by Mr. Freese, a member of the club, giving a beautiful silver goblet as first prize for the best center shot. The following is the result of the contest: First prize for best center, C. Rapp, silver goblet; second prize, A. Strecker; third, F. Freese; fourth, Zecher; fifth, P. Jacoby; sixth, A. Rahwyler; seventh, Krahmann; eighth, H. C. Smith; ninth, C. C. Rhols; tenth, K. Wertheimer; eleventh, Bertram; twelfth, Roschel; thirteenth, C. Adams; fourteenth, Hoz; fifteenth, Langensfelden; sixteenth, Eckmann; seventeenth, Maag; eighteenth, Greiner; nineteenth, L. Haack; twentieth, Thompson; twenty-first, Folkers Jr.; twenty-second, Nobmann. First-class medal, H. C. Smith, 403 rings; second-class, Krahmann, 378 rings; third-class, Hoz, 367 rings.

The club will hold its grand prize shooting at the same park on Sunday, Oct. 1st, at which both prizes and sweepstakes will be shot for. There are three styles of shooting, at bullseye targets, at man targets and at honorary targets. The shooting is open to all comers and promises to be the most successful reunion ever held by the club.

There ought to be a more systematic method of getting up rifle matches between teams of different companies of the National Guard than is now the case. With a proper spirit of emulation, and especially with practice and the proper study of winds and atmospheric changes, San Francisco ought to turn out a team chosen from the National Guard that could beat the score of the American team in the recent International match.

The Turner Sharpshooters held their monthly medal shooting last Sunday at Alameda Schutzen Park with the following results: Champion medal D. Schoenfeld, 407 rings; first-class medal O. Brummeister, 352 rings; second-class medal Charles Huber, 303 rings; third-class medal Charles Sagehorn, 277 rings.

California Horses at the East.

NEW YORK, Sept. 13.

MY DEAR MR. SIMPSON:—I was at Sheephead yesterday and had the pleasure of witnessing two grand racing events wherein Lucky B and the Duchess of Norfolk won their respective races of a mile and a half with comparative ease. The betting on each race was about the same, being ten to one against the winning, and consequently the Bookmakers were heavy losers.

Our friend Walton, the Plunger, backed the wrong ones and fell heavily. E. J. Baldwin, it is said, won about \$15,000. O. P. Keys pocketed about \$8,000, J. P. Hutchinson \$5,000, and indeed all the Californians won handsomely.

The horses in Mr. Baldwin's stable have been sick and in miserably bad shape, especially so while at Monmouth Park, but their removal to Sheephead Bay has proved highly beneficial. I hope, and now believe, that you will hear grand reports from this stable hereafter.

I have heard much of your new paper. I wish you would send to me the back numbers and consider me a regular subscriber from the start, and I will remit my subscription soon as I receive the papers.

Wishing you prosperity and many happy days, and with kind remembrance of yourself and family, I am,

Sincerely your friend,
W. J. WELCH.

THE FUTURE OF THE BEEF MARKET.—Owing to the easy exportation of fresh meat to Europe, the price of beef has gone up very rapidly in the last year, and the cause which sent it up will keep it at a good, round figure for many years. The offal of the Colusa county farms, now wasted, would feed a million dollars' worth of cattle. But not only will the price of beef keep up, but mutton and pork must follow. There is hardly any product so profitable as pork at five cents on foot, and we think the outlook promises that it will remain about that figure for some years to come. See how many hogs a little alfalfa patch will keep until the stubble is ready to fatten them. How many thousands acres of stubble went to waste this year in Colusa county? Stock, cattle and sheep will live on straw, and it costs less than a dollar a ton to stack straw so as that it will last for years. There is more money in attending to saving these things, than attempting to plant, in a wasteful manner, great areas of wheat. And besides, a system of stock-growing keeps the land from wearing out. Pasturing always improves land. These things are worth the earnest consideration of the farmers of the county.—Colusa Sun.

THE GUN.

Good Shooting.

DENVERTON, CAL., September 19, 1882.

EDITOR BREEDER AND SPORTSMAN, Dear Sir: Thinking that the following might be of interest I send it:

Ed. Stewart and myself, at the Harmon ponds, north of the Montezuma Slough, on the morning of the 15th, killed 22 mallards, 8 cinnamon teal and 6 grey geese. The geese were the first of the season, in fact were killed from the first flocks seen in this section this year. The prospects for a good duck and snipe crop are excellent. Yours, etc.,

JIM MACK.

Mr. O'Keif has returned from Jersey Landing and reports very good duck shooting in that vicinity.

Sam Hunter and Geo. Coffee with the aid of the two faithful young setters, Bess and Nell, succeeded in bagging 34 quail near Niles, on Sunday morning before 10 o'clock.

Fred Johnson went down to the Bouchard Brothers' ranch, near Pescadero, and bagged about twelve dozen quail in three days. He says that quail and rabbits are very plentiful in San Mateo county. Fred is a member of the Cosmopolitan Club and is a first-class huntsman.

A. F. Adams and Mr. Floyd spent a few hours last Saturday in the Morgan Valley, among the quail. The quail are as plentiful in this valley as elsewhere but the difficulty is in getting them when killed, as the brush is so thick that the dogs are unable to work well and so many are lost. Messrs. Adams and Floyd in two hours' shooting bagged fifty quail and several rabbits.

A party of five members of the Cordelia Club opened the season by a hunting trip to their preserve in the Suisun marshes. They went up Thursday evening and had good luck on Friday by bagging fifty-five birds, mallards, teal and a few sprig; most of the latter were young and in good condition. Beside their own boats and scows, the Cordelia Club has leased Capt. Chittenden's yacht "Lolita" for the season and has had Captain C. sworn in as deputy sheriff to protect the marshes.

While walking near the Oakland ferry the other evening we ran across a sportsman just returned from a day's hunt over the bay. On inquiring what success he had met with, he pointed to a well-filled game bag lying on the sidewalk. We wished to examine its contents but he remonstrated, as he couldn't stop just then. By insisting for a short time we carried the point and drew out six quail, two doves and a fine, young rooster—the results of his day's hunt. As he had some good cigars to offer, there will be no names mentioned.

Messrs. C. Robinson, R. E. Wilson and T. Pearson, of the Sportsman's Club, opened the season with a hunt on Grass Valley farm in Alameda county. These three gentlemen bagged fifty quail. They say that quail are scarce in that section of the country. Aside from the game killed by the party Mr. Pearson had a little sport on his own hook. Soon after getting out he accidentally fired a charge of bird shot into the rear portion of the anatomy of his favorite hunting dog; and a little later he—by accident of course—fired into a flock of tame turkeys, killing four of the number. Mr. Pearson will please remember that the open season for turkeys does not begin till just before the holidays. We cannot find authority for the open season for dogs.

The morning of September 15th opened up one of the best seasons for quail that has been known for years. Every one who could get away from business shouldered his gun and began a second Waterloo on the feathered tribe. Many left this city for the hunting grounds the day before, so as to be on hand for the first shot of the season at the earliest break of dawn on Friday morning. For several days following the battle raged. From nearly every ravine, woodland and marsh within a day's ride of San Francisco, could be heard the reports of fire-arms. The farmer, with his old-fashioned army musket; the market and pot-hunter with his death-dealing shotgun, and the sportsman with his latest improved fowling piece, all joined in the slaughter of the innocents.

HERD AND SWINE.

Jersey Reds, Durocs and Red Berkshires.

There has been some dust thrown in the eyes of the public by certain breeders of red hogs. It is foolish for any breeders of red hogs in New Jersey to claim that he has the only pure-bred red hogs, or Jersey Reds, as they are called in that State. One breeder in New Jersey, who claims to have the "pure breed," and that all others are mixed or spurious, I imagine would have hard work to give correct pedigrees more than a dozen years back. Less than a dozen years ago his father wrote me that he could not tell the origin of the red hogs of New Jersey, neither was any citizen of that State, in response to my inquiries, able to give their history. I also inserted notices in some of the leading agricultural journals asking for their history; but obtained no response. After a careful investigation I became satisfied that these hogs, as well as the other families of red hogs, were descended from the old Berkshires, and so reported to the National Swine Breeders' Convention. No one has ever disputed that statement. Since that time I have seen an old English work, printed nearly a hundred years ago, which confirms the impression; as, in the description of the old-fashioned Berkshires, the color and characteristics of the modern red hogs are accounted for. It is said that the Tamworths, the red hogs of England, are an off-shoot of the Berkshire. A few importations of these hogs have been made recently, for the purpose of crossing them upon the red hogs in America. This red blood has been so strong in America that it has preserved itself, although the crosses upon it have been innumerable. This is particularly the case in New Jersey and along the Atlantic coast, where these hogs were quite extensively bred. I saw them twenty years ago in Maryland, as well as in New Jersey, and they were red-and-white, sometimes marked with black; but always long in the body, coarse in the bone, with heavy coats of hair and bristles. There was no attempt in those days at breeding them strictly pure, any more than there was of the Durocs, another family of red hogs bred in Saratoga Co., N. Y. The Durocs seem to have been brought to this section from Connecticut, where red hogs have been bred and called Red Berkshires. The stock seems to have become run out in that State. The Durocs of Saratoga were descended from a pair of pigs brought into the vicinity by a Mr. Kelsey, who said they were imported; but whether he meant from Connecticut or Great Britain it is not known. This was about sixty years ago. Other pigs were afterwards brought from Connecticut to a different part of the county. The stock from these two different families has been bred in the county ever since. No particular system or purity in breeding seems to have been followed with the Durocs more than with the Jersey Reds, until within a few years, since they were brought into notice by the National Swine Breeder's Convention.

The original and the purest type of a Jersey Red is a coarser and larger hog than the Duroc, and of course they are superior to the latter, so much as greater size is an advantage. The Durocs are finer boned and will mature sooner and fatten younger. Both families possess the general characteristics of strong constitutional vigor and hearty appetites, with strong digestion and prolificness most remarkable—the natural result of their characteristics. They are wonderfully hardy and possess an ability to take care of themselves which is quite gratifying. Several breeders met together a few years ago and determined to begin breeding the Durocs, as they were called—the name being a fancy of Mr. Kelsey's, after the noted stallion Duroc—by selecting the best blood to be obtained and the nearest like a good Berkshire type. They adopted a standard of characteristics which has been put on record, but which it would be well to repeat. They also determined to give these hogs their true name, Red Berkshire. The true Duroc or Red Berkshire, quoting from a former article in the *Rural New Yorker*, as now bred by those who are aiming to keep the breed perfect and establish them as thoroughbred, should be long and quite deep-bodied; not round, but broad on the back and holding the width well out to the hips and hams. The head should be small compared with the body, with the cheek broad and full. The neck should be short and thick, and the face slightly curved, with the nose rather longer than in the English breeds, the ear rather large and lopped over the eye. They are not fine-lined nor yet coarse, but medium; the legs medium in length and size, but set well under the body and well apart, and not cut up high in the flank or above the knee. The hams should be broad and full well down to the hock. There should be a good coat of hair of medium fineness, inclined to bristles at the top of the shoulders, the tail being hairy and not small; the hair usually straight, but in some cases a little wavy.

The color should be red, varying from dark glossy cherry red, and even brownish hairs, to light yellowish red, with occasionally a small fleck of black on the belly and legs. The darker shades of red are preferred by most breeders, and this is the type of color most desirable. In disposition they are remarkably mild and gentle, and are so docile that they are readily confined by low fences. They are kind and careful mothers and wonderfully prolific. They have a remarkable ability to digest food and make growth. This is owing to their hardy constitutions and perfection in the proportions of their bodies, and the strong blood which has made its mark so notably for more than half a century.

It is a common thing for Duroc pigs at six months of age to weigh 300 pounds, and at eight and ten months to turn the scales at 400 or 500 pounds. Hogs a year and a half old have weighed from 700 to 800 pounds. Pigs four weeks old will weigh from twenty to thirty pounds and measure over two feet in length and from six to eight inches across the shoulders. For rapid growth and ability to lay on flesh the Durocs are not excelled. The meat is not coarse-grained, but fine and tender. Their powers of assimilating food are so great that they readily eat coarse food more dainty breeds would not touch, and will even fatten on grass alone; and in winter will eat with avidity clover, hay and roots which other hogs will refuse. They are not subject to mange or liable to get sun-burnt, and are adapted to all climates.

MANAGEMENT OF SWINE.—In discussing the management of swine, Prof. Knapp of Iowa says: Perhaps the radical change should be less in the food than in the proportion it is fed. Corn is healthy enough when given in moderate quantities; wheat is considered a healthy food, but hogs can be injured upon that as readily as upon corn. The hog has an appetite beyond his capacity to digest, and so long as that is the case, he must not be given full rations of concentrated food until within a few weeks of the pork barrel. There are two practical methods. First, in case the farmer has no roots nor pasture, he can grind his corn and mix with it wheat bran. Half bran and half corn meal by bulk make a good mixture for all kinds of stock. For pigs, add a little salt and

oil meal; for pigs under 100 pounds, use some milk; older than this, water will do. Second, the purchase of large quantities of wheat bran is expensive for the general farmer; corn and clover are the profitable crops to be fed. In such cases the cheap food to go with the corn is sugar beets in the winter and clover in the summer. No food can be raised on the farm that will answer a better purpose than sugar beets for the main dependence of store hogs during the winter, and with suitable machinery and some knowledge few crops can be produced at greater profit.

Miscellaneous Awards at the Chico Fair.

Household.

Mrs. C. C. Goree, Best Stocking Yarn; Mrs. C. C. Schoonover, Best 10 yds Rag Carpet; Mrs. J. E. Walker, 2nd Best 10 yds Rag Carpet; Mrs. Winders, Best Hooked Rug; Mrs. Stamp, Best Collection Rugs; Mrs. J. H. Guill, Best Knit Cotton Stockings; Mrs. C. C. Goree, Best Knit Wool Stockings; Mrs. C. C. Schoonover, Best Knit Wool Socks; P. Peters & Bros., Best Display Dry Goods; Mrs. G. F. Jones, Best Display Fancy Goods; Mrs. G. F. Jones, Knit Rug.

Mrs. Phillips, Ottoman Cover; Dora Chandler, Fancy Chair Cushion and Back; Mrs. G. F. Jones, Crochet Shawl; Mrs. Eitel, Lamp Stand Mat; Mrs. C. F. Jones, Silk Embroidery; Mrs. W. H. Earll, Ornamental Needlework; Mrs. J. F. Decker, Embroidered Sofa Cushion; Mrs. A. C. Broyles, Embroidered Handkerchief; Mrs. A. M. Barley, Chenille Work; Miss Carrie Burroughs, Lace Handkerchief; Mrs. J. M. Ormsby, Best Bead Embroidery; Mrs. Wm. Estee, Embroidered Pillow Shams.

Mrs. J. Phillips, Worsted Quilt; Mrs. Eitel, Card Board Work; Miss Decker, Embroidery on Canvass; Mrs. E. A. Warren, Tufted Cushion; Sarah F. Swanson, Display Feather and Worsted Work; Mrs. Albert Jones, Best Feather-edge Braid, Velvet Bounet, Velvet Hat, Display Feathers, Artificial Flowers; Mrs. A. C. Broyles, Variety Linen Embroidery; Mrs. F. A. S. Jones, Specimen Wax Flowers; Mrs. Mickey, Worsted and Linen Work; Mrs. Jones, Cane Work; Mrs. Jones, Leaf Work; Mrs. Jones, Shell Work; Mrs. J. H. Guill, Specimen Braid Work; Miss Gussie Jansen, Embroidered Picture; Mrs. S. J. Barkley, Silk Quilt; Mrs. Reister, Patchwork Quilt; Mrs. Hooper, Afghan; Mrs. A. C. Broyles, Outline Embroidery; Mrs. A. C. Broyles, Best Embroidery; Mrs. A. M. Barley, Lambrequin; Miss Gussie Jansen, Fine Lace work.

Mr. J. S. Hill, Toilet Set Complete; Mrs. A. F. Estel, Wax Leaves; Mrs. J. J. Hassell, Hand-made Dress; Miss T. J. Decker, Sofa Cushion.

Juvenile Department.

Miss M. Goree, Best pr. Knit Wool Stockings; Miss Lorine Stilson, Charm String; Miss Alice Jones, Bracket Lambrequin.

Manufactures.

L. A. Reister, 2 Sets Double Harness; L. A. Reister, 4 Sets Single Harness; L. A. Reister, Display of Saddle Bridles.

Farrell & Co., Display of Tinware; Farrell & Co., Plumber's Goods; Farrell & Co., Exhibit of Wire Cloth; Hubbard & Sommers, Display of Silverware; Hubbard & Earll, Display of Gas Chandeliers; Hubbard & Earll, General Hardware; Hubbard & Earll, Display of Mechauc's Tools.

Farrell & Co., Oil Stove; Farrell & Co., Parlor Stove; Farrell & Co., Hollow Iron Ware; Farrell & Co., Gas and Water Pipes.

Farrell & Co., assortment of bathing tubs; Hubbard & Earll, Cooking stove for wood; same, cooking range.

De Toe & Riggs, San Francisco, display of musical instruments; same, best piano made in United States; same, best organ made in United States.

Farrell & Co., double barrel shotgun; same, sporting rifle; same, breach-loading shotgun.

Mrs. C. C. Goree, display of home made soap; Mrs. J. H. Guill, soft soap.

E. A. Warren, display of confectioneries.

J. T. Newman, Stoneware and pipes; Wm. Proud, Omeological display.

Grain, etc.

John Bidwell, 1 bushel of any one kind of wheat; Fred Wakefield, 1 sack of barley; Hubbard & Shaw, 1 sack of flour; John Bidwell, best table vegetables; Mrs. J. Bidwell, collection of ornamental foliage.

J. H. Guill, best display of butter in pound rolls; David Reid, second best display of butter in pound rolls.

Cooking.

Miss Hattie Mandeville, best wheat bread; same, brown bread; same, raised biscuit; Mrs. J. E. Walker, best soda biscuit; Mrs. J. F. Fisher, best salt-rising bread; Mrs. A. T. Eitel, best corn bread; Mrs. A. T. Eitel, best yeast powder biscuit.

Fruit.

Mr. Harris, Best display of apples; J. Bidwell, second best display of apples; J. H. Guill, best display of pears; J. Bidwell, second best display of pears; Mr. Harris, best three varieties pears; Mr. Harris, best display peaches; J. Bidwell, second best display peaches; J. H. Guill, best four varieties of plums; J. Bidwell, second best four varieties plums; M. Z. Moore, Best pomegranates; J. Bidwell, best figs; Mr. Harris, best oranges.

Preserves, Jellies, Etc.

E. B. Stucky, exhibit of honey; Mrs. J. E. Watson, best three jars currant jelly; Mrs. R. Diller, assorted jellies; same, display of fruit in glass; Mrs. M. J. Moore, raspberry jelly; same, blackberry jelly; Della Goodrich, best display of preserves; Mrs. Dave Smith, second best display of preserves; same, best display of pickles.

J. Bidwell, best display of apples; same, pears; same, peaches; same, plums; same, apricots; Chester Walker, best 10 pounds dried figs; J. Bidwell, best dried raisins, J. H. Guill, best dried berries; J. H. Guill, half peck soft shell almonds.

Miscellaneous.

Mrs. F. A. S. Jones, profile picture; Miss Emma Crew, Landscape painting, same, California scenery, same, best oil painting on canvas.

J. F. Cole, exhibit of penmanship; Mrs. A. A. Hubbard, screen painted in oil or canvas; D. H. Wood, exhibit of photographs.

G. W. Crapo, 7 frames; same, 1 air castle; same, 1 card receiver.

J. W. Pettinger, Smith's patent churn.

E. M. Allen, picture frames, pocket knife work.

Mrs. W. Earle, child's dress, 70 years old, made in Paris, France.

J. H. Guill, improved churn.

J. H. Guill, exhibition California hardwood.

Mrs. J. H. Guill, home made vinegar.

J. M. Denely, case velvet frames.

Mrs. S. T. Tuttle, 27 articles made with hand fret saw.

Mrs. James Peal, fancy card basket.

A. L. Knowlton, geological display.

Chico Cannery, best display of fruit in cans.

THE KENNEL.

Fixtures.

BENCH SHOWS.—Western Pennsylvania Society's English Setter Bench Show Derby, Pittsburgh, Pa., for English setter puppies whelped on or after March 1, 1882. Entries closed December 1, 1882. I. R. Stayton, Allegheny City, Pa., secretary.

Gilroy Rod and Gun Club's trials on quails, near Gilroy, California, October 28. Opens to dogs owned in California, Oregon, Nevada and Arizona. E. Leavesley, secretary, Gilroy, California.

Eastern Field Trials Club's trials on quails, near High Point, N. C., November 17. Entries to Derby close July 1; to All-Ages and Members' Stake, November 1. Fred N. Hall, secretary, P. O. Box 884, New York.

National American Kennel Club's trials on quails, Grand Junction, Tenn., December 4. D. Bryson, Memphis, Tenn., Secretary.

American Fox Hunters.

Great Britain is the home of all that is best and noblest in field sports, and there is little cause for wonder that Americans who are mainly the descendants of Britons should often copy their sporting fashions from the old country. America has only originated three sports—trotting, baseball and lacrosse—and has imported three hundred. This is natural enough, yet whenever the editor or correspondent of a daily paper is short of ideas he turns his massive intellect to flying shafts of ridicule to be hurled against gentlemen in America who practice English games. The fox hunters of New Jersey and Newport may not be as bold riders, nor the foxes so fast a game as those of Galway or Milton, but that is no reason why the American fox hunters should be a butt for the ridicule of men who never get astride of any horse except a saw-horse, nor hunt for any game larger than the pestiferous fleas which infest their offices. The average Californian is a better, bolder rider than the average Englishman and will gallop his mustang where the Englishman's hunter could not keep his feet. The people of New York, like the people of all large cities, are not as a rule good riders simply because they have no place in which to practice, and their attempts to get practice by fox hunting at Newport, instead of deserving ridicule deserve praise. The writer has seen many a fox hunt in this State and has followed some of the best packs in England and is free to confess that the work is far harder here though the pace may be a little faster in England. It is no burlesque of sport to gallop over plains as closely furrowed with gopher holes as a small-pox patient's face is with pits; and what the sport lacks in danger here from stiff fences it makes up in the hardness of the ground, on which a fall means a week in bed. The sport is perhaps harder and rougher here than at Newport but it is dollars to cents that those who ridicule the Newport fox hunters could not stay with them five minutes.

SHEEP DOG TRIAL.—From the *Live Stock Journal and Fancier Gazette*, comes the news that the first trials of the East Lothian Sheep-dog Trial Club were in all respects successful. The entries numbered eighteen. Mr. P. Mack's Turk was first; Mr. T. Gilholm's Fly second; Mr. J. Bald's Reeve third; Mr. G. Dod's Yarrow fourth. The form of the trial was as follows: Three wild mountain sheep were let from a large pen of sheep at one end of the course. Two poles, with two flags on the top, were erected in the center of the course, ten feet wide; a flag was placed at the extreme opposite end of the course. The dogs were required to drive three sheep through between these two poles to the flag at the extreme opposite end, where all the sheep were put together as the dogs were tried. This proved a most difficult piece of work, testing the dogs very hard. Only three were unable to accomplish this task, which were disqualified for the next part of the trial. After this had been accomplished, and all the sheep put in one lot, each man with his dog was required to cut off three sheep from the large flock, drive them along the course, where a small pen was placed in the open, into which they were required to pen their sheep. This also proved a most difficult piece of work, the pen only being four feet wide at the entrance. They were afterwards removed to the large pen, where they were first let out. This enabled the judges to form a selection of the best dogs, six of which in point of merit it was difficult to decide between. A very scientific and meritorious competition was held to decide for the first and second prizes; two of great merit, Gilholm's Fly and Mack's Turk. The latter, however, securing first honor, excelling in being steeper and under better command, accountable by being a year older. This terminated a keen and grand sheep-dog competition. The attendance was pretty large considering the unfavorable weather.

A TALL STORY.—Recently, when the Denver train was coming in from the West, as it passed Kearney, a village forty-one miles west of Grand Island, a setter dog jumped on to the front of the postal car, next to the engine, and persisted in riding. Those who observed him tried to coax him off, but without success. They then pulled him off, but as soon as released he jumped on again, and persisted in having a first-class railroad ride. When he reached Grand Island another effort was made to get him off the cars, but he would not have it that way, and maintained his position on the front of the car while the engine was changed, never faltering when the new engine was backed down and coupled on. The trip was continued six miles further east, to a side track where the Denver train from the East passes the one from the West. Here he quickly leaped off, and as quickly jumped on the front of the postal car attached to the other train, and began to bark as though he had got home. In this car was his master, whom he had gone to meet. All this ride was taken in the middle of the night. The whole transaction seems marvelous, but the strangest part is that he should have kept the run of the trains, and have calculated correctly the train that his master would arrive on. This story is vouched for by Mr. Alexander Stewart, who runs one of the passenger engines from North Platte to Grand Island.

DEATH OF CARLOWITZ.—The well known Laverack setter dog Carlowitz, by Pilkington's Dash out of Countess, died recently at the kennel of his owner, Mr. James H. Goodsell, from old age, being at the time of his death in his tenth year. He left quite a number of his progeny out of Laverack and other bitches, the most noted of which is, perhaps, Royal Duke out of True, Sister to Mr. Luther Adam's Drake. —*American Field*.

National American Club Trials.

The first field trials of the National American Kennel Club on prairie chickens commenced near Fairmont, Minn., Monday morning, September 4th. The attendance of sportsmen was very large, representatives being present from the East, West and South. The weather on the opening day was clear but very warm; Tuesday was clear and pleasant. Owing to an accidental injury, Hon. B. E. B. Kennedy, of Omaha, Neb., one of the judges selected, was unable to attend, and Mr. B.

Waters, of Canterbury, Conn., was selected by the contestants to act as judge pro tem during the running on Monday. Mr. E. C. Sterling, of St. Louis, Mo., was selected to fill the place of the absent judge for the balance of the trial, taking the position Tuesday morning, as Mr. Waters had entries in the Free-for-All which follows the Derby. The birds were not as plentiful as was expected. The running commenced with the American Field Derby, for which there were forty-five nominations, sixteen of which completed their entries. Pools were sold before the trial commenced, with Mr. Joseph H. Dew's American Dan favorite in the first pool, after which Mr. George C. Marsh's Gilderoy sold favorite in the balance. The following heats were run in the American Field Derby up to Tuesday evening, resulting as follows:

FIRST SERIES.

Elsa beat Prairie Mollie.
Gilderoy beat Josephine.
Pink B. beat Scott.
American Dan beat St. Elmo IV.
Cavalier beat Count Dad.
Prince Noble beat Acme (withdrawn).
Prairie Wonder beat Frank (withdrawn).
Countess Mollie beat Countess May II.

SECOND SERIES.

Gilderoy beat Elsa.
Pink B. beat American Dan.
This concluded the running Tuesday night, with Cavalier and Prince Noble to go down in the morning.
The free-for-all closed with twenty-eight entries, which were drawn to run as follows:

Messrs. P. H. and D. Bryson's Sue, by Druid--Ruby (setter).	Agst	Mr. W. H. Colcord's Countess Druid, by Druid--Princess Draco (setter).
Mr. H. M. Short's Frank II. (setter).	"	Mr. O. C. Calkins' Broker, by Druid--Clio (setter).
Mr. George Knowles' Kinnick-inck by Reid's Druid--Bessie Lee (setter).	"	Mr. Luther Adams' Bessie, by Dash III--Countess II (setter).
Mr. E. F. Stoddard's Bodine, by Bow Janny (pointer).	"	Mr. W. E. Hughes' Maxima, by Garnet--Jill (pointer).
Dr. W. H. Daly's Jess, by Don--Flash (setter).	"	Mr. R. T. Vandervoort's Christmas Bill, by Luck of Eden Hall--Ready Money (pointer).
Sportsman's Kennel's Prairie Ranger, by Charin--Pearl (setter).	"	Mr. Luther Adams' Shadow, by Lincoln--Daisy Dean (setter).
Mr. D. C. Sanborn's Count Noble, by Count Windem--Nora (setter).	"	Mr. H. B. Harrison's London, by Paris--Lill (setter).
Dr. D. C. Sanborn's Dashing Novice, by Dash II--Novel (setter).	"	Mr. W. Tallman's Foreman, by Dashing Monarch--Fairly II (setter).
Mr. W. E. Hughes' Meteor, by Garnet--Jill (pointer).	"	Sportsman's Kennel's Pride, by Charin--Fly (setter).
Mr. J. W. Orth's Gertrude, by Gladstone--Nellie (setter).	"	Mr. J. J. Snellenburg's May Laverack, by Thunder--Spot (setter).
Mr. L. Shuster's Clementine D., by Dash III--Cornelia (setter).	"	Mr. J. S. McIntosh's Biz, by Dash--McIntosh's Flora (setter).
Dr. N. McDonald's Rock, by Rex--Belle (setter).	"	Dr. S. Fleet Speir's Maida, by Dick--Clio (setter).
Mr. T. O'Brien's Dash, by Bob--Pet (setter).	"	Mr. J. Otto Donner's Bessie R., by Ranger II--Belle (setter).
Mr. R. B. Morgan's (Mr. C. E. Felton's) Prairie Punch, by Charin--Pearl (setter).	"	Mr. R. T. Vandervoort's Don, by Bang--Peg (pointer).

Mr. Sterling having resigned, owing to the duties being so arduous, Mr. F. B. Wilson was selected to act in his place on Monday with Messrs. Morford and Bergundthal.

The following is the order in which the heats were run and won:

American Field Derby.

Elsa beat Prairie Mollie, Gilderoy beat Josephine, Pink B. beat Scott, American Dan beat St. Elmo IV., Cavalier beat Count Dad, Prince Noble beat Acme, (withdrawn), Prairie Wonder beat Frank, (withdrawn), Countess Mollie beat Countess May II.

Second Series—Gilderoy beat Elsa, Pink B. beat American Dan, Prince Noble beat Cavalier, Prairie Wonder and Countess Mollie were taken up not to be put down again, and the judges reserved their decision.

Third Series—Pink beat Gilderoy, Prince Noble (a bye).

Fourth Series—Prince Noble beat Pink B., and won first money.

Fifth Series—Pink B. beat Cavalier (withdrawn) and won second money.

Sixth Series—American Dan beat Scott, Gilderoy (a bye).

Seventh Series—American Dan beat Gilderoy, and won third money.

Eighth Series—St. Elmo IV. was withdrawn, and Gilderoy and Scott divided fourth money.

All Aged Stake.

Sue beat Countess Druid, Frank H. beat Broker, Bessie (Adams') beat Kinnickinick, Maxine beat Bodine (withdrawn), Prairie Ranger beat Shadow, Count Noble beat London, Dashing Novice beat Foreman, Meteor beat Pride, Gertrude beat May Laverack, Biz beat Clementine D., Rock beat Maida, Bessie (Donner's) beat Dash, Don beat Prairie Punch (withdrawn), Christmas Bill and Jess were taken up not to be put down again, and the judges reserved their decision.

Second series—Sue beat Bessie (Adams'), Frank H. beat Maxine, Count Noble beat Prairie Ranger, Gertrude beat Biz, Rock beat Bessie (Donner's), Don beat Dashing Novice, Meteor was withdrawn.

Third series—Sue beat Count Noble, Gertrude beat Frank II., Don beat Rock.

Fourth series—Sue beat Gertrude, Don (a bye).

Fifth series—Don beat Sue, and won first money.

The judges place the dogs for the remaining prizes as follows: Sue four-fifths, and Dashing Novice one-fifth of second money; Gertrude, Count Noble and Adams' Bessie equal third; Biz and Prairie Ranger equal fourth.

Don was awarded the Pennsylvania Cup for best dog in All Aged Stake, and the prize of \$20 offered for the best pointer.

Count Dad was awarded the Pennsylvania cup in the Derby, and the prize of \$50 offered for the best dog or bitch entered and run by the individual, club or association making the most entries in the Derby.

Gertrude and Rock divided prize, \$50, for best pointer or setter, dog or bitch, in the All Aged Stake, whose handler has not worked a dog in a previous trial.

Col. W. E. Hughes withdrew Meteor after he had won his first heat, for the reason that he was desirous of having some shooting, and feared that the conclusion of the trials would extend beyond the time he could absent himself from home. Having understood that the withdrawal of Meteor had been construed by some of the owners of setters to result from fear to have Meteor meet some of the setters, Mr. E. C. Sterling, for the St. Louis Kennel Club, handed the *American Field* on Saturday night a challenge to be made public at once, to the effect that if a setter should win the All Aged Stake, the St. Louis Kennel Club would run Meteor against

such winning setter, immediately on the conclusion of the trials, for one thousand dollars a side, for three days, from sunrise to sunset each day, resting three hours each day, the handlers to be in a wagon together, each party to select a judge, and the editor of the *American Field* to be referee.

Pacific Coast Coursers.

The coursing season will be formally opened in this State at the end of the coming month. The Pacific Coast Coursing Club, president, Mark Devlin, will be first in the field, their match taking place at Merced on October 25th and 26th. The club leaves San Francisco October 24th.

Charles Fowler, Judge Pennie and T. Bradley have been selected as a committee on arrangements. The stud book of the club shows the following pups whelped within two years and eligible to competition in puppy or sapling stakes, as their ages may determine: Mark Devlin's litter of 62 dogs, 4 bitches, 2 blk, 2 w and bd, 1 bd, 1 brown. Ben Toney—Pride of the Canyon, April 3d, 1881.

P. K. Jacoby, b and w b Cassie Maria; Paul Jones—Laura W. right, July 11th, 1881.

N. Petersen, w d Nick Black Jack, Lady Ross, May 28th, 1881; blk and w d Prince, f and w b, Lady Prince Black Jack—unknown, August 18th, 1881.

H. McGurty, blk d, bd b, b and w b, unknown, October 11th, 1881.

W. Halpin, f and w d, Toney f and w b Lady Place, blk and w b Nora Green; Menlo Boy—Bird Sallie, March 7th, 1881.

C. O. K. Jeffote, b b Last Rose of Summer, Bummer—Restless, July 6th, 1882.

A. A. Fincke, blk and w d Burjo Black Jack—Juno, July 11th, 1881.

Christopher Johnson, be d and 2 be d, Speculation—Lady Amanda, March 22d, 1881.

J. Staffelt, w b Cleopatra, Speculation—Sacramento Belle, May 27th, 1881.

W. Ryan bd d, be b, blk b, bd b, Ben Franklia—Maid of Gwin, July 16th, 1881.

J. Dregan's 6 pups by Ben Toney—Sadie Henry, August 3d, 1882.

Mark Devlin's 7 pups by Foxall—Pride of the Canyon, August 7th, 1882.

S. Griffith's f and w b Dido, Tipperary boy—Dixie's Nellie, July, 1881.

Charles Fowler, b and w d by Captain, imported from Australia—Blue Bell b and w d by Captain—Blue Bell.

As usual the opening of the season brings a good deal of speculation as to probable winners, many of which are doubtless pretty near the mark. Among the most promising of the old dogs is Charles Fowler's blue bitch Delebut, by Speculation—Lady Amanda. She is getting in good condition, and at Merced will be open to match any dog on the grounds for \$50 a side, provided, of course, that no accident happens to her in training. Mark Devlin's Chief of the Canyon, is doing regular work and will be able to give a good account of himself. W. Session's Maid of San Francisco, by Toney—Pride of the Canyon, is also spoken of prominently. Chris Johnson will probably run his black dog, litter brother to Fowler's Delebut.

It is said that Mr. Carroll's f and w d Paul Jones, by Gentleman Jones—Branch, has been transferred to a member of the Pacific Coast Club and will run in their meeting this fall. If he gets in good condition, which is rather a difficult matter for him to do, he will be found a warm competitor for the first honors.

A DASTARDLY ACT.—On the 20th of July the pointer dog Ned Buntline, owned by Mr. J. M. Bowen, of Woodcliff, Rowayton, Conn., was shot in the heart while standing with his head erect and killed, and the charge is made that the shooting was done by a neighbor, Mr. Vincent Colyer, an artist. Mr. Bowen holds as sacred the property right in dogs, especially as a law is on the books in the State of Connecticut, requiring all owners to register, and charging a fee of \$1.50 for registration. He has employed counsel, and brought in the Superior Court, sitting at Stamford, a suit against Mr. Colyer, laying his damages at \$1,000, and the case will be called for trial the latter part of September. If it is proven that Mr. Colyer shot Ned Buntline without cause, it is to be hoped that he will be made to pay the full value of the dog. The pointer or setter, however, which is worth, outside of sentiment, \$1,000, is not often met with. Mr. Bowen may have owned such a dog, but we apprehend that the jury will scale the damage down a little. Dog owners everywhere are interested in this case, and they should give Mr. Bowen their moral support.—*Turf, Field and Farm.*

RETRIEVER. The opening of the duck season has caused quite a demand for good hardy retrievers. The Irish water spaniel is generally preferred here, but it is hard to find a better and more serviceable dog than the curly or wavy-coated English retriever, a breed of dogs very scarce in this State. As several inquiries have been made for both these classes of dogs the kennel editor would be pleased to hear from persons having any such for disposal.

GERMAN FIELD TRIALS.—The field trials to be held in Germany this month promise to be a successful meeting. The trials will take place on the shooting grounds of Prince Albert Solms and the Darmstadt shooting club. No dogs will be allowed to compete whose pedigree cannot be proved either by the English kennel club stud book, or the German stud book.

Racing at Sheepshead Bay.

On September 14th the meeting was continued with the fullest success, and in the mile dash the California stable was represented but Grismer in the mile dash would not rival Lucky B and the Duchess of Norfolk in their victories, as he could only secure second honors.

In the first race, three-quarters of a mile, Little Phil was first, Gus Matthews second, Little Fred third. Time—1:56. In the second race, one mile, President Jennings was first, Pinafore second, Jennie third. Time—2:00. In the one mile dash Little Minch won, Grismer second, King Fan third. Time 1:45. In the mile and three furlongs Minroe won easily, Pollo second, Bancroft third. Time—2:24. In the mile and furlong Follow won, Sweethome second, Saunterer third. Time—1:57. In the one mile, all ages, Girofle won, Barrett second, Bootjack third. Time—1:41. In the steeplechase, inside course, Revenge won, Felix second, Kitty Clark third. Frank Stout fell at the well jump and Falconbridge walked home. Time—4:57.

The *World*, speaking of the above race between Barrett, Bootjack and Girofle, at Coney Island says: "Ever since it was announced, feeling has run high as to which would win, Barrett or Girofle. Betting was very heavy, the admirers of Barrett and Girofle literally throwing money into the boxes. The supporters of Barrett were specially confi-

dent but the climax was reached when Walton, the plunger, bet a well-known Anglo-American firm \$10,000 against \$14,000 that Girofle would beat Barrett, and in a few minutes afterwards bet the same firm \$10,000 even the same way, making a bet of \$20,000 to \$24,000. This, if not absolutely the largest transaction seen on the race track for some years, is certainly very nearly the largest. The race was easily won by Girofle in 1:41.

On September 19th it appeared as if the Californians were to have another day's success as Gano was in the first race, and the Duchess of Norfolk in the third, at her favorite distance, a mile and a half, but unfortunately she was disqualified on account of a foul and the race was given to Herbert, the second horse. The first race was three-fourths of a mile. —Gano first, Lizzie Mcsecond, Felicia third. Time—1:16. One mile—Breeze first, Little Fred second, Hickory Jim third. Time—1:42. Baby fell. One mile and a half—Duchess of Norfolk first, Herbert second, Frank B. third. Time 2:39. Duchess was disqualified, owing to a foul, and Herbert was given the race, Blenheim Mud third. Two miles—Fair Count won easily, Bushwhacker second, Eole third. Time—3:32. Seven furlongs—Bruno first, Bancroft second, Buccaneer third. Time—1:59. The winner was bought by Torrence for \$1350. Steeple chase, inside course—Bernardine first; Lilly Morson second, Frank Short third. Time—4:34. Belle of the North fell.

How Well-known Philadelphians Take Care of their Stock.

[Philadelphia Correspondence.]

There are in the city of Philadelphia quite a number of very large stabling establishments, where horses are not only kept for ordinary hire, but where blooded fast runners owned by private gentlemen are boarded, and where they receive medical treatment when necessary. Some of these horse-boarding establishments are really large and beautiful buildings in external appearance, while the internal arrangements are simply perfection in every respect. Few first-class hotels provide for their guests better accommodations in every respect than these prominent stable proprietors provide for the horses committed to their care. The greater number of these first-rate stables are situated in the northern portion of the city, but there are some excellent ones in the southern section, or that part known as the "old District of Southwark." The writer happened to be "down town" recently, and looked in at two or three of these stables, and the first one visited was the large establishment of William S. Campbell & Son, Nos. 623, 625, 627 and 629 Wharton street. On entering the well-appointed office I was met by Mr. Campbell's son, who really runs the stable, his father having partially retired from active work, and, being seate, we had a pleasant "horse-talk." I learned from Mr. Campbell that he boards about forty horses, consisting of some of the best private stock down town. Mr. Campbell remarked: "We get \$25 per head for boarding horses, and as that is the highest price paid, it follows we only have good stock. Many of our horses are well-known on the track, and among them are Fanny Price, a fine mare; L. Lane's team, who have a record of 2:40 together, and some fine trotters, owned by such citizens as Common Councilman W. J. Gallagher; Edward Cobb, Assistant Commissioner of Highways; John C. McMenamin, City Commissioner; Wm. Wilcox, John H. Young, and others, including the Farrell Brothers."

The conversation then turned on the care and treatment of horses, and I asked Mr. Campbell if he had ever used St. Jacobs Oil for any of the horses under his charge when they required rubbing.

Mr. Campbell said: "Yes, we have used St. Jacobs Oil, and I think it is a capital thing for horses; I intend to keep on using it on every horse that requires a liniment."

I said: "Tell me on what horses you have used St. Jacobs Oil, and how the remedy operated."

Mr. Campbell then said: "My father owns a bay colt named Billy, a very fine animal, that we think a great deal of. We value Billy at \$1,000, and are very careful of him. He is about five years old, and is well known in these parts. A short time since I noticed something was the matter with Billy; the muscles of one of his legs appeared to be contracted, and he was somewhat strained by fast traveling. I happened to have some St. Jacobs Oil on hand, that the family had been using for rheumatism, and I rubbed Billy well with it several times, and he recovered entirely in a very short time. I am satisfied St. Jacobs Oil cured him quicker than any other remedy would have done. We also own a fine gray horse named Hopeful, who had what we call sweeney, or a drying-up of the shoulder. We tried St. Jacobs Oil in his case, and it was really remarkable how soon the liniment cured his complaint. To show you that the Oil did its work well, my father sold Hopeful recently for a good price, and before he was sold he underwent a careful examination, and it was found he was perfectly sound. If St. Jacobs Oil had not been used for his shoulder I don't believe we could have sold the horse so easily or for such a good price."

BELMONT-MAMBRINO CHIEF-BLACK-BIRD. For Sale.

DAY YEARLING COLT, BY PILOT, GRANDSON OF WILLIAMSON'S Belmont, his dam by Mambrino Chief, from Susan, by American Eclipse granddam Oriole, by Simpson's Blackbird. Is now in Oakland at the stable of

JOS. CAIRN SIMPSON.

Fine Thoroughbreds for Sale.

BY DIRECTION of Mr. W. L. PRITCHARD
We will offer for sale at public auction at 12 m. at the grounds of the
BAY DISTRICT ASSOCIATION,
SAN FRANCISCO,

On Thursday, November 16th,
A choice lot of thoroughbred horses, comprising
BROOD MARES, FOUR-YEAR-OLDS, THREE-YEAR-OLDS, TWO-YEAR-OLDS & YEARLINGS.

These animals are of the choicest blood and afford a rare opportunity of purchasing first-class stock. For other information or catalogues apply to **W. L. PRITCHARD,** Sacramento, or

KILLIP & CO., Auctioneers,
SAN FRANCISCO.

J. A. McKERRON,

PATHOLOGICAL HORSE-SHOER
105 Commercial Street.
Practical in all its various branches.

Third Annual Fair.

AGRICULTURAL ASSOCIATION.
SIXTH DISTRICT.

AT THE CITY OF LOS ANGELES,
October 16th, 17th, 18th, 19th, 20th
and 21st.

SPEED PROGRAMME.

FIRST DAY—MONDAY, OCT. 16, 1882.

SECOND DAY—TUESDAY, OCT. 17, 1882.

No. 1. District, trotting, 3 minute class; purse, \$300.
No. 2. District, trotting, 2:38 class; purse, \$400.
No. 3. District, running, colt race, free for all 2-year-olds, half mile dash; purse, \$200.

THIRD DAY—WEDNESDAY, OCT. 18.

No. 4. Trotting, free for all that never beat 2:30; purse \$500.

SAME DAY.

No. 5. District, running, free for all, half mile and repeat; purse, \$215.

SAME DAY.

No. 6. Running, free for all, mile and repeat; purse, \$200.

FOURTH DAY—THURSDAY, OCT. 19.

Grand Stock Parade.

A liberal purse will be offered for a long distance Ladies' riding match. Arrangements are being perfected.

No. 7. District, trotting, 3-year-olds and under; purse \$350.

FIFTH DAY—FRIDAY, OCT. 20.

No. 8. District, trotting, 2:45 class; purse, \$400.
No. 9. District, running, 2-year-olds, three-quarter mile dash; purse, \$250.

SIXTH DAY—SATURDAY, OCT. 21.

No. 10. Trotting, free for all; purse, \$500.

SAME DAY.

No. 11. District, running, free for all, three-quarters of a mile dash; purse \$250.

SAME DAY.

No. 12. Running, free for all, 2 mile dash; purse, \$350

REMARKS AND CONDITIONS.

All trotting races are the three best in five, unless otherwise specified, three to enter and two to start. Entrance fee, 10 per cent. on purse, to accompany nomination. Purses divided at the rate of 60 per cent. to first horse, 30 per cent. to second, and 10 per cent. to third.

All running purses to be divided, two-thirds to the first horse and one-third to the second horse; four to enter and two to start, except race No. 11, three to enter and two to start.

National Association Rules to govern trotting; but the Board reserves the right to trot heats of any two classes alternately. If necessary to finish any day's racing, or to trot a special race between heats.

To fill running races, four or more subscribers are necessary.

All the two-year-olds, when running in their classes, shall carry 100 pounds, with the usual allowance for mare and geldings.

All three-year-olds, when running in their classes, to carry 110 pounds, with the usual allowance as above. No added money for a walk-over.

Horses entered in purses can only be drawn by consent of the judges.

Rules of the Pacific Coast Blood Horse Association (old weights) to govern running races, except when conditions named are otherwise.

All entries made in writing, giving name, sex, color and marks of horses; also, name of residence of owner. In running races, full colors to be worn by rider; and drivers of trotters are respectfully requested to wear caps of distinct colors, to be named in their entries, as their horses will be designated upon programmes by the colors worn by drivers.

Entries to all the above races to close with the Secretary on Saturday, Sept. 30, 1882.

Write "Entrance to Races" on outside of envelope. Note—"Exile" is barred from trotting races 1, 2 and 3.

P. A. BARETTO, President.
R. H. HEWITT, Secretary.

HORSE HISTORY.

Albert W.

It is only a few years since George Wilkes trotted in 2:22, and that performance placed him first on the list of trotting stallions. At that time Ericsson had the pride of place among four-year-olds with 2:30 to his credit. Both of these were regarded as wonderful performances, and deservedly so, and now we have the pleasure of recording the same time as that of Wilkes for a California-bred four-year-old, and to emphasize the feat the 2:22 was made in a third heat, repeated in a fourth, and the fifth only a half a second slower. This would have been a creditable performance for a stallion of any age; when made by one of the age of Albert W, it takes rank with the very best and entitles him to a prominent place among the "notables" of any country.

On the same day (Saturday last) there was a race for four-year-olds at Chicago, and the telegraph brings the intelligence that Jay Eye See won the first, third and fourth heats in 2:22½, 2:19, 2:19. There is an erroneous statement in the telegram that the winner is a stallion, as unfortunately the great colt is a eunuch. The great advantage which follows emasculation on the trotting tracks is too well known to require argument, and as is shown by the records there is only one instance where an entire horse leads, that being the five-year-old record of Santa Claus (2:18). Smuggler is five seconds behind Maud S, four in the rear of St. Julien; Rarus, Trinket, Goldsmith Maid, Clingstone and Hopeful also having better records. From this it is not out of the way to estimate that the three seconds which Jay Eye See leads Albert W does not give the gelding the preference. We do not wish to detract an iota from the well-earned fame of the son of Dictator, nor have we the least desire to give Albert W greater prominence than he deserves. The gelding is entitled to the credit of trotting the best race which has ever been made by colts of any age, and the stallion by far the best of male performers before the "mouth was full."

To breeders the most prominent features are the lines of blood which have led to such an astonishing result, and both of them give the same answer, viz: A combination of the Hambletonian with fresh infusion of thoroughbred blood. Jay Eye See is by Dictator, his dam (the dam of Dexter) by Seeley's American Star. The dam of Jay Eye See, Midnight, is by Pilot Jr., her dam, Twilight, by Lexington and thoroughbred. Midnight is also the dam of Noontide, a mare with a record of 2:20½, and as she is by Herald is nearly a sister in blood to Jay Eye See. American Star was a highly bred horse, so that the racing blood predominates in the victor at Chicago.

The dam of Albert W is a sister to Aurora, by John Nelson, and John Nelson was by imported Trustee, from the Redmond mare, by Adallah. This pedigree has been questioned but only by those who have such a violent antipathy to the thoroughbred that it warps their judgment and forbids a candid weighing of testimony. They are ready to believe the most absurd stories when these fall in with their notions, impugn the evidence of reliable men when it runs counter to their views, and profess rather to believe the maunderings of some one overcome with the senility of over fourscore years, than proof which was accepted as correct at a contemporaneous period. We have before us an advertisement of John Nelson, published in 1860, soon after the horse was brought here, and the following is a transcript:

The fine trotting stallion John Nelson will stand at Robert Beatty's "White House" during the season beginning March 1. He is a rich, bright chestnut, with a star on the forehead, and two white hind feet and is fifteen hands high. Terms for the season, \$75.

John Nelson is by imported Trustee out of the Redmond mare (who trotted in 3:35), by Abdallah, he by Mambrino and he by imported Messenger. John Nelson is half brother to the celebrated trotting gelding, Trustee, who trotted twenty miles in the unprecedented time of 59:35½, and he bears the same relationship to Fashion, Revenue and Reube Rynders, all

splendid four-mile racers. His half brother, Revenue, now stands at Versailles, Ky., for \$150 the season.

Mares left at the stables of Messrs. Porter & Flenner will receive prompt attention. Parties living at a distance, requiring the services of the horse, will please address them, or
J. M. DANIELS,
134 Kearney Street, San Francisco.

Now this advertisement was published in the *California Spirit of the Times*, that exchanged with the papers of the time, and any man who had one-half of the experience of Mr. Daniels would know that a false pedigree would soon be detected. Like many others it was never questioned until it was supposed that years enough had elapsed to bring it in doubt. At all events the get of John Nelson show unmistakable signs of "blood," and many of them display the Abdallah characteristics. The double Abdallah cross is shown in many of the crack performers, and even when derived in double quantity through two strains of Rysdyk's Hambletonian. Goldsmith Maid is a notable example of the first, Clingstone of the second, and illustrations could be multiplied until tiresome of the "potency" of the dual progenitors.

John Nelson the last we heard of him was still alive, and the last time we saw him he was active as a colt, and showed scarcely any of the effects of the many years he has lived. As the sire of Nerea, Aurora, Governor Stanford and others he has gained a place among the "standard" sires, though from present indications the second generation will show still more speed, and Nelson mares be highly valued in the stud.

Of Electioneer, the sire of Albert W, there is little necessity of adding to what has already been published in this paper. He is, without doubt, the most remarkable trotting sire that has ever appeared. He was scarcely known outside of Stonyford when Governor Stanford purchased him and, in the short time since his home has been in California, his colts stand first on the list in the yearlings, the three fastest two-year-olds, and the fastest four-year-old stallion. The figures stand 2:36½ for Hinda Rose, yearling; 2:21 for Wildflower, 2:24½ for Bonita and 2:25½ for Fred Crocker, two-year-olds; 2:22, 2:22½, 2:24 for third, fourth and fifth heats of Albert W, the last won in a jog, and from all appearances the winner could have made it as fast as either of the others. But the public performances of the get of Electioneer, brilliant as they are, do not show the entirety of his merit as the progenitor of fast trotters. We have yet to see an Electioneer which does not give promise of making a fast trotter. Speed is not their only inheritance. Take them together and they are of the highest form found in the get of a trotting-bred horse, and very many of them show a degree of quality akin to the thoroughbred. Sound-headed, docile, with great power which will enable them to haul heavy weight and give them the front rank as road horses, stylish, symmetrical, handsome color, it would be difficult to name a valuable quality, essential for the road and track, that they do not possess. With all the "prepotency" which characterizes this son of Rysdyk's Hambletonian and Green Mountain Maid it has been his good fortune in California to be mated with the right sort of mares. This gives the stock a value greater than could be derived from one parent, and assures the continuation of these valuable qualities. There is not a state in the Union that is better supplied with the material for fast trotters than California, and, in fact, with so great a variety of strains. We have the best of the Eastern blood with the addition of Belmont and St. Clair, and are fortunate, too, in the conjunction of Trustee and Abdallah in John Nelson. Albert W is about 15½, he may be a trifle over that height, and is a shapely colt all over. He is a bright bay with black points, his coat very fine. He is one of the long order in the formation, and like a majority of the Electioneers somewhat higher over the croup than the withers; he has a splendid set of limbs, and his action is very fine. That he is an improving colt is shown by his races of last year and this. Every race he takes part in shows an improvement on those

which came before, and though his three-year-old record of 2:32½ was not the measure of his speed when he trotted with Sweetheart at San Jose last Fall, it would be an exacting owner who was not satisfied with the ten and a half seconds of improvement from that figure in a little less than twelve months. In order to show in this place how good a colt he was last Saturday, the description of the race by "our special commissioner" is transferred from its place to finish this sketch. We were in hopes to accompany this sketch with a picture of the "crack four-year-old," but will have to defer the portraiture to another time:

The race closed with nine entries, but with some disqualified and some drawn the starters were reduced to three, Sweetness, Nellie R and Albert W. Sweetness was a great favorite in betting circles partly from the manner in which she had won her race at Sacramento and partly from the prestige that attaches to Goldsmith and Mr. Salisbury's stable in these later meetings of the circuit. Pools sold before the start ran: Sweetness \$50, Nellie R \$18, Albert W \$12. In the lottery for positions Albert W drew the first prize with Sweetness second and Nellie R outside. Scoring for the word in the first heat was somewhat tedious through the rank behavior of Albert W, who acted as if there was lax discipline in the school where he studied. When the bell did tap they were all in good shape but the colt broke at the sound and commenced the service with a sharp run. Sweetness took the lead at once with Nellie R on her wheel and thus they went to the quarter in 36. At that point Nellie R broke up and Albert W took the second place, Sweetness in the meantime opening a gap of three lengths. Before the half was reached Albert W again left his feet and Nellie R sped around the turn after the leader, leaving the colt eight lengths in the rear. Nellie closed the gap rapidly and at the three-quarter pole was at Sweetness' wheel, Albert having also shortened the interval a couple of lengths. In the trot up the stretch, Nellie pushed Sweetness to a break and came to the wire first in a jog, Sweetness second, Albert W third. Time 2:22½. It appeared from this trial that Sweetness was not herself and the speculators who had backed her heavily in the pools made haste to secure themselves by putting in large sums on the big chestnut, an operation that proved to be a repetition of the old story of out of the frying-pan into the fire. The first pool sold was Nellie R \$150, Sweetness \$70, Albert W \$27, and the last one before the start was Nellie R \$40, Sweetness \$16, Albert W \$14.

Second heat. There was less difficulty in starting for this mile, Sweetness getting away first, but Nellie R showing such a measure of speed that she was taken back and brought to the work gradually. Albert had overcome his disposition to break and was trotting squarely close in the trail. At the quarter in 35½ Sweetness showed in front but at the half in 1:10 Nellie R was neck and neck with her, Albert five lengths behind. Around the turn was without change and in the home work Goldsmith with whip and voice urged his mare to her utmost but Nellie was in her happiest mood and she came under the wire without hard driving, winner by half a length, Albert W third. Time 2:20. The rush to "get out" was greater than ever. The first pool sold was Nellie R \$200, Sweetness \$27, Albert \$25, but as the selling progressed the excited speculators cooled somewhat and the last pool was Nellie R \$110, Albert W \$30, Sweetness \$10.

Third heat. They got away together and at the quarter in 36 Nellie R was in front and Albert W behind but all lapped. In the backstretch the colt skipped and found himself the last member in the line by a length, Nellie R drawing away slightly from Sweetness. They reached the half in 1:10½. Around the turn they came in a string, but at the three-quarter mark Sweetness broke up and the colt began his chase after Nellie R. Sperry heard the long, steady stroke behind him and knew what was in the wind. He struck his

mare two or three sharp blows with his whip but she was done. Her speed and heart had both left her and Albert W swept past at a pace he had not before shown in the race, passing the stand winner by three open lengths, Nellie R second, Sweetness third. Time 2:22.

There was another revolution in betting. Nothing could be plainer to the habitue of the tracks than that the col had the race cornered. In the pools it was three to one on Albert W against the field.

Fourth heat. Albert W. showed the way to the quarter in 36½ but in the straight work broke up and at the half in 1:11 there was a bunch with Sweetness first and Albert last. Around the turn he worked into second place and up the stretch beat Sweetness handily by three lengths, Nellie R third. Time 2:22½.

Fifth heat. Albert W. went off first with Sweetness close up, Nellie R breaking badly at the first turn. At the quarter in 36½ and the half in 1:10½ the colt was leading with Sweetness on his wheel Nellie R ten lengths behind. From there home the colt came at a steady clip, being practically alone in the race. He won the heat by six lengths, Sweetness second Nellie R third. Time 2:24.

SUMMARY.

Saturday, September 23--Pacific Coast trotting; 2:22 class: purse \$1,000, and \$200 added if more than ten entries. Four moneys.

Fall meeting of the Pacific Coast Blood Horse Association, November 11th, 15th, 18th and 21st.

FAIRS AT THE EAST.

Texas State Fair, at Austin, October 17th to the 21st inclusive.

Billy McCracken and His Sire.

EDITOR BREEDER AND SPORTSMAN. Dear Sir: In a recent issue of the BREEDER AND SPORTSMAN you solicited information regarding the stallion Billy McCracken, and I give you the following statement of facts regarding his history and that of his sire, McCracken's Black Hawk, or Morgan Black Hawk as he was sometimes called. For the truth of the statement I refer to O. C. McCracken, Esq., of San Francisco, from whom the same was obtained about two months since. Billy McCracken was bred by a Mr. Letts, then of Medina, New York, and was sired by McCracken's Black Hawk, his dam being the "Letts mare," then owned by Mr. Letts and said to be of Messenger blood. He was foaled in 1850 and was sold at ten months old for \$90 to Mr. H. M. Beers of Medina, for Mr. O. C. McCracken. Mr. McCracken procured him kept at Medina for two years, when in 1853 he took him to Chicago where he then lived. Mr. McCracken removed to Oskosh, Wisconsin, the next year and took Billy with him, where he was kept till he was brought to Marysville, California, in 1861. He was used in the stud at Oskosh while there, and afterwards at Marysville until he died. After making the season of 1861, he was sold to Mr. D. E. Knight of Marysville, in whose ownership he there after continued. He was handled for speed a few months by Otis Dimick, then of Milwaukee, Wisconsin, and in 1855 or 1856 trotted and won a race at an agricultural fair at that place against eight stallions; best time 2:49, the track being about ten seconds slow. The stock which he left in Wisconsin is said to have been held in much favor, so much so that there was an effort made by some of the leading horsemen of Winnebago county to get him back there. Mr. John De Mass of Detroit, Michigan, is said to have handled one of his get which showed 2:23 in his work and another is said to have shown a mile in 2:25 at Milwaukee, under the saddle, with Mr. O. A. Hickok holding the reins. Mr. McCracken was unable to give the names of either of these horses, but stated that Judge J. McM. Shafter probably could give the name of the one handled by De Mass, as De Mass at one time communicated with him about the horse. Your correspondent, Frank Grant, would do many of your readers a kindness by giving the time, place and circumstances under which Billy trotted five miles in 14m. and 10s.

McCracken's Blackhawk, the sire of Billy, was purchased in 1848 in Vermont, by Hon. Silas Ennroughs, then of Medina, New York, and was soon after (being then two years old) sold to Andrew Eliott of that place. Mr. Eliott came to California soon after and died here, and the horse in 1850 was sold to J. G. McCracken, then of Medina. Mr. McCracken placed him in the stud at Lockport, New York, for one season, and one or two seasons afterwards he stood at or near Buffalo in charge of Mr. Samuel Twitcheil. Mr. J. G. McCracken meantime moved to Kenosha, Wisconsin, and took the horse there about the year 1853, where he did service in the stud until 1860, when he was brought to California by McCracken. He remained the property of Mr. McCracken until his death. He made the most of his seasons at Stockton, in charge of Dr. C. Grattan (at whose ranch he died), occasionally standing for a time at the ranch of his owner at Georgetown, about fourteen miles from Sacramento. He died about 1871. Of the get of this horse little need be said for the information of your readers in this State. They are quite as well known here as the get of any horse ever brought to the State. No horse in the State has produced a better class of livery and road horses considering his opportunities in the stud. It is questionable if he ever was coupled with a mare in this State which could trot a mile in three minutes and yet he is standard by reason of his get.

The San Jose Fair.

Of all the cities that form the racing circuit of the Pacific Coast, the inhabitants of San Jose claim the foremost position both in regard to its site and its facilities for carrying out a well organized fair that will be a credit to the two lovely and flourishing counties, San Mateo and Santa Clara, of which the district is composed. The city is admirably laid out, the streets being broad and kept in almost perfect order, while its shady avenues forming pleasant drives into the country are perhaps unrivaled throughout the land. The city shows evident signs of prosperity and its commercial marts are not confined to one or two streets, but radiate in many directions from the frail but lofty electric tower which may be considered the center of the town. The grounds of the Association are situated about a mile from this point on a bend of the Santa Clara avenue, and with the improvements already made, combined with those whose execution is projected, they will soon stand unrivaled within the State especially in the way of trees of which there are excellent specimens on every side with foliage that denotes a sturdy and luxuriant growth. San Jose, although situated within a district noted for its ranches rich with horses and cattle of the highest breeding, labors under one serious disadvantage in the arrangements of the fair, and especially so as regards the speed programme, as the entries close generally at the same time as the other meetings of the circuit and as it is the last one of the series, the fields are apt to be diminished in the different classes, owing to the enforced withdrawal of those horses who have succumbed to the trials of the campaign, or others that are not deemed sufficiently speedy to contest with the best of the class. The result of this almost unavoidable dilemma was seen in the races of the first day, when fields representing eleven and eight nominations respectively were reduced to three and four who trotted for the purses. This is acknowledged by the Directors of the association to be a grave matter of discussion in the future, as when there is an absence of excitement and of speculation, the races are not apt to draw such a large attendance as would otherwise be the case. It is true, as some of these gentlemen argue, that the past season has been very exceptional in its character, as the horses have more or less suffered from the prevailing epizooty, and that the number of race horses has been seriously diminished by the small but valuable draft that was sent to the East. Nevertheless there are others among those who have the interests of the Association at heart, who maintain that it would be better in the future to bar the winners of the 2:40, 2:35, 2:30 and 2:25 class at San Jose, and instead to offer two special purses to close at the expiration of the State and of the Stockton Fair. This, in connection with a project to penalize the thoroughbred winners at the previous fairs, is a matter of debate that will be closely scrutinized during the winter months when more editorial space can be devoted to such an important change of base.

As regards the weather, the fair opened under the most advantageous circumstances, the sun shining brightly but tempered by cool zephyrs that scarcely moved the foliage, but that were very refreshing on the track. The grounds show signs of evident improvement. A judges' stand has also been built on the inside of the track, but the quarters for the timers and reporters beneath are far too restricted for a track of such pretensions. The track has been carefully prepared and perhaps was somewhat more favorable for fast time among the runners than the trotters, and all the arrangements had evidently received the careful supervision of the Secretary and of the Superintendent.

The pretty city put on its gala appearance on the opening day, and although the attendance at the races appeared to show a falling off, there was really an increase of \$150 in the receipts of the same day over the previous year, which was accounted to be a good omen for the success of the meeting.

The Races.

As originally formed the programme of the first day was perhaps the strongest of the meeting, the two races being for the 2:40 class, in which there were eleven entries, and for the 2:25 class, in which there were eight nominations. In these two classes there was a fine field of horses, and the races taking place at the commencement of the circuit there would have been much excitement and heavy investments anent the result, but the experience gained in Oakland, Stockton, and at the State Fair was such as to greatly restrict operations and it was only on the respective merits of Vanderlynn and Manon that there appeared to exist a difference of opinion and even in that case the betting was not of a very exciting order.

Of the eleven entered in the \$500 purse for the 2:40 class there were but four who finished up the circuit and probably two of these started merely with the idea of securing some of the minor money. Vanderlynn and Manon sold about even at \$35 against \$5 for the two others together, namely Frank Moscow and Big Lize. There was a great deal of useless scoring that delayed the opening of proceedings and a little more decision on the part of the judge who presided at the gong would have been pleasing to the drivers as they were often past the wire before they knew whether it was a send-off or not. Finally they got away with Manon on the outside with decidedly the worst of the start while Moscow took advantage of his position at the pole to take a good lead, but when they had well rounded the first turn Manon was rapidly recovering her position, as both she and Vanderlynn passed him in succession and they made a good trot home, the mare holding tenaciously her advantage to the finish by more than a length, Moscow being a fair third, with Big Lize fourth, and the time, 2:25½. After this even there was but a slight advance made on Manon's chances as Vanderlynn brought \$40 to her \$50 and the field \$3, that being offered more on the faith of Big Lize's appearance than on Moscow's efforts. This time Manon made the pace lively to the quarter with Vanderlynn in close attendance and Big Lize on a big jump, but when she was gotten to her feet she trotted at such a gait as made the fielders think they had found a bonanza, passing both the horses but failing to reach Manon who won by two lengths in 2:26. This settled the betting for the next heat, that also finished the race, for although Manon and Vanderlynn trotted fast and evenly all the way round and they were well lapped, at the wire it appeared as if the mare had always something in hand, and this rewarded the faith of her backers. The time was 2:25 and Big Lize was distanced through the effect of a disastrous break.

SUMMARY.

SAN JOSE, September 25. Trotting purse of \$500 for the 2:30 class.
C. Van Buren names P. Coult's b m Manon, by Nutwood, dam Ad-de.....1 1 1
P. Farrell names b h Vanderlynn, by George M. Patchen, dam by Joseph.....2 3 2
P. B. Cooper names s g Frank Moscow, by Frank Moscow, dam unknown.....3 4 3
W. A. Henderson names b c Big Lize.....4 2 dist
Louis D. Allan Roy, San Mateo Belle, Maria, Freestone, Edwin Forrest and Rowdy Boy were entered but did not start.
Time--2:25½, 2:26, 2:25.

The second race was of a very one-sided description as regards speculation, although many fair judges were of the

opinion that a better showing might have been made both in regard to speed and to well contested heats. Of the eight entries only three came on the track and Director was installed first favorite at \$50 to \$10 for Cairo and Starr King combined. From the commencement to the finish there was not a ripple of excitement raised in regard to the issue, save perhaps among a few adepts who wagered on the point of second money between Cairo and Starr King. Cairo, aided by his position at the pole and seconded by a slight break on the part of Director at the first turn, assumed the lead, but at mid back stretch he was passed very leisurely by Director, who responding to his name, had it all his own way, winning the heat easily in 2:28½, with Cairo second and Starr King last, an announcement that was received with a few shouts of derision. In the next it was the turn of Starr King to effect a slight diversion on the part of the fielders, and he led Director at the quarter and was at his wheel as they turned into the third turn, but here he had seemingly enough, as Director came away with comparative ease and beat him out in 2:26. This was certainly a notch lower in the way of time, and a few trifling bets were made that the three horses that are about the best representatives of the 2:25 class would not beat the 2:25 record made previously in the 2:40 class. But it so happened that the third heat was the best of the three, for although Director's chances were never in danger, Cairo trotted him to a fairly close finish, the time being 2:24½.

SUMMARY.

Same day--Trotting Purses of \$750 for 2:25 class.
J. A. Goldsmith names b s Director, by Dictator, dam by Mambrino Chief.....1 1 1
John Hughes names b g Cairo, by Chief, dam unknown.....2 3 2
C. W. Welby names ch g Starr King, by George M. Patchen Jr., from Mary Wonder.....3 2 3
Crown Point, Echora, Captain Smith, Del Sur and Ashley were also entered but did not start.
Time--2:28½, 2:26, 2:24½.

On the second day there was a decided improvement in the attendance, and there were many ladies and children present, either in the grand stand or in private vehicles adjoining the inclosure in the quarter stretch. The outlook was not very favorable for a good day's racing as there were but three running events on the card, and of these the first was a walk-over, although two prominent stables, Mr. Counts' and the Palo Alto ranch, were represented among the nominations.

SUMMARY.

SAN JOSE, September 26--Running race, for two year olds, a dash of three-quarters of a mile, \$50 entrance, \$15 forfeit; \$150 added, second to receive his entrance and one-third of the added money.
George Howson names b f Augusta E. by Monday, dam by Norfolk w o Satanelia, Bryant W, Panama and Flon Flou paid forfeit.

In the other races the principal horses were but fairly represented and the reason, as stated by a prominent trainer, was that the purses at San Jose are too small considering the expense of training and transportation, and that the Reno fair offers much more attractive premiums. For the Initiatory Stake for two-year-olds, a dash of three-quarters of a mile, George Howson walked over for the four forfeits, amounting in all to \$60, the association reserving the \$125 added money, and thus the entire amount offered for the day was only \$325, and it was argued that a little more liberality on the part of the association would insure much larger returns.

The second race was a mile dash for all ages, in which May D had been in great demand on the previous evening, but rumors were prevalent that she was not in thorough condition and Nighthawk sold favorite in the pools at \$40 just before the start, with \$25 for May D and \$6 for the field, in which were Jim Douglas and Bob, the latter a fast but very unreliable nag. Nighthawk appears to have been spoilt in her training as she is very vicious now every time she starts, and naturally so, when every slight bond she makes she gets heavy strokes across the face, a method not conducive to improve her temper. The start was delayed half an hour through the bucking and rearing of Bob and Nighthawk in the vain attempt to get them near the other horses, but at last Mr. Finigan got them on pretty even terms, save that Nighthawk on the extreme outside was a short length behind and her jockey instead of accepting the position and urging her to keep her place deliberately drew to the rails with the idea probably of riding a waiting race. If so, it was a mistaken policy as her chances were gone, Bob taking up the running at his wild pace to the half mile post when May D moved up and was shortly afterwards joined by Nighthawk and Jim Douglas, and in this order they galloped to the distance when Nighthawk was beaten and Douglas challenging May D passed her without an effort and won easily in 1:43½. Some complaints were made by the backers of Nighthawk about the start, but the opinion of the best judges, except those who were influenced in her favor, was that Douglas won with five pounds to spare. These complaints being reported to Mr. Finigan he instantly gave in his resignation as starter and W. Donathan took the position. It seems to be a pity that the English rules that prohibit any unfavorable remarks being made to the starter are not respected here, for no gentleman likes to lay himself open to bitter reproaches that he knows full well that he has never deserved and consequently it will be found extremely difficult to get a gentleman who is fully qualified to accept such an ungrateful office.

SUMMARY.

Same day--Running for all ages, mile dash; \$50 entrance, \$15 forfeit, with \$125 added; second horse to receive his entrance and one-third of added money.
George Howson names b h Jim Douglas, by Wildidle, dam by Norfolk, four years, 108 pounds.....1
H. C. Judson names ch m May D, by Wildidle dam Nettie Brown, by Riffeman, four years, 105 pounds.....2
P. J. Shafter names b m Nighthawk, by imported Haddington, dam by Norfolk, five years, 111 pounds.....3
Win. Boole names b g Bob, by Bob Wooding, dam by Norfolk, three years, 92 pounds.....0
Fred Collier, Joe Howell, Joe Daniels Jr., Forest King and Bed Boy were entered but did not start.
Time 1:43½.

The next race was a mile and repeat selling race in which Haddington and Belshaw were about equally favored in the betting while Bender sold at an extreme outside price. Haddington had slightly the best of the send-off, but within a few yards Belshaw was up with him and at the half mile he had half a length the best, with Bender gradually taking the second place, and in that position the heat was galloped in the slow time of 1:47½. And now the quid-nuncs were on the quiver to know what it all meant, and at first Belshaw sold even at \$50 against the two others, but when it became rumored about that Haddington had laid up the heat and was sure to win, there was such a rush to get on that \$40 was bid eagerly against \$25 on Belshaw's chances. But it was a false alarm and even if Haddington had been reserved for the second heat, he was but of slight account as Belshaw raced him on even terms to the half mile and then gradually drew away, winning in a handy manner by two lengths in 1:43, with Bender distanced. The winner was entered to be sold at \$400 and even at that price after such a fine display of

speed there was no bid for Belshaw beyond that amount. At the East he would be worth perhaps double the money.

SUMMARY.

Same day—Running, selling race, purse \$200, mile and repeat, second horse, \$175, entrance 5 per cent. to third horse. Horses entered to be sold for \$1,000 to carry entitled weight. Two pounds off for each \$100 under fixed valuation. Winner can be claimed by any one. H. C. Judson names b g Belshaw, 4 years, by Wildidle, dam by Hercules, \$400, 93 pounds. 1 1
P. J. Shafter names b h Haddington, by imp. Haddington, dam by Norfolk, \$800, 110 pounds. 3 2
S. Peyton names b g Geo. Bender, aged, dam Sugar Plum, sire unknown, \$500, 116 pounds. 1 dist
Euchre and Joe Howell were entered but did not start and Jack Douglas' entry was void on account of the death of the nominator. Time—1:47½, 1:43.

Wednesday is generally looked upon as the gala day of the Fair and certainly on this occasion there were enough attractions offered to please the most fastidious taste. In the first place the exhibition of stock was then complete, and although lacking in numbers and varieties of stock was generally considered as showing fair progress on that of previous years. In the next place there was a pigeon match organized under the management of the San Jose Sportsmen's Club, an organization composed not only of good shots but of men who are zealous in the preservation of our game and fishing interests. Between the races there was also a ladies' equestrian tournament, in which some of the most skillful and graceful horsewomen had entered their names. With such attractions and a close race between such noted trotters as Sweetness and Nellie R for the sterner sex and the sporting class, a great crowd of visitors was expected and the most sanguine expectations of the directors were more than amply realized. The charming enclosure presented a very bright appearance with its number of equipages, many of which during the heats were driven at a reckless rate from point to point to gain a better view of the horses, but luckily not the slightest accident marred the pleasure of the day.

The principal race was a purse of \$400 for the 2:30 class in which of the four original entries, only Sweetness and Nellie R put in an appearance. For days previous to the event there had been a great deal of talk indulged in by our racing amateurs in regard to the respective merits of the two fleet mares, the general impression that Sweetness was lacking in staying qualities having been somewhat modified by her performance at Stockton during the previous week. It was generally understood that it would be, as tersely said, "an up and up race" but the result was certainly at variance with that supposition, if the wails and reproaches of the losers are to be taken into consideration. Before a heat was trotted there were such fluctuations in the betting as foretold nasty weather to those who had not a chart of the rocks and eddies through which they were steering, and even a few who by blind chance were in the tide of success were almost wrecked as they went around in the third heat. For the first twenty pools the betting was quiet and but little changed at \$25 for Sweetness against \$20 for Nellie, but suddenly there was a radical variation and made so rapidly that the pools at once became doubled and tripled in amounts and such was the desire to invest in Nellie's chances that pools sold as fast as they could be booked at \$50 for her against \$25 for Sweetness. The track was rather lumpy and unfavorable for very fast time, and perhaps if there was any openly expressed opinion as to the change in the betting it may have been attributed to this fact, as Nellie was still considered the best stayer of the two.

The horses were sent off at the second attempt and indeed all through the race there was that lack of zeal to obtain a good position at the start which has generally been more fully displayed when a great deal of coin depended on the result. The two mares trotted evenly around the first turn when Nellie was off her feet to such a bad break that when she recovered her gait Sweetness was some ten lengths ahead and although Nellie rapidly closed the gap to within about two lengths, she was up again and Sweetness won by five lengths in 2:24.

Strange to say, after this exhibition of speed, Nellie was a greater favorite in the pools than ever, for if Sweetness was taken as first choice at \$40 as much as \$70 was instantly bid for Nellie, and the betting was fast and furious, ending at \$40 to \$25 in Nellie's favor. From this time outward until the race was ended the interest was mainly centered in the happenings between the heats, and the sporting elements which were gathered around the pool box in their investments eagerly scanned every movement that would throw a light upon the ultimate result, while the timid betters restricted their operations to the French pools.

Again there was a very even start and they trotted like a team to the half-mile where Sweetness in the inside appeared to have a slight advantage, but Nellie had resumed her position for the home struggle when at the entrance to the stretch she was again in the air and Sweetness won by two lengths with something to spare in 2:24. Now there was some degree of hedging on both sides apparently among timid holders but generally the staunch and true stood to their favorites with undaunted mien, the backers of Sweetness being confident that although Nellie might win the next heat she could not be driven all to pieces as had been seen on a previous occasion at Oakland. The betting on an average was \$40 to \$20 in favor of Sweetness, and the following trot was the prettiest contested of the race, for the mares were lapped all the way around and it was only within the last two furlongs that it was seen that Nellie had the foot of her antagonist, she winning in 2:23½ by an open length, although Sweetness was pushed to the very top of her speed. There was apparently but little to choose in regard to their relative chances but betting was now languishing, perhaps on the fact that a great many had their money in the pool box and no more to risk, while the general public held aloof and let "the sports," as they termed them, fight it out on what line they chose. Among the disinterested spectators the prevailing impression was that Nellie would win easily the two next heats, but the betting was only about \$40 to \$25 in her favor. Such was the ultimate result, as Sweetness appeared to have lost all her speed, her dash and courage, and although in the fourth heat she was within a length of Nellie at the half-mile post, the latter drew away and won as she liked by half a dozen lengths in 2:29. The battle was now all over and Nellie, with \$100 to \$15 on her chances, rushed away with the lead and although as in the previous heats Sweetness was severely urged with the whip, she gradually fell back beaten, and Nellie R won the heat in a jog in 2:34. Previous to the declaration of the result a noted professional driver protested to the judges that the race was not quite on the square, but those gentlemen appeared to ignore Mr. Farrell's experience in such matters and gave without hesitation the race to Nellie R.

SUMMARY.

SAN JOSE, Sept. 27.—Trotting, purse \$400 for the 3:30 class. S. Perry names J. & W. S. Fritch's ch m Nellie R. 2 2 1 1
John A. Goldsmith names b m Sweetness. 1 1 2 2
Pascora Hayward and Tump Winston were entered but did not start. Time—2:24, 2:24, 2:23½, 2:29, 2:34

The Ladies' Tournament.

The equestrian display at the San Jose fair was one of the chief attractions on Wednesday but the trotting race was so prolonged that many of the spectators went home before the ladies were called up to contest for the prizes offered by the Association. There were five young equestriennes who took part in the proceedings, Miss N. M. Penniman, Miss Amanda Rogers, Miss Lottie Bose, Miss Lena Bose and Miss Kate Galbreath. There was a good display of grace and skill made on the occasion and it was difficult for the judges to distribute the prizes in a manner that should please the public and especially the participants in the tournament. Owing to the lateness of the hour the evolutions were of the simplest character and the decisions were finally made as follows: For graceful riding, Miss Amanda Rogers; Miss N. M. Penniman second and Miss Kate Galbreath third prize. For skillful riding, Miss Penniman, first prize, Miss Rogers second and Miss Galbreath third prize. The last feature was a dash of three-quarters of a mile in which Miss Penniman led from the start and took the first premium, with Miss Rogers second and Miss Lottie Bose third, with the two others in close pursuit. In these displays there is a great deal in the possession of a good horse, and it would be an excellent idea to arrange so that each lady should give an exhibition of grace and skill on the same horse that had been regularly broken in at a riding school, and that neither of the contestants had ever ridden before. As it is now the horses in most cases are not worthy of the occasion.

Thursday.

The events of Thursday were interesting in their way, as will be gleaned from the following telegraphic summary. Full description from our representative will appear next week: The first race was running, for three-year-olds, a mile dash, between Judson's Patrol and Van Buren's Forest King. The former was the favorite by 25 to 16. The race was a very pretty one and was won by Forest King by a length. Time, 2:02. The next was a special trotting race for a purse of \$300, between Brandon's Ashley and Pete Williams' Frank Moscow. The latter was the favorite, selling at \$30 to \$21 for Ashley. The first two heats were won by Ashley, time, 2:35½ and 2:33½. The driver of Moscow was then changed and pools sold at close to \$40 on Moscow to \$17 for Ashley. The third and fourth heats were won by Moscow. Time, 2:33½ and 2:30½. The fifth heat caused great excitement, Ashley keeping ahead till the homestretch, when Moscow came alongside and when within forty feet of the string Moscow broke and, gaining a length ahead, came in first. Time, 2:34½. The judges awarded first money to Moscow over the protest of Ashley's driver and amid the excitement of the crowd. The general opinion seemed to be that Moscow lost the heat by breaking. After this came the pacing race between Corette and Johnny Weigle. No pools were sold, the belief being general that Corette would have a walk over, and so it proved. The first three heats were won by Corette. Time, 2:24, 2:26½, 2:34½. The hurdle race postponed from yesterday had for contestants Miss Ida Johnson, J. W. Gannoz and J. Smith. It was won by Gannoz.

Closed Stakes.

The following are the nominations in the stakes already closed to be run at the fall meeting of the Blood Horse Association:

Vestal Stake, for three-year-old fillies, one and one-quarter miles; \$25 p.p.; \$300 added, second to receive \$100, third to save stake. Closed August 2d.

No. 1. Theo. Winters names ch f by Norfolk, dam Matie A.

No. 2. " " names b f by Norfolk, dam Marion.

No. 3. " " names b f by Norfolk, dam Golden Gate.

No. 4. E. J. Baldwin names ch f Anita by Rutherford, dam Josie C.

No. 5. H. R. Covey names b f by Springfield, dam Boydana.

No. 6. " " b f by Longfellow, dam Miss Campbell.

No. 7. " " b f by Lever, dam Frolic.

No. 8. " " ch f by Longfellow, dam Robin Girl.

No. 9. James B. Chase, names f Lady Clare by Joe Daniels; dam by Owen Dale.

No. 10. James B. Chase names ch f Annie Lawrie by Hubbard, dam Mayflower.

No. 11. C. M. Chase names br f (sister to Raven) by Monday, dam Camilla Urso.

No. 12. Henry Schwartz names b f (sister to Lottery) by Monday, dam Virginia by Revenue.

Fame Stake, for three-year-olds; dash of two miles; \$100 each, \$25 forfeit; \$500 added; second to have \$150, third to save stake. Closed August 2d.

No. 1. Theo. Winters names b c "305" by Norfolk, dam Addie C.

No. 2. " " b c by Norfolk, dam Ballinette.

No. 3. " " ch f by Norfolk, dam Matie A.

No. 4. " " b f by Norfolk, dam Marion.

No. 5. " " b f by Norfolk, dam Golden Gate.

No. 6. E. J. Baldwin names b c Albert C by Rutherford, dam Maggie Emerson.

No. 7. E. J. Baldwin names ch f Anita by Rutherford, dam Josie C.

No. 8. H. R. Covey names ch c by Lever, dam Cuba.

No. 9. H. R. Covey names ch c by Foster, dam Planetia.

No. 10. H. R. Covey names ch f by Longfellow, dam Robin Girl.

No. 12. James Mee names b c Judge McKinstry by Thad Stevens or Grinstead, dam Katie Pease.

No. 12. James B. Chase names b c. Rhoderick Dhu by Joe Daniels, dam Wild Rose.

No. 13. James B. Chase names ch f Annie Laurie by Hubbard, dam Mayflower.

No. 14. Peter Coutts names br c Forest King by Monday, dam Abbie W.

No. 15. C. M. Chaso names br f (sister to Raven) by Monday, dam Camilla Urso.

No. 16. Frank DePeyster names b c by Monday, dam Lizzie Martin.

No. 17. Henry Schwartz names b c (sister to Lottery) by Monday, dam Virginia, by Revenue.

No. 18. W. H. Combs names br c by Bayswater, dam Ruth Ryan, by Lodi.

Ladies' stake for two-year-old fillies; \$50 entrance. \$25 forfeit, \$200 added; three-quarters of a mile; second to save entrance.

No. 1. Jos. Cairn Simpson names Lady Viva.

No. 2. Pnt Robson names Shannon and Jessie R filly.

No. 3. Peter Coutts names Flou-Flou.

No. 4. Thos. Atchison names California and Roseland filly.

No. 5. Theo. Winters names Norfolk and Ballinette filly.

No. 6. Theo. Winters names Norfolk and Ballerina filly.

No. 7. Theo. Winters names Norfolk and Mattie A. filly.

No. 8. J. B. Chase names b f Marion by Hubbard, dam Electra.

No. 9. J. B. Chase names ch f Laura by Shannon, dam Folly.

No. 10. W. A. J. Gift names Miss Gift.

No. 11. Caleb Dorsey names b f by imported Partisan, dam Pet.

No. 12. Caleb Dorsey names ch f by imported Partisan, dam Lexingtona.

No. 13. Palo Alto Stable names Leveller and Fron-Frou filly.

No. 14. Palo Alto Stable names Hubbard and Tehama filly.

No. 15. Palo Alto Stable names Wildidle and Rose filly.

No. 16. Palo Alto Stable names br f by Shannon, dam Camilla Urso.

No. 17. J. B. Haggin names Nubia.

No. 18. J. B. Haggin names Irene.

No. 19. J. B. Haggin names Sophia.

No. 20. J. B. Haggin names Belle.

Finan Stake, for two-year-olds; dash of a mile, \$50 each; \$25 forfeit; \$250 added; second to save stake.

No. 1. Jos. Cairn Simpson names Lady Viva.

No. 2. Put. Robson names Shannon and Jessie R filly.

No. 3. Peter Coutts names Anriol.

No. 4. Peter Coutts names Panama.

No. 5. Peter Coutts names Flou-Flou.

No. 6. Thos. Atchison names California and Roseland filly.

No. 7. Theo. Winters names Norfolk and Addie C colt.

No. 8. Theo. Winters names Norfolk and Maggie Dale colt.

No. 9. Theo. Winters names California and Pnss colt.

No. 10. Tbeo. Winters names Norfolk and Ballinette filly.

No. 11. Theo. Winters names Norfolk and Ballerina filly.

No. 12. Theo. Winters names Norfolk and Mattie A filly.

No. 13. J. B. Chase names Marian.

No. 14. J. B. Chase names Laura.

No. 15. W. A. J. Gift names Miss Gift.

No. 16. E. J. Baldwin names Grisner.

No. 17. E. J. Baldwin names Lucky B.

No. 18. E. J. Baldwin names Gano.

No. 19. Palo Alto stable names Leveller and Fron Frou filly.

No. 20. Palo Alto Stable names Hnbbard and Tehama filly.

No. 21. Palo Alto Stable names Shannon and Camilla Urso filly.

No. 22. Palo Alto Stable names Shannon and Emma Robson gelding.

No. 23. W. H. Coombs names Shannon dam Eva Ashton.

No. 24. Wm. Boots names Bob Wooding and Lizzie Marshall colt.

No. 25. J. B. Haggin names Nubia.

No. 26. J. B. Haggin names Belle.

No. 27. J. B. Haggin names Irene.

No. 28. J. B. Haggin names Sophia.

No. 29. J. B. Haggin names Del Paso.

A Hat-Case Full of Money.

Mr. James Rice, in his "History of the British Turf," tells us that the victory of Ellington for the Derby of 1856 "was marked by a singular incident in connection with his trainer." The horse had been heavily backed for the Epsom race, but suffered a humiliating defeat when he ran for the Dee Stakes at Chester, so that all possibility of "hedging" was out of the question. "The result was," says Mr. Rice, "that against his will Mr. Thomas Dawson, the trainer of Ellington, won £25,000 by his horse's victory. On the Monday after the race Mr. Dawson went to Tattersall's to receive his money. The whole of it was paid to him in bank notes. After the settling he dined, and took the train for the North, having first packed his bank notes in an old leather hat-case without any lock, and tied simply with a piece of string. Mr. Dawson fell to sleep in the train, and when the guard, who knew him well, awoke him at Northampton, and told him that he must change carriages, Mr. Dawson got out of the train, leaving the old hat-case behind him. In those days telegraphy was not so simple and easy a matter as it is now, and Mr. Dawson did not recover his hat-case for a whole week, during which time it had traveled to Edinburgh, Aberdeen and various other places. Ultimately it came back to the rightful owner and with all the notes safe inside."

We need hardly add that, despite his characteristic and unmercenary indifference to money, the celebrated "Tom Dawson," than whom no more popular or large-hearted trainer ever plied his difficult and responsible craft, took care to display no solicitude about the missing hat-case, and abstained altogether from revealing the nature of its contents. He merely told the stationmaster at Leybourne that it was an article he had owned for a great number of years, and that as, in addition, there were some papers in it which were of no use to any one but himself, he should like to recover possession of it.

THE BREEDER AND SPORTSMAN is the title of an elegant sixteen-page weekly journal, published in San Francisco, the initial number of which has just made its appearance. The engraved heading of the BREEDER AND SPORTSMAN is the prettiest piece of work in that line that we have ever seen. The artist has won a genuine triumph, for he has not only incorporated in his beautiful design water and foliage, fruit and blossoms, fine horses, cattle and dogs, but all the emblems and symbols of sporting life. Joseph Cairn Simpson, the veteran turfman and accomplished gentleman, is the proprietor of this new venture in the field of journalism. He is supported by an able corps of writers, all of them well trained in the several departments over which they have been called to preside. The BREEDER AND SPORTSMAN deserves and will achieve success. Its field is large and remunerative. Each of the San Francisco and Sacramento dailies dishes up a weekly pot pourri of sporting news. There are the *California Spirit of the Times*, the *Pacific Life* and the *Olympian*—all specially devoted to the subject and making fortunes rapidly for their owners. The thirst of the California public for sporting intelligence, however, remains unappeased, and Mr. Simpson's splendid journal comes in to relieve the stress. An attractive feature of the new paper is the appearance each week of a drawing of some one or other of the "Notable Horses of California"—Mr. Winters' Duchess of Norfolk leading off in the first number. The Breeders of the Pacific Coast, from the Columbia to the Colorado, and from the Sierras to the sea, should now stand in with Joe Simpson and make this journal a financial success. He has done more than any other man in America to elevate the turf and advance the breeding interests of the Pacific Coast.—*Territorial Enterprise*.

Gov. Stanford's car-load of colts, in charge of Charles Marvin, arrived safely at Albany, New York, on Wednesday. They will remain there a few days before being taken to Fleetwood Park. They are all reported to be in excellent condition.

The Stockton Fair.

Thursday was the great day of the week for gate money. The grand stand was packed to its utmost capacity and the carriages stretched away east and west from the judges' stand, five tiers deep. At 12:30 the unfinished race of the previous day was called up and soon disposed of, Patchen winning in a jog in 2:40½, 2:40½.

SUMMARY.

September 20 and 21.—District trotting, purse, \$500, four moneys. John Williams (L. U. Shippee) names b c ———, by In-auguration..... 2 2 1 1 1
W. H. Parker names g s Silver Thread, by The Moor..... 1 1 2 2 2
John Patterson's b m Mollie P, by McClellan; J. A. McCloud's br g ———, and Harris & Wolf's b g Mac, by McClellan were drawn.
Time—2:45½, 2:43, 2:46, 2:40½, 2:40½.

The first event on the day's programme was a free-for-all running race, heats of a mile. May D, Jim Douglas and In-auguration started. May, a strong favorite in the betting-pools going May D \$40, field \$21.

First heat. The start was not first class for a mile heat, there being a difference of a clear length between the horses, Jim Douglas, who had the inside, getting away first and the favorite, who was outside, last. They ran in this position to the quarter in 26½. In the straight work May D moved up to Douglas' saddle and the gap between Inauguration and the leaders began to widen. At the half, in 51, he was four lengths back. Around the turn they ran steadily, May D gradually gaining, and at the head of the stretch they were on even terms. In the run home May held the edge over Douglas and after a determined effort he was taken back at the distance and the mare came to the wire winner by three lengths, Douglas second, Inauguration third. Time 1:44. After this mile there was no doubt as to the final result, and pools went May D \$30, field \$5.

Second heat. The start was much the same as before except that May D having the pole got the advantage and Inauguration the disadvantage of being sent off in a line. May D was taken in hand at the turn and Douglas was first at the quarter in 26, but the mare resumed the lead in the back stretch where she and Douglas had a run for it, reaching the one-half in 50. In the lower turn Douglas surrendered and May galloped home an easy winner, Douglas second, Inauguration third. Time 1:44½.

Paris Mutuals paid first heat \$4 30, second heat \$3 05.

SUMMARY.

Thursday, September 21.—Pacific Coast running, mile and repeat, purse \$500, and if 1:43 is beaten the horse making the lowest record will receive \$200 additional. Four moneys.
W. L. Appleby (H. C. Judson) names cb m May D by Wildidle—Nettie Brown, 4 years, 100 lbs. (Appleby)..... 1 1
George Deussdale names b s Jim Douglas by Wildidle—Norfolk mare, 4 years, 108 lbs. (Hosown)..... 2 2
Wm. Boots names cb c Inauguration, by Wildidle—Miami, 3 years, 100 lbs. (Kennedy)..... 3 3
George Hearst's b c Duke of Monday—Nemefret, drawn.
Time—1:44, 1:44½.

As a substitute for a district trot which did not fill a special for Ashley, Tump Winston and Frank Moscow was offered and they were called up at the conclusion of the mile and repeat just described. On this race there was considerable business done in the pools before the start with Ashley for a favorite the average being Ashley \$25, Winston \$13, Moscow \$5. Moscow drew the pole, Ashley second, Winston outside, and they got away level for the first heat. At the start Ashley broke badly and continued that skipping for which he has been so frequently anathematized throughout the mile. Moscow also left his feet at the quarter and Winston was the only one who showed any real disposition to trot. He showed in front at the head of the stretch and was an easy winner by five lengths, Ashley second, Moscow third. Time, 2:26½.

Second Heat. Winston came to the front in the betting at long figures, for Ashley money must be hedged. The pools went Winston \$160, Ashley \$60, Moscow \$16. When the word was given Ashley was running and they got to the quarter well in a bunch, Winston showing a head in advance. From there he was never headed, Ashley and Moscow rushing after him up the stretch with skips and hounds but failing to reach his throatlatch. Winston first, Ashley second, Moscow third. Time 2:27.

Third heat. Winston now brought three for one in the pools and they got a fair start for the third mile. On the first turn Winston made his first break and both Ashley and Moscow left him behind. Down the stretch and around the turn Ashley was leading and as they swung into the stretch Winston overhauled him but broke badly in the effort. They came to the wire with Ashley first, and Winston second, but the judges lifted Moscow over their heads as a reward for having done some square work and placed him first, Winston second and Ashley third. Time 2:30½.

Fourth heat. On the first turn Winston and Ashley both broke and Moscow went to the quarter with a long lead, Ashley second. At the half they had closed the gap but Moscow held the front to the three-quarter pole, when he broke up and Winston went past him, coming home winner of the heat and race, Moscow second, Ashley third. Time 2:30½. There was a general feeling of relief when the affair was over.

SUMMARY.

Same day—special trot for Tump Winston, Ashley and Frank Moscow. Purse \$400.
E. Mara names cb g Tump Winston by Primus—Lady Don..... 1 1 2 1
A. B. Cooper names cb h Frank Moscow, by Frank Moscow..... 3 3 1 2
T. Kennedy names cb g Ashley, by Primus..... 2 2 3 3
Time—2:25½—2:27—2:30½—2:30½.

The third number was a trot for district two-year-olds. Eleven colts had been named, but the pinkie kept out all but four and these started rather under protest as none of them were well and it was with great reluctance that the several owners consented to start. The colts entered were Baby Mine, Magdalene, Alpheus and Almoone, position being in this order. The race had but little interest as it was purely a matter of condition and no real test of the qualities of the colts. Magdalene had two to one the best of it and won in a jog in two heats:

The Lady Riders.

During the afternoon the ladies' equestrian tournament open to all the ladies in the State was called up and decided, and six ladies competed, all capital riders, but as is always the case some were but poorly mounted and it was more a question of horses than riders. Ladies should not feel disappointed if they fail of prizes when they appear mounted upon staid old family colts who look and act as if they subsisted upon a diet of catechisms and who have no more gait or style than a

sawhorse. Judges cannot imagine what accomplishments a lady may have as a horsewoman. They must see them displayed, and if it be true that some ladies of ability in this direction cannot command fit steeds for such an exhibition they will save themselves mortification by submitting to outrageous fortune and staying out of the ring. The judges after mature deliberation awarded the first prize, \$40, to Miss Amanda Rogers of San Jose; second, \$25, to Miss Belle Ellis of Sacramento; third, \$15, to Mrs. B. C. Trefry of Tulare. This exhausted the association premiums, but the judges were so charmed with the riding of Miss Irene C. Bailey of Stockton, a petite little lady of thirteen summers, that they awarded her a fourth prize of \$15, which they made up from their private purses.

Fourth Day.

Friday was the great day for the sporting men for the principal events of the week were set for that afternoon, the two mile and repeat running race and the trot for the 2:22 class in which Romero and Brigadier were to try conclusions under circumstances somewhat more favorable for a test than had been previously offered this season. The running race was first and Judge Shaffer came up on the morning train to see Nighthawk tried at a distance and in a race that tries the best. Nighthawk, Jack Douglas, Patrol and Mollie H were announced to start and a lively business was done in the pools for so long a figure as Nighthawk commanded, viz: \$50 to \$12 for the others in the field. The day was fine and the track a trifle safer for galloping than it had been in the preceding days of the meeting. The favorite stripped in fine condition and all the others were held to be quite satisfactory by their owners except Jack Douglas, who had a bad leg—too bad to be punished by such a run as two mile heats. Little time was spent in preliminaries and the horses were sent off with a fair start for the first heat. Nighthawk forced the pace at the start and had a strong lead when she was taken in hand in the first turn. To the quarter in 25 and the half in 51½, they were running in a line, Nighthawk first, Patrol second, Douglas third, and Mollie H last. In the stretch Patrol lapped the leader, both running steadily, and they passed the stand at the end of the first mile in this position. Time, 1:50½. There was no change to near the half when Douglas made a game run for a short distance, but failing to reach the front he fell back to third. In the stretch whips were drawn on all of them but Nighthawk came away so rapidly that she was soon taken back again and won the heat at a gallop with Patrol second, Jack Douglas third, Mollie H distanced, Time, 3:40½.

Second heat. Nighthawk made the pace as before, Patrol going second under a gentle pull, Douglas third. They went the first mile without change, time, quarter 27, half 54, the favorite passing the stand under a strong pull in 1:50½. At the same point as in the first heat Douglas made another run and succeeded in establishing himself in second place. Nighthawk came home at her own pace, Douglas arriving second by a length, Patrol another length behind. Time, 3:38½.

SUMMARY.

Friday, September 22 Pacific Coast running, free for all, two miles and repeat, purse \$800 and \$200 added if more than ten entries. Four moneys.
P. J. Shaffer names b m Nighthawk, by imp. Haddington—by Norfolk, 5 years, 111 lbs. (Ross)..... 1 1

Time—3:40½, 3:38½.

Next came a mile and repeat for district three-year-olds. Starters, Birdcatcher, Kate Carson, Minnie Belle and Reel Terry. Birdcatcher was a high favorite with the speculators and the result showed their confidence well bestowed. He had the race at his mercy in any and all stages of it, Minnie Belle having gameness enough but not the speed to bring the fight to a successful issue. The heats were not of special interest on account of the enveloping shadow of the favorite, who won as he willed in two heats, Minnie Belle second, Kate Carson third, Reel Terry distanced in the first heat.

SUMMARY.

Time—1:45, 1:49½.

Next came the event of the day, the trot for the 2:22 class. It was known that Romero had improved greatly since the race at Sacramento. Although he still showed the presence of the prevailing epidemic in a slight discharge from the nostrils and a tucked-up appearance in his flanks, he had begun to resume his coltish airs when taken out for his exercise and it looked as though he would stand a good chance in a race not too long drawn out by splitting heats. This feeling was enough to make him a slight favorite in the pools. Brigadier sold close up, for the honest bay stallion had shown a mile in 2:19½ in his work on Tuesday and was a factor not to be disregarded in the calculations. The day and track suited Romero to perfection. A large amount of money was laid on him during the morning hours and when the horses were called every one was keyed up to the highest point, some of curiosity, some of hope and some of fear. Starr King drew the inside position, Brigadier second and Romero third. They got the word on a good start, all trotting squarely and braced for the work. Around the turn Brigadier showed his head in front and at the quarter in 35½ he was almost a length in the lead, King close in the wake next the pole. To the half in 1:09½ proved fast for King and he began to fall away and around the farther turn Romero was at Brigadier's saddle, and as they turned the three-quarter pole they were squarely yoked, King five lengths in the rear. McDonald drew his whip on Brigadier but the grey drew away so easily that he saw it was useless and drove his horse home without urging, Romero being also let down and crossing the score at an easy trot two lengths in the lead, Brigadier second, King a fair third. Time 2:20.

The doubters now began to lose their doubts and there was a movement towards the pool box to hedge the Brigadier moneys. The average sales were Romero \$60, field \$35.

Second heat. King broke at the start and the other two went around the course like a double team. The time to the quarter was 36 and to the half 1:10, and so smooth and quiet was the gait that it was not until the interested speculators noted that lack quarter in 34 that they realized how fast the pace was getting. Positions were unchanged until the straight mile home was entered, when Romero drew away a length, apparently as he pleased, Brigadier surrendering at the distance. Romero first, Brigadier second, Starr King third. Time, 2:19½. Starr King was in a good position comparatively at the finish and must have trotted

the mile better than 2:22. The betting was now 4 to 1 on Romero.

Third heat. While scoring for the word Brigadier pulled a plate and half an hour's delay occurred before he was ready to start. The accident of the lost plate was the reason of discovering that Brigadier's feet had been pared too thin for so hard a track, and he was becoming tender, if not decidedly lame. Mr. McDo a prizes his horse too highly to inflict any unnecessary punishment, but under the circumstances he decided not to ask permission to draw him from the race although he ran no chance of winning. At the start Starr King fouled Romero and broke him up. There was a murmur ran through the crowd when the grey settled five lengths behind but from that time to the finish he gauged steadily, working past the others in the stretch with ease and coming to the score winner of the heat and race, Brigadier second, Starr King third. Time, 2:22.

SUMMARY.

Same day—Pacific Coast trotting. For horses owned on the Pacific Coast July 1, 1892, 2:22 class; Purse \$1,500, and \$500 added if more than ten subscribers. The nominator not required to name his horse, but simply send his cash (\$150) with his own name August 1, 1892. He has then earned the right to start any horse eligible that he may fully control, provided the horse he starts be named to the Secretary, September 1, 1892. Four moneys; closed with five subscribers.

Ladies of the District.

A tournament open only to ladies of the district was also included in the afternoon's exercises. Six ladies competed and the four prizes were distributed as follows: First \$40, Mrs. Thompson; second \$30, Mrs. B. C. Trefry; third \$20, Mrs. Goff; fourth \$10, Miss Bailey.

Fifth Day.

Saturday, the fifth and last day was intended, by the managers to be a short one, as there was a general desire on the part of the visitors to get away for home on the evening boats and trains. The races fixed for the day were trotting for 2:23 class and pacing free for all. Our notes of the first event will be found on the first page as an appropriate part of a sketch of Albert W. Between the races Mr. Yates speeded Corette around the track for the delectation of the audience, and she paced the mile in 2:17, the fastest mile ever paced in the State and the fastest ever made by pacer or trotter over the Stockton course. Mr. Yates started with the intention of showing a figure under 20 and giving his mare her head allowed her to make the pace herself with the above result. In the interval a private match was also run between D. S. Terry's ch g Lara and T. H. Williams Jr's, h s Bryant W., three-quarter of a mile. They got away with an exact start, Bryant W showing a front at the half but in the run home, which was close and hard, Lara was clearly the best horse and went to the front when within reach of the wire. Time 1:19.

SUMMARY.

Saturday, September 23.—Private match for \$200, three-fourths of a mile.
D. S. Terry names ch g Lara, by Joe Daniels—Woodburn, 2 years, (Whitlock)..... 1
T. H. Williams Jr. names br s Bryant W, by Monday—Bete, 2 years, (Ross)..... 2
Time—1:19.

The last act was free for all pacers. Corette was withdrawn and Ouida, Oakland Boy, Lady Hays and Col. Dickey started. The race was more conspicuous for running than for pacing. The first heat was won by Dickey, Oakland Boy second, Ouida third, Lady Hays dancing herself out of the race on the hockstretch. Time, 2:35. The second heat was recorded in Ouida's favor, Oakland Boy second, Dickey last. Time, 2:29. In the third heat the positions were the same. Time, 2:30½. The fourth mile was captured by Dickey, Ouida second, Oakland Boy third. Time, 2:32. Fifth heat dead heat between Ouida and Dickey, both running when they came to the wire, Oakland Boy third. Time 2:31. The finish of the race was then postponed till Monday on account of the darkness.

The Stock Department.

In addition to the stock from the State at large, which had been shown at Oakland and Sacramento, we noted the following strictly district exhibits in the various classes:

Thoroughbreds.

Stallions, three years old and over, C. McLaughlin, Bantas, Pescadero, by Wildidle—Mamie Barnes.
H. S. Sargent, Stockton, Joe Daniels, by Australian—Dolly Carter.

Mares, one year old, J. N. Randall, Turlock, Alice R, by Joe Daniels—Sugar Plum.

Horses for all Purposes.

Stallions, three years old and over, Dr. C. Grattan, Stockton, Hambletonian King, by Gen. Dana—by American Boy. T. E. B. Rice, Modesto, Honest George, by Lummix.
G. W. Trahern, Stockton, Nephew Jr., by Nephew—by Chieftain.

H. S. Sargent, Stockton, Village Boy, by Blackhawk.
J. A. McCloud, Stockton, Chieftain Jr., by Chieftain—by Planter.

Two-year-olds, W. G. Phelps, Stockton, Duroc, by Nephew—Sultana.
J. A. McCloud, Stockton, May Boy, by McCloud's Chieftain—by Henry Clay.

J. W. Whitney, Stockton, ———, by Priam—hy Chieftain.

Sucking colts, Dr. C. Grattan, Stockton, Dandy, by Hambletonian King—by Blackhawk.

E. Stevens, Bantas, ———, by Stonewall Jackson.

Mares, three years old and over, Dr. C. Grattan, Stockton, Fannie, by Sherman's Blackhawk.

Noyes Bailey, Stockton, Kattie B, by Chieftain.

W. G. Phelps, Stockton, May, by Gen. Sherman—Sultana.

Two-year-olds, Wm. Thomas, Douglas Flat, Calaveras county, Mollie Miller, by John Miller—Clydesdale mare.

Roadsters.

Stallions, four years old and over, G. W. Trahern, Stockton, Nephew, by Mambrino—Sister to Pacing Abdallah.

W. S. Alexander, Stockton, Ben Allen, by Sportsman—by Belmont.

W. E. Morris, Stockton, Upright, by Whipple's Hambletonian—Gilroy Belle.

Smith Akers, Oakdale, Comet, by Old Comet—Morgan mare.

Three-year-olds, J. A. McCloud, Stockton, Judge Patterson, by Nephew—Daisy.

Yearlings, W. G. Phelps, Stockton, Estrella by Silver Threads—Lucinda, by McClellan.

Morris Bailey, Stockton, ch c, by Hawthorne—by Odd Fellow.

G. Valensin, Hicksville, blk colt by Buccaneer—by Volscian.

Mares and Geldings.

Four-year-olds, Sargent Bros., Woodbridge, ch g San Joaquin, by Patchen—Blackhawk mare.

L. U. Shippee, Stockton, b m Daisy, by Chieftain.

Same owner, blk m, by McCracken's Blackhawk.

Same owner, ch m Phoebe Cary, by Chieftain—by Jim Crow.

W. R. Ledbetts, Stockton, b g Little Mac, by Gen. McClellan—Chieftain mare.

Three-year-olds, Morris Bailey, Stockton, b m, by McCloud's Chieftain—by Odd Fellow.

Two-year-olds, W. G. Phelps, Stockton, b m Lucia, by Nephew—Lucinda.

W. E. Morris, Stockton, g f Cyclone, by Priam—Gilroy Belle.

Yearling fillies, Noyes Bailey, Stockton, b f Hattie B, by Nutwood—by Chieftain.

Roadsters, matched spaus, L. M. Morse, Stockton, John O'Brien and mate, both by Mambrino Wilkes.

L. U. Shippee, Stockton, b g, by Geo. M. Patchen, and b g, by Chieftain.

Sucking colt, L. U. Shippee, Stockton, b c, by Abbottsford—by McCracken's Blackhawk.

Dratt Horses.

Stallions, three years old, E. Stevens, Bantas, Donald Dinie, by Donald Dinie Sr.—by Clydesdale.

C. McLaughlin, Bantas, Gen. Grant.

J. C. Gage, Stockton, Little Raven.

L. U. Shippee, Stockton, Prince Consort Jr.

Sucking colts, Uriah Martin, Stockton, b c, by Enterprise—Fannie.

Mares, three years and over, Uriah Martin, Stockton, Fannie, by Houston horse.

Carriage horses, span sixteen hands, owned by one person, O. Johnson, Modesto, b g, by Priam—Belmont mare; and b s Hercules—same pedigree.

M. Premo, Atlanta, ch g, by Priam, and ch g by Chieftain.

S. P. Bailey, Stockton, George, by Corsica, and Prince, by Chieftain.

L. Gerlach, Stockton, pair chestnut geldings, by Yorktown.

Single buggy horses, O. Johnson, Modesto, Silvertail, by Priam—Belmont mare.

W. G. Phelps, Stockton, Flora, by David Hill—Sultana.

Jacks.

Freeman and Shippee, Stockton, Castilian.

H. S. Sargent, Stockton, Golconda.

E. Stevens, Bantas, Henry Ward Beecher.

L. D. Shippee, Stockton, Rob Roy.

Jennets.

Freeman and Shippee, Stockton, Duchess.

Same owners, Beauty.

Mules.

Pairs—Hayes & Nicewonger, Stockton, King & Jack.

L. U. Shippee, Stockton, Pet & Susie.

Same owner, a pair without names.

Cattle.

In this department the only district exhibitors were H. S. Sargent of Stockton, who showed a small herd of Jerseys, and E. Wood of Modesto, Jerseys in grades.

Sheep.

Spanish Merinos by L. U. Shippee.

Swine.

Berkshire, by L. U. Shippee.

Poland Chinas, by Dr. C. Grattan.

The Prize Winners.

Thoroughbred horses, best stallion, three years old and over, to H. S. Sargent for Joe Daniels. Second to Wm. Boots for Nathan Coombs.

Best mare, three years and over, to Wm. Boots for Mollie Hall.

Best mare, one year to J. N. Randall, Turlock, for Alice R.

Horses for all purposes, best stallion, three years and over, to G. W. Traherne for Nephew Jr. Two years old, to J. H. Whitney for ch s—by Priam, second premium, recommended to W. G. Phelps for Duroe. Best sucking colt, to Dr. C. Grattan for Dandy.

Best mare, three years and over, to L. Hewlett, Oakland, for Brownie H. Two years old, to Wm. Thomas, Douglas Flat, for Mollie Miller.

Roadsters, best stallion, four years and over, to Walter Morris, Stockton, for Upright. Two years old, to L. Hewlett, Oakland, for Echo Jr. Yearling, to G. Valensin, for blk s—by Buccaneer. Sucking colt, to L. U. Shippee, for br c—, by Abbottsford.

Best mare or gelding, four years and over, to C. Younger, for br g Whisper. Three years old, to J. B. McDonald, Marysville, for Hazel Kirke. Two years old, to Walter Morris, Stockton, for Cyclone. Yearling, to Noyes Bailey, Stockton, for Hattie B. Sucking filly, to Noyes Bailey for b f—, by Hawthorne.

Draft horses, best stallion, four years and over, to F. Skillman, Petaluma, for Tornado. Two years old, to F. Skillman for Monarch. Sucking colt, to Uriah Martin, Stockton, for colt, by Enterprise. Mare, three years and over, to Uriah Martin for Fannie. Yearling, to F. Skillman for Gertrude. Second premium for stallions three years and over recommended to L. U. Shippee, for Prince Consort Jr.

Carriage Horses, best span, 16 hands, to O. Johnson, Modesto, for Hercules and brother. Second, to L. Gerlach, Stockton, for pair chestnut geldings. Single buggy horse, to O. Johnson for Silvertail. Second recommended to W. G. Phelps for Flora. Jacks, best two years and over, to R. J. Greene, San Francisco, for Lippiucott. Jennets, best to Freeman and Shippee for Duchess.

Mules, best pair, to L. U. Shippee for Pet and Susie.

Cattle.

Durhams, best bull, three years and over, to C. Younger, for second Duke of Alameda. One year old, to same owner for Forest King. Bull calf, to same owner for Eighth Duke of Forest Home. Best cow, three years and over, to same owner for Jessie Maynard. Two years old, to same owner for Oxford Rose Third. One year old, to same owner for Fifth Louan of Forest Home. Heifer calf, to same owner for Tenth Rose of Forest Home.

Jerseys, best bull, three years old and over, to E. Woods, Modesto, for Pinafore. Two years old, to H. S. Sargent, Stockton, for Ezra Mameluke. Best cow, three years old and over, to H. S. Sargent for Daisy. Two years old, to same

owner, for Clark Beauty. One year old, to same owner for Queen.

Ayrshires, best bull, three years old and over, to Archie. Two years old to Lindo. One year old to Macbeth. Best cow, three years and over, to Stellita. One year old, to Stellita. Special premiums recommended to bull calf Malcomb and heifer calf Sybil. All the cattle in this class were owned by Geo. Bement, Redwood City.

Graded cattle, best cow, three years old and over, to E. Woods, Modesto, for Mattie.

Herds, best herd over two and one-half years and best under two and one-half years, both to C. Younger. Special premium recommended to George Bement's herd of Ayrshires.

Sheep.

Spanish Merinos, five premiums, to L. U. Shippee.

Cotswolds, three premiums to C. Younger.

Southdowns, premium to Geo. Bement.

Swine.

Berkshire, best boar and best sow, to L. U. Shippee.

Poland China, best boar and sow, to Dr. C. Grattan.

Poultry.

Premiums to Thos. Warte of Brighton Poultry yard, Sacramento county, for seven varieties, and premiums recommended for six other varieties. Mr. Warte exhibited Langshans, Plymouth Rocks, Partridge Cochins, Hondans, Brown Leghorns, Spangled Hamburgs, Golden Seabright Bantams and Pekin Ducks, all imported and of the purest strains, as well as Light Brahmas, White Brahmas, White Leghorns and Black Spanish, trios, and a pair of Tulous geese of his own breeding from imported stock. His display of pure bred poultry was probably the largest and most varied ever seen at a California fair.

Contra Costa County Fair Premiums.

Below is the list of premiums for the live stock awarded at the Contra Costa County Fair, held at Pacheco. The stock was led past the judges' and the grand stands on several occasions and on the whole made a good display. Those who received prizes for their live stock were:

Horses.

Thoroughbred horses, W. A. Gift, Martinez, best mare two years old, Miss Gift; no competition; premium recommended.

W. A. Gift, Martinez, best yearling, Billy Foot; no competition; premium recommended.

W. A. Gift, Martinez, best stallion, three years old; no competition; premium recommended.

Roadsters, C. T. McClellan, Pacheco, best sucking colt, Carrie.

J. B. Tennent, Pinole, two years old, Triquet; premium recommended; no competition.

S. Soto, Concord, second single carriage horse, three years old, Barney.

John Galiudo, Concord, second best stallion, three years old, Romeo.

N. Graber, Walnut Creek, best mare five years old, Gipsy Huntington.

W. L. McDonald, Pacheco, best stallion, four years old, Adventure.

Chas. McClellan, Pacheco, second best mare, five years old, Frankie Eaton.

J. E. Durham, Pacheco, best chestnut colt, one year old, Oscar.

W. H. Wells, Walnut Creek, best single carriage horse, Billy.

J. E. Durham, Pacheco, best stallion, five years, Conductor; no competition; premium recommended.

A. A. Miller, Pleasanton, best two-year-old stallion, Meteor.

J. E. Durham, Pacheco, second best two-year-old stallion, Rocky.

A. Boss, Pacheco, best double carriage team, Mollie and Tray.

Mr. Tewksbury, second best carriage team.

H. M. Hallenbeck, Martinez, second best sucking colt, Nettie.

Draft horses, A. Boss, Pacheco, best draught mare, two years old, Emma.

S. Soto, Concord, best stallion, four years old, Paris Boy.

W. W. Beauchamp, Pacheco, mare three years old, Sheriff.

A. C. Samuels, Concord, best stallion, two years old, Papelon.

A. Boss, Pacheco, best sucking colt, Dick, no competition; premium recommended.

H. Stout, Alamo, second best mare, three years old, Hercules.

W. W. Beauchamp, Pacheco, second best mare, three years old, Minnie.

Sweepstakes, W. Caven, Concord, best pair work horses, Dan and Jack; premium recommended.

A. A. Miller, Pleasanton, best stallion five years old, Carl Carr; no competition; premium recommended.

H. M. Hallenbeck, Martinez, best stallion, three years old, Glory.

T. G. Witten, Pacheco, best sucking colt, Sailor Boy.

T. W. Huckstrap, Pacheco, second best three-year-old stallion, Hector.

J. Nottighlan, best mare, four years, Green.

T. G. Witten, Pacheco, second best four-year-old mare, Belle.

J. B. Tennent, Pinole, second best yearling, Pinole Jr.

John Brady, Pacheco, second best sucking colt, yearling, Maud S Jr.

Cattle.

Jersey cows, C. Dickenson, Concord, best Jersey bull, four years old, Hector.

B. Webb, Pacheco, second best cow, two years old, and calf, Beauty.

W. W. Beauchamp, Pacheco, best cow and calf, Madam Cotton.

W. W. Beauchamp, Pacheco, second best Jersey bull, Dan Cook.

Graded cattle, cross breeds, T. C. Whitten, Pacheco, second best cow, four-year-old, Beauty.

C. Dickinson, Concord, best yearling heifer, Rose.

J. O'Boone, Danville, best cow, five years old, Jennie.

J. S. Williams, Concord, best cow, five years old, Lina.

Theo. Downing, Concord, second best yearling heifer, Belle.

J. S. Williams, Concord, best two-year-old heifer, Fannie.

W. Caven, Concord, second best two-year-old heifer, Rose.

Considering the large number of competitors and the large number of awards that were made it will be seen that the directors of the association did all in their power to make the fair a success, and if it did not come up to their expectations it was surely no fault of theirs.

The Great St. Leger.

Next to the Derby the Doncaster St. Leger holds rank among the turfmen of the world. The north country people think that it is entitled to the preference, and the crown which is awarded the Epsom victor is considered only a temporary sovereignty unless he places the double event to his credit.

Never before have the Derby and St. Leger been won in the same year by fillies, and the high excellence which the two that ran first, second and third in the St. Leger have shown, warrants the rehearsal of the description of the heroines. The account of the race was cabled to the New York Herald.

The race for the St. Leger Stakes for three-year-olds at the Doncaster September meeting to-day was won by Lord Falmouth's brown filly Dutch Oven. Mr. T. Canuon's brown filly Geheinniss, the favorite, came in second, and the Duke of Westminster's chestnut filly Shotover third. Dutch Oven won by a length and a half. There was a distance of two lengths between the second and third horses. Mr. Lorillard's Schem was beaten three furlongs from home. The time of Dutch Oven was 3:16. Dutch Oven was first away, followed by Fenelon, Actress, Schem and Marden for a quarter of a mile, when Actress took the lead. Balliol, Marden, Fenelon and Geheinniss were close up, with Shotover heading the next lot. They maintained this order fairly into the straight, when Geheinniss went to the front. Dutch Oven came through the horses at the distance. Schem finished fourth.

The following is a complete list of the starters: Dutch Oven, Geheinniss, Shotover, Sweetbread, Quickline, Fenelon, Schem, Marden, Romeo, Laureate, Battelfield, the Hygeia colt, Balliol and Actress.

The latest betting was 11 to 8 on Geheinniss, 7 to 1 against Shotover, 15 to 1 against Sweetbread, 20 to 1 against Fenelon, 40 to 1 against Dutch Oven, 40 to 1 against Quickline, 100 to 1 against Romeo, 100 to 1 against the Hygeia colt and 100 to 1 against Balliol.

SUMMARY.

The St. Leger Stakes of 25 sovs. each, for three-year-old colts, 6 st. 10 lbs., and fillies 8 st. 5 lbs.; the owner of the second horse to receive 200 sovs., and the third 100 sovs. out of the stakes. Old St. Leger course, about one mile, six furlongs and 132 yards; 201 subscribers.

The frequency with which fillies have won the St. Leger Stakes, as witness Januette, Apology, Marie Stuart, Hannah, Fornoso, Achievement, etc., has caused the month of September to be known as the mares' month. This year the fillies began early in the season to evince their superiority over the opposite sex and Shotover immortalized herself by winning both the two thousand guineas and the Derby. Geheinniss, trained in the same stable as Shotover, won the Oaks and was considered to be the better of the two, although as they were never tried together either in private or public this was somewhat of a surmise. Granting that Shotover was better than any of the colts and yet inferior to Geheinniss, it looked very much as if the fillies could make a stronger showing than usual at Doncaster. The pair received additional and unexpected reinforcement, and by means of Dutch Oven's wonderful return to her form of a year ago three fillies are recorded as first, second and third for the St. Leger, a state of affairs without a parallel in the records of the race, which extend as far back as 1776, although it was not regularly known as the St. Leger until two years later. This is the fourth winner of the race ridden by Archer, who was on Silvio in 1877, Jannette in 1878 and Iroquois last year. The former two were owned by Lord Falmouth, who yesterday won his third St. Leger.

Dutch Oven, like all the horses Lord Falmouth races, was bred by himself and is by Dutch Skater, a new sire so far as Lord Falmouth is concerned, out of Cantiniere. She is therefore a half sister of Bal Gal, who was got by Adventurer and who succumbed to throat troubles, as it was feared Dutch Oven had done early this year. As a two-year-old the heroine of yesterday's race had a very successful career and with good health it was confidently expected she would win many of her important three-year-old engagements. The new year had hardly opened, however, before the hopes of those who had wagered on her winning the Derby, to which three-year-old race winter betting was entirely confined, were shattered. Newmarket touts noticed her absence from the string of horses that filed out from Matthew Dawson's vast training establishment for their morning exercise, and the rumor that she was on the sick list was soon verified and severe influenza stated to be the trouble. Bal Gal had last year been attacked in a similar manner and her brilliant career brought to a summary termination, and it was feared that her near relative, Dutch Oven, was but another instance of the bad policy of breeding from a dam with a tendency to perpetuate her own physical defects. Dutch Oven was absent from exercise for many weeks, and when she once more began galloping the horse watchers reported that she "made a noise" so her Derby prospects were considered to be hopeless. A roarer may win over the comparatively flat Newmarket courses, as testified to by the successes of Prince Charlie and Lord Falmouth's Clairbert in the Two Thousand Guineas, but at Epsom the journey up hill at the start and again at the finish invariably stops a horse affected in his wind. Dutch Oven was so far recovered by April that her preparation for the Derby was proceeded with, and so well did she progress that her old followers rallied on her side and she started as fourth favorite at the short price of 10 to 1. In the race she was never dangerous and finished a long way behind the front rank. At Goodwood she was one of a field of six to start for the Sussex Stakes, and even money was wagered on her, but she was a bad third to two such indifferent performers as Comte Alfred and Battelfield.

At York meeting, held last month, Dutch Oven ran two races. The first was the Yorkshire Oaks of a mile and a quarter, and with only Actress and Confusion to run against her the Oven won with the greatest ease. This faint indica-

tion of her being able to race again was not good enough to induce anyone to accept the offer of 1,000 to 45 against her made after the race. Two days later she was started for the Great Yorkshire Stakes of a mile and three-quarters and as the four against her were very poor, St. Marguerite having become a rogue, Dutch Oven was made a favorite at six to four against her. She ran well for a mile and a half, and when the real racing began dropped back, and finished third, four lengths behind the winner, a colt named Peppermint, owned and ridden by John Osbourne. Before running in this race the wager of £1,000 to £50 had been accepted about Dutch Oven for the St. Leger, but after the race £1,000 to £10 was on offer, but no takers. It is no wonder therefore that for the St. Leger her chance should be considered a perfectly hopeless one. As she was ridden by Archer, who has a large following of speculators on his mounts, no matter what he is riding, her price of forty to one may be more strictly speaking recorded as the odds laid against the jockey than against the mare, who, if any other rider had been on her, would probably have been in the 100 to 1 division. In addition to the performances of Dutch Oven this year recited above she ran as follows last year:

Newmarket, July 5.—Third to Kermesse for July Stakes, T. Y. C.
Manchester, July 15.—Won the Great Lancashire Yearling Stakes, five furlongs.
Goodwood, July 26.—Won the Richmond Stakes, T. Y. C.
Goodwood, July 28.—Won Rous Memorial Stakes, T. Y. C.
York, August 24.—Second to Nellie for Prince of Wales Stakes, T. Y. C.
Derby, September 1.—Won the Champion Breeders' Foal Stakes, five furlongs.
Doncaster, September 13.—Second to Kermesse for the Champagne Stakes.
Newmarket, September 27.—Walked over for the Buckenham Stakes, T. Y. C.
Newmarket, September 19.—Won the Triennial Product Stakes, T. Y. C.
Newmarket, September 30.—Won the Rous Memorial Stakes, Rous course.
Newmarket, October 10.—Won the Clearwell Stakes, T. Y. C.

The Kingsclere fillies, who ran second and third, were thus spoken of in a recent issue of the *London Sportsman* in reviewing their prospects of success: "On the Doncaster St. Leger neither layers nor backers appear to have yet come to any decisive decision of importance as to whether Shotover or Geheimniss will turn out to be the more worthy of support. There is, however, one matter connected with these two fillies, one act that proves the thoroughly sportsmanlike and gentlemanly conduct on the part of the two noblemen who own them, and which speculators great and small on the turf will know how to appreciate. This is the declaration, that has undoubtedly emanated direct from the Kingsclere stable, to the effect that both the clippers of the season will run for the great race of the north quite independently of each other. We most of us know there was a general impression before the Derby that Geheimniss had beaten Shotover in a trial, but that story has been contradicted and reiterated with apparently such good grounds for the two opposite assertions that I am at a loss to say which is correct. Let this be as it may, it will be as well to remember that both Derby and Oaks winners take a lot of beating for the Doncaster St. Leger. Lord Clifden lost the Derby only by the hairs of his nose, and, with Macaroni out of the way, he took the St. Leger and beat Queen Bertha, winner of the Oaks, into second place. Then came Gladiateur, who had won the Derby and Two Thousand Guineas, and he beat Regalia, the heroine of the Oaks, into the same position. Achievement was second for the Oaks, and took the Doncaster event. Following this mare were Formosa, Hannah, Marie Stuart, Apology and Jannette, who all won the Oaks, and subsequently galloped in the footsteps of each other to victory on the Town Moor. It may be said that the Derby, as a rule, takes a lot more winning than the Oaks, but those mares I have named were exceptionally good animals, and the same remark applies to Shotover and Geheimniss. The latter was opposed by two fillies at Epsom that ranked in the first class as two-year-olds, and she beat them both very easily, St. Marguerite being two lengths in her rear and Nellie a bad third. It is, indeed, a very fine point between the pair of fillies at Kingsclere as to which will be the better of the two at Doncaster. As regards the style and symmetry of the two fillies there is a considerable difference. In fact, there is not another mare or horse in training made in a similar mould to Geheimniss—when taken as a whole. She is, however, remarkable for the excellence of the most essential points that are almost invariably seen in a racehorse of high class, while for size and length combined I do not think there is her superior in the whole of the entries. Her forelegs are certainly not perfect in shape, but they are strong in bone and sinew, and not only stood firm through her two-year-old career but carried her well in her preparation for the Oaks and down the hill with the tremendous impetus of her great speed and strain upon them in the descent from Tattenham Corner.

Shotover would be faultless in her formation if she had a little more power in her loins, but horsemen are well aware that this deficiency is more common with the feminine than the masculine gender in the equine race. Her action may be truthfully described as the "poetry of motion" and her symmetry, with the exception of the slight defect to which I have referred, is as true as if dame Nature had designed it as a prize model. Her legs and feet are strong and very well formed, while for blood-like style and general beauty of outline she has few equals and no superiors now in training. To see Tom Cannon ride Shotover in her races is both a treat and a study for a really practical horseman. How she was beaten by St. Marguerite for the One Thousand Guineas is, however, something of a mystery to me; particularly as the winner has performed in a moderate fashion on three other occasions, before and since the race—at the Craven, Epsom and Ascot meetings. Shotover was, however, defeated by only a neck for the One Thousand, and the probability is that, like others of the Newminster family, she requires more time to get fairly on her legs again than was allowed her after her severe race for the Two Thousand Guineas, and her effort against perfectly fresh opponents in the sister race, only forty-eight hours afterward, on Friday.

The Racing of Two-Year-Olds.

That ably-conducted journal, the *London Field*, in its issue of August 19, has a leading editorial in which it gives currency to a rumor to the effect that Lord Falmouth has intimated an intention to run no more colts or fillies for two-year-old engagements, and proceeds to make this the text of a violent attack upon two-year-old racing. Were it not that the *Field* has for a long time past been an avowed opponent of the racing of two-year-olds, we would feel tempted to pass its latest effusion as one of those periodical aberrations into which sporting writers often fall, and in Cassandra-like tones announce that a black cloud is hanging over the turf, threatening its destruction. The evils of two-year-old racing have been preached for the last fifty years, and the arguments urged against the practice are familiar to all. Yet during the period no institution has attained greater growth.

In England its increase has been remarkable, and here no less so. Fifteen years ago the two-year-old races in the United States could almost be counted on the fingers; at present they are part of each day's programme. Not this alone, but the entries to the stakes exclusively for two-year-olds outnumber any other; the fields are larger, and more speculation is indulged over these events than any other species of contest.

We are not among those who would allow the abuse of a practice to compel us to call for its abolition. We are free to confess that we believe the strain put upon two-year-olds is getting to be greater than the average colt or filly can bear, and that within the past few seasons more than one promising youngster has been lost to the turf from a greediness on the part of its owner to gather the fruit ere it was ripe. But to make these cases the basis of a crusade against the racing of two-year-olds would be to act against the best interests of the turf and the improvement of the qualities of the blood-horse to which the turf is supposed to owe its existence. The rumored intention of Lord Falmouth to abandon the racing of two-year-olds is characteristic of the extremist. The loudest-mouthed apostle of temperance is usually a reformed drunkard, and if there is one man who has, by the force of example, done more than another to encourage the racing of two-year-olds in England that man is Lord Falmouth. No one has less reason to complain of the results. His brilliant two-year-olds have usually trained on; the Derby, Oaks, the Guineas and St. Leger glories have been all his, and for a decade past his name has been in the front rank of the winning owners. The *Field* seems to labor under the belief that the racing of two-year-olds is prejudicial to a colt's chances for the Derby, and quotes the effete practice of the gouty Dukes of Grafton, who were gathered to their fathers fifty years ago, and further supports its theory by observing that, of the seven Derby winners trained by Robert Robson, not one had ever been stripped in public until three years old. This is all very well, but in opposition to this it may be remarked that of the forty-two Derby winners since 1840, only four were non-performers at two years old. The story of Thormanby is often quoted, and may be again, as it is an all-powerful argument, showing what a race-horse is capable of doing.

He began as a two-year-old on the 30th of March, and ran fourteen races, winning nine; and not only won the Derby and many other races the following year, but was a better horse at four years old than he was at two, and was only beaten once, and then in the Goodwood Cup, in which he conceded 14 lbs to the winner, a six-year-old, and set the seal to his racing glory by winning the Gold Cup at Ascot. The famous Blink Bonny ran eleven times as a two-year-old; yet she won the Derby and Oaks at three, and lived to throw a Derby winner in Blair Athol, who did not run as a two-year-old, but whose stock had a sad tendency to softness. Blink Bonny's distinguished relative, Caller On, ran twelve times at two years old; yet she not only won the St. Ledger at three, but ran eighty-six races at three, four, five and six years old, all at long distances, most of them being Queen's Plates and Cups, at two, three and four miles. Indeed, it would be hard to name a half-dozen really first-class English horses which have appeared within the past forty years but which have raced in their two-year-old form. Voltigeur, The Flying Dutchman, Teddington, Kingston, Stockwell, West Australian, and Rataplan, of the great era between 1850 and 1855, all appeared as two-year-olds, and afterward gained the highest distinction as stayers, and are to this day the pride and boast of England. Of the later era, Thormanby, Gladiateur, Cremorne, Blue Gown, Fille de l'Air, Sterling, Petrarch, Isonomy, Bend Or, and Robert the Devil, all ran as two-year-olds, and their after career is too recent to recapitulate. Iroquois and Foxhall both ran at two years old, the former appearing twelve times. Fisherman did not start at two years old, because his conformation was so bad and his frame so loose that he could not be trained. Blair Athol did not, because he was too big; Favonius did not for reasons unknown. Doucaster was trained as a two-year-old, when he was known as All Heart and No Peel, and would certainly have raced, as Mr. Merry, his owner, was not sparing of his two-year-olds, but in the July of his two-year-old season he was so badly kicked as to compel his being stopped.

Although two-year-old racing is of comparatively recent growth on our turf, its history repeats that of England. Kentucky raced at two years old, so did Henry Bassett, Enquirer, Kingfisher, Aristides, Joe Daniels, Springbok, Ten Broeck and King Alfonso. So did Parole, who made a hard campaign at that age and was the best of the year, yet Parole, in his tenth year, is still upon the turf, beating some of the best. But then some of the wisacres have refused to admit Parole to a place among the anointed, and deny that he was ever a first-class horse. For our part we consider that he was quite first-class in the ordinary acceptance of the term. He was the best horse in the country when he left it for England, in 1879, and carried his triumphal march into England. If he is not first-class, he has at least the credit of having beaten more first-class ones than any horse that has ever appeared upon the turf. Duke of Magenta, Bramble, Spendthrift, Monitor, Thora, Luke Blackburn, Hiudoo, Glidelia, Bend Or, Chickmore, and Harold, all ran at two years old, and unless it be Eole and Glenmore, it will be difficult to name a horse of any note of the present day, in this country, but raced at that age.

For our part, we consider racing at two years old as a necessity to the development of higher powers in the race-horse. The experience of practical men has demonstrated to them that a colt untrained at that age is not only unmanageable after, but has a tendency to grow soft and never develop the speed of one handled early. Moreover, in the present day an economic spirit prevails. Racing is an expensive amusement, and the owner who chooses to let his two-year-olds remain idle eating their heads off will find little reward for his forbearance. Two-year-old racing is, no doubt, carried to excess, but to abolish it would be a serious blow to the turf, and an obstacle to the improvement of the blood-horse.—*N. Y. Spirit of the Times*.

The Embryo.

EDITOR BREEDER AND SPORTSMAN: Again I am in receipt of your valuable paper. Again I look in vain for some information in regard to the Embryo Stakes to be trotted this year.

It would be a matter of great interest to nearly every trotting horseman and breeder in the State to know who have paid up, the day of the trot, and where the trot will take place.

As I understand it Messrs. Harris and Simpson are the managers or should be, for they are the parties that got up this stake, received entries, forfeits, etc., and they should now give us the information that all who have entered, at least, are anxious and have a right to expect. If this stake is to be a success it will require more than the first advertisement for entries. It will be necessary for those who have taken the first steps in the matter to see its full carrying out

to the end and to see that the miles are complied with and that those who do not pay forfeits or declare out and pay are suspended until they do pay. Last year's Embryo is still unsettled. Some paid, some did not, and no one to look after it.
L. J. ROSE, Sunny Slope.

Weights of the P. C. B. H. A.

Appended is the scale of weights adopted by the Pacific Coast Blood Horse Association, at the annual meeting in November, 1881. Until further notice these weights will be required in all races run under the direction of the Association except those stakes that closed before the date of their adoption. The scale is the same as that of the American jockey club:

TWO-YEAR-OLDS.							
Distances	May.	June.	July.	Aug.	Sept.	Oct.	Nov.
Half-mile	86	82	85	80	92	95	
1 mile	76	77	80	84	87	90	
One mile	75	77	81	83	
One mile and a half	75	78	
Two miles	75	

THREE-YEAR-OLDS.							
Distances	May.	June.	July.	Aug.	Sept.	Oct.	Nov.
Half-mile	106	107	109	111	112	113	
1 mile	106	107	109	111	112	113	
One mile	102	103	105	107	108	109	
One mile and a half	100	101	103	105	106	107	
Two miles	98	99	101	103	104	105	
2 1/2 miles	97	98	100	102	103	104	
Three miles	96	97	99	101	102	103	
Four miles	95	96	98	100	101	102	

FOUR-YEAR-OLDS.
Four-year-olds, at all distances, from the beginning of the season in May, to close of November, carry 118 lbs.

FIVE-YEAR-OLDS.							
Distances	May.	June.	July.	Aug.	Sept.	Oct.	Nov.
Half-mile	120	120	118	118	118	118	
1 mile	120	120	120	118	118	118	
One mile	122	122	120	120	118	118	
One mile and a half	123	122	121	120	120	120	
Two miles	124	123	122	121	120	120	
2 1/2 miles	125	124	123	122	121	120	
Three miles	126	125	124	123	122	121	
Four miles	127	126	125	124	123	122	

SIX YEARS AND AHEAD.							
Distances	May.	June.	July.	Aug.	Sept.	Oct.	Nov.
Half-mile	120	120	118	118	118	118	
1 mile	120	120	120	118	118	118	
One mile	122	122	120	120	118	118	
One mile and a half	124	123	122	121	120	120	
Two miles	125	124	123	122	121	120	
2 1/2 miles	126	125	124	123	122	121	
Three miles	127	126	125	124	123	122	
Four miles	128	127	126	125	124	123	

In races of intermediate lengths the weights for the shorter distance are to be carried.

In races exclusively for three-year-olds or four-year-olds, the weight shall be 118 lbs; and in races exclusively for two-year-olds, the weight shall be 110 lbs.

Except in handicaps, and in races where the weights are fixed absolutely in the articles, fillies two years old and geldings of all ages shall be allowed 3 lbs., and mares three years old and upward, shall be allowed 5 lbs. before September 1, and three pounds afterwards.

Welter weights shall be 25 lbs. added to weight for age, and in the absence of conditions, shall be the weights for steeplechases and hurdle races.

No horse shall carry less than 75 lbs. in any purse or sweepstakes.

"Next to Ex-Governor Stanford of California, Governor Gosper of Prescott, Arizona, is the largest owner of horses on the Pacific Coast."

The above paragraph which is now going the rounds of the press, is probably incorrect. It undoubtedly means well-bred animals and without being informed of the number of Governor Gosper's horses, we are under the impression that J. B. Haggin's stud contains the most. At the Rancho Del Paso are over 200 horses, a large majority of them of fine breeding.

SPEED PREMIUMS.—At the Stockton fair last week H. T. Dorrance offered a special premium of a \$25 saddle to the horse owned in the district who made the fastest running mile during the meeting, and a set of track harness valued at \$65 to the district horse that made the fastest trotting record. The saddle was awarded to Sam Stevison, who won the first heat of the mile and repeat race of Tuesday in 1:45. The harness fell to L. U. Shippee's bay colt by Inauguration, who scored a fourth heat in 2:40.

MAUBRINO WILKES PRIZES.—Mr. Irving Ayres, owner of Maubrino Wilkes, offered two prizes at the Stockton fair for the best two-year-old colts sired by his horse. Eight competed for the first prize, a handsome silver tea set, which was given C. F. Perkins for the bay gelding Josh Whitcomb, dam by to Chieftain; and the second, a silver pitcher, to J. W. Warren, for the brown stallion Alpheus, dam by Major Mono.

Dutch Oven, the St. Leger winner, scored another victory last Monday in the fourth Great Foal Stakes at Newmarket. Shrewsbury and Nellie ran a dead heat for second place. There were seven starters, including Gerald.

The first number of the *BREEDER AND SPORTSMAN*, published in San Francisco, reached our sanctum a few days ago. It is a very handsome journal, devoted to field sports in general. The illustration of Electioneer on the title page is an artistic effort far above those seen ordinarily in sporting papers. Joseph Cairn Simpson is the editor, and judging from his leading articles, he is the right man in the right place. We will always welcome the *BREEDER AND SPORTSMAN* with pleasure, and read the accounts of that wonderful country where it is published.—*Southern Industries, Nashville, Tenn.*

THE BREEDER AND SPORTSMAN is the name of a new weekly paper, conducted by Jos. Cairn Simpson, and published at San Francisco, Cal., at five dollars per annum. The first copy is at hand. For beauty of typography, extent and variety of matter, and general make up, it is unexcelled by its contemporaries. Mr. Simpson is author of a popular book called "Horse Portraiture," and for more than a quarter of a century has been a popular writer on horse and sporting matters. He is admirably qualified to conduct such an enterprise, and the breeders of the Pacific Coast are to be congratulated upon having so able and gifted a champion of their interests.—*St. Louis Rural World*.

ROWING.

Mr. Brennan's Challenge.

ED. BREEDER AND SPORTSMAN: In answer to what appears to be a challenge from Jas. E. Brennan to match P. J. Brennan against my son for \$1,000 a side I desire to say that I have twice waited upon Mr. Brennan in this matter without getting any satisfactory or definite answer and do not propose to waste further time or trouble with it. Mr. Brennan knows where I can be found and if he means business I invite him to call. My money is ready. J. D. GRIFFIN, 239 Steuart street, City.

THE LONG BRIDGE OARSMEN.—There are three crews in training for the race on Thanksgiving Day for the cup offered by the BREEDER AND SPORTSMAN. The Golden Gate Club has purchased a wooden shell from the defunct St. George Rowing Club of Oakland. On Sunday the practice of the Pioneer crew and the Golden Gate crew was watched with interest by a number of spectators on Long Bridge. The water was in good condition for the display of form. The Pioneer crew had at the stroke a newly-arrived English oarsman who is said by some to be John Lorgan, the Thames sculler. This, however, is hardly probable, as according to English exchanges Lorgan sailed from Liverpool for Australia some time ago, taking with him his boats and trainer, intending to take part in the Punch regatta at Sydney. The new arrival is a strapping fellow and rowed in good form, but his style did not amaze nor discourage the local oarsmen. The Golden Gate crew appeared upon the water soon after the Pioneer crew and made a very favorable impression. Although unused to their boat, the Golden Gate four showed a fine pace and pulled with a vigor that gave promise of their ability to stay a three-mile course after they have had a few weeks' practice. On the showing made on Sunday the Golden Gate Club should win, unless their boat proves far inferior to the paper shells which the Pioneer and Ariel crews will row. It is not likely that the Golden Gate crew will be handicapped in that respect, however, for the St. George crew could always make better time in their old wooden shell than in their new paper boat. While practicing for the McKinley cup the St. Georges in their old boat rowed a two-mile trial faster by sixteen seconds than a trial in the paper boat under similar conditions of tide and weather.

UNFAIR CRITICISM.—There are few professional athletes who have been as roughly and unfairly treated by the sporting press as Hanlan. To judge by the cards and challenges and the criticisms aimed at the unfortunate Toronto oarsman one would think that he is a craven-hearted individual, who has to be forced by abuse into displaying his powers. Whenever he hesitates for a day to accept a challenge which possesses no pecuniary profit to him, the champion of the world hears on all sides denunciations of his lack of spirit if not of actual cowardice. Now the fact is that if ever there was an athlete who was entitled to the most courteous consideration that athlete is the Toronto oarsman. He has in rapid succession met the best men of the world and in some thirty-four or five match races rowed to win and never once lowered his colors. He has crossed the ocean several times to meet the champions of England and Australia, while he might dodge behind some good excuse and decline to risk his reputation by encountering such formidable adversaries. While well and unhampered by business cares, he has always been ready to row any man in the world, and it is therefore rather a small proceeding to denounce him at this late day as a weak-minded specimen because after rising from a sickbed he declines to match himself against some of the best men in the world. Taking advantage of Hanlan's sickness Ross has claimed the championship of the world, but there is no credit in the title acquired in such a way and its possession will be all the more unfortunate for Ross when he meets the real champion fit and well.

KENNEDY CHALLENGES HANLAN.—John A. Kennedy of Portland having failed to get a match with Courtney has published the following card in the *Boston Herald*:

"To the Editor of the Herald: Having seen the challenge of Edward Hanlan addressed to Courtney, Ross or Lee, to row a three-mile race for \$2,500 a side on any course between Boston and Washington some time within two months, and the same having failed of acceptance, I hereby offer to row Edward Hanlan a race, under the conditions he has named, at Boston, Silver Lake, Greenwood Lake, Philadelphia or Washington, as mutually agreed upon. This proposition to remain open for ten days, and, in case of non-acceptance, to be open to any sculler in the world. As an earnest of intention I inclose draft for \$1,000.

"I have until now refrained from addressing any challenge to Mr. Hanlan on account of his published statement that he would not row a race this season; but, as he has recently publicly offered to match himself to row this year, I offer him the opportunity others have declined.

"Portland, Maine, Sept. 15."

"JOHN A. KENNEDY."

Kennedy is regarded by several professional scullers who have practiced in the same course with him a very speedy oarsman. After Courtney had made his fast time with Lee at Richfield Springs, Kennedy challenged him to a three-mile race and deposited \$1,000 to back the race. His challenge has gone unaccepted, and as Kennedy, as well as Davis, contemplates abandoning boat racing, he has determined to have, if possible, one good race with a first-class man before he retires from boating, and to show his friends what he is capable of accomplishing in a single-scull shell. He seeks royal game, and enters the field of first-class oarsmen to row the man who won the championship of America, England and the world, and attained higher distinction than any other oarsman ever aspired to.

THE HALIFAX REGATTA.—Two days of very good racing took place on Belford Basin, September 6th and 7th. The first event of the day was the three-mile race for four-oared lapstreak gigs. The entries were: Griswold crew of Halifax, Riley-Ferguson crew of Halifax, Morash crew of Lunenburg, Ross-Foley crew of Halifax, West End crew of Boston, Williams crew of Halifax, and Enterprise crew of Salem, Mass. The Boston four showed a little gain at the start, and pulling strong and well, they soon showed a length in advance. The Boston boat made the turn first, two lengths ahead, and was followed by the Williams and the Griswold crews. On the homestretch the Boston men continued to gain, but there was a good race between the Williams and Griswold crews for second place. Williams' crew proved too much for the Griswolds and came in second, about four lengths in rear of the West End men, followed close by the Griswolds. The Williams crew protested against the West End crew receiving first place on the ground of turning the stake boat contrary to the rules. The time made by the

leading boat was 20m. 18½s., and that by the second 20m. 37s. The race in double sculls—Hamm and Conley, being the only competitors, went over the course alone and obtained the prize. The distance was three miles, and the time made 20m. 48½s. On the row-off of the four-oared race the Boston crew again won. Time, 24m. 30s.

Three-mile race, single sculls—Entries: Hosmer of Boston, Lee of New York, Conley of Halifax, McInerney and Driscoll of Lowell, Mass., Hamm and Smith of Halifax, and Plaisted of Boston. Lee and Plaisted did not appear. Hamm almost immediately took the lead, and passed the first mile a length and a half ahead of Smith and Hosmer, who were close together. At the mile and a half Hosmer had gained on Smith, with Conley a good fourth, and the other two some distance behind. Turning the buoy one of Hamm's rowlocks got out of order, and he had to stop. The delay, though brief, enabled Hosmer to get a slight lead. Smith and Conley were following him, with Hamm fourth. Conley soon caught and passed Smith, and settled down to catch Hosmer, which he did before the end of the second mile. Hosmer put on a spurt, and a beautiful race between them took place, the Bostonian holding half a length's advantage. The lead was soon taken and maintained by Conley, while Smith by this time was considerably behind Hosmer. Conley finished first in 21m. 46s., four lengths ahead of Hosmer, who was followed close by Hamm, Smith fourth, Driscoll and McInerney far in the rear.

Consolation race—Driscoll 1, McInerney 2.

BOATING AT NORTH BEACH.—On Sunday last the Triton Boat Club entertained a number of visitors. Several scratch races enlivened the afternoon. The first race was between two crews from the Triton Club in the barges Argonaut and Lady Washington, the prizes being a gold badge for each member of the crew. The Argonaut crew was composed of Val Kehrlein Jr., Charles Rudolph, B. Kehrlein, Jos. Kehrlein and A. R. Tuckey, and the Lady Washington was manned by E. Borremans, A. L. Schuppert, Harry Tuckey, James Haughey and B. Tuckey. The course chosen was from the Triton club-house to and around Alcatraz Island and back to the club house. The Argonaut crew led their opponents all the way round the course, finishing four lengths in the lead. Time, 28:56.

A wherry race between E. Borremans and Harry Tuckey from the Triton boat-house to Meiggs' wharf and return was won by Borremans.

A scratch race followed between the following named crews: J. D. Griffin, Otto Rudolph, James Haughey and Ed. Peterson rowing the Lady Washington, H. Dobbin, W. Dunn, B. Kehrlein and B. Tuckey rowing the Arion, Dan Griffin, Jos. Kehrlein, A. P. Rothkopf and F. Fraser in the Argonaut, and a crew in the barge Governor Perkins, consisting of J. Lamb, J. Flinn, Aug. Schuppert, H. Tuckey. The course was from the Triton boat house to a point of Meiggs' wharf, thence around a schooner anchored out in the stream and back to the club house. The race was won by the crew in the Lady Washington, Gov. Perkins second, Argonaut third, Arion fourth.

A scratch race then took place between the crews of the barges Argonaut, Gov. Perkins and Arion. The Argonaut crew was composed of Ad. Schuppert, J. Wilser, T. Watson, W. Smith; the Gov. Perkins' crew of A. R. Tuckey, C. Rudolph, P. G. McVeigh, E. Gerlach, and barge Arion, J. Clark, W. J. Farron, A. Klump, B. Kehrlein, and E. Borremans. The course was the same as in the preceding race, and the race was won by the Argonaut crew; Perkins crew second, Arion crew third.

The last event of the day was between the barges Argonaut and Perkins; the Perkins crew being J. D. Griffin, J. Lamb, B. Kehrlein, J. Haughey. The Argonaut crew was composed of Jim Brown, J. Keegan, P. Keegan and Ed. Peterson. The race was won by the Perkins crew.

ERRORS IN TIMING.—Nothing could be more unreliable than time as a test of the merits of oarsmen. Judging by the time made at Richfield Springs by Courtney, that sculler should be able to beat any man in the world, but there is strong proof that he cannot beat some men in the second class. The authorities have not yet accepted his wonderful record as correct. The *Boston Herald* of the 17th inst. has the following reference to it:

"The time for the three miles rowed at Lake Maranocot last Wednesday when Riley and Kennedy rowed their race was incorrect. Kennedy reached the turning stake in 9 minutes and 40 seconds from the time of starting, and was 17 seconds ahead of Riley. He gained 3 seconds more on Riley going back, and made the entire distance in 20 m. 35s., Riley's time being 20m. 53½s. The timekeeper made a mistake of one minute in calculation, just as the timekeeper in the Courtney-Lee race at Richfield Springs is thought by many oarsmen to have done.

LAYCOCK'S AMBITION.—Jack Lorgan, who some months ago beat Laycock and Pearce on the Thames, has written to some friends in this city that Laycock will come to commence next spring and try conclusions with the best oarsmen in this country. Lorgan states that the improvement in Laycock's style is wonderful. When Laycock first appeared on the Thames he rowed in the same bad form as Trickett. The art of the sliding reef was unknown to him and he used sculls that lapped about a foot. After seeing the rig of the American boats the burly Australian reconstructed his style of rowing and he now uses the regulation short sculls with wide blades and a slide twenty-six inches long. Lorgan thinks that the Australian's pace has improved wonderfully and that he ought to be able to give Hanlan a close rub and to beat Ross or Courtney.

THE WORLD'S CHAMPIONSHIP.—Hanlan, Courtney and Kennedy met at Portland, Maine, on Tuesday last, and after a lengthy discussion decided to postpone their race till June, 1883. The stake money will be put up three weeks in advance of the races. The date of the races is to be named six weeks previous, and the date is to be mutually agreed upon. Three weeks must intervene between the race between Hanlan and Ross and that between Hanlan and Kennedy.

SCULLING IN ENGLAND.—The race for the amateur championship of England and the Wingfield diamond sculls was rowed for over Putney Mortlake (River Thames) course on the 21st ult. The contestants were Willoughby Grove, of the London Rowing Club, and Alexander Payne, of the Mousley Boat Club. Payne won in 27m. 35s, Grove's time being 28m 1s.

MATCH AT SHUFFLE BOARD.—A match game of shuffle board for \$250 a side by Wm. Ryan and Arthur Quinn against John Farrelly and Samuel Costello takes place at Farrelly & Mitchell's saloon, 435 California street, between the hours of 12 and 4 o'clock P. M. Saturday.

THE PADDOCK.

The Dangu Sale.

Another thoroughbred from France is coming to America and according to all the "experts" he will be a valuable addition to the blood stock of the country. Still it is a singular location for a thoroughbred which has cost nearly \$40,000 to be sent to Erie, Pennsylvania, though Mr. Scott may think that if Erdenhiem has been such a great success as a breeding farm, turning out Parole, Iroquois and many other top-sawyers in the southeastern portion of the State, the north-west may be equally as fortunate.

The cable of the 8th announces that W. L. Scott, of Erie, Pa., had purchased, at the sale of the Dangu Stud, in France, the celebrated French race-horse Rayon D'Or. The reported price is \$30,000, the sale being made by Mr. Easton, of the American Horse Exchange, and if breeding and performances are elements of success in a stallion, and we think they are, Mr. Scott has one which quite fills the bill. Rayon D'Or is a son of the French horse Flageolet, who won the Criterion Stakes and Goodwood Cup. Flageolet was a son of Plutus, who was by Trumpeter, and from a daughter of Planet (son of Bay Middleton and a sister to Plenipotentiary), granddam Alice Bray, by Venison, great granddam Darkness, by Glencoe. Flageolet's dam was La Favorite, by Monarque; second dam Constance, by Gladiator; third dam Lanterne, by Hercule. The dam of Rayon D'Or is Araucaria, by Ambrose (son of Touchstone and Annette, by Priam), from the famous Pocahontas, by Glencoe. It will be seen that Rayon D'Or has the double cross of Glencoe, which breeders now consider the key-stone to success in this country, and as it is backed by foreign strains, breeders on this side of the water need not fear mating double Glencoe mares to him. He has also the double cross of Touchstone, through Trumpeter and Ambrose, and these, with his crosses of Venison, Priam, Monarque, and Gladiator, form a very happy combination of blood.

Rayon D'Or was bred at the Dangu Stud in 1876. As a two-year-old he ran eleven races, winning four of them, viz.: The Levant, a sweepstakes at Doncaster, in which he beat Charibert, the after winner of the Two Thousand, the Clearwell, and the Glasgow. As a three-year-old Rayon D'Or ran twelve times, winning seven. His victories were the St. James Palace Stakes, beating Charibert, Ruperra, The Scot and three others. At Goodwood he won the Sussex Stakes, at Doncaster the St. Leger, in which he defeated a field of sixteen. The French colt won by five lengths pulling double. So sound and true were his legs that he never wore bandages until a fortnight ago, and then after some grit had worked under his boot and slightly grazed one of his legs as observed by a commissioner of the *Sporting Life*, who says: "When Araucaria's son was stripped on Doncaster Moor, even those who looked him over at Goodwood, prior to his cutting down Ruperra and others for the Sussex Stakes, will be forcibly struck by the improvement which Tom Jennings has wrought in the big chestnut, who has grown out and developed in muscle to the most extraordinary degree; in fact, if he goes on furnishing thus until next summer, he will be noted a magnificent colt, even by his numerous deciders." * * * Rayon D'Or's change, for the better, is most marked; in fact, it would puzzle me to recall to mind any three-year-old who has trained on so well and so rapidly." The next day Rayon D'Or walked over for the Zetland Stakes. At Newmarket, in October, he won the Great Foal Stakes. At the same meeting he was beaten three-quarters of a length by Bay Archie, to whom he conceded seven pounds, for the Newmarket St. Leger. He then won the Select stakes, beating a field of seven, pulling double by six lengths, and followed it up, winning the Second Great Challenge stakes, in which he gave away three years to our Parole, but closed the season by being beaten by Out of Bounds, to whom he conceded sixteen pounds in a handicap.

At four years old Rayon D'Or started six times, winning the Prix du Cadran (2½ miles), and the Prix Rainbow (3¼ miles), at Paris. He then walked over for the Port Stakes, at Newmarket, and the Prince of Wales Stakes, same place. At Ascot he won the Rous Memorial, with 132 lbs. up, and was beaten for the Hardwicke Stakes by Exeter, to whom he conceded 10 lbs. He ran no more, but from the above it will be seen that his performances were of a high class. He carried the highest weights over long distances, and possessed the speed to do so successfully; thus he cannot be denied the lasting qualities which many of our old foggy turfmen are prone to deny to imported horses. There can be no mistake that the French have never ceased to pay a proper attention to the development of stamina, and on his sire's side Rayon D'Or is French bred for upward of four generations, dating back to the earliest French ventures in blood stock.

At the time of his St. Leger victory, the English writers described him as a chestnut, standing 16 hands, and the longest horse that stripped for that race. His best points are said to be his immense length, superbly placed shoulders, wide hips, and good legs. His defects are stated to be a weak neck, narrow chest, and light flank. As a youngster he was also held to be wanting in muscular development of the quarters, but time has remedied that. As yet, it is not known when the horse will arrive here, but all students of the Stud-book and Racing Calendar cannot but feel that he is a valuable acquisition to our racing blood.—*New York Spirit of the Times*.

THE LORILLARD STABLE IN ENGLAND.—Mr. P. Lorillard has engaged Barrett, formerly of the Michel Grove stables, to train his horses at Newmarket. The *Manchester Sporting Chronicle*, while negotiations were in progress for a new trainer, reported as follows: "There is a rumor that Tom Cannon will shortly take the responsibility of Mr. Lorillard's horses in training, Pincus having gone to America. It almost approaches a certainty that the popular jockey trainer has been asked to train them. There is nothing new in the fact that stables which in one year have carried all before should do little or no good the next, but Mr. Lorillard has certainly had bad times this season with Gerald and others. The greatest blow, however, must naturally arise from the fact that Wallenstein and Passaic—two cast-offs of the stable—have this year carried off so many valuable turf prizes, showing either a lack of judgment on the part of those interested, or giving another instance as to how much the vulgar commodity called luck influences the too-too-utterly fascinating pastime of racing.

SOLD.—Gracie Mahon, the bay filly by Modoc, dam by Norfolk, who ran fourth for the purse for two-year-olds at Stockton on Wednesday of last week, was sold the same day by her owner, Jas. F. Mahon, to Edward Fay of this city. Price \$250.

THE Breeder and Sportsman.

PUBLISHED WEEKLY BY THE
BREEDER AND SPORTSMAN PUBLISHING CO.

THE TURF AND SPORTING AUTHORITY OF THE
PACIFIC COAST.

OFFICE, 508 MONTGOMERY STREET
P. O. Box 1338.

Five dollars a year; three dollars for six months; one dollar and a half for three months. Strictly in advance.

MAKE ALL CHECKS, MONEY ORDERS, ETC., PAYABLE TO ORDER OF BREEDER AND SPORTSMAN PUBLISHING CO.

Money should be sent by postal order, draft or by registered letter, addressed to the "Breeder and Sportsman Publishing Company, San Francisco, Cal."

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

JOSEPH CAIRN SIMPSON, - - - EDITOR

San Francisco, Saturday, Sept. 30, 1882.

ENFORCE THE RULES.

We do not consider it necessary to offer apologies for repeating appeals to the judges of races to enforce the rules. As guardians of the sports of the turf and track, they must be inflexible in carrying out the provisions of the code, and punish with inexorable firmness the infractions which bring racing and trotting into discredit. The continued prosperity depends on the elimination of fraudulent practices, and the magnitude of the interests at stake demands the correction of evils which are now partially condoned. If owners, jockeys and drivers do not follow the proper course they must be compelled to, or be otherwise banished from all participation.

We learn of two things at the late Stockton Fair that deserve severe censure, and which, unfortunately, were not properly dealt with. The fault does not rest so much with the judges of the races in which the violations of the rules took place, as in a lax and prevailing habit of measuring the evil by the results which follow. This practice has emboldened drivers to take risks which they would have avoided if punishment was sure to follow whether the result of the heat or race was changed or not.

One of the wrongs alluded to was of a peculiar character, and it is claimed that it was done in order to give a chance for second money, and if so the object was effected. The history of the heat, as given to us, was that Starr King was in the lead, beating Director by a short head, without an effort being made by the driver of Director to win the heat. Eehora won the first heat meritoriously, and hence any horse which beat her for second money, (unless she was distanced,) would have to win a heat.

Now the only valid excuse which a driver trying to win can offer for not trying to win a heat, is when such a course increases his chances of victory. To favor another horse, to influence the betting, or, in fact, anything which lessens the chances to win is, contrary to, all sound principles of honor and honesty, as well as being contrary to trotting law. In a case where it is palpable that the object was to unduly favor any one of the contestants, the judges if leniently inclined ought to fine the erring driver to the full extent of the law; if they are guided by a consideration for the future welfare of the sport any fine they could impose would not be commensurate, and suspension or expulsion should be the award. There must be no dallying with crimes of this character, no waiting to see how the race will end before inflicting the penalty. The wrong done to the person who had fairly earned the second money was small in comparison with the example which was set. We all know the vicious effects of bad precedents, and the proneness of people to excuse misconduct on the plea that others had done so without rebuke.

The other violation of the rules reported was the foul driving of Starr King in order to try and defeat Romero, and for which he was fined \$25. It should have been four times that amount if a fine was imposed, but fines will not prove a remedy for this kind of work when large amounts are at stake. And yet we consider the deliberately throwing away a heat a worse crime than when a man commits a foul in his anxiety to win. If the foul is done to "help" some one else there is no excuse and condign punishment should invariably follow. If either is done by men who are prominent in the profession, the more necessity for strict ruling, and the justice which is invoked to lash the inferior while the upper goes scot free is a temporizing folly, to call it no worse name. The higher the position the greater the amenability to law, and the more beneficial the example.

THE FAIR OF THE SAN JOAQUIN.

There are good reports from this popular exhibition, and all who attended speak in the highest terms of the gener-

al management and especially of the capital sport which was given. The only exceptions are in regard to the circumstances mentioned in another article and the greatest share of the blame rightfully falls on the offending drivers. There was a series of notable performances.

The yearling filly, sister to Honesty, by trotting in 3:03 takes the foremost rank for one of her age actually competing in a race with colts of her age. Her sire, Priam, will deservedly rank high as a getter of trotters, and as he is by Whipple's Hambletonian, his dam Revere by imported Glencoe, a thoroughbred mare, his breeding is of a kind that will warrant excellence in the stud. There is another colt by him from Gilroy Belle by Lodi which is highly spoken of, and though Honesty was rather out-classed in those he met in this year's circuit, he is a grand colt and sure to make his mark in the future. Elsewhere Albert W receive the commendation he is fully entitled to, and again we repeat that his race with the fast mares Nellie R and Sweetness is the best four-year-old performance ever recorded. We are informed that before the season of 1882 is ended there will be an effort to subtract the three seconds which Jay Eyre See leads him, and if he should it will be a feat well worthy of the foremost place. But it is a tremendous task which the wonderful gelding has given him, and it is asking too much for an entire colt to accomplish. It was a great pity that Brigadier met with the mishap, as there is no question from all we can learn that he was a better horse than ever before, and to beat him Romero would have knocked every heat low in the teens. A gentleman who informs us, and a close observer too, that the back quarter was trotted in 32 seconds, and that the blood was actually exuding through the sole of his feet. This paring and cutting down the sole of the foot to such a thinness is one of the worst things that can be done. As it was Romero displayed wonderful speed when he had scarcely been trained for sometime before he trotted at Sacramento and according to those who were cognizant of the situation he was in, not yet recovered from the pinkeye, it was certainly a wonderful performance. Should he completely recover from the epizooty there is little question that he can make a mark that will place him in the front rank of five-year-olds. Vanderlynn in trotting in 2:22 is worthily entitled to a good place, and so is Nellie R and the two-year-olds did well, so that there was scarcely a race which was not good. Corette has gained renown, and astonished nearly every one by her fast work after so little training. Her 2:17 was made so easily that it was evident she could have gone still faster if it had been necessary. If nothing happens her she will have to go East, as the side-wheelers of this coast are not capable of contending against her.

Taken together the San Joaquin fair has been the best that was ever held. The time of the various contests has been good and the exhibition classes were superior. The president, directors, all of the officers of the association have labored intelligently and assiduously, and the result has been a success in every respect. We are much pleased to record the great event which took place, and very sorry that business compelled us to labor at home in place of attending the circuit.

THE P. C. B. H. A. FALL MEETING.

In another column will be found the advertisement of the fall meeting of the above association, and in the "turf and track" department the nominations in the stakes that are to be decided at this meeting. There could not be a better showing for a successful meeting. In the Ladies' Stake for two-year-old fillies are twenty nominations, and in the Finigan Stake for all two-year-olds are twenty-nine. In the Vestal Stake for three-year-old fillies are twelve nominations, and in the Fame Stake for all three-year-olds are eighteen. In the Baldwin, a post stake for all ages, a dash of four miles, are six subscribers, and the programme which will close on the 10th of October completes the bill. The time fixed, November 11th, 18th and 23d, will give the horses plenty of time to recover from the running during the fairs, and also for the California colts in the East to recuperate from the effects of the journey. The stakes and purses which are yet open and will close on the 10th proximo are well arranged and soon after the closing the course will be selected where the races will be run, and all the other arrangements completed.

By referring to the nominations in the stakes that closed the 1st of August, 1880 and 1881, it will be seen that there is as nearly a certainty of good racing as can be, and those which are yet to close will have a large number of entries.

THE EMBRYO OF 1879.

In another part of this paper will be found a letter from Mr. Rose concerning the Embryo stake of 1879 and 1880-81. We have been awaiting the close of the San Jose fair when we will meet Captain Harris and

publish the names of those who have been "declared out" of the stakes of 1880 and 1881. In the stake of 1879 there is no provision for declaring out. The forfeit is \$25, which has to be paid ten days before the time fixed for trotting, or the subscriber is held for the whole amount of the stake. The date of trotting has been fixed ever since the first advertisement, viz: the first Saturday in November. The track has not been selected yet. We will consult with A. P. Whitney and Captain Ben E. Harris, and hope to give all the particulars in the next number of this paper.

THE NELLIE R-SWEETNESS RACE.

As will be learned by the report of our special commissioner the race between Nellie R and Sweetness at San Jose on Wednesday was the cause of a good many reproachful comments. The charge was made that Goldsmith had lost the race purposely, and certainly there were reasons for making it. We do not think, however, that the defeat of Sweetness was intentional on the part of her driver. From information obtained from a trustworthy source there cannot be a question that Goldsmith lost quite a large sum of money on his mare, and from the accounts there is nothing to prove that she could have won. She is notoriously "soft," and after one hard fight in a heat she is ready to succumb. This may be in part owing to the leg which precludes the right sort of training, though as far as we have seen she has neither the physical nor mental capacity to endure a severe trial. There must be a whole lot of cold crosses in her pedigree to nullify so many strains that are known to be of the right stamp. But for all this we do not like the way Goldsmith manages his horses, and this is the only thing which gives color to the charge. Director at Santa Rosa was either started in a shape which should have kept him from taking part or for a wrong motive, Romero at Sacramento was given a "stent" that demanded the best of condition, and the conceding a heat to Starr King at Stockton cannot be reconciled with straightforward dealing. Mr. Goldsmith is a man of capacity. For one of his years he is entitled to high rank in the profession. He is industrious, of pleasing manners, intelligent and more than usually attentive to his business. It may be that there is an overpowering jealousy on the part of some of the drivers and the whole thing is viewed through jaundiced optics. Our commissioner may have been swayed by the elation though there cannot be a shadow of aspersion on the straightforwardness of his motives, and true to his reportorial instincts he made a faithful transcript of what was passing. These occurrences are peculiarly unfortunate, and every one who has the turf interests at heart must do their utmost to correct them.

THE SHOOTING SEASON.

It did not require the intelligence conveyed in numerous newspapers to cause a traveler on the Oakland ferry boats to know that the "open season" had come. The evening of the 14th, there was a crowd of eager sportsmen on the way to the selected grounds, and again on the morning of the 15th. But Saturday, towards the latter part of the afternoon, the crowd had swelled into a multitude, and rather a mixed multitude at that. Never before did we see such a variety of dogs which were deemed worthy of taking the field. A few handsome setters of the fashionable line, now and then an old-fashioned pointer, spaniels, retrievers, but the great majority of such a mongrel class that it would have puzzled even our kennel editor to tell what combination had resulted in such queer representatives of the canine race.

The accouterments in many cases were as queer as the dogs, but, for all that, you could see anticipated pleasure beaming from the eye, and hope gave a roseate hue to the future. We could fully appreciate the feelings, especially of the neophyte "shootists." Although, a long time ago, how anxiously was awaited the first "good tracking snow," and the right sort of a day for deer hunting.

The snow must be deep enough so that the twigs would not crackle under foot, and if there was a high wind to relieve the boughs of the white drapery so much the better. If lucky enough to jump a deer reposing under the shelter of a low-branched hemlock it would not run far with an avalanche of snow falling from the branches, and then the wind made music among the twigs which muffled the sound of the footsteps. We have followed the track of a big buck from early in the morning until it was too dark to distinguish the footprints without a thought of weariness until the trail was forsaken, happy if now and then a glimpse of a white tail was caught as it flashed through the gaps in the underbrush, and eager to try again on the following morning.

The California sportsman is fortunate in being able to gratify his fondness for shooting without the discomfort which attended still-hunting in the woods of Northern

Pennsylvania in the winter time. Trailing through two or three feet of newly fallen snow with now and then a dab of it filling neck and ears, running or rather floundering through the mixture when the tracks showed that the deer had taken fright, perspiration streaming from every pore, and then cautiously creeping when the "signs" gave a token that the animal was not far in advance. What a contrast to the December days of this country and also what a contrast in the chances for the sports of the field. In those old-time sporting days we refer to the choice was restricted; excepting wild pigeons in the spring and autumn, and pheasants (ruffed grouse) and a staagling wild duck there were no other birds. Foxes were numerous and afforded capital sport with hounds, though the country was so rough that a legitimate fox hunt would have been an impossibility. In the big woods were bears and panthers, and forty years ago plenty of deer. Here there is such a wide variety that the difficulty is to select the game, and from the tufted quail to the wild goose, and from the squirrel to the grizzly, there are opportunities for rare sport.

That many have had fine sport is shown by the famous "bags" reported, and as the season advances there will, doubtless, be still better returns.

EDITORIAL NOTES.

Erratum.—With the hurry of late copy and the disadvantages under which printers labor who are yet unfamiliar with the distinctive language of the turf and the points where absolute precision is required several errors have crept into the BREEDER AND SPORTSMAN of late. Some of these are of importance as changing the status of horses in the record. The official summaries of the Sacramento meeting will be printed in these columns in the near future, entire. In the race won by Director at Stockton he was credited, through a typographical error, with figures that would bar him from the 2:23 class and to set him right we reproduce the summary of that race corrected to conform to the facts.

SUMMARY.

Same Day.—Trotting. 2:25 class. Purse, \$1,000, and \$200 added if more than ten entries. Four moneys.
J. A. Goldsmith names blk s Director by Dictator.....2 2 1 1 1
C. W. Welby names ch g Starr King, by Geo. M. Patchen.....4 1 3 2 2
L. H. Titus names br m Ecobora, by Ecobora.....1 4 2 4 4
J. H. Dodge names ch b Honesty, by Priam.....3 3 5 3 3
J. Hughes names b g Cairo, by Chieftain.....5 5 4 5 5
Time—2:23½, 2:23½, 2:23½, 2:25½, 2:26½.

J. M. Learned's b s Reliance, by Alexander, H. R. Covey's b g Capt. Smith, by Locomotive, G. Valensin's cb s Crown Point, by Speculation, J. Cochran's ch g Ashley, by Plumas, and L. J. Rose's blk s Del Sur, by The Moor were drawn.

The Stallion Race at Chicago was won by Monroe Chief in 2:20, 2:21½, 2:22; Black Cloud second. Romero trotted in Stockton in 2:20, 2:19½, 2:22 with Brigadier second. This is certainly a better showing than the Eastern contestants displayed, and when it is taken into consideration that Romero is only five years old the superiority is still more manifest. It is merely a question of a few years when California will take first place in all of the records as she now does in the yearling, two-year-old and four-year-old stallion calendar. It was very unfortunate that Brigadier had been lamed by the smith paring his feet too thin, or the time would have been faster. The general opinion was that the bay was a better horse than ever before, and with his feet right the teens should have been made in every heat.

The Nutwood Colt advertised for sale by George W. Hancock of Sacramento, should be a valuable acquisition to almost any stud farm. His dam being by John Nelson greatly enhances his value. We learn that he is a very fine looking colt.

The Hambletonian stallion also advertised is fashionably bred and is well worth the attention of purchasers.

Tulare Valley Fair.—John F. Uhlhoru, Secretary of the Tulare Valley Agricultural Association, writing under date of the 27th instant, says:

The Second Annual Fair of the Tulare Agricultural Association will take place at Visalia, commencing October 11th and closing on the 14th. Many fine horses from Fresno, Kern and Tulare counties are here and training for the races to be held at the time. The fair promises to be one of the largest ever held in the way of exhibition of stock. We are in the midst of a stock raising country, and some of the best in the State have been raised here.

The Double Team Controversy.

"The trial" of Aldine and Early Rose at Hartford when they were timed in 2:16½, has solicited more than the usual amount of discussion and comment. As Mr. Vanderbilt will not wager money on his horses, a friend has secured the services of the fast team, and the following pronouncement appears in the New York Herald:

TO THE EDITOR OF THE HERALD: Some of the papers of this city have several times within the last few days contained slurs and pretended doubts of the time made by Mr. Vanderbilt's team, Early Rose and Aldine, at Hartford, September 13. On that occasion there were four or five gentlemen entirely unknown to Mr. Vanderbilt and who were accustomed to timing horses present, who timed the horses in 2:16½ and at the driver's request made an affidavit of the fact. I wish here to ask, are these men not to be believed just as much as the individual friends of Mr. Work, who timed his horses at Fleetwood, July 13, and which time neither Mr. Vanderbilt or his friends have ever disputed? Is it consistent for persons who were not at Hartford to deny these gentlemen's statements, carefully keeping their own names private? Why should not this team of mares beat Edward

and Swiveller? I am only one of hundreds who think they can do it single or double every day in the week. Mr. Work has said publicly several times of late that he would trot his horses for fabulous amounts against Early Rose and Aldine next week (meaning this week) which conclusively shows that they are in condition. He has named large amounts, knowing that Mr. Vanderbilt never bets on his horses, and thinking that no one else would bet him the large sum named. Mr. Vanderbilt believes his team made 2:16½, and thinks that with the driver who drove them they can beat it, and so does the writer of this. In this belief and to stop all talk about the speed of these horses the writer has asked Mr. Vanderbilt for the loan of his team for a few days, and he has assented. I now offer to bet that the mare Aldine, owned by Mr. Vanderbilt, will beat either of Mr. Work's horses, best three in five, on Monday of next week, at Charter Oak Park track, Hartford, Conn.; \$10,000 that Early Rose, the other of Mr. Vanderbilt's horses, will beat the other of Mr. Work's horses, best three in five, on Wednesday of next week, at the same track, and \$10,000 that Early Rose and Aldine together will beat Edward and Swiveller, the horses referred to above, best three in five, in double harness, on Saturday of next week. Mr. Work to have the choice of which of his horses he will trot against Aldine on Monday; all these bets to be taken or none. The money to be deposited with the editor of the New York Herald and the races to be played or pay, these propositions to be accepted on Thursday morning, 21st instant, and the money to be deposited within twenty-four hours thereafter. If the days named should prove stormy the race to take place the first good day thereafter. Charter Oak track has been named because it is in the National Association and no one can object to it.

New York, Sept. 18, 1882.

T. C. E.

Californians at Sheepshead Bay

The following accounts of Gano's victory and the Duchess of Norfolk's unfortunate contretemps at Sheepshead Bay on September 19 are from the New York World:

Handicap Sweepstakes of \$20 each, half forfeit, for two-year-olds, with \$500 added; the second to receive \$150 out of the stakes. Three-quarters of a mile.

E. J. Baldwin names b c Gano, by Grinstead, dam Santa Anita, 94 pounds.....(M. Donahue) 1
G. T. Johnson names ch f Lizzie Mc, by Alarm, dam Lady Motley, 80 pounds.....(Rayford) 2
Frederick Carter names b f Felicia, by Ill Used, dam Felucca, 92 pounds.....(Barnee) 3
P. H. Ryan names ch f Adalgisa, by Count d'Orsey, dam Adosinda, 92 pounds.....(Barrett) 4
James T. Williams names cb f Pearl Thorne, by Pat Malloy, dam Dolly Morgan, 87 pounds.....(Young) 5
Preakness Stables names b f Vintage, by Virgil, dam Madame Dudley, 80 pounds.....(J. Donahue) 6
G. L. Lorrillard names b c Magnate, by Glenelg, dam Minx, 68 pounds.....(Brennan) 7
John Kay names cb f Caramel, by Monarchist, dam Bon Bon, 80 pounds.....(Greenhouse) 8
J. R. Keene names b f Palmetto, by Virgil, dam Squeeze 'Em, 83 pounds.....(Cunningham) 9
J. Carter & Co. name b f Bridesmaid, by Bonnie Scotland, dam Miss Austine, 84 pounds.....(Harrington) 10
A. Burnham names cb g Baron Feverot, by Bonnie Scotland, dam Lady Lindora, 93 pounds.....(Higgs) dr
Time—1:10½.

Gano was the favorite, selling in the pools for \$100; Felicia and Magnate, \$80 each; Vintage, \$60; Pearl Thorne, \$40; the field, \$120. In the betting there was 7 to 2 against Gano, 5 to 1 each against Vintage and Felicia, 6 to 1 against Magnate, 8 to 1 against Pearl Thorne and Adalgisa, 10 to 1 against Lizzie Mc, 12 to 1 against Palmetto, 20 to 1 against Caramel and 30 to 1 against Bridesmaid. The mutuals paid \$17.70.

Vintage was the first away, Bridesmaid second, Palmetto third, Magnate fourth, Felicia fifth, Gano sixth, Adalgisa seventh, Pearl Thorne, Caramel and Lizzie Mc being far in the rear. Going down the back stretch to the three furlong pole Palmetto lead by a head, Vintage second, two lengths in front of Felicia, Bridesmaid fourth, Magnate fifth, the others following as best they could. At the half-mile pole Vintage led half a length, Palmetto second, a length in front of Felicia, third, she a length and a half in front of Magnate, Gano fifth, Bridesmaid sixth, Pearl Thorne seventh, Lizzie Mc eighth, Caramel ninth, Adalgisa tenth. A change of positions rapidly occurred on the lower turn, and as the youngsters passed the three-quarter pole Gano was leading a length, Felicia second, half a length in front of Magnate, Vintage fourth, Pearl Thorne fifth, the others close up. From that place to the stand Gano had nothing to do but gallop home an easy winner by two lengths, Lizzie Mc second, four lengths in front of Felicia, third, Adalgisa fourth, Pearl Thorne fifth, Vintage sixth, Magnate seventh, Caramel eighth, Palmetto ninth, Bridesmaid tenth. Baron Feverot did not start. Time, 1:16½.

A Handicap Sweepstake of \$30 each, half forfeit, for three-year-olds, with \$600 added; the second to receive \$150 out of the stakes. One mile and a half.

P. Lorrillard names ch c Herbert, by Glenelg, dam Kate Mattingly, 105 pounds.....(W. Donahue) 1
A. Burnham names b g Franky B, by Monarchist, dam Alala, 105 pounds.....(Higgs) 2
Dwyer & Brother names b g Blenheim, by Billet, dam Ken, 90 pounds.....(Sheridan) 3
G. L. Lorrillard names ch c Volusia, by Pat Malloy, dam Vandalia, 90 pounds.....(Brennan) 4
D. Colazzi names b f Laura Glass, by Buckden, dam On Time, 98 pounds.....(O'Leary) 5
Theo. Winters names b f Duchess of Norfolk, by Norfolk, dam Marion, 82 pounds.....(M. Donahue) 6
Time—2:39½.

Duchess of Norfolk was the favorite, selling in the pools for \$460; Herbert, \$240; Franky B, \$80; Blenheim, \$60; the field, \$90. In the books there were six to five against Duchess of Norfolk, five to two against Herbert, seven to one against Laura Glass, eight to one each against Frank B and Blenheim, and ten to one against Volusia. The mutuals paid \$15.70.

Duchess of Norfolk led to a scattering start, Franky B. second, Volusia third, Laura Glass fourth, Blenheim fifth, Herbert sixth. When the horses passed the three-quarter pole Blenheim and Duchess of Norfolk were running head and head half a length in front of Franky B third, half a head in front of Laura Glass fourth, Herbert fifth, Volusia sixth. When the horses passed the judges' stand Blenheim led by a head, Duchess of Norfolk second, one length in front of Franky B, Laura Glass fourth, Herbert fifth, Volusia sixth. Duchess of Norfolk led around the upper turn by a neck and passed the quarter pole half a length in front of Blenheim, the latter three lengths in advance of Franky B, he one length ahead of Herbert, fourth; the latter three lengths in advance of Laura Glass, she three lengths ahead of Volusia, who was indulging in his usual game of sulks. Duchess of Norfolk showed the way down the backstretch and led a length at the half-mile pole. Blenheim second, two lengths in front of Franky B; Herbert fourth, Volusia fifth, Laura Glass, sixth. Going around the lower turn Duchess of Norfolk had half a length the best of it, Franky B and Herbert side and side, second and third, the others following some distance away. Getting into the homestretch Herbert on the outside passed Duchess of Norfolk at the seven-furlong pole, and led a trifle at the foot of the grand stand, where the

Duchess of Norfolk, being whipped, swerved in on Herbert, fouling him and knocking him out of his stride, and coming on she passed the judges' stand a length in front of Herbert. The judges were unanimous in giving the race to Herbert and placing Duchess of Norfolk last in the race. The judges placed Herbert first, Franky B second, Blenheim third, Volusia fourth, Laura Glass fifth and Duchess of Norfolk sixth. Time 2:39½.

The Oregon Cup.

SUMMARY.

SALEM, Sept. 22.—The Oregon cup, of \$1,000 value, for all ages, first horse \$700, second \$200, third \$100. Two and a quarter miles. Cy, Mulky names br c Billy Coombs, by Shannen, out of Ruth Ryan, by Lodi, 4 yrs, 108 lbs.....1
Foster Bros. names ch h Connor, by Norfolk, 5 years, 114 lbs.....2
Jerome Porters names cb m Trade Dollar, by Norfolk, 5 years, 114 lbs.....3

The time by quarters was as follows:

First quarter.....:27
Half mile.....:55½
Three quarters.....:1:23
One mile.....:1:50½
Mile and a quarter.....:2:17
Mile and a half.....:2:45½
Mile and three-quarters.....:3:12½
Two miles.....:3:41
Two and a quarter miles.....:4:09

The horses walked to the saddling post and were stripped off to the view of a handful of admirers. The mellow September sun fell upon their satin-like coats with a glow of impartial tenderness, as Trade Dollar pranced about in her gleam of golden chestnut, while Connor's rich bronze made a still further contrast with the rare rosewood tint of the Idaho colt. In the meantime ten thousand people were crowding into the grand stand and awaiting the signal for an event which would change the ownership of ten thousand dollars in less than five minutes.

William Bigham, of Spokane Falls, had been chosen as starter, and he got the horses in place just before 2 o'clock. Taking his flag in hand, he said, "move up now, boys," and the gallant steeds cantered up to the score. Seeing they were all under full headway, he threw down the flag with Coombs about twenty feet behind the other two. Trade Dollar took the lead at once, hotly pursued by Connor, while young Smith took his colt well in hand and prepared for a waiting race. As they came by the stand a volley of cheers went up from the crowd. "Trade Dollar forever," cried a Walla Walla man. "Look at the old cock with the specks, how he's hoofin' it," said a southern Oregon man. The real winner glided along behind them with strong but stealthy stride. The other two boys were laying back and pulling while Louis sat perfectly upright, but it was the great strong neck of the big colt that pulled him into this position. Connor's white nose began to show in front of the mare as they passed the quarter pole, and half a mile of the journey was over. Still the daughter of Norfolk stubbornly contested every inch of the ground with him while the brown colt was fighting for the bit behind them. Louis had pulled in close to the fence and was running as short a race as possible. At the half-mile pole the old horse was still in front, yet Trade Dollar did not yield but kept on his shoulder with unflinching gameness. Just as they reached the three-quarter pole from which they had started, Connor let in a ray of daylight between them, but the mare moved up again and he was unable to take the track from her until half way down the stretch. A roar of enthusiasm went up as Connor ran by the stand a length ahead of the mare, while Coombs was now so close on her heels that he looked fit to cut her down. Away they go around the turn and Louis gives the colt his head. Now he leaps ahead amid loud cheers and laps Trade Dollar. She falls back badly cramped, and the colt now goes up to the old white-faced stud. Cooper calls on Connor and the old horse puts forth another effort although his game leg is beginning to pain him. As they go up the backstretch for the last time there is an effort to do or die. Coombs forges ahead, inch by inch, with his stealthy, insidious stride. He is at Connor's saddle, now on his neck at the half-mile pole, a mile and three-quarters gone, and now they are preparing to round the bend. Cooper is urging his horse quietly all the time while outside of him strides along the dark specter, ridden by the purple jacket. They are out of the straight run and rounding the bend. Smith shakes up the big colt, and quick as a flash he is in front far enough to take the track. As he hugs the fence closely he casts a glance over his shoulder and sees Connor in terrible distress. The game leg has gone by the board at last, and Trade Dollar, badly cramped, has rallied again for the final effort. Poor old Connor, game and true, staggers home like a drunken man, under the sharp lash of Cooper's whip, but the trick is done and the race is out and gone. Billy Coombs has won it in 4:09, having cantered home all through the last quarter. An analysis of the race by quarters, given below, will show that it was ridden with admirable judgment was one not remarkable for any great burst of speed. But the rating was superb and nicely calculated for a victory without distressing the horse. Coombs blew out finely and was fit to run again at the end of twenty minutes, while Trade Dollar was terribly distressed. Connor's tendons had sprung so as to preclude all hope of his ever participating in another contest.

Seldom has a race been run, in Oregon or anywhere else, where there was so much good feeling exhibited and so much of that genuine love of fair play which should animate every contest of this kind. Men must run to win reputation as well as money, and to accomplish that end the best horse must be allowed to win. That such was the result of Friday's race no sane man could doubt. True it is that Connor has a faster record than that of this race, but it was evident to the eye of the greatest novice in racing that Coombs won with plenty to spare and that, when occasion may require it, he will be able to beat the record of this race by a handsome margin. Praises from fair lips greeted the conqueror whose gaily dressed jockey rode him off in triumph, while a few of more tender nature lingered to gaze upon the great white-legged chestnut whose sun had set forever. He had fallen like Boabdil on his shield, never to rise again. Never again will the silken jacket gleam above his burnished hide; never again will the prick of steel make its mute appeal to his heart of oak; but future generations of high-mettled racers, foaled under the balmy skies of the far-off Modoc land, shall proudly own him as their sire and bear his owners' colors to fame and victory. The game old mare was taken with cramps about a mile and a quarter out in the race, and when she came out she was jumping straight up and down, as horses do in that condition. Buchanan handled her very carefully, after the race, and she was soon feeling a good deal better. This mare will probably be retired from the turf next spring, and bred to Glen Dudley or Old Lodi. The breeders of our State can now see what they lost when they let the sire of Billy Coombs go back to California, for he was offered for \$300 at Salem. Gov. Stanford owns him now, and would not take five times that amount for him.—Portland Oregonian.

YACHTING.

The Mosquito Race.

The regatta last Saturday under the auspices of the San Francisco Yacht Club for the small yachts of the bay was in every respect successful. There were a goodly number of entries, the wind was steady enough, the water smooth, and the day fine. A more good-humored crowd never competed in a regatta. The start was not as good and even as it was last year, owing to the boats not having been formed in lines according to class, but they generally got off well together, except the Chiquita, Skipper and Three Brothers, each of which started behind her class somewhat.

The Whitehall boats went off first, in pretty good style. They were as follows: Faugh-a-Ballagh, Dreadnaught, Pride of the Bay, Rough and Ready, Captain Sennett, Frank Ellison, Walk-along-John, Thos. Kendall, Unknown and Stand-by. Then the second class followed three minutes later, and so on until all five classes were sailing along, the rear being brought up by the Italian fishermen's boat. Pretty soon the whole fleet was off, and being joined by a lot of big yachts a very picturesque sight was presented. Among the other yachts out were the Casco, with a large Oakland party aboard; the Lillie, Emerald, Startled Fawc, Magic, Clara, Nellie, Ariel (schooner), and Frolic. The wind held steady all around the course and the boats generally were well sailed. The following table shows the results:

SECOND CLASS.				
Name.	Length.	Actual Time.	Corrected Time.	
Lark.....	19.3	1:43:19	1:27:54	
Con O'Connor.....	16	1:26:57	1:27:57	
Squibob.....	20	1:53:30	1:28:30	
Cora.....	16	2:24:25	2:05:25	
Chiquita.....	20	2:32:00	2:37:00	
Rooster.....	17.6	2:55:10	2:37:10	
Triton.....	15.6	Withdrawn.	
THIRD CLASS.				
Name.	Length.	Actual Time.	Corrected Time.	
Carrie.....	24	1:23:25	1:12:25	
Fleetwing.....	24.11	1:23:05	1:13:05	
Blackbird.....	22.9	1:27:35	1:15:20	
Sadie.....	21.6	1:36:15	1:22:45	
Emilie Ethel.....	23.24	1:39:27	1:27:42	
Skipper.....	21.6	1:57:30	1:44:00	
Rush.....	25	2:20:00	2:10:30	
Shadow.....	22.6	Withdrawn	
FOURTH CLASS.				
Name.	Length.	Actual Time.	Corrected Time.	
Fawn.....	28.3	1:25:45	1:19:00	
"76".....	26.6	1:33:32	1:24:52	
Daisy.....	27.8	1:42:55	1:35:40	
FIFTH CLASS.				
Name.	Length.	Actual Time.	Corrected Time.	
Thetis.....	33.6	2:07:40	2:06:10	
Flirt.....	33.0	2:09:35	2:07:35	
SIXTH CLASS (FISHERMEN).				
Name.	Length.	Actual Time.	Corrected Time.	
Shamrock.....	24.3	1:29:30	1:18:45	
Three Brothers.....	32.3	1:26:25	1:21:40	
John of Procida.....	23.0	1:34:25	1:22:25	
Bottle Meyer.....	23.3	1:34:20	1:22:35	
FOR THE FLAG.				
Flag.	Length.	Actual Time.	Corrected Time.	Race.
Thetis.....	33.6	1:09:25	1:07:55	1
Flirt.....	33.0	1:13:12	1:11:12	2

The first race was composed of Whitehall boats. The first one in was the Captain Sennett, sailed by Mr. Fitzgerald. She started at 1:43 and got back at 3:07:55. This boat was built by O'Connell of North Beach. The second was Faugh-a-Ballagh, built by Twigg of South Beach and sailed by P. Fitzgerald, her owner. She came in at 3:11:35. The third was the John Kendall, sailed by Tommy Kendall. She started at 1:43 and got in at 3:16:45. Among the other boats in the race were a lot of New York built craft, but they were beaten by the home production.

The Lark won second class first prize, O'Connor second prize and Squibob third prize.

The Carrie won first honors in third class, Fleetwing second, Blackbird third, Sadie fourth.

The Fawn took first prize in fourth class and the "76" took second.

The Thetis won the first prize in class five, and took the prize flag for fastest corrected time.

The Shamrock took first prize for fishermen's boats, Three Brothers second and John of Procida third.

Altogether the Mosquito race was a very successful one and will bear repeating.

AN INTERESTING CANOE.—Captain S. D. Kendall's canoe is a marvel in the matter of construction. He built the canoe himself, made the paddle, sails and oars, and has invented and constructed the best set of infolding outriggers that can be found in any light craft. The hull is constructed on the "up and down nailed carvel system." She is smooth outside and inside, her shell being made of smooth streaks only one-half inch wide by one-fourth inch thick. These strips are nailed upon the light ribs, or timbers, and galvanized brads are driven perpendicularly through two strips and into the third streak below. These brads are three inches apart. The ribs are of red elm, set three inches apart. The deck, though only one-fourth of an inch in thickness, is, by this system of nailing, made so strong that a man weighing 175 pounds can stand and step about upon it. The keelson is ten inches wide and one inch in thickness, beveled from the keel to the thickness of the planking. Weight of canoe with oars, paddle, spars, sails, rudder and hatches, 100 pounds. This canoe is the last one of several built by this amateur canoeist, and there is an immense amount of work and thought represented in the details of a most interesting little craft which is appropriately named "Solid Comfort."

SMALL YACHTS HAVE RIGHTS.—The *New York Forest and Stream* says: The collision between the sloop Sagitta and the schooner Varena while working out of New Bedford harbor in company with the New York Y. C. fleet has not been correctly reported. Both were on starboard tack, the Sagitta leading and holding a closer wind. Varena overtook the sloop and finding that she could not weather, attempted to run her lee too late, poking her jibboom through Sagitta's mainsail, and causing other damage necessitating a vexatious delay for repairs. It is altogether too common for large vessels to ignore the rights of smaller yachts, in the belief that the latter will keep clear rather than risk collision. The rule of the road should be strictly observed as a matter of pride, to say nothing of the law. Too many skippers slightly assume the responsibility of disregarding the rules to save a little trouble. Ordinary considerations and courtesy should prompt large yachts to go through the lee of small ones, unless at undue risk or sacrifice to themselves.

The officers of the London, England, Cruising Club have decided to offer a prize to such member of the club as shall, in the opinion of the officers, have carried out the most enterprising, skillful and successful cruise of the season of 1882. In awarding the prize, regard will be had to the nature, size

and accommodation of the yacht, boat or canoe, in which the cruise shall have been carried out, the method of camping or sleeping out, etc., so as to give an equal chance to the owners of small and large craft. Competitors must send in accounts of their cruises to the rear-commodore, signed with their names, before the 1st of November, 1882, and the winning cruise will be published as such in *Hunt's Magazine*.

Two gentlemen have left the Canoe Islands, Lake George, for an extended cruise bound for the Gulf of Mexico. They will haul over into Lake Champlain from Lake George, cruise to Whitehall, and follow the canal to Troy, on the Hudson River. Then they will cruise on the Erie canal westward to Buffalo on Lake Erie. The coast of Lake Erie will be worked as far as Cleveland, Ohio. From Cleveland the canoeists will proceed to Cincinnati on the Ohio River. From Cincinnati they will descend the Ohio and Mississippi to New Orleans, and will cross that city to Lake Pontchartrain and the Gulf of Mexico. They will then continue along the coast eastward and southward until they have passed Cape Sable on the southwest end of Florida. If time permits the canoeists will push there explorations around the southern through Card's Sound and Biscay Bay to Cape Florida, and from that locality proceed northward on their homeward journey.

Hereshoff's high speed yacht *Permalia* seems to be doing pretty well. The *Toronto Globe* gives the following concerning a race with a fast lake steamer, Aug. 18. "The much-talked of race between the steamer City of Cleveland and the new yacht *Permalia* took place to-day. The run was made from the Star Island House to St. Clair, a distance of about twenty-seven miles, resulting in the *Permalia* beating the steamer nearly half a mile. The yacht is a grand success throughout, both in speed and comfort. There are prospects of another race next Thursday, on the down trip of the Cleveland."

The fast 40-ton cutter *Annona* may come to New York waters next season. She is 68 feet long, 11 feet 6 inches beam and 96 draught. Says *Bell's Life*: "The *Annona*, with a new bowsprit, took the Cowes Town Cup, and proved herself to be undoubtedly the best boat of her rig and size that ever answered the starting gun. Possibly Mr. Hedderwick may now put his last year's notion into shape, and take her to New York."

During the race the other day some of the big yachts were poorly handled. One very large yacht nearly ran over a small one. The small one, was in the race and the big one, not the small one was by the wind and the other one running free, and there was no excuse except very bad manseanship or extreme carelessness. The nearness of collision made the little fellow keep away and he lost nearly several minutes in the race.

An enterprising photographer took a set of instantaneous views of the mosquito race on Saturday. In addition to the small yachts, he obtained pictures of the Chispa, Clara and others all under way in a very good breeze. The picture shows 22 boats, all under sail at once and racing. The pictures of the fishermen's boats are particularly good.

Mr. Rogers' new cutter *Bedonin* is about complete, and will sail on a cruise next week. Without doubt, she is the finest yacht ever built in this country. It is probable, also, that she will be fast, as her rig is a very taut one. The only drawback is her extreme draught, which will close to her many of our harbors.—*Spirit of the Times*.

The old steam yacht *Brisk*, built for Ralston, has been overhauled, practically rebuilt, had new engines and boilers put in her, and now belongs to Captain Simpson. She has been tried and found to work well. She will go up the Coast before long.

THE GUN.

Game Preserves in the Marshes.

It is only within the past few years that such things as game preserves have been thought of in California, and even now they are mainly confined to the limited regions of the river marsh lands, and are few in number. The growth of the railroad system of the State and the improved facilities for sportsmen to get to hunting grounds has had the usual effect of increasing the number of hunters and decreasing the game. People fond of duck hunting find to their dismay when they reach a point where the railroad passes a good marsh that lots of people get off at the same station. On the marshes south of this city on both sides of the bay this remark is particularly applicable as any hunter knows.

The tule lands on the Sacramento and San Joaquin rivers, and the extensive marshes surrounding Suisun bay, form the favorite resorts of our water fowl. Ducks of all varieties swarm there in the season and some of them remain there to breed. Geese are abundant; in fact so much so as to be a nuisance. So many hunters from the city visit these marshes on Saturdays and Sundays as to scatter the game and frighten it off, or drive it over into the large bays.

A number of gentlemen fond of duck hunting have formed shooting clubs, leased tracts of land on these marshes or islands, and keep the ponds therein for their own sport. They have a man in charge and warn off "pot hunters" and others who invade the premises.

As an illustration of how this sort of thing is done, when done in style, the example may be cited of the Teal Shooting Club, which is composed of a number of gentlemen of this city. This is our most wealthy club, has the best outfit and has the best ponds in the State.

Their preserve is in the Suisun marsh, where the railroad crosses Cordelia creek and the Frankhorn slough. They have what are known as the Payne ponds. James Payne some years since leased this large tract and shot on it for the market. By and by it became so noted and so many people came there that he built and fitted up an ark and for a consideration gave hunters the privilege of shooting there. He furnished accommodations, "grub," boats and men, so the place soon became a favorite one to visit.

When the railroad was completed across the marsh from Benicia to Suisun a flag station called Teal was established for the accommodation of hunters. It is near by this station that the arks are kept.

The Teal Shooting Club bought from Payne his lease of these grounds for some \$2,000, taking his ark, duck boats and outfit. The ark is 26x14 feet with three-foot guards around it. It has a dining-room, kitchen and storeroom, all neatly fitted up. They have had also a new ark built with a hull 36x16, with three-foot guards, and have fitted it up in fine style. In it there are eight staterooms, one for each member, with names on the doors, with wash-stands, hair mattresses, brussels carpets, etc. The commissary arrangements are all on the ark. They have also a third boat or ark, a scow sloop 36 feet long and 14 feet wide, which is occupied by the men.

James Payne manages the preserve and is paid \$100 a month for his services. There are also two men to clean guns, take care of boats, row the gentlemen out to the blinds and do chores generally. They also have a Chinese cook and a Japanese steward. The table is set with silver and china as at home and everything is of the best. The club has invested some \$5,000 in privileges, arks, boats, etc. It was organized August 30, 1882. G. Frank Smith is president, W. P. Fuller commissary, W. F. Whittier treasurer and vice president, John Taylor secretary. The other members are W. S. Hopkins, H. C. Titcomb, W. W. Traylor and R. S. Floyd.

The marsh on which these yards are situated is a salt water one and has many fine ponds. It only takes about two hours to get to the shooting grounds from this city.

Thus far no very big strings of game have been taken in these marshes as it is too early, yet. The largest string by any one of this club in the opening of the season was 36. The ponds have been baited and when the rains come good sport is expected. It will be seen by what we have said that systematic persevering of hunting grounds is carried out here on a scale which insures good sport for those fortunate enough to belong to the clubs which maintain preserves.

Costly Sport in Scotland.

An "intending offerer" must decide first on the rent he proposes to pay, next what kinds of games he wants to shoot; whether he desires to fish, and if so, salmon or trout, or both; then as to the accommodation he will require at the lodge. Rents vary from £100 up to £5,000. Small places will afford plenty of amusement, and even if the bag is not large there are the pleasure and benefits of entire change of air, scene and mode of life. But nothing can be got under £400 if plenty of sport is desired, and to the rental must be added wages of keepers and collies. If both deer and grouse are necessary, a rental of at least £1,000 will have to be paid. Black Mount Forest, in Argyleshire, which is leased by Lord Dudley from Lord Breadalbane, extends over 80,000 acres and affords every description of shooting and excellent loch fishing. It is offered at £3,000. Balmacraan, Lord Seafield's forest in Inverness-shire, has been rented to Sir Henry Allsopp (who rented Black Mount last season) at £3,000. It extends over 23,000 acres, and 50 stags may be counted out. There is also fine cover and mixed shooting over 12,000 acres. Moy (Sir John Ramsden's), on the shore of Loch Laggan, is let at £400, with 5,000 acres of moor, last year's bag being about 150 brace of grouse; but the lodge here is exceptionally good and the fishing is capital. Lord Middleton's forest of Applecross, in Ross-shire, which extends over nearly 60,000 acres, is let at £2,500. The six great sporting counties of Scotland contain over 8,000,000 acres of shooting ground. The shooting rentals of Inverness and Perth are each larger than was paid for the whole county at the commencement of the present century. Sir John Ramsden receives nearly £6,000 for his Badenoch shootings, retaining the great forest Ardvirkie in his own hands. Sir G. Macpherson Grant receives £5,800 for the three forests in the same district, and Lord Seafield's rental exceeds £12,000. The principal shootings in Forfar belong to Lords Dalhousie and Airlie; the sporting rental of the former £6,000, and he keeps a large extent of ground in his own hands. Perhaps the finest "all around" sport in the country is obtained on the island of Arran, which belongs to the Duke of Hamilton, and is a vast game preserve. Shootings are usually let for four months, from the middle of July, but sport in the grouse moors ceases, as a rule, early in September, and although the season lasts till December 10, it is rarely that a lodge is inhabited after the beginning of October.—*London Pall Mall Gazette*.

AN EXCITING CHASE.—Jack Campbell, of Hot Springs Hotel, about forty miles from Reno, had a wild adventure recently, which came near winding up with a Coroner's inquest. He was riding over a very rough country, when a huge buck sprang up in the trail ahead of him, and started off at a flying gait. Jack slapped the steel to his animal and went in pursuit of the flying venison. Up hill and down dale they went—through brush and across creeks—until they came to the edge of a very steep precipice, where the buck halted for a second, as if dismayed by the deep chasm before him. That lost second cost him his life, as Jack came upon him and flung a lasso over his horns. Before his horse could get his balance and brace himself, the buck jumped over the bluff and down into the ravine went the whole party. Stunned for an instant, they picked themselves up and the soiree began. The infuriated buck charged upon Campbell, who was tied up in the lasso, but he managed to get a good hold of the animal's horns and protect himself from serious injury until he got out of the snarl, when he jumped upon his horse and dragged the deer to his knees. The well-trained vaquero-horse held the deer down while Jack cut his throat. Louis Dean brought half of the animal to town, as evidence that Campbell told a straight story about the affair.—*Sierra Tribune*.

Every year from some section of the country or other we hear complaints from farmers of the carelessness of hunters. Gates are left open, poultry and cattle are shot—by intent as well as accident—and worst of all is the carelessness with fire. Often a camp-fire is left burning, a strong wind arises and scatters the sparks, and in a short time acres of stubble, pasture or woodland are destroyed by the devouring element. Every one knows how much damage to property and danger to life these fires are, and no true sportsman will abuse the privileges extended by the owners of property in the country. We hear complaint from Mr. R. R. Smith, who has a ranch on the Lower Sacramento road. For several years sportsmen have found good hunting grounds on Mr. Smith's property. Last year eight of his cows were shot by hunters, and this year they have begun again by killing another. His stubble-fields have been fired and he has been annoyed in many ways. Patience has at last ceased to be a virtue and Mr. Smith will prosecute any one found hunting on his premises without permission. There is game enough in the country and sport enough in hunting without damaging property or endangering life. We are confident that none of the members of any of the sporting clubs participate in this malicious mischief. We hope that there will be no more cause for complaints from the farmers in future.

The *Butte Record* has been informed by some of the crack hunters of Chico that game is not so plentiful around there this season, but sport is looked for further on. Some of the shooters went out the other day during the rain, but returned with very few ducks. With the quail hunters it was different. They got a reasonable number of quail, and also some doves. The hunters say it is too early in the season for duck shooting; that they have not come back to their winter resorts. The geese have been coming back slowly for the last few days; but they appear to be making their way to the great tules along the lower Sacramento.

Trap Shooting in San Jose.

Members of the San Jose Sportsmen's Club shot for the prizes offered by the Fair Association, last Wednesday morning, at the Fair grounds. The prizes were: first, gold medal; second, silver medal; third, silver goblet. The shooting was at clay pigeons; eighteen yards rise; to rule.

THE SCORE.	
Cory	10000011010100110000--7
Campbell	10111100011011010100--11
Delmas	111110011111111111--18
Stern	111001101111111111--17
Coykendall	101011111111111111--18
Honmrich	1101111101010101010--13
McMillan	111111111111100111--16
Tisdale	111101011111011111--17
White	1111001100101111011--14

*Foul cartridges.

Ties, Delmas and Coykendall shot off the tie of 18 at ten birds, picking the gun from the ground, with the following result:

Delmas	1101111111--9
Coykendall	0111001111--7

Delmas was declared winner of the first prize and Coykendall of the second.

For third prize Stern and Tisdale tied on 17, and they shot five birds, with the following result:

Stern	11111--5
Tisdale	10111--4

Stern was declared winner of the third prize.

Shipley, of Sacramento, and Coykendall also shot a match for \$10 a side, twenty clay pigeons, eighteen yards rise. Shipley won with the following score:

Shipley	111111111111111111--20
Coykendall	111111111111110111--19

S. J. Lank of Wells, Fargo & Co. and A. W. Davidson of Oakland left Alameda last week by team, for a hunting excursion. They proceeded first to San Leandro and Haywards and then up the Castro Valley as far as Amador. At the latter place they found large numbers of quail and had their best shooting. From here the hunters went to Sunol and enjoyed some lively sport. The return was made by the San Jose Mission but there was but little game in sight in that vicinity. These gentlemen were out three days, of which one was occupied in traveling; in the other two days two hundred quail were bagged and they were satisfied with their excursion.

A party composed of F. H. Putzman, J. Browell, A. Higgins, Mr. Stackpool, W. Golcher, J. J. O'Brien, R. Eillon, Mr. Shorten and E. W. Blaney last week went out on a three day's hunt near San Jose Mission. Like many others they say that there is very poor hunting in that vicinity. The quail are wild and stay in the gulches and heavy brush; the scarcity of water, too, keeps the game back in the hills. As there has been no rain yet the weeds, especially tar weeds, are stiff and make it very hard for the dogs to work. For all the obstacles the party bagged 43 dozen quail.

A sportsman of considerable experience and observation says: "I have always noticed before a rain storm that quail are very uneasy and hard to approach. They leave the lowlands and open pastures and hide in the heaviest brush and timber; even in these retreats they are alarmed and fly on the approach of the hunter. They do not leave their hiding places until after the storm is past. I consider that, to one familiar with game and their habits, quail are as good as a barometer, and attribute the poor bags made in the last few days to the presence of a rainstorm in the near future."

Mr. N. L. Kirk, who is superintending the construction of a new bridge in Butte county, has received a beautiful large pair of elk antlers to be used as an ornament for the bridge. These antlers are so large that when placed on the floor, prongs down, an arch is formed almost large enough for a man to walk under. This is a new idea for ornamenting a bridge, but it is a good one.

Aside from game being very plentiful this year, we have cool and delightful weather which is very agreeable to hunters. The heavy dews that fall during the night leave the ground in good condition in the morning for the dogs to scent the game. The coolness of the weather permits of the transportation of game to the markets from distant parts of the country.

Several flocks of canvasbacks have made their appearance at the marshes along the rivers. This is something unusual as they seldom come in before the first rains. The early appearance of migratory birds seems, as many think, an indication of an early or else a very wet winter.

Deer, grouse and quail are very abundant at Lake Tahoe. The loggers at the logging camps feast to their hearts' content on grouse and quail, but so far no deer has been killed, although numbers of them have been seen. The trout are not biting well now, although a few are being caught.

A gentleman, Mr. Bender, was down near San Mateo last Sunday and bagged eighteen quail and several rabbits. Along the line of the S. P. R. R., within a day's ride of San Francisco, game is not as plentiful as it was expected it would be earlier in the season.

Last week Thomas Lawson, while hunting near Avon station, shot twelve mallard ducks and a pelican in two shots from his gun. In the pelican's pouch was found twelve fish. This is the last "fish story."

The birds are not very plentiful yet up in the marshes. Although none have come in to light, a few geese have been seen. Most of the ducks are young ones bred in the marsh. They are mainly mallard and teal.

H. A. Wilson went to Millbrae last Sunday and had good luck. The day was very warm and the quail stayed in the shade so that it was hard to get many good shots.

A good many mosquitoes yet up in the marshes. More plentiful than ducks. They will not go away before next month, when the ducks will come.

A buck was shipped to this city from Cloverdale last Tuesday that tipped the beam at 155 pounds. He was killed at the Fairbanks place near Anderson valley.

Sportsmen from Marysville report an abundance of ducks and geese in the Sacramento tules. The present cool weather is very favorable for shooting.

A California lion, measuring nine feet two inches from the end of his nose to the tip of his tail, was killed recently in San Luis Obispo county.

H. C. Golcher and D. Berdwick bagged thirty-six quail near San Mateo last Sunday. The shooting in that vicinity is not of the best.

Mr. R. Liddle was hunting near Saucelito last week and says there are too many hunters to allow very good bags being made.

There is a good deal of style up in the marshes now-a-days where the shooting clubs have their arks.

The Cordelia Shooting Club boys only got 12 to 20 birds apiece on the opening of the season.

Those fond of water fowl hunting are anxiously waiting for the first rains.

Hawking is once more becoming fashionable in England.

THE RIFLE.

Close of the Fall Meeting at Creedmoor.

There were three events contested at Creedmoor yesterday—the last of the list, and which were to close the fall meeting. They were the Military Championship, the Continuous and the Consolation matches in their final stages. The two latter had a large number of entries and the scores are so completely mixed that it will require at least two days to put them into such a shape as to determine the winners. They will be announced as soon as known. Great interest was centered in the Military Championship match, as it was known that two of the competitors, Mr. W. M. Farrow, of the Newport Artillery, and Col. E. B. Sanford, of the First Division, New York staff, were to use British rifles in the match, and test for themselves the superior qualities claimed for the weapons by the English. Mr. Farrow purchased his from R. McVittie, and Colonel Sanford's was the property of Sir Henry Halford. Both weapons were used in the international match. The result of the shooting yesterday justified the Englishmen, and left the question almost beyond doubt that the weapons are the best in present use for long-distance shooting and superior to the American gun. Both gentlemen express satisfaction with them. Mr. Farrow won the match; making 84 out of a possible 105, with J. M. Pollard of the American team second, and Colonel Sanford third. Under the conditions, it was open to the highest 60 in the first stage, the competitors to shoot seven rounds each over the 800, 900 and 1000 yards ranges, using any military weapon that has been adopted by any national or state government. There were only nine entries, although there were ten prizes. The tenth prize reverts to the National Rifle Association. The winner holds the title of Military Champion of the United States for one year, and besides becoming the owner of the \$50 gold badge receives \$25 in cash. The remaining prizes are in cash, the second being \$20, the third, fourth and fifth \$10, and the remainder \$5 each.

SANTA ROSA, September 25, 1881.

EDITOR BREEDER AND SPORTSMAN: Your excellent paper comes regularly, but you do not afford in your account this week of the International Rifle Match, a most useful piece of information—viz.—what sort of guns were used by the respective teams. Every daily paper gives us a telegram to the effect that Sir Henry Halford asserted that the Americans lost, because their rifles were inferior to the British guns, but not one vouchsafes to tell us anything about the guns. The matter is of very great interest and even importance. The "Britishers" have heretofore used a muzzle loading rifle made in Dublin—I think by Reilly—but as we have hitherto beaten them it was supposed that the American breech-loaders led the van. If our breech-loaders have lost their prestige or the British have invented better guns, riflemen in this country would like to know it. Can't you give the desired information in your next?

Very Respectfully, E. L. WHIPPLE.

In answer to the above questions we will say that the rifles used by both teams were admissible under the conditions defining a military weapon, but in reality they were, as we are informed, the long range or small bore sporting barrels with only military stocks and mountings. The rifles used in the International match were a class of arms not in use by any organized military company. Ten members of the British team used the breech-loading Metford rifle, and two of them shot Webley's patent. They use a 540-grain bullet, having a charge of from 75 to 85 grains of powder. The Americans had nine Hepburn-Remington guns of .44 caliber among them, chambered for a .45 caliber shell, and two Sharps' Borchard's .45 caliber, with one Hotchkiss repeater. The English guns were of .45 caliber, the same as the Martini-Heury, which is now the regulation weapon of the British service.

In regard to Sir Henry Halford attributing the victory to the superiority of weapons used by the English, he might justly have added that it was the superiority of the men as well. It is to be hoped that should the English and Americans ever compete again, with the rifle, for honors or prizes, the Americans will send out their best arms and best trained men instead of their second-class. We have as good sharpshooters and as good rifles as any in the world and the last defeat of the American team will be a lesson not soon forgot.

THE RIFLE TEAMS AT WEST POINT.—The British and American rifle teams made an excursion to West Point last Monday, by invitation of the American Rifle Association, on the steamer Nelson T. Hopkins. A stay of three hours was made at West Point. At the wharf the riflemen were met by Lieut. Gilmore, and at the adjutant's office they were introduced to the Commandant, General Merritt. After a stroll over the grounds the visitors witnessed a battalion drill by the cadets, which was followed by a dress parade. Colonel Walrod left the party at West Point, and will proceed to Winnipeg to engage in deer-hunting. He will sail for Europe October 26.

A farmer in the vicinity of Creedmoor was observed in the act of driving his sheep into the barn for safety last week, and when asked by a neighbor why he confined his flock at such an hour, replied significantly: "I hear that the American riflemen are going to practice this afternoon."

The Thirteenth Regiment, N. G. S. N. Y., gave a grand military review, followed by a festival and concert in honor of the British and American rifle teams, at Manhattan Beach, last Monday evening.

Sir Henry Halford and some of the members of the British military rifle team sailed last Tuesday from New York for England.

General Phil Sherman and party have returned home from a hunting trip in the Yellowstone country, and report a pleasant and successful hunt.

THE KENNEL.

Gilroy Field Trials.

The date set for running the Gilroy field trials has been postponed until Monday, November 27th. This was done at the request of a number of gentlemen who have dogs entered and who found that the extra time was needed to enable them to give the requisite training. We want to see the sportsmen of the State put their shoulders to the wheel and make these trials a grand success. To lend a helping hand will cost but a little time and trouble and that will be repaid by the pleasure of seeing the trials run and the satisfaction of knowing that one is helping along an exhibition that will eventually redound to the benefit of every sportsman in the State. There is no need to tell the experienced shooter the advantage of field trials but gentlemen who are just beginning to shoot and own a dog might ask "of what benefit to me can these trials be?" The answer is that they will teach much that all sportsmen should know about the handling of dogs in the field and further by making the business of breeding setters and pointers more profitable than it is at present they will add to the number of those who engage in it and make well broken dogs more easy to get than they are at present. They will also teach which is the breed and strain of dogs best adapted to quail hunting in this State, a question that is by no means definitely settled as yet. The first and even the second year may not tell much but if a certain strain of dogs win at these trials several years in succession it will be a rational conclusion to arrive at that such strain is the best for California. Then again the trials will win over many a proselyte to the sportsman's creed. As well advertised public exhibitions they will attract many persons who otherwise would never think of going to see how a brace of dogs work on game and these who are at first mere spectators will, by degrees, come within the reach of that spell which all field sports throw around their votaries and once within that potent influence they may be numbered among the glorious ranks of sportsmen. A few selfish people may say that there are enough shooters already to kill all the game accessible to city folks, but, as every sportsman is also a game preserver, it is fair to conclude that the new additions to the ranks will earn their game in advance by furthering the cause of game protection which is sadly in need of their help. Of the delights of attending a well managed field trial those who have been there never weary of telling. It is not given to every man who has the desire to own a good dog, but next to the enjoyment of seeing one's own dog work is the pleasure of seeing the skill of another's. What can be finer on a pleasant day, such as Gilroy always has in October, than to stand and watch a finely broken pair of pointers, quartering their ground. Their pace is almost as fast as a pair of racers till the keen scent warns one or the other the game is near. Then the attitude of a "point" finer than the grandest conception of artist or sculptor gives rare delight to the spectator. Every hair on the dog was rigid and every limb as motionless as though he was suddenly turned to stone. His companion backs him nobly and there they stand, a sight for the gods to gaze on until, a motion from the handler orders the leading dog to move up to his game. How cautiously he works ahead and how wistfully the other looks if ordered to "charge" or remain still. Soon the bird is flushed and brought down by a skillful shot. The well-trained animal "drops" and crouches on the ground as though driven into the earth and awaits the command to "go fetch." How joyfully this order is obeyed and how demurely his companion awaits his instructions to come to heel or go look for fresh game. The tenderness with which the dead or wounded bird is handled is a triumph of the trainer's art. Not a feather misplaced or crushed, not a mark to tell that the bird when laid in the shooters' hand has ever been between the cruel jaws of a dog. No pen can tell the delights of witnessing man's control of the lower animals and the animal's intelligence when well trained. To be felt it needs be seen and we advise all who can spare the time to put aside all other enjoyments and make it their business to be present at the Gilroy field trials.

Pioneer Coursing Club.

For some time past the Pioneer Coursing Club of San Francisco has not held its regular monthly meetings and an impression has gone abroad that the club is defunct. This is not the case though it is true that the members are rather scattered at the present time and do not show as much enthusiasm in the sport as was their wont a few years ago. In all probability the club will hold a meeting this fall as has been its custom for many years past but owing to many discouraging circumstances it will be necessary to make the match an open one. Of those who a few years ago made the club the leader in coursing in this State but few are left in San Francisco. Tom Tunstead is away and so is Wilson Davidson the energetic secretary and perhaps the best slipper that ever loosed a pair of dogs in America. P. Lyman has made his home in Sacramento where he is an authority on the sport and is organizing a club that will be a credit to the Capital city. Poor old Captain Plance, one of the greatest lovers of the leash this State has ever seen, is dead though not forgotten, and pups that he reared, now grown up into old dogs, are making his name remembered wherever there is a coursing match held in this State. Sam Jones, of Stockton, Master Jones, of Merced and Paul Jones, of San Francisco, were among the last litter the kindly old gentleman raised and all have done well in the field within the past twelve months. Nat Curry is not breeding any dogs now though when the club comes together again he will doubtless be on hand to lend tone to the sport. James Adams has had no worthy representatives in the field since Ruler beat Minnehaha after the game little bitch had won three years in succession. He had to succumb next year to Dr. Meares' Monarch, a splendid son of Franklin's old blue dog, who would have won many more laurels for the doctor had not a sudden and violent death ended his career. Dr. Meares has not been at a meeting since Monarch's death though he has nearly always a dog or two entered in his name. Dr. Sharkey has cast in his dog with one of the younger clubs, and so has Judge Pennie and Franklin and W. Ryan and Douglas and Berry and Carroll and many more of the old guard whose names do not readily come to mind. Of those who are left of the old Pioneer club, J. Adams, Clem Dixon and N. Curry are the best known and whether they have enough energy left to bring back the club to its pristine vigor is a question which time alone can answer. For our part we rather think that with the infusion of a little fresh blood the old club will once again take its place as California Coursing Club No. 1.

There are dogs and dogs and no end of dogs but not all either useful, beautiful or desirable. A few days ago a firm of theatrical managers in New York advertised for a New-

jonndland dog to appear in a new play, and the next morning Booth's Theater was besieged and the streets blockaded by a crowd of about five hundred persons with every description of dogs, from the microscopical black and tan to the gigantic mastiff.

Eastern Field Trials.

The following description of the closing heat of the Western field trials run at Fairmont, September 12, is from the New York Herald. For a piece of concise descriptive writing it could hardly be excelled: "The first brace put down were Gertrude and Frank H to finish the undecided of Saturday. Frank ran wild and did not obey with any promptness, nor was his nose in good order, so that Gertrude who is superior in speed and quartering, had him beaten by two points, according to the judge's books, without retrieving which it seems she will not do. Five minutes, rest was given, and then Gertrude and Sue went down together. They are evenly matched in size, but Gertrude outstyled Sue, who, however, has a trifle more speed and ranges better. There is not much choice between them in quartering, but when it came down to finding birds and pointing them, stanching without flushes, then Sue had it her own way and won easily. Gertrude made three bad flushes and only got one good point, while Sue got four.

Dan and Sue were then put down after a brief interval of fifteen minutes. Both went off with equal speed, but Dan almost instantly got down to business. Casting into a stubble field he struck a stylish point, turned, roamed some distance down wind and flushed three birds just as he straightened out stiff. He dropped to wing. Ranging on he came to a stanch point, and his handler approaching, he roamed steadily down wind for some sixty yards and found his bird, which was missed. This was very fine work. Getting into a stubble field both dogs quartered beautifully and ranged wide, doing the prettiest work of the day. Moving on to another stubble Sue made a very fine point and then flushed the covey; both dropped to wing. Dan then ranged ahead and got a long point at a covey away up wind which flushed wild as the wagon approached. Dan again pointed, going up a ridge side, but no bird was found, though an old cock flushed wild to the right. Dan and Sue, the former some ten yards to the rear, dropped instantaneously. Ordered on Dan began to road and Sue to quarter and this she did ahead of him as he roamed till she flushed the birds. Moving into long grass Sue flushed a single bird and Dan won. He is an imported liver and white pointer dog, by Price's Bang, out of Pera, a stoutly built tremendously muscled dog of fine nose and wonderful stanchness and perseverance. Every one is satisfied that the best dog won. Mr. Vandervoort handles his dog as if he knew he had a good one and intended he should work on his own success."

HERD AND SWINE.

Fitting Cattle for Sale.

Breeders are in the habit of feeding their young bulls pretty heavy, making them fat, if they can, because few men are well enough versed in fine-bred cattle to enable them to judge of the merits of an animal, young or old, upon his record and points, unless the points are points of fat. A man who has learned cattle thoroughly can safely trust himself to buy an animal thin in flesh, provided he can learn of the ancestry, and has the pedigree before him. But the inexperienced buyer will take the fat bull or heifer with many faults covered, or at least obscured by fat, and leave the meritorious one standing in the stall, because not so fat and sleek as the other.

That excessive efforts have been made to fit animals for sale, to the detriment of their breeding qualities, we well know. But fitting within reasonable limits is warrantable, because buyers require animals to be attractive to the eye. The merchant places his goods in the most attractive shape, to insure a sale, and in doing so merely carries out the common practice in all lines of business. The man having a lot of horses or mules to sell feeds them up to a state of fatness. Common custom grants this privilege, and no exceptions are taken. Therefore, if the novice is unable to judge of what he regards as merit, the beast being thin or in moderate flesh only, he had better secure the services of some one better informed than himself. He employs the shoemaker or tailor to make his boots and coat, simply because they are lines of business he acknowledges ignorance of, but he blunders ahead and buys animals that are in no wise suitable to be used as breeders. The coat and boots wear out, leaving no trace, while the indiscreet purchase in the matter of the breeding animal may leave the impress of his imperfections upon every young thing of his kind on the farm. And the impress he leaves is very hard to overcome.

Tendency to grow into good shape is inherent in all animals that have been bred under proper rules, and this tendency shows itself to the practiced eye, no matter what the state of keeping. So in fitting for sale, whether public or private, the breeder if he fattens his animals does so to meet the demand of an average customer, who, as stated, will turn from the premises of the breeder that shows meritorious animals in moderate flesh to those of the man who fattens an inferior beast up to the point best calculated to captivate the novice.

Now if, under this rule of practice, the buyer gets encumbered with animals who fail to produce, he has no right to reflect upon anyone but himself, much less to bring the seller into court—we have mentioned a rule of law which contemplates that the buyer shall use due diligence, keeping his eyes open, and if there is any outward defect he is presumed to have discovered it.

Excessive and harmful fatness is a condition entirely apparent, and the man who is induced to buy on account of the animal being fat should clearly not turn his back upon the condition he has himself exacted, even though it entail a measure of disaster. There is a lesson to the progressive man in a shoddy coat. This lesson costs but a trifle compared to those which many a man has been called upon to encounter during a considerable portion of his early career as a breeder. The fruits of errors made in establishing a herd or flock do not wear out at the end of a year, but multiply and disappoint the owner.

It may be argued that we have no evidence that a given animal will fatten in a becoming manner until this evidence is seen through the accumulation of fat upon its back. Such an argument can have no force before accumulated facts, and the man who is governed by such a proposition unwittingly ignores an inflexible law—heredity—and pays, in many cases, a dollar a pound for flesh that has cost a twentieth part of this sum to put on, and is worth far less, practically, than a like number of pounds of flesh upon the steer intended for slaughter.—National Live Stock Journal.

The Turf at Greenville.

RENO, Sept. 25, 1882.

EDITOR BREEDER AND SPORTSMAN: You will see by this that I am some distance from home and as there was no correspondent of your paper in Greenville I took the liberty of sending you the result of the fair. At the pavilion the first two days' attendance was very slim but increased so that the close was fully up to previous seasons. There were some very fine displays. Notably the ladies department which showed they took a lively interest in the success of the exhibition, the judges of the week were Messrs. Thomson, Hargraves and Flournoy. Track very heavy.

SUMMARIES.

GREENVILLE, CAL., September 19.—Postponed from 18th. on account of bad weather; trotting mile heats three in five 2:35 class, three or more to enter, two or more to start

Boanoke.....1 1 1

Time—2:44 seconds.

Same day.—Match foot race, dash of a mile, between Blake and Indian John. Blake wins in a jog.
Time—6:45.

Stock Entries at San Jose.

HORSES FOR ALL WORK—Four years old stallion, James Weatherhead, San Jose Chief.
Stallion four years old, A. T. Hatch, of Vallejo, Adimar.
Stallion four years old, Massey Thomas, of Gilroy, Pollock.

Stallion three years old, D. Hellyer, of Milpitas, Clifford.
Stallion two years old, S. S. Drake, of Vallejo, Lake.
Stallion two years old, same party, Hendricks.
Stallion one year old, Young St. Lawrence, is entered.
Mare two years old, T. Andrews, of San Jose, Minnie.
Mare one year old, same party, Louise.
Mare one year old, T. W. Barstow, Beauty.
Mare four years old and over, Wm. Boots, Milpitas, Mollie H.

Mares—Best three year old, A. Barras, San Jose, a mare.

FAMILIES OTHER THAN THOROUGHBREDS.

S. S. Drake, of Vallejo, Admiral and six colts.
HORSES OF ALL WORK—Mares—Best four years old and over, S. S. Drake, Vallejo, Eve.

Mare four years old and over, S. S. Drake, Vallejo, Eva.
Stallion four year old, A. Barras, San Jose, Dom Pedro.
Mare two year old, C. H. Carey, San Jose, Emma Belle.
Stallion two year old, Louis Verdon, San Jose, John.
Stallion one year old, Geo. Kost, Jan Jose, Edwin Forest;
J. Weatherhead, San Jose, Young St. Lawrence.
Four years old and over, Young Comet, by B. F. Fish, of Santa Clara.

Two year old, Fleetwood, by E. S. Smith, San Jose.
DRAFT HORSES—Stallions—W. P. Phillips, Hollister, California Chief; J. S. Graef, Twelve-Mile House, Ottawa Chief.
STOCKING COLT—S. H. Chase, San Jose, Paul Revere.
George Easton, Gilroy, Prince Albert.
DRAFT HORSES—Mares four years old and over, S. H. Chase, San Jose, Late. Mares three years old, P. H. Doyle, Santa Clara, Lady Hercules; George Easton, Gilroy, Flora.
ROADSTERS—Stallions three years old, E. S. Smith, San

Jose, Baywood.

Two year old, E. S. Smith, San Jose, Sweetwood.
Stallion four year old and over, Wm. Boots, Milpitas, Northern Combs, Kingston and Inauguration.

ROADSTERS—Mares four years old and over, E. Topham, Milpitas, Belle.
Three years old, S. S. Drake, Vallejo, Sister.
Two years old, E. Topham, Milpitas, Lady Nutwood.

Geldings—T. W. Barstow, Son Jose, Frank.
FAMILIES—THOROUGHBREDS—Sire with not less than five colts, Judson, Wild Idle with five colts.

Thoroughbred dam with three colts, Judson, Nettie Brown.
Maggie and three colts, Napoleon, Fan and Bess, by Jas. Lendrum, of San Jose.

Bess, by James Lendrum, of San Jose.
THOROUGHBRED STALLIONS—Best four years old and over, H. C. Judson, Santa Clara, Wildidle.

Best three year old, Young Hercules, by Charles Clark, Milpitas.
Best two year old, Napoleon, James Lendrum, San Jose.

Best one year old, George, by Thomas Gallagher, San Jose.
THOROUGHBRED MARES—Best four year old and over, H. C. Judson, Santa Clara, Ella Doane.

Best two year old, O. Bouliou, Willows, Princess.
Best mare, four years old and over, Maggie, by James Lendrum, of San Jose.

Best one year old, Fan, by James Lendrum, of San Jose.
CATTLE—Ayrshire Bulls—Three years old and over, George Bement, Redwood City, Archie.

Two year old, George Bement, Lindo.
One year old, George Bement, Macbeth.
Bull calf, George Bement, Malcolm.

AYRSHIRE COWS—Cow and calf under one year, George Bement, Lady Merryton and calf, Selma and two calves.
Three years old and over, George Bement, Elaine, Ethel Brown and Stellita.

JERSEY BULLS—Two years old and over, C. B. Polhemus, Jersey Boy.
Three years old and over, General Grant, by B. F. Fish, Santa Clara.

One year old and over, J. T. Hoyt, San Mateo, Oscar Wilde, Don Juan and Banker.
One year old, Oscar Wilde and Don Juan, by C. B. Polhemus.

Same, Banker, by J. T. Hoyt, San Mateo.
Best bull calf, Tom and Jerry, by C. B. Polhemus.
JERSEY COWS—Cow and calf, C. B. Polhemus, Cherry and calf, Matella and calf.

Three year cow, C. B. Polhemus, Cherry, Fairy 2d, Pearl 2d.
Two year old, C. B. Polhemus, Matilla 2d, Pearl 3d.

One year old, C. B. Polhemus, Gipsy 2d, Sun Flower.
BEST THOROUGHBRED HERD—C. B. Polhemus, Jersey Boy, Cherry, Matella, Pearl 2d, Fairy 2d.

Two years old, George Bement, Stellinita.
One year old, George Bement, Sultana.
Heifer calf, George Bement, Sibyl.

Herd Ayrshire Cattle—George Bement, Archie (bull), Lady Merryton, Stellita, Ethel Brown and Elaine (cows).
BULLS, DURHAM—Best three year old and over, 1st Duke of Alameda, Mrs. M. E. Bradley, San Jose.

Same, Duke of the Valley, by William Quinn, Santa Clara.
Same, 2d Duke of Alameda, by C. Younger, San Jose.

Best one year old, 6th Duke of Alameda, by Mrs. M. E. Bradley, San Jose; also by same, Centerville Duke.
Same, Forest King, by C. Younger.

Same by same, Duke of Forest King.
COWS—DURHAM—Best cow and calf, Fannie 3d and calf, by Mrs. M. E. Bradley.

Same, Fushia, by Wm. Quinn, Santa Clara.
Same, Second Rose of Forest Home and calf, by C. Younger.

Best three year old and over, Fushia 4th, Wm. Quinn; same, Lady May and Maid of Erin; same, Red Dolly 2d same, Jessie Maynard and 1st Golden Gate.

Best two year old, Leonora B, by Mrs. M. E. Bradley.
Same, 7th Rose of Forest Home, by C. Younger; by same Oxford Rose 3d.

Best one year old, Mabel Bond, May Queen, by Mrs. M. E. Bradley.
Same, Innocence, by Wm. Quinn.

Same, Red Dolly 11th, by C. Younger; also 6th, Lou Ann of Forest Home and 9th Rose of Forest Home.

Best heifer calf, Peach Blossom, by Wm. Quinn, Santa Clara; also Lady Ann; also Winifred.
Same, Red Dolly 14th, by C. Younger.

SWINE.—Best Berkshire Boar—Waldo, by Tyler Beach, San Jose.
Same, Bob Ridley, by Mrs. M. E. Bradley.

Best Berkshire sow—Lizzie S, by Tyler Beach.
Same, Lizzie 1st, by Mrs. M. E. Bradley.

Finest and fattest hog, entry by Tyler Beach.
Best five pigs, entry by P. H. Doyle, Santa Clara.

Same, entry by Tyler Beach.
Same, entry by Mrs. M. E. Bradley.
BEST ESSEX SOW.—English Betsey, by P. H. Doyle, Santa Clara.

GOATS.—Angora Buck—Billy, 3rd, by Emile Portal, San Jose.
HERDS OF BEEF CATTLE.—Wm. Quinn, Santa Clara, enters five.

C. Younger, San Jose, five.
SWEEPSTAKES BULL, ANY BREED.—Wm. Quinn enters Duke of the Valley.

C. Younger enters 2d Duke of Alameda; also Forest King; also 4th Duke of Forest Home.
SWEEPSTAKE COWS, ANY BREED.—Wm. Quinn enters Fushia Fourth, Lady Mary.

C. Younger enters Jessie Maynard, Red Dolly 2d and Oxford Rose 3d.

SHEEP—MERINO—Best ram—A. Agnew, Santa Clara, Long Wool 2d.

Same, William Quinn, Santa Clara, Jim.

Same class—best ewe—A. Agnew, Jennie.

Same, Wm. Quinn, Hattie.

COTSWOLD—Best ram, Mr. King, Prince.

Same, C. Younger, Hancock No. 35.

Same—Best ewe, Wm. Quinn, Winnifaro.

Same, Solano Mack, by P. J. Babb.

Same, C. Younger, No Name and No Name 2d.

Same—Best pen three ram lambs, C. Younger.

Same—Best pen, C. Younger, five ewe lambs.

Same, Wm. Quinn, five ewe lambs.

GRADED SHEEP—Rams, Wm. Quinn, Fred.

Same—Ewe, Wm. Quinn, Susie and Jane.

BICYCLING.

Olympic Bicycle Race.

Although the fall meeting of the Olympic Athletic Club on the 23d did not bring out as large a field of starters in the bicycling event as usual, there was some good racing, and better time was made than had previously been accomplished on this track.

The strong westerly winds which prevail during the summer in this vicinity are prejudicial to the highest speed as they meet the rider full in the face upon two sides, while he is not correspondingly benefited upon the other sides which are sheltered by the stands and dressing rooms.

The track on Saturday was in fair condition but the wind was strong.

The first race was a match between J. H. Thompson with 140 yards and C. Burkhalter scratch. At the start Thompson went off at a good rate and very nearly maintained his handicap, but in the second lap Burkhalter began to reduce it and gaining steadily the remainder of the distance, passed Thompson just after entering the home stretch for the last time, winning by a few yards in 3m. 56½s.

The second was a mile handicap with H. C. Finkler at scratch, George L. King 50 yards and George Strong 120 yards. A start being effected all but King got off well, and Finkler immediately set the pace, gaining rapidly upon King for the first lap and giving promise of cutting the Pacific Coast record, which his friends thought he would be able to do easily, but the wind, and possibly being a little amiss, soon told upon him, and he ceased to gain. After the second lap King drew away from him somewhat, at the same time decreasing the distance between himself and Strong, until in the last half of the last lap he was within a few yards of the latter, but he was not quite able to make up the remainder of the distance and was beaten out by about two yards; time 3m. 10 3-5s. Finkler about 60 yards away.

The third race was a half mile handicap, with George L. King at scratch, C. Burkhalter 35 yards, R. F. Verrinder 70 yards. Verrinder held his lead well, the others closing up slowly until the last half of the last lap, when they were pretty well bunched. Rounding the last turn a table cloth would have covered the three and at about half the distance down the stretch King drew a foot or two ahead of Verrinder who led Burkhalter by about the same distance. Time, 1m. 34 3-5s.

The final event was a single lap (one fifth of a mile) each rider to run singly and his time to be taken. The entries were King and Finkler, the first making the lap in 32 3-5s. and the latter in 35s.

Fifty Mile Bicycle Race.

The interest in bicycling in this city is so great and a "boom" so very apparent that 68 persons, including spectators and officials were present on the grounds of the Manhattan Athletic Club to witness the interesting bicycle race. Promptly at 3:05 Referee Curtis started the following five competitors: W. J. Smith, of the Manhattan Athletic Club; A. R. Ives, Brooklyn Athletic Club; Lewis Hamilton of New Haven, V. C. Place, Greenville, Pa., and B. G. Sanford, Ixion Bicycle Club. Smith took the lead closely followed by Sanford and Place, and forced the pace, soon lapping Hamilton and Ives, and thus joined the five, forming a curious procession for over twenty miles, each one alternately leading. Sanford was mounted on a 50 in. Rudge, Place rode a 54 in. Harvard, three inches too small, Smith a rapid racer, 54 in., Ives, a 52 in. Challenger, while Hamilton towered above them all on his 60 in. Yale. Hamilton is the young man who won the two and five mile races at Springfield and has never won any long races, having merely entered to "learn something" which he probably did. Had he followed the leaders more closely, he would probably have had second place, his last ten miles showing some excellent riding. He rode in good form and held the pole closer than his competitors. Smith is the well-known rider who ran the League championship last year, but having been lately married was not in as good form as he might show. He is better adapted to short races.

Mr. Place is a new rider and but lately seen on the path. He recently made a mile in the fast time of 2m. 58s., and mounted on a 57 in. machine, his proper size, will prove a worthy competitor in the future. He seems strong and a good spurter, and experienced more difficulty in keeping his place in the line than in going ahead. Sanford was the only New York man in the race and was last man in the fifty-mile race at the Institute. Since that he has trained carefully and surprised himself and his friends by securing second. He rode in good form and with excellent judgment. Ives is a stranger and had he not been taken with cramps would probably have been near at hand at the finish. Place was the first to finish the ten miles in 41m. 2s., but Smith led at the twenty miles in 1h. 2m. 41½s. At the thirtieth mile Sanford was to the front, the watches showing 2h. 4m. 47s. for the distance. At this point Smith, who had indulged in occasional spurts in the hope of gaining a lap or two, was taken with cramps and dismounted to be rubbed. He remounted again and struggled along for a few laps a quarter of a mile in the rear, but was obliged to succumb to the inevitable and withdrew altogether. Lap after lap was reeled off until the fortieth mile was reached by Place in 2h. 46m. 38s., and Sanford followed three-quarters of a second later. At this point Ives also became cramped and withdrew, leaving Hamilton three laps behind Sanford and Place. The tall man then went to the front and surprised all by spurring finely, and was soon within a lap of Sanford. The long journey, however, told upon him and he was obliged to content himself with third place. Place appeared at this point in fine condition, and in the last mile spurred and ran easily in 3h. 29m. 11½s., Sanford second in 3h. 28. 45s., and Hamilton third in 3h. 29m. 28½s. All three men were ahead of the best American record for out-door track. The following are the times of the three leaders at every ten miles:

Miles.	Place.		Sanford.		Smith.		Hamilton.	
	H.	M. S.	H.	M. S.	H.	M. S.	H.	M. S.
10		41 2		41 2½		41 2½	
20	1	21 42	1	21 41½	1	21 41½	
30	2	4 47½	2	4 47	2	4 48	
40*	2	46 38	2	46 38½	withdrew		2	48 3
50*	3	27 11½	3	28 46			3	29 28½

*Best out-door record.

The race was well managed and all the rules were properly complied with. The following were the officers of the day: W. B. Curtis, referee; G. Thomas, Elliott Mason, F. Jenkins, judges; M. McEwen, C. J. Connell, timers; F. Abbott, F. G. Bourne, G. Brady, J. M. Young, J. McMahon, C. Suckow, timers; F. S. Graham, clerk of course; G. M. L. Sacks, marshal.—*The Wheel*.

Holidays on the Bicycle.

He gets most out of his vacation who most thoroughly breaks away from the routine of the year's work, and most completely insulates himself from business. In the doing of this the bicycle has great advantages. It takes a man "far from the madding crowd." Americans go on a vacation as elephants go to water, in herds; a few great centers congest with a fevered mass of pleasure seekers. "The pursuit of happiness" is the "inalienable right" of every American citizen. The way of seeking it is as truly American as the object sought. Mountains swarm, seaside resorts are stuffed, springs are crowded with people in search of rest. The music changes, the dance goes on, the summer waltz is even more tiresome than the winter german. The wheel puts an end to this, throws a man upon himself for company, drops him at a farm house for the night, commands communion with nature, unfolds the beauties of hill and valley as a panorama, refuses to wear away the night in riot and excess, and, more vigorously than old Puritan laws, insist upon the night for rest. It cuts the telegraph wire that trails behind him like a spider's thread, always ready to call him back. It taboos the daily mail and paper, until, like Philip Nolan, one feels like "a man without a country." It leads one along labyrinthian by-ways, and calls a halt in the most obscure and out-of-the-way places. The bicycle insures insulation; without it, a vacation is a failure.

It forbids baggage. The impediments of the old army, the curse of vacation, are left behind. Light marching order is the condition of success. The Saratoga trunk, that deep pit through which so many modern Josephs go to prison, is closed, and even Mrs. Grundy is content when the wheel is the excuse for comfort instead of conformity.

The wheel demands exercise. Laziness can loll in drawing-room cars, and slothfulness sit on a steamer's deck, but the wheel, like the law of labor, demands sweat and toil as the price of bread, and like it, too, gives an appetite for the food earned.

The wheel is economical. The average vacation, like Pharo's lean kine, eats up the fat of the rest of the year. A can of oil feeds and doctors the steely steed. Like the beggar at the Barmacide feast, it eats nothing. There is no groom to fee, no waiter to tip.

Then, too, the rider must be sober. This horse cares for no stirrup cup; a clear head, a steady hand, or an early fall and a winter of discontent will surely follow.

"Turn, turn, my wheel! What is begun
At daybreak must at dark be done.
To-morrow will be another day.
Stop, stop, my wheel! Too soon, too soon
The noon will be the afternoon,
Too soon to-day be yesterday."

—*Ex.*

The Worcester Races.

A large number of people assembled at the New England State Fair at Worcester, Sept. 4th, to witness the annual races under the auspices of Worcester and Aeolus Clubs, who organized and carried out an interesting programme. The half mile trotting track was in fair condition, but lack of rain had rendered the surface dusty and a trifle rough. The management was efficient and prompt, and everything went smoothly; in fact the starter gave Moore no rest, and ran the events in rapid succession. We protest against the growing custom of running long races in heats, and had a few handicaps been thrown in, there would have been more starters. The fact that Frank Moore, the English champion, had entered having been largely advertised, it kept back many who would have ridden. Moore started in every race and won all of them easily, thus reducing the result of the races to almost certain.

The first heat of the two-mile race was won by Moore in 6m. 51s. Geo. W. Hendee, of Springfield, finishing the distance in 6:53. Moore allowed his contestants to lead in turn, and spurred to the front about 300 yards from home. The second heat was a repetition of the first, the time being slower, Moore crossing the line in 7m. 20½s, Hendee taking second place in 7:21.

The mile race was but a repetition of the first as regards result, Moore winning both heats in 3 m. 12½ s. and 3:24½, with A. D. Clafin second in 3:21¾ and 3:24¾. W. R. Pitman was allowed to ride under protest and secured third place. Clafin is considered a fast rider, having made two miles in 6:21¾ at Boston, April 8th. The half-mile race was contested by four men out of a field of sixteen. Pitman took the lead and held it until the quarter, when Moore passed him, followed by J. W. Wattles, Jr. About one hundred yards from the finish Pitman spurred and closed the distance between Wattles and himself, but could not pass him, and secured third place. Moore's time was 1:35 for the first heat, and 1:34 for the second.

A number of wheelmen from Boston and vicinity were present, and about 190 participated in a parade previous to the races.

The visitors were handsomely entertained by the home clubs, and every arrangement was satisfactory; no accidents of any kind occurred to mar the pleasures of the day.—*Wheel.*

PRINCE AND MILLE. ARMAINDO.—About five hundred persons, many of them ladies, assembled at the Polo Grounds in New York August 26, to witness the 25-mile race between John S. Prince and Mlle. Louise Armaindo, the latter being allowed three miles start. Prince rode a 54-inch Yale, and Armaindo rode one of similar make with 51-inch wheel. The riders left the starting point at 5:16 o'clock. Prince took the lead and increased the distance from his opponent steadily, passing her lap after lap, until Armaindo crossed the line on the second lap of her third mile, when he crossed off one mile from his handicap. Prince kept increasing his speed and passed Armaindo a second time, two miles ahead, on the second lap of the fourteenth mile. The lady rode very gracefully. The perspiration rolled off her face, and it was evident that she was too heavily clad for such arduous exercise at this season of the year. It was growing dark when Prince made the second lap of the third mile of his handicap. The excitement grew intense. The crowd cheered and the ladies waved their handkerchiefs. Armaindo worked her pedals like the cranks of a locomotive, but Prince was not idle, and he overtook and passed her on the second lap of the last mile, winning the race by 34 seconds. The New York Times gives the score as follows:

PRINCE.		ARMAINDO		PRINCE.		ARMAINDO.	
Miles.	H. M. s.	H. M. s.	Miles.	H. M. s.	H. M. s.	H. M. s.	Miles.

Previous to the principal contest, a bicycle race of ten miles was contested between Edwin Oliver of the Citizens' Bicycle Club of New York, A. R. Ives of the Brooklyn Athletic Club, and Frank Moore, the Champion of England. Ives rapidly fell behind from the start. Oliver kept ahead of the British champion until the last lap, and apparently thought he had an easy victory. On the final lap Moore "let himself out," and won the race in 0:39:41. Oliver was as much surprised at the result as any of the spectators.

The track was in a wretched condition, being soft and broken in many places, considering which, although Prince was at no time pushed and won easily, the time was very good. In the 50-mile contest with Armaindo in the Institute Building, his 25-mile time was 1h. 26m. 46s., and the lady's 22-mile was 1h. 29m. 30½s.

A Philadelphia paper, speaking of the result of opening Prospect Park to the wheelmen, says: "Bicycles, no longer banished, are on the increase. Here and there a family party who had come out by steamboat, horse cars, or park train, with prettily dressed children rolling about on the turf, or carrying luncheon to and fro, showing an unmistakable interest in a distant bicyclist making fast time on the asphalt. Arriving under their particular poplar-tree, he would swing himself from his saddle, and stabling his "wheel" upon the grass, stand revealed as the *pater-familias*, instead of the boy of seventeen he had passed for on the road. Climbed upon by merry children, and prone on the grass when the music begins again, what a healthy, happy ending for a city man of the business day!"

The "Archer up" jockey cap is by far the neatest and jauntiest head-gear for racing we have seen. It is made of silk in the regular jockey cap shape, with a small silk knot at the top. An effort will be made to have them manufactured in this country, as at present they cannot be obtained here unless imported from England.

We in this country are being gradually educated up to the standard of medium weight roadsters, say about 40 lbs. for a 50-inch bicycle, and it is believed that all the imported makes so deservedly popular will show a decided tendency hereafter toward lightening their newer patterns, instead of making them heavier.

The third competition for the £50 challenge cup, presented by the Crystal Palace Company to be competed for annually under the rules of the Bicycle Union, was won on the Crystal Palace track, August 17, by C. D. Vesey of the Surrey Bicycle Club. Distance, 15 miles; time, 46m. 22 3-5s.

Although tobacco may be "a lone man's companion, a bachelor's friend, a hungry man's food, a sad man's cordial, a wakeful man's sleep, and a chilly man's fire," it should be discarded by all men in training, if they would arrive at the best results and have what is termed "good wind."

The holding of a social evening and the formal awarding of prizes after race meetings seems to be very common in England, and might well be copied here. The social element which exists to a large extent among club members is one of the pleasantest features of wheeling.

The distrust in light and medium weight machines is fast disappearing in England, owing probably to the vast improvement in construction which has taken place of late years, and which has proved that quantity of metal is by no means synonymous with strength.

BASE BALL.

The Howards vs. the Olympics.

For some time past there has been a question of forming a new club from among the members of the Olympic club, and this idea has been carried out, the new organization appearing last Sunday in a match with the Olympics, being the first of a series of the best three out of five games for the possession of the Howard trophy. As might be expected the new club was no match for its friendly rivals on the diamond field, but it is composed of excellent material, and with practice and experience the team will doubtless show great improvement, especially when the men get accustomed to their positions in the field and can bat with more freedom and effect. The game for to-morrow at the same grounds being a match between the Olympics and Redingtons, that promises to be a close and interesting contest. We append the score of last Sunday's game :

HOWARDS.						OLYMPICS.

The Niantics vs the Haverlys.

These two clubs met at the Recreation Grounds last Sunday, and there were bright anticipations of a grand display of skill, but these were soon dispelled, as taken altogether the game was about the poorest exhibition ever yet given at these grounds by such organizations as the Niantics and the Haverlys, although it must be owned that the Niantics were laboring under the disadvantage of three of their best men being absent. The play needs no special mention, and it is to be hoped, for the sake of the reputation of the clubs, that we shall see no repetition of last Sunday's game. The following is the score:

NIANTICS.										HAVERLYS.									
T. B. R. B. II. P. O. A. E.										T. B. R. B. II. P. O. A. E.									
Incell, p.....	6	0	0	1	10	1	J. Carroll, p.....	7	1	2	2	9	2

For the past two months a large number of the members of the Olympic Club and other gentlemen interested in base ball matters have used all their endeavors to bring about a match between the Olympic Club nine and the Redington & Co. nine and it was not until last Tuesday that a game was finally arranged between these two nines. The Redingtons were organized at the beginning of the present season, and are under the management of Mr. Albert D. Dugan. They have played several games and generally come out victorious. They are in splendid practice and are handsomely uniformed and equipped. The Olympic nine is composed of members of the Olympic Club and is under the guidance of Mr. Chas. S. Neal and Wm. Bouton. This club was also organized this season and the members have been in constant practice. They have played a number of games and have only been defeated once, and that by the Redingtons, but in a second game with the same nine the Olympics were victorious, hence the interest in this match. The Olympics are all powerful men and heavy batters, while the Redingtons are rather slight and make up in their lively fielding what they lack in batting. The game will take place on Sunday next, Oct. 1st, at the Olympic Club grounds, Oakland. Game will be called at 11 A. M. Admission to the ground is free and a very large attendance is expected.

ATHLETICS.

Olympic Club, Fall Meeting.

The most interesting subject of conversation in athletic circles at present is the 100 yds. dash between Haley and Masterson last Saturday, at the Olympic Club Fall Meeting, on the Club grounds in Oakland. The match was made the Sunday previous, and on that day Masterson could have easily defeated Haley, as the latter was unable to repeat in better time than 10½, but the few days intervening between that time and the actual race put him in first-class condition for a short dash, and he finished the last forty yards in grand style, winning by fully 4½ feet, and looked around for his opponent ten yards from the tape. As it was a match between the two, they both broke over the mark simultaneously four times without being penalized. The actual start was conceded by both competitors, the starter, and all of the spectators, to have been perfectly even; and the pistol was undoubtedly fired before they had gone over the mark. At sixty yards they were perfectly even, but at that point Haley settled down to business and began to draw away, and in a few more strides was safe to win. Masterson need not have been beaten more than three feet, but a few yards from home, realizing that a struggle was useless, began to ease up, and the verdict was a beating of from 1½ to 2 yds. Outside of a few prejudiced individuals it has been well known for the last two years that Haley was a first-class amateur sprinter, and, by the by, his most venomous enemies of the past are now the most anxious to convince the balance of the athletic world that he is entitled to the best amateur record for the distance. On this peninsula, as some of our eastern contemporaries are well aware, we are blessed with an extremely equitable temperature, and the extremes of other localities, even on the Pacific Coast, are very trying to residents of San Francisco, until they are thoroughly acclimated. A first-class San Francisco athlete is liable to be defeated any time during the warm season fifty miles from this city, by a second-class man, and if sent east during the summer would be too debilitated by the heat and change of climate to rate higher than third class. Athletics on this coast are still in their infancy, and it is almost useless to hope that another effort will be made for some time to come towards sending representatives East. However, we will bide our time, and when the general public learns to appreciate legitimate amateur athletics, the best athletics in the world will be rapidly developed, and California will brag of something besides climate and horses.

Haley is capable of competing in the best of company in any amateur event from 100 to 220 yards that may take place in this vicinity, and if any amateur from the East should happen out this way next season, Haley will be ready to prove what he can do, and Masterson bids fair to divide the honors with him. Another match between them is on the tapis for next Thanksgiving Day, and if Masterson is properly trained for the event, it will be hard to name the winner in advance. Brooks promises to come out here next year in condition for a race, and with Haley and Masterson as representatives we should be able to show the rest of the world that we are not so green as they think we are. The following is a summary of the events of the day:

One hundred yards handicap, open. First trial heat, W. R. Stewart, scratch, 1; F. M. Day, 5 yards, 2; W. D. O'Kane, 2 yards, 3; time 10 4-5 seconds. Second heat, A. L. Harris, 4 yards, 1; Wm. C. Brown, 1 yard, 2; Eugene VanCourt, 4 yards, 3; time 10 3-4 seconds. Third heat, C. H. Slater, 4 yards, 1; E. S. Emmons, 1 yard, 2; time 10 3-5. Final heat, C. H. Slater, 1; A. L. Harris, 2; W. R. Stewart, 3; time 10½ seconds.

One mile scratch, A. W. Brown, C. A. and L. C., 1; P. H. Hamell, O. A. C., 2. Time 6 mins., one-fourth second (leather medals in order).

One mile handicap bicycle race. C. Burkhalter, scratch, 1; J. H. Thompson, 140 yards, 2. Time 3:56½.

One hundred yards scratch run, R. S. Haley, O. A. C., 1; Jas. Masterson, C. A. and L. C., 2; time 9 4-5. The time as given by each individual timer was: H. B. Cook, 9½; P. McIntyre, 9 4-5; W. R. Melville, 10 seconds.

One hundred yards handicap run, O. C. juvenile class, H. Smith, 1; E. Jennings, 2. Time 14½.

Pole leaping handicap, C. L. Ebner, 8 inches, 1, height, 8 ft., 5 in.; C. H. Slater, 2; E. G. Rodolph, 3.

One mile handicap bicycle race, Geo. H. Strong, 120 yards, 1; Geo. L. King, 50 yards, 2; H. C. Finkler, scratch, 3. Time 3:10 3-5.

One hundred yards scratch run, open, R. S. Haley barred. Jos. Masterson 1, W. R. Stewart 2, time, 10:15.

Running wide jump, R. S. Haley 1, (18 ft. 2½ in.), L. Ebner 2, Wm. D. O'Kane 3.

Two hundred and twenty yards handicap, O. C. Juvenile class, W. Van Bergen 1, H. Audifred 2; time, 2:53.

Two hundred and twenty yards handicap run, C. H. Slater 10 yards, 1; A. L. Harris 9 yards, 2; E. S. Emmons 4 yards, 3; time, 2:23 2-5.

Eight hundred and eighty yards handicap bicycle race, George L. King scratch, 1; R. F. Verrinder 70 yards, 2; C. Burkhalter 35 yards, 3; time, 1:34 3-5.

Running high jump, C. L. Ebner 1, (5 ft. 2 in.), C. H. Slater 2, (5 ft. 1 in.), E. G. Rodolph 0, R. S. Haley 0.

Wm. C. Brown was the entry for the officers' one hundred yards run, and covered the distance in 11 seconds, coached by Masterson.

Putting 16 lb weight, Cornelius Donohoe 1, (32 ft. 3½ in.); C. H. Slater 2, (29 ft. 7 in.) O'Kane entered a protest against Donohoe. The committee allowed him to compete, and reserved their decision.

One-fifth mile bicycle race, each to ride separately against time. George L. King 1, time 32½, H. C. Finkler 2.

Throwing baseball, W. F. Bouton 1, (298 ft. 2 in.), N. W. Leonard 2, (277 ft. 5 in.)

Two hundred and twenty yards scratch hurdle race, 5 hurdles, 3 ft. 6 in.; C. H. Slater 1, E. G. Rodolph 2; time, 30½. Brown balked at the third hurdle and stopped.

FISH.

FIN POWER OF THE TROUT.—Some time ago the President of one of our national banks, and a lumberman of large experience in the North Woods, told me that on one occasion he saw trout surmounting a waterfall down which the water came vertically in one broad sheet. He said the trout would swim directly up in this sheet of water unless their fins, owing to the small volume of water, would extend beyond it, when they would fall back and try again. This was new to me and I would like to hear what others have to say on the subject. My informant was convinced that the force and direct downfall of water would not impede the passage of a trout, provided the sheet of water was thick enough for the fish to use his fins.—A. N. C., in *American Angler*.

AN OUTRAGE.—Young shad are being caught in large numbers in seines by the Italian fishermen at Sancelito. On Sunday last at least fifty of these fish were thus taken between old and new Sancelito, and, to make matters worse, bought for use of one of the yacht club houses in the neighborhood. The fish ran about half a pound in weight. We are informed that the purveyor in this case is a leading officer of the yacht club.

PUGET SOUND SALMON.—The silver salmon this season are very small, but the Chinook fish are correspondingly large. Near the mouth of Dunwainish river the bay is literally dotted with canoes and boats, the occupants of which are engaged in fishing. The ruling price now is five cents for good sized salmon, but as the season advances the price will decline.—*Post-Intelligencer*.

A most interesting method of fattening fish is that of Mr. Knifer, superintendent of the royal fisheries at Munich. Partly in small stone troughs and partly in small ponds trout may be seen by the hundred weight, not only alongside of each other, but in a literal sense above each other. In some of the stone troughs there are certainly more trout than water; but not only trout, but the magnificent saibling of the Schiller Lake, large Salmon *huch*, enormous numbers of splendid eels from Italy; and above everything else, hundreds of thousands of crawfish are here gathered within a narrow space and enjoy the most careful treatment.

Large piscicultural establishments have been started by men who possessed little or no theoretical knowledge. People will begin, not with 5,000 to 10,000 trout eggs, but with hundreds of thousands, yea, millions of eggs, in the hope that large profits will quickly be realized. If, as will generally be the case, these profits do not come; if, on the contrary, failure is succeeded by failure, the whole cause is condemned, and we often hear it said: "So-and-so has also commenced to raise trout, but of course nothing came of it, pisciculture is a delusion."

The reasons why most of our piscicultural establishments proper do not flourish are manifold. The chief cause, however, has been carelessness in the selection of a location. And where the location and the condition of the water were favorable, it is often impossible to procure suitable food in sufficient quantities, at any rate at a reasonable price.

Last Tuesday twenty pounds of salmon was caught in the Feather River, near the mouth of the Yuba. These are the first salmon caught in the Feather for many years. Their presence might not have been known had not one of the fish run on a sandbank and been caught.

The huchen (Salmon *huch*), on account of its great voracity and because it never eats anything that is dead, is only suited for raising in ponds where there are large numbers of small and otherwise worthless fish.

The fish in the streams of Montana and Idaho in the vicinity of the railroad are being destroyed by wholesale, both whites and Chinese using giant powder to effect their destruction.

Good trout fishing can be had at the mouths of some of the creeks emptying into the bay. The fish are awaiting the first rains in order to run up to the breeding grounds.

The cannery at Benicia closed last Tuesday evening for the season, owing to the scarcity of salmon. The cannery at Martinez has also shut down.

Several parties of anglers went down to Moss Landing, Monterey Bay, Sunday, and had fine sport catching crabs and smelt. Mark Hudson, Stub Ben and party caught 175 smelt, Ed Card caught over fifty, and William Courtright caught eighty-five smelt and twenty-two crabs. These fish were caught with hook and line. The same day several large hauls were made at the Camp Goodall wharf. The bay seems to be full of smelt this year. The Chinese fishermen at Aptos and Soquel are making large hauls daily, and shipping the same to San Francisco.

An effort is being made to introduce more extensively the black bass into English waters. Some of the nobility who have angled for perch only object to the western fish as they think that bass are not gamey enough. In this idea they are wrong as the black bass is the pluckiest and hardest fighter that the fresh water can boast of.

C. H. Precht caught a string of fifty tom cods last Sunday at the sea wall. Many of the fish weighed one and a half pounds.

A note from a correspondent at Pescadero says that trout are now plentiful there and running large.

The trout fishing privilege expires by limitation to-day.

POULTRY.

Brief Suggestions.

Breeders of Plymouth Rocks declare that a mating of dark medium hens and light medium cocks produced the greatest number of good cockerels for breeding or for exhibition.

If you have one or two good breeds of fowls, it is better to spend time improving them than to be hankering after others, unless you have abundant means and plenty of room.

One of the best tonics for chickens, and probably one of the simplest, is to keep a handful of old rusty nails—the more rust on them the better—in each dish from which they drink. The rust is the oxide of iron sold by the druggists, and the home-made is as good as the sale article.

If chickens have sore eyes (though they ought not to do so, and won't if your management is correct from the beginning, before the eggs are laid) you can apply glycerine to good advantage, one small drop to each eye. This will soften the edges of the lids so that the bird can open them.

You can raise ducks and geese without an abundance of water. There is more fun, of course, in seeing them swim in brooks, rivers or ponds, yet if you give them enough pure water to drink, and allow them an occasional plunge bath, they will thrive first-rate with no water range.

The first eggs of the litter are always the best for hatching. After a hen has produced twenty or thirty eggs in perhaps as many consecutive days, the strain upon her strength is very great, and consequently the eggs become impaired in vitality and capacity to produce vigorous chickens.

Clear rye bran should never be fed to fowls, on account of its swelling and caking in masses in the crop, and proving fatal to chicken-life not unfrequently. It will thus sodden and increase in bulk very rapidly before digesting, causing rupture of the crop, if any great quantity has been eaten.

"What is worth doing at all is worth doing well." This proverb will nowhere apply better than to the care of poultry. Without constant attention and thoroughness, success is not to be expected. Some kinds of business may be occasionally slighted without serious harm, but in this occupation one mishap may blast the hopes of a whole season.

Young chickens drink a great deal of water, but they, in common with all animals, know just how much they need. Mix your corn and dough very dry and crumbly, therefore, and let the fowls drink fresh, cool, clean water after they are through eating. If your mess is mixed too thin and sloppy you will force them to swallow more water than they need, in order to get at their feed.—*The American Poultry Yard*.

Lorillard's Aranza won the Great Eastern Railway Handicap at Newmarket last Tuesday, and Lorillard's Sachem and Keene's Bookmaker are at the head in the betting on the Cambridge Stakes, which will be run over the same course October 14th.

WE HAVE SEEN SUCH THERE.—Given a strong pair of lines with a spirited horse at one end and a fool at the other, and we have every requisite for an impressive scene. The driver now pulls a strong rein, then gives a jerk or two, anon measures the whip on the horse's flank and sides, and—well, scene number two is before us, in which appears a horse being treated with St. Jacobs Oil for his cuts and bruises, a foolish man, under the same treatment for the improvement of his battered anatomy, and the carriage builder with an account half a yard long for repairs to a once magnificent buggy. No use of talking, it takes brains and St. Jacobs Oil to drive a spirited horse successfully.—*N. Y. Spirit*.

ONLY
\$8.

OUR NEW AMERICAN LEVER WATCH!

After months of labor and experiment, we have at last brought to perfection a NEW WATCH. It is a Key Winding Watch with the celebrated Anchor Lever Movement, Expansion Balance, Fully Jeweled. They are made of the best material, and in the very best manner, so as to insure good time-keeping qualities. The Cases are made of our Celebrated Composition metal known as **ALUMINUM GOLD**. This metal has a sufficient amount of gold in the composition to give the watch a genuine gold appearance. Indeed it cannot be told from a genuine Gold Watch except by the best judges as the metal stands the acid test as well as pure gold. The cases are finely engraved or eugine turned and are massive and strong and very handsome making it just the watch for Railroad men, Mechanics and all laboring men who require a good strong watch and an accurate time-keeper. For trading and speculative purposes, it is superior to any watch ever before offered. They can be sold readily for \$15 and \$20 each, and traded so as to realize double those amounts. Farmers as well as Agents can handle these watches to advantage, as they can be readily exchanged for stock or goods. We send the watch free by registered mail, on receipt of \$8.00. Or we will send it C. O. D. on receipt of \$1.00 on a count, the balance can be paid at the express office. We also have very fine Aluminum Gold Chains at \$5.00 each. Beautiful Medallion Charms 50 cents each. We have hundreds of testimonials, but have room for only two.

Hot Springs, Ark. Jan. 2d, 1892.
WORLD MANUFACTURING CO. Gents:—The New American Aluminum Gold Watch I ordered of you some time ago was duly received, and I am so well pleased with it that I enclose Seven Dollars, P. O. order, on account, for which please forward by express C. O. D. for balance, three more of the same style with chains to match. Respectfully, Carleton Taylor.

Leavenworth, Kan. Aug. 7th, 1892.
WORLD MANUFACTURING CO. Gents:—The Aluminum Gold American Lever Watch purchased from your firm has proved a good time-keeper, and gives perfect satisfaction. Enclosed find cash for two more, same style. Yours, G. F. ECKERT.
Send all orders to WORLD MANUFACTURING CO., 122 Nassau Street, New York.

It is seldom that we meet with an article that so fully corresponds with its advertised good qualities as does the New American Lever Watch. It has the advantage of being made of that precious metal Aluminum Gold; its works are of the best make, and the general style of the case rank it with the best Watches made anywhere. We recommend it to our readers as a Watch that will give entire satisfaction.

Market Report.

FLOUR—Good jobbing trade. We quote: Best City Extra, \$5 37½; 50; Superfine, \$4 50; \$4 75; Interior Extra, \$4 75; \$5 25; Interior Superfine \$3 75; \$4 10; \$4 15.

WHEAT—The market is very dull at present with no immediate prospect for the better. The condition is no doubt owing to the inactivity of foreign markets. Small spot lots of No. 1 bring \$1 65 and at these figures there is but little demand. The range of prices are October \$1 60, and November \$1 70.

BARLEY—Feed is strong with an upward tendency. Sales of October are \$1 30, \$1 31½, and some as high as \$1 32. November \$1 32½. Brewing and Chevalier receive but little notice.

OATS—Prices of this grain are steadier than they were last week. The range is from \$1 47½ to \$1 62½ per cwt.

RYE—Receipts are moderately free. There is a fair demand for No. 1 which is quoted at \$2 25 to \$1 75 for No. 2 quality.

FEED—The selling rates for bran at the mills range from \$18 50 to \$19 50 per ton. Ground Barley, prices steady and quoted at \$20 to \$31 per ton. Cracked Corn, quoted at \$8 per ton. Shorts, Sellers asking \$20 50 to \$21 per ton. Middlings, quotable at \$28 to \$29 per ton for lots at mill. Oilcake meal, the oil works sell to the trade at \$32 50 per ton, less the usual discount.

HAY—We quote: Alfalfa, \$11 to \$13 50; Wheat \$13 to \$15 50; Wild Oat, \$12 to \$15 50 per ton.

STRAW—Quotable at \$6 to \$6 50 per bale.

BEANS—We quote for jobbing lots: Bayos \$2 50 to \$2 62½; Butter, \$3 to \$3 25 for small and \$3 40 to \$3 50 for large; Lima, \$3 50 to \$3 75; Pea, \$2 50 to \$2 75; Pink, \$2 to \$2 25; Red, \$2 to \$2 25; small White, \$2 50; large White, \$2 30 to \$2 40 per cwt.

DRIED PEAS—Niles, \$2; Blackeye, \$2 25 to \$2 50 per cwt.

POTATOES—Wharf rates are as follows: Early Rose, \$5 to \$6; Garnet Chile, 90c to \$1; Early Goodrich 75c to \$1; Peerless, 60c to \$1; Sweet, \$1 50 per cwt. ONIONS—Prices continue easy. Supplies large. Quotable at \$6 to \$6 50 per cwt.

GAME—Is very scarce for this time of the year. Good prices are paid as the following shows: Quail, \$1 50 to \$1 75 per dozen; Mallard Ducks, \$3 50 to \$4; Sprig, \$2 to \$2 50; Teal, \$1 75 to \$2; Widgeon, \$1 50 to \$1 75; Hare \$1 75 to \$2; Rabbits, \$1 to \$1 50; Doves, 50 to 75c per dozen; Venison, \$4 to 10c per lb.

POULTRY—The market is steady. We quote: Live Turkeys, gobblers, 17 to 19c; do Hens, 16 to 17c; Roosters, \$6 to \$6 50 for old and \$6 to \$8 for young; Hens \$6 to \$8; Broilers, \$3 50 to \$5 according to size; Ducks, \$4 50 to \$5 per doz; Geese, \$1 to \$1 25 per pair; Goslings, \$1 50 to \$2 per pair.

PROVISIONS—We quote lots as follows: Eastern Hams, 18½ to 19c; California Hams, 16½ to 16c for plain, 16½ to 17c for sugar-cured canvased; Eastern Breakfast Bacon, 17½ to 18c; California Smoked Bacon 16½ to 16c for heavy and medium, and 17½ to 18c for light and extra light; Clear Sides, 16½ to 16c; Pork, \$21 50 to \$22 for extra Prime, \$24 to \$25 for Prime Mess, \$25 to \$25 50 for Mess, \$27 for Clear and \$28 to \$28 50 for extra Clear; Pigs' Feet, \$16 to \$18 per hbl; Mess Beef, \$14 for hbls and \$7 for hf hbls; Extra Mess Beef, \$14 50 to \$15; Family Beef, \$16 to \$16 50 to hbl; California Smoked Beef, 14½ to 14c per lb. HONEY—Comb 14 to 17c, extracted 7 to 10c per lb.

BUTTER—We quote prices for jobbing lots as follows: Factory, 47½; choice, 42½ to 45c; fair to good, 30 to 40c; inferior lots from country stores, 23 to 28c; Irish, 23 to 31c for good to choice, and 25 to 27½c for ordinary; pickled roll, 30 to 32½c; Eastern, 20 to 25c per lb.

EGGS—In fair demand. We quote as follows: California choice, 37½ to 40c; Interior, 32½ to 35c; Utah, 25 to 32c per doz.

CHEESE—We quote: California, 12½ to 13c for choice; 10 to 12c for fair to good; do, factory, 15 to 16c; Eastern, 16 to 17c; Western, 11 to 13c per lb.

FRUIT—The several descriptions continue to be well represented. We quote prices as follows: Apples, 30 to 50c for common and 75 to \$1 per box for good; Pears, 40 to 60c per box; Bartlett do, \$1 50 to \$2 per box; Strawberries, \$10 to \$12 per chest; Raspberries, \$10 to \$12 per chest; Peaches, 60c to \$1 25 per box; Figs, 40 to 75c per box; Grapes, 35 to 50c for common, 40 to 60c for Black Hamburg, 50 to 75c for Rose of Peru, 50 to 75c per box for Muscat and 75c to \$1 per box for Tokay; Plums, 25 to 75c per box; Quinces, 75c to \$1 box; Blackberries, \$5 per chest; Watermelons, \$5 to \$10 per hundred; Cantaloupes, 75c to \$1 per crate; Lemons, \$8 to \$9 per box for Sicily and \$1 to \$1 50 for California; Limes, \$7 40 to \$8 per box for Mexican; Bananas, \$2 to \$3 50 per bunch; Pineapples, \$6 to \$8 per dozen.

VEGETABLES—Unchanged. We quote: Marrowfat Squash, \$6 to 8 per ton; Carrots, 30 to 50c; Turnips, 75c to \$1; Cauliflower, 60 to 65c per dozen; Cabbage, 50 to 75c per cwt; Garlic, 1 to 1½c per lb; Cucumbers, 15 to 25c per box; Green Peas, 2½ to 3c per lb; Green Peppers, 50 to 75c per box; Tomatoes, 10 to 20c per box; Celery, 50c per doz; Summer Squash, 50 to 75c per box; String Beans, 7½ to 10c per lb; Lima Beans, 2½c per lb; Green Corn, 7c to 15c per doz; Okra, 75c to \$1; Egg Plant, 50 to 75c per box; Dried Okra, 20c per lb.

HIDES AND SKINS—No marked change. Dealers are paying the following cash rates for lots in order: Dry hides, usual selection, 20c; culls one-third less, and Mexican Hides 1c per lb less. Dry Calf, 18 to 19c; Dry Calf, 21 to 22c; Salted Steers, over 55 lbs, 11c per lb; Steers and Cows, medium, 10c; light do, 9c; Salted Calf, 15 to 30 lbs, 10 to 10½c; Salted Calf, 11 to 12c per lb; Dairy Calf, 65 to 70c each; Sheep Skins, 20 to 25c for Shearlings; 25 to 50c for short, 60 to 80c for medium, and 75c to \$1 apiece for long wool and wool skins. Butchertown Green Skins bring higher prices.

WOOL—The inquiry is not very good at present. We quote spring: Humboldt and Mendocino, 25 to 26c per lb; Sonoma, 23 to 25c; Siskiyou and Modoc, 22 to 24c; San Joaquin free 17 to 18c; Southern Coast, burry and seedy, 15 to 17c; Eastern Oregon choice, 23 to 24c; Eastern Oregon fair, 20 to 22c; Eastern Oregon, poor 18 to 19c; Valley Oregon, fine, 25 to 27c; Valley Oregon, coarse, 23 to 24c. We quote fall: San Joaquin and coast, 10 to 12c; San Joaquin and coast Lamb, 12 to 14; Northern fall, free, 15 to 17c; Northern fall, defective, 12 to 14; Northern fall, Lamb, 16 to 17c. Free Mountain, 12 to 16c.

BEEF—Prime, 7½ to 8c; medium grade, 6½ to 7c; Interior, 5½ to 6c per lb.

VEAL—Large Calves, 6½ to 7c; small ones, 8 to 10c per lb.

MUTTON—Wethers are quotable at 4½ to 5c and Ewes at 4 to 4½c per lb, according to quality.

LAMB—Quotable at 6 to 6½c per lb.

PORK—Live Hogs, 7 to 7½c for hard and 6½ to 7c for soft; dressed do, 10 to 10½c per lb for hard grain bogs.

FOR SALE.

VERY FINE HAMBLETONIAN STALLION. Imported from Syracuse, N. Y., nine years old; mahogany bay; sixteen hands high; perfectly sound; well broken; very stylish; cost over \$1,500; property of a banker; full papers; got by Hambletonian Prince, he by Volunteer. Can be seen at Club Stables.

Belmont—Mambrino Chief—Black-bird, for Sale.

BAY YEARLING COLT BY PILOT, GRANDSON OF WILLIAMSON'S BELMONT, his dam by Alhambra (by Mambrino Chief, from Nshan, by American Eclipse) grandam Oriole, by Simpson's Blackbird, is now in Oakland at the stable of

Fall Race Meeting.

PACIFIC COAST

Blood Horse Association

Introductory Day—Saturday, November 11th.

No. 1—Purse \$200; free for all; \$10 each; a dash of three-quarters of a mile; entrance money to second horse.

No. 2—Purse \$200; free for all maidens; \$10 each; one mile; entrance money to second horse.

No. 3—Handicap Stake for all ages; free for all; \$25 entrance, and \$10 if declared; \$30 added; \$50 to second horse; a dash of a mile and an eighth.

No. 4—Selling Purse, \$200; a mile and a quarter; for all ages; entrance free; \$50 to the second horse; the winner to be sold at auction; horses entered for \$1,000 to carry regular weight; if for \$1,000, five pounds allowed; if for \$750, ten pounds; if for \$500, seventeen pounds, and if for \$300, twenty-two pounds. Any one can claim the winner, and the excess realized beyond the amount at which the horse is entered to be divided between the association and the owner of the second horse.

First Day Regular Meeting—November 15th.

No. 5—The Ladies' Stake. Closed.

No. 6—Purse \$250; free for all; three-quarters of a mile and repeat; \$50 to second horse; entrance free; the winner of the dash of three-quarters on the first day to carry ten pounds extra.

No. 7—The Vestal Stake. Closed.

No. 8—Handicap purse of \$250 for two-year-olds; \$25 each and \$10 if declared; \$50 to the second horse; dash of a mile.

No. 9—Purse \$250; a mile and a quarter over five hurdles; \$50 to second horse; entrance free.

Second Day Regular Meeting—November 18th.

No. 10—Purse of \$200; a dash of seven-eighths of a mile; \$50 to the second horse; entrance free; the winner of the three-quarter dash or three-quarters and repeat to carry ten pounds extra; winner of both events to carry fifteen pounds extra.

No. 11—Purse of \$250; heats of a mile and an eighth; entrance free; \$50 to second horse; maiden three-year-olds allowed seven pounds; four-year-olds twelve pounds; maidens five years old and over twenty pounds; the winner of the dash at this distance on the first day to carry five pounds extra.

No. 12—Handicap purse of \$250 for all three-year-olds; a dash of a mile and a quarter; \$25 each and \$15 if declared; the second horse to receive \$50.

No. 13—Purse \$250; a mile and repeat over four hurdles; \$50 to second horse; entrance free.

Third Day Regular Meeting—November 23d.

No. 14—The Finigan Stake. Closed.

No. 15—The Fame Stake. Closed.

No. 16—The Baldwin Stake. Closed.

No. 17—Consolation Purse of \$200, of which \$50 to the second horse; entrance free; a mile dash; horses beaten once allowed five pounds, twice ten pounds and three times fifteen pounds.

Entries to stakes and purses not marked closed will close October 12, 1882.

Races to close will be run under weights adopted at last annual meeting, which are the same as those of American Jockey Club.

Non-members will be placed on the same footing as members of the association in regard to the payment of purses and stakes advertised, and should there be a deficiency the winners will receive a pro-rata division.

Parties making nominations will be required to record colors at time of making entries, and after record will not be allowed to ride in other colors. This rule will be strictly enforced.

All nominations in stakes and entries in purses must be made on or before the 10th day of October next, 1882, directed to C. M. CHASE, Assistant Secretary, Box 1961, P. O., San Francisco. To be valid they must be plainly postmarked on that day, October 10th.

THEO. WINTERS, President. JOS. CAIRN SIMPSON, Sec'y. C. M. CHASE, Assistant Secretary. \$30W2

Fine Thoroughbreds FOR SALE.

BY DIRECTION OF MR. W. L. PRITCHARD

we will offer for sale at public auction at 12 M. at the grounds of the

Bay District Association

SAN FRANCISCO, ON THURSDAY, NOVEMBER 16,

a choice lot of thoroughbred horses, comprising

Brood Mares—four-year-olds, three-year-olds, two-year-olds and yearlings.

These animals are of the choicest blood and afford a rare opportunity of purchasing first-class stock. For other information or catalogues apply to

W. L. PRITCHARD, Sacramento, or KILLIP & CO., Auctioneers.

"Red Clover."

NEEDHAM'S RED CLOVER BLOSSOMS AND extracts are the greatest blood-purifier in the world; also a sure cure for cancer, salt rheum, catarrh, bronchitis, etc. I can refer to many letters and testimonials of those who have been cured—some of them very remarkable. SPEED PROGRAMME

OF THE

Mount Shasta Agricultural Association, TO BE HELD IN YREKA, SISKIYOU CO., ON

Wednesday, - - - October 4th, 1882.

For racing purposes this district shall comprise Siskiyou, Shasta, Trinity, and Modoc Counties, Cal., and Jackson and Lake Counties, Oregon.

No horse shall be eligible to any of the following District Races unless owned in the District prior to October, 1881.

FIRST DAY—WEDNESDAY, OCT. 4.

No. 1—TROTTING—Free for all; 3 in 5; purse, \$500. First horse receives \$400; second horse, \$100. Entrance 10 per cent. of purse; 5 to enter, 3 to start. Entries close September 1st.

No. 2—RUNNING—Dash of a mile and a half, free for all horses owned in the District; purse, \$100; entrance \$5, added.

SECOND DAY—THURSDAY, OCT. 5.

No. 3—TROTTING—Free for all untried horses owned in the District; 2 in 3; purse, \$75; entrance \$5, added.

No. 4—RUNNING—Half mile and repeat; free for all horses owned in the District; purse, \$75; entrance \$5, added.

No. 5—TROTTING—Free for all three-year-olds and under, owned in the District; 2 in 3; purse, \$75; entrance \$5, added.

THIRD DAY—FRIDAY, OCT. 6.

Grand parade of Stock.

No. 6—TROTTING—Free for all in the District; 3 in 5; purse, \$100; entrance \$5, added.

No. 7—FOOT RACE—75 yards and repeat; purse, \$50; entrance \$5.

No. 8—RUNNING—Free for all three-year-olds and under owned in the District; dash of three-quarters of a mile; purse, \$75; entrance \$5, added.

FOURTH DAY—SATURDAY, OCT. 7.

No. 9—RUNNING—Free for all; 2 in 3; purse, \$500. First horse receives \$400; second horse, \$100; entrance 10 per cent. of purse; 5 to enter, 3 to start. Entries close Sept. 1st.

No. 10—TROTTING—Free for all horses in the District that have never beaten three minutes; 3 in 5; purse, \$100; entrance \$5, added.

Rules and Regulations.

1st. The above purses will be given without discount.

2d. In all District Races the second horse to save entrance.

3d. Entries to be placed in the entry box, kept for that purpose at the Pavilion, prior to 9 o'clock P. M. on the day prior to race.

4th. Entries must give name, pedigree, and description of horse entered as far as known.

5th. In District Races two or more entries make a field.

6th. All trotting races must be in harness.

7th. National Trotting Association Rules to govern trotting races.

8th. Pacific Coast Blood-Horse Association Rules to govern running races.

9th. Free for all, in races 1 and 9, means just what it says, and all entries to these races must be made with the Secretary on or before September 1st.

L. SWAIN, President. H. MACOFFEY, Secretary.

THE VICTORIAN TROTTING CLUB (L'd)

MLEBOURNE, AUSTRALIA, OFFER

The undermentioned Prize, to be competed for on a day to be named early in January next, 1883:

PRIZE OF 2,500 DOLLARS,

With Entrance Fees and Sweepstakes of \$50 each for starters added.

Mile heats; best three in five. Open to all comers, bar geldings.

Winner to receive \$2,500; second, two-thirds of Sweep and Entrance Fees, and third, one-third. Entrance 5 per cent.

Entries must be in the hands of Secretary at or before 4 P. M. on WEDNESDAY, 6th December, 1882.

The Victorian Trotting Club holds membership in the National Trotting Association of the United States, under which Rules the races will be governed.

Any further information desired can be obtained by addressing R. J. GIBNEY, Secretary, Kirk Bazaar, Melbourne.

AGRICULTURAL ASSOCIATION.

SIXTH DISTRICT.

AT THE CITY OF LOS ANGELES,

October 16th, 17th, 18th, 19th, 20th and 21st.

SPEED PROGRAMME.

FIRST DAY—MONDAY, OCT. 16, 1882.

SECOND DAY—TUESDAY, OCT. 17, 1882.

No. 1. District, trotting, 3 minute class; purse, \$300.

No. 2. District, trotting, 2:38 class; purse, \$100.

No. 3. District, running, colt race, free for all 2-year-olds, half mile dash; purse, \$200.

THIRD DAY—WEDNESDAY, OCT. 18.

No. 4. Trotting, free for all that never beat 2:30; purse \$500.

SAME DAY.

No. 5. District, running, free for all, half mile and repeat; purse, \$250.

SAME DAY.

No. 6. Running, free for all, mile and repeat; purse, \$250.

FOURTH DAY—THURSDAY, OCT. 19.

Ladies' riding match, distance fifteen miles, entrance free, purse \$275, divided as follows: First money, \$175; second money, \$100.

No. 7. District, trotting, 3-year-olds and under; purse \$350.

FIFTH DAY—FRIDAY, OCT. 20.

No. 8. District, trotting, 2:45 class; purse, \$400.

No. 9. District, running, 2-year-olds, three-quarter mile dash; purse, \$200.

SIXTH DAY—SATURDAY, OCT. 21.

No. 10. Trotting, free for all; purse, \$500.

SAME DAY.

No. 11. District, running, free for all, three-quarters of a mile dash; purse \$250.

SAME DAY.

No. 12. Running, free for all, 2 mile dash; purse, \$350

REMARKS AND CONDITIONS.

All trotting races are the three best in five, unless otherwise specified, three to enter and two to start. Entrance fee, 10 per cent. on purse, to accompany nomination. Purses divided at the rate of 60 per cent. to first horse, 30 per cent. to second, and 10 per cent. to third.

All running purses to be divided, two-thirds to the first horse and one-third to the second horse; four to enter and two to start, except race No. 11, three to enter and two to start.

National Association Rules to govern trotting; but the Board reserves the right to trot heats of any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats.

To fill running races, four or more subscribers are necessary.

All the two-year-olds, when running

THE CARRIAGE AND COACH HORSE.

ADMIRABLE. Owned by J. B. Haggin, Rancho Del Paso.

Sufficient size, harmony of proportion, style, high spirit, docility, proper action, good sense and a good color are among the qualities imperatively demanded in carriage horses. Although generally regarded as being synonymous there is quite a difference between the animal that has the essential requirements for a carriage horse, and those which can be rated as good "coachers." The former must be the finer animal, handsome, more highly finished, with a greater degree of symmetry, more graceful in movement, and with a greater turn of trotting speed. Bulk and smoothness of outline, with a lofty carriage, and something of what may be termed a lordly air, will cover many defects in the coach-horse. That is the technical coach-horse. The purpose being to use them to haul the cumbersome vehicle kept more for show than anything else and with heavy harness rendered still heavier with massive ornamentation. The equipages of the high functionaries and nobility of the old world were of a sort which precluded anything like rapidity of motion. Not

only heavy but awkward, devoid of beauty, lumbering cars that necessitated ponderous animals to draw them. A very large proportion of the carriages of the United States are of a different pattern, and those that are denominated coaches are distinct as can be from the European type. The clumsy horse, however stately, is entirely out of place. There must be a greater degree of activity, there must be higher form, there must be beauty independent of gorgeous trappings, a fitness for the demands of a people who have a greater share of horse aestheticism, and who have a keener appreciation of suitability. The scarcity of fine carriage horses in the cities does not argue that this position is untenable, for that arises from the country not being able to supply the want. Since the mania for breeding fast trotters has overspread the whole country, the breeding of carriage horses has been sadly neglected. Speed was held to be the only quality that would repay, and in the blind race for phenomenal trotters there was a sacrifice of important points. This was more

peculiarly the case a few years ago, as at the present time many of the stallions which are the most successful as the progenitors of fast trotters have also the characteristics that are needed for the carriage. There are also breeders who are aiming to produce the proper type without anticipation of trotting speed in this class, and are giving attention to the breeding, form, action, size, style, color, etc., independent of anything else.

The illustration preceding this article is an accurate representation of an animal which has been selected for this purpose, and in our estimation he is so very nearly a model of what the carriage horse ought to be that a reference to the picture is all-sufficient to give the idea so far as outlines are concerned. There is scarcely a point that needs correction, and though some might be better pleased with a straighter hip we prefer that there should be slope enough to insure greater freedom in the action of the hind legs, which this form of quarter certainly gives. When the inominatum is nearly

horizontal, and the buttocks full, it gives a round appearance which many fancy, but in that case the stifle is placed too high and there is a constraint that influences the action prejudicially. In the case before us the angle is not abrupt, but at a declination which does not mar the beauty of the quarter, while it gives a much better "set" to the limb. We allude to this as the only point in the configuration of Admirable which good judges of equine form would be likely to differ about, as it would be a captious critic, indeed, who was not willing to admit the correctness of form in every other respect.

Admirable was bred in France, as the following translation of the government certificate shows:

(Translation.)

National Stud.

CERTIFICATE OF BIRTH. I, the undersigned, Director of the Depot of Stallions of St. Lo, do hereby certify that it is proven by the certificate of covering, and of the declaration in proper form, which have been deposited in my hands, that the mare named Miss Coy (by Pretty Boy and Kapisat) one-half thoroughbred, born in 1873 in Normandy, height 156 centimeters, color bay, head —, legs —, and belonging to Mr. Milot who resides at St. Marcouf, Department of La Manche, was covered in 1877 by the National Stallion named Jackson (by Jackson's Quicksilver and Tamworth) No. 176—one-half thoroughbred, born in 1869 in England—height, 162 centimeters, color, dark brown, head — legs — and belonging to the Depot of Stallions of St. Lo, and from which was produced the foal herein described (in the margin) which foal was born at St. Marcouf on the 14th day of April, 1878.

In proof of which I have signed and delivered this certificate at St. Lo, on the 31st day of December, 1878. The Director,
A. PROUVAUX.

Product of the National Stallion.
Subject to a tax of 12 cents.
Article 43 of Model Order No. 26. If it is a thoroughbred mare, mention will be made of the fact.
Government Stamp.
Description: name, Admirable; Color, reddish chestnut; Head, do; Legs, do.
Seal of the Depot of Stallions of St. Lo (Manche).

Admirable was selected by a son of the owner, B. A. Haggin of New York City, and this young gentleman must have a very correct eye for proportion and admirable judgment to choose the animal he has selected. The certificate requires explanation. The marginal notes refer to the colt, the body of the certificate to the parents. To extend the description, Admirable is a bright chestnut of the most beautiful shade. There are such a variety of shades of this color that it is almost impossible to describe the exact tinge with words, though it would be difficult to obtain a handsomer hue. The coat is silky, as fine, indeed, as that of the highest bred racehorse, and the hairs in the mane and tail are also fine. The shade is uniform, head, neck, body and legs alike, the only divergence being a small white spot on the coronet of the near hind foot, and a black spot about the size of half a dollar on the quarter. Looking at him as a whole he will impress the scrutinizer as exhibiting a deal of character.

And, by the way, the whole picture which a horse presents is the best manner of forming a correct estimate of his value. There must be a harmonious entirety, a complete figure filling the eye with justness of proportion, a comprehensive image on the retina, a fitness of parts only discoverable by the animal being in a position that enables the observer to gauge everything at the same time. Thus we always like to take the first look at some distance from the animal and when Admirable was led out of the barn into the sunshine we never saw a horse that better "filled the eye" for the purpose he was purchased for. He would strike any person as something beyond the ordinary run of fine horses. The novice in horse affairs, no matter how stolid, could not withhold his admiration; the critical judge of equine form might fancy that he was imposed upon by the glamour of style and color, and anticipate that analysis will show defects that would mar the finished picture, and be surprised to find so little to find fault with on a close inspection. We have always held that the most perfect type, the nearest model to a perfect horse would only be found in the thoroughbred. This we still believe, and yet for a carriage horse there are models which would not be proper for the racecourse. In giving the points of the subject of this sketch it may puzzle some to understand why this configuration is unsuitable for the course. There have been many good racehorses which did not show as high racing form, but as is well known there are other things beside form necessary. As, however, the consideration is entirely in another field than the racecourse, therefore the adaptability for carriage uses is the topic to be commented upon.

Admirable when he left France was 15½ hands high. He was then only a trifle over four years old and now the standard shows him to have gained nearly half an inch in height, and when fully matured there is little doubt that he will exceed sixteen hands. He is a long horse for his height, and with an unusual development of muscle. He is wonderfully deep through the heart, giving him an immense girth, and the barrel is full and round. The quarters are very muscular, the second thigh powerful and the loin braced with strong fillets. The withers are high and the shoulder blades are long and wide, and with more obliquity than is usually seen even in horses which are considered excellent in this point. The neck is set on the body admirably, being deep and full at the base, tapering to the throat. The head is small, with a good deal of width between the eyes, the muzzle fine, and eyes full. The ears are slim and pointed, the nostrils cleanly cut, in fact the head is about as handsome as can be conceived. The head, neck, shoulders and chest are a beau ideal of what they should be in a carriage horse, and though there is rather more space between the forelegs than would be proper in a racer, the breadth of the

front part of the chest is an evidence of a strong constitution and the brisket could not be improved. The legs are capital. Arms and gaskins large, without a particle of cloddiness, hock and knees clean and truly formed, and from these joints to the ankles there is plenty of bone, and better yet plenty of tendon. The pasterns are "springy," having the proper angle, and the lower part filling the hoof. The feet are very good, the horn being dark and evidently of good quality. They are just the kind to stand pavements or macadamized roads, having a good width of heel and the foot nearly circular. The position of the limbs is faultless. Both the fore and the hind legs "come to the ground right," and support the body in a graceful way. From the shape of the shoulder and neck, and the setting on of the head, there must be "style" enough to suit the most fastidious, and this configuration also governs the action in a measure. From "both ends" having the proper "speed angles" we were prepared to see the right kind of action for the carriage, but we did not expect to witness such a display as he made when turned loose in the corral. When he finished his play at the gallop, and he was as active as a cat in his bounds, he struck off at such a bold, free gait as would delight the trotting enthusiast, and yet there was an elegance of movement that could not fail to attract attention on the drives of the park. That he will get fast trotters we have not the least doubt, and with the proper education make one himself. But he has a more important mission than the getting of trotters, and that is founding a family of carriage horses. There are too many ordinary trotters, a scarcity of carriage horses almost amounting to a dearth. With both in view the breeder will find snorer remuneration. But still with all the advancement there has been the last ten years in improving the form of the trotter until many of the popular trotting sires are of a type that fits them for the carriage, the breeder who aims at a distinct animal will be the most successful. The horse intended for the family carriage should never be put through a course of the usual track training. There are few which do not acquire habits inimical for the uses, and as the main endeavor in the training of trotters is to develop speed, the teachings are not of the kind that are the best adapted for the future purpose.

There is not a shadow of doubt that a person who engages in the breeding of carriage horses, having the proper animals and conducting the business with any degree of intelligence, will find it remunerative.

The picture of Admirable will afford the idea of the proper form in the sire and the dams must be chosen with a similar formation.

As the certified pedigree shows there is a great deal of thoroughbred blood in Admirable. The English practice of calling all "one-half thoroughbred" or half-bred where there is any stain in the pedigree misleads American readers, as a horse which possesses thirty-one parts of thoroughbred blood in thirty-two would still have the br. b. put opposite his name in the stud book.

The other blood in Admirable must be of the finer type of the Norman, the smaller, more active breed which are used for rapid travel, and it is safe to assert that at least three-quarters are of the pure strain. There is scarcely a trace of anything else in his appearance and only the slightest token of a different mixture. Owing to the universal custom in France, the dock has been shortened, though there is plenty of evidence that Nature had endowed him with plenty of hirsute adornment.

We are pleased to present this picture. It is a valuable addition to the gallery and will convey a better idea of what the carriage horse should be than pages of printed description.

TURF AND TRACK.

CLOSING OF ENTRIES.—Do not forget that the stakes and purses of the Fall meeting of the Pacific Coast Blood-Horse Association other than the "fixed events" close on Tuesday next, the 10th instant. See advertisements for particulars.

Fixed Events.

Eastern Oregon Fine Stock Association at Union, from October 9th to the 14th inclusive.
Los Angeles Agricultural Association, at Los Angeles, from October 17th to 21st inclusive.
Fall meeting of the Pacific Coast Blood Horse Association, November 11th, 15th, 18th and 21st.

FAIRS AT THE EAST.

Texas State Fair, at Austin, October 17th to the 21st inclusive.

THE PLUNGER'S PURCHASE.—Henry Newbold of Pleasure Bay has sold to Mr. F. Theodore Walton the Newbold farm for \$10,000. Mr. Newbold says Mr. Walton has purchased the property for the purpose of placing upon it a stock farm for racing horses and utilizing the rest for a mile running track. The Newbold farm is a peninsula, three-quarters of a mile from the seashore. It is delightfully situated and almost entirely surrounded by the waters of Pleasure Bay. It has an area of a square mile. The purchase of Mr. Walton is received with much satisfaction by the summer hotel-keepers and residents of Long Branch. It is believed that a racing course in close proximity to the seashore would greatly benefit Long Branch, and it is said that Mr. Newbold has kept it reserved for that purpose, offering it at a most reasonable figure. Monmouth Park is over three miles from Long Branch, and the hotel-keepers say they receive no benefit from it. Before purchasing the Newbold property, it is said Mr. Walton endeavored to purchase a tract of land lying between the ocean and Pleasure Bay, but he could not secure enough of it upon which there was room for a mile running track. The Shrewsbury river is now navigable as far as Branchport, beyond the Newbold farm, and a steamer plies between it and New York. This would give greater facilities in carrying the horses than Monmouth Park has.

Fastest Record.

OAKLAND, Cal., Sept. 28, 1882.

EDITOR BREEDER AND SPORTSMAN, Dear Sir: Will you kindly decide a wager, and inform me whether the fastest time has been made by a trotting or a pacing horse, and give me the record of each. I understand that Sleepy Tom paced a mile this summer in 2:06. By answering the above you will greatly oblige
A SUBSCRIBER.

Answer.—Maud S, trotting, 2:10½, Aug. 11, 1881; Little Brown Jug, pacing, 2:11½, Aug. 24, 1881. We have never heard of Sleepy Tom pacing so fast.

Sensational Races at Coney Island.

The fall meeting of the Coney Island Jockey Club at Sheepshead Bay has proved to be most successful both in a racing and financial point of view. This is owing to the ever varying programmes that are framed so as to bring together the best horses in the country on even terms, and also to the fact that the association are most liberal in the way of premiums. One of the best arranged contests came off at the late meeting when Girofle, Bootjack and Barrett were brought together in a sweepstake of \$500 play or pay, with \$2,500 added, a dash of a mile, with weights ten pounds below the regular scale. We take the following account of the race from the *New York Sportsman*, merely adding that the fastest mile yet run on this course was made by Boardman, 1:40½, on Sept. 20th, 1880, when carrying but 91 pounds as a four-year-old.

The great event of the day was now called and it was made the medium of some of the heaviest wagering ever recorded on horse-racing in this country. Walton, the bugbear of the bookmakers, wagered \$15,000 to \$21,000 on Girofle; \$10,000 of this was betted with Houghton & Reed, and the remainder with D. Johnson. The mere fact of these bets having been accepted by the bookmakers shows that they have prospered this season, and calculated that to lose would not hurt them. When the horses went to the post it was a time for stilled heart-beats. Bootjack, with James McLaughlin up, had the inside, and was as eager to get off as if he really had a chance. Man and horse seemed to be so perfectly in accord as to warrant the opinion that the term "centaur" would be well applied in this instance. Girofle had the center, and was ridden by William Donohue. Needless to say that all the senses of this jockey were on the alert to-day, and his mount would not suffer by the start if he could help it. Barrett had the outside and was ridden by Lloyd Hughes, who had never before been on his back, if we recollect aright. He had good reason to know the horse's speed, however, for twice had his mount, Spinaway, gone down before this fellow at Monmouth Park in 1880. Peakes' wife was dead, and this, together with the severe sacrifice necessary to make the weight, debarrated that artist from being on Barrett's back. Shauer, as stated elsewhere, was seriously ill and could not ride. In spite of all this, however, Barrett was the choice in pools and book-betting. Perhaps Mr. Lorillard's bad luck all day would turn, some said; and others thought to see Girofle beaten, because the pair were now at even weights. Barrett delayed the start a long time. Twice he was turned right, but if the conscientious and painstaking starter had dropped the flag then the race would have been over at once, for the brute each time whirled round again. Finally Barrett was placed between Bootjack and Girofle, and, a good opportunity serving, the flag fell with all three in good motion. For nearly half a furlong the "pole" horse, Bootjack, had speed enough to retain a slight lead. Then Barrett's lightning stroke sent him to the front, and he soon had a lead of a length and a half, and going along the backstretch it was two. At the half it was reduced to a length and a half again, with Girofle a head in advance of Bootjack. In the next quarter of a mile the grand mare slowly but surely shut up the daylight and was lapping the big horse at the three-quarters. At the head of the stretch she was at his head; a furlong from home he was beaten, and could not or would not respond to Hughes' call, and Donohue, looking around, yet never relaxing his driving, shot his mare home a length and a half in front. Bootjack was of course pulled up when it was useless to persevere, but his owners have now a good line with which to try their youngsters and any other that they may buy. The time of the mile was 1:41½—very fast indeed, and it is possible that it is a shade too fast for Barrett's capacity in his best day. Yet he gave this mare 10 pounds at Long Branch and was beaten only three-quarters of a length. Such a horse as Barrett would break a millionaire if he backed him in accordance with his latest form.

GRAND SWEEPSTAKES, ONE MILE.

SHEEPSHEAD BAY, September 14, 1882.—Grand sweepstakes of \$500 each, play or pay, with \$2,500 added by the association, of which \$500 to the second; weights 10 lbs. below the scale; 4 entries; one mile.
E. V. Snedeker & Co. name ch m Girofle, 5 years, by Lexington—Ratan, by Lexington, 105 lbs. (W Donohue).
P. Lorillard names b h Barrett, 4 years, by Bonnie Scotland—Sue Walton, 108 lbs. (Hughes).
Dwyer Bros. name ch g Bootjack, 4 years, by Bonnie Scotland—Sparrowgrass, 105 lbs. (J. McLaughlin).
Time—1:41½.

Pools: Barrett \$225, Girofle \$175, Bootjack \$65. Betting: Even agst Barrett, 6 to 5 agst Girofle, and 6 to 1 agst Bootjack. Mutuels paid \$10 35.

On the 23d the meeting was brought to a close amid a regular old-fashioned rain storm, but the club resolved to let the racing go on, as the Directors wished to follow out the English system of running "shine or rain," and certainly that appears to be the more sportsmanlike way of conducting the proceedings, although the receipts must suffer in consequence. Considering the circumstances the attendance was good, and there was much interest attached to the four mile and repeat race that soon threatened to be counted among the glories of the past. Of this race and of the general results of the meeting we give the following extracts taken from the *New York World*:

The fourth race, the Great Long Island Stakes, at four-mile-heats, was the race of the day, and, in the estimation of many of the "old timers," it was the race of the meeting. To the majority of this class it is needless to say that, with meetings extended for weeks and with racing nearly every day, it is impossible to train and run horses at four mile heats, or even at four miles. It is a fact that such races are much more profitable to the associations than to owners, as the training of such horses for long races and for the cups at two miles and a quarter means to the latter the ruin of many of their best horses. Certainly the Dwyors found it so in the case of Hindoo. Years ago owners could afford to lay up horses through their two and partly through their three-year-old years with a view of slow and gradual development into cup and four-mile horses. But with the establishment of the valuable two-year-old and three-year-old stakes, owners now find it to their advantage to develop speed in preference to bottom, and in doing so, horses able to run four miles and repeat are now so rare that the Coney Island Jockey Club will next year reduce the Great Long Island Stakes to a dash of four miles. Of course such action is to be regretted, but as it can scarcely be avoided it is to be hoped that every year will yet show a few horses

of the Glenmore-Bushwhacker-Lida Stanhope type, for, whether or not they compare with the great four-mile horses of a quarter of a century ago, they are certainly the best we have now. Of the three named, which were the only starters, Glenmore carried 114 pounds, with James McLaughlin in the saddle; Bushwhacker, 111 pounds, with Cyrus Holloway, and Lida Stanhope, 105 pounds, with Shauer "up." Glenmore was the favorite, with Lida Stanhope second choice. As the flag was dropped, Bushwhacker took the lead, and to the great delight of the "stable gang," he was never headed in the race. For the first mile he led Lida Stanhope by nearly four lengths, the latter running from a length to two lengths in front of Glenmore. There was but little change in the running of the second mile other than that in the first quarter Glenmore moved up to within half a length of Lida, but dropped again as they went down the backstretch, while on the stable turn Lida Stanhope closed upon Bushwhacker as if to "feel" him. The three ended the two miles with Bushwhacker leading by four lengths and Lida Stanhope two in front of Glenmore. The third mile was nearly a repetition of the second, with the exception that both Lida and Glenmore closed up much of the gap, Lida especially, for at the end of the three miles she amid the shouts of her admirers showed a head in front of Bushwhacker, with Glenmore a length and a half away. Lida's lead was brief, for at the members' stand Bushwhacker again took the lead and at the quarter he was a length in front of the filly, she the same in front of Glenmore. Before they reached the grove Glenmore passed Lida and she rapidly dropped to the rear. McLaughlin at once made strong efforts to reach Bushwhacker, who not only responded to Holloway's call but from a lead of a length, which he held at the end of three miles and a half, he gradually drew away and finally amid some little cheering "old Bush" galloped past the judges the winner of the heat by eight lengths, with Glenmore second and Lida Stanhope just inside the distance. Time 8:01½, which was nearly a minute faster than was generally thought it would be run in. As to the fractional time the rain came down so heavy that it was impossible to flag the quarters, but the first mile was run in 2:03½ and the two miles in 4:05, after which the pace increased somewhat.

In the betting between the heats Bushwhacker, showing much the freshest, was made a strong favorite. All three appeared promptly at the call, Bushwhacker being received with some applause, as also was Lida Stanhope, but Glenmore was decidedly the favorite with the crowd. They got the flag with Glenmore a trifle in front, but he instantly gave place to Bushwhacker, who led by a length at the quarter and two lengths at the half, Lida Stanhope being so far back as to be virtually out of the race unless some accident should happen to the leaders. In the run round by the stables McLaughlin moved Glenmore up to within a length of Bushwhacker, but dropped back again in the stretch so that at the end of the mile Bushwhacker was leading by two lengths. There was but little change in the running of the second mile until just at the end, when McLaughlin again closed up and they finished the two miles just a length apart, with Lida 80 yards behind them. In running the third mile McLaughlin held Glenmore just a length behind Bushwhacker until they reached the half-mile pole, when he closed up and the two ran lapped—a scant half length apart—to the three-quarters, where they got on even terms. As they made the turn into the stretch, Glenmore showed in front and amid the greatest excitement he led by a length at the lower end of the stand and by two lengths at the end of the three miles. He kept on to the turn when, as Glenmore began to slacken up, many realized that McLaughlin evidently thought that he had gone four miles and that he had won the heat, but seeing that Holloway and Bushwhacker were keeping right on, they having passed him at the members' stand, he again began to ride Glenmore. But the chance was gone. Bushwhacker had a lead of three lengths at the quarter and he gradually increased it to eight lengths at the half and if he had kept right on he could have left Glenmore outside the distance, but Holloway eased up in the stretch and slowly galloped home the winner of the heat and race by forty yards, with Glenmore second, so far in front of Lida Stanhope that she was several lengths outside the flag. Time, 8:10. To say that the admirers of Bushwhacker were enthusiastic scarcely does them justice. They shouted, threw up their hats, and as a Glenmore man remarked, "acted like a lot of children out on a holiday who, the rain meanwhile pouring down in torrents, desired to do some silly thing that should completely put into the shade their foolish action in going to the races on such a day." But then they were winners, while the "growler" was a loser and an exception. Hundreds that had backed Glenmore were glad to see Bushwhacker the winner. Some had seen the little Tennessee "runt" run all his races from his first three-year-old effort at Baltimore, in May, 1877, when he ran unplaced to Lucifer, Cloverbrook and Diamond. They had seen him win the two-mile heats at Baltimore in 1878, when he won the first heat in 3:36 and the third in 3:38½, Princeton beating him by a short head for the second heat in 3:61. They had seen him two days after win the Bowie stakes at four mile heats, he taking the first heat in 7:31 and the third in 8:29, Princeton again beating him for the second heat by the shortest of heads in 7:36½. In fact there were some present that had seen him run in all his races, of which the above was his forty-third, while some remember having seen his dam, Annie Bush, win the Post Stakes at New Orleans in the spring of 1872, when she distanced the field, Nannie Douglas winning the first heat in 7:39 and Annie Bush the second and third heats in 7:38½ and 8:21, the race being run over the old Metairie Course.

SHEEPSHEAD BAY, September 23.—The Great Long Island Stakes, for all ages, at \$250 each for starters, with \$2,500 added, of which \$500 to the second, and the Woodlawn Vase (presented to the club by the Dwyer Brothers), to become the property of the subscriber winning the race for two years in succession; horses entered March 1 to pay \$50 forfeit, by June 1 \$100 forfeit, and by September 1 \$150 forfeit; closed with seven subscribers of which three were made by March 1 and four by September 1; five-year-old and aged horses to carry 114 pounds, four-year-olds, 108 pounds, three-year-olds, 95 pounds; sex allowances, four-mile heats. [Note.—W. Jennings runs a claim to the Woodlawn Vase in 1881 with Glenmore].

G. B. Bryson names b g Bushwhacker, aged, by Bonnie Scotland, dam Annie Bush, 110 lbs. (C. Holloway)..... 1 1
W. Jennings names ch b Glenmore, aged, by Glen Athol, dam Lotta, 114 lbs. (J. McLaughlin)..... 2 2
J. W. Loud names ch f Lida Stanhope, 4, by Waverly, dam Ada Cheatham, 105 lbs. (Shauer)..... 3dis
Time—8:01½, 8:10.

Pools.—Before: Glenmore, \$300; Lida Stanhope, \$235; Bushwhacker, \$115. After first heat: Bushwhacker, \$250; the field \$15. Betting.—Even money against Glenmore, 8 to 5 against Lida Stanhope, and 3 to 1 against Bushwhacker. After first heat: 7 to 2 on Bushwhacker, 3 to 1 against Glenmore, and 50 to 1 against Lida Stanhope. Mutuels paid \$23 and \$6 40.

The meeting as ended above is in every respect the best yet given by the Coney Island Jockey Club, and although the last two days, the ninth and tenth of the meeting, were marred by bad weather, the attendance on the other days was so large that the meeting will be a decided success from a pecuniary point of view. During the meeting fifty-nine races were run, with a total of 414 starters, and to which the club contributed in purses and added money nearly \$42,000,

while so thoroughly was the money divided that the fifty-nine races were won by thirty-seven different owners or stables, among them being several from California, Utah, Missouri, Alabama, Ohio, Canada and other points nearer New York, viz: four each by Mr. Pierre Lorillard and W. C. Daly, three each by the Dwyer Brothers and E. Heffner, two each by Morris & Patten, W. L. Cassidy, Suedeker & Co., C. Reed, F. Robinson, E. J. Baldwin, M. J. Daly, E. Corrigan, J. Henry, E. J. McElmeel, J. McMahon and Davis and Hall and one each by G. B. Bryson, H. J. Woodford, J. McCullough, J. F. Caldwell, J. H. Harbeck, W. Lakeland, G. L. Lorillard, Ackerman & Co., D. D. Davis, C. D. Holmes, A. Burnham, F. Gebhard, C. Boyle, M. Keuney, T. Winters, C. Askey, Wm. Jennings, Wilson & Co., C. H. Pettingill, the Old Mill Stable, and the Pelham Stable. Another feature of the meeting has been the success of the stables known as Brighton Beach stables which won no less than thirty-eight out of fifty-nine races run. In distances the club also kept up the excellent standard set by the Monmouth Park and Saratoga associations of running a good average of long-distance races. The number of races at the several distances was as follows: 1 at five furlongs, 10 at three-quarters of a mile, 14 at a mile, 1 at a mile and half a furlong, 5 at a mile and a furlong, 3 at a mile and a quarter, 3 at a mile and three furlongs, 4 at a mile and a half, 1 at a mile and 5 furlongs, 2 at a mile and three-quarters, 1 at two miles, 1 at three miles, 1 at four-mile heats, 1 at heats of a mile and a furlong, 1 at mile heats and 10 steeplechases. The betting has been the heaviest of any meeting during the year, especially in the books and mutuels.

Bushwhacker.

Perhaps of all horses that are or have been on the turf for the last ten years none lack the grace and beauty usually associated with the thoroughbred so much as Bushwhacker, the winner of the Long Island Stakes at Sheepshead Bay. Yet in breeding he is the peer of scores of vastly better looking horses. To begin with, his sire was the famous Bonnie Scotland, in whom the best blood of England was represented. His dam, Annie Bush, was by Lexington, out of Banner, she by imported Albion, out of Clara Howard, by imported Barefoot (winner of the St. Leger in 1823), and she out of the imported mare bred by Lord Grosvenor and imported by C. H. Hall, of New York, in 1824. As to Lexington's breeding and his standard as a sire nothing need be said, his honors, like those of Stockwell in England, being above praise. Annie Bush had a very successful turf career, for which she was trained by George Rice and owned by Jim McCormick, now of New York. She won over the Metairie track, at New Orleans, in April, 1872—a mile and a quarter in 2:14½—and at four-mile heats, nine days afterwards, in 7:39, 7:38½ and 8:21, Nannie Douglas winning the first heat. On April 20 of the same year, over the old Fair Grounds track, and at the inaugural meeting of the then new Louisiana Jockey Club, she again won at four-mile heats in 7:36 and 7:51½, when with 101 pounds she beat the five-year-olds Morlacchi and Tom Corbett, each carrying 107 pounds. Afterwards, in May, at Nashville she won at two-mile heats in 3:38 and 3:39 and two days later at three miles in 5:53, which may be said to have ended her career, for although she ran once in 1873 she had virtually broken down.

Annie Bush was then bred to Bonnie Scotland, the produce of which in 1874 was a bay colt which was subsequently called Bushwhacker. During the summer both Annie Bush and her colt were stolen and concealed in the woods, where for the want of proper food the growth of the colt was so "stunted" that at his first appearance on the turf at Baltimore in May, 1877, he was hailed with shouts of laughter and was called by some "Dowell's mule," and only last Saturday he was said to look like a well-fed canal horse. When a two-year-old he was sold or presented to Major T. W. Dowell, of Hanover, under whose colors he ran until he was sold to his present owner, Mr. G. B. Bryson, in 1881. Bushwhacker was never a great success on the turf. Ill-luck seems to have followed him, for on several occasions just as he had been got in prime condition some accident has happened, as in 1879, when he only ran twice, from which he recovered only to go amiss again in the spring of 1880, from which he did not recover until the spring of 1881. His full record is as follows:

Year.	Age.	Times started.	Times first.	Times second.	Times third.	Gross earnings.
1877.....	Three years old.....	10	4	3	2	\$ 195
1878.....	Four years old.....	13	4	3	1	5,350
1879.....	Five years old.....	2	1	1	1	300
1881.....	Seven years old.....	9	1	1	2	2,135
1882.....	Eight years old.....	12	1	1	4	3,375
Totals.....		46	6	13	10	\$11,355

Bushwhacker may possibly start for the Bowie Stakes at Baltimore in October, for although Mr. Bryson is not a subscriber, if Bushwhacker retains his form until the day before the race (October 20), one of the seven subscribers will no doubt be glad to transfer his subscription to Mr. Bryson, especially as the Pimlico track is the scene of "old Bush's" greatest triumphs, for it was over that track that in October, 1878, he won his two-mile heats and the Bowie Stakes at four-mile heats, the former in 3:36, 3:36½ and 3:38½ and the latter in 7:31, 7:36½ and 8:29, Princeton winning the second heats in both races by the shortest of heads.

THE VANDERBILT TEAM.—At the recent trial at Hartford, W. B. Bair, who has charge of the horses, made the following remarks to "Veritas," the correspondent of the New York *Spirit of the Times*: "Receiving instructions from Mr. Vanderbilt, I had the track scraped, judges appointed, and drove them, as is well known, and accredited, a mile in 2:16½—going the first half in 1:08, by two accurate watches, one of them being the timer presented me by Mr. Vanderbilt. It stopped at 2:16 2-5 in the hands of Mr. Hyde, a wealthy and reliable gentleman of Hartford. I carried twelve pounds of dead weight, making 152 lbs. for the driver. As to the qualities of the team, I never saw or heard of a pair of horses that fall into each other's ways, and mate so quickly, as these mares do. They drive like one horse, on same kinds of bits—an ordinary gum bit. I think Rose is a little the fastest, but Aldine rates very steadily; they work evenly together, and have never made a break with me. I feel confident Mr. Vanderbilt can drive them to road wagon in 2:18, over Fleetwood Course. He has already sent them to the half in 1:08, and they would certainly come home in 1:10. I am willing to bet as much as a man in my circumstances ought that I can beat 2:16½ with them over Fleetwood, and if they will give me odds I will undertake to beat 2:16."

The San Jose Fair.

The meeting on Thursday was again favored with beautiful weather, but there was a large falling off in the attendance, owing to the lack of exciting events in the programme. The first race on the card was a dash of a mile and one-eighth, \$5 each, \$15 forfeit, with \$175 added, a stake that closed with seven entries but of these only two came to the post, H. C. Judson's Patrol and P. Coutts' Forest King. As in most of the races at this meeting there were some notable changes in the betting previous to the start, the odds at first being \$25 to \$20 in favor of the King, but veering afterwards to the same amount on the chances of Patrol. There was a great deal of jumping and cavorting around that delayed the start but at last Donathan dropped the flag to an excellent start and the horses passed the wire and around the back stretch like a team, but at the half mile post Forest King went ahead, stride by stride, and at the three-quarters he had his adversary beaten, and finished an easy winner by three lengths in 2:02.

In the 2:36 class for a purse of \$400 there were originally nine entries, but such was the reputation gained by P. Coutts' fine mare Manon that all the others withdrew, not even contesting for the second and third moneys, and she walked over for the entries, amounting to \$360, the association thus gaining \$40 by the transaction. Here was another event that was originally looked for as an exciting race, but the effect was discounted at the previous meetings.

The chief event of the day was the special trot for a purse of \$300, between Frank Moscow and Ashley, that in the absence of more exciting races was made the medium of some slight speculation, the betting being about \$30 to \$20 in favor of Moscow. To an outsider these odds seemed to be beyond the bounds of prudence but such was the desire to get on Moscow that even \$50 to \$25 was laid on him before the start. In the first heat, Ashley, driven by Pete Brandow with 26 pounds overweight, trotted squarely at a slow gait with a skip near the quarter, and won handily in 2:35½ by nearly two lengths, Moscow, probably, not being meant for this heat. This success did not change the ideas of those who were backing Moscow as the desire to invest became so strong that \$30 to \$8 was freely laid on his winning the race. The next heat was such as to give the spectators an idea that it was a real contest as the two horses were sent along at a little more lively gait, and they were lapped until well into the home stretch where Moscow broke and lost ground and Ashley won by half a length in 2:33½. Notwithstanding this success, it was rumored freely that Frank could win at any and all times when called upon to do so, and so Moscow was still a greater favorite than before the first heat, selling at \$40 to \$25 as fast as the pools could be written off. This state of the betting may also be attributed to the fact that Goldsmith would take the reins over the favorite instead of Williams, and the as yet unknown factor was discussed as to what distance in a mile was represented by an overweight in the driver of some 25 pounds. The horses went off very evenly for the third heat, and in the mid back stretch Moscow indulged in one of his peculiar skips of some half dozen strides in which he generally gains a slight advantage, but nearing the half he was off his feet in a more serious manner and lost upwards of a length before he was brought to his gait; thence by square trotting he regained his position until, within fifty yards of the wire, he skipped again, and came under the wire by the shortest of heads in 2:33½. The backers of Moscow feared that all their investments were lost, but after a short discussion the heat was given to Frank amid mingled cheers and hisses, and cries of "another job" that seemingly in no way disconcerted the judges. It was now \$50 to \$20 against Ashley, and that mainly through the hedging of some Moscow money under the belief that the race was not such a sure thing as it was cracked up to be. The two final heats were again well contested and Moscow at once took advantage of his position at the pole to make the gait a fast one, and he carried Ashley to a skip on the back stretch but the latter, recovering, came fast and was only beaten out at the finish by Moscow in 2:30½ by about three-quarters of a length. With \$25 to \$5 on him, Frank Moscow repeated his tactics of the preceding heat, but this time he himself made a skip near the half mile, repeated the clever movement half way between the three-quarter pole and the distance pole gaining about a third of a length, and then broke once more within a short distance of the wire, finishing on a run in 2:34½. This time there was no delay in rendering the decision, as before Brandow could call the attention of the judges to the runs indulged in by Moscow, the latter was declared the winner of the heat and race. Again was the decision received with hisses and even curses connected with the opprobrious term of "thieves," conduct that ought not to have been allowed for a moment, considering that beyond all cavil the gentlemen in the judges' stand were acting to the best of their knowledge and ability. A protest was entered by Pete Brandow in regard to the decision, but at a meeting of the Board of Directors held the same evening, the verdict of the judges was ratified in full and yet some old and experienced turfists maintain that in full justice Ashley was entitled to four heats out of the five that were trotted.

The next race was a purse of \$300, free for all pacers, in which there were three starters out of the seven original entries, but no great interest was taken in the event, as it was deemed to be a mere walk-over for Coretto, John Wiegles and Washington contesting merely for second honors. There was no betting and the race requires but a very slight description, Coretto in each heat going off with the lead and holding it as easily as did Johnny Wiegles the second position, Mr. Yates' fleet mare taking the three straight heats in 2:24, 2:26½ and 2:34½.

SUMMARIES.

SAN JOSE, September 25.—Running; a dash of a mile and an eighth, \$50 each, \$15 forfeit, with \$175 added; second horse to receive his entrance and one-third of added money.
C. Van Buren enters P. Coutts' h c Forest King, by Monday from Abbie W..... 1
H. C. Judson enters b c Patrol by Wildidle, dam Nettie Brown..... 2
Inauguration, Fostress, Reel Terry, Myra F., Red Boy, and the Duke of Monday were entered but did not start.
Time—2:02.

Same day—Purse \$300, free for all pacers.
L. E. Yates names c m Coretto by Winthrop, her dam [by] Ladd's Kentucky Hunter..... 1 1 1
Walter Mead names d g Johnny Wiegles..... 2 2 2
H. A. Van Aruige names blk s Washington..... 3 3 3
Oakland Boy and Lady Hayes were entered but did not start.
Time—2:24, 2:26½, 2:34½.

Same day—Purse \$400 for the 2:36 class.
C. Van Buren names P. Coutts' c m Manon by Nutwood..... w o
Revolution, Louis D., pantine, Eddie F., James Lick, Blanche, San Mateo Belle and Rowdy Boy paid forfeit.

Same day—Special purse of \$300 of which \$100 to the second horse.
H. B. Cooper names Frank Moscow by Frank Moscow..... 2 2 1 1
Jackson Cochran names ch g Ashley, hy Plumaz, dam by George..... 1 1 2 2 2
Time—2:35½, 2:33½, 2:33½, 2:30½, 2:34½.

On the Friday the weather was somewhat chilly in the morning, premonitory of the rain that on the succeeding day put an end to the races. Nevertheless, towards the afternoon

the sun came out and the attendance was nearly up to the average. The proceedings were again delayed and it was fully three-quarters of an hour after the advertised time when the bell summoned the jockeys to the post for the first race, a dash of a mile and a half, \$50 each, \$15 forfeit, with \$200 added. There was a good deal of speculation on this race, the pools selling on the previous evening at \$60 on May D and Bender (who were supposed to start) as the field against \$40 for Nighthawk, but on the track it was stated that Bender would pay forfeit, and the pools varied greatly in Nighthawk's favor, she bringing \$30 against \$15 for May D, but when they came on the course the appearance of the latter was considered so favorable that the odds were somewhat reduced in her favor. After a little jockeying for position, the pair were sent off on pretty even terms, Nighthawk at the pole having slightly the best of it, and she made the pace very lively, passing the stand with the advantage of almost a length, but then May D moved up very quietly and as the horses completed the mile, in 1:43, Nighthawk was being urged along and only had a neck and shoulders the best of it. Along the upper turn they ran closely locked together, and at the seven furlongs May D was a little to the fore, but Nighthawk again came bravely to the front and after a desperate finish was only beaten out by the shortest of heads.

The next was a race against time for the society's gold medal, to beat the best California record at a mile, 1:42, made by Nighthawk at Sacramento. The only one to make the essay was Belshaw, 'who on the previous Tuesday had made a mile in 1:48 with 93 pounds, and as he was allowed to go now at catch weight, it was generally thought that he would capture the medal, but even then he would by no means have equaled Nighthawk's performance, as on the occasion mentioned she carried 111 pounds as a five-year-old. Belshaw, ridden by a boy weighing perhaps sixty-five pounds, ran well around to the home stretch in good time, making the half in 50 seconds, but he suddenly slowed up, and although he was roused and sent along again at a lively pace he could only make the mile in 1:42½.

The next race was made the event of the day and it was a small bonanza for the fielders, who picked up large pools with ridiculously small investments. It was a special race, three-quarters of a mile and repeat, in which George Howson's Jim Douglas with 108 pounds was made an immense favorite at \$40 against \$20 for the entire field, composed of Ella Doane, Forest King and Haddington, while in subsequent pools he brought \$50 against \$25 for Ella and \$12 for the field.

Writing after the event is decided this seems to be very rash betting, as both Ella Doane and Forest King are known to have speed when at themselves, and Haddington can stay well, even if he is not a flyer of high degree. But these things are but little considered amid the excitement of pool selling and his adherents pointed to the fine form shown last year by Douglas, as also to the easy manner in which he had won his race on the previous Monday, and one enthusiast offered to bet that he would never be headed in any one heat. As usual in these short races there were a great many break-aways before the horses could be got anywhere near into line. When the flag was dropped Ella Doane was the quickest on her feet and she cut out the running with Forest King in close attendance and they were soon neck and neck, two lengths ahead of Douglas, while Haddington was evidently bidding for a more favorable opportunity. Up to the last stretch the finish between the two leading horses was very exciting but finally Ella outstayed her opponent and won by the shortest of necks in 1:15½, only half a second beneath the best time ever made in the State. It was so evident that Douglas had made no pretensions for the heat and that he was in fine fettle, that he now became a better favorite than ever, selling at \$30 against \$10 for Ella and \$5 for the field. It was now more difficult than ever to get the horses off on even terms and the delay caused by a long succession of false starts was tedious in the extreme, and at last when the word was given there was a somewhat straggling start at that. Again Ella showed prominently all through the heat, leading both Douglas and Forest King at the start, but Howson in trying to escape a pocket seemed to get dangerously near the leading mare, but at the half mile they were both in line with Forest King within good reaching distance. From this point to the wire it would be impossible to witness a closer contest for when well within the homestretch, the King joined conclusions with the leaders, and it looked like a dead heat, but Douglas in the center managed to better his position in the last few strides and won in 1:17, by a short head from Ella Doane, she leading Forest King by a like distance, while Haddington still reserved his forces. The rider of the mare made a complaint that Howson had cut him down, but the latter showed that Douglas had also been in a scrimmage, but luckily they were slight flesh wounds that had no influence on the ultimate result.

The betting that ensued showed great strength in an unexpected quarter, the backers of Haddington coming squarely to the front and showing for the first time the real Simon Pure of the day. Douglas was nevertheless still favorite at \$20, the field bringing \$15 and Ella Doane \$7. After many a tedious false start, Haddington got away slightly in the lead, with the King lapping, and thus they ran until the drawgate where Haddington drew away and won, hands down, in 1:16½, by three lengths from Forest King, while Douglas was a poor third. Forest King was sent to the stable under the rule of not having won a heat in three, and there was a good deal of squaring of accounts in the pools, they ranging at about \$50 for Haddington, \$25 for Doane, and \$17 for Douglas. Ella Doane jumped off in the lead and tried to get clear of her opponents, but Haddington had been kept so in reserve that he had plenty of speed in him, and on the homestretch he came away and won in a handy manner in 1:18½ by three lengths from Ella Doane, with Douglas third by a like distance. Another proof of the axiom that the race is not always to the speediest horse.

SUMMARIES.

SAN JOSE, September 29.—Running, free for all, a dash of a mile and a half: \$50 each, \$15 forfeit, \$200 added, the second horse to receive his entrance and one-third of the added money.
L. C. Judson names ch m May D, four years, by Wildidle—Nettie Brown.....1
P. J. Shafter names b m Nighthawk, by imported Haddington, by Norfolk.....2
Jack Douglas, George Bender, Mollie H. Precious, Red Boy, Myra and Fred Collier were entered but did not start.
Time—2:36.

Same day—Purse of \$400, of which \$100 to the second horse, three quarters of a mile and repeat.

C. Van Buren names b s Forest King, three years, by Monday Abbie W.....2 3 2 ro
Time—1:15½, 1:17, 1:16½, 1:18½.

Sandwiched in between the two last heats of the running race, the horses were called up for the purse of \$400 for the

2:27 class in which Cairo and Starr King were the only opponents, the three others engaged therein having been withdrawn. The race was looked on as a foregone conclusion for Starr King and no pools were sold on the result. There was but little scoring and immediately the gong was sounded, Starr King went leisurely to the front, but a bad break near the half-mile post set him back and a repetition on the home stretch led to the belief that Cairo might win the heat, but Starr King settled down to a square trot, came up very fast and beat Cairo by the shortest of heads in 2:27½.

As at the conclusion of the running race the sun had only just disappeared beneath the horizon, there was ample time for another heat, if not even to finish the race, but the judges announced a postponement and then it became known that the programme of the fourth day of the fair had been strengthened by the addition of a \$750 purse for Abbottsford, Director and Gibraltar, which would certainly of itself have formed a strong and attractive card, and during the evening there was a good deal of wagering on the result. Unfortunately the morning had a very inauspicious look, and by the time the visitors were ready to go out to the grounds, it began to drizzle and soon it increased to a soaking rain that necessitated another postponement, but not until Starr King and Cairo had trotted another heat, which after a great deal of splashing and dashing in the muddy track was won by Cairo in 2:41½.

On Monday, when the horses were called up for the unfinished race, the track was found to be in a fair condition, but somewhat heavy near the inner rail. Starr King, despite the fact that he was suffering a little from lameness, was made the favorite at \$20 to \$10, as Cairo was also ailing from a swollen leg. In each heat Cairo got the advantage around the first turn, but at the quarter Starr King was in the lead, and finished first by from a length to a length and a half in each instance in 2:25½ and 2:25½. The race was somewhat unique in its character, as it took three days to bring it to a conclusion. The next event was a purse of \$500, two miles and repeat, for the 2:30 class, in which Bullet, Freestone and Tump Winston were withdrawn, leaving the contest to Albert W. and Vanderlynn, the betting being \$100 to \$30 in favor of the former horse. Vanderlynn took the lead and held it well to the half-mile post, when he got off his feet and commenced a succession of breaks that destroyed his chances, as on each occasion when he was getting down to his gait and diminishing the gap between himself and the leader, he would get again on the run, and thus enabled Albert W. to jog in an easy winner in 5:04½.

In the second heat Vanderlynn was much steadier in his gait and he trotted the first mile without a skip in 2:24½, and passed the wire an open length ahead of Albert W., but on the first turn he made a break at the quarter. Albert W. was in the lead, but near the half-mile post he was on the run and resigned his position to Vanderlynn, who, on the homestretch, trotting very squarely, looked like a winner, but Albert W. came up with a fine burst of speed and carried Vanderlynn off his feet near the draw-gate, winning the heat and race in 4:51. This is another fine performance on the part of Albert W., and many good judges think that with a good track this promising son of Electioneer would lower the best record at the distance, namely that of Steve Maxwell, 4:48½, made at Rochester in August, 1880.

Miss Penniman then gave an exhibition of her talents as an equestrian both in the saddle and in bareback riding that elicited much applause and that was rewarded with the bestowal of the gold medal of the association.

The last race was a buggy race, a dash of two miles for horses owned in the district, to be driven by their owners. There were seven entries, and the following six started: Nettie H. (who was a favorite at even money against all the others,) Tom, No Name, Nig, Little Sam and Prince. As may be imagined, there was a great deal of scoring before an even start could be given, and when the gong was sounded, one horse after another got on the run, the favorite especially ruining the chances of her backers by her rank behavior. As the horses came around for the second time to the half-mile post, it looked as if Mr. Horace Hawes would be the winner, but unfortunately No Name went off his feet, and Tom secured the victory for Mr. Saunders in the fair time of 5:51.

This race brought the fair to a conclusion, that would have proved more satisfactory to the visitors and to the association had not the rain so seriously interfered with the races, and that on the day which generally shows the largest receipts of the meeting. Much of the success of the fair was due to the untiring energy of the able and efficient secretary of the association, T. S. Montgomery, to whom many thanks are due from the members of the press who were present, for his courteous attention. With a little more vim, enterprise and liberality among the members of the association, the San Jose Fair might be made the most attractive and prosperous of all the district meetings in the State, and it would be pleasant to see steps taken at once to place San Jose in that proud position.

SUMMARIES.

SAN JOSE, September 29, 30, and October 2.—Purse for the 2:27 class.
C. W. Welby names ch g Starr King, by George M. Patchen Jr., dam Mary Wonder.....1 2 1 1
John Hughes names b g Cairo, by Chieftain, dam unknown.....2 1 2 2
Prince Allen, Captain Smith and Director were entered but did not start.

Time—2:27, 2:41½, 2:25½, 2:27½.

Same day—Trotting for the 2:30 class, two miles and repeat, for a purse of \$500.
A. Waldstein names b s Albert W., by Electioneer, dam by John Nelson.....1

Premiums were awarded as follows:

Stallions.

Best four years old and over, J. & H. C. Judson, Santa Clara, Wildidle, \$15.
Second best, Wm. Boots, Milpitas, Kingston, \$10.
Best three-year-old, Wm. Boots, Inanguration, \$10.

Thoroughbred Mares.

Best four years old and over, Wm. Boots, Molly H., \$10.
Second best, J. & H. C. Judson, Ella Doane, \$5.

Thoroughbred Families.

Best thoroughbred sire with not less than five colts, all thoroughbreds, J. H. C. Judson, Wildidle and five colts, \$25.
Best thoroughbred dam, with not less than three colts, all thoroughbreds, J. and H. C. Judson, Nettie Brown and colts, \$20.

Horses For All Work.

Best four years old and over, A. T. Hatch, Suisun, Admar, \$10.
Second best, A. Barris, San Jose, Dom Pedro, \$5.
Best three-year-old, D. Hellyer, San Jose, Clifford, \$8.
Second best, S. S. Drake, Vallejo, Drake, \$4.
Best two-year-old, Edward Moran, San Jose, Nutwood, \$5.
Second best, J. Weatherford, San Jose, Young St. Lawrence, \$3.

Mares For All Work.

Best four-year-old, S. S. Drake, Eve, \$8.
Second best, John Wright, Polly, \$4.
Best three-year-old, A. Barris, (no name) \$6.
Best two-year-old, T. Andrews, Minnie, \$5.
Best yearling, S. S. Drake, Lena, \$4.
Second best, T. W. Barstow, Beauty, \$2.
The committee on the above were R. H. Newton, Geo. W. Wilson and J. W. Chapman.

Draft Stallions.

Best four years old and over, J. Garcia, Twelve-Mile House, Ottawa Chief, \$10.
Best three-year-old, Charles Clark, Milpitas, Young Hercules, \$8.
Second best, W. P. Phillips, California Chief, \$4.
Best two-year-old, James Lendrum, Napoleon, \$6.
Best yearling, Thomas Gallagher, George, \$5.
Best sucking colt, S. H. Chase, Paul Revere, \$3.
Second best, Geo. Easton, Gilroy, Prince Albert, \$2.

Mares.

Best four years old and over, S. H. Chase, Date, \$8.
Second best, Jas. Lendrum, Maggie, \$5.
Best three-year-old, P. H. Doyle, Lady Hercules, \$7.
Best yearling, James Lendrum, Fan, \$4.
Best sucking colt, James Lendrum, Bess, \$3.
The committee were John Bubb, P. Matthews and W. Jacklin.

Roadster Stallions.

Best three-year-old, E. S. Smith, Boy Wood, \$8.
Best two-year-old, E. S. Smith, Fleet Wood, \$7.

Roadster Mares.

Best four-year-old, E. Topham, Milpitas, Belle, \$8.
Best three-year-old, I. S. Drake, Sister, \$7.
Best two-year-old, E. Topham, Lady Nutwood, \$5.

Gelding Roadsters.

Best four years old and over, Edward Younger, Whis-per, \$10.
Special premium recommended on T. W. Barstow's Frank.
The Committee on the above were G. W. Wilson, A. L. Chapman and C. E. Chapman.

Jacks and Jennies.

Best jack, four year old and over, R. J. Green, San Francisco, Lippencott, \$8.
The Committee were John Matthews, P. Babb, and M. Jackson.

Durham Bulls.

Best three years old and over, Mrs. E. Bradley, First Duke of Alameda, \$15.
Second best, Wm. Quinn, Santa Clara, Duke of the Valley, \$10.
Best yearling, C. Younger, Forest King, \$7.
Second best, Mrs. Bradley, Centerville Duke, \$5.

Best Durham Bull Calf.

Mrs. M. E. Bradley, Royal Bengal, \$5.
Second best, C. Younger, 8th Duke of Forest Home, \$3.

Cows—Durham.

Best cow and calf, Mrs. Bradley, Fanny Third and calf, \$15.
Second best, William Quinn, Fuschia Second and calf.
Best three years old and over, C. Younger, Oxford Rose Third, \$12.
Second best, Seventh Rose of Forest, \$6.
Best yearling, Col. Younger, Red Dolly Eleventh, \$7.
Second best, Wm. Quinn, Innocence, \$5.

Best Durham Heifer Calf.

Wm. Quinn, Peach Blossom, \$5.
Second best, C. Younger, Red Dolly Fourteenth, \$3.
The committee were John Kay, Dr. J. P. Dubley and Moses Shelleuburger.

Jersey Bulls.

Best three years old and over, B. F. Fish, General Grant, \$15.
Best two years old and over, C. B. Polhemus, Jersey Boy, \$12.
Best yearling, C. B. Polhemus, Oscar Wilde, \$7.
Second best yearling, J. T. Hoyt, San Mateo, Banker, \$5.

Best Jersey Bull Calf.

C. B. Polhemus, Tom, \$5.
Second best, C. B. Polhemus, Jersey, \$3.

Best Jersey Cow and Calf.

C. B. Polhemus, Cherry and calf, \$15.
Second best, Matella and calf, \$10.
Best three years old and over, C. B. Polhemus, Fairy, \$15.

Second best, C. B. Polhemus, Pearl, \$10.
Best two-year-old, C. B. Polhemus, Matella, \$12.
Best yearling, C. B. Polhemus, Gypsey, \$7.
Second best, C. B. Polhemus, Pearl 3d, \$6.
Second best, C. B. Polhemus, Sunflower, \$5.

Best Jersey Heifer Calf.

C. B. Polhemus, Bessie 4th, \$5.

Best Thoroughbred Herd of Jerseys.

C. B. Polhemus, Jersey Bay, Cherry, Matella, Pearl, \$20.
Second best, C. B. Polhemus, Fairy 2d.
The committee were R. G. Sneath, Thomas Waite and C. Peebles.

Ayrshires—Bulls.

Best three-year-old, George Bement, Redwood City, Archie, \$15. Same, best yearling, Macbeth, \$7. Same, best bull calf, Malcolm, \$5.

Ayrshires—Cows.

Best three-year-old, George Bement, Elaine, \$15. Same, second best, George Bement, Ethel Brown, \$10. Same, best two-year-old, Stellinita, \$12. Same, best yearling, Sultana, \$7. Same, best heifer calf, Sybil, \$5. Same, best cow and calf, Lady Merryton and calf, \$15. Same, second best, Stellinita and two calves, \$10.

Best Thoroughbred Herd.

George Bement, bull Archie and cows Lady Merryton, Stellinita, Ethel Brown and Elaine, \$10.
The committee were H. Tillotson, A. Wylie and Tom Hildreth.

Graded Cattle.

Best cow, four years old, J. B. J. Porter, Belle 1st, \$10.
Best yearling, G. P. Beal, Fawn, \$5.
The committee were R. G. Sneath, Thos. Waite and C. Peebles.

Sweepstakes.

Best bull of any breed or age, C. Younger, second Duke of

Alameda, \$15; same, best cow, Jessie Maynard, \$15; same, best bull and three calves, Eighth Duke of Alameda, \$15. The committee were Paris Kilburn and Thos. Rea.

Sheep and Goats.

Best Merino ram, A. Agnew, Santa Clara, on Longwood, \$10. Best Merino ewe, A. Agnew, on Jennie, \$10. Best Southdown ram, George Bement, on Sonoma, \$10. Best Southdown ewe, J. P. Bubb, Saratoga, on Queen, \$10. Best Cotswold ram, Wm. Quinn, on Prince, \$10. Best Cotswold ewe, C. Younger, on No Name, \$10; same on best three ram lambs, \$5. Best pen five ewe lambs, Wm. Quinn, \$5. Best graded ram, Wm. Quinn, on Fred, \$5; same, best ewe, Jane, \$5. The committee were W. A. Z. Edwards, John Selby and J. D. Carr.

Swine.

Best Best Berkshire boar, Tyler Beach, Waldo, \$5; same, best sow, Lizzie, \$5. Best Essex sow, P. H. Doyle, English Betsey, \$5. Best two pigs, any breed, Tyler Beach, \$5. Red Berkshire, Thos. H. Laine, recommended premium, as there were none provided. Finest and fattest hog, Tyler Beach, \$5.

Poultry.

Best trio Brahmas, T. J. Waite of Brighton, \$2 50. Best trio Cochins, same, \$2 50. Best trio Hamburgs, same, \$2 50. Best trio Leghorns, O. J. Albee, Santa Clara, \$2 50. Best trio Plymouth Rocks, T. J. Waite, \$2 50. Best trio Bantams, same, \$2 50. Premiums recommended to Mrs. S. Newhall and Mrs. Raynor on Langshans. Best trio Houdans, premium recommended to T. J. Waite, no award in premium list. Premium recommended to O. J. Albee on three American Seabrights. Best trio bronze turkeys, T. Miles, \$5. Best trio geese, Louis Verdon Jr., \$3. Best trio ducks, Mrs. S. Newhall, \$5.

Agricultural Machines.

Best display of agricultural machines and implements, Farmers' Union, \$20. Best horse hay rake, A. S. Babcock & Co., \$3. Best cider mill, Farmers' Union, \$2. Best hay and straw cutter, A. S. Babcock & Co., \$2. Best hand corn-sheller, Farmers' Union, diploma. Best lawn mower, Farmers' Union, \$2. Best header, Farmers' Union, \$10. Best grain sowing machine (broadcast), Farmers' Union \$5. Best self-raking and reaping machine, Farmers' Union, \$5. Best reaping machine, Farmers' Union, \$5. Best mowing machine, E. W. Mills, on Victor mowing machine, \$5. Best combined reaper and mower, Farmers' Union, diploma. Best display of reaping and mowing machines, Farmers' Union, diploma. Best self-binder and harvester, Farmers' Union, \$5. Best harrow, Farmers' Union, \$5. Best cultivator, A. S. Babcock & Co., \$5. Best horse hoe, Farmers' Union, diploma. Best double shovel plow, Farmers' Union, diploma. Best elevator for stacking grain, W. T. Adel, \$5. Best track cleaner for mower (not on premium list) Committee award premium to W. Prindle, Santa Clara. Best fanning mill, Farmers' Union, diploma. Best platform scale, Farmers' Union, diploma. Best farm or road scraper, A. S. Babcock & Co., \$5. Best wind mill, George H. McDonald & Co., on Centennial wind mill and pump, \$5 on each. Best fruit dryer, Daniel Dempsey, of San Francisco. Best gang plow, Farmers' Union, \$5. Best sulky plow, Farmers' Union, diploma. Best double plow, Farmers' Union, diploma. Best side hill plow, A. S. Babcock & Co., \$5. Best sod plow, Farmers' Union, \$5. Best one-horse plow, Farmers' Union, \$5. Best plow, all purposes, Farmers' Union, diploma. Best two-horse family carriage, F. Jung, San Jose, \$10. Best one-horse family carriage, A. S. Babcock & Co., \$5. Best top-buggy, A. S. Babcock & Co., \$5. Best open buggy, Hatman & Normandin, \$5. Best two-seated open carriage, same, \$7 50. Best farm wagon for general purposes, A. S. Babcock & Co., \$10. Best spring market wagon, H. Prindle, \$5. Best driving cart, W. T. Adel, \$5. Best ladies' phaeton, A. S. Babcock & Co., \$10. Best two-wheeled phaeton (not on premium list), F. Gambert. Best exhibit of carriage painting, F. Jung, \$7 50.

American Horses in England.

The season thus far has been very unfortunate for our horses in England and if the Americans do not capture some of the important autumn handicaps, it is to be feared that the stable bills will show a woeful balance to the wrong side, and this fact is rendered still more unpleasant when we recall the brilliant victories gained by them in the preceding year. There seems to be something ominous in the absence of both Iroquois and Foxhall from their engagements, but it is to be hoped that they will make their reappearance in fine fettle before the racing campaign is brought to a conclusion. The three-year-olds in both stables seem to be of a very moderate order, Gerald and Sachem being only good enough to run into a third or fourth position, and unfortunately in the racing of the two-year-olds there has not yet been shown any such form as will better our chances for the great three-year-old sweepstakes of next year.

After such a long series of defeats it is cheering to hear of the success in Aranza at the Great Eastern Handicap at Newmarket last week. This fine four-year-old mare, by Bonnie Scotland, from Arizona, was purchased last year by Mr. P. Lorillard for the special purpose of entering her in the large and valuable handicaps in England, she having previously won such important three-year-old events as Maxwell House and the Tennessee Stallion Stakes at Nashville, the Tobacco Stakes at Louisville and the Hotel Stakes at St. Louis. As usual it was some time before she got over the effects of the change in climate, and she had only run three times this season with barren results until last week she scored her first victory on English soil. From the state of the odds we fear that she was not backed freely for the event, as so little was thought of her chances that 20 to 1 was freely offered against her just before the start. The race was run over the Brethby Stakes course (three-quarters of a mile) and Aranza won with the greatest ease by half a dozen lengths. Sir George Chetwynd's Hornpipe, with the odds at 7 to 4 against him, was

second, with Mr. T. Featherstonhaugh's War Horn, at 7 to 1, third. Lord Cadogan's Mazurka, at 12 to 1, got away in the lead, followed by Aranza and War Horn. Martin on Aranza waited to "the bushes," where Aranza took the lead, and won, as stated, by six lengths. This sudden showing of form by Aranza, taken in connection with very favorable training reports about Mr. Keene's Bookmaker, a four-year-old, handicapped at 104 pounds for the Cambridgeshire, pushed him and Mr. Lorillard's three-year-old Sachem, at 99 pounds, to the top of the "lists" for that race, with 14 to 1 offered against each of them.

It is a notorious fact that in racing a great deal is ascribed to luck, and last year Fortune was lavish in her treatment of American horses, but this season the fickle goddess has changed the channel of her gifts, they almost all flowing to the remarkable three-year-old fillies that have carried off all the chief stakes of the year. Let us hope we shall have better luck next time.

The Los Angeles Fair.

Following are the nominations made in the races of the Los Angeles Fair, that commences on October 16th, and lasts throughout the week:

No. 1. Purse of \$300 for the three minute class, L. H. Titus enters b m Hattie Johnson; L. J. Felton, br g Hunter; E. L. Mayberry, b m Lady Washington; L. J. Rose, Don Carlos.

No. 2. Purse of \$400 for the 2:33 class, John Reynolds' b g Prentice Boy.

No. 3. Purse of \$200, a half mile dash for all two-year runners has the following names: B. P. Hill, br f Augusta E.; H. M. Johnston, s f Ela; Andres Machado, br f Ballona; J. W. Adams, b f Aunt Betsy; Hill & Gries, blk f Doty Dimple.

No. 4. Purse of \$500 for the 2:30 class, L. H. Titus, b g Bullet; John Reynolds, bg Prentice Boy; N. A. Covarrubias, d g Charlie D.

No. 5. District running, a purse of \$245, half mile and repeat, A. Covarrubias, blk g Otto K; H. M. Johnston, s f Ela; T. A. Pellett, b m Mollie Adams; F. Sepulveda, s g Fox; M. A. Forster, g m Minnie, and br m Pele; Hill & Gries b f Belle G.

No. 6. Purse of \$260, a mile and repeat, running, E. S. Paddock, b br g Joe Dion; F. Estudillo, br s Klipspringer; Cyrus Lyon, b m Mestiza; M. A. Forster, b m Pele; Hill & Gries b s Wildidle.

No. 7. Purse \$350, district trotting, three-year-olds and under, Wm. Smith, b m Kate Bender; F. M. Slaughter, b f Tempest; L. J. Rose, g g Centre.

No. 8. Purse \$400, district trotting for the 2:45 class, L. H. Titus, b m Hattie Johnson; L. J. Felton, br g Hunter; A. L. Mayberry, b m Lady Washington; L. J. Rose s g Don Carlos.

No. 9. Purse \$200, running, district two-year-olds, a dash of three quarters of a mile, B. P. Hill, br f. Augusta E.; H. M. Johnston, s f Ela; Andres Machado, b m Ballona, J. W. Adams, b f. Aunt Betsy; Hill & Gries blk f Doty Dimple.

No. 10. Purse \$500, free for all, L. H. Titus, b m Belle Echo; N. A. Covarrubias, d g Charlie D; L. J. Rose, b s Del Sur.

No. 11. Purse \$250, running, free for all district horses, a dash of three-quarters of a mile, T. A. Pellett, b m Mollie Adams; N. A. Covarrubias, blk g Otto K; M. A. Forster, g m Minnie; Hill & Gries b f Belle G.

A World-Wide Evil.

In regard to the system of touting, now so prevalent, we find that in England racing laws prescribe heavy penalties upon any person watching a trial or gallop, unless with the consent of the owner. The result of this is that only the lowest grade of broken-down grooms and turf followers are thus employed; but still each gallop on public training-grounds like Newmarket and Epsom is watched, whilst private gallops like Middleham, Malton and Whitewall are also frequented by the class who, for a bribe, risk all pains and penalties in order to furnish information to their patrons. Clear streams do not generally flow from foul sources and the value of the information so gained, as well as the propriety of its application, is certainly doubtful.

In Australia, touting is not deprecated when fairly done. In the neighborhood of each of the chief cities public training-grounds are formed by the various racing clubs on, or in contiguity to, the race-courses under their control. In the season, gentlemen of position and education, pencil and notebook in hand, represent the various journals, and in their columns furnish full and exhaustive accounts of the work done by each animal, and note the fact of any horse's absence from work. These reports are eagerly read throughout the colonies, and certainly do much to promote and keep up the interest in the great racing events of the year. Naturally enough, a great many owners, and all trainers, dislike this; but that it is more to their ultimate benefit as a body than to their disadvantage is hardly to be doubted. One horse does a good gallop to-day; his work is published and read, and hundreds put a little on him. Next week or next day another pleases the scribes, and he in turn is also publicly backed, whilst the first one recedes in favor; and so, for three months prior to the Melbourne Cup, continual changes take place, horse after horse is supported, and when any stable has satisfied itself, the books are enabled to lay as much money as is wanted against its chance. That owners, as well as trainers, can always guard against any real knowledge, beyond that of a horse looking well, being obtained upon the training-ground by merely watching work, is well known, and has been frequently shown by the prices obtainable at the start about winners who, like Zulu, have done all their work subject to such inspection; but there is here, as well as in England, a class who, by suborning stable-boys and boy-jockeys, obtain stable secrets which are as much the property of the owner and trainer as is the money in their pockets or the clothes on their back.

Round the principal rendezvous of those who bet, the class in question congregate at night, and consist of trainers who, through intemperance or foul play, have fallen into poverty; jockeys who, through dishonest conduct, have forfeited public trust; stable-lads who, from want of ability and from roguery, have never attained a higher rank; with a mixed host of card-sharps and thieves. These profess to furnish reliable information, to the backer who is fool enough to trust them, and from him receive a slight fee for information supplied. Meanwhile the layer, by whom the tout in question is supported, meets the unwary one, and knowing the information he has received, and perhaps having heard a little as to lameness, etc., lays the deluded one a price about the defunct animal. That amongst the host of men in the ring some are found who act as we have described we know, whilst on the other hand the conduct of others is most

upright and manly; but that some more stringent regulation than now exist should be brought in to prevent the corruption of stable lads by the class we have above described is certainly most desirable.—*The Federal Australian.*

Milton Young's Retirement.

The sale of Milton Young's racing stable to Mr. R. C. Pate, of St. Louis, for \$25,000 is explained by Mr. Young's intention to retire from the "post to the paddock." Having purchased McGrathiana, the celebrated racing and stud farm of the late Price McGrath, he will hereafter devote his time to breeding, believing, as he said to a *Courier-Journal* reporter on Sunday, "that breeding is better as a permanent business than racing." Mr. Young said he had no reason to complain of any lack of success on the turf, for during the three years he had been racing he had won over \$90,000 in purses and stakes. As a breeder Mr. Young begins with the three-year-old colt Onondaga and the five-year-old horse Duke of Montrose at the head of the establishment. Both are well-bred and represent thoroughly well their two families. Onondaga is by Leamington, out of Susan Beane, by Lexington, and is a full brother to Mr. George L. Lorillard's young stallion Sensation, who was believed by many to have been the best two-year-old ever trained in this country, while Onondaga himself was the best of the Leamington two-year-olds last year, he winning four out of nine races, including the Juvenile, the July and the Kentucky Stakes. The Duke of Montrose is by Waverly, dam Kelpie, by Bonnie Scotland. He was a fairly good racehorse, with good speed and bottom, and, as Mr. Young says "he intends to keep up with the procession and breed that which is in most demand," his two stallions should in a few years become very popular. His list of mares at present is as follows:

Beatitude, 6, by Bonnie Scotland, dam Mariposa. Bliss, 5, by Bonnie Scotland, dam Mariposa. Beatrice, 3, by Bonnie Scotland, dam Mariposa. Belle of Maywood, 4, by Hunter's Lexington, dam Julia Mattingly.

Black Maria, 3, by Bonnie Scotland, dam Planchette. Fonwitch, 4, by King Alfonso, dam Weatherwitch. Gladiola, 4, by Glengarry, dam Waltz. Kelpie, (1866), by Bonnie Scotland, dam Sister of Ruric. Matagorda, 8, by Glengarry, dam Mattie Morgan. Olivia, 3, by The Ill-Used, dam Olitipa. Perhaps, 8, by Australian, dam Mishap. Patti, 4, by Billet, dam Dora.

Sozodont, 3, by Longfellow, dam Sallie Morgan. Square Dance, 3, by War Dance, dam Sue Dogherty. Wildfire, 3, by Leamington, dam Madge.

Of this year's youngsters Mr. Young has two foals, one out of Beatitude, by King Alfonso, and the other out of Perhaps, by St. Martin. Of the mares bred this year Beatrice and Belle of Maywood are thought to be in foal to Glen Athol, Beatrice, Sozodont and Gladiola to Alfonso, Perhaps to Lisbon, Kelpie to imported Thunderstorm, Fonwitch to imported Blue Mantle, Black Maria to King Ban and Matagorda to Enquirer. Mr. Young took possession of McGrathiana on the first of the present month and he hopes to rival the breeding of such flyers as Tom Bowling, Aristides, Calvin, Chesapeake and many others that have made that Stud Farm so famous.

The \$10,000 Purse.

In spite of the unfavorable weather which prevailed until nearly noon of the 14th inst., some 12,000 people gathered at Beacon Park to witness the struggle for the \$10,000 purse offered by Mr. D. H. Blanchard of this city, open to all horses which had not beaten 2:17 previous to the beginning of the present season. Nine of the original thirteen nominations fulfilled the requirements and were eligible to start, but Aldine, which had lately been sold to Commodore Vanderbilt, and the noted trotting stallion Black Cloud, named by Col. Russell, failed to put in an appearance, thus leaving seven starters, viz: Edwin Thorne, Clingstone, Helene, Santa Claus, Fanny Witherspoon, Parana and Humboldt. When the horses were brought out for their preparatory exercise, it was noticeable that Santa Claus was suffering from lameness so that many thought he would be drawn, yet others who saw him win the great Stallion Race at Boston last year, expressed the opinion that he was as lame then as now. Those who watched him closely, however, could not fail to notice that he was suffering at every step. Edwin Thorne and Clingstone appeared to be in excellent condition. Fanny Witherspoon, although in fair condition, did not appear quite fit to trot for a man's life, while Helene, Parana and Humboldt were thought to be in too fast company to stand any chance of winning their entrance money. Parana was by far the most beautiful animal of the lot, and although she did not win any part of the purse, she won the admiration of every one who appreciates a fine trotter.

The story of the race is soon told. After scoring a full hour, during which the horses came down eighteen times for the word, they were sent away. In two minutes and nineteen seconds from the time the word was given Edwin Thorne passed under the wire winner of the first heat, with Helene second, Clingstone third, Fanny Witherspoon fourth, Santa Claus fifth, Parana sixth and Humboldt in the rear, which position he maintained to the close of the race. The second heat was won by Thorne. Time, 2:19; Clingstone second, Witherspoon third, Santa Claus fourth, Parana fifth, Helene sixth, Humboldt last. The third heat was intensely interesting, especially down the back stretch, where the plucky stallion, cripple as he was, worked his way up until his nose showed up in front of Thorne, who was leading the lot; but as they swung into the homestretch Thorne forged ahead, with Santa Claus close upon his wheel; at the distance stand Clingstone showed that he had the speed of the lot, giving Santa Claus the good-by, made a rush for Thorne, upon which he was gaining rapidly as the chestnut went under the wire, with Clingstone upon his wheel. Time, 2:18½. Santa Claus third, Parana fourth, Helene fifth, Witherspoon sixth, Humboldt seventh. First money, \$5,000, went to Edwin Thorne; second, \$2,500, to Clingstone; third, \$1,500, to Helene; and the fourth, \$1,000, to Santa Claus. During the intervals between the second and third heats the king of the trotting stallions, Smuggler, with a record of 2:15 and forty-four heats below 2:30 to his credit, was led upon the track where he was received with enthusiastic applause. The race was a success in every sense of the word, and must have netted the enterprising originator between \$10,000 and \$15,000 and the wish is freely expressed that such a race may become an annual event, but on some more suitable track than that of Beacon Park.

As to Graves.

EDITOR BREEDER AND SPORTSMAN: What is Graves' best time, and when and where made?

RECORD.

ANSWER.—2:19; made at Stockton, Sept. 20, 1874.

HERD AND SWINE.

Crossing for Beef Production.

It is useless to attempt to settle the question as to just how many crosses from a beef-making breed are best calculated for producing rapid fattening steers. The varying tendencies which occur in the practice of crossing are so great, depending upon anatomical formation, physiological peculiarities, quietness of temper, and vigor of digestion in both sire and dam, that it is a study worthy of careful attention from such breeders and farmers as are engaged in crossing up for meat production.

If we set out to breed for milk production, we are not liable to be left in any doubt as to our success, for the quart measure is a test that cannot be ignored. Twice a day this measurement makes its record of quantity, while the increase in the growth and fattening of a given steer is seldom taken upon the farm from calfhood to day of marketing.

His periods of gain, as a rule, come when warm weather and grass are in season, continuing while these last; and his periods of loss, as a rule, come when frost nips the grass and cold weather pinches the hide and flesh. When the dairy cow is overtaken by cold weather, the pail records the fact with unvarying certainty, and the promptness with which this is done is fully equal to its certainty. If we could have these daily reminders in the case of the growing or fattening steer, the lessons would be of value, and give us a key to the success of our plan of crossing up, which all experience goes to show we do not resort to the scales to obtain, either in the case of the animal, or the food he consumes.

So, from these premises—and these only partially cover the ground—we deduce that the real inwardness of crossing up for profitable meat production is very far from being mastered. Results are quite variable, even where the means used are, even in the opinion of the novice, the same. Some very thin-fleshed cows, from certain bulls, produce progeny that grow rapidly; and when they are ready to feed off, the response from the food given is very prompt and satisfactory. In such cases there are anatomical and physiological reasons which, while they are not quite apparent to every one, nevertheless exist; and if not clearly discoverable in the make-up of the immediate progenitors, they rest upon a base not very remote. Cattle are in one regard like members of the human family, in that there are no two alike. It is true of shepherds and herdsmen that where they have long been familiar with a flock or herd, they know each animal under their care, though the numbers be large. For each purpose for which cattle are bred, the aim of the breeder is to have them all like that one. This feat has never yet been accomplished, nor ever will be. It is quite possible to breed and rear a lot of young cattle that will feed almost as near alike as pigs of a given litter. But nature has planted a safeguard against the utter confusion which would follow a too close resemblance among the members of the human family; and this same safeguard is thrown around the brute creation.

It is quite well established that the tendency of flesh-making may be made somewhat uniform in a herd, while it is certain that a oneness of feature never has been, and to any great extent never will be. Cattle and other animals, both wild and domestic, distinguish each other by sight, though massed together in large herds. In the case of Gypsies—and the same may be said of Jews—transmission having been confined within the circle of their own race—the peculiar features of each have been perpetuated. But in these cases we observe that likeness carries dissimilarity along with it. The same may be said of the cattle of the Island of Jersey.

Intensely inbred for a long time, their peculiar features are very deeply planted; yet every individual animal is unlike every other one, upon the island or anywhere else, no matter how bred and reared. The peculiarities found in these cattle are the opposite of those that insure prompt taking on of flesh. But this very fact affords a lesson to the breeder of steers, for the rule as to transmissal of peculiarities works both ways with equal certainty. Hence, even for breeding steers, as men who are engaged in this industry have much at stake, the rules that govern a breeder of cattle of the highest type should hold good with them. Any breed of cattle, and we may say the same of cattle that are of no particular breed—mongrels—depend, for any fixed peculiarity they may possess, upon concentration of blood, and in looking for a male with a view of breeding steers for beef purposes, the most intense flesh-making tendencies should be sought for, and none others accepted. That this be present in the individual to be used merely does not of itself afford a guarantee. Evidence of a long-fixed tendency to obesity in the progenitors should alone satisfy. In the ratio of the possession of this can the male selected for breeding steers be depended upon with any class of cows; yet, of course, the leaven of the cow goes into the calf, and her quality is by no means a matter of indifference.—*National Live Stock Journal*.

Popularizing New Breeds.

Perhaps the most striking feature of the improved stock breeding interests in this country of recent years is the growth in favor of breeds which were almost unknown a few years ago; as a rule this has not been an indication of loss of favor by the old established breeds. These do not monopolize attention and interest as formerly, but they are, generally, being bred in increased numbers, and with an increasing number of admirers. Shorthorns and Jerseys are bred in larger numbers than when the one was almost alone as an improved beef breed, and the other had no rival in the Guernsey. Hereford breeders have, as yet, suffered no injury because the Black Scots have suddenly shot almost or quite to the front. The increasing importation of English draft horses does not seem to discourage the importers and breeders of Clydesdales and French drafts. Our country is so large, the demand for good animals so great, and the variations of tastes and conditions so marked that there is still room for all.

The friends of the more-recently introduced breeds are properly anxious to increase their popularity. We will gladly help them to spread abroad a knowledge of their merits—we have done more in this line than any other periodical in like time. The friend and admirer of all worthy breeds, we may be permitted to urge that lessons be learned from the experience of those who have handled the old-time favorites.

Every popular breed has suffered from the indiscreet or extravagant claims of some of its admirers. It does no good, but does harm, to unduly praise our favorite breed, or unjustly criticize other breeds; and it ought to be kept in mind that the special friend of one breed is almost certainly biased in its favor, and to some extent prejudiced against others. Such a man may safely imitate Holmes in his resolve not to write as funny things as he could, that is, he may safely make his claims a little less strong than he believes the facts will warrant. An intelligent, conscientious man who is handling rival breeds is in the best position, perhaps, to give

justice to each. He rests, of course, under the temptation to make the most of the special merits of each breed—balancing the one against the other. We urge the breeders and admirers of each new candidate for public favor not to make the mistake of relying on extravagant claims, and to do as little as possible of fault-finding with rival breeds. As a rule, it is better to make praise positive rather than comparative.

Each new competitor for favor must prove itself worthy of that favor. Deserved reputation in other countries will not suffice for permanent reputation here. For instance, the polled Scotch breeds have long maintained a first-class reputation in their own country for the quality of their meat. Suppose American breeders should have been content to rely on this—these breeds would soon have lost favor in this country. The cattle must be shown at the fairs and fat-stock shows; fat bullocks must be put in markets here, if the highest reputation is to be preserved.

Public-spirited, broad-minded treatment of all questions relative to the breeds in question will ultimately prove the wiser policy. Anything which looks like a desire to keep the breed in a few hands, or which has the appearance of trying to have a "ring" or "clique" in control of its destinies, will work harm. The more widely the breed can be distributed in good hands—the larger the number of enterprising breeders interested in it—the better.

Above all things, let those most interested put down all attempts to create any standards other than those relative to practical excellence. Don't let shades of color, shape or size of horn, or ear, or tail, or like points, be brought forward as tests of fashionableness or price.—*Breeder's Gazette*.

Fattening Cattle.

Most animals eat in proportion to their weight, under average conditions of age, temperature and fatness.

Give fattening cattle as much as they will eat and often—five times a day.

Never give rapid changes of food, but change often.

A good guide for a safe quantity of grain per day to maturing cattle is one pound to each hundred of their weight; thus an animal weighing 1,000 pounds may receive ten pounds of grain.

Every stall feeding in the fall will make the winter's progress more certain by thirty per cent.

Give as much water and salt at all times as they will take.

In using roots, it is one guide to give just so much, in association with other things, so that the animal may not take any water.

In buildings have warmth with complete ventilation, without currents, but never under 40 nor over 70 degrees Fah.

A cold, damp, airy temperature will cause animals to consume more food without corresponding result in bone, muscle, flesh or fat, much being used to keep up warmth.

Stall feeding is better for fat making than box or yard management, irrespective of health.

The growing animal, intended for beef, requires a little exercise daily, to promote muscle and strength of constitution; when ripe, only so much as to be able to walk to market.

Currying daily is equal to seven per cent. of the increase. Keep the temperature of the body about 100 deg., not under 95 nor over 145 deg., Fahrenheit.

Don't forget that one animal's meat may be another animal's poison.

It takes three days of good food to make up for one of bad food.

The faster the fattening the more profit; less food, earlier returns and better flesh.

Get rid of every fattening cattle beast before it is three years old.

Every day an animal is kept, after being prime, there is loss exclusive of manure.

The external evidences of primeness are full rumps, flanks, twist, shoulder, purse, vein and eye.

A good cattle man means a difference of one-fourth. He should know the likes and dislikes of every animal.

It pays to keep one man in constant attendance on thirty head of fattening cattle.

Immediately when an animal begins to fret for food, immediately it begins to lose flesh; never check the fattening process.

Never begin fattening without a definite plan.

There is no loss in feeding a cattle beast well for the sake of the manure alone.

No cattle beast whatever will pay for the direct increase to its weight from the consumption of any kind or quantity of food—the manure must be properly valued.

On an average it costs, on charging every possible item, 12 cents for every additional pound added to the weight of a two or three-year-old fattening beast.

In this country the market value of store cattle can be increased 36 per cent. during six months of the fattening finish.

In order to secure a sure profit, no store cattle beast, of the right stamp and well done to, can be sold at less than 4½ cts. per pound, live weight.—*From the advance Report of the Experimental Department of Ontario Agricultural College*.

Pigs For Profit.

Col. F. D. Curtis, a veteran swine grower, gives the following condensed information in the *American Agriculturist* for September on raising pigs for profit:

The care of pigs in summer can be made less troublesome and more profitable than is usually the case. Unless confined in restricted quarters, pigs are liable to break out and do mischief. They are not adapted to be kept with other stock, as no animal likes to feed after pigs, and while this dislike is so marked that animals will not eat out of the same vessel from which pigs have been fed, or in which they have "mussed," they may be forced from hunger to eat the grass in the pasture where they run, but it is not wise to compel them to do so. For these reasons, farmers generally keep pigs shut up in pens where they must be supplied with all the food they require. Sometimes this condition is improved upon by allowing them a small range upon the ground. This is better than close confinement in the pen, as it makes them more comfortable and healthy, but it does not lessen very much the amount of care they require, as the supply of food is soon exhausted. It is a better plan to have the inclosure so large that the pigs cannot readily consume all the grass and make it bare for any kind of vegetation. When pigs are not rung to prevent rooting, they will soon spoil a small inclosure and also damage a larger one. This injury to the pasture can only be prevented by inserting in their snouts two or three rings made of malleable wire. Care should be taken to have the ends of the wire straight so that they will not pull out. Every farm should contain a pasture for pigs, set apart for their exclusive use. It should be large enough to afford them ample space, so that while feeding off one portion the grass will grow on the rest of it,

to afford continuous feed. The size of the pasture must be regulated by the number of pigs to be kept. An acre is sufficient for three or four hogs, especially if the ground has been seeded with orchard grass, which starts the quickest and furnishes more feed than most other grasses. The manure from the hogs will increase the growth. The fences should be of a substantial character, so that the pigs will not break out. An unruly hog is the hardest kind of an animal to confine, hence the importance of good fences, to prevent them becoming breachy; a board fence or a stone wall is the best.

The Best Breed of Sheep.

Which is the best breed of sheep? Is it the Cotswolds, with their noble presence, great antiquity, thorough pedigree, their health, hardiness, longevity, and heavy fleeces and heavy carcases, their prolificacy or good nursing qualities? Is it the Leicesters, with finer bone, greater refinement of carcass, fleece and points, aptitude to fat, good wool, neat outline, desirable fiber, length of staple and profitable limbs? Is it the Southdowns, medium size, extreme hardiness, adaptation to hill pastures, grand symmetry, unequaled mutton, early maturity, tough constitution and productiveness in breeding coupled with surety of raising? Is it the Merino, with their swollen form, fine wool, hardihood, fine fleece, impervious, felt-like covering, their remarkable fecundity, and good motherhood? Is it any of these, or some fixed grade of these, or is it each and all? By fixed grades or crosses we mean such breeds as Oxfordshire, Hampshire, Lincolnshire downs, etc. Is it some one, or all of these? We contend that it is all. No one breed is best for all climates and conditions, no one breed is equally adapted to mountain pastures and to plains. Each is best where it thrives the best. Let the shepherd study the breeds, study his wants, study his pasturage, climate, and market, and then select with judgment derived from knowledge. Size of flock, surface, soil, exposure, all should be taken into account. These are questions all must study and determine for themselves and they are points that underlie all success in sheep husbandry. All are best where best adapted. All are worst where worse conditioned. We need each and all. We have diversity enough to accommodate all.—*Farm and Garden*.

Room For Both.—Mr. Samuel C. Kent, of West Grove, Pa., in his new catalogue of the Avon herd of Guernseys, compares them with the Jerseys in the following language:

"As to the merits of the Guernseys, we would state that, previous to our visit to the Channel Islands, we were strictly Jersey; but after a few weeks' sojourn, first on one, then on the other, our prejudice, as it surely was, gave way to a deep admiration of the lovely, golden-skinned Guernsey cattle, and we concluded to at least divide our interests between the two breeds; and while we still love the Jerseys, and believe them indispensable, we can see many traits of excellence in the Guernseys not found in the Jerseys; and while the Jerseys will ever, we believe, retain their general favor, the Guernseys must stand first for their greater physical power over the Jerseys, and deeper-colored and richer milk and butter products over all breeds. They are said not to be so pretty and fancy-like; but they are not at all homely to us."

BICYCLING.

Beacon Park Races.

A ten mile amateur and a five mile professional race took place September 18th, at Beacon Park, Boston. The weather was exceptionally fine and some good riding was done by the English rider Moore although he was not pushed by his competitors. The event began about half past four o'clock with the amateur race, the distance being ten miles, and the starters Frank Moore of Rivington, England, J. S. Deane of Boston, E. D. Claffin of Newton, E. M. Bent of Framingham, and J. Hewitt of Boston. Moore gave his competitors each one minute start but made up the handicap in the third mile, all the others except Deane having retired previous to this time. Moore however went on to secure a record and completed the ten miles in 33:34 Deane finishing in 37:44.

The professional race was for five miles, J. S. Prince allowing his competitors, J. E. Mellin and Thomas Harrison, forty seconds start. Harrison led for three laps and took Mellin's place to the end of the two and a quarter miles, when Prince overtook him and began rapidly to catch up Mellin's allowance also, but as usual, when he came up with his adversary's rear wheel he held there until the last lap, and on the home stretch the two came down neck and neck, Mellin making a gallant effort to keep the front, but without avail. Prince crossing the line the winner in 17:1. Frank Moore, the English one and twenty-five mile champion, is said to have completed a practice mile upon the Beacon Park track recently in 2:56, which shows that the track at least is not at fault if fast times are not made by the American riders.

What cyclist has not been troubled with the discomforts of clothing wet with perspiration after a hard run, when the cold, clammy garments suggest chills and colds, with their attendant evils? To avoid these annoyances, the costume should be made of serge or flannel, with waistbands and pockets of thin flannel. A suit constructed in this way and worn with woolen underclothing, will be found comfortable and healthy. Linen or cotton is an abomination, and as such should be discarded by all engaged in athletic exercises. The jacket should fit snugly, as indeed should all the clothing of the cyclist, as even if the underclothing is damp, the danger of catching cold is not so great, because the spaces left by loose fitting garments allow them to grow cold. The tricyclist can easily carry a woolen Jersey to put on during stops, or in the evening when the air is cooler. When touring the clothing should be thoroughly dried and warmed each night, in order that it may be fit for wearing in the morning. Avoid all cheap clothing, as it is poor economy in the end, and a cyclist in cheap and ill-fitting garments is a sight well calculated to draw tears from a stone.—*World*.

The Sacramento riders of the wheel have finally effected an organization, having formed a club on the 24th of August with Douglas Lindley president, Russel P. Flint captain, and E. B. Carroll and H. A. Marvin lieutenants, R. H. Hawley secretary and treasurer, and A. Scheld bugler.

The rains of the past few days have been sufficient to lay the dust, and as soon as the roads become smooth again there will be a fine opportunity for our wheelmen to try some extended country trips before the heavy winter rains finally set in.

The hundred-mile race between Prince and Morgan is to be run at the opening of the Casino in Boston in November. The championship point has been dropped and Morgan will receive a mile handicap. The stakes will be \$500 a side.

FISH.

Fish Farming.

There are but few persons who realize how much can be made by "fish farming." A few acres of ground, an artesian well and a few good fish, and one has, in a short time, a business that he can rely on. When traveling in Contra Costa County, we made the acquaintance of Mr. C. Dickenson, who for several years has devoted his time and attention to raising fish. Mr. Dickenson has a small farm of about twenty acres, near the town of Concord. About four years ago he made up his mind to experiment a little with the raising of fish. The first step was to sink an artesian well, at no very great expense, and then to dig out and arrange flood-gates to two or three ponds. The next was to stock these ponds. The fish that he selected was the European or German Carp. As he could not obtain any of this species in this country at the time, that were fit for breeding purposes, he sent to Germany, and after much trouble and expense succeeded in introducing to the waters of his ponds about eight fish that averaged five inches in length. This was four years ago. Mr. D. has increased the size and number of his ponds; he now has five ponds that average 60 feet square and these five ponds contain about 6,000 carp that run from 3 to 15 pounds in weight. He has also stocked the two ponds on Kimbal's Island near Antioch; these small bodies of water contain about 3,000 fish. Mr. D. says that the cost of keeping these fish is very light; what a dog would eat will feed a large number of fish. The breeding ponds ought to be shallow—not more than 12 or 14 inches deep—with sloping banks and a mud bottom. Carp require a muddy bottom in order to do well, and many persons suppose that these fish are not fit to eat as they taste of the mud, but this objection is easily overcome by putting the fish into a small pond or tank with a gravel bottom and running water a few days before putting on the table. By this means the muddy or earthy flavor entirely disappears and a very fine flavored fish is had; the best size for table use is about 2½ pounds; those weighing 12 or 15 pounds, though good eating are rather coarse of grain.

Mr. Dickenson is not sending any to speak of to the market, as he has orders from gentlemen from many parts of the country, for fish to stock their private ponds. Several lots have been sent to the Sandwich Islands and are doing well there from last accounts. Aside from being an excellent food-fish, the carp takes the bait well and is a plucky fighter and will afford the angler any amount of sport. There are many other kinds of fish that could be raised both for profit and sport; among the many varieties is the trout, which is receiving its share of attention as the following from the *Modoc Independent* shows:

"Mr. H. Woodson, who owns a ranch at Lake Annie, near Fort Bidwell, has been engaged in the business of trout-raising for the past three years, and has met with remarkable success. Three years ago Mr. Woodson procured a number of small trout from one of the streams which empty into Pit river, and although there was not at that time a fish of any kind in Lake Annie, the waters of the lake are now swarming with nice trout. Mr. W. states that in May last he caught fish from the lake that weighed 7 pounds—they having been in the lake just 31 months. A short time ago he caught twelve trout which were only one year old, and the aggregate weight of the 12 fish was 22 pounds. He sells fish in the Fort Bidwell market at 25 cents per pound, and finds the business very remunerative. Others in Surprise Valley are turning their attention to fish culture, and Mr. Woodson finds no difficulty in disposing of his young fish at \$30 per thousand."

On Fish Propagation.

The wonderful effect of artificial propagation is shown in the following extract from a letter from Seth Green, a man who stands pre-eminent in this most novel and useful science:

"Through the methods employed by the New York Fish Commissioners in shad propagation, methods which were discovered by me in the year 1867, the Hudson and other rivers have been made to produce as many shad as they ever before were known to produce. Under date of June 14, 1882, I am in receipt of a letter from Mr. P. A. M. Van Wyck, of New Hamburg, N. Y., which says that about twelve years ago the shad had been so nearly caught out of the Hudson that the fishermen abandoned the river because they could not make it pay. The season of 1882, owing to the efforts of the New York Fish Commissioners, shad were more plentiful than ever known before. Within a distance of six miles, 30,830 full-grown shad were taken. Mr. Van Wyck has kindly given me the names and number of fish caught by each fisherman, and the list is now before me.

"There has been a great deal of newspaper talk about the propagation of striped bass, cod and Spanish mackerel, and some cod are claimed to have been hatched, but as yet no way has been discovered to my knowledge successfully to obtain the spawn and propagate these species. I believe it is the duty of the United States Fish Commission to keep on experimenting until some way is discovered to propagate successfully these fish, but no large outlet need be made until such plans are hit upon. It does not properly belong to State enterprise to stock the ocean, which is United States waters, and for which purpose appropriations are made by the government.

"In conclusion, I will add that there is no simpler way to practice fish culture than on paper, and it requires but a slight movement of the pen to convert thousands into millions."

TOO BIG TO SWALLOW.—The Calhoun (Georgia) *Times*, with an air of modesty that disarms it of any how-is-that-for-high appearance, tells the following truth: "About two weeks ago Mr. Smith, living a few miles from Calhoun, Georgia, on the Oostamania river, lost a yearling heifer, about three years old, and as it was fine stock, made diligent search, but could not find it. A few days ago a party of young men fishing in the river were attracted by the smell of a dead carcass, and upon examining the cause, lo, behold! they found a monster catfish, which had swallowed the calf, and the horns of the calf becoming entangled in the fish's gills had drowned the fish. The fish measured exactly twenty-three feet and seven inches in length, and was five feet, eight and one-quarter inches across the head, and from the length of its whiskers supposed to be one hundred and seventeen years old."

The *Farmer's Journal* says that "At Elyrio, Ohio, the other morning, nearly a peck of young salmon two inches in length fell from the clouds into a single door yard." Is this the effect of the use of giant powder in California streams?

A Modesto Justice of the Peace this week fined one Miranda \$50 for erecting a dam in the Tuolumne river over which the fish could not go.

The International Fisheries Exhibition.

Professor Spencer F. Baird has recently prepared and published a valuable synopsis of the objects of the great International Exhibition of Fish and Fisheries to be held at London, in May, 1883, and the part to be taken therein by America. From this manual we take the following extracts:

"In the collective exhibit will be shown, in a systematic and synoptical manner, illustrations of our marine and freshwater animals of economic value, together with the apparatus and methods of their capture and utilization; and the commercial, scientific, social, historical, and legislative aspect of the fisheries. It will include the most striking features of similar exhibits made by the Fish Commission in the Philadelphia Exhibition of 1876, and the International Fishery Exhibition at Berlin, in 1880, together with many additional ones never previously attempted. The major part of this display will be borrowed from the collections of the National Museum in Washington, but it will be necessary to secure the right of placing in this department such of the private exhibits as can there be shown to the best advantage, it being the understanding that these are not to be excluded from competition.

"It is considered especially desirable that the department of competitive exhibits shall contain a very complete representation of the various food preparations of fish—canned, dried, pickled, smoked, etc.—there being a constantly increasing demand in England for goods of this description, shipments to that country amounting, in 1881, to more than \$2,000,000, in addition to the very large exports to other parts of Europe and to the European colonies in the east. Manufacturers of boats and boat-fittings, angling apparatus and costumes, and other similar articles are also urged to contribute."

A Fight of Sea Monsters.

General Spinner, the hero that used to sign the treasury notes, sends the following descriptive letter of a fight among sea monsters on the coast of Florida on South Beach, below Mayport. "Early yesterday morning, as I went to my usual surf bath, accompanied by my daughter, Mrs. Shumacher, we witnessed what has probably never before been seen. The ocean was unusually placid, but a strange commotion in the surf was noticed. On nearing the shore it was seen that a fierce battle was raging between two schools of fish. It was high tide and the water was shallow, so that the caudal and dorsal fins of both these kinds of sea monsters were constantly seen above water. The onslaught of each of the combatants, of which from sixteen to twenty were in view, was fierce and terrific. A disabled saw fish was stranded. I waded in to him and with a piece of floor board gave him the coup de grace. He measured nearly fifteen feet and carried a sword saw three and a half feet long with over fifty teeth on its margin. It was found that one of the sharks had bitten a piece out of his side equal to a foot square, through which his bowels protruded. At one time it looked as though another pair of the combatants would be stranded, for in their struggle they came so near the shore that they touched bottom all the time, but they managed to join their companions in deep water, and after fifteen minutes all the belligerents disappeared, to the great relief of those who cared more for sea bathing than seeing the terrific fights of sea monsters. My daughter will carry the saw of the captured fish to her home as a memento and trophy of the great conflict, and for an addition to her cabinet of ocean curiosities.—*Florida Dispatch*.

A New Food Fish Discovered.

Captain Joseph W. Collins, of Gloucester, arrived home on September 29th., from an experimental trip in the smack Josie Reeves, of New York, to the edge of the Gulf stream in search of tile fish in the interest of the United States Fish Commission. The smack fished for three days over the ground where the fish had been found in the greatest abundance for the past three years, making two sets of trawls a day, covering fifty miles of territory without taking a tile fish. The trip, however, resulted in the discovery of a new food fish, believed to be of great value, specimens of which were brought up on the trawls from a depth of about 120 fathoms in latitude 40 degrees 2 minutes, longitude 71 degrees 2 minutes west. The fish somewhat resemble sea bass, with specific differences, the under side being beautifully mottled with a delicate shade of pink on a cream colored ground. The back is of a mottled pink and reddish brown. The fish has thirteen spines in the dorsal fin and the pectoral fins are unusually large. The specimens taken were from one pound to four pounds in weight. When cooked the fish is white and delicious. Specimens were brought on ice and in alcohol, and have been sent to Washington for identification and a name.

SEEKING PLEASURE UNDER DIFFICULTIES.—Some Renoites went down to Pyramid lake last week to hunt and fish. They went out into the lake and boarded a "lone barren isle"—an island alive with rattlesnakes. While on the island they were caught by the late big storm, and having but a frail bit of a boat, were forced to remain there among the snakes two days and nights. On account of the many snakes they dare not seek shelter among the rocks. They were obliged to camp and sleep on the beach, where they were exposed to the full fury of the storm. Then we learn that at Donner creek the water is very low at present, and the trout in it can almost be caught with the hands. The only drawback to the sport of fishing in it, is the tendency the cattle along the creek have to chase the fisherman, and because gored pants are not fashionable.

SWARMING SALMON.—The Yale (B. C.) *Sentinel* says: "All along the edge of the river the water is black with salmon, while all the creeks for a long distance up are jammed with them. Millions are to be seen. As the water goes down in the creeks, thousands are left to die along the edges and where the water is shallow or dries up. Such sights are not in the recollection of the oldest inhabitant. On Monday Mr. Juddkins, a photographer, proceeded to Gordon creek bridge and took a number of views of the salmon swarming along the edge and at the mouth of the creek."

SALMON IN THE YUBA.—On Tuesday last some of the men standing on the levee opposite the mouth of the Yuba river, noticed a floundering and splashing in the wet mud, which constitutes the principal element of that stream, and thinking that it was a beaver, secured a boat and crossed to the place, and captured the cause of the commotion, which proved to be not a beaver, but a large salmon weighing 23 pounds. The cessation of hydraulic mining on the Feather river has rendered that stream comparatively clear, and fish are in consequence making their way up its waters.—*Sutter County Farmer*.

IRELAND'S NEWEST GRIEVANCE.—The Fishery Commissioners give the most doleful accounts of the produce of her seas. Once Dublin Bay was famous for its herrings. In the autumn that little harbor of Dunleary, a well-known haunt of fishermen and smugglers, would be filled with the brown sails of the Cornish luggers. They will scarcely come over this year—at least, not if they read the reports of the Commissioners and believe in them. It seems that in 1878 there were nearly 150,000 mease of herrings captured, while last year the take did not amount to a third of that figure; and what is more distressing is that this deficiency is gradual. From 1877 to 1882 year after year the falling-off has progressed. If there was a sudden failure it might be accounted for by a disease of the fish, but a gradual and continuous dwindling looks as if the herrings were following the example of the peasantry, and leaving the shores of the island.

Obstructing the salmon by an impassable rack really amounts to the same as confining them in pens, except that it is on a larger scale. As the rack prevents them from going up the river, and their irrepressible instinct to ascend the river keeps them from going down, they become confined on a large scale under the most favorable conditions possible. Their native river is their prison. All their surroundings are natural and healthful. They have the whole volume of the river for their water supply, and in every way it is the most desirable form of confinement possible. Nothing better could be wished. The great advantage of this method of confinement showed itself as soon as it was tried in the vastly improved condition of the salmon in the McCloud river. When before hundreds of the spawning salmon died in the artificial ponds and corrals in which they were placed, now none whatever die, or appear even to suffer, from the effects of their confinement.

Since the artificial hatching has been carried on at McCloud river the salmon in the Sacramento have immensely increased, so much so that, although the canneries have increased, and the sea-lions and the fishermen also, the salmon have nevertheless made a steady gain in numbers; or, to use the words of the late Hon. B. B. Redding, the secretary of the California fish commission, "the commission has, with the aid of the artificial hatching of salmon, beaten the sea-lions, the canneries, and the fishermen combined."

Parties returning from Pescadero say that salmon-trout are running in from the sea in large numbers. These fish weigh from four ounces to one and a half pounds. They take most any bait and are very gamy and fight to the last. It is more than likely that if our anglers would search they could find plenty of these fish in nearly all the lagoons and creeks along the coast that open into the ocean. As the brook and mountain trout season is over, it is to be hoped that the salmon trout will take their place.

Last Sunday Mr. Barbia chartered the schooner Eudora and took a party of forty persons out on a fishing excursion on the bay. The best grounds were found in the vicinity of Angel Island where the party stayed until it began to rain and they had to abandon their sport till a more favorable time. A great many other boats, containing enthusiastic fishers who ran the risk of a wetting, were out, but they, too, got wet and pulled for the shore.

Reports are current that large numbers of salmon trout have run into the creek near Mussel Rock, San Mateo county. This creek was formerly used by the Acclimating Society for the propagation of fish and found to be a very good place for those purposes.

A fish pond at Benton Park, St. Louis, was stocked last spring with twenty carp, and now there are three thousand of them. A carp should be two or three years old before it becomes food.

Good fishing was had last Sunday at the Anita Rocks near Harbor View. Two parties who were out caught forty-eight pounds of rock cod and might have got a great many more had they not been driven to shelter by the rain.

It is a well-known fact that salt water fish are very fond of wheat. No doubt some of our fishermen will find good fishing in the vicinity of the place where the wheat-laden barge Commerce turned over last Sunday.

During the past week large strings of tom cod have been caught from off the wharves.

The run of tom cod in the Columbia river is very large.

California Horses in Australia.

That trotting enthusiast, Dr. Weir, has let no grass grow under his feet since leaving Melbourne—it seems only the other day—for he has already reached Sydney, and will soon be in Victoria with the nine nags he has specially selected in the States for our trotting turf. He arrived in the sister colony last Friday by the Zelandia, and the following is a list of the horses he has brought, with the authentic pedigrees, viz: Violetta, bay mare, five-year-old, by Echo, dam Nita, by Sawyer's Hambletonian, he by Whipple's Hambletonian, Echo by Rysdyk's Hambletonian. Daisy, chestnut mare, four-year-old, by Elmo, dam Bracelet, by David Hill's Clara, ch m, four-year-old, by Elmo, dam Bessie, Keokuk. Ella Chieftain, ch m, eight-year-old, by Chieftain, dam Susie, by Kentucky Hunter. Swamp Angel, bay m, aged, by David Hi record 2:34, at Marysville, Cal. Midnight, blk, four-year-old, by Elmo, dam Maggie, by Whipple's Hambletonian. Richard, bay g, seven-year-old; by Geo. M. Patchen, dam Susie Simpson, by Owen Dale, he by Belmont—Owen Dale, dam Mary Downing, by American Eclipse. Oliver, bay g, eight-year-old, by imported Hercules, dam by Belmont, he by American Boy; record 2:37, at Sacramento, Cal., 1878.—*The Melbourne Sportsman*.

The Crocodile in Florida.

Recent investigations have shown that the crocodile is to be found in the less frequented parts of Florida, where it has long been confounded with the alligator, and a single specimen is now among the collection of reptiles at the Smithsonian Institution. The great point of difference between crocodiles and alligators is that the former live in salt water, bayous or creeks near the sea, while the latter are to be found only in the fresh water streams. The crocodile, cayman, gavial and alligator are all types of one group, the crocodilia. In these reptiles the heart resembles that of birds more than that of any cold-blooded animals. The ventricle is completely divided by a septum into two chambers, the venous and arterial blood join outside of the heart, and the brain is birdlike. The muzzle of the alligator is in a straight line, but that of the crocodile is much narrower behind the nostrils. There are also other anatomical differences. The crocodile is known among the Indians as the "long-nosed alligator." The Florida crocodile is the *crocodilus acutus* of Cuvier, and is entirely identical with the Jamaica species, but is entirely different from the cayman of Guiana, South America.

THE Breeder and Sportsman.

PUBLISHED WEEKLY BY THE
BREEDER AND SPORTSMAN PUBLISHING CO.
THE TURF AND SPORTING AUTHORITY OF THE
PACIFIC COAST.

OFFICE, 508 MONTGOMERY STREET
P. O. Box 1338.

Five dollars a year; three dollars for six months; one dollar and a half for three months. Strictly in advance.

MAKE ALL CHECKS, MONEY ORDERS, ETC., PAYABLE TO ORDER OF BREEDER AND SPORTSMAN PUBLISHING CO.

Money should be sent by postal order, draft or by registered letter, addressed to the "Breeder and Sportsman Publishing Company, San Francisco, Cal."

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

JOSEPH CAIRN SIMPSON, - - - EDITOR

San Francisco, Saturday, October 7, 1882.

CLOSING OF ENTRIES.—Do not forget that the stakes and purses of the Fall meeting of the Pacific Coast Blood-Horse Association other than the "fixed events" close on Tuesday next, the 10th instant. See advertisements for particulars.

A GOOD IDEA.

In a conversation with P. A. Finigan a few days ago he advanced an idea which struck us as being a capital plan of avoiding difficulties that have beset the judges at many of the points of the circuit. The proposition was that the presidents of the fairs should join in forming a committee from which the judges could be chosen, and enough of them attend the various meetings to have the requisite number in the stand during the races. Thus there would be a similarity of ruling at all of the main points, and the drivers understand just what they would be required to do. As it now stands there is a disposition to avoid giving offense, fearing that strict enforcement might militate against the entries in the future. There is also a serious trouble in obtaining men who are conversant with the rules, and who have the firmness to punish violations so effectually as to preclude a repetition. The only drawback we can see is that it might be difficult to induce the presidents to attend all of the fairs, and in lieu of that efficacious method the next best thing, perhaps, would be the selection of a man to assist the president of each association in discharging the duties. There would have to be a joint action of the societies in making the selection and a joint sharing of the expense. It would be necessary to make the remuneration so liberal that a proper man could be obtained, and there is scarcely a question that however liberal the salary the benefits would far exceed the cost. The drivers are as much interested as the associations in having the proper men in the stand. Far more so as they are more intimately concerned with the future well-doing of track sports, and if they had sense enough to see that there was a future there would be far less trouble to manage them. Unfortunately a large majority are influenced by what is immediately in sight, and a double eagle or two obscures their vision so that they cannot see the hundreds of dollars in the distance. Under the supervision of a man who was thoroughly versed, not only in the trotting rules but also up to all the tricks and devices they could employ; who they knew would inflict penalties for every infringement, and whom they could not "bamboozle" or mislead, they would be compelled to good behavior. They would also be aware that justness would mark the awards, and protection be given when others would attempt to wrong them. Such an aid in the stand would be invaluable. Every fair and meeting would add to his knowledge of the men and horses, and his whole business be the perfecting the knowledge necessary for the duties of his station. He could watch the horses at exercise and keep a lookout for the manipulations of the pool box. He would be the Argus of the tracks, and the knowledge that there was a keen eye noting every movement, and a stern judge to call to account, would have a potent effect in preventing the planning of wrong-doing. Under the present system the judges have the slightest possible knowledge of the horses. It may be that the only time they are seen is during the pendency of a race and in many instances we have known judges who could not distinguish the entries nor tell which was which until one or more heats had been trotted. The contemplated official could commence his duties before the fairs took place. A month might be advantageously employed in visiting the various training grounds and taking notes of the horses which were engaged in the circuit. He would become familiar with their peculiarities, and conversant with the drivers' tactics. When the meetings began his whole time, outside of the duties in the stand, could be given to observation and acquiring information that would be of the greatest

value in arriving at correct conclusions. Between the heats he would be ready to make critical examinations, and detect "arrangements;" an "expert" capable of discovering at a glance things which would not strike a casual observer, and ready to take steps to counteract the mischief. The old adage that "an ounce of prevention is better than a pound of cure" is peculiarly applicable. When men are aware that the chances for them "getting away" with a piece of rascality are so slim that the odds are very long that there will be detection and punishment they are not apt to take the hazard. No one could find fault with this espionage. The honest man is pleased to have his honesty placed beyond question, and does not take exceptions to any watch which is placed over him. The rogue is only honest through compulsion and compulsory methods are the sole resort.

From a long experience in trotting affairs we are well aware that charges of dishonesty in the drivers are made in many cases where there is nothing to warrant the accusation. The "steals" are the exceptions, though candor compels the admission that occasionally there is robbery in comparison with which the highwayman has an honorable occupation. To adopt a course whereby the guilt or innocence is made apparent removes a great deal of the stigma which at present clouds the sports of the track, and a return of public confidence would be a grand boon to all of those who depend upon them for a livelihood. This confidence would naturally follow as the knowledge that such effectual guards had been raised must have that effect, and those who now suffer under the imputation of dishonest practices be relieved of the load of obloquy and restored to a correct position.

It may seem that it is too much power to intrust into one man's hands. It would certainly make it obligatory that due caution be observed in making the selection. With an adequate compensation we do not think there would be any difficulty in filling the office. A thousand dollars for two months' work would be money well spent, and that divided between six associations should not be considered burdensome. The honest drivers have everything to gain in an assurance that the rules will be impartially enforced, and that their rights are fully guaranteed by being placed under competent judges. The dishonest must be compelled to the right course and like children who, where entreaties fail, are forced to take medicine, must swallow the pill in spite of their grimaces. In their own slang they "must take the medicine without kicking."

THE BAY DISTRICT PROGRAMME.

Quite a comprehensive programme is partially outlined for the Bay District course. The intention is to give a series of races during the Saturdays of this month, with a trotting meeting in November, probably after the close of the Pacific Coast Blood-Horse meeting. The classification will be such as to bring together the celebrities of the Coast, and there will also be premiums offered to excel the trotting records of the East from yearlings to four-year-olds.

The Stanford Stake for three-year-olds is to be trotted on Saturday, the 21st instant, and to make out the afternoon's sport it is probable that a stallion race will be arranged. The talk is now for heats of two miles between Director, Abbotsford and Albert W and this is sure to result in a race which will be well worth witnessing. There is no question of the capacity of either of them to accomplish the distance, and their speed is very nearly equal. Each will have staunch supporters in the betting and, without doubt, there will be changes in the favoritism before the race is finished. The Stanford Stake is the largest trotting colt stake which was ever gotten up, and there will be \$3,600 for the youngsters to strive for. According to the division this will give \$2,400 to the first, \$800 to the second and \$400 to the third. Palo Alto can elect between the get of Electioneer and General Benton to represent that great breeding farm, E. H. Miller Jr. has an Electioneer from Addie Lee, and Jos. Cairn Simpson has an Electioneer from Columbine by A. W. Richmond. Should Palo decide to start an Electioneer it will be one of the most remarkable of circumstances ever known in a stake race. There were originally twenty-one nominations, five of these were by Electioneer. As Palo Alto had two named only one could start. Mr. Walstein made the second payment on Nellie W, a sister to Albert W, and had it not been for a violent attack of pinkeye which compelled her being thrown entirely up, she would have started. As it is, unless something occurs in the next two weeks, there will be two, and as nearly as can be foretold at present a strong probability of a trio of Electioneers contending for the rich prizes.

The premiums which are to be awarded for the lowering of the Eastern records should attract large assemblages to the Bay District course. It is something that should interest every inhabitant of California. What has already been done has brought California prominently before the world as a country which presents advantages

for trotting-horse breeding beyond any other. For two years the two-year-olds have eclipsed all others, and in the last year, those which were a year younger left such a gap as to preclude the thoughts of successful competition. Ten seconds is the California advance in the two-year-olds, twenty and a quarter seconds the hiatus between the Occident and the Orient in the yearling class, and that, too, by taking an Eastern trial as the mark. The time which will be the objective point is for yearlings 2:56½, for two-year-olds 2:31, for three-year-olds 2:21, for four-year-olds 2:19, and for five-year-olds 2:18. We have strong faith in the prophesy that four of the five will be beaten, and were it not for the draft which has taken the crack three-year-olds away would look for a lowering of all. We know of an individual who will wager a hundred or two that a majority of them will be lowered, and odds will be given that the yearling and two-year-old is defeated.

The two years 1880 and 1881 show a galaxy of California youngsters. In these there have been five two-year-olds which have beaten the best of the East, the slowest with four and a half seconds to her credit, and two yearlings, twelve and a quarter seconds being the difference between the fastest of the East and the second here. Both last year and this our four-year-old stallions have taken the lead, and though the five-year-old which is in the "top notch," was bred in the East, the speed was developed in California, and it was here where they scored the double victory. Now that the managers of the Bay District course have planned such a brilliant fall campaign, it will be singular indeed if the people of San Francisco do not support them by a liberal attendance. If they should fail to respond, there is small encouragement to keep open a park that would be the pride of any city on the other side of the "Rockies," and the gates might as well be closed. There is little danger however of there being such a calamitous winding up, and with good weather there is almost a certainty of "full houses."

THE EMBRYO STAKES.

On the Oakland Trotting Park Saturday, the 5th day of November next, will be decided three Embryo Stakes. These are the yearling trot for foals of 1881, a dash of a mile; the two-year-old trot, for foals of 1880, heats of a mile, and the three-year-old trot, for foals of 1879, heats of a mile, best 3 in 5. This will make a lively afternoon, and keep the officials busy to get through with them. But as the rules fix on 1 p. m., as the hour for starting, after the first of September, there will be no trouble should there be a punctual observance of the rules, and this is sure to be the case. The Embryo is a peculiar stake, there being nothing at all analogous to it in the trotting line. In some respects it is similar to the Produce Stakes on the turf, but differs from these, inasmuch as it gives the opportunity for naming in either the yearling, two-year-old, or three-year-old form, or in all three as the subscriber chooses.

The first one gotten up was in 1879, and in that there was no provision for declaring out, excepting the payment of forfeits ten days before the race was to be trotted. In that year the nominating fee was \$10, the forfeit \$25, the stake \$100, each. Subsequently the fee accompanying the nominations was reduced to \$5, and provision was made for "declaring out," on the first of September of each year, by the payment of \$10. Thus far the three-year-old of this year, all colts that are alive are liable for a forfeit of \$25, and if this is not paid on or before the 25th of October, they will be held for the whole amount of the stakes. Next week we will publish the names of those who have declared out of the yearling and two-year-old stakes, as we did not get the information in time for this number. There were originally named thirty-two in the yearling, forty-six in the two-year-old, and forty-three in the three-year-old, and the deaths reported to the Secretary are five in the yearling, nine in the two-year-old, and eleven in the three-year-old. There are enough left in each of the stakes to give the assurance of three capital races, and we also hear that L. E. Yates will drive his fast pacing mare Corette on that day, his object being to show a fast mile. That she is capable of getting "low down in the teens," was proven at Stockton, and it is almost a certainty that she will reveal a degree of speed which has never been equaled by a horse in their first season. With anything like good weather, the track will be put in such order as to give both her and the colts a good chance to distinguish themselves. The Oakland course is now one of the best in the State, being safe and fast. As it is reached in thirty-five minutes from the city, and without change of cars, it has also the merit of accessibility.

WILDFLOWER.

We never felt the least misgiving that Wildflower would be beaten in the Mall stakes. If even the pink-eye had made a clutch for her breathing apparatus before starting on the journey. From the telegraphic ac-

count the only effort was to win, and then was one Eastern colt good enough to force her to shut out the others. It is likely, however, that before her return she may give the Eastern folks a taste of her quality and return here in time to knock out the 2:21 of Phil Thompson. This singular form of epizooty that by common consent has been dubbed pinkeye has wrought great havoc among the horses of the coast, and that without showing in a serious form excepting in rare instances. Horses would eat well and apparently feel well, and at the same time be incapable of doing anything like as well as before the attack, and a relapse has always proved to be more severe than the first inroad of the disease. The Palo Alto colts were greatly hindered, some of them like Bonita being completely used up, and scarcely one which did not suffer. Marlet will also do something before he comes home, and we shall be greatly disappointed if Hinda Rose and Flower Girl do not earn some bright garlands.

A JUNCTION OF FORCES.

Palo Alto has absorbed Matadero, land, horses, Holsteins, Ayrshires, and a grand acquisition it is. It makes that magnificent training ground complete as it adds a course for the training of race horses, and now both divisions have separate quarters. This is an important feature, as even on private tracks there is trouble in "working" both together. The stabling at Matadero is as good as need be, in fact the boxes are roomy and substantially built, with every necessary convenience. The training track is a mile in circuit, the soil is better adapted for the training of race horses than at Palo Alto, there is plenty of pasture land, paddocks, etc., and without having an inkling of what Governor Stanford's intentions are, we take the liberty of guessing that henceforth Matadero will be the thoroughbred breeding farm, and of course the home of the cattle.

There are some very valuable acquisitions to the horse department. The thoroughbred stallion ranks very high as the getter of race horses, and there are mares of admitted excellence.

There are some very good trotting brood mares, and trotting-bred colts, a mare by Volunteer, a sister of Voltaire, others by Young Consternation, California Abdallah, Elmo, etc. The youngsters are by Electioneer, Nutwood and General Benton, and are a finely grown and shapely lot.

While we congratulate Governor Stanford on such a brilliant accession to the Palo Alto forces, the country can ill afford to lose Mr. Coutts from the list of breeders. Before going to Europe he assured us that if he sold Matadero he would purchase another farm in California. He did not consider that it was large enough to suit his purpose, viz: breeding horses and cattle on a larger scale than he had hitherto pursued. He furthermore said that his stay in Europe would be limited to sufficient time for the education of his children, and that he preferred California for a home to any other country. We shall expect to see him again engaged in horsebreeding, and if he carries out his former intentions, he will import some of the best thoroughbreds he can obtain in France and England. There will be a very general desire to see him again in the ranks.

THE FALL RACE MEETING—CLOSING OF ENTRIES.

On Tuesday next the nominations in the extra stake and the entries to the purses, fall meeting of the Pacific Coast Blood-Horse Association will close.

By reference to the advertisement it will be seen that a very liberal bill is presented, and that four days of capital racing is nearly sure to follow. As far as we have learned the horses are doing well, and there is a likelihood of more exciting contests than has taken place during the year on this Coast. "The tourists" will be back in time to participate, though they will have a hard task before them to beat those which have not been compelled to endure the vicissitudes of the Eastern climate. The death of Flou-Flou has made a gap in the two-year-old rank which is a serious breach, and from what we learn the treatment was not up to the latest method of handling pneumonia. It is said that she was bled twice and the draughts on vitality copious in both instances. "Bled till the animal reels" was the old-time advice in cases of violent inflammation, though the modern practice ignores the use of the lancet and phleam. She was a remarkably handsome filly, and gave evidence of possessing racing powers of a high class. The Duke of Monday, Precious, Maria F. etc. will not give the Duchess an easy victory, and the older horses that are now in training are a superior lot.

The track on which the races will be run will be selected soon after the closing of the entries, and whether the Bay District or the Oakland course be selected there is no question of everything being done to put it in the best order.

The early rain is an indication that November will be fine—so at least the weather sharps predict—and with good weather there will be a rousing attendance.

EDITORIAL NOTES.

Lady Washington.—The Salt Lake horse, Ewing, that raised a sensation in Cleveland by trotting "very low down in the twenties," is California-bred. His sire was Primus and his dam, Lady Washington, now owned on the Rancho Del Pasos, was by American Boy Jr., the sire of the dam of Venture and of the pacer Dan Rice. She is a fine-looking old mare with evidently more racing blood than what she gets through her sire. American Boy Jr. was by American Boy, the sire of Belmont, his dam by Shakespeare, granddam Cincinnati. We write from memory and perhaps the Shakespeare and Cincinnati cross should be transposed. At all events, the kindred cross to Belmont figures in Ewing, and has been of immense service in helping out the Primus, as Mambrino Rattler did in Magdallah.

A very interesting communication from our Sydney correspondent "Echo" came too late for insertion in this number, and also an article from a valued contributor indorsing the course taken by the BREEDER AND SPORTSMAN in relation to a better system of correcting the evils that are now the greatest drawback to the welfare of the turf and track, was a little behind. Both are of a kind that will keep without deterioration. We have taken measures to secure correspondents in the Australian colonies, and the turf news from that country will be duly attended to.

The Bay District Association Races.—From an announcement made in another column, it will be seen that there are two purses offered by the Bay District Association, the races to take place on the 14th and 28th insts. The first a purse of \$500, is for the 2:25, horses and now that the best performers in the recent circuit are barred from this class, through the lowering of their record, we may see an excellent contest with such nominations as Ashley, Frank Moscow, Tump Winston, Inca, Captain Smith, Marin, Honesty, Cairo and other horses of the class. The race for the 28th inst., is a special purse of \$600 for the following horses: Manon, Vanderlynn, Nellie R, Sweetness, Albert W, and Starr King. If these horses can be brought together, it will be one of the most exciting races of the season, as each one of these fine trotters has its adherents, and there will be a great amount of speculation in the result. It is to be hoped that these races will meet with a full and prompt response from owners, and that the attendance will be so large as to justify the managers of the association in arranging a Summer and Fall trotting season, on a permanent basis.

We sincerely hope that the owners of trotters will make entries in the purse advertised to be trotted in January next on the Elsternwick track, Melbourne, Australia. The winner will receive \$2,500, the only fee being a stake of \$50 each, and it is safe to say that a stallion that wins can be sold for a remunerative price. Honesty would be a capital horse to take, and there are half a dozen others which would do credit to California, though it would be more to our future interests if the selections were those which have been bred on this Coast. The fast trotting stallions bred in California are numerous, and with scarcely an exception are of good size and high form. Among the naives are Romero, 2:19½, Albert W. 2:22, Gibraltar, 2:22½, Honesty, 2:25½, Alex Button, 2:26½, Reliance 2:22½, etc. Albert W., Honesty and Alex Button made the records at four years old, and Romero at five. There are mares which could be included in the shipment and by sending a number the expenses would be reduced.

The breeders of California can well afford to share in the expense of a venture, and ship quite a number of colts and fillies of the proper breeding with the horses intended to take part in Australian trotting. If merchants saw the same opportunity for extending their trade they would at once take the necessary steps to introduce their wares, and what is good policy in mercantile affairs is assuredly wise on the part of breeders. There is also a chance to make exchanges, and by securing some of the best strains of Australian thoroughbred blood, and when California is in a position to supply the East with race horses there is not a particle of doubt of the demand being fully as great as the supply. There must be an effort to find other than home markets or horses will be so largely in excess of the home wants that the breeding of them will have to be restricted. There is a surplus here now; in five years the trouble will be greater, though with well-directed efforts to show the kind we possess there will be purchasers in excess.

CLOSING OF ENTRIES.—Do not forget that the stakes and purses of the Fall meeting of the Pacific Coast Blood-Horse Association other than the "fixed events" close on Tuesday next, the 10th instant. See advertisements for particulars.

A new species of fish, fit to be served at a Cabinet dinner, has just been discovered, it is said, off the coast of Massachusetts, in the ocean track over which President Arthur has just been sailing about in the Government yacht. The fish is described as having thirteen spines in its dorsal fin and as being mottled with a delicate shade of pink on a cream-colored ground—clearly a strong-backed and comely fish! The specimens taken have been sent to Washington for classification and a name. Perhaps this new visitor came this way to congratulate the President on his veto of the River and Harbor bill. But be that as it may, why not call it the "Arthur fish" in compliment to the most accomplished and devoted angler who ever filled the Presidential chair?—*N. Y. World.*

Wildflower Wins.

A dispatch from New York yesterday morning gives the following account of the trot for the Malt stakes and other notes of an interesting day for breeders and others interested in trotting.

The second day of the Breeder's meeting was held yesterday afternoon at the Gentleman's Driving Park, Morrisania, and a very attractive programme was offered, the races being full of interest. Many others than breeders came especially to see the California youngsters, and during the morning a number of fast trots were shown. Among them, a mile in 2:27½ by Charley Rodgers, son of Schuyler Colfax, out of Tippoo, and a half-mile in 1:09 by the bay mare Isabella, by Dictator, dam by Dorsey's Gold Dust. She is a very speedy animal and is expected to show a fast mile on Saturday. St. Gothard was sent to beat 2:30 for a consideration, and trotted a mile in 2:29. A remarkably fine colt, Income, three years old, by Inheritor, dam by Cuyler, was shown. He is owned by W. J. Welsh of California.

The regular programme began punctually on time. The four events on the card were well contested, Rosewood winning the national trotting stallion stakes for three-year-olds in straight heats. The Sequel Stakes for 2:40 mares was won by Guess Not after a spirited contest with Solo, a good second in each heat.

The Malt Stakes, in which all present were specially interested, had five starters, including ex-Governor Stanford's California-bred filly Wildflower, with a record of 2:21, made in the last year. She had five competitors, Baker and Harigan's Meander, W. H. Toller's Senator Sprague, R. Steel's Ernest, Mall's Raven and L. Kirkpatrick's Lucy Waiter. It was generally admitted that Wildflower would win, but it was hoped she would be made to trot in a time something near her record, but such was not the case. She won the first heat fairly, in a good contest, in 2:32, with Meander second. The second heat was entirely between Wildflower and Meander, the former winning in 2:27½, with Meander second and others outside the flag.

The Duchess of Norfolk.

There seems to exist a great difference of opinion as to the justness of the decision given recently at Sheephead Bay, that disqualified the Duchess of Norfolk in an important race, through an alleged foul made by her in connection with Herbert, better known as Tom Plunket. It is very seldom that similar complaints are entertained by the judges, and it is indeed unfortunate that the California stable, in its ill luck, should be the sufferer in this instance. The following letter, from the *N. Y. Spirit of the Times*, explains the grievance:

"NEW YORK, September 25.

"Confirming 'Vigilant's' comments on the alleged foul claimed against the Duchess of Norfolk, at the instance of Mr. P. Lorrillard, owner of Herbert, in the handicap sweepstakes for three-year-olds at Sheephead Bay Course, 19th inst., viz.: 'There was a slight collision, perhaps; but no palpable foul,' etc. I beg to say, as a spectator of the race, and who takes a deep interest in the success of the Pacific slope stables, that I think the Duchess of Norfolk, her owners and friends were most unfairly treated. In point of fact, there was no apparent fouling or interference in any way with Herbert's winning the race if he was able. The judges of the day, therefore, exhibited the Duchess of Norfolk's number as winner, and pools were paid thereon until Herbert's jockey was sent to the stand. The rider of the Duchess, although a brother of the complaining jockey, gave him a point blank denial, but was not listened to by the judges. The California party feeling aggrieved, I am prepared to match the Duchess of Norfolk against Herbert for \$5,000 or upward, a similar race, the track and judges to be mutually chosen.

"W. J. WELCH, 61 Broadway, New York City."

Departure of the British Rifle Team.

Sir Henry Hallford, with eleven members of the British team, sailed on the Arizona, of the Guion line, last week for Liverpool. General Wingate, Colonel Bodine, Colonel Schermerhorn, Major Morse, Captain Zalinski, Mr. G. J. Seabury, Secretary of the National Rifle Association, and many of the members of the American team assembled at the pier to bid farewell to their friends and late successful opponents. No speeches were made, but mutual expressions of good-will were frequent and the prospect of renewing acquaintance at Wimbledon next year excited pleasant anticipations on both sides. The members of the British team expressed themselves much gratified with their treatment here. A few of them have been so favorably impressed with the country that they think it not improbable that they may return here some day to live permanently. The members of the British team who still remain in the country are Colonel Walrond, M. P., who is hunting deer at Winnipeg; Major Humphry, who with his wife has gone to Indiana to visit Colonel Fenton, a member of the British team of 1876, now residing in that State, and Lieutenant Heap, who desires to see more of New York.

From the San Jose *Mercury* we learn that Mr. Thos. Blake of Blake ranch on the Alameda road, who went to England some months ago in the interest of his breeding stables, returned home last Saturday, bringing with him two of England's best productions in horse flesh, one being a beautiful black draft stallion, and the other a splendid black, for carriage purposes. The farmers and horsebreeders of that valley especially should congratulate Mr. Blake for this valuable addition to his already fine stable of horses.

In the double-team trot on Saturday at the Greenville race track, McBeth's team beat Dr. Gray's best two in three for a purse of \$200. A half-mile match race for \$100 a side came off on the same track on October 1st, between Overland Pat and Nellie Bauta, resulting in a victory for Bauta.

There is a project on foot to lay out a track in the neighborhood of Quincy. We should be pleased to see it carried into execution as in the American Valley there are large numbers of young horses that with a little training might realize good sums as fast roadsters or good trotters. Every race track adds greatly to the resources of the State.

SPORTSMEN OF THE FAR WEST.—Our valued contemporary, the California BREEDER AND SPORTSMAN, which we regard as pre-eminently the sporting journal of the Pacific coast, takes occasion in a recent issue to remark: We want the people East to see the sports of this State as they really exist, and to cease regarding California sportsmen as a cross between a poacher and a cowboy, and that is one of the reasons why, in times past, we have pointed out failings as freely as we have commended excellence.—*The Turf, Field and Farm.*

THE GUN.

The California State Sportsman's Association.

There is scarcely a State in the Union wheresportmen have not organized themselves into an association. The avowed objects of such are to unite in securing the enactment of wise and efficient laws for the protection of game and fish, and the observance and enforcement of such laws.

In many of the older States, such associations have been in existence for a long time. They have enlisted the aid and support of some of the ablest and best men in the country, and have become important and influential factors in the body politic. The preservation, protection, acclimatization and propagation of game and fish, are questions of greater importance than one would naturally suppose who had given no attention to the subject.

These questions are important because game and fish, (1) form a prominent food supply, (2) afford occupation and profit to a large element in every community and (3) afford sport to sportsmen. It is a well-known fact that as civilization advances, wild game disappears or becomes depleted by the natural instinct of timidity and by the ruthless and unmerciful slaughter of the hunter. Dams or other obstructions are placed in streams, so that large numbers of fish are deprived of their spawning grounds, and are forced to go elsewhere. The bays, rivers and lakes are continuously dragged by nets, and it is only a matter of a little time when the old fable is exemplified, the goose that lays the golden eggs is killed, and then there are no more eggs.

California is no exception to the rule. Although the State has been and even now may be considered as the sportsman's paradise, yet it is safe to say there is no member of the fraternity of sportsmen who has not recognized the immediate necessity for some time past of inaugurating measures for securing unity of action upon the important questions suggested.

Profiting by the examples set elsewhere a call was made upon sportsmen throughout the State to meet in convention at Stockton on the 27th of June, 1881, for the purpose of organizing a State Sportsman's Association. In response to the call a number of gentlemen met at the time and place appointed, and the result was the organization of what is known as the "California State Sportsman's Association." Officers were duly elected and a constitution and a code of by-laws were adopted. The objects of the association as designated by the constitution, stated generally, are:

1. To introduce and acclimatize suitable game and fish.
2. To secure the enactment of wise laws, and to urge the enforcement of the same.
3. To bring men of kindred tastes into more intimate connections and relations, in order that all proper rights, privileges and pleasures may be secured to those whose instincts make them lovers of the rod and gun.
4. To further the interests of sportsmen.

Membership was limited to clubs regularly organized for the protection of game and fish, each club being entitled to be represented at all meetings of the association by two delegates. The membership fee is only one dollar for each member of a club, and dues two dollars annually from each member.

On the 4th of May of the present year, the first annual meeting was held at San Francisco. Thirteen out of the fourteen clubs belonging to the association were represented by delegates. There were three sessions of the convention before its labors were concluded. The work done can only be appreciated after reading a full report of the proceedings, which have been published in pamphlet form, and a copy of which any of your readers may obtain by application made to the Secretary. Stated generally, the time was mostly devoted to the reading of papers pertinent to subjects most interesting to sportsmen, and to the discussion of game and fish laws. The convention was composed of representative sportsmen from every section of the State, and of various callings and professions. Most perfect harmony prevailed throughout all of its deliberations as well as enthusiasm upon the success of the one year's work of the association. While great importance is to be attached to these annual meetings, it must be borne in mind that the real work of the association is done by its individual members and officers during the close season.

Violators of the game and fish laws are to be detected, prosecutions to be instituted, evidence to be secured, trials to be conducted, etc.

The association in the performance of its duties meets with many obstacles, the most serious of which is in the securing of convictions. As a rule the defendant demands a trial by jury. These juries are usually composed of a class of men who are not in sympathy with the objects of the association, and no matter how convincing the proof may be of the guilt of the accused they do not regard the violator of the game law as a criminal, and the result generally is either an acquittal or a disagreement. In the latter case a new trial is had which involves a great deal of additional labor and expense. On the other hand when a conviction is secured the defendant moves for a new trial and takes an appeal.

At the present writing the association is interested in two appeals where convictions have been secured and in one case where a jury has twice disagreed. The individual members who have charge of these cases are determined no matter what the expense or labor may be to follow them to their conclusion. Another serious obstacle in the way of carrying out the objects of the association is a want of means. It has no source of revenue other than that derived from the membership fee and dues herein above referred to. With its somewhat limited membership the aggregate of this revenue does not exceed five or six hundred dollars per annum. Considering the task undertaken it requires the severest economy on the part of its officers to make both ends meet at the close of the year, and necessarily limits the work of the association. At the last annual meeting above referred to an amendment to the by-laws was adopted by which individual membership is allowed. The object of this amendment was to enlist the support of a large class among sportsmen who are not members of clubs, and thereby increase the membership and revenue, and besides to lend dignity and importance to the body itself. Several names of this latter class have been proposed, and since the last meeting several clubs have joined. There is one other obstacle in the way of the association and that is an unjust and unfounded prejudice which exists among a certain class, based upon the idea that it is gotten up for the purpose of having a pigeon "slaughter" as the tournaments are called. That a deep-set prejudice against pigeon trap shooting does exist, and whether just or unjust, it is not the object of this article to defend or oppose, must be recognized, and the feelings of this class should not be ignored. It is true that at the time of the annual meeting a

wing shooting tournament is held, but this is only an incident to the meeting, as the sequence will prove.

The Board of Directors of the association have general supervision of this tournament, and the details thereof in their discretion may also be managed by them, but the details thus far have been managed by the local clubs of the place when the convention is held.

The object of thus retaining the charge and control is to preserve the dignity of the association, and to prevent anything being done which might bring it into disrepute.

The by-laws provide that not a dollar of the funds of the association shall be used in these tournaments. The reason for providing for the holding of these wing shooting tournaments at the time of the annual meeting is that they are an absolute necessity. As before suggested, delegates to these meetings come from all sections of the State, from as far south as Los Angeles and from as far north as Mendocino and Butte counties. No provision is made for reimbursing the delegates their expenses incident to attending these meetings, neither by the association nor by the respective clubs they represent. In order, therefore, to secure a fair representation of its members it is indispensable that some entertainment should be provided for them. By this means sportsmen have an opportunity to vie with each other in friendly tests of skill. There should, therefore, be no prejudice against the association on the score of pigeon shooting. It is safe to say that when the association shall have so far advanced towards the attainment of its objects that its meetings will alone be sufficient, or other means are adopted, to insure proper representation, then will the tournaments no longer even be an incident. It would not be just in this article to anticipate the secretary's report of what has been done by the association during the season just closed, but it is enough to say that its labors and those of its members have not been in vain and that on the 15th day of September of this year not a quail or a duck could be found upon the bill of fare of any restaurant or in any stall of the markets in this city. If there is any credit in this to be given to any one, it belongs solely to the association. The purposes of this article are to make public the fact that there is a State Sportsman's association, to show what its objects are, how earnestly the attainment of these objects are being prosecuted, to wipe out any unjust prejudice existing against it, and to enlist the countenance, aid and support of the public and particularly of all true sportsmen in the carrying on of the noble work. If any one of these purposes is accomplished, no matter in how slight a degree, the writer himself will feel amply rewarded for his trouble.

WILSON E. ROMAN.

Grizzly Bear Hunt.

A party consisting of Prof. Hicklin, Sam Waltz and G. G. Rigdon returned last week from an extended trip to the Wallova valley, Chief Joseph's old home. They expressed different opinions about the valley, but agree in saying that it is good for stock, fish and game of various kinds. It abounds in deer, of which one of the party killed three. One day while on one of the mountain ranges they saw, within a few yards of them, four grizzly bears. Waltz dismounted and was about to open fire on them when the professor suggested that the had better be a little careful, for if one of them was wounded they would probably attack the whole party, and make mince meat of some or all of them, and their wives would never see them again in this world—perhaps not in the next. These words, being full of wisdom, caused Mr. W. to cease looking through the sights of his Winchester, and Mr. Rigdon to lower his needle gun. There was another fact which largely influenced them in adopting a pacific policy. That was that both the hunters had only two cartridges each, their main supply being some distance from them. They retreated, and went for ammunition; and when they returned the grizzlies were retreating in good shape to a thicket, but before they entered it Waltz fired and broke the leg of the largest one, and all four soon disappeared in the thicket. A dog was sent in, but he acted very queer; he would not go in, nor would he growl or bark, or even raise the hair on his back like "quills on the fretful porcupine." The grizzlies did not show any signs of fight, except to make a terrible noise in the thicket, and our hunters concluded that they had not lost any bear and left them alone in their glory and solitude.—*Baker City (Or.) Reville.*

Hunters report quail as scarce and shy, the result of shooting out of season. We are informed that reputable dealers in this place shipped quail to San Francisco a week prior to the expiration of the close season. Where is our Sportsman's Club and what are they doing?—*Santa Cruz Courier-Item.*

The Sportsman's clubs have done all in their power to bring to justice all violators of the game law, but when we take into consideration the difficulty of obtaining conviction and punishment, even where it has been proved that the laws have been violated, we cannot lay the fault to the clubs but to the juries who have the trying of such cases. Many persons have been arrested and tried for taking or having fish and game in their possession out of season and the evidence that was given in proved them to be guilty, yet they went scot-free because they had the sympathy of the judge or the jury that tried them. No, the Sportsman's clubs are not to blame but public sentiment is.

FINE SPORT.—Some of our sportsmen as want good duck shooting will do well to go down to the sink of the Humboldt. The snowstorms in the upper country have driven millions of water fowl of all kinds down to the southward. All accounts are to the effect that game is unusually abundant at the sink. A Pinte who was in town yesterday—with about four bushels of ducks—being asked about the outlook for game whence they came, said: "Down Stillwater many, O, many!" and he waved his hand as though skimming them, like flies, from a vast area of the lake.—*Virginia Enterprise.*

Sunday a number of huntsmen went over to Sancelito and the marshes and fields adjacent; many journeyed further north along the line of the N. P. R. R., but they most all returned with very little game and considerable water. The quail were yet shy and hard to get near. During the rain, which lasted the best part of the day, the game on the marshes took to the cover of the weeds and grass, much to the discomfort of those who had braved both sun and storm to have a day's shooting.

Pity the poor rail, mud-hen or other bird unfortunate enough to fly across the Alameda or Brooklyn marshes, especially on Sunday, as these places are so close to civilization there seem to be more hunters than birds. Happy may the man be who can bring home even a feather as a specimen of his marksmanship.

Mr. C. D. Ladd, with a small camping party, spent several days last week near Searsville. They found the game, especially quail, quite plentiful, and brought back some large bags. Mr. Ladd, more fortunate than the rest, shot a fine large huck which, when dressed, weighed one hundred and eighteen pounds.

General Erwin was up at Sherman Island last Sunday but did not have very good luck. Nearly all the ducks he saw were flying very high and towards the south; there are but few ducks on the island or marshes in that vicinity. Those that are there are mallard and teal and the birds that raise their young in California.

Ang. Herring exhibited to us on Tuesday last a white squirrel which his boys had killed on his ranch in this county. The little fellow's coat is the color of a very light iron-gray, and is the same throughout.—*Sutter Farmer.*

In a half-hour's shoot on the Roosevelt Club's lake, near the Union House, Charles C. Mack Jr. last Saturday evening killed 21 ducks, all mallards and teal. Others shooting near by got from five to a dozen each.—*Sacramento Bee.*

Those hunters who would like sport a little more exciting than shooting quail or ducks can have all they wish by a trip to the outskirts of Sacramento, where, it is reported, bears are quite plentiful.

We understand that the ducks shot in the vicinity of Sacramento are very poor, both in flesh and flavor. The water before the rains was very low in the lakes and sloughs and food scarce.

Wild ducks are plentiful but quail are scarce, says the *Reno Gazette*. Very few deer are being killed. Trout from the big lakes are easily got, but mountain fish are not to be had.

Good bags of quail have been made the past week across the San Mateo county line, although the shooting is reported not as good as it has been in previous seasons.

Mr. Precht is having a small boat built for his use among the marshes during the duck season.

Doves are said to be plentiful in the vicinity of Vacaville.

THE RIFLE.

The California Schuetzen Club Tournament.

Last Sunday, October 1st., the California Schuetzen Club gave a grand shooting tournament at Schuetzen Park, Alameda. This was the largest rifle event of the season on the Pacific coast, there being nearly \$600 in money prizes competed for, besides \$300 in jewelry, silverware and other valuables. There were three classes of targets used. On the bullseye targets there were thirty prizes given; on this target there were also fifteen prizes given for the most bullseyes made during the day.

As a word of explanation, the target used is the regular Creedmoor target with a small six-inch pasteboard bullseye, with one-inch rings set in the center of the large bullseye. As soon as the six-inch bullseye is hit a flag is raised, the pasteboard center is taken from the target and numbered and another one put up in the place. At the wave of the flag the number is put down also at the marker's stand, opposite the name of the shooter. The numbers on the bullseyes are then compared with the numbers on the book and the result of each shot is easily found by the use of an instrument that measures to a one-thousandth part of an inch. There can be no question regarding the fairness, as each bullseye is measured before the name of the owner is ascertained. On the man targets there were twenty-one prizes; these targets represented the upper part of a man and are thirty inches high and twenty inches broad at the bottom. There were fifty prizes given in valuables. The day opened up very cloudy with indications of rain before night. The shooting began at 9 o'clock in the morning and closed at 5 o'clock in the evening. Under the circumstances the attendance was very large and all entered into the sport with considerable enthusiasm. An intermission of one hour was given at noon. As a prize was given for the first bullseye made after dinner, as well as for the first in the forenoon, all the riflemen were on the stand for the word to shoot; when the word was given a perfect sheet of smoke and fire shot out from under the sheds. Mr. A. Sticker made the lucky shot. From 1 to 3:30 o'clock the rain poured down in torrents, which made the shooting very bad, as the targets could hardly be seen. One gentleman said "there was water enough to float the bullets down to the targets." On Monday evening the prizes were distributed at Verein Eintracht Hall on Post street. Following is the list of prizes and the scores made by the riflemen:

Best center shots, J. Stanton, \$50; F. Kuhnle, \$40; A. Strecker, \$30; W. Ehrenpfort, \$25; Carr, \$20; John Mengel, \$17 50; F. Brandt, \$15; A. Kuhnwyler, \$12 50; Captain Straight, \$11; K. Wertheimer, \$10; George Schmidt, \$9; C. Adams, \$8; Kuhnle, \$7 50; C. Ladd, \$7; Rapp, \$6 50; P. Jacoby, \$6; W. Thompson, \$5 50; Wollam, \$5; Hatje, \$4 50; J. Hugg, \$4; Boeckmann, \$3 50; C. Sackehorn, \$3 50; Hagerup, \$3 50; C. Rolfs, \$3; H. C. Smitt, \$3; T. Gianini, \$2 50; N. Williams, \$2 50; J. Horstmann, \$2 50; Bart Isen, \$2; Magg, \$1.

Bullseye shots during the day, Rahwyler, 79, \$20; Strecker, 54, \$15; Kuhnle, 53, \$10; Jacoby, 52, \$8; Stanton, 50, \$7; Kuhnle, 45, \$6; Ehrenpfort, 33, \$5; Smith, 32, \$4; Rohlfis, 30, \$3 50; Adams, 27, \$3; Hatje, 27, \$2 50; Pecken, 25, \$2 50; Carr, 25, \$2; Hug, 17, \$1 50; Grannine, 16, \$1; Hortsman, 16, \$1; Straight, 13, \$1; Boeckmann, 13, \$1.

Man targets, Strecker, 75, \$20; Perkins, 72, \$15; Freese, 72, \$12 50; Rahwyler, 71, \$10; Mr. Carr, 71, \$9; Boeckmann, 70, \$8; Hug, 70, \$7; Klann, 69, \$6; Browning, 69, \$6; Kuhnle, 68, \$5; Stevens, 68, \$5; Merryweather, 68, \$4 50; Jacoby, 67, \$4; Dr. Boyson, 67, \$4; Johnston, 66, \$3; Kuhnle, 65, \$2 50; Sime, 65, \$2 50; Bramer, 65, \$1 50; H. Smith, 65, \$1 50; Beaver, 63, \$1 50.

Honorary target, Kaufing 70, shotgun; Ehrenpfort 70, soup ladle; Jacoby 69, six silver forks; Strecker 69, carving set; Stanton 68, six tablespoons; Kuhnle 68, six teaspoons; Rohlfis 68, silver goblet; Hug 66, six teaspoons; Boeckmann 66, six teaspoons; Carr 65, sleeve buttons; Mengel 65, six teaspoons; Kuhnle 65, silver set; Rugg 65, silver cream pitcher; Beaver 64, cameo ring; Brandt 64, case of whisky; Fischer 64, silver watch; Bartelson 64, rug; Hatje 64, cameo ring; Boyson 64, silver knife; Adams 63, quartz studs; Heisenberg 63, ring; Stamer 63, sleeve buttons; Bramer 63, opera glasses; Wertheimer 63, quartz buttons; Strech 63, glove box; Fortmann 63, napkin ring; Zecher 63, pair of boots; Sackehorn 62, scarf pin; Freese 62, scarf pin; Rahwyler 62, case of wine; Schmit 62, studs; Johnson 61, pistol; Haake 61, watch chain; Lime 61, parlor pistol; Hatje 61, hat; Hadenfeldt 61, hat; Thompson 60, pistol; Crore 60, box of cigars; Homeyer 60, case of wine; Schmidt 60, box of cigars; Schmidt 59; box of cigars; Burmeister 59, case of wine; Hettli 59, locket; Schohr 59, pencil; Gumble 58, goblet; Hortsman 58, powder flask; Utschig 58, box of wine; Kraiser 57, meerschum pipe; Lingensfelder 57, bell; Hugrenin 57, snuff box.

One dollar prizes were given to those who made the first and last bullseyes in the morning and those who made the first and last in the afternoon. The first was won by Geo.

YACHTING.

Fast Steam Yacht.

Following is a description of a new iron steam yacht being built by Muldoon at Killarlane, N. Y.: She is 75 feet long, 15 feet wide, 7 feet 6 inches depth of hold, and of 5 feet 6 inches draught of water. Her keel and stem is of bar iron, 4x1 inches, and her propeller post and forging, 5x1 inches. Her frames are of angle iron 2½x2½, 15 inches apart, and abreast of the engines and boiler will be strengthened with reverse angle irons of the same size. The keelson is of a double angle iron 4x4. Her plating is of the best flange iron; garboard strake, 5-16 thick; the remainder 4-16. Her boiler will be of the horizontal return, flue and tubular variety, 10 feet 6 inches long, 6 feet 6 inches diameter, and shell ½ inch thick. Its working pressure will be 100 pounds to the square inch, and it will drive a single, vertical direct acting engine 14x16, it is calculated about 200 revolutions per minute, and will turn a screw wheel of 5 feet 6 inches in diameter and 8 feet pitch—all giving an estimated speed of 17 knots. She will have a trunk cabin finished in the choicest of hard woods, with all modern improvements. This yacht was designed by J. Muldoon for Mr. Williams of Lake Champlain, and is building under the supervision of William J. Carmichael, the intention of both owners and builders being to produce a craft as fast as the fastest and of a sufficient strength to navigate either inland or "off-shore" waters. Her propelling wheel will doubtless be made of an elastic composite metal, as late experiments in Europe have established the fact that a certain degree of flexibility in the blades of a screw propeller wheel, when it is driven fast, increases its efficiency; and should the estimated speed of this yacht be obtained, in view of her great proportionate width, such result will exceed any all previous attempts at naval steam engineering in any country.

Catamarans.

These double-hulled boats have not been successful in this bay, the waters of which appear to be too rough for them. Several have been built and tried here. One capsized and another got partially wrecked on several occasions. A fine one was imported from the East, but it cost too much to keep her in order and she is now up Sonoma slough, we believe. It seems however as if these craft would be just the thing for the Sacramento and San Joaquin rivers where there is a great deal of current, but where the water is smooth. In working up against the current they would go with a very light breeze indeed, there being so little resistance. Here is a story of a catamaran which we take from an Eastern paper, and which shows how they sometimes get wrecked: "The catamaran Teaser, owned by Capt. A. W. Haines of the Seawahaka Yacht Club, was not lost at sea, as reported in Sunday's papers. Mr. Adolph Pannick and the captain of the catamaran were the only persons on board. Mr. Pannick said yesterday that the Teaser left Babylon at 1 p. m. last Tuesday. When five miles to the westward of Fire Island Inlet the riding bar, a stout piece of ash which connects the two hulls, broke, and in breaking it made a hole in the port hull, which began to fill. They took in the mainsail and ran under the jib for the inlet. The damaged hull filled and sank when within a few feet of the breakers. They put on life-preservers, latched a canoe, and reached the beach safely. The life-saving crew at Oakland Beach went out in a life-boat and bent a line on the floating hull, which had not become disengaged entirely from the submerged one, and towed the Teaser to the beach. She is slightly damaged in one hull, and the iron work is badly twisted and strained, but can easily be repaired. The Teaser is a Herreshoff catamaran, 32 feet in length.

"These swift and peculiar craft are becoming popular, and, though considered by some as dangerous, this is the first serious accident which has happened since 1877, when the Amaryllis was "pitchpoled" in the bay. The Amaryllis was racing in a stiff breeze with the Gilpin. A flaw struck her, her bows went under, her stern went high in air, and she turned a complete somersault, sending Capt. Fred Hughes and his first mate, John Lahay, high through the air. Catamarans cannot capsize, and it is claimed that the improved ones cannot pitchpole. Capt. Hughes has one of the improved kind, and, seated on his medicine chest, he laughs at the waves as he whirls along at the rate of twenty miles an hour, to the astonishment of coasters and fishermen."

A Corinthian race has been arranged between three schooner yachts of this bay. Mr. Gutte is to sail his yacht the Chispa; Mr. J. D. Spreckels, the Whitewing; Mr. Adolph Spreckels, the Fleur de Lis. No light sails are to be carried, and only two men in addition to the helmsman are allowed on each yacht. Each of the Spreckels brothers thinks he is personally a better sailor than Mr. Gutte. Mr. Gutte bases his hopes of victory on the speed of his yacht and her well-known "balance." She is so evenly balanced that she will nearly steer herself. Not long since she was left by the wind for twenty-five minutes and the helm was not touched during that time. Yet she went straight on her course. The Whitewing has these same characteristics to some extent. The stake boats will be volunteers. Mr. Gutte has not sailed his own boat as much as Mr. J. D. Spreckels has, but each of the gentlemen thinks he is a better helmsman than the other. This little brush will be an interesting one to see.

Lester Wallack has bought a steam yacht—the Skylark, and now the famous Columbia is for sale. With the great growth of the steam yachting interests, that of sailing yachts is likely to fall off. When people are absolutely sure of getting here or there and have none of the excitement of overcoming Nature's adversities of wind and tide, much of the pleasure of yachting is gone, as skill, endurance and knowledge are no longer requisite. Steam yachting seems more like a trip in the ferry boat. The only saving clause is that steam yachts are continually breaking down so there is some little uncertainty and excitement in this direction at least.

When Mr. Work was informed of the 2:16½ of Aldine and Early Rose, he is reported to have said: "I will bet a rotten apple; I will bet an old silver watch; I will bet \$5,000, \$10,000, \$25,000, \$50,000 that the Vanderbilt team cannot beat Dick Swiveller and Edward a mile to road wagon." Early

Rose is by Almont, out of Jennie, by Flying Cloud, and her record is 2:20½. Aldine is by Almont, out of Mother Hubbard, by Toronto, and her record is 2:19½.—*Turf, Field and Farm.*

The Royal Canadians are now doing things in the right way; but two or three years ago yachts intended to take part in their races were paid no attention to, their dinghies being refused even the privilege of landing at the club's dock. Now, members of other clubs are invited to attend, and owners of yachts are asked to assemble off the club house; the accommodation of which is proffered them, also the use of the club's steam yacht to convey them to and from the city. The change is a highly desirable one.

The sale of the schooner yacht Nellie to Mr. Merion Donohue and a couple of other young gentlemen is announced, and Mr. Bowie gives up his favorite racer. The Nellie has made a very good record for herself since Captain Turner launched her. She was built to order of Mr. Bowie, and he has owned her until now. It is stated that her new owners are to refurnish and refit the cabin and make some minor changes.

The hull, spars and iron work of the plunger Restless cost \$1,200. She is thirty-six feet long, thirteen and a half feet beam and three and a half feet draught. The sail cost \$90, and her ship chandler will have \$150. These figures will give an idea of the cost of such a craft. The boat carried out a party of fifty-two one day last week.

The Spreckels brothers' new keel yacht, on the ways at Turners' yard, Channel street, is all ready for launching. Work is now being done on the inside. It will not be very long before the yacht will be put into service.

By the end of this month many of the yachts will be laid up for the winter. In the Eastern States already many of the fleet are in winter quarters.

The schooner-yacht Danntless has sailed for Europe, having on board her owner, Mr. Caldwell H. Coit, and a party of his friends.

It is stated that Mr. Bowie and his brother and Frank Murphy are to build a keel schooner yacht, six feet longer than the Nellie.

The man on the Frolic got hurt last week with a boat hook.

The War of the Millionaires.

And now Frank Work responds to the challenge of "T. C. E." by publishing the following in the *Herald* of the next morning. It is "a very pretty quarrel" on paper, which it is evident will be the only battle ground, and there is scarcely a chance that anything further will result from it. After all the controversies are beneficial to the breeder as the desire of wealthy men to obtain fast road-horses, has fully as much influence in keeping up the price of trotters as the investments for track purposes. The top prices have been paid by this class of man, and there is no question that Robert Bonner alone has been the means of an immense sum of money being paid to breeders:

NEW YORK, Sept. 19, 1882.

TO THE EDITOR OF THE HERALD: In the *HERALD* of this date "T. C. E." makes a series of propositions for a test of the relative speed of Mr. W. H. Vanderbilt's team and the team Edward and Swiveller, owned by myself. Horsemen will understand why it is impossible for me to accept these propositions, but it may be necessary to give some information to others. Early Rose and Aldine are two mares which have been trotting all this season throughout the circuit and have been hardened by continued heat races, so that they are to-day in perfect condition. On the other hand, "T. C. E." knows that Edward and Swiveller have not undergone the preparation necessary to enable them to engage in the series of races which he proposes. It is well-known to him that the team has been kept, not at the track, but at my own stables continuously for two years past. They have been on the road and are in no condition to trot heat races. They are therefore in this respect placed at a disadvantage.

In order, however, to show my confidence in the superior speed of my team, I am willing to make a match with Edward and Swiveller against early Rose and Aldine to trot a competition mile for \$10,000 a side, or I will trot my team against Mr. Vanderbilt's team a time race of one mile, owners to toss which team to go first, and the second team to trot within one-half hour after the first team has trotted the mile, and the team which trots the fastest mile to take the stakes. Of course I stipulate for a good day and good track, and that the match shall take place on the Fleetwood Course, both teams now being in this city. Further I will wager "T. C. E." \$10,000 that the team of Mr. Vanderbilt cannot equal or surpass the record of Edward and Swiveller on the Fleetwood track, carrying the same weight to road wagon.

FRANK WORK.

This brought the following "answer in replication," from Mr. Eastman, which is the latest ebullition on the subject:

NEW YORK, September 20.

"TO THE EDITOR OF THE HERALD: My article in the *Herald* of Tuesday was drawn exactly to meet the boasts of Mr. Work, made to myself and others on several occasions within the last few days, that he could beat either of Mr. Vanderbilt's horses, single or double, and would trot them for any amount. But now, when offered a chance to test the question, he has backed out, and that ends it. Mr. Work's proposal to test Mr. Vanderbilt's team at Fleetwood, where Mr. Work's horses have been used for the past three years, is all very well for that gentleman, but I believe Mr. Vanderbilt's team now has the call, they have trotted a mile on the Charter Oak track in 2:16½, of which fact I will bet \$10,000. As to the record of which Mr. Work boasts, neither Mr. Work's nor Mr. Vanderbilt's teams have any record according to the rules of the National Trotting Association, Article 43, section 1, which says: "A record can be made only in a public race." This, however, does not deny that both teams have made the time given them, viz.: Mr. Work's team 2:16½, and Mr. Vanderbilt's 2:16½. The offers I made in Tuesday's *Herald* were simply accepting Mr. Work's proposal.

Yours,

T. C. EASTMAN.

Every Saturday sees a great exodus of gunners from this city. The ferries and trains carry a large proportion of sportsmen as their Saturday and Sunday passengers.

Capt. Chittenden, keeper of the Cordelia Sporting Club's preserves, in Suisun bay, was in town this week. The mosquitoes have left some of him, but not much.

THE KENNEL.

Gordon Setters' Standard.

The following letter to the Field will be found of interest to admirers of the Gordon setter:

"I would ask a small space in the columns of your valuable paper, in order to express my opinion of the Gordon setter, his merits in the field, and as a gentleman sportsman's dog, and as such I claim he has no equal. Although my experience in dog ology may not be as extensive as many others, yet for several years I have made my business the handling and breaking dogs. I have handled all kinds of setters and pointers, and I have no hesitancy in saying that I consider the Gordon setter, for all work (not wishing to over rate them) equal to any, if not superior.

In support of this, I would say: Naturally they are inclined, especially when young, to be a little timid, hence in breaking they require careful handling. It will not do to be harsh with them, but get their confidence and they will do your bidding with delight. I have broken them so that I never was compelled to strike a blow in order to prevent them from breaking shot or chasing birds.

Their fineness of nose is equal, if not superior to any dog I ever handled.

It is claimed by some that they are the "old man's dog," potters, etc. This I claim is due in a great measure to their breaking. Severe treatment will cow them, especially at first, but give them range, let them chase if they want to, and after they become anxious to hunt and range bring them down moderately by degrees, and I guarantee you will have a good dog—one that it will be a pleasure and satisfaction to shoot over.

But I started to say something about the standard by which those noble dogs are judged at our bench shows. They have abandoned the Gordon standard and judge them as black and tans—to suit some breeder's idea perhaps, because he had a dog that was evenly marked, otherwise, possibly, he was inferior in many points, but he was nice black and tan. What an idea! Take the late Cleveland Bench Show, for instance. The rule or standard called for black and tans; every other quality was ignored; black and tan was called for, and they had to have it, and, actually, first in the open class was given to a dog that was half Irish and half Gordon. If he had been a bulldog it would have been the same. The judge did his duty. There was the rule laid down, and he could not vary from it. Again, at Pittsburg, I think in 1880, in the champion class, champion Bob and Rupert were shown together, and the prize given to Bob, when Rupert would score more points than Bob, according to Stonehenge. He was better built, or put together; and had better head, better ears, and was built for endurance; yet there was the inevitable—his tan was clouded, therefore he could not win. Is it not time we had a change? A change is demanded. I am not prepared to say what change, or what points are absolutely necessary to bring about that change, but will leave that to wiser heads than mine. Only I would suggest that color or markings count not over four. Then we can breed for field qualities, and not for color or markings; and by so doing we will bring our beautiful Gordon setters to the front where they rightly belong.

And again, I demand that they have an equal showing with other strains of sporting dogs. Give them for fifty or forty-five pounds, and for light weights. Some prefer light or smaller dogs, while others prefer the larger size. But let them be Gordons, whether they are black and tan, or black and white, or coal black, and then judge them according to their true merits. The general build or make up of the dog for physical endurance should count largely in his favor. I would also advocate a native class, as there are many fine dogs through the country that cannot produce a straight pedigree, and such should not be ignored by any means.

This is what I honestly think and know about Gordon setters; and if I have furnished any ideas, or shed any light on the subject that would be of any benefit to any one, or to the best style of dogs that ever pointed a quail or woodcock, I am satisfied.

I. HASKELL.

Burgess Sat Upon.

Arnold Burgess whose savage attack on Mr. Leavessy will be long remembered is not quite so highly honored a prophet in his own country as he would have folks believe. The following rap at his knuckles is from a recent article in the *American Field*:

I shall not notice all Mr. Burgess has said about the color, for it would involve the gentleman in a labyrinth of inconsistencies that would afford no one any pleasure, and himself much discomfort. But for the benefit of the uninitiated I will say, that all the leading breakers of this country have long known the nose twisting process, but prefer to use the spike collar. If Mr. Burgess, with a very limited knowledge of dog breaking, is superior, in the matter of teaching dogs to retrieve to Messrs. Dew, Sanborn, Waters, Whitford, Waddington, Campbell and a host of other trainers with national reputations, besides a large majority of our leading amateur breakers, then knowledge is not power, nor does experience avail anything, and it were useless to offer any testimony in opposition to anything Mr. Burgess might choose to say.

I could not offer a stronger test of the value of the spike collar in retrieving than the indorsement of the best professional and amateur breakers in the land. I know there have been some dogs given up by breakers, that may have afterward been broken by some other process, but there is nothing strange in this, as some breakers will not waste their time on a dog that it will cost perhaps, more than his full value to break; so that dogs being given up by one breaker and afterward broken by another does not prove that one breaker or his system is superior to the other. I can name a number of dogs that have been ruined by the nose-twisting plan, and can also name a number that have been ruined with the collar.

can name dogs in which the nose-twisting process failed and the spike collar plan succeeded, and I can also name a number of dogs that could by no possible means have been broken to retrieve except with a spike collar. These exceptions offer no proof one way or the other, as every rule has its exceptions. The best proof, I consider, is the fact that the spike collar is used by all the leading breakers, with marked success, in preference to the method Mr. Burgess seems to prefer. If the dogs these gentlemen run in public are perfect in retrieving beyond criticism, a novice, like Mr. Burgess, will find he has set himself a ridiculously difficult task to write down their methods.

A Bold Challenge.

When the St. Louis Kennel Club withdrew their pointer entries from competition at Fairmont the setter men gave a loud hurrah and said that pointers had no chance. Their joy was short. First a pointer won the "free for all" and on Saturday night Mr. E. C. Sterling, the president of the St. Louis Kennel Club, handed to the *Field* the following challenge:

FAIRMONT, Minn., Sept. 9.

DR. N. ROWE, EDITOR AMERICAN FIELD, Dear Sir: We understand that the withdrawal of Maxim and Meteor, the pointers imported by this club for one of its members, from further competition in the Free for All Stake, has created in some quarters the impression that the cause of withdrawal was the belief that the dogs had not the ability to win, or that the party who entered them lacked confidence in the judges.

Neither was the case, and in proof of it, we propose, in case the winner of the first prize in the Free for All Stake is a setter, to run Meteor against him for \$1,000 a side, on prairie chickens for three days, under the National American Kennel Club rules, and near Fairmont, Minnesota, beginning the morning after the trials close.

The dogs to be worked as in ordinary field shooting. The judges to go in wagon. The handlers to accompany them and to remain together and work, excepting that the dogs are to be kept down when either handler wishes it under the direction of the judges. All points to be shot over by the judges, and the birds to be retrieved by the dogs. The match to begin at sunrise and close at sunset each day, with three hours for rest and luncheon each day. The dogs to be down, at the option of either holder, during the hours allowed for the match.

Transportation, refreshments and accommodation for the night, to be furnished and the expense borne by the losing party.

The dogs to be hunted against the wind when practicable. Each party to name a judge, the editor of the *American Field* to act as referee.

Please make this challenge public at the trials.

We enclose \$500 as forfeit.

For the St. Louis Kennel Club.

E. C. STERLING, President.

So far this challenge has not been accepted, as the winner was a pointer, but it is open to any setter.

California Coursing Club.

The members of this prosperous organization which, though one of the youngest coursing clubs in the State, is second to none in the size of its membership roll, the wealth of its treasury, the activity of its members and the speed and bottom of its dogs, held a meeting last Wednesday night at Eintracht hall, No. 519 California street. A goodly number of members answered to roll call and sat in deliberation under Chairman John Hughes. "Gentlemen," said the chair after the roll of delinquents had been called, "the business that calls us together to-night is the making of arrangements for what I hope will be the largest and best club coursing match ever held in California."

"I move to amend the chairman's remarks by inserting the words United States in the place of California," interposed Mr. Shankey.

Without noticing the interruption, save with a slight frown the chair proceeded: "Gentlemen, the most important of all the business devolving upon you in connection with this match is the securing of railroad accommodation for the conveyance of the club and its guests, and by way of parenthesis I may here add that all gentlemen who love the sport of coursing well enough to plank down \$5 for a ticket to Merced are the guests of the club. I am aware that political subjects are not allowed to be touched upon in this club, but I must say that in its past dealings with the Southern Pacific this club has always found what is commonly represented to be a soulless corporation a most obliging and reasonable body, therefore I apprehend that the club will have no difficulty in securing all the cars it may need at such prices as will make our trip but a slight burden on the members of the club. To make a suitable contract with the railroad company and also print such bills and tickets as the club will need, I appoint as a special committee, with full power to act, Messrs. J. F. Carroll, J. J. Murphy and Dr. J. M. Sharkey, and now call upon the worthy treasurer to let the club know how much cash it has on hand."

Thus introduced Treasurer Murphy took the floor. This gentleman has a happy knack of making statistics and figures interesting to the duldest mind and his vast experience with complicated accounts enables him to disclose the condition of the club at an instant's notice.

"Gentlemen," he said, "it is with great pleasure that I inform you that the club has a cash balance in its treasury free from all claims of \$231 60."

"Move we donate the odd sixty cents to the Sportsman's Club to assist in prosecuting violators of the game laws," said a delegate in the rear of the hall, but he was promptly suppressed and his motion declared out of order.

The chair then called for an expression of opinion on the number of dogs likely to compete in the meeting at Merced on November 15th and 16th. On comparing notes it was found that the "Old Dog Stake" would probably have 32 starters and the "Puppy Stake" 16.

Under the head of memberships seven names were presented and as all their owners successfully passed the ordeal of a ballot that number was added to the roll of the club.

After the usual closing rites of good fellowship the club adjourned to the call of the chair.

AUSTRALIAN COURSING.—Here in California we are apt to fancy that twenty-four runs is a hard day's work in the coursing field. In Australia they do the work quicker, but then their game is not as staunch as ours. At the Australian club spring meeting, held August 26 on the Werribee, the local reporter says: "Hares were again most plentiful, and it remains to record the unprecedented fact that eleven courses were run from the Norfolk plantation in half an hour, and

before the circumference of the dial was complete the eighteenth brace were in slips. During my experience I only remember this to have been excelled once, viz: at Abergele in North Wales, where nineteen courses were run within the hour."

Coursing in Australia.

The following extract from the Sydney Mail will be of interest to the many old Australian coursers now in this State. Mr. J. Weir is a resident of San Francisco:

A meeting of the committee of the New South Wales Coursing Club was held September 2, at Tattersall's Club. Present—Mr. G. Lee Lord (in the chair), Messrs. J. Weir, W. Cooper, A. L. Park, J. C. Low, G. Thornton Jun. and Dr. Belisario. Some discussion took place with regard to the improvements on New Plampton, and it was ultimately resolved that a sub-committee, consisting of Messrs. G. Lee Lord, W. R. Hall, P. Lamb, and S. Burdekin, M. L. A., be appointed to supervise the necessary works. It was resolved that if the Victorian Coursing Club appoint Mr. Gaden as judge for next season, he receive a similar appointment from this club, Mr. W. Pitt having decided to retire. The chairman brought under the notice of the meeting the propriety of holding a meeting at Bathurst next season. It was pointed out that if the club consented to go to Bathurst next season it would bind itself to go always; that the meeting at the City of the Plains had always been a loss to the club from a pecuniary point of view, and that the people did not support the meetings. Mr. A. L. Park said that he thought the Bathurst coursing men were deserving of every consideration at the hands of the members of this club, especially when it was remembered that there would most probably have been no coursing at all in New South Wales at the present time if it had not been for the coursing men of Bathurst. Ultimately it was resolved "That, so far as this committee is concerned, it agrees to hold the first meeting of the season at Bathurst, provided that a Plampton is being formed."

DOG SHARPEERS.—Gentlemen who are thinking of sending East for dogs should pay heed to the lesson contained in the following note from Connecticut: "The notorious dog swindler, Fowler, alias Pollard, Hammond, Chester, etc., is now in jail at this place awaiting trial, and to give parties swindled by him a chance to come forward and testify against him. He has been carrying on his nefarious business here for several months, and I have been watching him for some time. I think he has been advertising in the *American Field*, under the name of C. E. Pollard. His right name is Frank Fowler, and he is a native of Moodus, Conn. If any of the victims whom he has swindled will come forward and testify against the arrant rascal, they will greatly oblige your humble servant. GEO. H. PARKINSON."

SALE OF GREYHOUNDS IN AUSTRALIA.—Mr. W. B. Ronnswell, a prominent sportsman of Australia, recently sold at auction his famous kennel of greyhounds, realizing prices far above the average. The attendance of coursing men from the various colonies was large and the bidding spirited. The saplings (i. e., the pups) were sold at very high figures, a litter of five selling at 322 guineas, and the first choice in one lot 91 guineas. Several were sold at 50 guineas, and the average price was 27 guineas each for the entire kennel of 58 greyhounds. This is believed to be the highest average realized at any sale of greyhounds in either England or Australia, and evinces the growing love for the noble sport of coursing which extends to most of the British possessions.

HE TOOK THE BISCUIT.—An Englishman who is described as having a pug nose and dogmatic manner lately arrived in the Lone Star State and displayed a most remarkable familiarity with dogs and their points, in conversing with one of the natives. Finally he inquired, in a patronizing tone: "D'ye know who took the first prize at the London Bench show?" "Can't say that I do," responded the Texan. "Well, hit was myself, you know, that took the first prize at the dog show." The American cordially replied: "I don't doubt it; I might have guessed as much, to look at you." After deep reflection the immigrant has decided to lay the matter before the British Consul, for the purpose of learning whether the Texan's remarks were complimentary "or hotherwise."

COURSING AT BENICIA.—Last Sunday the light rain of the day before had put the ground in splendid order for coursing and quite a large number of gentlemen took advantage of the weather to give their dogs a little training, out on the Government reservation at Benicia, which is well stocked with hares. About 20 greyhounds were taken up on the early train, and the party enjoyed seventeen excellent runs, which resulted in as many "kills." Judge Mee was in ecstasies over the way in which his two saplings worked their game and Cantz's Pride of the Village also came in for a share of the general admiration.

Mr. Keating, Superintendent of the City and County Alms House, is an ardent lover of a good greyhound and a first-class hand for training one for a match. He has a couple of old dogs at his place coming into condition, to run with the California Club this fall. It will take a hard combination of ill luck to beat one, or both of them, out of a prize. Mr. Keating is one of the best losers in the State and never allows a frown to ruffle his features when he sees a race going against him. In this respect he will serve as a good model to several gentlemen who shall be nameless.

W. Duggan received a shipment of hares last week to help stock his coursing ground at Newark. They were turned loose in a large field which is closely fenced. A few died, but the remainder took kindly to their new home and in a short time will be in good order to furnish sport for the San Francisco greyhounds. Mr. Davis, President of the South Pacific Coast Railroad Company, is doing all in his power to make Duggan's enterprise a success and if money and intelligence can make the place go it will soon be no mean rival to Plampton & Gosport.

*DEATH OF A FAMOUS DOG.—Mr. David Snowcraft's well-known dog Let-me-Go, imported from England for running purposes, and winner of several important races, died recently in Philadelphia.

Eole's time, 5:26½, in the three-mile race for the Autumn Cup at Sheephead Bay, is the best on record with the weight (120lb) up, and, all things considered, was the most creditable performance ever accomplished at the distance, although Lida Stanhope (who ran second to him) has the fastest record, (5:25), made with 102 pounds up at Saratoga two weeks previously.

Racing at Chicago.

The fall meeting of the Chicago Driving Park Association commenced on October 4, and among the numerous entries in the different races were our California horses that will probably be shipped homeward immediately after these engagements. We append the meager telegraphic dispatches giving an account of the races:

On the opening day the weather was cool and the track fast. The attendance was light. In the seventh-eighth-mile, Avalon won, Lord Lyon second, Dave Yandell third. Time, 1:29½. In the three-fourth-mile, Murmur won, Idle Pat second, Jack Galt third. Time 1:17½. In the one-and-a-half-mile, John Sullivan won, Ruth second, Ranger third. Time 2:42. In the mile heats, Harry Gilmore won; Dregan Bell second, J. W. Norton third. Time—1:43½, 1:45, 1:46½.

The weather on the second day was rainy and the track slow. The one-and-one-eighth-mile race, all ages, Boze Sedam won, Harry F. second, Topsy third. Time, 1:57. In the race for the Northwestern stakes, one mile and three quarters, all ages, two started, John Davis won, Bonnie Bird second. The five-eighths of a mile heats, all ages, Eva won, Alfaretta second, Bell Boy third. Time—1:03, 1:05½. The steeple chase, short course, Guy won, King Dutchman second, Eva A. third. Time, 4:12.

Last Thursday was known in Chicago as the Derby Day. The weather was warm, the track fast, and the attendance large. In the one-mile for two-year-olds, Azlee won; Lord Raglan second, Idle Pat third. Time, 1:45½. In the selling purse, one and a quarter miles, all ages, George Hakes won; Manion second, Flanders third. Time, 2:11. In the mile heats for three-years-olds, John Sullivan won; Ruth second, Effie H third. Time, 1:42½, 1:45½. In the handicap purse Dave Yandell won; Ella Rowett second. Time, 3:07.

The El Dorado Association.

The El Dorado District Agricultural Association propose to hold their annual fair in 1883 at Grass Valley, and in 1884 at Nevada City. Nevada county is in the El Dorado District according to the statutes of this State. In a short while the Directors of this Association will visit Nevada county in order to see what arrangements can be made for holding the fair two years in this county. It is quite probable that Glenbrook Park can be had for race course purposes, and for the show for stock. That the park belongs to a public spirited gentleman is why we say it can be had for the purpose mentioned. The year of the fair at Grass Valley all the pavilion business, such as a display of productions of this district, machinery for agriculture and mining, cabinets of mineral specimens, etc., etc., would be at Grass Valley. The year for Nevada City all those things would be displayed at that place. There is no doubt but that successes can be made of these two proposed fairs, and we think all our people will give the business every possible help. Nevada county is rich in resources of almost every kind and it is to be hoped that she will not be wanting in energy to show such resources to all the world, now that an opportunity do so is promised. Such a fair will be no useless and expensive military encampment arrangement, but will bring out to public view the things of use that Nevada county so amply possesses.—*Grass Valley Tidings*.

Racing at Jerome Park.

The fall meeting of the American Jockey Club, commenced last Tuesday and held on intervening days, will last until the end of next week. About this time New York society is on the return from Europe and from the American watering places and as the city is filled with strangers Jerome Park presents a very brilliant appearance, on the race days especially, when the handsome and picturesque grounds are lighted up with the full rays of the autumn sun. The track is unique in its way, the club house being built on the prominent knoll that projects right in to the track, thus making it somewhat of the shape of the letter B, with the lower loop very much smaller than the upper one. At the end of about a third of a mile the horses come sweeping around the bluff and pass within a few feet of the home stretch and the turn in and out again is so rapid that it is feared that some accident will occur there some day when there is a large field of horses engaged, and to this fact must be ascribed the difference of time shown by horses on this track compared with their own record on race courses laid out on the most approved plans.

The American Jockey Club is recognized as standing at the head of all similar organizations in the United States, and with lavish distribution of its rich revenues and receipts it has not only greatly encouraged the breeding of thoroughbreds, but has also stimulated the growth of racing, which has been so immeasurably increased throughout the country within the last few years.

We have as yet but the telegraphic account of the opening day, which is as follows: "The first race, 1¼ miles, Free Gold won; Della second, Hilarity third. Time, 2:16½. In the second race, 1¼ miles, Miss Lumley won; Amazon second, Elkhorn Lass third. Time, 3:20. In the third race, ¾ mile, Breeze won; Cyril second, Bella third. Time, 1:20. In the 1¼ miles, Parnell won; Springfield second, General Monroe third. Time 2:01½. In the 1 mile Rochester and Vagrant started, and the former won easily. Time 1:55. Day Dawn and Gimlet started in the hurdle race, 1 mile, and Gimlet won. In the steeplechase, full course, Ike Bonham won; Harry Gow second, Benardine third. Time, 4:30."

On Thursday, October 5th, in the two and quarter mile the starters were Girofle, W. Donohue and Fair Count. Fair Count led for the first two miles by two lengths; Girofle then gradually took the lead in the stretch and won in a gallop by five lengths. Time, 4:11. In the mile and an eighth Kenesaw won; Duke of Montalban second, Valparaiso third. Time, 2:01½. In the steeplechase, short course, Post Guard won; Harry Gow second, Revenge third. Time, 3:33½. Benardine fell at the first jump and died soon after. Nolan, the jockey, was slightly injured. Private betting was very extensive between bookmakers and customers well enough known to warrant credit business.

OAKLAND TROTTING PARK.

EMBRYO STAKE.

For foals of 1879, 1880 and 1881: Yearling race, dash of a mile. Two-year-old, heats of a mile. Three-year-old, best three in five.

Saturday, November 5th, 1882.

JOS. CAIRN SIMPSON, Chairman,
A. P. WHITNEY, Treasurer.

B. E. HARRIS, Secretary.

ROWING.

Aquatic Bluffers.

The bluffer is a type of athlete that just now appears to flourish along the water front. We cannot take up any daily newspaper that gives a column to sporting events without being surprised by a string of challenges to row for fabulous amounts. The uninitiated reader after a perusal of these cartels is generally impressed with the idea that the rowing clubs are full of embryo and full-fledged Haulans, who are ready to meet anything capable of pulling an oar, and are constantly giving exhibitions of their powers. The lamentable truth is that these vaunting athletes seldom face anything resolutely except the reporter to whom they convey their challenges and would as easily be led into the small-pox hospital during an epidemic as into a genuine match race. When congregated on the wharf and watching the practice of some oarsmen they are the bravest men born that ever pulled off a rowing shirt, but when the exigencies of a match call for the appearance of their hard coin they are generally as hard to find as a summer duck and less easy to approach. No amount of cajolery or intimidation can drag them to the center when they knew that getting there means they must "put up or shut up." For these unpleasant peculiarities the newspapers which print the aquatic bluffers' cards are largely to blame. It ought to be the rule with all sporting editors to ignore a challenge unless accompanied by a deposit to bind the match. Such a precaution would soon weed out the athlete frauds who have no more honesty or manly aspiration than to toot their horns and disappear as soon as the noise attracts any one who might be capable and anxious to take the conceit out of them. During the past month half a dozen challenges to important races have been published in San Francisco papers. Some of the authors of these challenges are very inferior oarsmen, but these cards read like the defiant proposition of a champion of the world who had honestly earned his title. Except in one case, that of Jack Hallinan, not a cent accompanied any of these challenges. Before Hallinan issued his card, John Griffin had claimed much space and attention for the alleged merits of certain men whom he desired to match. Mr. Griffin's challenges were sweeping but unfortunately they were not accompanied by coin. Mr. Hallinan listened patiently and respectfully to Mr. Griffin and then made the latter gentleman an offer which was bolder than Mr. Griffin had declared that he would accept. Mr. Griffin offered to match a second-class crew against a first-class crew of the Pioneer club, and a second-class sculler against the best man in the Pioneer house, Leaby excepted. Mr. Hallinan offered to match a Pioneer crew against Mr. Griffin's best crew and a Pioneer sculler against Mr. Griffin's very best man. Mr. Hallinan accompanied this challenge with a deposit of \$250 that remained for nearly two weeks in the office of the BREEDER AND SPORTSMAN but nothing came of it. It was never covered.

Contemporaneously with this fiasco James Brannan advertised that he would match his brother, Pat Brannan, against Dennis Griffin for \$500 or \$1,000 a side and announced that a deposit of \$250 was awaiting Mr. Griffin's pleasure. This was not true. Not a cent was deposited and at this late date the match still hangs fire. Still Mr. Griffin and Mr. Brannan keep rowing industriously through the columns of the newspapers. Mr. Brannan insists that he is willing to make the match and Mr. Griffin advertises that he cannot persuade Mr. Brannan to visit his shop and sign articles. There is nothing more palpable than the fact that when two men are not afraid to make a match and desire to make it, they can readily find time and means to come together and put up the money. Equally palpable is the fact that where in the language of the poet "one's afraid and the other darsent," no amount of time will enable them to find one another. Last Sunday Mr. Brannan was in the Pioneer boat house and Mr. Griffin in the Golden Gate house, fifty yards further down the wharf. Mr. Griffin in reply to his apparently earnest inquiries was assured of the whereabouts of Mr. Brannan and Mr. Brannan was kept equally well posted on the whereabouts of Mr. Griffin. There was no toll-gate between the boat houses and no galling gun or even bulldogs to keep the ambitious oarsmen apart but strange to state they did not meet. For several long hours they remained mutually conscious of the opportunity to get together and settle their little dispute but they did not settle it. No sooner had Mr. Brannan betaken himself out of sight on the blue waters of the bay than young Mr. Griffin eagerly sought the Pioneer boat house in quest of the absent oarsman and bespoke the anxiety of his sire to make the long-talked-of match. Meantime, however, the sire kept well out in the stream in a whitehall boat manned by two lusty oarsmen who were capable of placing a wide stretch of water between them and the shore at short notice. After satisfying himself that Mr. Brannan was not to be found Mr. Griffin rowed off victoriously and next morning the astonished world learned with mingled sorrow and indignation that the match still hung fire. Mr. Brannan, however, had assured the *Call* reporter that he was as eager as ever for the race and Mr. Griffin had pledged his word that the desire to arrange the match was the dearest wish of his intrepid soul. There is an excellent rule in some rowing clubs that a member who offers to row a race as a member of the club without obtaining the sanction of his club is liable to expulsion. There is also a rule that a man who issues a challenge and backs out of it forfeits his membership. It would be well for the credit of rowing in San Francisco if the clubs would draft these rules and these by-laws and thus put an embargo on the popular pastime of rowing races in printer's ink.

The International Boat Race.

The weather on the 15th was everything that could be desired for an aquatic contest. Those heavy, leaden clouds which have of late overhung the metropolis had dispersed, and the sun shone out brilliantly, the atmosphere being warm and summer-like. Four steamers had been engaged to accompany the race—one on behalf of each of the crews, one to carry the umpire and one for the members of the press. All were fairly patronized. The Thames R. C. boat sported the Union Jack at the stern, while the steamer of the Hillsdales proudly "flew" the Stars and Stripes. There was a large attendance of spectators at Putney, especially in the vicinity of the boat houses, and extending away in the direction of the mile-mark. Again at Hammersmith a huge multitude had assembled. At about a quarter to three o'clock the steamers moved away to take up position. The stakeboats were anchored about midway between the old "Bells" hostelry and the Star and Garter—a spot perhaps about eighty yards above the aqueduct. At precisely six minutes to three o'clock the Thames R. C. crew got afloat from their boat-house, and paddled off amidst hearty cheers. They were attired in white jerseys, each man wearing on his arm a ribbon of the "club color"—stripes of red, white and black. They proceeded slowly down against the tide, which,

by the way, was running up smartly, and waited for their opponents. The latter crew was somewhat dilatory in manning their craft, and it was fully three o'clock ere they were discernable. They too were heartily applauded. Each wore a dark blue jersey, and all affected dark-blue silk caps save the bow oar, who had a head covering of light blue. It shortly became apparent that some difficulty respecting the umpiring of the race had occurred. F. S. Gulston, London R. C., who had originally been selected, had telegraphed from Plymouth that he was unavoidably prevented being present, and this left the competitors in a temporary "fix." Ultimately, however, J. G. Chambers was asked to act, and he at once consented. The Thames crew, having won the toss, selected the outside, or Surrey berth, which was as nearly as possible in mid-river. There was no wind worth mentioning, and this position placed him upon the very top of the tide. It should be observed that some speculation took place on the race, although it was of a curious character; 2 to 1 on the Thames crew had been laid in London during the morning, but at Putney 6 to 4 was accepted, and ultimately 5 to 4 on the Thames found no acceptors on the boats, though we understand 7 to 4 on shore was freely laid.

The Hillsdales experienced some difficulty in ranging up to their stakeboat, and once fouled the chain which moored the craft in getting to its place. Just, however, as they got into position, a steam-tug, the Rover, with a huge barge in tow, came through the aqueduct, creating a tremendous wash and hindering the start for some time. At length, at 3:54:46 exactly, Mr. Chambers gave the word "Go!" and immediately the race commenced. The Hillsdales, setting down to work on the instant, securing the best of the start, and striking at the tremendous rate of 49 per minute to their rivals' 42, quickly forged ahead. It must be confessed that there was something eminently more business-like about the Thames R. C. style of progressing than that of their antagonists, though they did not seem to get so much speed upon their boat. The Londoners utilized their slides well, and, though their time at the commencement was somewhat indifferent, they soon settled down to work in earnest. The Hillsdales, on the contrary, seemed all abroad for a few seconds. Their stroke was short and snatchy, and they did not seem to slide more than six inches, and to finish that short distance long ere they had completed their pull. Still they got their boat along at a rare rate, and at the Creek (time, 1:10) were well to the fore. Ere this, however, they had commenced shooting over towards the Surrey shore, and people began, even while the boats were wide apart, to fear that a foul would occur. These anticipations were shortly unhappily verified. More and more the Hillsdales, who had slightly over a length's lead, bored the Thames to the southern bank, the Londoners generously giving way and apparently striving only to avoid the tremendous backwash they were receiving. At any moment they might, by straightening their boat, have occasioned a foul, which must indubitably have been given in their favor; but they seemed anxious to avert this catastrophe, and time after time veered off. A crisis, however, was at hand. Right ahead lay a timber-laden barge, which could not be missed, and the Thames men were compelled to head up river to avoid a collision. The moment they did so, pulling hard to straighten their boat, they ran right into the Hillsdales, and the two craft remained locked together for some seconds. Men in both boats held up their hands as claiming the foul, and then the Americans went away with a good lead through the Thames, having to drop round their stern and pass to leeward. The time to Craven Steps was 2:35. At the mile point the Hillsdales were well clear, their record being 4:23.

Both crews now began to steer very wildly, and further fouls might have occurred at any moment. The Hillsdales crossed the bows of the Thames, and the latter, after rowing for a short distance immediately astern of their opponents, went out Middlesex wards, and avoided the wash. Then the Hillsdales veered back; once more treated the Thames to a heavy "sea," and suddenly made as though about to land at the Crab Tree. In short they could not keep their boat straight, and their antagonists were in but slightly better trim. The time to the old-fashioned inn above named was 5:22, and to the Soap Works 6:32. From this point the rivals took a zigzag course, the Hillsdales being the more unfortunate of the pair, and there was exhibited a really deplorable bit of steering. At length, however, the Americans got straight, and, dashing their oars with tremendous energy, they went smartly away, and at Hammersmith Bridge (time, 7:53) were leading by eight seconds, or nearly three lengths and a half. Amidst roars of applause the Transatlantic visitors, keeping up their hard work, increased their advantage, until off the Oil Mills the Thames spurted valiantly and drew up slightly. Both now once more steered all over the river, the Thames being especially wild. Just off the famous wood-pile—the spot where Tom Blackman came to grief when rowing Laycock—one of the Hillsdales as nearly as possible caught a crab and set the boat rocking violently. The men, however, steadied themselves, and progressed to Thorneycroft's, where, being about three lengths to the good, with the Thames coming up hand over hand, the Americans, to the intense surprise of all onlookers, stopped dead. For a few seconds they seemed in the utmost confusion, and then Mr. Terwilliger, the captain, rose and removed his sliding-seat, holding it up in the air, and then pitched it towards the shore. It was rendered perfectly evident that his slide had come to grief, and everyone expected that the Hillsdales would pause, never to resume. They, however, went to work again, the Thames being now four or five lengths ahead, and strove manfully; but all was in vain. Their boat rocked terribly, and they went literally all over the river. No further description is necessary. The Londoners slowed down and reached Barnes Bridge in 17:14 or 17:15 ahead of their rivals, finishing in 20:40 to their rivals' 20:53. We believe no official appeal was made to the umpire, who, however, had no hesitation in awarding the race to the Thames crew.

Every true lover of rowing will agree that the race was characterized by most deplorable incidents. We should have been delighted had the contest been conducted throughout minus accidents, and we have no doubt whatever that all the members of the competing crews would have been similarly pleased. That unhappy foul, however, ere half a mile had been traversed, deprived the struggle of all interest. It was felt at once that the issue must be decided on that collision, and it was equally apparent that the Americans were to blame. They were guilty of an error of judgment—or, perhaps, in other words, they stood convicted of an inability to steer properly. No impartial person would accuse them of willful misconduct. They never sought a collision, we are convinced. They had no reason to do so, for at the moment the catastrophe occurred they were going at a better pace than their opponents, and, bad they only been able to keep straight, would probably soon have assumed a commanding lead. We do not like the Hillsdale mode of execution. It is short and jerky. The men rely chiefly upon arm-work, and experience has shown this to be inefficient. Still it is a matter for marvel that the amateur champions of America should be

able to get such a pace on their boat. They are as phenomenal in this respect as was Rix of Richmond, who, to the amazement of all beholders, won the Chinnery junior prize last year. We really believe that, barring accidents, the Americans would have won yesterday. Had they maintained a good course they would, ere the Soap Works had been reached, have obtained such a commanding lead that they could have afforded to slow down and take a rest. As it was, a series of regrettable fiascos occurred, and it is really to be deplored that the umpire had no real ground for ordering the men to row again. His decision was perfectly just and fair, but had it happened that another race could be requested we should probably have seen a result which would have been more satisfactory, whether the English crew had won or lost.—*The London Sportsman*.

THE PACIFIC COAST CHAMPIONSHIP.—As Thanksgiving Day approaches the interest in the proposed contest for a cup offered by the BREEDER AND SPORTSMAN increases among the oarsmen. The Golden Gate club has finally determined to compete for the trophy, so that a race between at least three first-class crews is announced. The Pioneers a few weeks ago seemed to have a very good chance of winning the championship but changes in their crew have spoiled their prospects and unless they can reorganize their champion four within the next few weeks the cup will hardly be added to the club's collection of trophies. Louis White who seems a better man at the sweeps than with the sculls has been compelled by business to withdraw from the crew, another valued member of the crew has left the State, and unfortunately the club can furnish no substitutes who are up to the championship form. The Ariel club on the contrary has plenty of material for a first-class crew and with its new paper shell will stand an excellent chance of winning. The Golden Gate Club has a good boat and a very strong crew. So far the Golden Gate crew has been seldom seen on the water but in a few weeks will commence regular practice. The Pioneer crew took a spin last Sunday evening with Pat Brannan at stroke, Lyne and Crowley in the waist and John Sullivan at the bow. They seemed to row very evenly but their pace was vile. Mr. Long or Alf. Tobin will have to be substituted for Sullivan in the bow and the remainder of the boat reorganized before they can get down to anything like a good even pace.

KENNEDY'S HARNESS.—The Boston *Herald* of the 22d ult. says: "Hanlan was the lion of the hour at Point of Pines last Tuesday, and received the warmest praise. One incident occurred during the afternoon which is worthy of the space given it. An impression has long prevailed among some of the old people at the North end that Davis of Portland either has an 'infernal machine' with which to propel his boat, or is favored by some other infernal means. Two old fellows who had taken a holiday to see the regatta at Chelsea Beach were smoking their pipes and discussing the abilities of oarsmen past and present, when one of the two, who seemed to be better informed than the other, as he was doing much of the talking, pointed Hanlan out to his friend. They both admired the Toronto sculler's graceful build, and, soon afterward, Kennedy passed them, and was pointed out as the man who had challenged Hanlan. 'What!' exclaimed the now thoroughly aroused friend of the man who 'knew all about it,' 'is that the little leprechaun that's to row Hanlan?' 'Sh! Owen,' was the response, 'sh! I tell you. He be with Davis; an' Davis have harness for him.'

COURTNEY'S COMPETITORS.—Lee and Hosmer were not dismayed by Courtney's wonderful record at Richfield springs. The two oarsmen have deposited bail with the *Boston Herald* for three mile races with the Saratoga sculler. Hosmer in his challenge says that when Courtney thinks he can outrow any oarsman in America except Hanlan he shows that his estimate of the scullers of the day is incorrect. Both Lee and Hosmer are ready to make a match for \$500 or \$1,000 a side and row in any neutral water.

REFORMED POLICEMAN.—Dan Leahy the ex-champion oarsman of California has left the police force and returned to his honest trade. The monotony of pacing up and down Geary street grew intolerable to the active sculler and he formed the sensible resolution to hand in his resignation. That document is now before the Police Commissioners so that there is a prospect of a good man returning to the sport in which he was so successfully popular.

JERSEYS VS. GUERNSEYS.—In the *Rural New Yorker*, Richard Goodman, Jr. replies with some warmth to a statement giving a preference to the Guernseys over Jerseys. He says: "The leading breeders of Guernseys, while claiming more beef, and a deeper color for the milk and its products, have never claimed a higher flavor, an equal quantity, nor an approach to the quality of the Jersey butter. As I understand it, the popularity of the Jerseys rests primarily on the firmness of the butter in dog days and its excellent grain the year round; and secondly, upon their great annual butter yield. The color of the butter is the only point we Jersey men yield to the breeders of Guernseys, and as compared with the flavor, texture and annual product, this matter of color is of least importance, especially as it is easily imitated by the harmless and agreeable annatto. As to the flavor of the butter of the Jerseys, I have never heard any experienced person suggest that that of any other breed equaled it. In texture it is not approached by the butter of any other breed. And the butter of the Guernseys is notoriously oily. As to the annual and weekly product, Jerseymen have not only taken the lead, but feel well satisfied that they will each year increase their distance. In fact the very claim of carcass for the Guernseys would seem to be the strongest argument against their value as butter producers. Fat on carcass and fat in the udder will not go together."

HINTS ON ROASTING WILD DUCK.—If the "wild flavor" of game, such as geese, ducks, etc., is disliked, they may be soaked over night in cold water, or pare a fresh lemon without breaking the thin, white inside skin, put inside the game for a day or two, renewing the lemon every twelve hours. This will absorb unpleasant flavors from almost all meat and game. Some lay slices of onion over the game while cooking and remove before serving. Young ducks should roast from 25 to 30 minutes; full-grown for an hour or more with frequent basting. Some prefer them underdone, served very hot; but thorough cooking will prove more generally palatable.

I have to acknowledge the receipt from San Francisco of the fourth and fifth numbers of the BREEDER AND SPORTSMAN and they more than keep up the promise of the opening copy. They also contain very finished portraits of the trotting sires, Echo and Electioneer.—*The Federal Australian*.

ON THE RIGHT TRACK.—A hint is sometimes as good as a sermon, as not a few people of our city have found by heeding the suggestions of friends who were thoughtful enough to put them on the right track. Among such are Mr. Ernest Shanerkel, the Halsted Street boot and shoe dealer, who says:

"St. Jacobs Oil cured me of a bad case of rheumatism. I had suffered with that disease some ten or twelve months, and I could find nothing to give relief until I tried the Oil, that remarkable rheumatism-slayer gave me almost instant ease. The leading sinew of my right knee was so contracted that I had to walk with my leg stiffened out, and I used to find it a hard matter to get around. Before the second bottle was entirely used the stiffness had disappeared, the swelling was reduced, and the action of my leg was entirely free. Five bottles of St. Jacobs Oil cured me entirely, in less than five weeks' time. I really believe that St. Jacobs Oil will do all that is claimed for it, and more, too."

In the hall of the Board of Trade our representative was introduced to Mr. John K. Estes by a mutual friend. Mr. Estes is a well known fireman, and resides on Blue Island Avenue. He thus relates his experience:

"I caught the rheumatism last winter from exposure to the cold and rain; it settled into me without the least note of warning, and put me in my bed in a short time. Before I heard of St. Jacobs Oil I tried several things, but they proved to be useless. Seeing a newspaper account of a remarkable cure wrought by the Oil, I sent for a bottle of it; it did me good immediately, giving me the first night's sleep I enjoyed for some time. My condition improved right along; and in a short time I was as well as ever I was in my life. I can never sufficiently thank the discoverers of St. Jacobs Oil for curing me."

We think that, in the face of this testimony, our readers will agree with us that there is no necessity to suffer from rheumatism or kindred diseases. Had our board of health but as sure a cure for the small-pox as St. Jacobs Oil is for the rheumatism, our readers need not fear that disease.—Chicago Times.

The first number of the BREEDER AND SPORTSMAN, edited by Joseph Cairn Simpson, has been received. It presents a fine appearance and its general make-up is a credit to journalism. The cut on the first page, of the noted New York horse Duchess, is a fine illustration. Mr. Simpson is aided in his editorial labors by a corps of well known journalists, among whom is Percy Wilson, who has been long identified with papers of the stamp of the BREEDER AND SPORTSMAN. T. T. Williams has charge of all that pertains to kennel; Charles G. Yale is yachting editor; Dwight Germain, of athletics; George A. Strong, bicycling. The publication is devoted to other minor branches. The turf has the first place, and is to receive much attention. It is a worthy paper, devoted to a good cause, and we desire it all success possible. Send for sample copies and be convinced. Address THE BREEDER AND SPORTSMAN, 508 Montgomery St., San Francisco.—Calaveras Prospect.

A company has been formed to publish in San Francisco a first-class journal devoted to sport and breeding, and Mr. Joseph Cairn Simpson has been selected to edit it. The issue will be weekly, and the paper will be called the BREEDER AND SPORTSMAN. Particular attention will be paid to the breeding, raising and education of horses. Mr. Simpson, as a writer, a student and a hauler of horses, has been before the public for more than a quarter of a century, and he is well qualified to take control of the journal. His "Horse Portraiture," first published in the Turf, Field and Farm, is a standard work, and the only regret is that the author has not seen fit to prepare a second volume for the press. The BREEDER AND SPORTSMAN will be a sixteen-page paper, and the first number will be published July 1st. The subscription price is five dollars per annum, and Mr. Simpson's address is 508 Montgomery street, San Francisco.—Turf, Field and Farm.

THE BREEDER AND SPORTSMAN is the name of a new weekly paper, conducted by Jos. Cairn Simpson, and published at San Francisco, California, at five dollars per annum. The first copy is at hand. For beauty of typography, extent and variety of matter, and general make-up, it is unexcelled by its contemporaries. Mr. Simpson is author of a popular book, called "Horse Portraiture," and for more than a quarter of a century has been a popular writer on horse and sporting matters. He is admirably qualified to conduct such an enterprise, and the breeders of the Pacific Coast are to be congratulated upon having so able and gifted a champion of their interests.—St. Louis Rural World.

Market Report.

FLOUR—Fair inquiry. We quote: Best City Extra, \$5 37½; Superfine, \$4 50; Interior Extra, \$4 75; Interior Superfine, \$3 75; \$4 ½ bbl.

WHEAT—There is but little activity in the wheat market owing to the late rains and recent heavy arrivals of tonnage which has a restraining influence on operators. Shippers offer \$1 32½; holders do not care to sell at \$1 65. Millers are paying \$1 65 as their top rates, but few transactions are made even at these figures. The Liverpool market has made no improvements lately that would effect the local market.

BARLEY—Feed is in good demand and sales are quite brisk. Over 2,400 tons changed hands in one day as follows: 400 tons No. 1 Feed, November, \$1 31½; 800 do, \$1 31½; 200 do December, \$1 32½; 100 do seller 1882, \$1 29½; 200 do No. 2 October, \$1 26; 650 do, \$1 26½; 100 do seller 1882, \$1 25 ½ cts. Brewing malts will scarcely any inquiry on call. Spot lots of good are held at \$1 35; \$1 37½ cts.

OATS—Aren in good demand, quotable, according to quality, at \$1 50; 65 per cts.

RYE—No. 1 is held \$2 25; No. 2, \$1 75; \$1 90 per cts. FEED—Quotable at \$18½; per ton, Ground Barley \$29; \$31 ½ ton; Cracked Corn \$38 ½ ton. Shorts sellers are asking \$20 50; \$21 ½ ton; Oilcake meal the oil works sell to the trade at \$32 50 ½ ton, less the usual discount. Middlings, \$28; \$29 ½ ton for lots at the mill.

HAY—The rain has done considerable damage to unsheltered stock on the wharf. It is calculated that at least \$500 tons have suffered injury to the extent of from \$1 to \$4 ½ ton. Market tolerably steady. We quote: Alfalfa, \$13 50; \$14; Wheat \$15; \$16 Wild Oat, \$15; \$16 ½ bales.

STRAW—Quotable at 50; 60c per bale. BEANS—All kinds are firmly held. We quote Bayos \$2 62½; \$2 75; Butter, \$3 43 25 for small and \$3 40; \$3 50 for large; Lima, \$3 50; \$3 75;

Pea, \$2 65; \$2 85; Pink, \$2 20; \$2 25; Red, \$2 20; \$2 25; small White, \$2 85; large White, \$2 30; \$2 40 ½ cts.

POTATOES—Prices keep fairly uniform. Wharf rates are as follows: Early Rose, 50c; \$80c; Garnet Chile, 90c; \$1; Early Goodrich 75c; \$1; Peerless, 60c; \$1; Sweet, \$1 75; \$1 85; ½ cts.

ONIONS—Market rather dull. Quotable at 50; 60c per cts.

PROVISIONS—Market firm. We quote: Eastern Hams, 18½; 19c; California Hams, 16½; 16½c for plain, 16½; 17c for sugar-cured canvased; Eastern Breakfast Bacon, 17½; 18c; California Smoked Bacon, 16½; 16½c for heavy and medium, and 17½; 18c for light and extra light; Clear Sides, 16½; 16½c; Pork, \$21 50; \$22 for extra Prime, \$24; \$25 for Prime Mess, \$25; \$25 50 for Mess, \$27 for Clear and \$28; \$28 50 for extra Clear; Pigs' Feet, 16½; \$18 ½ bbl; Mess Beef, \$14 for 40 lbs and \$7 for 10 lbs; Extra Mess Beef, \$14 50; \$15; Family Beef, 16½; \$16 50; 50; 50; California Smoked Beef, 14½; 14½c ½ lb.

BUTTER—Trade is active, but fancy brands alone show any firmness. We quote: Fancy, 47½; choice, 42½; 45c; fair to good, 30; 40c; inferior lots from country stores, 23; 28c; firkin, 29; 30c for good to choice, and 25; 27½c for ordinary; pickled roll, 30; 32½c; Eastern, 20; 25c ½ lb.

EGGS—The market continues to improve. Sales are reported an advance on last weeks' figures. We quote as follows: California choice, 42; 45c; Interior, 39; 40c; Utah, 25; 35c ½ doz.

CHEESE—Is selling freely. We quote: California, 12½; 13c for choice; Western, 30c ½ doz. 10; 12 for fair to good; do, factory, in boxes, \$15; 16; Eastern, \$16; 17c; Western, 11; 15c per lb.

HONEY—Comb 14; 17c, extracted 7; 10c ½ lb.

FRUIT—Only goods of choice quality bring full figures. Strawberries sold better to-day. We quote: Apples, 30; 50c for common and 75; \$1 ½ box for good; Pears, 40; \$1 ½ box; Strawberries, \$8; \$10 ½ box; Peaches, 60; \$1 25 ½ box; Figs, 40; 75c ½ box; Grapes, 35; 50c for common, 40; 60c for Black Hamburg, 50; 75c for Rose of Peru, 50; 75c ½ box for Muscat and 50; 75c ½ box for Tokay; Plums, 50; 75c ½ box; Quinces, 75; \$1 box; Watermelons, \$4; \$9 ½ hundred; Cantaloupes, 50; 90c ½ crate; Lemons, \$7; \$8 ½ box for Sicily and \$3 ½ box for California; Limes, \$5; \$7 ½ box for Mexican; Bananas, \$2; 35 50 ½ bunch; Tahiti Oranges, \$3; \$4 ½ thousand.

VEGETABLES—No change. Marrowfat Squash, \$6; \$8 ½ ton; Carrots, 30; 50c; Turnips, 75; \$1; Cauliflower, 60; 65c ½ dozen; Cabbage, 50; 75c ½ cts; Garlic, 1; 1½c ½ lb; Cucumbers, 30; 50c ½ box; Green Peas, 2½; 3c ½ lb; Green Peppers, 50; 75c ½ box; Tomatoes, 15; 30c ½ box; Celery, 50c ½ doz; Summer Squash, 50; 75c ½ box; String Beans, 2½; 4c ½ lb; Lima Beans, 4½; 5c per lb; Green Corn, 7; 15c ½ doz; Okra, 75; \$1; Egg Plant, 50; 75c ½ box; Dried Okra, 20c per lb.

POULTRY—Steady. We quote: Live Turkeys, gobblers, 16; 18c; do Hens, 14; 16c; Roosters, \$5 50; \$6 50 for old and \$6; \$7 50 for young; Hens \$6; \$7 50; Broilers, \$3 50; \$5 according to size; Ducks, \$4 50; \$6 50 ½ doz; Geese, \$1; \$1 25 ½ pair; Goslings, \$1 50; \$2 ½ pair.

GAME—Good prices are being paid as yet, but it is expected that they will fall very soon. We quote: Quail, \$1 25; \$1 50 ½ doz; Mallard Ducks, \$4 50; \$5 50; Sprig, \$3; \$3 50; Teal, \$2; \$2 25; Widgeon, \$2; \$2 25; Hare \$1 75; \$2; Rabbits, \$1; \$1 50; Venison, 6; 9c ½ lb.

WOOL—Sales at present are limited to local wants. We quote spring: Humboldt and Mendocino, 25; 26½c ½ lb; Sonoma, 23; 25c; San Joaquin free 17; 18c; San Joaquin defective, 14; 17c; Southern Coast, 23; 24c; Eastern Oregon fair, 20; 22c; Eastern Oregon poor, 18; 19c; Valley Oregon, fine, 25; 27c; Valley Oregon, coarse, 23; 24c. We quote fall: San Joaquin and coast, 10; 12c; San Joaquin and coast Lamb, good, 12; 14c; Northern fall, free, 15; 17c; Northern fall, defective, 11; 14c; Northern fall, Lamb, 15; 17c; Free Mountain, 11; 15c.

HIDES AND SKINS—Prices favor buyers. Dealers are paying the following rates for lots to order: Dry hides, usual selection, 20c ½ lb; calls one-third less, and Mexican Hides 1c ½ lb less. Dry Kip, 18c; Dry Calf, 21; 22c; Salted Steers, over 55lbs, 11c ½ lb; Steers and Cows, medium, 10c; light do, 9c; Salted Kip, 15 to 30 lbs, 11c; Salted Calf, 14; 15c ½ lb; Dairy Calf, 70; 75c each; Sheep Skins, 25; 30c for Shearlings; 25; 50c for short, 60; \$1 for medium, and \$1; \$1 50; 50c for long wool and wool skins. Butchertown Green Skins bring higher prices.

TALLOW—Quotable at 8½; 9c ½ lb for rendered and 11½; 12c for refined, both in shipping order.

MEATS—Following are rates for whole carcasses from slaughterers to dealers:

BEEF—Prime, 7½; 8c; medium grade, 6½; 7c; inferior, 5½; 6c ½ lb.

VEAL—Large Calves, 7½; 8½c; small ones, 8; 9½c ½ lb.

MUTTON—Wethers are quotable at 4½; 5c and Ewes at 4; 4½c ½ lb, according to quality.

LAMB—Quotable at 6; 6½c ½ lb.

PORK—Live Hogs, 7; 7½c for hard and 6½; 6¾c for soft; dressed do, 10½; 11c ½ lb for hard grain hogs.

Bay District Association

Fall Meeting. 1882. Fall Meeting.

SATURDAY, OCTOBER 14, 1882

2:25 CLASS—For Timp Winston, Ashley, Cairo, Honesty, Capt. Smith, Moscow, Marin, Louis D, Inca, and open to all others that have never beaten 2:25.

Purse, \$600—\$300, \$150, \$90 and \$60 to first, second, third and fourth horses. Mile heats, three in five, to harness.

SATURDAY, OCTOBER 28TH.

SPECIAL PURSE—\$600, divided as above, for the following horses: Manon, Nellie R, Vanderlynn, Sweetness, Albert W and Starr King. Mile heats, best three in five.

Entries to close with the Secretary Monday, October 9th, 1882.

T. W. HINCHMAN,
Secretary, 1435 California Street.

Fall Race Meeting.

PACIFIC COAST

Blood Horse Association

Introductory Day—Saturday, November 11th.

No. 1—Purse \$200; free for all; \$10 each; a dash of three-quarters of a mile; entrance money to second horse.

No. 2—Purse \$200; free for all maidens; \$10 each; one mile; entrance money to second horse.

No. 3—Handicap Stake for all ages; free for all; \$25 entrance, and \$10 if declared; \$250 added; \$50 to second horse; a dash of a mile and an eighth.

No. 4—Selling Purse, \$200; a mile and a quarter; for all ages; entrance free; \$50 to the second horse; the winner to be sold at auction; horses entered for \$1,500 to carry regular weight; if for \$1,000, five pounds allowed; if for \$750, ten pounds; if for \$500, seventeen pounds, and if for \$300, twenty-two pounds. Any one can claim the winner, and the excess realized beyond the amount at which the horse is entered to be divided between the association and the owner of the second horse.

First Day Regular Meeting—November 15th.

No. 5—The Ladies' Stake. Closed.

No. 6—Purse \$250; free for all; three-quarters of a mile and repeat; \$50 to second horse; entrance free; the dash of three-quarters on the first day to carry ten pounds extra.

No. 7—The Vestal Stake. Closed.

No. 8—Handicap purse of \$250 for two-year-olds; \$25 each and \$10 if declared; \$50 to the second horse; dash of a mile.

No. 9—Purse \$250; a mile and a quarter over five hurdles; \$50 to second horse; entrance free.

Second Day Regular Meeting—November 18th.

No. 10—Purse of \$200; a dash of seven-eighths of a mile; \$50 to the second horse; entrance free; the winner of the three-quarter dash or three-quarters and repeat to carry ten pounds extra; winner of both events to carry fifteen pounds extra.

No. 11—Purse of \$200; heats of a mile and an eighth; entrance free; \$50 to second horse; maidens three-year-olds allowed seven pounds; four-year-olds twelve pounds; maidens five years old and over twenty pounds; the winner of the dash at this distance on the first day to carry five pounds extra.

No. 12—Handicap purse of \$250 for all three-year-olds; a dash of a mile and a quarter; \$25 each and \$15 if declared; the second horse to receive \$50.

No. 13—Purse \$250; a mile and repeat over four hurdles; \$50 to second horse; entrance free.

Third Day Regular Meeting—November 23d.

No. 14—The Finigan Stake. Closed.

No. 15—The Fame Stake. Closed.

No. 16—The Baldwin Stake. Closed.

No. 17—Consolation Purse of \$200, of which \$50 to the second horse; entrance free; a mile dash; horses beaten once allowed five pounds, twice ten pounds and three times fifteen pounds.

Entries to stakes and purses not marked closed will close October 10, 1882.

Races to close will be run under weights adopted at last annual meeting, which are the same as those of American Jockey Club.

Non-members will be placed on the same footing as members of the association in regard to the payment of purses and stakes advertised, and should there be a deficiency the winners will receive a pro-rata division.

Parties making nominations will be required to record colors at time of making entries, and after record will not be allowed to ride in other colors. This rule will be strictly enforced.

All nominations to stakes and entries in purses must be made on or before the 10th day of October next, 1882, directed to C. M. CHASE, Assistant Secretary, Box 1961, P. O., San Francisco. To be valid they must be plainly postmarked on that day, October 10th.

THEO. WINTERS,

JOS. CAIRN SIMPSON, Sec'y. President.
C. M. CHASE, Assistant Secretary. s30w2

SAME DAY.

No. 12. Running, free for all, 2 mile dash; purse, \$350

REMARKS AND CONDITIONS.

All trotting races are the three best in five, unless otherwise specified, three to enter and two to start. Entrance fee, 10 per cent. on purse, to accompany nomination. Purses divided at the rate of 60 per cent. to first horse, 30 per cent. to second, and 10 per cent. to third.

All running purses to be divided, two-thirds to the first horse and one-third to the second horse; four to enter and two to start, except race No. 11, three to enter and two to start.

National Association Rules to govern trotting; but the Board reserves the right to trot heats of any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats.

To fill running races, four or more subscribers are necessary.

All the two-year-olds, when running in their classes, shall carry 100 pounds, with the usual allowance for mares and geldings.

All three-year-olds, when running in their classes, to carry 110 pounds, with the usual allowance as above.

No added money for a walk-over.

Horses entered in purses can only be drawn by consent of the judges.

Rules of the Pacific Coast Blood Horse Association (old weights) to govern running races, except when conditions named are otherwise.

All entries made in writing, giving name, sex, color and marks of horses; also, name and residence of owner. In running races, full colors to be worn by rider; and drivers of trotters are respectfully requested to wear coats of distinct colors, to be named in their entries, as their horses will be designated upon programmes by the colors worn by drivers.

Entries to all the above races to close with the Secretary on Saturday, Sept. 30, 1882.

Write "Entrance to Races" on outside of envelope.

NOTE—"Exile" is barred from trotting races, 1, 2 and 3.

F. J. BARETTI, President.

R. H. HEWITT, Secretary.

Fine Thoroughbreds

ON THURSDAY, NOVEMBER 16,

Vol. I. No. 15.
NO. 508 MONTGOMERY STREET.

SAN FRANCISCO, SATURDAY, OCTOBER 14, 1882.

SUBSCRIPTION
FIVE DOLLARS A YEAR.

THE DRAFT HORSE.

BLACK PRINCE. Owned By J. B. Haggin, Rancho Del Paso.

When, accompanied by Mr. Wytenbach, we journeyed to the Rancho del Paso a couple of weeks ago, it was not with the expectation of seeing three such magnificent specimens of the equine race as the trio which the artist sketched. This week we give an accurate representation of the ponderous member of the triumvirate, and in doing so feel that he claims to be considered a notable if even he has not the gift of speed. Not exactly deficient in this respect, as at a square heel and toe he can cover the ground rapidly for the progression that is confined to a walk, especially when the inertia of a heavily laden cart has to be overcome, and after

being started kept moving. There is an immense amount of bone and muscle in the elephantine proportions of Black Prince, and that, too, without the usual amount of coarseness which is seen in the draft horse. As an observer remarked the weight is behind the collar, as all in front of it is not overloaded. The head is not the huge parallelogram, or the neck, at the setting on of the head, like a section of a forty gallon cask, which oftentimes mars animals of the class, and notwithstanding the bulk there is a compactness which is an indication of being able to do a good proportion of work without being laid up. Many large horses are "soft."

Two or three day's work in a week is their limit, and when the tasks are at all severe they are done and must have time to recuperate.

The "Shire Horse" appears to be finding admirers whenever introduced. And though comparatively of recent date, or rather of recent importation into the United States, the popularity has created a large demand. The "Shire farmers" of England have been perfecting the breed for many years until at present the type is so well established that they are as distinct as the Clydesdale. It is claimed that they are hardier than any of the larger breeds, and this is a valuable

quality, in fact, does away with the greatest objection to the breeding of them. Those who have used them for increasing the size of work horses also claim that the blood assimilates with the ordinary mares of the country, and while the offspring show more resemblance to the sire, there are no striking incongruities, but a general blending of both parents. It is oftentimes the case that when the parents are radically different the offspring are not homogeneous. There are, perhaps, the small limbs of one with the heavy body of the other, or these conditions are changed, and the large uncouth legs support a light body. With such symmetry of proportion as is witnessed in the subject of this sketch there are not the same chances for the produce being a gross mixture of the sire and dam and there is a more perfect assimilation. There is little necessity for urging breeders to give more attention to size in horses which are bred for the purpose of moving heavy loads. "Weight in the collar" has a value when trucks and drays have to be hauled with tons of load upon them, and two horses of suitable size can draw a plow which four ordinary animals could not move.

According to our ideas Black Prince is nearly a model of the heavy draft horse, and his picture will corroborate this opinion. He is a handsome horse for one of this kind, a dappled black relieved by the white markings which are shown. He was selected in England by B. A. Haggin, a son of his owner, and as was stated last week this young gentleman must have a correct eye for horses of different strains Black Prince was foaled in 1876 and was bred by James Cropley, of Cambridgeshire, England. He is recorded in the English Cart-Horse Stud Book, that volume being constructed on the same plan as the Herd Books, giving each male a number, that of Black Prince being 176. His sire was Hercules, 1,024, and his dam was by Farmers' Friend. He took the first prize at Tring, England, being exhibited by W. R. Rowland of whom he was purchased by Mr. Haggin and imported last season. His colts in England have also been prize winners whenever shown. At the California State Agricultural Fair, in 1881, he was awarded the first premium.

We are well pleased to present to our subscribers so perfect a representation of the draft horse, assuring them that it is a capital likeness of the animal without a point being flattered in the drawing. His weight ranges from 1850 to 1950 pounds.

TURF AND TRACK.

Cause and Effect.

New York, is in a spasm of bigotry and a spirit of fanaticism not at all in keeping with the age we live in is engaged in a crusade against any and all manner of speculation in sports of the track. As a few well meaning friends of the turf in this State are anxious to try the experiment of abolishing betting we append the following from the *Herald's* account of the opening day at Jerome Park, as a hint to these gentlemen as to the effect of such a policy:

A large crowd gathered at Jerome Park yesterday to witness the races, but when they began to look about them for the bookmakers to back their choice on the first race, having made their selections on the cars on their way there from their racing cards, they were much surprised to find that Inspector Dilke was ahead of them, and had giving notice to the managers of Jerome Park that no betting would be allowed to take place there during the meeting. Under and around the shed built expressly for the bookmakers at the upper end of the grand stand were congregated a great crowd of people discussing the absurdity of the order for stopping book betting in this city, while it is allowed at every other race course in this State and in every State in the Union. A few men tried the experiment of making bets in opposition to the orders of Mr. Dilke, but were quickly arrested and taken out of the course to the station house in 132d street, where they were discharged by promising not to attempt bookmaking again at Jerome Park until the law gave them permission to do so. The racing was called on promptly at the hour named; but the usual interest in the running was not to be seen, and at the finish of the race the enthusiasm of the backers of winners was not heard, and although the struggles in the five contests that came off were just as exciting as ever before they were not hailed with the delight usually manifested on such occasions.

And again on the second day the *Herald* notes:

Jerome Park presented a dull appearance yesterday, the usual crowds on the grand stand and the lawn in front, the club house and the surrounding hills being conspicuous by their absence. Never before on a race day do we remember seeing so few people at Jerome Park. The programme of the racing to take place was assuredly a good one, and the only reason that could be given for the lack of attendance was the fact that the police were to be there, as they were on the first day of the meeting, to arrest any person who might be seen indulging in backing the horse he fancied in the races to come off. And no doubt this was the cause of the slim attendance, and it is feared this state of affairs will continue throughout the meeting unless some arrangements can be made.

New South Wales Sporting.

SYDNEY, N. S. W., Sept. 7, 1882.

EDITOR BREEDER AND SPORTSMAN: The great spring racing carnival of the Antipodes is now in full swing. You will observe that we commence about the same month of the year that you do with your trotting, a sport which is in its mere infancy in the colonies, but promises with a little encouragement and with a few gentlemen like Dr. Jno. Weir at the head of affairs, to move along swimmingly. Our "spring" opened with two small meetings over Randwick course, held more for the purpose of bringing together owners and horses in and about the metropolis, the stakes not being of much value. At Hawkesbury, a place situated about 35 miles from Sydney, two days' racing was held. The attendance was fair while the weather was threatening, and slight showers fell but in no manner interfered with the sport. Five

events were set, down for decision. The hurdle race of miles fell to Mr. H. Huberts' b g Basilisk, by Gulgory, carrying 136 lbs., Nigger (119 lbs) second, and Hightflyer (132 lbs.) third. Won easily by six lengths. Time 4.2. Cedric won the Public Auction Stakes of one mile in 1.46½, carrying 91 lbs.

Hawkesbury Guineas, of \$55 each for starters only, with \$1,050 added. For 3-year-olds; colts, 117 lbs., fillies, 112 lbs.; geldings at starting allowed 5 lbs. Second horse \$130 from the prize. 1 mile. Hon. J. White's br f Hecla, by Maribyrnong-Alpaca (J. Williamson)..... 1
Mr. P. J. McAllister's b f Jessie (Gainsforth)..... 2
F. Wentworth's b f Vauluse (W. Murphy)..... 3
A. Busby's br c Pandango (Colley)
Captain Osborne's ch c Trumpet Major
Mr. T. Brown's ch c Cetewayo (P. Pigott)
E. Chippendale's b f Piracy (James Roarty).
Betting: 2 to 1 against Hecla, 3 to 1 Pandango.
Won easily. Time—1:45 2-5.

PLACED HORSES FOR THE HAWKESBURY GUINEAS.

1881	Monmouth	Marmora	The Gem	1:47 2-10
1882	Hecla	Jessie	Vauluse	1:45 4-10

In 1873 the name of the race was changed from "The Derby" to "The Guineas," and the distance made one mile instead of a mile and a quarter.

County Purse sweep of \$15 each for starters only; for all horses; second horse \$50 from the prize, was won by Messrs. Spence and Inghern's Hastings by Wilberforce, imported, by Oxford, carrying 92½ lbs. Brian Born by John Bull, carrying 112 lbs., second, Mulatto, 124 lbs., third, the mile and a quarter occupying 2:13. This race made the chances of the second and third pretty "rosy" for the Hawkesbury Grand Handicap of 14 miles where they each had 14 lbs. less to carry. Strong, with 126 lbs. on his back, ran in this race but never gained a position, having heavy "bar shoes" on. The day wound up by Eva (3 years 101 lbs.) a speedy little mare, by old Kelpit (a son of English Weatherbit), winning the Maiden Plate of \$25 each for starters only, with \$500 added; weight for age, 1½ miles, Malta, (103 lbs.) second, Velontine, (121 lbs.) third. Time—2:15.

If weather and attendance have any tendency to make a meeting successful then the second day of Hawkesbury could lay claim to being in every sense a success. There was one matter, however, which made the termination rather unwholesome to honorable racing men, and that the winning of the big handicap by String, after starting, in the County Purse the first day, among inferior animals, and never getting a place. In the Hawkesbury handicap his shoes were removed, (we always run our horses here in their bare feet, when the owner intends to win, otherwise we know he is out for an "airing" and try to get off weight,) and he won the fastest recorded mile and a half run for in the Australian colonies. There was a general outcry among the public and it was thought that the stewards would have taken some action in the matter, but it appears that even in the antipodes, like other worlds, there is a "fair for the rich and the poor." If Mr. R. Rouse, the owner of String, intended to act squarely he should have publicly declared on the board his intention of simply sending his horse for a gallop, and not have misled the public, who made his horse at one time first favorite, but the bookmaker who knew better kept on "laying" him. I do not think the owner had any ulterior motives, but to say the least of it, the matter was unsavory.

SUMMARY.

Mares' Produce Stakes, a sweepstake of \$25 each for starters only, with \$500 added by the R. R. C., and \$250 for the breeder of the winning horse. For three-year-olds; colts 117 lbs., fillies 112 lbs.; 1½ mile.

Hon. J. White's br f Hecla, by Maribyrnong-Alpaca (J. Williamson)..... 1
Messrs. Spence and Inghern's b c Hastings (late Waterloo), by Wilberforce-Carlotta (Gainsforth)..... 2
Mr. C. T. Roberts' b or br f Eva, by Kelpie-Tiara (Mathews)..... 3
Messrs. A. and W. Busby's bl or br c Pandango, by Hawthorned-Espagnola (Colley).
Betting: 3 to 2 on Hecla, 4 to 1 against others.

PEDIGREE AND PERFORMANCES OF THE WINNER.

H E C L A	Maribyrnong	Fisherman	Heron	Bustard	Castel Miss Nap
				Daughter of	Orville Rosanne
		Mainbrace		Sheet Anchor	Lottery Morgina

Alpaca	Lilla	New Chum	Prairie Bird	Camel Miss Skim	St. John Lady Jane
				Industry	Little John Beeswing
		Eva	Young Marquis		Toss Mr. Walker's mare
			Daughter of		

The winner first made her appearance as a two-year-old at the Victorian R. C. Autumn Meeting, in the Ascot Vale Stakes, three-quarter mile, when she was unplaced, Navigator being the winner. She was also unplaced in the Nursery Stakes, won by Solitude, at the same meeting. Coming to Hawkesbury a little later on she ran good second to Piracy in the Claret Stakes of five furlongs. Vauluse then defeated her after a good finish in the Maiden Plate, which were the

only races she appeared in during the meeting. At the Australian J. C. meeting following, Navigator beat her in the run home for the Champagne, Yeomans, who was piloting her, losing his whip; and in the Sie's Produce Stakes she again met with defeat from Jessie. On Thursday last, the opening day of the Hawkesbury Spring Meeting, she left the paddock first favorite for the Hawkesbury Guineas, which she won just as easily as the Mares' Produce Stakes on Saturday.

SUMMARY.

Hawkesbury Grand Handicap, a sweepstake of \$50 each for starters only, with \$1,500 added, for all horses. The winner to receive 75 per cent, second horse 15 per cent, and third horse 10 per cent of the gross amount. 1½ mile.

Mr. R. Rouse's ch h Sting, by Grandmaster, by Gladateur-Queen Bee, 4 yrs., 112 lbs. (McGrade)..... 1

	Busy Bee	Industry	Emigrant Stella

Sting is a good-looking chestnut horse and now four years old, and was bred by Mr. S. Blackman, near Mudgee, N. S. Wales. As a two-year-old he started at Mudgee, but we have no record of his performance. At the same age he ran second in the Maiden Plate at Coonamble, and with Sst was beaten by Kingsworth in the Flying Handicap at the same meeting. As a three-year-old he won the Town Plate, one and one-half miles, at Orange, carrying 7st 1 lb, in 2:49, Harebell being second. On the second day he won the Town Plate, two miles, 7st 3 lb, in 3:41, Stella, 7st 7 lb, being second. Journeying to Mudgee he secured the one and one-half miles handicap, and then at Mudgee won the Turf Club handicap, one and one-half miles, Sst 5 lb, in 2:46 1-5, Fleetwing, 7st 3 lb, being second. His last performance, up to the winning of the race under notice, was on Thursday in the County Purse, when he was not placed. All his performances are confined to N. S. Wales.

The two-year-old stakes, three furlongs for colts, 108 lbs., fillies 106 lbs., was won by W. Stewart's b c Kingslake by Maribyrnong, his sire imported Fisherman, dam Rosedale, Morcean second, Trisran third. Time 37½. For the members' handicap, 7 furlongs, Mr. J. Dugan's b filly Venice, 3 years, by Malta, carrying 96 pounds, passed the judges' box first, W. J. Brown's gr c Sacomra, 112 pounds, second, Mr. Gosper's b c Malta, 100 pounds, second. Time, 1:30½. The Prince of Wales Stakes, 6 furlongs, was won by Mr. J. Ouer's ch g Bob Sawyer, by Oliver Twist. Time, 1:17. The Turf Club handicap of \$25 each for starters only, with \$500 added, distance 1 mile, was won by Mr. R. J. Newland's b h Kingsworth, aged, by Barbarian, 112 pounds; Mr. J. Abraham's b h Balthagan, 6 years, 102 pounds, second, Mr. James Majors' gr m Hypatia, 6 years, 102 pounds, third. Time, 2:14½. This concluded a nice two days' racing and a week afterwards we are hurled into the midst of the great spring carnival of the Australian Jockey Club, a reunion which in point of racing interest is second to the great Melbourne Cup meeting held under the auspices of the Victoria Race Club. The opening day was greeted with delightful spring-like weather, the heat at times bordering almost on a summer's day, while the attendance was the largest ever known at the Roundwick Race Course. Proceedings opened with a hurdle race of 2½ miles, for which nine horses sported silk, the favorite, Sportsman, being badly beaten by Basilisk, carrying 138 pounds, Sportsman (154 pounds) second, Annie Laurie (147 pounds) third. Time 5m. The Trial Stakes brought out nine starters, eight of which were three-year-olds and was won by Mr. Thos. Brown's gr c Sacomra, 107 pounds, by Maribyrnong-Sappho, Mr. Fagin's b f Belle Bird (102 pounds) second, Mr. B. Osborne's br f Brunette, (102 pounds) third. Time, 2:15½.

The above three are each three-year-olds. The A. J. C. Derby Stakes now occupied all attention and four candidates out of an original entry of eighty-two subscribers fed the starter. The following are the conditions:

THE DERBY.

A sweepstake of \$150 each, 5 ft. For three-year-old colts, 122 pounds, and fillies 117 pounds. If more than twenty subscribers the owner of the second horse to receive \$300 out of the stake. The forfeit to be paid before 4 p. m. on the day preceding the race, or the nominator will be liable for the whole stake. One mile and a half.

Mr. E. DeMestre names br c Navigator, 3 years, (Hales)..... 1
Hon J. White names br c Segenhoe, 3 years, (Yeomans)..... 2
Captain Rossi names br c Lord Loftus, 3 years, (Thomas)..... 3
Mr. E. DeMestre names br c Nicholas (Colley)..... 4
Betting, 5 to 2 on Segenhoe; 5 to 2 against Navigator; 10 to 1 against others.

After one attempt the flag fell to a good start, Nicholas going at once to the front in the interest of Navigator. Nicholas led Lord Loftus eight lengths past the stand, then a length away came Navigator, with Segenhoe a length away last. No alteration till they reached the back of the course, where Nicholas's lead had been decreased to half a length, Segenhoe being still last. Over the hill they began to close up, Loftus joining Nicholas, and Segenhoe coming fast on the outside. Loftus was first into the straight, but at the distance post was passed by Navigator on the inside and Segenhoe on the outside. A great race home ensued in favor of the former by a length and a half, Nicholas and Lord Loftus running a dead heat for third place. Time, 2:48½.

WINNERS OF THE A. J. C. DERBY.

Yr.	Owner.	Winner.	Sire.	Time
1865	Cheeke	Clove	Magnus	2:51
1866	J. Tait	The Barb	Sir Hercules	2:48½
1867	J. Tait	Fireworks	Kelpie	2:48
1868	Thompson	The Duke	Kingston	2:50
1869	H. Fisher	Charon	Ferryman	2:47½
1870	J. Tait	Florence	Boiardo	2:51
1871	T. Lee	Javelin	Yattendon	2:47
1872	W. Winch	Loup Garon	Lord of Linne	2:46½
1873	T. J. Ryan	Benvenuto	Peter Wilkins	2:48½
1874	Sir Hercules	Robinson	Kingston	2:50
1875	E. Jellet	Richmond	Marbyrnong	2:45
1876	C. B. Fisher	Robinson Crusoe	Angler	2:43½
1877	J. Silberberg	Woodlands	Marbyrnong	2:49½
1878	E. De Mestre	His Lordship	The Marquis	2:55
1879	E. Lee	Nellie	T. Whiffler (E)	2:51½
1880	J. S. Smith	Grand Flaneur	Yattendon	2:45 1-5
1881	Osborne	Wheaten	Epigram	2:55
1882	E. De Mestre	Navigator	Robinson Crusoe	2:48½

The win of Mr. E. De Mestre was very popular and well received by the public.

The Epsom handicap, one mile, one furlong, sweep of \$25 each, with \$1,000 added, was won by Mr. C. T. Roberts' ch g Masquerade, by The Drummer, imported, (106 lbs.) who was first favorite in the Hawesbury handicap, but making his effort in that race too soon tired down Brian Born, (114 lbs.) second; Balthagan, (102 lbs.) third. Time, 1:57½. The Spring Stakes, weight for age, one and a half miles, a sweep of \$25 each with \$1,000 added, fell to Hecla, three years, 128 pounds, beating Barber, aged, 132 pounds, Drummer, four years, 126 pounds. Welter handicap, one and a quarter miles, was appropriated by the old one-eyed son of Bylong, Saunterer, who carried (134 pounds) beating Miss Whippler (112 pounds) and Hastings, (110 pounds) in 2:14½.

The second day or "metropolitan day," as it is called, opened equally as auspiciously as the first or Derby day by Mr. J. Dillon's b m Twilight, by The Drummer. Twilight opened the ball by winning The Shorts, a handicap of \$500, three-quarter mile, carrying 122 pounds. Venice, three-year-old and Waxworks, four-year-old, ran a dead heat for second place, each carrying 115 pounds. In the Spring Maiden Stakes Hecla gave us another taste of her quality of winning easy with leaving the paddock at 6 to 4 on her, and it clearly shows from her running what Mr. Farrell, the trainer of her and Segenhoe—the Derby favorite—made in scratching her for the blue ribbon of the N. S. Wales turf. Great interest is centered in her meeting the Derby winner to-day in the Mare's Produce Stakes, 1½ miles. The Great Metropolitan Stakes of \$100 each, with \$2,500 added, two miles, was appropriated by Masquerade, carrying eighty-six pounds, showing at once what a good thing her party had for the Hawesbury event. Comet, another gelding by The Drummer, and Britisher, by John Bull, imported, each having an impost of ninety-six pounds, ran second and third respectively in one of the fastest run races known over Randwick, the winner having plenty left in her after passing the winning post. Appended is a table of winners and placed horses for the Metropolitan Stakes, showing the different times:

Year.	First.	Second.	Third.	Time.
1866	Bylong	Yattendon	Tim Whiffler	3 42½
1867	Tim Whiffler	Rose of Australia	Birnaghnam	3 38 6-10
1868	The Barb	Tim Whiffler	Bylong	3 37 3-10
1869	Circassian	Grey Mornus	Warrior	3 44½
1870	Croydon	Tim Whiffler	Trump Card	3 43
1871	Rosebud	The Pearl	Barbelle	3 40½
1872	Dagworth	Clansman	The Quack	3 33 8-10
1873	Horatio	Myrtle	The Arrow	3 42½
1874	Starling	Goldsbrough	Maid of Avenal	3 36½
1875	Goldsbrough	Kingsborough	Kingfisher	3 32
1876	Nemesis	Ratsplan	Irish Stew	3 33 8-10
1877	Amendment	The Painter	Timothy	3 35 3-10
1878	Democrat	The Dean	Colima	3 38
1879	Secundus	Lord Burghley	Strathearn	3 36 8-10
1880	The Pontiff	Desperian	Lord Burghley	3 31 6-10
1881	Hesperian	Waxy	Wellington	3 32 4-10
1882	Masquerade	Comet	Britisher	3 33

The Selling Plate was won by Mr. H. C. Dongar's br f Preciosa, three years, Kanaka and Hopeful second and third. This was a bit of an upset to backers who fancied Rosinante and Kanaka, the former getting fourth. In the Squatters' handicap, Brian Born, carrying 118 pounds, started with the odds of six to four on him and won cleverly by a neck from Hyattia (119 pounds), and Willeroo, (96 pounds).

The third day commences to-day, Thursday, September 7, an account of which I cannot forward you owing to the Frisco mail closing at 3 o'clock and racing commencing at 1:15 p. m.

There is very little doing in the aquatics. Laycock has landed and is well, while E. Trickett is keeping a public house on Bridge street, Sydney. The coursing and football season are just over and attention is now turned to cricket.

The arrival of Dr. Jno. New with a string of trotters has a tendency to make the people talk about forming a track, but talk is cheap. I would like to see a company start and form a track now that the Doctor is present as he could give them good advice. We are not half so go-ahead as the Victorians but slow and sure. I do not despair of seeing trotting go ahead here; the people are only beginning to get a knowledge of the sport, through frequent importations of trotters, and making themselves more conversant with it through reading the different American papers which arrive here. Your very interesting sporting journal is widely circulated in this colony, and I believe also in Victoria. Echo.

Bootjack's Victories.

SACRAMENTO CITY, October 8, 1882.

Please inform me of the name of the running horse that has won the most races in America this year and oblige

Yours truly,
FRANK FERN.

This query would require a great deal of research to answer authoritatively. From a somewhat hurried look we are under the impression that Bootjack, by Bonnie Scotland, is at the head of the list, having won up to the 12th of October eleven races, and Brambaletta, by the same sire, won ten up to the time she met with the injury. When the year is up, thanks to "Krick," there will be no trouble to give a correct reply.

Racing and Trotting in Washington Ter.

GOLDENDALE, W. T., Sept. 26, 1872. Trotting for three-year-olds, heats of a mile.

W. T. Mulvanill's b s Sam..... 2
J. Harris' w s Lindsey Urvine..... 3
Time, 1:49.

At the conclusion of the running race the brown stallion, Lindsey Urvine, was sold at auction for \$355.

The California Trotters.

The eight young trotters shipped from Sacramento by ex-Governor Leland Stanford of California took up their quarters at the Gentlemen's Driving Park yesterday morning, and are in the first row of stalls on the hill to the left of the entrance gates. Mr. Marvin is in charge of the stable and he will be remembered as the driver of Smuggler when the latter was the sensational horse of the trotting turf. The horses were exactly two weeks on the journey across the continent, though from this must be deducted a short stop at Ogden, then two days at Omaha and from Wednesday morning to Sunday at Island Park, Albany. A special car is run by Mr. Stanford for the purpose of shipping his valuable trotters in, and it was in this equine palace car that the eight journeyed from California. Mr. Marvin said they had all fallen away very much in flesh since leaving home, and that while in the car not one of the eight would eat anything but hay. Notwithstanding this however, they are a grand lot as viewed in their boxes, and when exhibited on the track will doubtless be worthier yet of admiration. The eight are as follows:

Wildflower, 3 years, by Electioneer, dam Mayflower, by St. Clair. Has a two-year-old record of 2:21. Is a rich bay with black points. Shows great muscular development, with a blood-like head and clean cut limbs on which the veins stand out with great prominence.

Marlet, 3 years, by Electioneer, dam Martie, by Whipple's Hambletonian. This is a bay gelding, and is entered in the Maid Stakes with Wildflower. Is lengthy, with a speedy look about him, but lacks the symmetry of Wildflower.

Bertha, 3 years, by Electioneer, dam by Sontag by Mohawk out of Laura Keene. A remarkably large, bright bay mare, standing 16½ hands, and notwithstanding her size, is well furnished and seems to have stood the journey better than several of the others. Is engaged in stakes at Lexington, Ky.

Stella, three years, by Electioneer, dam Lady Rose, by Gen. Taylor.

Unique, 3 years, by Electioneer, dam Barnes' Idol.

Ned Fay, 3 years, by Electioneer, dam Mary, by Fred Low. The latter three were sent on to be kept in New York. The first two are fillies and the latter a gelding.

Hinda Rose, 2 years, by Electioneer, dam Beautiful Bells, by the Moor. As a yearling this filly trotted in 2:36, and has every appearance of being able to do as remarkable a feat as a two-year-old. She is a brown in color, with a thoroughbred look about her head and legs. Her quarters have something approaching the droop, and the immense length from the point of the hip to the hock indicates great reach, behind which there is sufficient muscle to back up. Hinda Rose is engaged at Lexington.

Flower Girl, 2 years, is own sister to Wildflower, whom she resembles very much.—N. Y. Herald.

At Euston Hall, in 1799, was foaled the Duke of Grafton's first Derby winner, Tymant by the curiously named Pot-8-os out of one of his Grace's own mares. Apropos of Pot-8-os the question is constantly being asked where he derived his singular name? and we may as well give the traditional story here. It was originally intended to have given the chestnut son of Eclipse, the name of Potatoes which it must be admitted was not itself a high-sounding appellation for a thoroughbred, and when Lord Abingdon who had bred him happened to mention his intention to his trainer in the stable, a small lad was so much struck with the absurdity of the name that he involuntarily burst into a hearty laugh. His Lordship good humoredly turned to him and saying, "So you don't like the name, my boy, eh?" picked up a piece of chalk and handing it to the lad added, "Nevertheless we shall have it, and if you can write it up over his corn bin I will give you this crown piece." The boy took the chalk and wrote "Pot-8-os" and His Lordship was so tickled with the lad's ingenious version that he retained the spelling of the word.

The horsemen of Plumas county are talking over a proposition to build a track in American Valley.

Turf Gossip.

"Vigilant," the genial and gossipy writer who presides over the "Turf and Track" department of the New York *Spirit of the Times*, invests the driest details with a halo of cheerfulness that indexes a happy soul. He always says something pleasant in the pleasantest sort of way and the following brochure is a fair sample of his weekly literary salad:

Louisville and Brighton Beach have monopolized attention the past week, but next week the autumn meeting of the American Jockey Club will be in full blast at Jerome Park, which will soon be putting on its October tints, rendering its world-renowned beauty more marked than ever, and Chicago will open the ball on Tuesday.

The sensation of the week has been the sale by Mr. Milton Young, of Henderson, Ky., of his entire racing stable to Mr. R. C. Pate, of St. Louis, for \$25,000, the transfer to be made at the close of the Louisville meeting. It has been understood for some time past that Mr. Young contemplated retiring from the turf and devoting himself to breeding, for which purpose he recently purchased the McGrathiana farm, paying nearly \$47,000. Mr. Young had freely stated that his racing stable was for sale, and when the Louisville meeting opened Mr. Pate came on, and closed the bargain on Saturday night last, the 23d inst. He takes all the horses in training, with the exception of Square Dance and Patti, which Mr. Young desires to retain for the stud. The following is a full list of the stock sold:

Boatman, b g, three years, by imported Bonnie Scotland—Valerian.

Monogram, b g, three years, by imported Buckden—Monomania.

Ascender, b g, two years, by imported Buckden—Ascension.

Bondholder, b c, two years, by imported Bonnie Scotland—Glentina.

Vera, b f, two years, by King Alfonso—Veritas.

Bacarut, br g, two years, by imported Bonnie Scotland—Robinet.

Tangent, ch g, two years, by imported Great Tom—Vanilla.

Yearlings.—Empire, gr g, by Enquirer—Alice Murphy.

Embarco, ch g, by Enquirer—Fannie Mattingly.

Endymion, b g, by Enquirer—Bergamot.

Envoy, ch g, by Enquirer—Satinet.

Rex, ch g, by King Alfonso—Queen Victoria.

Nannie D, b f, by Enquirer—Glentina (Bondholder's dam.)

Maria D, b f, by Lisbon—Crucifix.

Longway, b g, by Longfellow—Sallie Morgan.

Tattoo, ch f, by imported Great Tom—Sparrowgrass.

Trinket, b f, by imported Great Tom—Robinet.

Trophy, b f, by imported Great Tom—Bonnie Meade.

Mr. Plate, the purchaser, resides at St. Louis, where he has been long known in sporting circles, having been for some time identified with trotting interests, being the owner of Woodford Mambrino, Lucille, and Kate Middleton. Mr. Pate has signalized his entry on the turf with a master stroke of judgment, having engaged Ed. Brown ("Brown Dick"), who has always been Mr. Young's trainer. Thus, the horses will not change trainers, and there is less likelihood of their losing form, as is often the case when trainers are changed. The fillies included in the above list revert to Mr. Young upon their leaving the turf, Mr. Pate having their racing qualities only.

A *Courier-Journal* reporter gives the following account of his interview with Mr. Young, at Louisville:

"Yes," he replied, "I take possession of McGrathiana in October, and will immediately set to work to breeding the thoroughbred. My intentions have been all along to do this, and the opportunities presented themselves, and I would not let them slip, fearing that at some future time I might regret it."

"Yes," replied the reporter, "you're right; running the racer is risky business."

"Oh, I don't know that it is so risky," replied Mr. Young; "I think I could continue at it and make money; but what I want is some permanent, steady business."

"It costs a great deal for the running expenses of a stable, doesn't it?" asked the reporter.

"Yes, the expenses are very heavy," he replied. "For one like the one I have been running, it would require the horses to win \$25,000 during the season to make any money. During the three years which I have been in the business my stables have won \$91,000 in purses and stakes. Of course the winnings on the outside, in the pools are not mentioned."

"You will commence right away to breeding?" asked the reporter.

"Yes; I guess I have as fine a lot of young brood mares as there is in the country, with the exception of Lorillard. I have watched my opportunity, and picked up the best that was to be had. My young stallion Onondago has not a peer anywhere for breeding. He is a brother to Sensation, the best two-year-old that ever appeared, and Snosquehanna, too, was a fine performer at that age. The popular idea now is for short dashes and early development. Most all of the older turfmen still adhere to the old prejudices for four miles, but I intend to keep up with the procession and breed that which is in demand. Short dashes and speed are now wanted, and Onondago comes from a family of that character of performers."

"What stock have you now on hand for your establishment?" asked the reporter.

"Well, there is Onondago, three years, by Leamington—Susan Beane; Duke of Montrose, five years, by Waverley—Kelpey; Fouwich, four years, (sister to Fonso), and out of the grandam of Hindoo; Beatitude, six years, Bliss, five years, and Beatrice, three years, full sisters, by Bonnie Scotland—Mariposa; Black Maria, three years, full sister to Bancroft; Kelpie, fourteen years, the dam of Janet; Olivia, three years, by The Ill-Used—Oltipa; Wildfire, three years, by Leamington—Madge, by Australian; Perhaps, eight years, the dam of Perplex; Mutagorda, six years, by Glengarry; Uena, three years, by Virgil, dam a full sister to Springbok; Sozodent, three years, by Longfellow; Belle of Maywood, four years, full sister to Belle of Nelson, by Hunter's Lexington; Gladila, four years, by Glengarry—Waltz, the dam of Gladella; Patti, four years, by imp. Billet—Dora, by Pat Malloy; Square Dance, three years, by War Dance—Sue Dougherty, by Mickey Free. All of them, too," continued Mr. Young, "are from the best families of winners."

"You will hardly be prepared for a sale in the spring?" asked the reporter.

"No; I have but two foals now—one out of Beatitude, by King Alfonso; the other by St. Martin—Perhaps. Nearly all of my mares are, however now in foal. There are Beatrice and Belle of Maywood, in foal to Glen Athol; Beatrice, Sozodent and Gladella to King Alfonso; Perhaps to Lisbon. Kelpie to imported Thunderstorm (she got a good one in

Janet by Lightning); Fowich to imported Blumantle, Keene's recent importation; Nina and Black Maria to King Ban, and Matagorda to Enquirer.

The Donohoe family are becoming as noted and as numerous on our turf as ever the Day family were in England when George IV said he could never tell which was "old John Day," and which was "young John Day." Of the Donohoes, there is "Billy," the bright particular star of jockeydom; there is "Mike," fast developing into a rival of his elder brother; there is "J. Donohue," already one of the cleverest of the featherweights; and finally there is Old Joe. Now, for flat races. As an owner of steeplechasers, he has a national reputation, and is the most jolly, rollicking Irishman that ever hunted a fox over the Long Island plains, or the Jersey Palisades, and his adventures and escapades would fill a small volume. A cloud ruffled his massive brow, struggling for mastery, with a half-amused uncertain smile that played about his lips when we met him in the paddock, at Sheepsh-head Bay, last Thursday. Evidently something was wrong with old Joe, and, presuming upon old acquaintance, we ventured to ask what was the matter.

"Matther is it? An' shure phat d'ye suppose wud be t'matther wid a mau whin an ould thafe ov an officer threathens to arrist 'im for nothin' at all!" was his indignant reply.

"Who was this?" we asked, with some surprise.

"One ov ould Bergh's men—one ov thim Cruelthy to Animals Society fellers."

"On what charge?"

"Fur whippin' an spurrin' a horse, he sez, I rode in a race. Did ye ever hear t'loike o' that now?"

"No, I did not, but, I must confess, I don't exactly understand the affair."

"Who can understand t'loikes ov thim fellows, anyhow? I was standin' here a minute ago, Jimmy Jinnins an' meself, whin who shuld stip up but a feller as thall as t'house, wid a hat on his head loike a sea captain."

"Is Doneyhue yer name?" sez he.

"It is," sez I.

"So I'm towld," sez he.

"Thin phat did ye ax me for?" sez I.

"Y're accused," sez he, "ov whippin' and half-murderin' a horse wid yer whip an' spurs. T'evening phaper has a long account ov it, an' calls t'attinshun ov t'Society ov t'Previnshin ov Cruelty to Animals to t'. Y're loiable t'arrist," sez he. "T' Society don't want t' make any trouble wid ye, qut I warn ye not t' do t'loike o' that agin now. Ye'd ought to be ashamed, an' ould hatlin loike yerself batin' an' abusin' a poor devil ov a horse."

"And phat sort of a man are you?" sez I.

"I'll show ye," sez he.

"Phat t' devil's matther wid ye?" sez I.

"Nothin'," sez he.

"D'ye think I'm an Italian?" sez I.

"I do not," sez he.

"Thin phat are ye graffin' about?" sez I.

"Didnt ye rhide t' harse till he was half kilt?" sez he.

"Do I luk loike a man that wud be after rhidin' a harse in a race?" sez I; "t'loike ov me, two hundred pounds weight; sure ye're a daft mau."

"Well," sez he, "the phaper sez it was J. Doneyhue, and ye acknowledge th' same is yer name."

"Me name is J. Doneyhue," sez I, "it might be Jim, it might be John, but it's Joe."

"That's all roight," sez he, "but here's t' phaper; now see fur yerself, and he sticks a slip ov newspaper foreinst me. The phaper sed that 'J. Donohue, the jockey, whipped and spurr'd t' harse Ninus unmerciful.' Thin I begun t' understand. I tould 'im it was the boy that rides for Jeter Walden, and he went off. Av coorse, I don't care a toss ov er copper, but it's t' mean consate ov t' thing, d'ye moind. T' loikes of fellers loike thim meddlin' wid things they don't know nuthin' about, an' taken t' loikes ov meself for a bit ov a jock that rides at \$800s. Shure it's ruinashun t' country's goin' to."

Rica, the noted daughter of Kingfisher and Lady Montmore, is expected to make her reappearance at Jerome Park. Last season Rica stamped herself quite the best of the two-year-old division, and it was thought Mr. Kelso had got a bargain when, in October, he purchased her of Mr. Belmont for \$7,500, the three-year-old filly stakes being considered quite at her mercy. She, however, has been a great disappointment, being hardly up to the mark at any time, owing so sore withers, which, at Monmouth Park, threatened to become fistulous, and she was sent home. She began mending at once, and will reappear in the Hunter Stakes, with a good chance of winning.

Mr. Richard Roche, of St. Louis, has purchased of Messrs. Bowen & Co. the brown filly Miss Woodford, two years, by Billet—Fancy Jane, by Neil Robinson, second dam by Knight of St. George, third dam by Glencoe. Miss Woodford, as will be noticed by the above pedigree, is a full sister to Belle of Rummynede, and has, during the past season, proved herself one of the best two-year-olds of the year, winning the Ladies' Stakes at Chicago, and the Spinaway and Misses' Stakes at Saratoga. She will prove a valuable recruit to Mr. Roche's racing team, as she is engaged in all the great three-year-old filly stakes at Lexington, Louisville, Jerome Park, Coney Island, Monmouth and Saratoga.

The Dwyer Bros. always rise equal to the occasion. The breakdown of Rummynede and Onondaga left them practically unrepresented in the three-year-old stakes, but on Tuesday they purchased of Mr. A. Burham the black gelding Carley B, by Virgil—Ladylike, by Lexington, who will carry their red jacket in the Jerome Stakes at Jerome Park. The price is said to be \$6,000, but, as he is also engaged in the Breckenridge Stakes at Baltimore, and both events are very open, his success would return the Dwyers the purchase-money.

An amusing case of "diamond cut diamond" occurred at Sheepsh-head Bay on Saturday. Mr. Robinson's Little Fred won the selling race, and when, as is customary in selling races, the horse was offered at auction, the owner of Little Phil, who had run second, was found running the bidding up until Mr. Robinson had to bid \$1,600 to save his horse. He thereupon availed himself of the clause in Rule 53, and entering the weighing-room claimed Little Phil, by paying the latter's selling price and the amount of the purse—\$2,000.

King Alfred, the English stallion, was sold recently in England for \$125. He is a son of King Tom and a mare by Bay Middleton, and in Baron Rothschild's colors ran second to Blue Gown for the Derby in 1868. Some ten years later the success of Phaeton and King Ernest attracted the attention of Americans toward the merits of the sons of King Tom as sires, and a prominent American breeder negotiated for the purchase and importation of King Alfred, but through some misunderstanding the bargain was never consummated.

The announcement is made of the sale of Florae, the brood mare, by Mr. Seully to Mr. T. Berry, of Lexington, Ky. Florae is a bay mare, bred by Major B. G. Thomas in 1864, and is a daughter of Mickey Free (imp.), from Dixie

(dam of Herzog), by Sovereign; 2d dam St. Mary, by Hamlet; 3d dam Vamp (imp.), by Langar; 4th dam Wire, by Waxy. Florae is the dam of Warfield and Ella Warfield. With her Mr. Berry purchased her bay filly foal, by Thunderstorm (imp.).

Major B. G. Thomas has sold to W. Walker, the jockey, the bay colt Hassan. He is a two-year-old, by Lelaps, from Hazem, by Australian; 2d dam Ilira (the dam of Ilmyar), by Lexington. Hassan is a colt of a most racing-like cut, and won his first race at the present Louisville meeting, having the speed of the family.

Captain Cottrill has sold to Mr. V. L. Kirkham, of Nashville, Tenn., the chestnut gelding Mediator, 3 years, by Buckden—Mennness, by Brown Dick, after he had won the mile heat race at Louisville, on Tuesday, in 1:44—1:45. Price \$2,500.

Charles Sait, the noted steeplechase rider, has accepted the position of whipper-in to the Meadow Brook Hunt. Charles, as a horseman, has no superior, and his conquests on Deadhead and Derby are well remembered.

Messrs. J. N. Ackerman & Co. have purchased of Morris & Hatten the bay gelding Morgan Spy, 3 years, by John Morgan—Calomel, by Cauwell; 2d dam Dora, by Australian. He is a fairish sort of horse, possessing a good turn of speed, but does not fancy a distance.

The English horse Rosberry, who was the first horse to win the Cesarewitch and Cambridgeshire in the same season (1876), was sold recently to Mr. Vyner for \$2,000. He is a son of Speculum and Ladylike, by Newminster.

Mr. A. J. Cassatt has presented the chestnut filly Foxglove, 2 years, by Lever—Lady Way, by Eclipse; 2d dam Sprightly (Vulturino's dam), by Lexington, to his trainer, Mr. R. T. Pryor.

Track Government.

EDITOR BREEDER AND SPORTSMAN: I would like to assist you and all true friends of the turf in scoring the obnoxious and unprincipled few who unfortunately are to be seen on most of our tracks, and in devising some means if possible of ridding the sporting community of their disagreeable presence. Our State is yet young in her breeding and racing experience but is undoubtedly destined to take a leading place in the matter of thoroughbred horses and where the thoroughbred is once planted the trotter naturally follows. To insure first-class sport both runners and trotters should be in the hands of gentlemen. While I have not been identified with runners, I am free to admit that as a general thing they are in better hands than the trotters, and the gentlemen of the running turf are prompt to reform abuses whenever they appear. I think the trotting men will have to follow suit. Measures to do away with tricks and tricksters are what every lover of the turf should labor to promote. To my mind the dash plan of racing as adopted by the jockey clubs is a great assistance as it does away with the possibility of "putting up jobs" between heats and the execrable "helper" loses his vocation in a great measure. That alone is a great point gained in the direction of reform as the helper is a noisome nettle among the flowers. If he cannot be weeded out, brand; brand conspicuously. Let the gentlemen of this State interested in trotting and pacing organize an association and let at least each county be represented at the meetings. One meeting a year with good attendance would be sufficient, and it should be held at the conclusion of the last fall meeting. The presidents of the different associations could assist in bringing about such a mutual understanding as would be beneficial to all concerned. They would have the data fresh in their memories and all grievances, real or imaginary, could be properly adjusted and the pruning knife in skillful hands at this season would only leave the healthy plants for the next year. There is a great deal of loose accusation at all of our district fairs and race meetings, and there is a good chance for a smart manipulator, late from college, to run amuck at least for one year. He could hardly hope to succeed in repeating the business as a rule, but if rumor be credited this is the second season that two students from an Eastern institute have, as the gamins say: "got away with the cake." There should be some duly authorized association or board to meet immediately after the fairs and investigate all charges while they are fresh, publicly, without fear or favor. If an accusation be found true let the guilty party be promptly punished; if charges made are false let there be a public exoneration. It is true that many of these charges recklessly made have no foundation in fact and in such cases it is not only justice to the individual wrongfully accused that he have early hearing, but it is policy that cannot be gainsayed to dissipate as soon as possible a scandal that affects the integrity of the turf everywhere. In your columns last week you formulated an idea suggested by Mr. P. A. Finigan regarding judges. Mr. Editor, while I see nothing but excellence in that plan I go further. The judges are responsible to the public for the conduct of all persons on the grounds, the drivers and riders in particular. I would suggest that the different presidents, when they are competent to act, are the proper ones to judge the whole circuit, and there ought to be three to open and if possible close the small circuit in this State. With the same vigilant eye over every meeting, the manipulator would have to be cautious indeed, for it is seldom that tricks, be they ever so cleverly performed, do not become known soon after and generally in time to meet the trickster at the next town in the circuit. Three competent judges is what the circuit wants, or two beside the president of the one where the meeting is being held. I do not desire to trench on your patience or your space by elaborating the idea further at this time, but I have been brought to give the subject some thought by observing the spectacle of the smaller towns of a circuit at the mercy of a combination between conscienceless speculators and corrupt drivers.

COUNTY TOWNS.

NELLIE R AND HER ADMIRERS.—We have referred to this remarkable filly on several occasions, knowing that a great many of our readers feel an interest in her performance for several reasons, and among them: She is a Petaluma production, and is owned here; her sire and very many of her near relatives may be found in this county; and, lastly, from the time when she hauled a buggy, when three years old, in 3:00, without any training, this writer thought her to be the best filly in the State, and now, considering the limited amount of work and training she has received, he believes her to be the fastest living trotter! Certainly no other animal has trotted so fast with as little handling. All her training does not amount to as much as the Palo Alto colts receive by the time they are one year and a half old.—Petaluma Argus.

Name Claimed.

EDITOR BREEDER AND SPORTSMAN: Palo Alto claims the name General McDowell, for bay colt, large star, foaled February 7, 1881, by Norfolk, dam Boydana, by imported Knight of St. George.

F. W. COVEY.

Jay Eye See's Great Performance.

In view of the admirable qualities shown by Albert W. during the recent circuit we give the annexed account of the race won by his great rival Jay Eye See at the Chicago Driving Park on Sept. 23d.

The race was a special four-year-old stake race of \$2,250, in which, of the several entries only Bronze appeared to compete. At the July meeting of the Chicago Driving Park a race of extraordinary interest occurred between Bronze and Jay Eye See, in which the latter was beaten in the seventh heat by a bad send-off, Bronze being the winner of the race. There has been much talk of a match between Bronze and the Case colt, but they have not met since then until to-day, when both appeared on the track at the Horse Fair to start for the four-year-old prize. Other colts had been entered, but only Bronze and Jay Eye See started. Jay Eye See took the first heat in 2:22, winning without difficulty, but laid up in the second, which was won by Bronze in 2:29. In the third heat, however, it was determined to make a record. The Racine colt was in fine form, and the two preceding heats had only been preparatory work for him. The driver of Jay Eye See was told to cut loose, and did so, trotting the mile in 2:19, the colt going perfectly level up to within 50 feet of the wire, when he broke and was not again settled. It was so evident that he would have finished faster but for the break that the driver was told to make another trial. In the fourth heat the colt trotted without skip or hitch from wire to wire, and finished again in 2:19, again beating the record, the best four-year-old record of Trinket, 2:19. The pace was too hot for Bronze, who did little more than get inside the flag. Jay Eye See was sired by Dictator, a son of Rysdyk's Hambletonian, and his dam was Midnight, also the dam of Noon-tide, with a record of 2:20. Midnight's sire being Pilot Jr. Mr. Case, the owner of Jay Eye See, is a wealthy man, and is able to indulge in the luxury of owning the fastest and gamest four-year-old trotter in the world.

Jay Eye See and Bronze.

From an Eastern exchange we take the following rather "free color" sketch of the two famous four-year-olds of the eastern side of the mountains:

Jay Eye See was purchased in Kentucky, in April, 1880, from Col. Richard West, at Edge Hill farm, where he was bred, by Mr. J. I. Case of Racine, along with five other two-year-olds, all sired by Dictator, the full brother of the mighty Dexter. He was the last colt selected, as he was considered rather small. As before remarked, his sire was Dictator, dam by Pilot Jr. (Old Midnight) out of Twilight, by Lexington, out of Daylight, by Glencoe, out of a mare by Wagner, etc. Well, the thoroughbred lines come pretty direct here, certain. In Dictator we find the Hambletonian blood and the thoroughbred blood of American Star. To say the least, all the blood lines indicate speed. He is now 15½ hands, black and (what a pity) gelded. In his conformation, he is level and even, about the same height forward as behind. He has a clean cut, intelligent head, full eye, neatly-pointed nose, neck of fine proportions, a little longer than the average Hambletonian; his back straight, and smoothly coupled; a well-rounded barrel, slightly sloping rump, his quarters, stiles and gaskins, remarkably developed, give him a blocky appearance; in fact, when in road form, he is in the form of the handsome Ethan Allen Morgan Black Hawk. While he has powerful propelling powers, his almost brother in blood, Code, who is a much faster colt than he has shown, is rather of a light hamed horse.

Jay Eye See, in his jogs, has the nod of Maud S, Darby, Mazo-Manie, and many other celebrities, but he is as sound as a dollar, with the best of legs and feet, his tendons and muscles are cat-gut and case-hardened steel; in his disposition he is docile and tractable, and has always been a pet with Mr. Case and his family, as well as with his careful and painstaking driver, Mr. Bither. He wears no toe-weights, simply an eleven-ounce shoe forward and five-ounce behind, and has full free knee-action, Code differing here again as he carries a six-ounce toe-weight. Mr. Wallace may become interested in Jay Eye See, as he will here find a double cross to the pacing Pilots, a cross to the pacing Hambletonians. "Explain?" I will sometime; and he must admit a strong infusion of the thoroughbred, and yet no toe-weights to make him trot, no toe-weights to make him overcome the lack of knee-action, so claimed, for the thoroughbred.

Jay Eye See was taken to Wisconsin after his purchase, was hardly broken in the fall, being a two-year-old, and run out until April, 1881; his breaking was then completed, and inside of six weeks he trotted half a mile in 1:18. Mr. Case, who has watched the development of this colt carefully, ordered him out to grass at once. "I am afraid you will hurt him," he would often remark to Mr. Bither. He was taken up Oct. 1; in the last of the month trotted a half mile in 1:14, when Mr. Case requested "Ed" to stop his fast work and prepare him for his winter's jogging. He was jogged to the pole all winter beside Edwin B, went to the track May 23, and the first week in July trotted Mr. Case's half-mile track in 2:23, the last half in 1:06. No horse ever owned by Mr. Case, Gov. Sprague not excepted, had been able to equal this performance. We next find him here, and selling in pools: Bronze, \$50; Waiting, \$18; Jay Eye See, \$15; field, \$15. Of course those that knew did, and why not? And they would, but for the judges' stand. So you see they did not and I know how it is myself. Jay Eye See has been developed, and made a trotter by the careful watching and handling of Edward Bither, who has had excellent success in developing the colts of Mr. Case. "Ed" says, when he shows up Phallas, the five-year-old son of Dictator, and Betsy Trotwood, the people will begin to think that the Dictators are quite a trotting family. Phallas can beat 2:30 by several seconds at any time—has, in fact, recently. His favorites, however, are two colts by Gov. Sprague, that are "doing splendidly."

Dictator, who is so rapidly gaining the first place among the sons of Hambletonian, I saw in Kentucky last week. He is one of the highest finished and most blood-like sons of Hambletonian I ever saw. His full brother, Dexter, many of your readers have seen, and I can best describe him as being in the same perfect mould, only a size smaller. He has the pure, rapid, merry, easy gait of Dexter, which he has imparted to Jay Eye See, and most of his get. Dictator, Doble says, had as much speed as Dexter, but an accident compelled his retirement from the turf. The performance of Code and Jay Eye See will make him a greater favorite with breeders in Kentucky. Victoria, by Dictator, also owned by Mr. Case, with three weeks' handling on the track, trotted a slow half-mile track in 2:27, and 2:20 would have been no mark for her. She sprained her ankle, and was at once placed among the brood mares.

Well, I had better not enthuse over Bronze, for she is now the property of your Commissioner. For her I paid \$7,500, and I think in a race with the crack four-year-olds of the country, she would sell "even up." In the fifth heat, trotted

in 2:22, she was beaten a neck only. She is a beautiful bronze bay, 15½ hands high, very blood-like, and exquisitely formed. She is a Goldsmith Maid in type, only a size larger, and a little higher on the withers, giving a handsome finish. She went into this race sadly out of form, having lost a very easy race for her a week ago. Her gait is not high and showy, but she glides along with a well-measured pace, in a rapid, stealing manner that gets the best of a watch, instead of like too many high-actioned laboring horses that go so much slower than the watch. She has magnificent legs and feet, not a puff nor a pimple, and is of the improving sort. She wears a 12-ounce shoe forward, and 6-ounce behind. This will seem very remarkable when I state all I now know of her breeding. She was bred at the cross-roads town of Pleasant Valley, Switzerland county, Indiana, near the Ohio River, by a Mr. Hart, in August, 1881. When three she was ridden into North Vernon, and paced a half-mile to saddle in 1:17. Buck Dickerson then purchased her for \$175. Shortly after she paced in a race in 2:37, and Geo. N. Dickerson purchased her from his brother. In the fall she seemed inclined to trot, and he trotted her to a road wagon at the fair in 2:47. She ran out all last winter, and in February was placed in the hands of Thomas Dickerson, another brother, to be handled. She took at once kindly to trotting, and in May, at Marysville, Ky., could have won her race, and, if necessary, trotted in 2:23; she did show in the race 2:27. From there she can be followed through her campaign to Chicago. She has not only been carefully trained by Thomas, but another brother, Scott, who acted as groom.

Her breeding? Well, she was by Morrison's Morgan Messenger Jr., he by Curtis' Morgan Messenger, he by Green Mountain Morgan. Her dam will, in time, be fully traced, as well as the blood-lines of sires. Her sire, now dead, was a fast pacer, record 2:27, and has left a speedy progeny behind him. Now we find here a mare by a pacing horse, her dam a trotting mare, a natural pacer for three years, changing her gait without any of the appliances now used, toe-weights, etc. In form she knocks all the anatomical structure theories into a "cocked hat," for she is as clean-cut and handsomely turned as any model race or trotting horse. She will be heard from hereafter.

Eastern Colt Stake.

The Stake for three-year-olds trotted on the first day of the Breeders' meeting is thus described by the *Herald*:

With a good day and track the Trotting Horse Breeders' Association began their sixth annual meeting at the Gentleman's Driving Park yesterday. The attendance was good and among those present were General U. S. Grant, General F. B. Tracy, Mr. W. H. Vanderbilt, Captain Jake Vanderbilt, Joseph Harker, General W. T. Watkins, W. T. Mali, Edwin Thorne, Frank Work, T. C. Eastman, David and Robert Bonner, J. P. Wiser, J. W. Shaw, Charles Backman, Robert Steel, Alden Goldsmith, Shepherd Knapp, Phineas Jones, Colonel Fellows, H. M. Whitehead, Aden S. Swan, S. J. Morgan, H. C. McDowell and many other well known gentlemen. Although each of the three events which produced races were won in straight heats, they were all of great interest, as the horses were driven out for the purpose of obtaining as fast a record as possible. Alroy won the Nursery Stakes very easily and his record of 2:27½ is the best ever made by an Eastern bred colt. He is a bay with black points, of good appearance, with a fine, open gait, and is all over a trotter. Alroy was bred by General F. B. Tracy at Marshland Stud Farm, Owego, N. Y. and was broken and trained by Hendrickson, who drove him in the race. The judges were Mr. W. T. Mali, David Bonner and S. J. Morgan; Distance Judge, Jonathan Hawkins; Clerk of the Course, J. W. Gray, Secretary, L. D. Packer.

SUMMARY.

NATIONAL ASSOCIATION OF TROTTING HORSE BREEDERS, SIXTH ANNUAL MEETING, GENTLEMEN'S DRIVING PARK, MORRISANA, N. Y., October 3, 1882.—FIRST RACE.—The Annual Nursery Stakes for foals of 1879, to be trotted (when three years old) at the fall meeting of 1882; \$50 entrance, payable as follows: \$10 to accompany nomination May 1, 1880; \$15 additional July 1, 1882, and the remainder twenty days before the meeting, September 13, after which the whole becomes play or pay. Closed May 1, 1880, with 31 nominations, value \$365. F. B. Tracy named Alroy, by Peacemaker—Mason Girl, by Arabian Chief (Hendrickson). 1 C. Stanford named Victor Clay, by Victor Mohawk—Lady Clay (Van Patten and Murphy). 2ds

	Quarter.	Half.	Three-Quarters.	Time.
First heat.....	1:31	1:21	2:42	2:11½
Second heat.....	1:36½	1:12	1:50	2:27½

First heat. Thalia had made good her final deposit but was withdrawn owing to lameness. Alroy had the pole and drew out a length from Victor Clay on the first turn and they trotted thus to the half-mile, where Victor Clay made a skip and lost another length. Alroy led by two lengths to the three-quarter pole, after which he was eased and Victor Clay lapped him out under the wire.

Second heat. As it was known that Alroy was to be driven out Murphy was put up behind Victor Clay to try and save the colt being distanced. It was of no use, however, as Alroy went right away from him and was over six lengths in front as soon as they swung clear around the turn. Without skip or break Alroy completed his mile in 2:27½ and Victor Clay was run home from the point of rocks to save distance, but was shut out.

The Blood Horse Entries.

Entries to the open stakes and purses of the fall meeting of the Blood Horse Association closed last Tuesday. The nominations are as follows:

- No. 1. Night Hawk, Garfield, Premium, Forest King, May D, Jim Douglas, Jim Renwick, Joe Howell, Atlanta.
- No. 2. Judge McKinstry, Joe Dion, Lizzie Martin colt, Joe G. Bob, Patrol, Capt. Kidd, Hattie Ball.

John Nelson's Pedigree.

PORTLAND, Oregon, October 6, 1882.

EDITOR BREEDER AND SPORTSMAN: I see by your issue of the 30th ult that parties in your State are seeking to cast discredit upon the pedigree of the old sway-backed sorrel stud, John Nelson, the maternal grandsire of the wonderful trotting colt, Albert W. I should as soon think of questioning the pedigree of Norfolk or Lodi; not that Nelson was a thoroughbred horse like them, but because his pedigree was authenticated by affidavit made before the clerk of a court of record and duly attested.

John Nelson arrived from Panama some time in March, 1859, in company with a brown four-year-old called Blackleg, sired by Bigart's Rattler, of Saudy Hill, New York. The latter horse left no stock worthy of note, but Nelson bred well for the chance he had. He covered a few mares in 1859, at Star Ranch, a few miles out of Sacramento on the old Anburn road, where his owner, Edwin M. Pitcher, resided. Mr. Pitcher was a dairyman and ran milk wagons into Sacramento from 1852 to 1860. He died of pulmonary consumption along in May, 1860, and was mourned by a host of friends, for a kinder-hearted gentleman never breathed. If the old horse is alive he must be thirty-two years old, as I understood Mr. Pitcher to say he was nine years' old at the time of his arrival in the State.

The advertisement over the signature of John M. Daniels I wrote myself at Mr. Daniels' own request, and Mr. Pitcher was present. It was the last time he ever was in San Francisco. He had the certified pedigree of the horse in his possession at the time and from it I condensed the substance of the advertisement. Daniel C. Muir, now a resident of Olympia, W. T., was Nelson's groom at that time. Pat Hunt, now dead, was working him at the Pioneer track and drove him a mile one morning in 2:36. But that was alone and Nelson was such an excitable horse that he could not trot in company. My own belief is that any good level-headed trotter that could close up three heats in 2:40 could beat him for this reason.

Just prior to the appearance of this advertisement Pat Hunt came into the *Spirit of the Times* office and inserted a challenge which I also wrote at his request, offering to trot Nelson two-mile heats against any stallion in the State within two weeks. Werner's Rattler was up to that time the acknowledged champion stallion, and his owners, Fred Werner and Ewing M. Skaggs, were very indignant about it for this reason. Their horse had been given no work during the winter, while Nelson was hard in flesh and able to trot very fast. On the other hand it would have taken eight weeks to get Rattler into fix, and here was a big season at hand with forty mares at \$100 each. It certainly was taking snap judgment on them and they naturally felt angry at Hunt, as well as myself for writing out his banter.

On the day before the \$10,000 match at four-mile heats between Ashland and Langford, won by the latter, I met Mr. Werner in front of the Empire Market. He talked over the matter in a very gentlemanly way, though it was plain he felt hurt about it. He then authorized us to write out a challenge to which he signed his name, offering to trot Rattler against John Nelson or any other horse in California, two miles and repeat, for from \$2,500 to \$10,000 a side, at the option of the acceptor, the race to take place at Sacramento during the month of October following the season. This met no acceptance and, as Mr. Pitcher died the following week, the parties concluded that "the least said, the soonest mended." If you can find files of the *Sacramento Union* for May 1860, you will find the counter-challenge signed by Mr. Werner.

The attempt to cast a stigma upon the pedigree of John Nelson, at this late day, I can only regard as disgracefully pitiable. His get—Aurora, Nerea and others of less note—have proven his prepotency as a sire; and when they seek to cast a cloud on his pedigree they also attempt to smirch the good name of a dead man who was the soul of honesty and liberal to a fault. Ned Pitcher was not the man to stoop to such a coarse offence as obtaining money under false pretenses; nor would John Daniels have advertised any horse whose lineage would not bear strict scrutiny at the hands of critical judges. I do not know the owner of Albert W, but think he has a good horse and that after winning laurels on the turf he should not be defrauded of honors in the stud by the slanders of meanly-disposed men whose sole cause of grievance is malicious jealousy. Yours truly,

THOS. B. MERRY.

Dugald J. Bannatyne, the well-known turfman, last week commenced a suit in the Chancery Court at Trenton, N. J., to restrain the officers and agents of the Monmouth Park Racing Association from holding races upon its track or betting upon the premises. The complainant has been running his horses on the track at Long Branch for a number of years. Last winter he was fined \$100 by the Executive Committee for inducing a trainer to leave the service of J. B. Pryor, and paid the money under protest. He subsequently commenced suit to recover \$1,000 damages from Secretary Coster, which case was dismissed, the Court deciding that it had no jurisdiction. So persistent became his annoyances that last August he was ruled off the track.

The love of the ancient but illegal pastime of cock-fighting does not seem to have expired in New South Wales, although it has died a forced death in Melbourne. Only last week there was to have been a large main fought near Sydney, the parties thereto having chartered a special steamer for the trying ground, and taking with them some five dozen well-trained birds. Someone, however, had "split," and the bobbies, having followed on their track, spoiled the intended sport. Several of the backers of the gamecocks were known persons of social status.

Mexico Bill, the healthy and affable frontiersman, whose picturesque appearance attracts so much attention, last evening made a wager of \$10 against \$100 that "A man can not marry his widow's sister." When he found that a divorced wife is in law a widow, he drew his money.—*Stockton Herald*.

The longest bicycle club run on record was that recently made by five members of the Boston Bicycle Club. The party left Northboro, Mass., at 4:38 a. m. and passed through South Farmington, Natic, Dedham, Stoughton, Brockton, Quincy and Waltham and reached Boston at 9:30 p. m. The total time in running 102 miles was 14h. 34m.

Thoroughbreds.

EDITOR BREEDER AND SPORTSMAN: Again a week has passed and again "ye merry amateurs" went forth to seek ye short winged quail. This time the locality selected was the Sartoris Rancho near Petaluma, and the party consisted of five, embracing as usual C. D. L. of San Francisco, T. J. the great express agent, F. F. the champion masher and for heavy weights S. St. J. and Henry S. of the Petaluma mercantile fraternity; as for dogs there were only twenty-seven of all sizes, styles and breeds accompanying the party. The munitions of war presented a most formidable appearance and an inventory of them would almost fill a column. The most noteworthy and dangerous however was an instrument resembling a mitrailleuse, one small sized barrel, strongly resembling that which usually contains—bug poison, four kegs of powder and a small dry goods box full of cartridges. The usual Sunday-go-to-meeting Jimmy-go-slow-style, of a team was procured or rather purchased for about nineteen dollars and ye merry procession moved. The appearance of "ye gang" was that of the ideal border ruffians, in Beadle's celebrated dime novel story of "Ye Tiger Slayers" or the Howling Borealis of the North; and the musical intonations of the would-be songsters of the Petaluma Loring Club strongly reminded your correspondent of the harmonious discord engendered by a first class Chinese dramatic company; this interspersed at incorrect intervals with the yelping and howling of the mongrel thoroughbreds, raised the enthusiasm of the Petaluma denizens who were unfortunate enough to witness the scene to such an unwonted degree that their solitary guardian of the peace went off and got sick on the strength of it. At least it is so conjectured.

The scene of their would-be exploits, located eight miles from Petaluma, was reached in six hours and thirty minutes, the enormous exertion of this unequal time causing one of the horses to blush, and the other, a would-be thoroughbred (for he was sired by a male and damned by everybody) to lie down and die. This momentarily disconcerted the party, until it was explained by C. D. L. that he had given the horse about a teaspoonful of Petaluma whisky which at once satisfactorily explained the thoroughbred's untimely demise. The engorgement of "Quam whisky, damn, badm," being duly pronounced, the party proceeded to the fields for sport. Every bush and declivity for sixteen square miles was duly scoured, and the united result of these efforts proved to be four poor measly rabbits of the jackass species, one quail and four "mud-larks;" until St. J. arrived from the next ranch with sixteen poor and sickly looking quail that evidently had been trapped for over a month and looking as though they had been imported from St. Johnsbury, Vermont. This the gentleman stoutly and most positively denied, still the credulity of the party was but little strengthened by the advent of another hunter of the proverbial "Sunday-Dutchman-style." This Nimrod had a "dogg, and he was a pinter, he was shust peat any dogg vat never vas, and could relieve everyting." When placed on exhibition the thoroughbred (?) was pronounced a perfect specimen of the "Sooner" breed, and upon a small stick being thrown about ten feet by his owner, the "dogg" with well-drawn tail, shunk between his master's legs, which so exasperated the exile from Germany that he grabbed the poor brute by the ears and tail and proceeded to annihilate him. This proceeding was promptly stopped by the spectators, for it was learned that the Dutchman was no other than a celebrated (?) dog trainer from the Mission. After the usual feast of reason, wit and whisky, the party returned with elevated spirits to Petaluma, where the customary petro appendages were engaged in and continued on the train home, which was reached in the usual condition of tired, dusty and hungry. More anon. Yours,

ONIX.

Making a Horse Win.

A reporter met a jockey of Rutherford while dining at the Winter Palace in St. Petersburg a short time after that huge sporting wrangle, and in the course of a conversation on turf matters the astute prodler of horse-flesh said with a child-like and ingenious smile:

"Would you like to know the dead inside facts as to how that race was won?"

"Why, you rode the best horse, didn't you?" we asked.

"Not a bit of it," replied the jockey, with a grin. The fact was that Rutherford was only about the fourth choice, and was not rated at more than eighth or ninth in the pools. True Blue, Katy Pease and Thad Stevens all had the call over Ruthy. But it happened that my horse was a 'bolter,' and to steady him and prevent his flying the track, I put blinders and goggles on him. You noticed them, I suppose."

"There were two horses rigged that way," we replied.

"Exactly. Stevens was a nervous critter, also, and as soon as his trainer saw how the goggles steadied my horse, he put 'em on Thad, too. The day before the race a big idea occurred to me. I got a couple of pairs of magnifying lenses and quietly put 'em in place of the plain glasses in the goggles of both horses. Catch on to the idea?"

"Well, partly."

"The only difference was that in Stevens' bridle I fastened the glasses with the bulge inside, so as to make them diminishing glasses. Don't you see?"

"Like looking through the wrong end of an opera-glass, eh?"

"Exactly. The result was that while Rutherford was encouraged all the way by the course seeming only 200 yards long, the quarter flags appeared ten miles apart to Stevens. You see a horse can be discouraged as well as a man."

"Great scheme, that."

"Well, I should smile. Ruthy thought he was in for a little quarter race, and it kept up his heart, so that when he had nearly done the last mile and swung into the home stretch, and I called on him to let out his last link, he thought the judges' stand was right under his nose, so he came home like an express train on a down grade; but Stevens, who thought he had about fifteen miles further to go, went all to pieces, as you remember, and almost lay down on the track, he was so mentally caved in, as it were."

HERD AND SWINE.

Shorthorn Reform

"Whom the gods would destroy, they first make mad." I am unwilling to believe that "the gods" or any one else (unless, indeed, it be T. L. M.) have fully made up their minds to destroy the Shorthorn race of cattle. Nevertheless, as a breeder of Shorthorns and an admirer of them in their better forms, it is a source of constant misgiving to me to observe the prevalence of a mental epidemic which, in the opinion of many thoughtful men, threatens the future of the breed. Any system of breeding which annually turns out as many long-legged, light-fleshed, unthrifty cattle as may be found among the Shorthorns of the present day is radically defective. Any plan of breeding which yearly sends forth large numbers of such deficient cattle to our Western plains and scatters them broadcast all through our great agricultural regions needs to be thoroughly revolutionized and reformed, if the breed is to be saved from ultimate ruin. These libels upon the Shorthorn race are expected to maintain its high reputation and character as a beef-producing breed; but having been bred for fashion instead of beef, they fail to produce satisfactory results when placed alongside the more sensibly-bred Angus and Herefords. I cannot believe that a solitary man, among all those engaged in turning out these "pure" or "fancy-bred" cattle is willfully endeavoring to bring disgrace upon the Shorthorn name. On the contrary, every such person within the range of my acquaintance sincerely believes that he is battling for the purest (and therefore (?) best) Shorthorns on top of earth. If such men actually believe they have the best and urge all breeders to head their herds with line-bred bulls, regardless of merit, for one I must say they certainly are mad—blind to the highest and best interests of the Shorthorn breed. They talk of "strong" breeding and prepotency, which is all well enough when it means the power to transmit a fine carcass of beef; but when it means (as is too often the case) a certainty of transmitting light, airy, racehorse attributes, how can a man, who expects to face the other beef breeds, put such a bull upon his herd? The prevailing habit of buying breeding bulls solely upon the alleged reputation of their gr. gr. gr. grandsires and grandams, instead of examining the animal itself and its more immediate ancestors, is working the ruin of many of our noblest herds. I would not, by any means, condemn all that is of fashionable descent. Such a sire as the 4,500 guinea Duke of Connaught, owned by Lord Fitzhardinge, is fit to head any herd of cattle extant; but because this is so, it does not necessarily follow that every bull of the six Bates and various Bell-Bates tribes, in any way connected with the English Duke, is a proper bull to breed from. If the fashionably-bred relative is possessed of good beef points the case is of course altered.

We have too many "tribes" among our Shorthorns. The word "family" should be made to take a "back seat" in the Shorthorn vocabulary. It has stood out in bold, full-faced letters long enough; too long, in fact, for our own good. The same error is likely to be committed by the breeders of other cattle. The rage is running rampant through the Jersey camp; and Angus breeders are already talking glibly of their Prides, Ericas, etc., thus nurturing an aristocracy of blood rather than of pounds avoirdupois of profitable beef, which may some day, unless handled with care, react injuriously upon the breed.

The question of the future beef supply is one of almost boundless possibilities. The breed which at the fat-stock shows and shambles gives the best returns, is the breed of the future. There are some among those engaged in breeding Shorthorns who select their sires for the beef they carry, and for the beef known to have been possessed by their immediate ancestors. Such men have nothing to fear from any other breed known to cattle men. There is yet plenty of good material out of which to work the salvation of the Shorthorn, but it must be carefully husbanded, and kept free from crosses likely to impair its future usefulness. Shorthorn herds in which heavy flesh (rather than fashion and fine style) has been the controlling principle, will in the near future become mines of wealth to their fortunate owners. Such herds have a great and important mission to perform—the rescuing of the noblest race of cattle that ever trod our pastures from utter annihilation. I believe a revolution is coming in the business of breeding Shorthorns. I am confident there are many men of sufficient intelligence in the business to perceive it, and provide for its certain coming. This will consist in a return to first principles, and an adoption of the methods by which the Herefords and Anguses have been raised to their present high position—the methods by which the Shorthorn originally attained its surpassing excellence.

The war of the races is certain to go on. Ignorance, superstition and prejudice are gradually being overcome by reason and intelligence, even unto the uttermost ends of the earth. The breeders of Shorthorns will ultimately realize that they are not exempt from the operation of the great principle of "the survival of the fittest." If they so breed their cattle as to render them inferior to their powerful rivals, like Othello, they will soon find their occupation gone. Occasional show-yard triumphs will not save them. The rank and file of the breed is where the improvement is most needed.—*W. In the Breeder's Gazette.*

Cattle Breeding and Farming.

The husbandman who follows mixed farming has more or less to do with cattle. It is a very profitable branch of agriculture where the farmer is prepared to attend to it, but like every other business, needs it. The farmer who takes hold of cattle for profit, should have:

1. Good and early pastures.
2. Good water.
3. Comfortable stock barns, and should purchase no stock that travels under the euphonious names of "scrub," "knob goats," etc. Blood will tell in nothing quicker nor to better profit than in cattle. High grade cattle, or at least those animals that show marks of some good blood, are the only ones I have reference to now. "Scrubs," no doubt, have their value and their charms, but it requires a man who has had more experience with them than I have had to point out where the profit comes in. They are hairy, but possess none of those points set down in the "scale of points for cattle" adopted by the Shorthorn and Jersey Clubs of the United States.

For the benefit of those who have had less experience than myself, I will mention a few points by which well-bred animals may be recognized:

1. A small head and broad, dish face.
2. Small horns and ears.
3. Straight back and wide across the hips.
4. Fine hair and small bone.
5. Nine times out of ten an animal having any pure blood in its veins will have a large, quiet eye, and will be gentle in disposition. A wild, vicious look out of the eye indicates a

poor feeder the world over, just as it is conclusive evidence of mongrel blood.

Much has been written about the best breed of cattle for the farmer, and the verdict has been made in favor of the Shorthorn. They mature earlier, lay on fat faster and on less food, and, it is claimed, have less offal and waste to their weight than any other breed in our reach. If this is true—and there is no doubt of it—the Shorthorns should have a representative on every farm in the United States where cattle are to be found. Most of the Shorthorn families combine fine milking qualities with their other excellences. A Shorthorn male put upon a common cow will invariably produce a good feeder; no breed impresses its good points so unmistakably on the first cross as this one. For five years past I have had access to a high cast Shorthorn bull, and have tested the matter of superiority between his offspring and the offspring of another bull of good make, but common blood. The difference was so much in favor of Shorthorn that steers of the same age brought one-third and sometimes one-half more when put on the market, after having been fed on the same feed in quality and quantity, and grazed in the same pastures.

Now for an item from my own experience to prove that good grade cattle are profitable even when loosely handled. Last fall I purchased thirteen calves at an average of \$9 15. They were yearlings. The winter was mild, though provender was high. I sold my timothy hay, that I had intended to feed my calves, at \$1 and \$1 25 per hundred, and turned my calves into a fifty acre wheat field, housing them every night and every day that the weather was inclement or gave promise of being so. They ate during the time they were housed two-thirds of a stack of timothy, which was worth \$25. That was all. In the spring I turned them to clover, and the middle of August sold them at \$27 50 per head.

This is given as an example of what may be done in one branch of the business. Those desiring to raise Shorthorns or Jerseys for pleasure or profit should buy from none but reliable dealers of long standing, and no farmer should use any but a thoroughbred bull.—*The Farming World.*

The Fat Stock Show.

Of this annual exhibition which will open to the public at the Exposition building, Chicago, on the 16th of November, and the contest for supremacy between rival breeds of cattle, the Illinois correspondent of the *Country Gentleman* has this to say:

"The contest for the supremacy between the Shorthorn and the Hereford breeders, which has been a marked, if not always a pleasant phase of the four previous fat stock shows, is likely to be considerably intensified this year, both parties leaving the last meeting with a resolution of carrying all before them in 1882. Mr. Gillette, whose out-door fed grade Shorthorn steers have contributed much to the shows of former years, has become a competitor in the line of stall-feeding. His stall-fed animals are likely to produce as great a sensation as his rough steers four years ago. Then there is the question whether the prizes will be awarded to the fattest bullock, or whether to the one, regardless of weight and size, which will cut up into the largest quantities of butcher's meat. Last year there was a division on that question, one committee deciding one way and another the other. But it is likely that new competitors will appear for the first time, among which are the Black Polled Angus cattle for which a demand has been developed within a year or two. For a year or two breeding specimens of the Black Angus cattle have been seen at most of the large western fairs, but no grade or full-blood steers, for the reason they were not in the country. But fair representations of what these steers may become at two or three years old are likely to be entered for competition at Chicago. There is no doubt that the day for extra fat and heavy steers has passed for some time to come, for even now 1,200 pound steers fetch better prices than those weighing 1,600 pounds, where both are of the same quality. Since the Polled Angus met the changed taste of the public, the desire to see fine specimens of them will be nearly universal.

BUTTER COWS.—The agricultural papers are teeming with reports of large yields of butter, chiefly from cows of Jersey blood, indicating the strong interest which the subject of improved stock of this kind has obtained upon the agricultural community. In breeding for useful qualities the claim that "blood tells" in cows as well as in other branches of breeding has recently received a forcible demonstration in the case of the young cow Boniba, 10,330, that last summer accomplished a two months' (62 days) test in which she gave for the first month 89 pounds 14 ounces and for the second 84 pounds 5 ounces of thoroughly worked butter, weighed before salting. She is less than four years old, has had two calves, and after being four months in milk is reported to be still making 2½ pounds of butter a day. As the yield exceeds any heretofore reported of so young a cow, her owner, Mr. A. B. Darling, has addressed a request to the Directors of the American Jersey Cattle Club for the appointment of a disinterested committee to inspect a special test of the cow. She is the result of a peculiarly strong combination of the blood of other great butter cows. Beginning back four generations with Colonel Hoe's Alpha, whose incomplete tests uniformly indicated over 20 pounds a week, her pedigree takes in Europa, that made over 15 pounds a week; Eurotas, that made 778 pounds in a year; imported Violet, whose partial tests were equivalent to nearly 20 pounds a week; and also derives the English Rieter blood, which was the crowning success of forty years, careful breeding from tested cows by Mr. Phillip Danneoy, of Horwood, England, whose dairy for years supplied the Queen's table, and whose stock, descended from his bull Rieter, had brought by far the highest auction prices reached in England long before Eurotas and other great butter cows had demonstrated its value in this country. By such methods of breeding for a direct purpose as Boniba illustrates American breeders expect to gradually establish a fixed quality, confirmed by generations of special merit, that will transmit useful results, and raise Jersey from her average standing as a merely ornamental cow to one of unsurpassed value in her speciality. *N. Y. World.*

An English authority states that, in the management and breeding of cattle of valuable pedigree, economy of rearing is not much studied, the object being to obtain a well-grown animal irrespective of cost. Ample box and yard accommodation is provided, and the calves run with their dams in the pastures in fine weather or are kept in boxes and turned with them for half an hour several times a day. The calves are early taught to eat linseed cake and bean meal with hay or grass and cut roots. They are weaned at from six to eight months old and in winter are kept in yards partially covered, and fed with hay or chopped grass and pulped or utroots, with three or four pounds daily of linseed cake or her similar extra food. In the following summer they are on the pastures, shelter against sun and rain being ac-

cessible to them, and extra food provided if the pastures be scanty. Exercise is very necessary for the healthy development of young animals intended for breeding purposes. Valuable heifers were formerly rarely bred from until they were three years old. Many are now served to produce the first calf at two and a half years old. Where well kept they are more sure breeders and likely to prove better milkers, when breeding thus early, than if allowed to get too fat before having their first calves.

Tuberculosis in Cattle.

The extent to which this malignant malady prevails has not been fully recognized by live-stock men in different sections of the country, and owing to its insidious nature, as well as the length of time that an animal will often survive an attack, its ravages have ever been overlooked, or ascribed to other causes. But the rapid strides which it has made of late years, and the hold that it has gained, even on our pure-bred stock, renders it, says Professor Whalley, one of the most important questions affecting the well-being of the bovine species. In fact, it ranks among the few great scourges of the land, and though our losses, thus far, have been largely due to other plagues, which sweep their victims off in a summary manner, yet the effects of this disease can only be realized, as he further observes, when we take into account the vast deterioration, the slow but certain decimation of many of our best herds, the destruction of a large portion of our animal supplies, and the danger to human life, which can no longer be considered chimerical.

That neat stock have a strong tubercular diathesis, as shown by their ready tendency to take on this disease, no well-informed veterinarian will deny; and, accordingly, we find that cattle are far more frequently affected than any other domestic animals. The temperament and physical conformation undoubtedly contribute much in this direction; for animals of a phlegmatic type, with an attenuated form, long limbs, and narrow chest, are usually the first victims of the malady. Breeders should, therefore, strive to avoid the possibility of transmitting such diseased qualities. It is found less frequently in oxen than in cows, especially those that have been kept in dairies for any length of time; hence, lactation is supposed to be a predisposing cause.

The cold, damp sheds, the dark, underground stables, and other ill-ventilated abodes, as well as the character of the food, all conspire to rekindle those constitutional taints into morbid activity. If we inquire further into the cause of this increased susceptibility to the infection, as seen more especially in certain strains of pure-bred stock, we shall find that heredity and multiplied consanguinity play no subordinate part. Any physical weakness which the sire or dam may possess is liable to be transmitted to the immediate progeny; but if one generation escapes, the trouble may appear in the next, in accordance with the well established principle of atavism. In fact, diseased conditions are inherited, and we believe that there is no predisposing cause which exercises such a potent influence in the production of this malady as the pernicious system of in-and-in breeding. Thus, from parent to offspring, from one generation to another, we often see this fatal tendency transmitted in unbroken succession; and the more complicated the relationship becomes, the greater is the virulence of the resulting product. In spite, therefore, of the many palpable examples of this broken law, some breeders still pursue, year by year, the suicidal policy of clinging to one strain, regardless of the impending consequence.

This constitutional taint, according to Professor Cohnheim, has nothing to do with the facility for receiving the tubercular virus, but is a product of the existing malady. Animals, therefore, possessing this habit of body, are not more disposed to take on the disease than others, for they are already infected. Consequently, all such individuals having a tubercular diathesis, have contracted the disease in early life, or have received the morbid germs by hereditary transmission.

The contagious nature of tuberculosis, as shown by recent experiments on animals, alluded to in the July number of the *Journal* can no longer be doubted; and it is now conceded by comparative pathologists that the bovine form of this disease is identical with that of man. Accordingly, there is great liability of its transmission, either by inoculation or ingestion. The extension of this malady, therefore, by cohabitation, is always liable to occur when animals are so arranged that the sick and healthy ones can get their heads together, or feed from the same manger. The hay may thus become contaminated, and the infection take place through the digestive organs. Dr. Grad's observations on the spread of this disease by contaminated stalls, are very conclusive, as he had found that cows had become infected, and had died, one after another, from being confined in the same inclosure, without the apartment having been sufficiently renovated and cleaned. Hence, farmers cannot be too careful in guarding against such exposures, which are always liable to occur in our large dairies.

The expired air of one of these affected animals is not unfrequently so laden with virulent matter, especially in the advanced stages, that it is not safe for another creature to inhale it. This mode of transmission, by the lungs, which was first suggested by Dr. Morgagni, of Italy, more than a hundred years ago, and has found many advocates among physicians and veterinarians, has now been confirmed by the experiments of Dr. Tappeiner, of Meran, in causing animals to inhale the fine particles of tubercular matter from the air of a room in which the virus had been evaporated by a steam atomizer. This experiment was very successful, as nearly all of them showed well-marked military tubercles in both lungs on being killed, thus demonstrating, in a very satisfactory manner, that the disease is contagious by the breath.

The investigations that Dr. Kock, of Germany, has undertaken, are well calculated to arouse public attention, and possibly throw a new light on the subject. But it is not opportune on this occasion to discuss the merits of his alleged discoveries, which have already been widely published; and therefore suffice it to say, that we shall hail with pleasure any advancement of science in this direction.

The nature of this widespread and destructive malady has now been sufficiently set forth, in all of its pathological bearings, to awaken the desired interest among live-stock men that the subject demands. In fact, this disease is already a national calamity; but in the absence of statistics it will be impossible to estimate, with any degree of accuracy, the enormous extent to which it prevails among our dairy stock. If our calculations, however, even be based upon the inspectors' reports of Italy, Bavaria, and other German States, we must conclude that five percent., at least, are affected, and with every facility for rapid increase. In certain districts, as we are assured by able veterinarians, thirty per cent. of the cattle suffer from tuberculosis, and with many high-priced herds this scourge yearly claims its victims.

The supervision of this affection, in a sanitary point of view, will call for the therefore mature deliberation of the advocates of the profession to devise some measures in behalf of the

public welfare that will protect our tables, control this in easing traffic in consumptive beef, and eventually eradicate this disease, like pleuro-pneumonia, from the land.—*National Live Stock Journal*.

The Duchesses.

The tradition that the Duchesses descend from stock kept in the possession of the Duke of Northumberland's family for two hundred years, may be for the present put aside. I have not seen any late refutation of the late Mr. Storer's argument against it. The existence of such a tradition, however, may be taken for what it is worth, as suggestive of a probability that antecedent to the pedigree beginning with James Brown's Red Bull, the ancestors of the Duchesses were for many years select and superior cattle.

James Brown's Red Bull (or Old Red Bull) 97 in the Herd-book, has no date of birth recorded in his entry. He was bred by Mr. John Thoupson, of Gillington Hall, and his sire was Mr. William Barker's bull, 51, his dam not mentioned. Barker's bull, of the early Shorthorn yellow-red and white color, was by Lakeland's son of the Studley Bull 626; so that James Brown's Old Red Bull, the first recorded sire of the Duchesses, was a great-grandson of the Studley Bull, the earliest Shorthorn sire on record of which we read. Allen's "History," page 28, tells us: "He was calved in 1737, and of the Barningham (Milbank) stock, which came from Studley in Yorkshire, where they had existed for many years. He is described by one who often saw him as having possessed wonderful girth, and depth of fore-quarters, very short legs, a neat frame, and light offal." The Herd-book only says: "Red-and-white, bred by Mr. Sharter, of Chilton." None of the dams of these early bulls are named, so that we can trace the pedigree only in the male line direct. Whatever we may think in these days, it is evident that the old breeders thought much of the sire, and, when George Coates went about collecting materials for the first volume of the Herd-book, they could more readily supply to him particulars of the male than of the female lines of breeding.

Mr. Charles Colling is said to have obtained his first Duchess cow, known as the "Stanwick Duchess," or "Stanwick Cow," by James Brown's Red Bull, in 1784. Assuming the correctness of the dates given, and assuming also that no generation has slipped out of notice, we must be struck by the length of time between the birth of the Studley Bull and Mr. Colling's purchase of the Stanwick cow—the Studley Bull's great-grand-daughter—47 years. This is quite possible, and, if correct, shows that the early Shorthorns lived and bred to good old age. Allowing the odd seven years for the age (which I do not remember to have seen stated) of the Stanwick Duchess when Mr. Charles Colling bought her, we have an average of ten years between parent and offspring, all through.

The Stanwick Duchess was mated with Hubback 319, who had exactly the same length of descent from the Studley Bull, in male line, direct, as the Stanwick Duchess had by her sire. They were both fourth in descent from the Studley Bull. The excellence of her offspring by Hubback attracted the notice of Mr. Bates, who, in or about 1804, purchased from Mr. Charles Colling her grand-daughter, Duchess by Daisy Bull 186, dam by Favorite 252. In this cow there was a compound of the strains of Mr. Charles Colling's Old Daisy and Mr. Maynard's cow Favorite or Lady Maynard (of whom the bull Favorite was an imbred descendant) with the Hubback blood, which indeed was included in that of the Daisy and Favorite families.

Duchess by Daisy Bull did not leave any female offspring in Mr. Bates' herd (which at that time was at Halton Castle, not at Kirkclevington), but before Mr. Bates bought her she had produced a heifer in the Ketton herd, and this daughter, breeding to Comet 155 (the son of the bull Favorite, out of the same bull Favorite's own daughter, who was, moreover, out of the same Favorite's mother), gave birth to the heifer purchased by Mr. Bates at Mr. Charles Colling's sale in 1810, then named Young Duchess, afterwards Duchess 1st, from whom the "Duchesses" are lineally descended.—*Wm. Housman, in English Live-Stock Journal*.

Fancy Prices of Breeders.

What are high prices for breeding animals? The question is one which will bear some consideration, since a misunderstanding of this point may, and certainly has, cost breeders much money, care and labor. There were to-day hundreds of cattle in the market for which three cents per pound on foot was the best price which could be coaxed from the buyers, and the stock was dear at that figure. There were at the same time sales of cattle at six and one-half cents; and there was less difficulty about getting the last mentioned figure than in securing the lower price for the inferior stock. Yet it is safe to assert, that up to the time the cattle were placed in the market there was not near fifty per cent. difference between the cost of the two classes of stock. The scrubs had eaten more than one-half as much as had the well-bred ones; they had required as many months of shelter and labor; they had occupied as many sheds, or stalls, or as much space at the feed trough; and they had had the interest of the capital invested in them at least as long as had the better bred animals. The cost of marketing the scrubs exceeded that of selling the better stock; for the commission, feed bills, and yard charges were based upon the number sold, and not upon the sum received by the consignor—in short, all the expenses attending the marketing of a scrub worth \$25 are, excepting the single item of freight, as great as those necessary to the marketing of a bullock worth \$125; and even in the matter of freight the difference in cost is but slight.

We cannot honestly claim that all this difference is due to a difference in the breeding of the stock, for there can be no doubt that much has come from the different treatment given by those who owned them, but it would probably be true in this as in most other cases, that "the bull was half the herd." The fact is too generally admitted to need reassertion here, that the cattle got by a pure-bred sire, of one of the approved beef breeds, will make more and better beef in two years than the scrub native will make in four years, with like care and fully double the quantity of food. In the production of milk the influence of good blood is even more necessary than in growing beef, for a poor milk producer is a constant drain upon the purse of her owner. A cow which will yield two hundred pounds of butter per year is worth more than twice as much each year as the one which can give but half that quantity, since the cost of feeding a good cow is no more than that of feeding an inferior scrub. The scrub will require as much space, care, food and labor as will the best cow in the herd. The calf of a pure-bred animal will bring as much money as can be got for four or five calves from scrubs. If we multiply this difference in value of individuals by the number of the progeny they may reasonably be expected to produce, and in the case of cows by the number of years they will probably be in service, we will arrive

at something near their real value; and this will be found to exceed what are termed "fancy prices." The influence of good blood, under proper management, grows and spreads so rapidly and widely that its value is almost incalculable.—*The Breeder's Gazette*.

THE PADDOCK.

The Profits on Fine Draft Horses.

David Stuart, of Lakeville, ascertained at an early day that it would pay to raise large horses and acted upon that information. He was among the first to breed to the Duke de Chartres and has sold his colts while young for more than he could get for aged horses of the common herd. Prince Charlie, however, was his ideal of a draft colt, and he resolved to keep him till he could tell what kind of a horse he would make. He brought Charlie to the Petaluma Fair last year and exhibited him as a three-year-old. He was surprised that Charlie got left; so in order to find out whether the colt really had merit—or whether he was blinded by his love for Charlie—he concluded that the judges of horses in other places should pass upon him. So Charlie was taken to the State Fair, to the Oakland Fair, the Stockton Fair and to the Fair at San Jose, where the colt was exhibited in the three-year-old draft class and walked away with the first premium at each of these fairs. His owner felt better and was more than ever determined to keep him. But others wanted Charlie and they bid up on him till day before yesterday, when an offer of \$1,800, cash, was more than Mr. Stuart could refuse. Well, Charlie will leave us, but Mr. Stuart has more young Dukes and will soon have another four-year-old to sell for \$1,800. The demand for these big Normans is increasing, and it is every day becoming better known that Petaluma is the place to find them. At two and three years of age a Duke colt will bring \$250 to \$300. It will cost just as much to raise a three-year-old steer, or plug horse, which will only bring \$50 to \$75. It will be seen at a glance that the profits on the big Norman are out of all proportion with the profits on the plug.—*Petaluma Argus*.

Management of the Stallion after the Season.

The condition of the stallion for the next season's business will depend largely upon the manner in which he is kept from the close of the present one until the next season commences. In most cases the period from the first of October to the first of March is one in which the stallion is not called upon to do duty in the stud, and usually but little is done after July 1st. It is a period of rest, of recuperation from the drain upon the functions of the sexual organs which service in the stud has required, but it should not be a season of pampered and overfed indolence, as is too often the case. When it is convenient to do so, the very best thing to do is to work him right along, as though you intended that he should earn his living. This we are satisfied from experience is the best treatment for stallions of any breed, and will result not only in bringing the horses to the beginning of the next season in better condition than any other, but the probabilities are that horses so treated will get more and better foals than one that is not worked during this period.

But in very many cases, and especially in large breeding establishments, and with thoroughbred stallions, the course recommended above is practically out of the question. The next best thing, then, if the horse must perforce remain in comparative idleness during the period mentioned, is to provide him with a large pad dock—the larger the better always—and let him have the run of it at all times, during pleasant weather, stabling him regularly; the utmost attention must be paid to his bowels lest he should become constipated—a condition that can usually be prevented, or remedied, should it occur, by the use of an occasional bran mash.

The necessity for this change in diet from grain to coarse and bulky food, like hay or corn fodder, is increased in proportion to the confinement to which the horse must be subjected. There is nothing that will so soon destroy the health and vigor of the horse, and especially of his genital organs, as close confinement and high feeding; and the man who expects to keep his horse in show condition the year around will find that he has undertaken a difficult job. It will work in some cases for a year or two; but like constant indulgence in intoxicating liquors in man, it will, in the end, sap the strongest constitution.—*Breeder's Gazette*.

Stalls for Harness Horses.

The soundness and suppleness of the harness horse depends very largely upon his stall treatment and accommodations. Casual thought would conclude that the abuse of the horse consists in over work, undue exposure, and insufficient food. But equally destructive with either one of the agencies is his stall mismanagement.

Prominent among these abuses is the excessive inclination of the stall. In order to have rapid drainage, the grade of the stall is made so steep that frequently the horse is made very tired, by practically thus standing up-hill, while he should under more favorable circumstances be resting. The weight of the carcass is thereby thrown largely upon the hind quarters, and the result is sometimes weakness, if not soreness over the loins, and probably with equal frequency, either wind galls, enlarged flexors, swollen ankles, or incipient occult curbs and spavins. This is a very unnatural standing position of the horse in a state of freedom. Whether protecting himself from the storm, or standing still after being satisfied with grazing, he invariably either chooses level ground or a position slightly descending, in which the forehanded portion of the carcass is appreciably lower than the hips. The physiological reason of this position is manifest upon careful examination. The office of the front feet and limbs while in motion is largely to sustain the body, to prevent it falling headlong, while the hind limbs and feet propel it forward. In a state of rest, therefore, it follows that the burden of the weight can be more comfortably sustained by the front limbs and feet. When the body is pitched at the reverse inclination by the steep grade of the stall, the horse frequently shifts the weight from one hind limb to the other, in such a manner as to indicate his discomfort. If he must stand in a narrow stall, it should be made more nearly level, and the activity of the groom be aroused to keep it scrupulously clean.

The twin cruelty of its steep grade is its narrow dimensions. In many instances it is so confined that the horse cannot lie down without striking the caps of his hips in the act of lying down. Even if he escapes the sides of the stall, and shows no bare spots on his hips, the stall is so cramped that he can never stretch out his limbs in restful comfort, but is compelled to draw them up under his body. The luxury of a full length extension of the limbs is not the only comfort thereby prevented. The horse is not only robbed of this very restful position, but his legs are constantly

cramped, frequently disfigured with arm boils, caused by the pressure of the heel calkins against the posterior portion of the fore-arm, and the body has not the requisite space to bear its weight upon the ample cushion of the muscles, which in the dumb brute creation, as in man, is Nature's method of satisfactory repose. Even when standing up, the frequency with which he protests against the narrow confines of his imprisonment by violently kicking against the sides of the stall and the equal frequency with which he becomes a crib-biter show the positive injuries of narrow stalls. Nearly akin to these tortures of the narrow stall is the necessity of keeping the horse tied short by the head. This barbarity is practiced in livery stables to such an extent that, quite often, the horse is not able to rest even his head at length upon the floor. It is no unusual sight to see horses in crowded stables reclining at night with the poll of the head on the floor, while the month and lower portion of the face are raised by the short halter strap several inches above the ground. Many observers have wondered at the wakefulness of such horses at all hours of the night. But when the tortures to which they are thus subjected are humanely considered, the surprise is greater that they manage so well to sleep, and measurably to preserve their health and strength.—*Live Stock Journal*.

Competition Between Draft Horses.

An English writer thus discourses in the *Chicago Live Stock Journal* on draft horses and the modes of selection:

I notice that the different breeds of heavy draft horses are placed in competition at many of the fairs in the United States. With us, here in England, such a competition would be simply useless, for more than one reason. The established breeds here have fitted into their places like round and square pegs into round and square holes, and the only actual rivalry existing here is in respect of the Shire-bred and Clydesdale breeds in town. So far as the show yard is concerned, it would be worse than useless to pit breed against breed, for the judges are all partisans, and so, to a great extent, are the users. In the United States neither of the three British breeds of draft horses are established, and what they will have to do is, to displace the French horses on the score of actual merit. I am presuming that heavy European horses are as yet practically unknown in American cities, where the French horses have hitherto been the only animals of the kind in general use. There should be some sort of actual trial provided. The old snail hag arrangement died out in Suffolk before my time. For my own part I believe staunchness to be as hereditary as sidebones, and yet nobody now thinks of stipulating that a stallion should be a "good drawer," as in the good old times. Good and fast walking is another all-important point in connection with the usefulness of a town draft horse. These practical matters are more likely to be brought to the front in the United States than they are here, where things run in one groove for generations, and all "innovations" are resisted as radical notions, tending to undermine the constitution of the country. Why should not an entire horse be put to a trial of strength, courage and endurance? Are not these qualities which are to be desired in his offspring? And would not a horse possessing such qualities be likely to transmit them to his stock?

With regard to a competition between different breeds of horses, I do not quite see why a satisfactory award can be given, unless there is some actual trial work going on. It would be possible to pick out the horse which has the greatest number of good points; for example: A model of form may have bad feet; a three-cornered, clumsy-looking animal may have the best of feet and legs; whilst a third animal, the aggregate of whose points does not amount to much, may charm the judges directly he begins to move, with clean walking action. It should be decided, first of all, what constitutes hereditary unsoundness, and a couple of duly qualified veterinary surgeons be appointed to cast out all horses possessing such unsoundness, before the judges commence their work. Then, I should imagine the horse with the best feet and legs, the greatest power and best action will win. But it is possible that this horse might be bad-tempered or false; what then? I notice that trotting stallions are not spoken of by their appearance, but by their "record"; and I cannot help thinking that a draft stallion should be estimated very much by the dead weight he has been known to move—three fair pulls to "a heat." It will be said that these horses have not been used to such work, and, as a matter of fact, some of them have never done anything at all worthy the name of work. That, however, is no reason why the element of actual trial should not be introduced into all horse competitions. Suppose, for example, some one from the Western States wished to import a Scotch Collie dog. Would he prefer one that had taken chief honors at a dog show—say, at Birmingham, or at the Crystal Palace—for perfection of hair, color, and "doggy" points, or one that had beaten all the field, penning sheep at a competitive trial? I know which Collie I would rather breed from if I wanted his progeny for use as Shepherd's dogs. And I would rather breed from a stallion that would go down on his knees half-a-dozen times in succession, pulling at a dead weight, than from one that could only prance around a show ring on two legs at a time. "No feet, no horse," is true enough, because if a horse has good feet, he can be made to use them, whatever else is bad; but a horse with good feet and legs, powerfully made, and with a good heart, is the horse for me.

Horseback Riding.

There is nothing so good for the youthful blood as "pure and sparkling water" and riding on horseback. The habit should be cultivated by all of our young people, especially young ladies. An early morning's ride gives vigor and health to mind and body and makes the female face glow with health which is beauty. Horseback riding develops the muscles, promotes digestion and makes one become happy and contented, and then it gets one accustomed to handling a horse, which is always a useful art. A number of Grass Valley and Nevada City young ladies may be seen almost any evening, seated upon dashing steeds, galloping away at full speed toward health and happiness. Those girls are always rosy cheeked of face and lithe of form and are consequently good natured and apt to marry good men. There is nothing prettier than to see the female form divine seated upon a gallant horse; old women look at them with envy and bearded men do a good deal of gushing as the fair equestrienne dashes by. Ride horseback every time you get an opportunity and you may live to enjoy a ripe old age and, if you don't fall off and if your mind is particularly active and sound, you may become the editor of a newspaper.—*Grass Valley Daily Tidings*.

The display of stock at the Lake county Fair was the largest ever witnessed in that county.

THE Breeder and Sportsman.

PUBLISHED WEEKLY BY THE
BREEDER AND SPORTSMAN PUBLISHING CO.

THE TURF AND SPORTING AUTHORITY OF THE
PACIFIC COAST.

OFFICE, 508 MONTGOMERY STREET
P. O. Box 1333.

Five dollars a year; three dollars for six months; one dollar and a half for three months. Strictly in advance.

MAKE ALL CHECKS, MONEY ORDERS, ETC., PAYABLE TO ORDER OF BREEDER AND SPORTSMAN PUBLISHING CO.

Money should be sent by postal order, draft or by registered letter, addressed to the "Breeder and Sportsman Publishing Company, San Francisco, Cal."

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

ADVERTISING RATES.—Displayed \$1.50 per inch each insertion or pro rata for less space. Reading Notices, set in brevier type and having no foot marks, 30 cents per line each insertion. Lines will average ten words. A discount of 10 per cent. will be allowed on 3 months, 20 per cent. on 6 months and 30 per cent. on 12 months contracts. No extra rate charged for cuts or cutting of column rules. No reading notice take for less than 60 cents each insertion.

San Francisco, Saturday, October 14, 1882.

WHAT OTHERS THINK.

In the leading article last week we strayed from the idea of a committee of the presidents of the fairs, acting as judges in the races of the circuit, to an individual selected by the various associations whose duty it would be to aid in the troublesome business. This arose from the evident difficulty there would be in securing the attendance of enough of them to perform the functions, and this consideration led to adopting some other method that did not present the same difficulty.

From conversations with men well qualified to judge, the idea meets with favor, and encourages further elucidation. The only objection that is really of much weight is that it places a great deal of power in the hands of one man; as, to make his aid effective, it will be necessary that his associates depend a great deal on his judgment in arriving at conclusions. Still they would exercise a potent effect in guarding against a wrong use of his position, and it would be a bold as well as a bad man who would take the risk of lending himself to any scheme that was not correct. As was stated in the article of last week the salary should be liberal in order to secure the right kind of an officer. This would be an additional incentive to a careful performance of the trust, for when found to be a valuable adjunct in the government of races, there would be a certainty of retaining the office "during good behavior." When the Bay District course was first opened a permanent judge was employed. We thought well of the plan, and the outcry against it was prompted, in the main, by those whose interests ran counter to fair decisions. Still the objections to a permanent judge, employed by and paid by one association, do not hold good where there is totally a different status.

There is a wide difference which will be apparent when the subject is given proper attention. The servant of one body, it might be claimed that he favored the interests of that association, but when his services are secured for the general good the only inducement would be to perform the duties in accordance with the requirements of the office. An impartial judge, uninfluenced by favoritism, or unbiased by a desire to give any one the advantage, he would secure the hearty support of all those who are intent on building up the trotting interest. Owners, trainers, drivers who only desire to have the rules enforced, who do not seek an unfair advantage or that which will require an unjust construction of the rules would be suited under the guardianship of a man thoroughly posted in the code of the National Trotting Association and in whose integrity they would have the fullest confidence. An office of the contemplated stamp could not fail to be a safeguard to those who only desire to be guided by the rules and protected by the rules, and it is nearly unnecessary to state that oftentimes this protection is denied, not from any intention to do wrong as, in a large majority of cases, when errors are made in the stand, they arise from a lack of knowledge or an anxiety to harmonize. Not unfrequently a driver who has the control of one or more trotters of celebrity is granted favors which are withheld from those who are not so fortunate in this respect. He is petted and flattered, his wrongdoings condoned, fearing that in the future he will use his influence to decrease the entries. He grandiloquently states that he will never again trot a horse on the track that has awakened his ire when he does not own a dollar's interest in the animal he drives. He arrogantly usurps the duties of ownership and threatens with all the autocracy of a Bashaw of ever so many tails what he will accomplish. His vaporings have an effect on those who have a pecuniary interest in the meeting, and as a matter of policy they restrain their indignation and permit him to do as he pleases. Sup-

ported by a man who had nothing to gain from the drivers, knowing that there was a combined effort to correct the abuses, and that there would be a uniformity of rulings, the big little man would be compelled to stand on the same platform as those who had not the backing of track celebrities, and equal justice prevail.

From every point of view there are manifestly advantages to be gained, with the one exception, perhaps, of the difficulty of finding a suitable man. We know of several that would "fill the bill," and we are under the impression that one gentleman of our acquaintance might be prevailed upon to accept who would be exactly the "right man in the right place." This is the merest surmise, however, as we are entirely in the dark regarding what his views are, and it may be that he will not agree in the propriety of the measure. While it would be so much the better to have a man who has had experience in trotting affairs these requirements would not be an absolute necessity. With honesty, good, sound judgment, firmness of character, and a fair knowledge of trotting horses it would not take very long to perfect himself in the details. The man whom we refer to could soon instruct another in the duties appertaining to the office. He is one of the very best judges we ever saw occupy the stand, and is more than usually adroit in detecting anything like unfair practice. He has a great fondness for sports of the track, and no one would labor harder to rid them of objectionable features. For the good of the cause it might be that he could be induced to serve for one season, and in the mean time take an apprentice to raise to a higher degree. Possessing large means it is not likely that any pecuniary consideration would influence him to accept the burden, but in order to give the project a fair trial it may be possible that he will lend a hand. Should the various associations conclude to try the scheme we will use all our powers of persuasion to prevail on him to give it a "good send-off," confident that will be sufficient to make it effective, consequently popular.

NOTABLE RACES AT SAN JOSE.

There have been many notable races since the California circuit commenced at Santa Rosa. Horses have distinguished themselves by performances exceedingly creditable, and these not restricted to one class or place. Some of them have been reviewed in the "Breeder and Sportsman," not as fully though as they will when the time comes for the consideration of the breeding questions. As the days grow short in duration of sunshine, and the evenings long, there is more of an inclination to give heed to the problems that breeders are the most interested in.

The last number of this paper contained the reports of two races that are eminently worthy of editorial comment, and which are entitled to rank with the best of the year. The first was a mile and a half dash between May D and Night Hawk, the second a trotting race of heats of two miles in which Albert W and Vanderlynn were the contestants. Both were brilliant efforts. In the mile and a half race it was a run from start to finish, a hot contest for nearly every yard of the distance. Night Hawk on the inside made the running and at the half mile had a length the best of it. The mile was run in 1:43 and then there was only half a length between them. The finish gave May D the race by a short head so that the record is fairly shared by both, though inasmuch as May D had the outside she had actually run some fifteen or twenty feet the furthest. One mile and a half in 2:36 has only been beaten three times. Luke Blackburn ran at Monmouth Park in 2:34. Tom Bowling at Lexington, Kentucky, in 2:34½ and Checkmate in 2:35½. Hindoo ran in 2:36, and this as a three-year-old with 118 lbs up. Checkmate, six years old, carried 119 lbs, Tom Bowling, four years, 104 lbs and Luke Blackburn, three years, 102 lbs. May D, four years old had 105 lbs. and Night Hawk five, 111 lbs. The fastest California time previously made is to the credit of Jim Brown, at the State Fair last fall, when he ran in 2:36½. It will be readily granted that both of these animals are worthy of a good place, and as May D is by Wildidle from Nettie Brown, by Rifleman, there is a double Glencoe cross. Night Hawk is by imported Haddington from a Norfolk mare so that both of them share in the blood of Lexington, and each with Glencoe blood. May D has the outcross of Australian, and Night Hawk of Kingston, the sire of Haddington. Both Australian and Kingston are among the top-sawyers of the English turf, and it is gratifying to find their descendants keeping up the renown of their ancestors. To run so close to the fastest is a merit which is easily understood, for though many are given to undervalue the time standard as a means of comparing the merits of horses, in this country, where the tracks are so nearly uniform, the reports of the watch have a great bearing in making a correct estimate. To reduce the California record three-quarters of a second is something of which the owners should feel

proud, and when also that is so very near the best of the East there are additional causes for congratulation.

The time of the second heat of the Albert W., and Vanderlynn race, is the third in the Calendar. Steve Maxwell at Rochester, August 11th, 1880, trotted in 4:48½ and for twenty-one years before that of Flora Temple, 4:50½, retained the pride place. A second heat in 4:51, and that accomplished by a four-year-old stallion, can be placed alongside of the others, without losing by comparison. There had been rain, soaking the track until the races had to be postponed, and when the heats of two miles were trotted, it was still far from being in the best order. The first heat in 5:04½ was not bad under the circumstances, and then the reduction from that time of 13½ seconds stamped both horses as capable of going the route in very fast time. There is scarcely a question that Vanderlynn can equal the time of Sten Maxwell and Albert W. excel it.

THE HAMMOND SALE.

In the advertising columns will be found a notice of the sale by Kilip & Co., of the Stock of N. D. Hammond. Some very valuable animals are offered. Poscora Hayward demonstrated capassity which gives him a good position in the ranks of trotting stallions, and had it not been for the drawback of lameness, precluding him from filling his engagements in the circuit, he would have reduced his record of 2:25 materially. His colts are showing very well, and there is a report from Sacramento, that his yearling from A. Rose is showing a flight of speed that marks him for a wonder. The Grand Moor was bred at Sunny Slope, and is a fine looking, big horse, that should prove a famous foal-getter. His half brother, Sultan, has already acquired a world wide reputation, and another of the same relationship, Del Sur, is also making his mark. The three are by The Moor, and though the practice has been to call only those from the same mare half brothers, there is more of technicality than sense in the distinction. As will be seen some desirable mares and colts are offered, and the sale takes place on Wednesday, the 26th inst, at the Dexter Stables, Oakland.

LOS ANGELES FAIR.

There is a grand prospect for the fair at Los Angeles, which commences next Monday. Never before has there been so much interest taken by the people of the lower country, and we hear that there will be large delegations from all of the towns to the southward.

There is little doubt that in the course of a few years the sixth district will occupy a prominent position among the California agricultural exhibitions. It is not only the great wine and orange section of the State, but it is equally as famous as a horse-breeding country. Sunny Slope, Santa Anita, Dew Drop and Elva breeding farm have turned out some of the best, and these have made their mark in the East as well as at home.

It is a grand place to visit at this season of the year, and those from the upper country who can afford the time could not put in a more pleasant week than that on which the fair is held. There are many interesting points to visit, and the mornings of October are so lovely in that climate that there is an actual and intense enjoyment in existence. Now that the trip has been shortened to a few hours, the time in transition is not burdensome, and there is a promise of grand sport on the track as is shown by the entries published last week.

THE PEDIGREE OF JOHN NELSON.

We are very much obliged to our friend Thomas B. Merry for his letter in relation to the pedigree of John Nelson. It was not in this country where the question of the authenticity of the breeding was raised, but by some of those rabid, crazy, mendacious, thoroughbred-hating scribes of the East. The whole animus was to gratify a disposition to discredit trotting pedigrees with thoroughbred strains, but the game is so nearly played out that few comparatively are misled by the attacks. Mr. Merry has, probably, a more intimate knowledge of the old-time horses of the Pacific Coast than any other person, and he will place us under additional obligations by sending an occasional screed to the "Breeder and Sportsman."

THE VICTORY OF WILDFLOWER.

The mail accounts of the race for the Mali Stakes won by Wildflower, do not add much to the telegram received here at the time. The N. Y. Herald credits the stopping of her work for three weeks and the long journey had affected her prejudicially. It is stated that she went short in scoring for the first heat, and that must have been occasioned by a lack of form. When she trotted her great race against time last fall and also

when she made the quarter in 32 seconds her action was remarkably good. She was not long-strided but moved with the greatest ease and covered ground enough. The "let up" in her work had probably more to do with loss of speed than the effects of the journey, as the Electioneers need a good deal of exercise to develop their speed. The first race which Wildflower trotted was far beneath the rate which she showed afterwards, and every time she was brought out she went faster. Then the pinkeye seized her so that she could not be exhibited at the State Fair, and another "let up" was the consequence. We have the greatest faith in Governor Stanford's assertion that the most disastrous results follow compulsory breaks in training, and especially with colts. Should Wildflower be granted the opportunity of trotting a few races before the season closes, she will convince the Eastern people that her action is all right, and that she can handily lower the records. The following is a

SUMMARY.

GENTLEMEN'S DRIVING PARK, N. Y., October 5, 1882.—The Mali Stakes, for foals of 1879; \$250 entrance, with \$500 added by Mr. H. W. T. Mali, closed July 2, 1881, with thirty-four nominations in which the second payment of \$50 forfeit was due May 1, 1882, and the final payment of \$150 forfeit due September 13, 1882; value, \$4,500. Palo Alto Stock Farm names b f Wildflower, by Electioneer—Mayflower, by St. Clair. (Marvin)..... 1 1 Baker & Harrigan name b r c Meander, by Belmont—Minerva, by Pilot Jr. (Murphy)..... 2 2 W. H. Tabor names b g Senator Sprague—Mila C, by Blue Bull. (Hurd)..... 3dis T. Kilpatrick names b f Lucy Walter, by Sir Walter—Semonita, by Sentinel. (Webber)..... 5dis R. Steel names b c Earnest Maltravers, by Happy Medium—Priceless, by Volunteer. (Irwin)..... 4dr.

TIME.

	Quarter.	Half.	Three-quarters.	Five.
First heat.....	37½	1:14	1:52½	2:32
Second heat.....	36½	1:12	1:49½	2:27½

THE COMING RACE MEETING.

The list of entries published elsewhere is a conclusive testimony that the approaching fall meeting of the Pacific Coast Blood-Horse Association is sure to be successful and a very exciting one. This estimate is not only predicated on the number but has the better base of those engaged being so nearly together, that the contests are certain to be the hottest kind of battles. Thus far there are nine in purse, No. 1, a dash of three-quarters of a mile, in No. 2, one mile for maidens, there are eight, in No. 3, 1½ miles handicap, there are ten, and in No. 4, which is a selling race 1¼ miles, there are seven entries. These races come off on the first day, Saturday, November 11th and there cannot fail to be fine sport. On the second day of the meeting, first regular day, fine races are on the bill. The Ladies' and Vestal Stakes are among the "fixed events," the nominations in which were published two weeks ago. The extra races are heats of three-quarters of a mile, eleven entries, a handicap dash of a mile for two-year-olds, three in it, and a hurdle race of 1¼ miles, over five hurdles with three jumpers engaged. November 18 are four races, with sixteen, nine, nine and three, the latter being a hurdle race, and on the closing day, November 23, there are the Finigan Stake, with twenty-nine nominations, the Fame Stake with six subscribers. The Finigan is a dash of a mile for two-year-olds, the Fame Stake a dash of two miles for three-year-olds, and the Baldwin is a post-stake of four miles. The usual Consolation Purse closes the meeting, and any one who will take the trouble to look over the list of entries and nominations will agree with us that there cannot be a failure and that the racing will be of the best description.

EDITORIAL NOTES.

The trotting stock of W. D. Hammond of Oakland will be sold at auction by Killip & Co., on the 26th inst. at the Dexter Stables, Oakland. The catalogue includes the stallions Poseora Hayward and Grand Moor, the broodmares, Lady Lightfoot and Hambletonia, and some colts that will attract the attention of horsemen. An announcement of the sale will be found in the advertising columns of the BREEDER AND SPORTSMAN this week.

In Last Weeks Breeder and Sportsman in the note regarding the record of Graves by a typographical error the year was given as 1874. Graves' fastest heat, 2:19, was made at Stockton, September 20, 1879.

The three Embryo Stakes that are to be decided on the Oakland Trotting Park Saturday, the 4th of November, will be the first time in the history of the track when yearlings, two-year-olds and three-year-olds will be brought together in important stakes in the same afternoon, and there is already a mild interest manifested. A table was prepared by the Secretary for publication in this number of the BREEDER AND SPORTSMAN, but as it was found necessary to write to a subscriber to clear up a little ambiguity in the declarations, the publication had to be postponed until next week.

Metropolitan by Echo from Black Swan by Ten Broeck, and, consequently, a brother to Annie Laurie, T. B. Merry informs us won a second heat at Walla Walla on the 5th inst. in 2:36. It was a very close thing between him and

Adelaide by Alwooe and altogether the best two-year-old race ever trotted in the North Pacific Coast. Metropolitan was sold by J. B. Haggin to Charles Russell of Walla Walla, and Dr. Mack is the owner of Adelaide, and also his sire Alwood.

The Stanford Stakes are to be decided next Saturday the 21st inst. on the Bay District course, and there is a likelihood of another race being gotten up to make out the sport of the afternoon. As has been previously stated, this is the largest trotting-colt stake ever gotten up, and the amount now at issue is \$3,500. We must acknowledge that the stake has an absorbing interest to us, having a colt engaged in it, and what with the pinkeye and the rain interfering with his work, we are somewhat "tribulated." We anticipated giving him ever so many heats to-day, and Thursday being so beautiful and every one predicting a cessation of the downfall for some time, that all we did was to "fag him out" a little. Friday morning there was a gentle rain, but coming so easily and methodically that it was evident it was more than a passing shower. Inasmuch as there was no provision for "good day and good track" there can be no postponement and those which have such a wet weather track as there is at Palo Alto or the sandy streets of Oakland to work upon, have a great advantage over the macadam or adobe we are confined to.

Ho! for Australia.—In our next we will be able to give the names of the horses that are to be sent to Australia to trot at the meeting of the Victoria Club. There is now the likelihood of quite a delegation being sent, and those of the right stamp, with which we are well pleased.

Hurrah for Hinda.—Again the California banner flies from the ramparts, and this time over the hitherto invincible stronghold of the Kentucky Breeders. The race took place on the 11th, and the only intelligence is the following meager telegram which was received by Governor Stanford:

LEXINGTON (Ky.), Oct. 11.—Hinda Cose won the race to-day in the two-year old class. Lost first heat, time 2:36; won second heat, time 2:31½; won third heat, time 2:32; lots to spare. Eight started.

Next week we will give a full account of the race.

BICYCLING.

Annual Twenty-mile Championship Race of the Boston Bicycle Club.

The third annual twenty-mile contest for the gold medal and championship of the Boston Bicycle Club was held at Beacon Park, Boston, Sept. 9, and proved both interesting and successful.

The track was in good condition, but a very strong wind was blowing, at times almost a gale, which rendered very fast time impossible. There were eight entries, but Messrs. J. S. Dean and W. B. Everett withdrew, and the following faced the starter: W. H. Edmands, F. H. Childs, F. Morris, C. L. Clark, B. L. Knapp, L. T. Frye. This was the first appearance of Mr. Frye upon the race path since his serious road accident last May, and he was welcomed cordially, and his riding was watched with much interest. At the sound of the pistol all got off well, Clark taking the lead, and completed the lap in the following order: Clark, Edmands, Frye, Knapp, Childs, Morris. Then Frye took the lead and maintained the position throughout the race, riding in his usual fine form and continually increasing his lead. On the third lap Clark fell back to third place, and Morris, who now began to show his mettle, was rapidly overhauling all those between himself and Frye, and on the completion of the second mile ranked second, with Edmands, Clark, Childs and Knapp following in that order, which remained unchanged to the end, except that Clark withdrew at three miles and a quarter, Knapp at thirteen miles and Childs at fourteen and three quarters. Meanwhile the other three stuck to the path despite the discouraging effect of the high wind, each desiring to beat the club record or at least win a standard medal. The timers knew already that Frye would beat Stall's time if he met with no mishap, and Morris also was showing wonderful endurance and constantly increasing his lead on Edmands. The riders were now being urged and encouraged by the spectators, and Capt. A. D. Claffin of the Newton Club went on the pace for Frye assisting him materially, while Clark of the Bostons again took the track to help Edmands, whose chances for securing a medal began to look slim; Morris, however, being now not only sure of his medal, but also sure to beat Stall's time. Frye completed his race a mile and a quarter ahead of Morris, and the latter came in about the same distance ahead of Edmands, who also won a medal by four and a half seconds inside of the standard time. The times taken were as follows:

	5 miles	10 miles	15 miles	20 miles.
Frye.....	18:28	37:41	56:56½	1:15:34½
Morris.....	40:19½	1:00:15½	1:21:12½
Edmands.....	1:24:55½

The championship medal must be won three times to become the permanent property of the winner. The machines ridden by the winners were: Frye, a 58-inch Yale racing machine; Morris, a 52-inch Yale roadster; Edmands, a 56-inch British Challenge. Frye and Morris both beat the best outdoor time, although the record is much lower, C. D. Vesey of Surrey, England, making it at the American Institute Rink in New York in 1h. 15m. 4s.—World.

The Bicycle Tournament.

The bicycling tournament which took place September 20th under the auspices of the Springfield (Mass.) Club was the most successful event of the kind which has yet taken place in this country.

It was extensively advertised, circulars were sent out, and preparations made on a large scale. The prizes for the races were valuable, amounting to some \$475 for the amateur races and \$500 for the professional race, besides \$200 for the ladies' race.

Many wheelmen came on the previous day, and on the morning of the event a large number of others arrived so that when the hour for the parade arrived there were some two hundred to join in the procession, representing twenty-five or thirty clubs, from different States. The procession

was formed in two columns each preceded by a brass band of twenty pieces, and after the parade dismounted at the fair grounds for the races. Everybody who could get away seemed to have gone, and the crowd at the Park was estimated at from twelve to thirteen thousand persons. The day was pleasant, no sun or wind, and the track which is of clay was in fine condition.

Nine men started in the mile race, getting off well together, but Hendee of Springfield and Moore the English mile champion of this year soon drew out from the rest, Moore following close upon Hendee's wheel until in the home stretch he passed the latter and crossed the line in 2:54½, Hendee, 2:55, Norton of Natick, 3:14. The second heat was a repetition of the first, the times being 2:57½ for Moore, 2:57½ for Hendee, and 3:07½ for Norton.

Seven started in the two mile race, V. C. Place of Greenville, Penn., leading until the home stretch was entered forth for the last time, when after a gallant struggle Moore passed him, winning the heat in 6:14 Place 6:14½. The second heat was a repetition of the first, Moore's time, being 6:21½, Place 6:23½. The half mile dash brought out seven starters, the winner being Hendee in 1:24½ Hatch of Northboro second in 1:29½.

The five mile race had six starters, but the judges insisted upon the Englishman giving the other competitors a start of thirty seconds. Place soon gained a good lead, and was followed by Claffin of Newton. As soon as Moore was allowed to start, he began to gain at once and soon overtook the majority of the riders, but Place and Claffin maintained their lead until the commencement of the fourth mile, when the positions were: Place, Moore and Claffin, Moore soon overtook Place, and followed him until in the home stretch he put on a spurt, which was answered by the Pennsylvanian, and the two came down the stretch side by side, but Moore made a tremendous final effort and passed under the wire two seconds ahead of Place; time from commencement being 16:17½. Deducting Moore's handicap of thirty seconds, his actual time was 15:47½.

Louise Armaido having no female competitors, her manager rode with her in the five mile race, receiving a start of half a mile. Louise soon overtook him and completed the five miles in 20:55½. In the twenty mile professional race, G. S. Prince allowed G. E. Mellin and Thos. Harrison to ride five miles each at a time, winning finally in 1:8:10½. The one, two and five mile records were all lowered at this meeting.

The recent road race in England had fourteen contestants. The winner made the first fifty miles in 3:47:40, something over thirteen miles an hour up hill and down. This shows that the tricycle is by no means as slow as some may think.

The Philadelphians are preparing for a meeting of bicyclists on the occasion of the bi-centennial celebration, and expect to have a large attendance and a good time.

The English five mile professional race at the Ayleston grounds, September 9, was won by F. Wood, who beat R. Howell, the one mile champion, in 14:42 2-5, this being the best on record.

At Exeter, September 2, one mile was done upon a bicycle in 3:31 2-5 and three miles in 12:28 1-5.

Sea Gull.

SACRAMENTO, October 12, 1882.

EDITOR BREEDER AND SPORTSMAN: I find the sire of "American Boy" (sire of "Belmont"), to be "Sea Gull." There are several Sea Gulls. I believe however that the sire of "American Boy" was by imported "Expedition." Am I correct in my inference?—WILBER F. SMITH.

Answer.—You are correct, Sea Gull the sire of American Boy was by imported Expedition, dam by imported Sourerout.

POULTRY.

Poultry Raising.

An English contemporary gives the following facts concerning the methods of poultry raising in Sussex, England: The usual food for fattening consists of ground oats, suet and milk—skimmed or unskimmed—to which sometimes a little linseed oil is added, especially in winter. At first chickens have to be fed carefully, if not charily. Allowing them three weeks, they are as a rule kept on oatmeal (made into gruel) one week; then suet is added, and the last week they are crammed. Milk is highly valued as an addition to the ordinary diet, and one poultry breeder has used as much as \$50 worth a week. Cramming is done with a machine, and the chickens have their crops filled twice a day. This process is continued for about a week, supposing a preparatory course to have been gone through. After about a fortnight the food ceases to take effect; but so long as they are not kept beyond the proper period, it is surprising how few deaths occur in their ranks.

Fowls or chickens are fattened up to any weight, two pounds, or five, or eight, or more. Mr. Oliver produced one weighing thirteen pounds. There are farmers who lay themselves out for this as a specialty, fattening all the year round, and keeping their coops full. Among this class Mr. Joseph Oliver takes the lead, keeping about 200 dozen always in hand, and killing forty dozen at a time in the busy season, even 6 times a week. He uses nearly 700 sacks of oats a quarter, \$800 worth of milk, and 9800 pounds of suet. He keeps six men constantly employed, and about twenty women. It is estimated that no less than \$350,000 per year is realized by the sale of chickens in the small district bordering on Brighton, the queen of the English watering places.

BLACKLEG.—The Dallas Times Mountaineer says: "It appears that this disease is making ravages among the cattle in the southern portion of this country, and several have already died from that cause. The Pineville paper learns from the boys who have just returned from the round-up at Bear creek that it is raging among the cattle of that section. It is not known to what extent the disease has spread, but many calves have died from its effects. It is chiefly confined to calves and yearlings, causing death in a few hours after its appearance. Under the circumstances, situated as the cattle men are, and having such large numbers to care for, it is impossible to apply any remedy, and the contagion must take its course, with what disastrous results we are unable to foresee."

J. Jacobs, M. R. Chamblin, R. Black, Ed. Schnafel, F. C. Bethell, F. Struvel, Frank Staples and J. R. Hall have been elected members of the San Jose Sportsmen's Club.

G. Valensin's brown pacing mare Ouida died on the ranch of her owner near Hicksville, Sacramento county, after the close of the Stockton fair.

THE GUN.

The Ladies to the Front.

DES MOINES, IOWA.

EDITOR AMERICAN FIELD: About the last days of August, my daughter, who lives in Pueblo, Col., was on her way home from this place, over the C. B. and Q. R. R. via Denver, and she writes me as follows:

"We met a young woman on the cars, going prairie-chicken shooting, with her own gun and dog. She had a lovely brown velvet hunting suit on, and seemed a real lady in every way."

I would be glad if more ladies than do would go hunting, and if more of them could handle a double gun well, and shoot on the wing. With lady companions, some of us would carry a better moral bearing into the field, have more genuine pleasure and sport, and drink less whisky and beer. It is true that with these lady companions we might kill less game than we now do, but it is time we should slack up on this wholesale slaughtering business. Game is getting too scarce for this, and we should not go hunting solely to kill, but for recreation and enjoyment. Our hunting parties should be genuine pleasure parties, and for this our wives, sisters and daughters would be no detraction to the true gentleman.

Furthermore, our shooting tournaments might properly be attended and participated in by ladies. Ladies are the soul of archery clubs, and they could properly and well be of gun clubs. Archery practice is but tame sport compared with that of the double gun, and ladies' tastes are not dull. They would appreciate the change to the gun with delight, as soon as it became popular. The traps, distances and clay birds and glass balls could be arranged to equalize the ten and twelve gauges of the gentlemen with the sixteens and twenties of the ladies, and where is there a true gentleman or sportsman who would not enjoy a clay bird or glass ball tournament on a beautiful lawn, in which ladies would be his competitors and his equals in the matches?

ELAND.

You are right, Eland; we, too, would be glad to have the ladies more expert in the use of the double gun. If there is anything the ladies are afraid of it is a gun—or a mouse. Your theory may be good in the main, but it has its bad as well as good points. You say our moral bearing would be improved. Now what will make a man swear quicker, when he is just ready to shoot, than a gentle female voice calling: "Oh, George! do come and help me over the fence," or "what shall I do? I've got a blackberry sticker in my stocking." Away goes the game and a man's moral bearing is elevated—perhaps.

Yes, it would be very romantic to go hunting with a nice young lady and you are quite right in your remark that there would be less game killed; in fact we doubt if there would be any killed.

No doubt game would like the new idea. All one would have to look out for would be to see that he did not get shot himself. You say that our hunting parties would be genuine pleasure parties; true, it would be very much like a Dutch picnic where one takes "his sisters and his cousins and his aunts." Eland, we are afraid your theory will take too great a hold on our hunters, as they will all be taking their mother-in-laws out hunting. Though we would not joke on such matters, the idea is very suggestive and we are afraid that the joke would fall on the mother-in-law. No, these lady hunters will never do; no married man who has his life insured would feel safe for a moment while in the field as he would be, asleep or awake, continually haunted by a night-mare of glass balls, clay pigeons, mangled hunting dogs, accidents and many other things equally horrible.

Prairie Hens.

The prairie hen, or pinnated grouse, is a peculiar form of the grouse family restricted to the United States, and found chiefly on comparatively open plains and prairies. It is found in great numbers on the plains of the Western States, and forms a favorite object of sport. They are a bold, almost unapproachable bird, especially in flat countries like the prairies. They are very wary and have good eyes and quick ears. If the sportsman descends upon them from an eminence they are sure to spy him and hide or fly off to a distance. This species, once common in the Atlantic States, is now mostly confined to the West. The old name in New York was heath hen.

It has a tail of eighteen feathers, short, truncate, and much graduated, and a tuft of long, lanceolate feathers on each side of the neck, covering a bare space capable of considerable inflation. The plumage is covered with transverse bands of white on a brown ground, the latter nearly black, and the former with a rufous tinge above; long feathers of the throat black, though different specimens vary much in color. The length is about seventeen inches, with an extent of wings of twenty-eight inches, and an average weight of three pounds. The species is at once recognizable by the extension of feathers to the lower end of the tarsus, the air-bladders, and the long and lanceolate feathers of the sides of the neck and the short subtruncate tail.

This species feeds chiefly upon acorns, buds, leaves, berries and grains. In some places it encroaches considerably upon the domains of the farmer. These birds do not migrate, but remain all the year in their favorite and barren grounds. In the spring the males are in the habit of meeting at break of day in what we call "scratching places," where they swell and strut with great pomp and engage in fierce contests, uttering a peculiar sound rendered more intense by the large inflated sacs on the sides of the neck. Their flesh though rather dry is excellent food, and during the cool season immense numbers are forwarded from the West to our Eastern markets.—*American Cultivator*.

Ducks, since the rain of last week and the fore part of this, are becoming more plentiful, and our local sportsmen get very fair bags when they go out now. One young gentleman bagged thirty mallards and sprigs on Tuesday last, and nearly all report the same average of "Inck."—*Solano Republican*.

The Supervisors of Santa Clara county have enacted an ordinance for the protection of female deer, which includes all the provisions of the code lately in existence for the same purpose.

Eastern Game Laws.

In New York a reference to the game laws shows that the wild fowl shooting on Long Island begins on October 1 and may be carried on until the first of next May. Already the restrictions have been removed as regards the killing of ruffed grouse (partridges) and woodcock, and both these choice birds can be shot until the beginning of the new year, while deer can be hunted until the 1st of December. But the law also goes on to say that neither quail nor rabbits can be killed until the 1st of November, and at all times no game can be legally exported from the State. Over in New Jersey the second season of the year for shooting woodcock opens Oct. 1st and continues until Nov. 16.

The law also provides that the pinnated grouse (prairie chicken) may be shot on the 15th inst. by all those who happen to meet one in their travels, and between that date and the first day of winter; but, as in New York, all persons are forbidden to shoot or have in possession until November 1st any quail, ruffed grouse (partridge) or rabbit, when they may be killed until January 1st. But discriminations against non-residents obtain in New Jersey, and all who go afield must be armed with a license. The New Jersey Fish and Game Protective Society has jurisdiction over the entire State, of which Mr. W. L. Force, of Plainfield, N. J., is secretary, and those who wish to shoot or fish in Camden, Gloucester, Atlantic, Salem, Cumberland and Cape May counties must obtain a membership certificate of the West Jersey Game Protective Society, Mr. W. T. Miller, secretary, Camden, N. J.

In Connecticut, however, the law is more uniform in its opening day than in the above named States, and the season for woodcock, ruffed grouse and quail shooting is ushered in October 1, and remains intact until January 1. Wild fowl shooting is also in season at this time, as it opened on September 1 and will continue to May 1, but those who follow it are restricted to shooting none but shoulder guns, and the sailing for fowl and the employment of sink boxes on the feeding grounds is expressly forbidden. Rail also may be shot until the 1st of January next.

In Pennsylvania, to where a large constituency of city sportsmen wend their way, ruffed grouse shooting opens October 1 and does not close until January 1. The same dates also govern the killing of pinnated grouse in those sections where recently these prairie hunting birds have been introduced. Deer can also be shot from October 1 until December 1, and quail and wild turkeys from the 15th inst. until January 1; but rabbits are not legal prey till November 1, and after that date may be killed on to January 1. Woodcock, however, are in season from July 4 to January 1; squirrels from September 1 to the end of the year, and wild-fowl from September 1 to the 15th of next May. The law which regulates the shooting in Pike county differs slightly from the general law and reads as follows: "Deer may be shot from October 1 to December 1, but in no event shall they be killed in the water. Wood ducks from October 1 to January 1, rabbits from October 15 to December 15, squirrels from September 1 to December 15, woodcock until December 15, quail from October 15 to December 1, and ruffed grouse from September 15 to December 15." The penalty for infringement of these laws ranges from \$5 to \$25 for each bird or species of ground game shot out of season.

Imperfect Game Protection.
